2. With the removal of *micchā diṭṭhi*, a *Sotāpanna* will be incapable of doing the following six deeds (per "[WebLink: suttacentral: Bahudhātuka Sutta \(MN 115\)](#)"):

- (i.) Killing one's mother.
- (ii.) Killing one's father.

- (iii.) Killing an *Arahant*.
- (iv.) Injuring a Buddha.
- (v.) Causing *saṅgha bheda* (spreading wrong Dhamma is included here).
- (vi.) Taking refuge in anyone other than a Buddha (i.e., believing in other ways of “salvation”).
- Furthermore, a *Sotāpanna* will avoid an unimaginable amount of future suffering.

Future Suffering Removed by a *Sotāpanna*

3. [WebLink: suttacentral: Nakhasikha Sutta \(SN 13.1\)](#) describes the vast amount of defilement removed by a *Sotāpanna*.

- One time the Buddha picked up a little bit of dust with the tip of his fingernail and asked the *bhikkhus*, “What do you think *bhikkhus*? Which is greater: the little bit of dust I have picked up with the tip of my fingernail, or the soil in this great Earth?”
- Of course, the *bhikkhus* answered that the amount of soil on this Earth is vastly more massive than the bit of dust on a fingernail.
- Then the Buddha told the *bhikkhus* that the amount of suffering that a *Sotāpanna* has removed could be compared to the soil on the whole Earth. The amount that he/she has left to stop can be compared to the bit of dust on his fingernail.
- Therefore, the amount of suffering a *Sotāpanna* has left in future rebirths is insignificant compared to that of an average human.

4. More analogies are given in a series of suttas starting with “[WebLink: suttacentral: Pathamasinerupabbatarāja Sutta \(SN 56.49\)](#).” “The amount of suffering a *Sotāpanna* has to endure can be compared to **seven grains of sand** on top of mount Sineru. The amount of suffering a normal human has left to endure can be compared to sand in the whole mountain.”

- That is logical since the suffering encountered in the *niraya* never ceases. One birth in the *niraya* (hell) would lead to much more suffering than thousands of births in the human or higher realms.
- A *Sotāpanna* will NEVER be reborn in the four lowest realms due to the complete removal of ONE *dasa akusala*, that of *micchā diṭṭhi*. Furthermore, he/she will have only **seven future bhava** left and those in the human realm or the realms above it.

Removal of *Micchā Diṭṭhi* Is Enough to Become a *Sotāpanna*

5. That may be why most people tend to think that attaining the *Sotāpanna* stage requires attaining *jhānā*, all sorts of *abhiññā* powers, etc. **None of that is a requirement for achieving the *Sotāpanna* stage.**

- One may think that a *Sotāpanna* would have removed at least half of the ten evils (*dasa akusala*.) **It turns out that a *Sotāpanna* completely removes only one of the *dasa akusala*, that of *niyata micchā diṭṭhi*.** Of course, in achieving that, a *Sotāpanna* would have reduced the “*apāyagāmī* strength” of most of the other *dasa akusala*. That is the key to understanding. In particular, *abhiijā* [*abhiijhā*] or *lobha* reduced to *rāga* level and *vyāpāda* or *dosa* is reduced to *paṭigha* level; see, “[Lobha, Dosa, Moha versus Raga, Patigha, Avijjā](#).”
- For a discussion on *dasa akusala*, see, “[Ten Immoral Actions \(Dasa Akusala\)](#).” As discussed in that post, *Niyata Micchā Diṭṭhi* (**established** wrong views) is an *akusala* done with the mind.
- A *Sotāpanna* is said to have achieved “*dassanena pahatabba*” or removal of defilements via correct vision. **He/she has removed an unimaginably vast amount of evils (“*keles*” or “*kilesa*” or “*klesha*”) with the removal of *micchā diṭṭhi*,** or attaining the first stage of *Sammā Diṭṭhi*: the true nature of this world of 31 realms.

- How a *Sotāpanna* reduces *dasa akusala* via getting rid of *micchā diṭṭhi* “to overcome *apāyagāmī citta*” is discussed in “[Akusala Citta – How a Sotāpanna Avoids Apayagami Citta](#).” Here it is described how five out of the 12 *akusala citta* do not arise after the *Sotāpanna* stage; **those are the five that lead to birth in the *apāyā*.**

6. That is a critical point to understand. Removal of *micchā diṭṭhi* leads to the stopping of highly immoral actions. Most people worry excessively about the defilements done with the body and speech. They are afraid of even accidentally killing an insect or telling a “white lie.” Of course, those must be avoided, too, because moral behavior (speech and actions) are a prerequisite for cleansing the mind.

- But having *niyata micchā diṭṭhi* is million-fold more weighty. These and other types of *Niyata Micchā Diṭṭhi* (**established** wrong views) are discussed in “[Ten Immoral Actions \(Dasa Akusala\)](#)” and “[Mahā Cattārīsaka Sutta \(Discourse on the Great Forty\)](#).”
- It would be beneficial to understand the weights of different types of *kamma*; see “[How to Evaluate Weights of Different Kammās](#).”
- If one has a vessel that is leaking water, there is no point in trying to plug the smaller holes first. One should seal the largest hole first, which in this case is getting rid of *micchā diṭṭhi* or false views (about this world).
- That may still not convince some. If so, see whether this conclusion contradicts anything in the *Tipiṭaka*. One should carefully examine all the “requirements” that must be fulfilled to attain the *Sotāpanna* stage. It should become clear that this is all one needs to do.
- **And that comes only via learning Dhamma, the correct version**, the version discovered by the Buddha and passed down through generations of Noble Persons or *Ariyā*. We discussed in detail in the post, “[Four Conditions for Attaining Sotāpanna Magga/Phala](#).”
- Of course, one needs to have removed *micchā diṭṭhi* even to become a *Sotāpanna Anugāmi*: “[Micchā Diṭṭhi, Gandhabba, and Sotāpanna Stage](#).”

The Next Step

7. A *Sotāpanna* has removed the “wrong views” about the nature of this world. But the tendency to “feel” that there are mind-pleasing things in this world is still there.

- That is why we need to comprehend the term *saññā*, commonly translated into English as “perception.”
- Of course, *Saññā* is one of 52 *cetasika* and one component of *pañcakkhandha*. It is one of the seven universal *cetasika* that arise with every *citta*.

8. *Saññā* works very closely with another universal *cetasika* called *manasikāra*. *Manasikāra* is the *cetasika* that brings old memories and future hopes into a *citta*. When *cetanā* “puts together the *citta*,” the *citta* recognizes the subject (*saññā*) and automatically produces *vedanā* (feelings) about it. Thus we can see the significant roles of those four *cetasika* right away.

- But *saññā* is not limited to “recognizing objects.” *Saññā* is the “inner understanding” of any concept.
- For example, when we hear “fire,” we immediately recognize that. Even a picture of a fire may flash in our minds. But a baby (or someone who does not understand English) does not have a “*saññā*” for that word; it means nothing to them. But the baby (or that person) can understand what “fire” means if we teach it to them.
- Growing up, we acquire innumerable “*saññā*” mostly by becoming familiar with them. We first recognize who “mother” and “father” are, know different colors, different objects, etc. For details, see “[Saññā – What It Really Means](#).”

9. Even though we acquire “*saññā*” for most objects and people, some strong *saññā* may be “passed down” from previous lives. That can take many forms.

- When visiting a place that one had never previously visited in this life, some people may already “know” about that place in great detail. Children who remember past lives have been reported to lead investigators to various locations in faraway cities where they had lived in previous lives. Many adults have said they can walk a city with complete confidence that they are visiting for the first time.
- Then there is the “ability” to play the piano, recite *suttā*, or just be able to comprehend complex mathematics as a child, etc. Some of these cases discussed in “[Evidence for Rebirth](#).”

10. We “acquire” most *saññā* through our families first, then through friends, schools, workplaces, etc.

- Thus most of our “world views” or *diṭṭhis* are acquired through our families. Our first impressions of moral issues, politics, and religions come from our families.
- Those *saññās* are hard to change, depending on how forcefully and frequently they have been used.
- However, the human mind is unique. When given enough substantial evidence, one’s *saññā* about something or some concept can PERMANENTLY change. For example, when one learns how to do algebra (addition and subtraction, etc.) correctly, one will never forget that. And even if an authority figure (a teacher) insists that one plus two is four, even a child will not accept that. He/she can count fingers and show the teacher that the correct answer IS three.

11. As we grow up, we acquire *saññā* for more specialized tasks. One could “learn” to become a carpenter, a doctor, an engineer, etc.

- **This “learning” is acquiring “*saññā*” for a particular task. It is not just memorizing how to do things.** When a physician finishes his/her learning, he/she can “troubleshoot” a brand new patient and figure out what is wrong. When an engineer builds a new structure, it could be something that has not been made before. One acquires “skills.”
- Once one learns a “skill,” one will never forget that; at least it is easy to “get back to it.” One who had learned to ride a bicycle as a child may never touch a bike for 30-40 years. But even at old age, he can ride a bike with minimal effort.

Removal of “*Micchā Saññā*” or “*Saññā Vipallāsa*” Needed for Higher *Maggā Phala*

12. *A Sotāpanna* acquires a basic level of understanding about “this world” and that “knowledge” or “comprehension” does not go away even in future lives.

- Once someone sees a “glimpse” of the Buddha’s core message, in the long run, there is no permanent happiness to be had by wishing for anything in this world
- That kind of a “vision change” does not happen quickly unless one has “*saññā*” about that from previous lives; that is why it is easier for some people to grasp these concepts.
- And this “*saññā*” cannot be acquired via memorizing *suttā*, how to recite the *Paṭicca Samuppāda* cycle, etc. Instead, one needs to COMPREHEND the concepts.
- The KEY concept to grasp is the “*anicca saññā*.”

13. The only way to “build up” the correct *saññā* is to make an effort to understand the key message of the Buddha. Humans usually have wrong perceptions or “*vipareetha saññā*” that one can find happiness in this life by working hard. Most people do not even think beyond this life, even if they believe in rebirth. That is also called the “*nicca saññā*” (pronounced “*nichcha saññā*”), i.e., by working hard or by sheer luck, one can achieve and maintain things in this world to one’s satisfaction.

- **The fundamental teaching of the Buddha is about the “*anicca saññā*,” i.e., it is NOT POSSIBLE to maintain ANYTHING to one’s satisfaction in the long run.** The *Sotāpanna* stage of *Nibbāna* is attained when the *anicca saññā* is cultivated to some significant extent.

- When one has developed the *anicca saññā* to this level, one's mind automatically blocks “*apāyagāmi citta*.”
- As we discussed in the *Abhidhamma* section, *citta* flow very fast, and we do not have control over those initial *cittā*. In extreme cases like sudden rages or sheer greed, we will be unable to “control ourselves” without permanently removing “*apāyagāmi gati*” by getting rid of *micchā diṭṭhi*.
- It is this *anicca saññā* that grows as one attains higher stages of *Nibbāna* (*Sakadāgāmi* and *Anāgāmi*) and peaks at the *Arahant* stage. At the *Arahant* stage, one can see the “*anicca* nature” of ALL *saṅkhāra*, not only *abhisāṅkhāra*. That is what is expressed by “*Sabbe saṅkhāra anicca*,” and in the *Girimānanda sutta*, the Buddha told Ven. Ānanda, “*Ayaṃ vuccati Ānanda, sabba saṅkhāresu anicca saññā*”; see, “[Anicca, Dukkha, Anatta – According to Some Key Suttā](#).”
- Therefore, before worrying about *anicca saññā*, one must remove the **wrong diṭṭhi** by becoming a *Sotāpanna*. See, “[Vipallāsa \(Diṭṭhi, Saññā, Citta\) Affect Saṅkhāra](#).”

14. When one develops the *anicca saññā* via learning Dhamma (listening and reading), the tendency to act immorally, even under extreme pressure, will slowly diminish.

- One would be able to see the corresponding “cooling down” (reduced stress level) when one thinks back after several months (it could be sooner for some people). One will gradually feel the *nirāmisa sukha* and be drawn to Dhamma. One would automatically start spending more time learning Dhamma.
- One does not need to force anything except to make an initial determination to verify the truth of what I have discussed above by reading (and listening) and developing the “*Dhamma vicaya*” *sambojjanga*. Make a habit of critically evaluating relevant posts at this site and from other sources. That is the best and most direct meditation technique for attaining the *Sotāpanna* stage. Buddha Dhamma is about learning the true nature of this world, which WILL automatically lead to the purification of the mind; see “[The Importance of Purifying the Mind](#).”
- The more one purifies one's mind, the easier it will become to grasp the key Dhamma concepts and cultivate the “*anicca saññā*.” **And developing *anicca saññā* itself leads to the purification of the mind.** That is why learning becomes exponentially fast once getting some traction.

More on the *anicca saññā* (for those who may be *Sotāpannas*) at: [How to Cultivate the Anicca Saññā](#)

7.4.14 Udayavaya Ñāṇa

- [Udayavaya \(Udayabbaya\) Ñāṇa – Introduction](#)
- [Nibbatti Lakkhana in Udayavaya Ñāṇa](#)
- [Āhāra \(Food\) in Udayavaya Ñāṇa](#)
- [Udayavaya Ñāṇa – Importance of the Cittaja Kaya](#)

These posts can be better understood if one has a good understanding of the *gandhabba* or *manomaya kāya*: “[Manomaya Kāya](#).”

7.4.14.1 Udayavaya (Udayabbaya) Ñāṇa – Introduction

February 12, 2016; revised October 23, 2018; re-written November 23, 2020; re-written September 25, 2022

Udayabbaya or *udayavaya ñāṇa* is the knowledge of the mechanism responsible for the arising of rebirth (i.e., suffering) and the way to stop such arising (i.e., end of suffering.)

The *udayavaya ñāṇa* (*ñāṇa* pronounced “*ngāna*”; see the pronunciation guide in “[Pāli Glossary – \(L-Z\)](#)”) is also referred to as the *udayabbaya ñāṇa*.

- The actual Pāli word is *udayabbaya* (I had inadvertently used the Sinhala word *udayavaya*). A description of the *udayabbaya ñāṇa* is in the *Paṭisambhidāmagga Pakaraṇa*: “[WebLink: suttacentral: 1.1.6 Udayabbayañānaniddesa \(KN Paṭisambhidāmagga 1.1 Ñānakathā\)](#).” [*pakaraṇa* : [nt.] an occasion; a literary work or exposition.]
- However, it is about the arising (*udaya*) and destruction (*vaya*) of a *saṅkhata*. This is another example of two Pāli words combining to sound differently: *udayabbaya*.

Pronunciation of *udayavaya ñāṇa*:

[WebLink: Listen to Pronunciation: Udayavaya ñāṇa](#)

This series of posts needs to be rewritten. It may take some time since I am busy these days with other things.

- However, it is not urgent to study *udayabbaya ñāṇa* in detail. As I explain below, if one understands “[Paticca Samuppāda](#),” one would have the *udayabbaya ñāṇa*.

What is *Udaya* (Arising)?

1. Things in this world do not arise without causes. Births in the 31 realms occur due to six causes, which reduces to three root causes *lobha*, *dosa*, and *moha*. That is because the mundane versions of *alobha*, *adosa*, and *amoha* that give rise to births in the “good realms” above the four lowest realms are milder versions of *lobha*, *dosa*, and *moha*. See “[Six Root Causes – Loka Samudaya \(Arising of Suffering\) and Loka Nirodhaya \(Nibbāna\)](#).”

- The “milder versions” of *lobha*, *dosa*, and *moha* can be removed only by comprehending the teachings of the Buddha embedded in “[Paticca Samuppāda, Tilakkhana, Four Noble Truths](#).”
- The mechanism of the arising of any *saṅkhata* in this world is systematically described by “[Paticca Samuppāda](#).” Upon his Enlightenment, this was the first part of ultimate knowledge gained by our Bodhisatta to become a Buddha: “[WebLink: suttacentral: Paṭhama Bodhi Sutta \(KN Ud 1.1\)](#).”
- **This forward (or anuloma) *Paṭicca Samuppāda* describes the “*udaya*” part of the *udayabbaya ñāṇa*.**

One Meaning of “*Vaya*” – Destruction

2. Anything that comes into existence in this world WILL be destroyed, without exception. That is one meaning of “*vaya*.”

- For example, any *saṅkhata* that comes into existence will exist for a certain duration (during which it will undergo unexpected changes) and then cease to exist. See, for example, “[WebLink: suttacentral: Ānanda Sutta \(SN 22.37\)](#).”
- That is one meaning of “*vaya*.” But that is not the meaning implied in the *udayabbaya ñāṇa*.

Second Meaning of “*Vaya*” – “Stopping of Arising” or Permanent Destruction

3. The second meaning of “permanent destruction” achieved via eliminating all root causes is implied in the *udayabbaya ñāṇa*.

- A human being dies within about 100 years. **That “death of a person” is the previous meaning of *vaya* for a human.**
- However, that “lifestream” does not end at the death of the physical body. If that human *gandhabba* has more lifetime left, it will get into a suitable womb and give rise to another human body.

- Even when that human *gandhabba* dies, that lifestream will just “switch over” to another existence, such as *Deva* or animal.

4. A lifestream will come to an end ONLY at the *Parinibbāna* of an *Arahant*, i.e., when the rebirth process comes to an end. That is the meaning of *vaya* (complete and permanent stopping) in *udayabbaya ñāṇa*.

- That is achieved by eliminating *avijjā* (ignorance of the Four Noble Truths), i.e., “*avijjā nirodhā saṅkhāra nirodho*” leads to “*saṅkhāra nirodhā viññāṇa nirodho*,” etc. ending in “*bhava nirodhā jāti nirodho*” and, thus, to the end of suffering: “*Evametassa kevalassa dukkhakkhandhassa nirodho hotī’ti*.”
- That is the reverse of the *Paṭicca Samuppāda* or the *paṭiloma Paṭicca Samuppāda*, the second part of the *udayabbaya ñāṇa* gleaned by the Buddha: “[WebLink: suttacentral: Dutīya Bodhi Sutta \(KN Ud 1.2\).](#)”

Udayabbaya Ñāṇa – Fifty Types

5. The *Paṭisambhidāmagga Pakaraṇa* analyzes the *udayabbaya ñāṇa* by describing 25 factors that lead to “*udaya*” of the five aggregates and 25 factors leading to their “*vaya*”: “[WebLink: suttacentral: 1.1.6 Udayabbayañānaniddesa \(KN Paṭisambhidāmagga 1.1 Ñānakathā\).](#)”

- Each of the five aggregates arises via *avijjā*, *taṇhā*, *kamma*, *āhāra*, and *nibbatti lakkhaṇa*. The last refers to the arising of a physical body (for *rūpa*) according to *kammic* energy.
- Each of the five aggregates ceases to arise with the cessation of *avijjā*, *taṇhā*, *kamma*, *āhāra*, and *vipariṇāma lakkhaṇa*. The last is the natural death of a physical body in the case of *rūpa*. That happens at *Parinibbāna* of an *Arahant*.
- That is the basic idea of the *udayavaya* or *udayabbaya ñāṇa*.

7.4.14. Nibbatti Lakkhana in Udayavaya Ñāṇa

2

February 26, 2016

1. In the previous post, we discussed the first 25 factors that encompass what is involved in the “*udaya*” stage of *udayavaya*: “[Udayavaya Ñāṇa – Introduction.](#)” Each of the five aggregates has five factors associated with it basically leading to its formation; thus there are 25 factors that give rise to **each person’s world**.

- The five aggregates or the *pañcakkhandha* is much more complex than most realize. Please read the posts on *pañcakkhandha* to familiarize with it if you really want to grasp the *udayavaya ñāṇa*: “[The Five Aggregates \(Pañcakkhandha\).](#)”
- Also note that a given *saṅkhata* (*sankata* in Sinhala) is a tiny fraction of *pañcakkhandha*. We have discussed the five stages of a *saṅkhata* (*sankata* in Sinhala), and it is related to *udayavaya ñāṇa*. Buddha Dhamma is so deep, all these different descriptions are well-connected at some level.
- Do not worry if all this seems to be overwhelming (of course some people will be able to see the connections). It will make sense with time. Just keep reading posts that you have already read. They will make more sense each time you go back and read, especially after reading other relevant posts.

2. It is important to grasp the fact that anything that we experience, we experience only for a fraction of a second. Then it is gone to the “past pile” (*atita*; pronounced “atheetha”) of the five aggregates or piles.

- Anything that we are only imagining or hoping to experience has not yet materialized; those are in the “future pile” (*anāgata*; pronounced “anāgatha”) of the five aggregates.
- Only a negligibly small fraction is being experienced at a given moment: the “present pile” (*paccuppanna*; pronounced “pachchuppanna”); see, “[Five Aggregates – Introduction.](#)”

3. All these things arise as a *saṅkhata* (*sankata* in Sinhala), whether it is material (*rūpa*) or mental (*vedanā*, *saññā*, *saṅkhāra*, *viññāṇa*). A given *saṅkhata* (*sankata* in Sinhala) itself (not the experience) may exist for brief moment, or some may last a long time (especially those belonging to *rūpa* aggregate). But even then parts of it are continually being “passed on” to the past.

- Think about a human being X. He/she starts with a single cell and grows by the day, becomes a baby, a child, a young person, an old person, and then is perished. So, when another person Y, is watching X grow, the “*rūpa khandha*” of Y continuously grew, all the while making the “past *rūpa khandha*” bigger each moment. When X is observing himself, that experience goes to his “*rūpa khandha*.”
- At a given time, we can see only a momentary “snapshot” of a *rūpa khandha*. When X dies, all those stages –moment by moment — had gone to the past, and thus now belong to the “past *rūpa khandha*” of X and Y. Note that they are different: each one’s experience of X is different.
- Now we can see why each person’s *pañcakkhandha* is unique to that person.

4. Now we will analyze why all five aggregates have their origin in *avijjā*, *taṇhā*, and *kamma*: Because we have the wrong perception (*nicca saññā*) that we can eventually reach happiness by craving for things in this world (*avijjā*), we get attached to somethings or hate other things (*taṇhā*), and then act accordingly (*kamma*).

- After one attains *parinibbana* (i.e., when an *Arahant* dies), there is no world to experience. No more *pañcakkhandha*.

5. The other two factors of *āhāra* and *nibbatti lakkhana* describe the “progression” of a *pañcakkhandha* that have the origins in *avijjā*, *taṇhā*, and *kamma*.

- If it is a material thing (*rūpa*) it needs *āhāra* (food) to grow; they can be food that living beings eat or nutrients that plants need.
- If it is a mental thing (*vedanā*, *saññā*, *saṅkhāra*, *viññāṇa*), it needs “mental food”: *phassa* (contact), *mano sañcetanā*, and *viññāṇa āhāra*. We will discuss these later.

6. Any one of those five aggregates needs a “blueprint” or a set mechanism to arise, grow, mature, decay, and eventually cease to exist. This is what the fifth factor, *nibbatti lakkhana*, is about.

- This “blueprint” is made according to those three causes: it is a complex plan which takes into account many aspects that are formed by the level of *avijjā* (ignorance), kind of *taṇhā* (greed, hate), and *kamma* (kind of acts that were done with body, speech, and mind).
- Those complex factors give rise to *nibbatti lakkhana*, “blueprint” for any one of the five aggregates to rise. It can be called “production characteristics” of that particular *saṅkhata* (*sankata* in Sinhala) belonging to one of the five aggregates.
- As we learn more, we will see that all five factors actually become causes, and are inter-related.

7. This is easier to see this with a human (or an animal). When a living being gets a human *bhava*, then based on a specific *kamma vipāka* that came to focus at the time of death in the previous *bhava*, a blueprint for the human *bhava* is automatically generated by *kammic* energy.

- That blueprint is the *manomaya kāya* or the *gandhabba* that we have discussed many times; see, the posts under the section “[Manomaya Kāya](#).”
- The arising of that human starting from a single cell in mother’s womb happens according to the “blueprint” in that *manomaya kāya*: eventual height, eye color, skin color, etc were determined when a suitable womb was automatically selected according to the “*gathi*” of that being. That “selection process” — which happens automatically and not decided by any superior being — had chosen the matching parents for the *gandhabba*.
- That was the role played by the *nibbatti lakkhana* in this particular case.

8. Thus the particular *bhava* is determined by the particular action (*kamma*): if that action was suitable for a dog *bhava*, then one would get a “dog *bhava*.”

- But other characteristics of that dog are determined by the overall “*gathi*” of that being that it had acquired through uncountable previous births.
- Thus *nibbatti lakkhana* is a complex entity that takes into account numerous things, but two are prominent: the specific *kamma* and overall *gathi*.

9. For example two different beings could get the same “dog *bhava*.” But no two dogs will look and behave alike. Some are vicious and some are loving. Some are big and some are small. The possible varieties are basically infinite. Even two “twin dogs” that look exactly the same will have at least some behaviour differences when they grow. Same thing applies to two humans.

- Thus *nibbatti lakkhana* is a complex mold of multiple factors. But only a Buddha can see why certain features are in a given being. Even a spot on dog is said to be due to some reason.
- Even though the “*bhava*” is determined by a specific strong *kamma* (called a *janaka kamma*), the actual body will reflect numerous *kamma vipāka* from numerous lives in the past.
- But as we have discussed elsewhere, what kinds of *kamma vipāka* can bring fruits will depend to a large extent on having suitable conditions available. If one acts foolishly that will allow some bad *kamma vipāka* from the past to bear fruit. In the same way, by acting with mindfulness one can avoid such bad outcomes and even bring about good outcomes due to past good *kamma vipāka*.
- There are several posts that discuss the above important fact. For example, “[What is Kamma? – Is Everything Determined by Kamma?](#)” and “[Anantara and Samanantara Paccayā](#).”

10. Therefore, it is important to realize that it is *manomaya kāya* does not determine one’s future rigidly; some of the “production characteristics” can change. It is not like making a robot in a factory according to a set blueprint.

- It is easy to see that one’s body structure can change according to one’s lifestyle. If one becomes careless and start eating indiscriminately, one will become obese. Even one’s character can change by one’s motivation and due to external influences.
- Thus *nibbatti lakkhana* are not deterministically set. The overall *gathi* can change and the *manomaya kāya* and the physical body in turn can change.

11. The main reason for this flexibility is that the *manomaya kāya* has three “components”: *kammaja kāya*, *cittaja kāya*, and *utuja kāya*; see previous posts on *manomaya kāya*.

- The *kammaja kāya* is the one that is really pre-set. It had taken into account the reasons (*kamma vipāka*) that led to the particular *bhava*.
- The critical component that is under OUR CONTROL is the *cittaja kāya*. This is basically how we think (that leads to our speech and bodily actions). And how we think depends on our level of ignorance (*avijjā*).
- The third component is the *utuja kāya*, which is basically the fine body of the *gandhabba*. It is being created and changed CONTINUOUSLY due to both the *kammaja kāya* and *cittaja kāya*. The fine matter based on *suddhatthaka* are being created due to *kammaja kāya* and *cittaja kāya*; see, “[The Origin of Matter – Suddhatthaka](#).”

12. Thus the evolvement of a human being is a complex process. But one could get a good basic understanding by comprehending the above basic structure. We will go into more details in the future, but let us discuss a few more important aspects.

- Now we can see that the physical body is just a “shell.” There is *gandhabba* inside that physical body and controlling it; see, “[Ghost in the Machine – Synonym for the Manomaya Kāya?](#).”

13. Thus, these physical bodies that we value so much are really lifeless shells. The essence — *gandhabba* — is hidden inside that physical body.

- The *utuja kāya* of the *gandhabba* is the one that is spread over the whole physical body gives it a “life.” It is a fine grid that overlaps our nervous system, and that is how we feel body sensations.
- Under some extreme stresses, the *gandhabba* can get out of the physical body. This is what is known as the out-of-body experience (OBE); see, “[Manomaya Kāya and Out-of-Body Experience \(OBE\)](#).” When that happens the physical body is lifeless, and doctors have declared many heart patients undergoing operations to be dead for several minutes only to find out later that the patient is alive (*gandhabba* had returned to the body).

14. The critical point for our present discussion is the fact that once born with a human body, the human *gandhabba* can determine its own *nibbatti lakkhana* to some extent by wisely using the *cittaja kaya*.

- It is this *cittaja kaya* that ultimately makes it possible for a human to attain *Nibbāna*.
- One can change one's *gathi* (habits/character) by comprehending first moral versus immoral, and then comprehending the *anicca* nature of this world.
- Most people do not realize the importance of the *cittaja kaya*. This is in essence why a Buddha is needed to reveal the true nature of this world, and to teach how to use the *cittaja kaya* (i.e., the way one thinks, and therefore speaks and acts): First to stay away from immoral behavior to cleanse the mind to some extent, and then to comprehend the *anicca* nature.

15. The *nibbatti lakkhana* for any *saṅkhata* (*sankata* in Sinhala) associated with any of the five aggregates work similarly. Let us consider a certain *viññāṇa* that we experience when seeing a person X.

- That *viññāṇa* depends on who is looking at X. If it is a loving parent for Y, then Y will generate a “loving *viññāṇa*” upon seeing X. That *viññāṇa* will arise, stay there for a certain time, and fade away as the mind is directed to something else. But when that *viññāṇa* arises, it arises with some *nibbatti lakkhana* associated with one's own past experiences with X. An enemy of X (say, Z) could generate a “hateful *viññāṇa*.”

16. It is easy to see that other three aggregates in the above example will also arise accordingly.

- Y will generate happy feelings (*vedanā*), will recognize (*saññā*) X as a parent, and may generate some kind of action or speech via *saṅkhāra*. On the other hand, Z will generate an entirely different set.
- Thus the four mental aggregates are related to each other.

17. In Buddha Dhamma everything that we learn about is connected to each other at some level. It is the whole fabric of nature. Each and every piece of information is part of a complex puzzle. When one begins to see how it all fits together, one's mind becomes joyful, and provides incentive and desire to learn more about the true nature of this complex world.

Next in the series, “[Āhāra \(Food\) in Udayavaya Ñāṇa](#).”

7.4.14. **Āhāra (Food) in Udayavaya Ñāṇa**

3

March 19, 2016

1. First part of the *Udayavaya Ñāṇa* involves the causes for the arising of *saṅkhata* (*sankata* in Sinhala) (and hence arising of *pañcakkhandha*). Out of the five main factors (*avijjā*, *taṇhā*, *kamma*, *āhāra*, and *nibbatti lakkhana*), we discussed the *nibbatti lakkhana* in the previous post of the series.

- Many posts at the site discuss the first three factors, so will now discuss the remaining factor, *āhāra* (food), that is both a cause and a condition for the arising of *pañcakkhandha*.

2. When we think of *āhāra* (which means food in both Pāli and Sinhala), we automatically think about food that we consume to stay alive. However, it is clear from the previous two posts that a physical body is just a shell that is “controlled” by a *gandhabba*. There are many other posts on *gandhabba* in the “[Manomaya Kāya](#)” section. Here is a summary of some concepts discussed there:

- In effect, we have four kinds of bodies (*kāya*): the physical body (*karaja kāya*) is the one people normally associate with the perception of a “me.” But we have three “mental bodies” that are collectively “*manomaya kāya*” or “*gandhabba*.” Those three are *kammaja kaya*, *cittaja kaya*, and *utuja kaya*.
- In a way, the physical body is just a shell that we use for about 100 years or so and discard at death; the *gandhabba* leaves that dead body and waits for a suitable womb to make another physical body, if there is *kammic* energy left in the *human bhava*.
- The foods for the physical body are called *kabaliṅkāra āhāra*. There are three other “mental foods” that are consumed by the *gandhabba*.
- The *gandhabba* consumes three kinds of mental food: *phassa āhāra*, *mano sañcetanā āhāra*, and *viññāṇa āhāra*.

3. A given *Kammaja kāya* was created at the *cuti-paṭisandhi* moment by a powerful previous *kamma*, and its energy just gets depleted with time. For example, if a particular *human bhava* came into existence with enough *kammic* energy to support a human life for 1000 years, then that energy will be slowly spent over 1000 years. In other words, *kammaja kāya* does not need any additional energy, i.e., *āhāra*.

- In a way, all three types of mental foods are consumed by the *cittaja kāya*. And some of the energy from the *kammaja* and *cittaja kaya* are converted to *suddhaṭṭhaka* (matter), and that is what makes the fine body (*utuja kāya*) of the *gandhabba*, which is too fine for us to see.
- As I mentioned in the previous post in this section, “[Nibbatti Lakkhana in Udayavaya Ñāṇa](#),” the critical component that is under OUR CONTROL is the *cittaja kāya*. We can overcome our “loosely preset destiny” embedded in the *kammaja kāya* by cultivating our *cittaja kāya*, or basically our thoughts and thereby our behavior (*gathi*). This is what makes it possible to attain *Nibbāna*!

4. Let us first discuss the *kabaliṅkāra āhāra*. There are two relevant meanings for this name. The first meaning is associated with what this type of *āhāra* does: to energize the physical body. Here “*kabaliṅkāra*” comes from “*kayata bala dena*” in Pāli or Sinhala where “*kāya*” is body, “*bala*” is energy or power, and “*dena*” means provide.

- Therefore, *kabaliṅkāra āhāra* here means the food we eat to make our bodies grow and keep energized. Without food, a physical body that starts in the womb of the mother cannot grow to a baby and then once comes out cannot grow to be an adult. Without *kabaliṅkāra āhāra* that particular *saṅkhata* (*sankata* in Sinhala) cannot survive, and thus is an essential factor contributing to part of the *pañcakkhandha*.
- This kind of *kabaliṅkāra āhāra* is essential for the survival for humans and animals (and also *devas*). *Devas* consume just one kind of *kabaliṅkāra āhāra* called “*amurtha*”; it is a drink that they consume, which leaves no residuals. Thus, they don’t need to worry about sweating, urinating, or defecating.
- Thus *kabaliṅkāra āhāra* are needed only in *kāma loka*. As we will see below, when one loses craving for *kabaliṅkāra āhāra*, one will never be born again in the *kāma loka*, i.e., one becomes an *Anāgāmī*.
- There are no solid bodies (*karaja kāya*) in either *rūpa loka* or *arūpa loka*. In *rūpa loka* there is only the “*thrija kāya*” or the three mental bodies of *kammaja kāya*, *cittaja kāya*, and *utuja kāya*. Thus in the *rūpa loka* beings are essentially *gandhabbas* but that term is normally reserved for humans and animals when they are in the *para loka* waiting for a womb; see, “[Hidden World of the Gandhabba: Netherworld \(Paraloka\)](#).”
- In the *arūpa loka*, there is no *utuja kāya* either. Except for the *hadaya vatthu*, there is no *rūpa* associated with an *arūpa brahma*.

- It is not essential to know all these details, but these details are needed to complete the “big picture”, especially for those who are interested in finer details.

5. The second meaning of *kabaliṅkāra āhāra* has a deeper meaning; here it is a CAUSE for the arising of FUTURE *saṅkhata* (*sankata* in Sinhala). Craving *kabaliṅkāra āhāra* means one is hoping for rebirth in the *kāma loka* to enjoy them; see, “[How Perceived Pleasures \(Assāda\) lead to Dukkha.](#)”

- Thus, the stronger the craving is, harder it is to “escape from the *kāma lokas*.”
- This is a good example of how (*abhi*)*saṅkhāra* or strong cravings/hopes/desires lead to corresponding *bhava* and thus corresponding births (*jāti*).
- In *paṭicca samuppāda*, “*avijjā paccayā saṅkhāra*” is followed by “*saṅkhāra paccayā viññāṇa*,” and leads to “*upādāna paccayā bhava*” and “*bhava paccayā jāti*.” Thus generating (*abhi*)*saṅkhāra* for *kabaliṅkāra āhāra* leads to rebirths in the *kāma loka*, but most times in unexpected way, as we discuss below.

6. One NEEDS to consume *kabaliṅkāra āhāra* to provide one's body with the nutrients it needs to live a healthy life. However, if one craves for tasty foods in excess, *kabaliṅkāra āhāra* can become a CAUSE to for the arising (*udaya*) of future births in the *kāma loka*.

- This is why it is NOT actual consumption of tasty foods that contributes to making “*kāma bhava*.” It is the excess greed for tasty foods (*kāma assāda*); see the section on , “[Assāda, Ādīnava, Nissarana.](#)”
- This second type of “*pada nirukthi*” or the “origin of the phrase” *kabaliṅkāra āhāra* comes from “*kāya bali karana*” which means “leading to distorted body.” Here the word “*bali*” or “distort” applies because **the body that one acquires in a future life** is due to such greedy *saṅkhāra* could be much different than expected. **This is the deeper meaning of *kabaliṅkāra āhāra* in the *udayavaya ñāṇa*.**

7. Such excessive greed for food matches the “*gathi*” of *pretha* beings. Thus when one cultivates such greedy (*abhi*)*saṅkhāra*, it leads to corresponding “*pretha bhava*” and thus “*pretha jathi*” in the future.

- When encountering delicious food, some people lose any sense of decency. The greediness shows, and when eating such a meal some display “animal like” behavior, spilling food and getting the food all over their face. That is a display of “greedy animal like” *saṅkhāra*. When they cultivate such *saṅkhāra*, the corresponding birth could be that of a pig.
- And then there are some who do not like to share such food and like to keep others away from enjoying such meals. That could cultivate *saṅkhāra* of a “vicious dog.” We see such dogs all the time; they growl when another dog comes even close to their food.

8. Once one gets the basic idea, it is easy to see various kinds of *pretha* and animal *saṅkhāra* can be cultivated even without realizing it, and can lead to future births corresponding to such “*gathi*.”

- And the cultivation of such extreme *gathi* is a consequence of not knowing or not comprehending Buddha Dhamma, specifically *paṭicca samuppāda* (“*pati ichcha*” leading to “*sama uppada*”); see, “[Paṭicca Samuppāda – “Pati+ichcha”+“Sama+uppāda.](#)”
- And such *saṅkhāra* CANNOT be suppressed by sheer will power alone. One needs to learn Dhamma and realize that they DO LEAD to bad consequences. Again, see the section on “[Assāda, Ādīnava, Nissarana.](#)”

9. There are “good births” in the *kāma loka* too: the human realms and the *deva* realm. *Bhava* (and birth) in those realms also are according to one's (*abhi*)*saṅkhāra*, which of course are generated according to one's dominant *gathi*.

- Those who cultivate human and *deva saṅkhāra* like to enjoy sense pleasures, but they are not excessively greedy. They don't have mentality of “may all good things come to me, AND not to others.” They are content with what they get and willingly share the excess with others.

- One is not released from the *kāma loka* until one's cravings for sense pleasures completely goes away when one comprehends not only the futility of such sense pleasures but also the possible dangers.

10. At even a deeper level, the tendency to generate such extreme greed goes away AUTOMATICALLY when one starts comprehending the “*anicca* nature.” That it is not possible to achieve and maintain pleasurable worldly things (including food or beautiful bodies that result from eating such foods) as one desires.

- And this change in the mindset and the change in corresponding personal behavior may not reverse in a short time. But as one learns Dhamma, one will be able to see the change over time: Sometimes in a few weeks or even several months.
- The Buddha compared this “gradual transition” to the growth of a tree or a plant. One cannot see the change in the growth of a plant day by day; there is no point in checking it every day to see whether can see the growth. But if one takes care of the plant by providing it with nutrients and keeps the weeds away, one will be able to see the growth over a few weeks or months. And then one day, can reap the benefits of all that work when the plant blossoms and provides the flowers/fruits.

11. Therefore, the key is to LEARN Dhamma and also to comprehend it by contemplating on it, which is MEDITATION. But it is critical to learn the correct Dhamma.

- A good example of the wrong way to meditate is what many people are doing with the *paṭikūla manasikāra bhāvanā*. Many translate “*patikūla*” as “*pilikul*” in Sinhala, which means “to be rejected because it is repulsive.” They meditate on contemplating the repulsiveness of the body (sweat, urine, and feces generated by the body) and also the fact that once one chews on even the most delicious food, it becomes “vomit.”
- But the Buddha did not advice that. Just as we should not desire extreme sense pleasures, we also should not be repulsed by the things that we mentioned in the above paragraph. They both generate *taṇhā*, in the first instant by attachment (craving) and in the second by aversion (*paṭigha*). The neutral mindset (*upekkhā*) comes from understanding the true nature of things.

12. Now we can see that the connection of *kabalīṅkāra āhāra* in the *udayavaya ñāṇa* has two facets:

- One plays a role in taking care of the physical body that we have inherited due to past causes. If we are not mindful of what we eat, it can lead to bad consequences via the body that we already have. If we are mindful, we can make that body to work optimally for achieving our goals, both mundane and transcendental. And of course, if the physical body does not get enough *kabalīṅkāra āhāra*, it will die.
- The other is to be aware of the role *kabalīṅkāra āhāra* plays in generating physical bodies for us in future births via generating (*abhi*)*saṅkhāra* related to pleasurable foods.
- It is said that one can become an *Anāgāmi* (i.e., stop rebirths in the *kāma loka*) by comprehending the true nature of *kabalīṅkāra āhāra*. Then one loses the craving for any sense pleasures in the *kāma loka*. But such a mindset is unfathomable for a normal human who only sees the immediate sense satisfaction. Furthermore, such a mindset CANNOT be achieved by sheer will power; it has to be through understanding the *anicca* nature of *kāma loka*.

Next in the series, “[Udayavaya Ñāṇa – Importance of the Cittaja Kāya](#).”

7.4.14. Udayavaya Ñāṇa – Importance of the Cittaja Kāya

4

July 22, 2016; December 1, 2017; December 14, 2019

Three Components of Mental Body (*Manomaya Kāya*)

1. In previous posts in this series, we discussed *kabalīṅkāra āhāra* for the physical body and three types of *āhāra* for the “mental body” (or *manomaya kāya* or *gandhabba*): *phassa āhāra*, *mano sañcetanā āhāra*, and *viññāṇa āhāra*.

- The *manomaya kāya* or the *gandhabba* consists of three components: *kammaja kāya*, *citta kāya*, and *utuja kāya*. The *kammaja kāya* gets its energy at the beginning of that *bhava*, and does not require any external *āhāra*. The *utuja kāya* is sustained continuously via fine *rūpa* produced by *kammaja kāya* and *cittaja kāya*.
- **Therefore, the three types of *āhāra* for the *manomaya kāya* are all consumed by the *cittaja kāya*. This *cittaja kāya* is nothing else but the stream of thoughts that we generate.**
- An aside: Sometimes the *gandhabba* can inhale “aroma” or *gandha* (*kabalīṅkāra āhāra*) and have a fine (misty) physical body too; **thus the name *gandhabba***, where “*abbha*” means “inhale” or in this case “absorb.” Such “more solidified” are the ones that people can sometimes see, and even be captured by a camera.

The Big Picture

2. Now we can take a step back and look at the big picture, and it gives a very illuminating view. **This “big picture” could be very helpful in comprehending the *anicca* nature.** Of course, this is not the only way to grasp *anicca* nature.

- The physical body that we value so much and think about as “me” is just a temporary shell. Just like anything material in this world, it grows and peaks and then starts the downhill march ending in decay and eventual death. At the death of physical body, the *gandhabba* that comes out and has to wait for a suitable womb to start building a new body, if the human *bhava* still has more *kammic* energy left; see, for example, [“Bhava and Jāti – States of Existence and Births Therein”](#) and [“Gandhabba – Only in Human and Animal Realms.”](#)
- This is a key factor that contributed to the concept of a “self” (“*āthma*”) in Hinduism. Hindu *yogis* who cultivated *abhiññā* powers could look back at a finite number of previous lives and could see a *gandhabba* giving rise to repeated rebirths in human form (they likely practiced *jhāna* in those recent previous lives, which made it easier for them to attain *abhiññā* powers in this life).
- **However, they could not see far back enough to see that one could be born an animal or even worse too.**

An Analogy

3. For humans and animals, we can compare the physical body controlled by the *gandhabba* to a car (or any other vehicle) being driven by a person. The body of the vehicle is like our physical body, and the driver is analogous to the *gandhabba*. Without the *gandhabba*, the physical body cannot do anything; it would be a lifeless, i.e., a dead body. It is the *gandhabba* that “operates” the human body; see, [“Ghost in the Machine – Synonym for the Manomaya Kāya?”](#)

- The birth of a *gandhabba*, in turn, is due to the *kammic* energy that was created in a previous life. The *kammaja kāya* represents that energy (which will be slowly depleting with time.) The term *kammaja kāya* comes from “*kamma*” and “*ja*” and “*kāya*.” Here “*ja*” means “birth” or “origin” and “*kāya*” is the body. Thus *kammaja kāya* means the “body that was created due to *kamma*.”
- Similarly, *cittaja kāya* arises due to *citta* (loosely translated as thoughts).
- “*Utu*” means “change” and the *utuja kāya* is that part of the *gandhabba* body which arises by conversion of *kammic* energy and the energy from *citta* (*javana*).

We Have Control Over *Cittaja Kāya*

4. **Now, we can see the critical importance of *citta*.** *Kammaja kāya* itself arises due to previous *kamma*, i.e., by *citta* in a previous life. More specifically, *javana* in such *citta* provided the energy for a new *bhava* which lead to the *kammaja kāya*; see, “[Javana of a Citta – The Root of Mental Power](#).”

- *Kammaja kāya* is just a result, and it will slowly lose its energy over the human existence. We cannot do anything about (but if one does an *anātariya kamma* it will be shortened). **Thus it is only the *cittaja kāya* that we have control over. This is critically important. We have finally converged to the essence of a human being.**
- This is why the Buddha said “*Mano pubbangama Dhamma....*” The origin of anything in this world can be traced back to the mind (thoughts).
- Here we see the truth of the above statement for living beings. In the future, it will become clear that ANYTHING in this world has origins in the mind. That is the story in the *Aggañña sutta*. But we have to proceed step-by-step. An introduction at, “[Buddhism and Evolution – Aggañña Sutta \(DN 27\)](#).”

5. **We have the control over our own destiny via our thoughts or *cittaja kāya*. I cannot emphasize enough the critical importance of the *cittaja kāya*.**

- Therefore, we have to pay attention to what kind of *āhāra* (conventionally translated as food, but you can see that is not a good translation) that we provide for our thought stream. But we have control over only those thoughts that we initiate.

Two Types of *Citta* (*Viññāṇa*) and Associated Feelings (*Vedanā*)

6. **There are two types of thoughts. Some *citta* arise due to *kamma vipāka*.** For example, we may get to taste a delicious meal due to a good *kamma vipāka* and while eating it we feel “*jivhā viññāṇa*,” i.e., those come through our sense of taste. These do not have *abhisāṅkhāra*. Also see, “[Moha/Avijjā and Vipāka Viññāṇa/Kamma Viññāṇa](#)” and “[Vedanā \(Feelings\) Arise in Two Ways](#).”

- **There is another set of *citta* that we initiate.** For example, based on that tasty meal, we start thinking about coming back to the same restaurant in the future, how to make it at home, etc. These generate *abhisāṅkhāra*. The worst kind is *apuññābhisāṅkhāra*, where we think about ways to get that meal in an immoral way, say, by stealing.
- But if it is just some food that quenches the hunger, we do not generate that type of *citta* subsequent to the *vipāka citta*.
- In another example, we see millions of things in a day (via *vipāka citta*), but generate *abhisāṅkhāra* only in a few.

The Unending Cycle of *Kamma/Vipāka*

7. The Buddha said, “*kammā vipākā vaddanthi, vipākā kamma sambhavo, thasmā punabbhavo hoti, evan loko pavatthathi*.”

- What that means is: “Because of *kamma vipāka* we experience sense inputs; based on those we initiate new *kamma* (*abhisāṅkhāra*), and those, in turn, will bring *vipāka* in the future; that is how the world evolves (rebirth process continues).”
- **Thus the critical part is where we generate *abhisāṅkhāra*. This is done with *javana citta*.** We will discuss this using *citta vīthi* in the future, but let us try to get some basic understanding of how these *javana citta* can be controlled. There are many posts in the “[Mind and Consciousness](#)” and “[Citta and Cetasika](#)” sections on *citta* and *citta vīthi*.

The Key Is to Change Our *Gati*

8. In fact, *javana citta* run too fast to control at that time. Billions of *citta* run in a second. How can we control them? **We cannot control them *in situ*, as they initially arise.**

- *Javana citta* arise due to our *gati*! This is the key.
- For example, an *Arahant* is not be tempted by any attractive sense input. He has removed all *āsavas* (cravings) and there is no *anusaya* to bubble up. He/she has “Noble *gati* of an *Arahant*.”
- On the other hand, a *Sotāpanna* may be tempted by that attractive sense input. He has not removed all *āsavas* (cravings); but he/she has removed *gati* suitable for the *apāyā*, so *javana citta* corresponding to highly immoral acts will not arise .
- The *āsava* (or *gati*) are analogous to the dirt in the bottom of a well. If the well water is perturbed, some dirt can come to the surface (*anusaya*). (i.e., if a sense input matching our *gati* comes into play, bad thoughts automatically come into the mind). This is discussed in the post, “[3. The Second Level – Key to Purify the Mind](#)” in the Meditation section.
- When one attains the *Sotāpanna* stage, the worst types of “gunk” will be removed. The rest will be removed in three more stages (*Sakadāgāmī*, *Anāgāmī*, *Arahant*).

Ānāpānasati/Satipaṭṭhāna – Only Way to Change Gati

9. In a normal human, whether or not immoral *javana citta* will be triggered, will depend on his/her set of *āsavas* (or *gati*). If that particular sensory input is attractive (i.e., matches his/her *āsavas*), then he/she may automatically initiate a highly immoral act to pursue that sense input.

- But the key here is the following. Even if such immoral *javana citta* arise, one can still suppress them **before the actual act is done**, if one has learned *Satipaṭṭhāna* (or *Ānāpāna*.) For extremely immoral acts, like killing another human, most people will be able to control such thoughts even without knowing about *Satipaṭṭhāna*. **But the more one learns Dhamma, and the more one understands the consequences, one will be able to have firm control even over minor offenses.**
- Furthermore, the more one controls one’s actions this way, the more one’s *gati* will change for the better. **This is another key!** This has been discussed in detail in, “[9. Key to Ānāpānasati – How to Change Habits and Character \(Gati\)](#).” There are several posts under that topic.

Irreversible Change of *Gati* with Understanding of *Tilakkhaṇa*

10. A large chunk of immoral *gati* goes away just via comprehending *anicca*, *dukkha*, *anatta* at the *Sotāpanna* stage. In fact, those *gati* that are suitable to be born in the *apāyā* will be removed. **This is called “*dassanena pahāthabbā*,” i.e., “removal via correct vision.”**

- Thus highly immoral *javana citta* do not arise in a *Sotāpanna*. A well that has been cleaned of the visible dirt at the bottom can not be muddied by perturbing the water in that well. Just like that, highly immoral thoughts do not arise in a *Sotāpanna* because it is free of “worst gunk.”
- However, to be able to grasp *anicca*, *dukkha*, *anatta*, one’s mind needs to be cleansed to some extent. One needs to gradual changing of one’s *gati* or *āsava*. The way to get there is to practice the correct *Ānāpāna bhāvanā* (or *Satipaṭṭhāna bhāvanā*.) See, “[Is Ānāpānasati Breath Meditation?](#).”

Udayavaya Nāṇa – How Suffering Arises and How It Can Be Stopped

11. Thus the key to *Nibbāna* is in the *udayavaya nāṇa*: future rebirths arise (*uadaya*) due to *abhisankhāra* (or *cetanā*) in our *javana citta*. By controlling immoral thoughts via reducing our *āsava* (bad *gati*), **we can eventually stop them from arising.**

- This is done by always **being vigilant** about the moral or immoral thoughts that come to our minds; **this is *Satipaṭṭhāna***; see, “[Mahā Satipaṭṭhāna Sutta](#).” Then if the **thought is moral, we cultivate it (*āna*)**; if it is

immoral, we stop it (*pāna*) before it leads to bad speech or actions; this is *Ānāpāna*; see, “[7. What is Ānāpāna?](#).”

- The other key point is that the more cleans one’s mind, the more one will be able to comprehend. In particular, comprehending *anicca*, *dukkha*, *anatta*, REQUIRES a mind cleansed to some extent.
- I hope you can see that this is a feedback loop: each time one goes through the loop (being vigilant or *satipaṭṭhāna* to cleansing the mind or *ānāpāna* to more cleansed mind to grasping deeper Dhamma and back to being vigilant), one makes progress.

Importance of *Tilakkhaṇa*

12. This effect is greatly amplified when one finally grasps *Tilakkhaṇa*: One comprehends the futility of staying in this rebirth process (*anatta*.) Anything that we acquire through much effort cannot be kept to our satisfaction in the long run (*anicca*) and eventually lead to nothing but suffering (*dukkha*.) When one can “see” that, one will realize the urgency to reduce and remove one’s *āsava* (bad *gati*). This leads to the *Sotāpanna* stage.

- A huge chunk of *āsava* (bad *gati*) simply disappear just via this understanding of the *anicca* nature at the *Sotāpanna* stage. Highly potent immoral *javana citta* do not arise in the mind of a *Sotāpanna*. Then no more rebirth in the *apāvā* or the four lowest realms.
- Thus with *udayavaya ñāṇa*, one can really clarify the path to the *Sotāpanna* stage.
- Then the remaining *āsava* disappear (*āsavakkhaya*) via three more stages (*Sakadāgāmī*, *Anāgāmī*, *Arahant*) by continuing this process (*Ānāpāna* and *Satipaṭṭhāna*), and one attains *Nibbāna*, permanent happiness or the removal of all future suffering.
- But one also needs to do *Ānāpāna* and *Satipaṭṭhāna* before the *Sotāpanna* stage in order to cleanse the mind to a level that is capable of grasping *anicca*, *dukkha*, *anatta*.

Closing the ‘Gaps’

13. Finally, I would like to close the loop by pointing to the connection to the concepts we have discussed in the early posts. The *gandhabba* consumes three kinds of mental food: *phassa āhāra*, *mano sañcetanā āhāra*, and *viññāṇa āhāra*.

- As we saw in the previous post in this series, “[Āhāra \(Food\) in Udayavaya Ñāṇa](#),” all three types of mental foods are consumed by the *cittaja kāya*. And this confirmed by the above discussion: Our initial sense inputs that COULD trigger *javana citta* come via *phassa*, sense contacts. They are JUST contacts. But based on those, we COULD accumulate new *kamma vipāka* (*abhisankhāra*) by making *samphassa*; also see, “[Vedanā \(Feelings\) Arise in Two Ways](#).”
- *Mano sañcetanā āhāra* (which are *abhisankhāra*) come into play during those *samphassa*; this simply means we start “making plans”, and also keep going back to that sensory input. With repeated triggers for a given sense input (*samphassa*) provides *āhāra* for that *viññāṇa*; for example, see, “[2. Viññāṇa \(Consciousness\) can be of Many Different Types and Forms](#),” and other relevant posts.

By reading the links given (and also using the “Search box” at top right) one should be able to clarify key issues. Please don’t hesitate to comment if you need help in clarifying a given concept.

14. Also, please make sure to enter your email address correctly when making a comment. Recently, one person entered incorrect address, and sent me the same question twice. Unfortunately, I have no way of letting him know that I replied each time.

8.1 Pāli Glossary

1/2/16: It seems that the audio files are not loading, so just removed the audio files.

We now have a [Popup Pāli Glossary with Pronunciation](#).

Possible Confusion in Pronunciation

It seems that the following conventions were adopted in order to make the text shorter.

In many cases:

1. “c” needs to be pronounced “**ch**” as in “**ch**arm” or “**ch**icago.”
2. “t” needs to be pronounced “**th**” as in “**th**ud” or “**th**row.”
 - For example, *citta* pronounced “chiththa”, *cakkhu* is pronounced “chakkhu”, *anicca* as “anichcha”, *anatta* as “anaththa”, *jāti* as “jathi”, *taṇhā* as “thanha”, *tilakkhana* as “thilakkhana.”
3. “d” needs to be pronounced “**th**” as in “**th**is” or “**th**at.” Note the difference in pronouncing “**th**” between 2 and 3.
 - For example, *vedanā* or dāna (as in giving) is pronounced this way.

Pronunciation Key

á rhymes like pat â → care ã → pay ā → father ê → pet ë → bee th → thin dh → this
ö → toe ü → moon ch → chin ng → thing

Common Pāli Words

I will keep adding more words to the glossary. If you would like me to add any missing words to the glossary, please send a comment.

10/6/15: I have added audio files. Please note the volume control below each audio.

Pāli Word	Audio	Pronunciation	Meaning
akusala		akusala	immoral, unwholesome
adosa		adhosa	non-hatred
alobha		alobha	non-greed
amoha		amoha	non-delusion
Anāgāmī		Anāgāmī	Non-Returner (to the human world)
Anariya		Anāriyā	One who is not yet a Noble One or Ariya
anatta		anaththā	not in-control, helpless
anicca		anichchā	inability to maintain to one's satisfaction
anantara			being in storage until retrieval (kamma vipāka)

Pāli Word	Audio	Pronunciation	Meaning
anupassana		anupassanā	contemplate with anicca, dukkha, anatta
anusaya			defilements arising from latent cravings (āsava)
apāya		apāya	common term for four lowest realms
abhijjā [abhijjhā]		abhijjā	strong greed
Arahant			Never to be born in any of the 31 realms
Ariya		āriyā	noble one (Sotāpanna or above)
arūpa		arūpa	without rūpa (not really correct)
avijjā		avijjā	ignorance
ahirika		ahirikā	shamelessness
ahetuka		ahāthuka	without good roots
akasa		ākāsa	space (the void in between rūpa)
aloka		āloka	light, dissociating from “this world”
āpo		āpo	cohesive element
ārammaṇa		ārammana	object of thought
āsava (asaya)		asāva	deep-seated craving
asevana		āsāvanā	repeated practice
bahiddha		bahidhdhā	external
bala			power
bhanga		bhangā	dissolution
bhava			existence level
Bhaudhayā (Buddhist)		Bhaudhdhayā	One striving to stop the rebirth process
bhāvanā		bhāvanā	meditation, constant contemplation & use
Buddha		Budhdha (not “Budhdhā”)	Buddha Gotama
bhavaṅga		bhavangā	life continuum
bhaya			fear
citta		chiththa	early stage of a thought (pure thought)

Pāli Word	Audio	Pronunciation	Meaning
dana		dāna	giving
dasaka			decad
deva		dāva	a being in 6th-11th realms
dhamma		dhammā	Buddha's teachings, phenomenon, mental object
dhammavicaya		dhammavichaya	investigation of concepts like anicca
dhātu		dhāthu	element
diṭṭhi			view, wrong view unless specified
domanassa		dhomanassa	displeasure
dosa		dhosa	hatred
dukha		dhukha	suffering
dukkha		dhukhka	suffering & it can be overcome
dvara		dhvāra	door (to the outside world)
ekaggata		ekaggathā	one-pointedness (of the mind)
gandha			smell
gati		gathi	character
hadayavatthu		hadayavaththu	seat of mind
hetu		hāthu	root cause
hiri			shame
iddhipada		iddhipāda	means to accomplishment
kāmacchanda		kāmachanda	greed for things in kamaloka
kamaloka		kāmalōka	first 11 realms with five physical senses
kamavacara		kāmavachara	belonging to kamaloka
kamma		kammā	action, deed
kasiṇa		kasiṇa	meditation device (usu. a colored disk)
kāya		kāya	sensing (seeing, hearing, etc)
kaya		kaya	body
khaya			cutting off

Pāli Word	Audio	Pronunciation	Meaning
khana			moment, sub-moment
khandha			aggregate, collection, heap
kilesa (keles)		kilāsa	defilement
kukkucca		kukkuchcha	tendency to do lowly things
kusala			removal of defilements
lahuta		lahūta	lightness
lakkhana		lakhkhana	characteristic
lobha		lobha	greed
loka		loka	world
lokuttara		lokoththara	beyond this world, transcendental
maccariya		machchariya	extreme greed, hiding wealth
magga		magga	path
mana		māna	conceit
manasikara		manasikāra	memory
mano		mano	mind
manodhatu		manodhāthu	mind element
manodvara		manodvāra	mind door
manussa			human being
marana			death
metta		meththā	loving kindness
micchā diṭṭhi		michcha diththi	wrong views
middha		midhdhha	lethargic mind
moha		moha	delusion
mudita		mudhithā	appreciative joy
muduta		mudhuthā	malleability
mūla		mūla or mūla	root
nama		nāma	name, mental
nāmarūpa		nāmarūpa	name and form

Pāli Word	Audio	Pronunciation	Meaning
ñāṇa		ngāna	knowledge
nimitta		nimiththa	sign
nivarana		neevarana	hindrance
niraya			hell
niyama		niyama (not niyāma)	law of nature
oja		ojā	nutritive essence
paccaya		pachchayā	condition
pahāna		pahāna	abandoning
pancadvara		panchadvāra	five sense doors
pañcakkhandha		pancakkhandhā	five aggregates
pancaupadanakkhandha		pancaupādānakkhandhā	grasping/craving of five aggregates
paññā		pangngā	wisdom
pīti		peethi (preethi)	joy
paññindriya			wisdom faculty
paramatta		paramatthā	ultimate reality
pasāda rūpa		pasāda rūpa	sensitive matter (internal rūpa)
passaddhi		passaddhi	tranquility
pathavi			element of hardness
paṭicca		patichcha	bind to something willingly
paṭigha			aversion, dislike
pavutthi		pavutthi	during this life, current
peta (preta)		petā (pretha)	hungry ghost
phala			fruit, fruition
phassa			contact
puggala			individual
purisa			masculine
rāga		rāga	attachment to saṃsāra
rasa			taste

Pāli Word	Audio	Pronunciation	Meaning
rūpa		rūpa	matter (and energy)
rūpa kalapa		rūpa kalāpa	material group unit
rūpāvacara		rūpavāchara	belonging to rūpa loka
sadda		sadhdha	sound
sadharana		sādhāraṇa	universal, common
saddhā		sadhdhā	faith (through knowledge and understanding)
sahetuka		sahēthuka	with roots
Sakadāgāmī		Sakadagāmi	Once-Returner (one more rebirth as a human)
saḷāyatana		saḷāyathana	six sense bases
samādhi		samādhi	high concentration with pure mind
sammā			quench (defilements)
samāpatti		samāpaththi	meditative attainment
samanantara		samananthara	contiguity, matching with anantara
samatha		samathā	calming the mind
samauppada		samauppāda	birth of a similar kind
saṅkappa			ideas
saṅkhāra		saṅkhāra	actions leading to defilements
saṅkhata (sankata in Sinhala)		sankhatha	conditioned, formed by conditions
saññā		sangngā	perception
saṁsāra (also called saṁsāra)		saṁsāra	beginningless rebirth process
sasava		sāsavā	with craving
sati		sathi	mindful of anicca, dukkha, anatta
satipatṭhāna		sathipattāna	establishment of sati
sanyojana		sanyojana	bind to defilements, fetter
sīla		seela	virtue, moral conduct
sekha		sēkha	trainee (the three stages below the Arahant)
somanassa		somanassa	with joy

Pāli Word	Audio	Pronunciation	Meaning
sota		sotha	ear
Sotāpanna		Sothapanna	Stream Enterer (first stage of Nibbāna)
taṇhā		thanhā	attachment (bondage) due to greed, hate, or delusion
tejo		thājo	heat element
thina		theena	sloth
uddhacca		udhdhachchā	tendency to be high-minded (restlessness)
upādāna		upādhāna	clinging, like to hold onto
upekkha			equanimity, neutrality
uppatthi		uppaththi	birth
vacī		vachi	speech
vaṇṇa (varna)			color
vayama		vayāma	effort
vāyo		vayo	fluidity
vedanā		vādana	feeling
vicara		vichāra	sustained concentration on an object
vicikicchā		vichikichchā	acting without sati
vīmaṁsā		vīmaṁsā	investigation
vinnati		vingngāthi	intimation
viññāṇa		vingngana	(defiled) consciousness
vipāka		vipāka	result
vipassana		vipassanā	insight (via analysis of parts)
virati		virathi	abstinence from indulgence
viriya			effort
visuddhi		visudhdhi	purification
vitakka		vithakka	initial application of the mind on an object
vīthi		veethi	process (sequential)

Pāli Word	Audio	Pronunciation	Meaning
votthapana		voththapana	determining
vyāpāda		vyāpāda	ill will, stronger than paṭigha

8.2 Pāli Glossary – (A-K)

August 12, 2016; Revised May 27, 2017; February 19, 2020; May 29, 2022 (#4 added)

“Tipiṭaka English” Convention

1. I have revised the Pāli words to align with the convention used by most English texts. This convention was apparently adapted by the early European scholars (Rhys Davis and others) in order to keep the length of the word short. I will use this convention in new posts and try to update old posts gradually. See the following two posts for details:

- [“Tipiṭaka English” Convention Adopted by Early European Scholars – Part 1](#)
- [“Tipiṭaka English” Convention Adopted by Early European Scholars – Part 2](#)

Additional Pronunciation Keys:

“a” is pronounced like “u” in cut; “ā” is pronounced like “a” in father

- “ī” is pronounced like “i” in sit; “ī” is pronounced like “ee” in bee
- “u” is pronounced like “u” in “put”; “ū” is pronounced like “oo” in cool
- “o” is pronounced like “oe” in “Moe”; “e” is pronounced like “a” in pay
- “c” needs to be pronounced like “ch” as in “charm” or “chicago”
- “ñ” needs to be pronounced like “gn” in “signor”

2. This glossary is in two posts, because there are a total of over 400 Pāli words included now. This is the first part of the glossary; second part at, [“Pāli Glossary – \(L-Z\).”](#)

- I have been able to get the audio files incorporated, and also have provided links to key posts whenever possible/needed.
- We also have a [Popup Pāli Glossary with Pronunciation](#), thanks to Mr. Seng Kiat Ng. If that GoldenDict dictionary is installed on your computer, you will be able to access this glossary from each post directly. Furthermore, it could provide translations from other online dictionaries as well.

3. Relevant posts on any of the words can be found by using the “Search” box on the top right.

Pāli Word	Meaning	Audio
abhaya	"a" + "bhaya"; doing something to stop someone's fear	
abhaya dāna	saving the life of a living being	
abhijjhā	strong greed	
abhiññā	supermundane powers	
abhisaṅkhāra	strong saṅkhāra that lead to rebirths and strong vipāka	
ādīnava	bad outcome: Assāda, Ādīnava, Nissarana – Introduction	
adhimokkha	arising to the top; reaching a high value	

Pāli Word	Meaning	Audio
adhivāsana	things one gets used to based on sansāric habits; part of gathi	
adinnādāna	stealing; taking something without permission	
adosa	without hatred	
ajjhatta	internal	
ākāsa	space (the void in between rūpa)	
ākāsānañcāya tana	first arūpa brahma realm	
ākāñcaññāyatanā	third arūpa brahma realm	
akusala	immoral act	
āhāra	nutrients (for body or mind)	
ahetuka	without good roots	
ahirika	shamelessness	
akālika	remove defilements or timeless (no birth or death, i.e., Nibbāna)	
alobha	without greed	
āloka	light, dissociating from “this world”	
āmisa	mundane (belonging to 31 realms)	
amoha	without delusion; moral mindset	
amurta	fine food (drink) of devas	
Anāgāmī	Non-Returner (to the human world)	
anāgata	future	
ānāpāna	7. What is Ānāpāna?	
ānāpānasati	6. Ānāpānasati Bhāvanā (Introduction)	
anāriya	not Noble	

Pāli Word	Meaning	Audio
anatoppa	fear of doing immoral deeds	
anatta	not in-control, helpless	
ānenjābhi saṅkhāra	Saṅkhāra, Kamma, Kamma Bīja, Kamma Vipāka	
anicca	inability to maintain to one's satisfaction	
Aniccata	tendency to change unexpectedly; characteristic of a rūpa: Rūpa (Material Form) – Table	
anidassana	Cannot be seen; can also mean pure as in anidassana viññāṇa	
animisa	without pausing for even a moment: Animisa Locana Bodhi Poojā – A Prelude to Acts of Gratitude	
aññamañña	depend on each other	
anantara	being in storage until retrieval (kamma vipāka)	
anumodanā	accept pattidana (transfer of merits or sharing of merits) with joy	
anupassanā	discard kileasa by contemplating with anicca, dukkha, anatta: see #6 of 4. What do all these Different Meditation Techniques Mean?	
anusaya	defilements arising from latent cravings (āsava) and kilesa	
apacāyana	paying respects to those with higher virtues: Puñña Kamma – Dāna, Sīla, Bhāvanā	
aparāpariya vedaniya	kamma vipāka that can materialize at any time in future	
apāya	common term for four lowest realms	
āpo	cohesive element	
Appanā samādhi	almost at jhāna: What is Samādhi? – Three Kinds of Mindfulness	
appaṇāta	not to liking; dislikes	
appaṭigha	cannot be grasped or touched	
apuñña	immoral	
apuññabhi saṅkhāra	highly immoral saṅkhāra	

Pāli Word	Meaning	Audio
Arahant	never to be born in any of the 31 realms	
ārammaṇa	object of thought	
Ariya	Noble person (Sotāpanna or above)	
arūpa	without rūpa	
asañña	without perception; without sañña	
āsava = āsaya	deep-seated craving	
āsavakkhaya ñāṇa	Knowledge of removing āsava: The Way to Nibbāna – Removal of Āsavas	
āsevana	repeated practice; associate	
asobhana	ugly or defiled (used mainly for cetasika)	
asura	one of the four apāyā; beings there have large bodies and are inactive	
assāda	enjoyment	
aṭṭa	past	
atta	opposite of anatta or eight	
attha	opposite of anatta; perception that one has total control	
avici	one of the niraya (hell)	
avihiṃsā	non-aggressive	
avinibbhoga	constituents not separable, as in a avinibbhoga rūpa kalapa	
avyāpāda = abyāpāda	not angry, kind	
āyatana	an indriya becomes as āyatana: Sorting out Some Key Pāli Terms - Tanhā Lobha Dosa Moha etc	
āyu	lifetime	
avijjā	Ignorance of Tilakkhaṇa	
bahiddhā	external	

Pāli Word	Meaning	Audio
bahijja	external	
bala	power	
bali	distort	
bīja	seed	
bhaṅga	dissolution; destruction	
bhava	realm of existence	
Bhauddhaya (Buddhist)	One striving to stop the rebirth process	
bhāvanā	meditation, constant contemplation & use	
bhavaṅga	life continuum	
bhaya	fear	
Bhikkhu	Buddhist monk	
bodhicitta	a Mahāyāna term denoting "enlightenment-mind"	
bojjhaṅga	bodhi aṅga or facilitating factor for Nibbāna	
brahma	a being in rūpa or arūpa brahma realms	
Buddha	Buddha Gotama	
cakkhu	eye or seeing	
cakkavāḷa	planetary system like our Solar system	
cetanā	intention; but deeper: “Details of Kamma – Intention, Who Is Affected, Kamma Patha.”	
cetasika	mental factor	
chanda	liking	
citta	thought (pure thought)	
cittānupassanā	doing anupassana via contemplating on thoughts	

Pāli Word	Meaning	Audio
citta vīthi	citta come in packets of a discrete number; a single citta does not arise	
cutūpapāta ñāṇa	ability to see all previous births	
cuti	death	
cuti citta	moment of death	
dāna	giving	
dasa	ten	
dasaka	decad; group of 10	
dassana	vision; but normally used for "comprehending"	
dassanena pahātabba	removing (kilesa) via comprehension of Dhamma	
desanā	verbal discourse	
deva	a being in 6th-11th realms	
Dhamma	Buddha's teachings, phenomenon, mental object	
dhammavicaya (sambojjhaṅga)	investigation of concepts like anicca	
dhammānudhamma patipadā	condition for attaining Sotāpanna stage: Four Conditions for Attaining Sotāpanna Magga/Phala	
dhammānupassanā	doing anupassana via contemplating on Dhamma	
dhātu	element	
dhyāna (same as jhāna)	meditative state with rūpa loka or arūpa loka consciousness	
ditta	observation	
ditthi	view, wrong view unless specified	
diṭṭhijukamma	"diṭṭhi"+"uju"+"kamma" or getting rid of wrong views on kamma: Puñña Kamma – Dāna, Sīla, Bhāvanā	
domanassa	mental agony, displeasure; not bodily suffering	

Pāli Word	Meaning	Audio
dosa	hatred	
dosakkhaya	dosa + khaya or removal of hate	
dugathi	"du" + "gathi" or habits that can lead to bad rebirths	
dukha	suffering	
dukkha	suffering & it can be stopped from arising	
dvāra	door (to the external world)	
ehipassiko	a quality of Dhamma, removing defilements in real time: Supreme Qualities of Buddha, Dhamma, Saṅgha	
ekaggatā	one-pointedness (of the mind)	
gandha	smell, odor	
gandhabba	Gandhabba (Manomaya Kāya)	
gati	character, habits	
ghāṇa	nose or smelling	
gotrabhu	change of lineage ("gotra") when getting close to a jhāna	
hadaya vatthu	seat of mind (in the gandhabbayā)	
hetu	root cause	
hiri	shamefulness for doing akusala kamma	
iddhi	special powers or knowledges	
iddhipāda	means to special (mental) accomplishment	
indriya	one of the six sense faculties when used without lobha, dosa, moha	
issa (irisiyā in Sinhala)	jealousy	
Itthi (sthree in Sinhala)	feminine	
jarā	getting old or weak	

Pāli Word	Meaning	Audio
Jaratā	one of 28 rūpa: Rūpa (Material Form)	
jāti	birth of a living being OR birth of anything	
javana	those citta with which saṅkhāra committed or kamma vipāka generated: Javana of a Citta – The Root of Mental Power	
jhāna (same as dhyana)	meditative state with rūpa loka or arūpa loka consciousness	
jivhā	tongue (more accurately jivha indriya) OR taste	
jīvita	life: jivita indriya maintains life	
Jvītindriya	one of the 7 universal cetasika: Cetasika (Mental Factors) OR one of the 28 rūpa: Rūpa (Material Form)	
kabaḷikāra	one of the 4 āhāra: Āhāra (Food) in Udayavaya Ñāna	
kappa (kalpa in Sinhala)	time duration of an entity: kappa of a human is about 100 years; mahā kappa is lifetime of the universe	
kalyāṇa mittā (or mitrā in Sinhala)	Noble friend: Four Conditions for Attaining Sotāpanna Magga/Phala	
kāmacchanda	greed for things in kamaloka	
kāma loka	first 11 realms with five physical senses	
kāma rāga	attachment to sense pleasures in kamaloka	
kāmāvacara	belonging to kamaloka	
kāmesumicchācārā	immoral ways of enjoying sense pleasures: The Five Precepts – What the Buddha Meant by Them	
kamma	action, deed	
kammanta	actions as in sammā kammanta	
kammaṭṭhāna	meditation verses or procedures	
khandha	heap, pile, or aggregate	
karunā	compassion in the suffering of others	
kasiṇa	meditation object in anāriya jhāna (eg. a colored disk)	

Pāli Word	Meaning	Audio
kāya	pertaining to the body or action	
kaya	physical or mental body	
kāyānupassanā	doing anupassana via contemplating on the bodily actions	
khaṇika samādhi	<u>What is Samādhi? – Three Kinds of Mindfulness</u>	
khaya	cutting off or gradually reduce	
khaṇa	moment, sub-moment	
kriyā	action, deed

Furthermore, it could provide translations from other online dictionaries as well.

3. Relevant posts on any of the words can be found by using the “Search” box on the top right.

Pāli Word	Meaning	Audio
lobha	excess greed: Lobha, Rāga and Kāmaccaṇḍa, Kāmarāga	
lahutā	lightness (e.g., <i>kāya lahutā</i> is lightness in body)	
lakkhaṇa	characteristic of	
loka	realm or world depending on the context	
lokiya	belonging to this world of 31 realms	
lokuttara	beyond this world of 31 realms, transcendental	
macchariya	hiding wealth due to extreme greed	

Pāli Word	Meaning	Audio
magga	path; procedure	
mahā	large or important	
māna	arrogance, self-admiration	
manasikāra	memory. Details at: Citta and Cetasika – How Viññāna (Consciousness) Arises	
mano	mind	
mano sañcetanā	<i>vedanā, saññā</i> that arise due to one's gati	
manodhatu	mind element	
manodvāra	mind door to <i>nāmaloka</i> ; see, Our Two Worlds: Material and Immaterial	
manodvāravajjana	a citta coming to the mind door as in <i>manodvāravajjana citta</i>	
manussa	human being	
marana	death (death of a physical body is not necessarily the end of human bhava; see, "Antarābhava and Gandhabba")	
mettā	kindness. Has two meanings: "Ariya Mettā Bhāvanā"	
micchā dīṭṭhi	wrong views; see. "Wrong Views (Micchā Dīṭṭhi) – A Simpler Analysis"	
middha	lethargic mind	
moha	delusion; mind totally covered; see, "Lobha, Dosa, Moha versus Rāga, Patigha, Avijjā"	
mohakkhaya	moha + khaya, removing delusion	
muditā	joy in the success of others	
mudutā	malleability; e.g., kāya midutā	
mūla	root (usually in root cause)	
musāvāda	lies, trying to deceive: The Five Precepts – What the Buddha Meant by Them	
muta	combined word for smelling, tasting, and touching	

Pāli Word	Meaning	Audio
nāma	name, mental	
nāmarūpa	name and form OR mental image of a nāma and rūpa	
namaskāraya (Sinhala)	Namaskāraya – Homage to the Buddha	
ñāṇa	knowledge	
nātha	with refuge, opposite of anātha	
nekkhamma	relinquish sense pleasures: Difference Between Giving Up Valuables and Losing Interest in Worthless	
neva saññā nā saññāyatana	fourth arūpa brahma realm	
Nibbāna	stopping the rebirth process: Nibbāna	
nibbatti lakkhaṇa	Nibbatti Lakkhana in Udayavaya Ñāṇa	
nicca	having total control, that ability	
niddesa	short description: Sutta Interpretation – Uddesa, Niddesa, Patiniddesa	
nimitta	sign; something resembling	
nirāmisa	neutral thoughts without sense cravings	
nirodha	nir + udā or stop from arising	
nissaraṇa	willingly give up assāda: Assāda, Ādīnava, Nissaraṇa – Introduction	
Nivana (Sinhala)		
nīvaraṇa	hindrance; covered mind	
niraya	hell	
niyama (or niyāma)	law of nature	
niyata	permanent, fixed	
ojā	nutritive essence	

Pāli Word	Meaning	Audio
oḷārika	rough, condensed	
opapātika	instantaneous and fully-formed birth as in deva and brahma realms	
pabhassara	devoid of greed, hate, and ignorance; e.g., pabhassara citta	
paccayā	condition	
paccuppanna	conditional arising; present moment arising due to conditions	
pahāna	abandon; remove	
pahātabba	removal	
pakiṇṇaka	particulars or occasionals as in pakiṇṇaka cetasika: Cetasika – Connection to Gati	
pāṇātipātā	killing a living being: The Five Precepts – What the Buddha Meant by Them	
panca	five	
pañcadvāra	five sense doors	
pañcadvāra vajjana cittā	Citta Vīthi – Processing of Sense Inputs	
pañcakkhandha	five aggregates	
pañcanīvaraṇa	five hindrances that cover the mind	
pañcaupādāna kkhanda	grasping/craving of the five aggregates: Pañcaupādānakkhandha – It is All Mental	
paṇīta	likable or good	
paññā	wisdom; comprehension of Tilakkhaṇa	
pāpa kammā	immoral actions	
para loka (paraloka in sinhala)	a human or animal gandhabba lives in para loka until a womb becomes available: Hidden World of the Gandhabba: Netherworld (Paraloka)	
pāramitā	strive through many rebirths: Paramita and Niyata Vivarana – Myths or Realities?	
paribramana	rotating around another body	

Pāli Word	Meaning	Audio
perideva	lamentation, especially upon remembering a past mishap	
parivajjana	staying clear of bad influences: The Sotāpanna Stage	
pīti	joy	
paññindriya	wisdom faculty	
parāmattha	ultimate reality	
pharusāvācā	harsh speech: Ten Immoral Actions (Dasa Akusala)	
pasāda rūpā	sensitive matter (five internal senses; not physical senses): Brain – Interface between Mind and Body	
passaddhi	tranquility	
pathavi	element of hardness	
paṭicca	get bonded to something willingly	
paṭigha	aversion, dislike	
patikūla manasikāra bhāvanā	4. What do all these Different Meditation Techniques Mean?	
paṭipadā	a procedure; way of living, like in majjima patipāda	
paṭiniddesa	detailed description: Sutta Interpretation – Uddesa, Niddesa, Patiniddesa	
paṭisandhi	Grasping a new existence (bhava)	
paṭisevana	good associations as in paṭisevana pahātabba: The Sotāpanna Stage	
pattānumodanā	Transfer of Merits (Pattidāna) – How Does it Happen?	
pattidāna	transfer of merits: Transfer of Merits (Pattidāna) – How Does it Happen?	
pavutthi	during this life, current	
pīlama (peleema in Sinhala)	incessant stress, agitation: Anicca – The Incessant Distress (“Pīlana”)	
peta (pretha)	hungry ghost; one of the four apāyā	

Pāli Word	Meaning	Audio
phala (pala in Sinhala)	fruit, fruition	
phassa	sense contact; most times it is defiled or samphassa: Difference between Phassa and Samphassa	
pisuṇāvācā	slandering: Ten Immoral Actions (Dasa Akusala)	
phoṭṭhabba	"poththa" + "abba", where "poththa" is skin: sense of touch	
pubbe	previous	
pubbenivāsān ussati ñāṇa	see #12 of Antarābhava and Gandhabba	
puggala	individual	
puñña kriyā	deed that makes one's heart joyful	
purisa	masculine	
rāga	attachment to the 31 realms: Lobha, Rāga and Kāmacanda, Kāmarāga	
rāgakkhaya	rāga + khaya: removal of attachment to the 31 realms	
rasa	taste	
rūpa	matter AND energy	
rūpa kalāpa	elementary material group unit: Rūpa Kalāpa (Grouping of Matter)	
rūpāvacara	belonging to rūpa loka	
sabba	all	
sacca	truth, as in a Noble Truth	
sadda	sound	
saddhā	faith (through knowledge and understanding)	
sahajāta	born together	
sahetuka	with good roots as in dvihetuka and tihetuka; if no good roots it is an ahetuka birth	
Sakadāgāmī	Once-Returner (one more rebirth in kāma loka)	

Pāli Word	Meaning	Audio
saḷāyatana	six sense bases for a normal human	
samādhi	concentration on a good or bad mindset: What is Samādhi? – Three Kinds of Mindfulness	
samanantara	matching with anantara: Anantara and Samanantara Paccayā	
samāpatti	different from jhāna, see: Citta Vīthi – Processing of Sense Inputs	
sammā	quench (defilements): What is “Saṇ”? Meaning of Sansāra (or Saṁsāra)	
sammappadhāna	four main efforts to stop “saṇ” from arising: Two Versions of 37 Factors of Enlightenment	
samatha	calming the mind	
sāmisa	citta with kilesa or akusala cetasika	
sampajāna	sorting defiled thoughts: Satipatthāna Sutta – Structure	
sampappalāpa	frivolous talk: Ten Immoral Actions (Dasa Akusala)	
samphassa	“saṇ” + “phassa”: Difference between Phassa and Samphassa	
sampaṭṭiccana	where “gati” are incorporated into a citta vīthi: Citta Vīthi – Processing of Sense Inputs	
sampayutta	together and inseparable, like a dye dissolved in water	
samudaya	arising due to “saṇ”: “saṇ” + “udaya”	
samuppāda	birth of a similar kind: sama + uppada	
saṁvega or saṇvega	“saṇ” + “vega”: javana power in a citta due to “saṇ”: see #9 of Javana of a Citta – The Root of Mental Power	
saṇ	Saṇ	
sandiṭṭhiko	“saṇ” + “diṭṭhi” or enable seeing “saṇ”: Supreme Qualities of Buddha, Dhamma, Saṅgha	
saṅkappa	thoughts, ideas	
saṅkhāra	actions leading to defilements, habits	
saṅkhata (sankata in Sinhala)	arisen by conditions	

Pāli Word	Meaning	Audio
saññā	perception, identification	
saṁsāra or saṇsāra	beginningless rebirth process: What is “Saṇ”? Meaning of Saṇsāra (or Saṁsāra)	
saṁsāric	related to the rebirth process	
santati	one of the 28 types of rūpa: Rūpa (Material Form)	
saṁvara	“saṇ” + “vara” or stop “saṇ” by moral behavior: What is “Saṇ”? Meaning of Saṇsāra (or Saṁsāra)	
saṁvarena	via saṇvara as in saṇvarena pahatabba: The Sotāpanna Stage	
saṁvega	“saṇ” + “vega”: enhanced javana of a citta due to “saṇ”, i.e., highly emotional	
sapta or saptha	seven	
sāsana	Buddha sāsana is Ministry of the Buddha	
sasankhārika	immoral citta arising due to shrunken mind (thīna middha)	
sāsava	with craving	
satara (in Sinhala)	four	
sakkāya diṭṭhi (or sathkāya diṭṭhi)	perception that things in this world are worth striving for: How do we Decide which View is Wrong View (Ditthi)?	
sati	in the mindset of anicca, dukkha, anatta: Satipatthāna – Introduction	
satipatthāna	maintain sati: Mahā Satipatthāna Sutta	
saṁtiraṇa	where a decision is made in a citta vīthi: Citta Vīthi – Processing of Sense Inputs	
sanyojana or saṁyojana	bind to defilements or “saṇ”	
sīla	virtue, moral conduct	
silabbata paramasa	perception that Nibbāna can be attained via just obeying set precepts or procedures	
sekha	trainee (the three stages below the Arahant stage)	
sobhana	good, likable, moral	

Pāli Word	Meaning	Audio
soka	sorrow due to personal loss	
somanassa	with joy	
sota	Two possible meanings: ear and Noble Eightfold Path	
Sotāpanna	Stream Enterer (first stage of Nibbāna)	
Suddhatṭhaka	smallest material element: The Origin of Matter – Suddhatṭhaka	
suddhāvāsa	Brahma realms reserved for the Anāgāmīs	
sugati	"su" + "gathi" or moral habits/behavior; also good realms: Samsāric Habits, Character (Gati), and Cravings (Āsava)	
sukha	bodily pleasure, like with a massage; somannasa is mental	
sukuma	fine; not coarse	
suññatā	emptiness: What is Sunyata or Sunnata (Emptiness)?	
suta	sound	
sutta	discourse in the Tipiṭaka	
suva	as in Nivan suva:	
taṇhā	attachment (bondage) due to greed, hate, or delusion	
tatramajjhataṭṭhā	neutrality of mind; not upekkhā: Cetasika – Connection to Gati	
tejo	heat element	
Thero	One who has attained Nibbāna; nowadays it is used for non-Arahants bhikkhus too	
thīna	shrinking of the mind, not alert	
tuccha	lowly (behavior)	
tiparivaṭṭa	Three rounds of bondage to this world.	
tihetuka	paṭisandhi with three good roots	
tilakkhana	Three characteristics of the 31 realms: Anicca, Dukkha, Anatta	

Pāli Word	Meaning	Audio
Tipiṭaka	three piṭaka: sutta, vinaya, abhidhamma: Preservation of the Dhamma	
tisarana	refuge in Buddha, Dhamma, Saṅgha: Tisarana Vandana and Its Effects on One's Gati	
tivijjā	Three special knowledges of the Buddha: The Way to Nibbāna – Removal of Āsavā	
uccheda diṭṭhi	wrong view that death of the physical body is the end of a living being, i.e., disbelief in rebirth process	
udayavaya	arising and destruction of a saṅkhata (sankata in Sinhala): Udayavaya Ñāṇa	
udayavaya or udayabbaya ñāṇa	Udayavaya Ñāṇa	
uddhacca	tendency to be high-minded (restlessness)	
uddesa	very short description: Sutta Interpretation – Uddesa, Niddesa, Patiniddesa	
upacāra	close to	
upacāra samādhi	samādhi close to jhānic state	
upādāna	clinging, like to hold onto	
upekkha	equanimity, neutrality	
uppatti	birth	
utu	natural change kammaja and cittaja energies to rūpa	
utuja rūpa	rūpa produced via the transformation of kammaja and cittaja rūpa	
vacī	speech	
vaṇṇa (varna in sinhala)	color	
vaya	destruction or deviating to immorality	
vāyāma	effort	
vāyo	element of movement, motion	
vedanā	feeling or more precisely "sensing of an event": Vedanā (Feelings)	

Pāli Word	Meaning	Audio
vedanānupassanā	anupassanā on feelings: Satipatthāna – Introduction	
veyyāvacca	paying homage to and taking care of Holy places: Puñña Kamma – Dāna, Sīla, Bhāvanā	
vibhava	disbelief in rebirth: Kāma Tanhā, Bhava Tanhā, Vibhava Tanhā	
vicāra	sustained concentration on a thought object	
vicikicchā	acting without sati; uncertainty of what to do; doing inappropriate things	
vipassanā	insight meditation with and for clear vision: 4. What do all these Different Meditation Techniques Mean?	
vimāna	residence, normally of a deva	
vimansā	contemplation, investigation	
vimutti	release (from the rebirth process)	
vinaya	rules of discipline for bhikkhus: Kamma, Debt, and Meditation	
viññāṇaṇcāyatana	second arūpi brahma realm: 31 Realms of Existence	
viññata	comprehension via viññāṇa	
viññati	intimation. For example, kāya viññati is express intention via body movement.	
viññāṇa	defiled consciousness	
viññāṇaṇcāyatana	second arūpa brahma realm: 31 Realms of Existence	
vinodanā	in vinodanā pahatabba: The Sotāpanna Stage	
vipāka	result (of a kamma)	
viparināma	unexpected change	
vipassanā	removing defilements via insight of Tilakkhaṇa	
vippayutta	appear together, but separable; like a current in a wire	
virati	lose craving for indulgence	

Pāli Word	Meaning	Audio
virīya	effort	
visuddhi	purification	
vitakka	initial application of the mind on an object	
vīthi	street; but in a citta vīthi means a "packet of thoughts" with a certain number of citta	
votthapana	determining (citta)	
vyāpāda or byāpāda	ill will, stronger than paṭigha	
yojanā	distance of about 7 miles	
yoniso manasikāra	ability to see consequences of one's actions for future rebirths: Four Conditions for Attaining Sotāpanna Magga/Phala

8.4 List of “Saṇ” Words and Other Pāli Roots

June 29, 2017; revised November 9, 2018; March 17, 2023

1. Pāli is a phonetic language. It does not have its alphabet. *Tipiṭaka* was initially written down in Pāli with the Sinhala alphabet.

- Pāli verses are composed for ease of oral transmission. *Tipiṭaka* was orally transmitted faithfully for several hundred years.
- So, in many cases, root words are hidden in combined words in verses that were composed to rhyme better for easy oral transmission.

2. Rather than trying to find roots in Sanskrit, that is the way to find the roots. As I explained with evidence from the *Tipiṭaka*, **the Buddha prohibited using Sanskrit words, or even translating the *Tipiṭaka* to Sanskrit**; see, “[Preservation of the Buddha Dhamma](#).”

- That is because despite some similarities, in Sanskrit, many words were composed to sound more “impressive”, without paying attention to embedded meanings.
- For example, *Pratītyasamutpāda* is the Sanskrit term for *Paṭicca Samuppāda*. *Pratītyasamutpāda* sounds impressive but the meaning is not clear at all.
- On the other hand, it is evident in *paṭi + icca* leading to *sama + uppāda*; see, “[Paṭicca Samuppāda – “Pati+ichcha”+“Sama+uppāda](#).”

3. Pāli words are combined in ways to rhyme better. By finding critical roots embedded in such “combined words,” one can quickly figure out the meaning.

- “*yadaniccaṃ taṃ dukkhaṃ, yaṃ dukkhaṃ tadanattā*” verse appears in many *suttā*.
- To understand it, we need to “expand it” or “unfold it”: “*yad aniccaṃ taṃ dukkhaṃ, yaṃ dukkhaṃ tad anattā*.”
- Now the meaning becomes clear: “*anicca* nature leads to *dukkha*, *dukkha* nature leads to *anatta* nature”; see, “[Anicca, Dukkha, Anatta – Wrong Interpretations](#).”

4. The following are some examples of combinations of words to make a verse rhyme better for oral transmission.

Naidham = *na idham* or “not the case.”

Ayamantimā jāti = *ayam + antima + jāti* or “my last birth.”

Nūppajjati = *na + uppajjati*: “will not arise.”

Cittappasāda = *citta + pasāda*; note the two p’s in the combined word that allow it to rhyme better.

Similarly in: *Rūpakkhanda* = *rūpa khandha*: “*rūpa* aggregate.”

Aveccappasāda = *ava icca pasāda* or “faith that leads to overcoming *taṇhā* (attachment).”

Buddha = *bhava + uddha*: one who figured out how to stop existences (*bhava*) from arising.

Bhavaṅga = *bhava + aṅga*; intrinsic aspect of *bhava*.

Sakkāya = *sath + kāya*: good collections usually refer to the five aggregates. *Sakkāya diṭṭhi* is the view that the five aggregates should be embraced. [*sakkāya* = *sat + kāya*; ***sat* = *sant***; ***sant*** : (ppr. of *atthi*), 1. 存在 (being, existing). 2. 善的, 真實 (good, true,) Nom. sg. m. *santo*; f. *satī*; nt. *santaṃ*; Acc. *santaṃ* & *sataṃ* (opp. *asaṃ*); Instr. *satā*; Loc. *sati* & *sante*; Abl. *santato*. -- pl. Nom. *santo*; nt. *santāni*; Acc. *sante*; Gen. *sataṃ*; Instr. *sabbhi*; Loc. *santesu*. -- Compar. *santatara*; superl. *sattama*.]

Anāpāna = *āna* + *āpāna*: “taking in” and “putting out.”

Note the pronunciation of the following words backwards to rhyme better:

- *Anāgāmi* = *na āgāmi*: not coming back (about not coming back to *kāma loka* for a person who has attained the *Anāgāmi* stage of *Nibbāna*).
- *Anatimāna* = *na* + *atimāna*: *atimāna* is “high-mindedness” and *anatimāna* is opposite or “humble.”

5. Just by knowing what is meant by the root “*saṇ*,” many Pāli words can be understood easily; see, “[What is “Saṇ”? Meaning of Saṇsara \(or Saṁsāra\)](#).”

- Note that some words are written and pronounced with emphasis on “n” rather than “ṇ”, because it rhymes better that way; a good example is *saṁsāra* (*saṇsāra*) which can be written and pronounced either way.
- On the other hand, *sammā* comes from “*saṇ*” + “*mā*,” but is always pronounced as “*sammā*,” because it rhymes easier that way; e.g., *sammā diṭṭhi*, *sammā saṅkappa*, etc.
- It must be kept in mind that “*saṇ*” has various levels. First one needs to remove ‘*saṇ*’ that lead to immoral activities that can lead to births in the *apāyā*; after one becomes a *Sotāpanna*, one should strive to eliminate “*saṇ*” involving sense pleasures; after becoming an *Anāgāmi*, the goal is to remove “*saṇ*” associated with *rūpa* and *arūpa jhāna*. I only stated “sense pleasures” in the Table.

6. I plan to add another table for Pāli words with a few more key “roots.”

Pāli Words with “*Saṇ*” Root

No	Pāli Word	Roots	Meaning of added word	Meaning of whole word
1	Sammā	saṇ + mā	mā means to “remove”	associated with removing “saṇ”
2	sammāpaṭipatti	saṇ + mā + paṭipatti	paṭipatti is a process	method or effort to remove “saṇ”
3	sammāvimutti	saṇ + mā + vimutti	vimutti is complete release	Arahant phala; Nibbāna
4	Sammanti	saṇ + mā	like gaccā to gaccanti	attaining peacefulness by removing “saṇ”
5	samantano	saṇ + anta; rhymes like samananta	anta is end	a process that gets rid of “saṇ”
6	Sammā diṭṭhi	Sammā + diṭṭhi	diṭṭhi is vision (here to see Tilakkhaṇa)	clear vision to see danger of (and how to remove) “saṇ”
7	Sammā saṅkappa	Sammā + saṅkappa	saṅkappa are conscious/unconscious thoughts	thoughts to removing “saṇ”
8	Sammā vācā	Sammā + vācā	vācā is conscious thoughts/speech	speech to remove “saṇ”
9	Sammā kammanta	Sammā + kammanta	kammanta is actions	bodily actions to remove “saṇ”
10	Sammā ajīva	Sammā + ajīva	ajīva is way one lives	living style to remove “saṇ”
11	Sammā vāyāma	Sammā + vāyāma	vāyāma is effort	effort to remove “saṇ”

No	Pāli Word	Roots	Meaning of added word	Meaning of whole word
12	Sammā sati	Sammā + sati	sati is mindfulness (about Tilakkhaṇa)	mindfulness to remove “saṅ”
13	Sammā samādhi	Sammā + samādhi	samādhi is the state of equanimity (sama + adhi)	state of samādhi resulting from removing “saṅ”
14	Sambhava	saṅ + bhava	bhava is existence	existence due to “saṅ”
15	Sambuddha	saṅ + bhava + uddha	uddha is rooting out	one who rooted out existence in 31 realms
16	Sambodhi			state attained by a sambuddha; Nibbāna
17	Sambhūta	saṅ + bhūta	bhūta refers to cattāro mahā bhūta	creation of bhūta via “saṅ” in the mind; The Origin of Matter – <u>Suddhatthaka</u>
18	Sammapañña	sammā + pañña	pañña is wisdom	wisdom to see the way to remove “saṅ”
19	Sammā-Sambodhi (Sammā-Sambuddha)		Emphasizing the achievement of sambodhi on one's own	reserved for the Buddhas
20	Sammatta	saṅ+mā+atta	atta means the “truths leading to sammā”	Sammatta niyama is a knowledge of a Sotāpanna.
21	Sambojjanga	saṅ +bodhi+āṅga; rhymes as sambojjanga	“āṅga” means factors	Factors that lead to Sambodhi
22	Sampajāna (Sampajanna)	saṅ + pajāna	pajāna is to comprehend	to figure out defilements (saṅ)
23	sammappadhāna	saṅ + mā+ padhāna	mā is to remove; padhāna means “first”	first to do to remove “saṅ”
24	Sambandha	saṅ + bandha	bandha is to bind, associate with	bind with someone/something with “saṅ”
25	sambhāvitā	saṅ + bhāvitā	bhāvitā is to use	engage in “saṅ” or sense pleasures
26	Sambheda	saṅ + bheda	bheda means to quarrel	fighting over pleasurable things or “saṅ”
27	Sambhīta	saṅ + bhīta	bhīta means to terrify	“saṅ” leading to terror (in mind or in future births)
28	Sambhoga	saṅ + bhoga	bhoga means pleasurable things, especially food	sense pleasures
29	Sambhunja	saṅ + bhunja	bhunja means to eat or consume	engage in sense pleasures
30	sammoha	saṅ + moha	moha is delusion	extreme delusion
31	sampādesi / sampādetā	saṅ + pādesi	pādesi is to sort out and see	to clarify what is “saṅ”, as in "vaya dhammā saṅkhāra, appamādena sampādetā".
32	sampahanseti	saṅ +pahāna	pahāna is to remove	to remove “saṅ”

No	Pāli Word	Roots	Meaning of added word	Meaning of whole word
33	sampañño	saṇ + pañño	pañño means with wisdom, possessive of paññā	attained wisdom to see 'san'
34	Sampajāna	saṇ + pajāna	pajāna is to clarify	sort out or to clarify “saṇ”
35	sampayoga	saṇ + payoga	payoga is a clever plan to get something done	plan to access a pleasurable thing
36	Samphassa	saṇ + phassa	contact with saṇ (in the mind)	Vedanā (Feelings) Arise in Two Ways
37	Sampassati	saṇ + passati	passati means to comprehend	comprehend 'san'
38	sankiliṭṭha or saṅkiliṭṭha	saṇ + kilitha	kilitha is to defile	making mind defiled by adding “saṇ”
39	sankilesa or saṅkilesa	saṇ + kilesa	kilesa are defilements	things that defile the mind
40	Samsāra (Saṁsāra)	saṇ + sāra	sāra means “good”	perception that saṇ (things in this world) are good.
41	Sanseva (Samseva)	saṇ + seva	seva means to “associate”	to indulge in worldly pleasures
42	Samucceda (as in samucceda pahāna)	saṇ + ucceda	ucceda means to “remove from the roots”; pahāna is remove	samucceda pahāna means to “get rid of permanently”
43	saṇyoga or sanyoga	saṇ + yoga	yoga is to bind	bound with “saṇ” (to this world)
44	saṇyojanā or sanyojanā	saṇ + yo + ja	“yo” is to bind; “ja” is to produce	factors that leads to bonds to rebirth process
45	samudaya	saṇ + udaya	udaya is to arise	arising due to “saṇ”
46	Samutthāna	saṇ + utthāna	utthāna means “where it arises”	Samutthāna citta is same as cittaja; where “saṇ” originates (mind)
47	samvāsa or sanvāsa	saṇ + vāsa	vāsa live with	live together; sexual intercourse
48	Samvara (Sanvara)	saṇ + vara	vara means to stop, avoid	moral behavior
49	Samvaddha	saṇ + vaddha	vaddha is to "grow"	to add “saṇ”, i.e., defilements
50	Samvannanā	saṇ + vannanā	vannanā is to praise	to praise immoral acts
51	Samvattana (Samvattati)	saṇ + vattana	vattana is to “drop”	aiding in removing “saṇ”
52	samvedanā or sanvedanā	saṇ + vedanā	vedanā is to feel	feelings due to “saṇ”: samphassa jā vedanā
53	saṇvidhāna or sanvidhāna	saṇ + vidhāna	vidhāna means ordering	giving orders, organize (normally used mundanely)
54	saṇsaraṇa or sansaraṇa	saṇ + sarana	sarana means move around, travel	wandering in saṁsāra

No	Pāli Word	Roots	Meaning of added word	Meaning of whole word
55	Sariyutta (as in Sariyutta Nikāya)	saṇ + yutta	yutta means “contains”	Suttā in the Sariyutta Nikāya explain “saṇ” terms
56	Sancetanā	saṇ + cetanā	cetanā is intention (in a thought)	defiled thoughts
57	sanditthika	saṇ + dīṭṭhi	dīṭṭhi is seeing, vision	seeing “saṇ” with Buddha Dhamma
58	Sangāyanā	saṇ + gāyanā	gāyanā is to recite	Buddhist Council where suttā describing “saṇ” are recited.
59	Sanga	saṇ + ga	ga is to attach,	attach to “saṇ”
60	Sangati	saṇ + gati	gati is character, habit	bad character/habits
61	Saṅgha	saṇ + gha	gha is to remove	Those who have removed “saṇ” belong to Saṅgha; Nobles or Ariyā, but usu. include bhikkhus
62	Sāṅghika	possessive of Saṅgha		offered to Saṅgha
63	Sangīta (Sangeetha)	saṇ + gīta	gīta is a poem, song	music that bend mind towards sense pleasures
64	sankalpana or saṅkappa	saṇ + kalpana	kalpana means conscious thoughts	defiled thoughts
65	sankhitta	saṇ + kitta	kitta is action (kriya)	anything done with “saṇ” (defilements) in mind
66	Sansun	saṇ + sūn (û rhymes like put)	sūn means to destroy	calming the mind via removing “saṇ”
67	Sanvara	saṇ + vara	vara is to stay away from	discipline via staying away from “saṇ”, i.e., moral behavior
68	sanvega or samvega	saṇ + vega	vega is speed or rapidity	enhanced javana of a citta due to “saṇ”, i.e., highly emotional
69	saṅkhāra (should really be sankāra)	saṇ + kāra	kāra is action (all actions are initiated via thoughts)	Saṅkhāra – What It Really Means
70	Sankata	saṇ + kata	kata is a result	produced via saṅkhāra; anything in this world
71	Sansāra (Saṁsāra)	Saṇ + Sāra	Sāra is good, beneficial	What is “Saṇ”? Meaning of Sansāra (or Saṁsāra)
72	Santāpa	saṇ + tāpa	tāpa is heat	heating of the mind due to “saṇ”
73	Santutti (or Santhutti)	saṇ + thutti	thutti is to remove: Arogya Parama Labha..	ease of mind when “saṇ” removed; but commonly used to indicate happiness

8.5 The 89 (121) Types of Citta

Revised: October 29, 2015; August 31, 2017; June 3, 2018; July 31, 2018; August 28, 2022; May 16, 2023 (#7-#10)

Citta for *Kāmaloka* (in the 11 sense realms) - 54 in all

1. There are three main types of *citta* here: The differentiation is based on whether they have immoral roots (*lobha*, *dosa*, *moha*), *kammically* moral roots (*alobha*, *adosa*, *amoha*), or are *kammically* neutral, i.e., no roots.

- **12 immoral *citta***: 8 with *lobha* roots; 2 with *dosa* roots, and 2 with *moha* roots. All ten immoral acts (*dasa akusala*) are done with these 12 types of *cittā*. Because of the 12 immoral *cittā*, **seven rootless (*ahetuka*) *vipāka citta*** can arise in the future. Thus, altogether there are **19 *cittā* in this category**.
- **Eight moral *cittā***: four with all three moral roots and 4 with two moral roots (lacking in wisdom). They can give rise to two types of *vipāka citta*: **eight *vipāka citta* with no roots** and **eight *vipāka citta* with moral roots** (four of them have all three moral roots, and the other four are lacking in wisdom). Thus **24 types of *citta* are mentioned here**, of which 16 have moral roots, and eight are rootless (*ahetuka*).
- When these same **eight moral *citta* arise in *Arahants*, they are called *kiriya citta*** or functional *citta*. They have the same moral roots as the eight moral *citta* mentioned above but do not have any *kammic* potential or *kammic* consequences.
- All those *citta* with moral roots (8 *kiriya citta* for *Arahants* and 16 for others) are called *sobhana* (beautiful) *citta*.
- Finally, **three types of *kiriya citta* arise in *citta vīthi*: they are neither *kamma* nor *kamma vipāka***. These are the three *kiriya citta* without any roots, and thus are rootless (*ahetuka*) *citta*. Two of these perform functions of (i) five-sense-door adverting consciousness (*pañcadvārāvajjana citta*) and the *votthapana citta*, and (ii) mind-door-adverting consciousness (*manodvārāvajjana citta*). (iii) The third one arises in only *Arahants* (when they smile about sense-sphere phenomena).
- Note that none of the seven *akusala vipāka citta* has roots. Also, eight *kusala vipāka citta* associated with *pavutti vipāka* (i.e., not giving rise to rebirth) do not have any roots. Those 15 *cittā* and the three *ahetuka kiriya citta* are involved in the *vipāka* phase of a given *citta vīthi*. They do not have any *sobhana* or *asobhana cetasika* other than the 7 universal *cetasika* and the 6 *pakiṇṇaka* (particulars) *cetasika*; see, “[Cetasika – Connection to Gati](#)” for various types of *cetasika*. Those 18 *cittā* are listed on p. 112 of [Ref.1](#) under the second group below the group of *akusala citta*.

2, The **54 *kāmaloka citta*** can be categorized in different ways.

Asobhana (Unbeautiful)		Sobhana (Beautiful)
Immoral- 12	Rootless – 18	Moral -24
<i>Lobha</i> (8)	Immoral <i>Vipāka</i> (7)	<i>Moral</i> (8)
<i>Dosa</i> (2)	Moral <i>Vipāka</i> (8)	Moral <i>Vipāka</i> (8)
<i>Moha</i> (2)	<i>Kiriya</i> (3)	<i>Kiriya</i> (8)

Citta for *Rūpaloka* (in the 16 *Rūpa* realms) - 15 in all

3. There are only 15 *cittā* that are predominantly present in the *Rūpaloka*. Five are *jhānic* moral *citta*, and five are *vipāka citta* due to those.

4. The five *jhānic* moral *cittā* can be experienced by humans when they develop *samādhi* and attain these (first through fifth) *jhānā*. However, they can only experience the corresponding five *vipāka cittā* when they are born in *Rūpalokas*.

5. The five *jhānic* states are characterized by five *jhāna* factors or mental concomitants: *vitakka* (initial application), *vicāra* (sustained application), *pīti* (zest), *sukha* (happiness), and *ekaggatā* (one-pointedness). All five factors are present in the first *jhāna*, and as one moves to higher *jhānā*, these factors are lost one by one, and in the fifth *jhāna*, only *ekaggatā* is left.

Pīti (zest) is the happiness in the mind, and *sukha* (happiness) is the tranquility of the body.

6. There are five more *jhānic kīriya cittā* experienced by *Arahants* when they attain these *jhānā*.

Thus there are 15 *cittā* in all that predominantly belong to the *Rūpaloka*.

Citta for Arūpaloka (in the 4 Arūpa realms)- 12 in all

7. There are only 12 *cittā* that are predominantly present in the *Arūpaloka*. These are not *jhānās* but “*arūpāvacara samāpatti*.” Four are *kusala cittā* (that one cultivates,) and four are *vipāka citta* due to those.

8. The four *kusala cittā* can be experienced by humans when they attain the *arūpāvacara samāpatti*. However, they can only experience the corresponding four *vipāka cittā* when they are born in *Arūpa loka*.

9. The first of the four *arūpāvacara samāpatti* is the attainment of the base of infinite space (*Ākāsānancāyatana*). A human must master the highest *rūpāvacara jhāna* to attain this *arūpāvacara samāpatti*.

The second is the base of infinite consciousness (*Viññāṇānācāyatana*). The third is the base of nothingness (*Ākiñcaṇṇāyatana*), and the fourth is the base of neither-perception-nor-non-perception (*Nevasaññānāsaññāyatana*). In this last type of consciousness, the perception factor (*saññā*) is so subtle that it can no longer perform the function of perception, i.e., one is unaware of the “world.” Yet perception is not altogether absent. This is another reason why the ancient *yogis* erroneously assumed this eighth *jhāna* to be *Nibbāna*.

10. There are four more *arūpāvacara samāpatti kīriya cittā* experienced by *Arahants* when they attain these *samāpatti*.

Thus there are 12 *cittā* in all predominantly belong to the *Arūpa loka*.

Lokuttara (Supermundane) Citta – 8 in all

11. These pertain to the four stages of *Nibbānic* attainment: *Sotāpanna*, *Sakadāgāmī*, *Anāgāmī*, and *Arahant*.

12. Each stage involves two types of *citta*: path consciousness (*magga citta*), and fruition consciousness (*phala citta*). The *magga citta* has the function of eradicating or permanently attenuating defilements.

- The *phala citta* has the function of experiencing the degree of liberation made possible by the *magga citta*.

13. Each *magga citta* arises only once and endures for one thought-moment. It is never repeated. The corresponding *phala citta* (which corresponds to a *vipāka citta* but is not called a *vipāka citta*) arises immediately after the *magga citta*. This contrasts mundane *vipāka cittā*, which can occur even many lifetimes after the corresponding *kusala* or *akusala citta*.

14. The *phala citta* can be repeated after one attains it. With practice, it can be sustained for long times, up to 7 days for an *Arahant*.

Thus, there are $54 + 15 + 12 + 8 = 89$ *cittā* in all.

How 121 Types of Citta are Possible

15. It is possible to further analyze the types of citta by refining the above method by considering that each *magga phala* can be reached from the vicinity of each *anāriya jhānic* state.

- One can attain *Nibbānic* states via the vicinity of each of the five *rūpa loka jhānic* states (**here, the *Abhidhamma* method of 5 *jhānā* is used, instead of the four mentioned in the *suttā***, where the first two *jhāna* in *Abhidhamma* categorization are taken to be one *jhāna*; in the *Abhidhamma* analysis *vitakka* and *vicāra* are removed in two steps, whereas in the *sutta* analysis it is assumed that they are removed in one step).
- Therefore, the five *jhānic* states can lead to the four *magga citta* and four *phala citta*.
- Thus here, there are 40 ways to attain *lokuttara citta*. Therefore, in this case, the total number of *cittā* would be 121 ($= 54 + 15 + 12 + 40$) instead of 89.

16. Therefore, *magga phala* (including the *Arahant* stage) can be reached through any of the *jhānic* states or without going through any *jhānic* state.

- Of course, the eight *lokuttara citta* (i.e., the four stages of *Nibbāna*) arrived are the same, regardless of whether they arrived via *jhāna*.
- To attain the first *Ariya jhāna*, one must be at least an *Anāgāmi*. See #6 of “[Samādhi, Jhāna, Magga Phala – Introduction](#).”

Important Conclusion Regarding *Jhāna* and *Magga Phala*

17. From the above it is clear that *magga phala* can be attained without *jhāna* (89 *cittā* analysis applicable). *Magga phala* can also be attained via each of the five *jhānic* states (in the *Abhidhamma* method), which correspond to the four *jhānā* discussed in the *suttā*; here the 121 *cittā* analysis is applicable.

- Furthermore, these *jhānic* states can be reached via either *anāriya jhāna* or *Ariya jhāna*. The experience seems to be the same.
- The only difference is that while *kāma rāga* is suppressed (*vikkhambhana pahāna*) in *anāriya jhāna*, it is REMOVED (*samuccheda pahāna*) in *Ariya jhāna*.
- For details, see, “[Samādhi, Jhāna \(Dhyāna\), Magga Phala](#).”

8.6 Cetasika (Mental Factors)

Revised January 24, 2020; May 15, 2020; June 8, 2020; August 23, 2022

Cetasika (mental factors; pronounced “chethasikā”) appear concomitantly with *citta* (thoughts; pronounced “chiththā”), and they cease together with *citta*. They define the character (good or bad or neutral) of the *citta*.

- The way to “[Lead a Moral Life](#),” or to “[Seek Good Rebirths](#),” or to “[Seek Nibbāna](#),” is to get rid of the bad (non-beautiful) *cetasika* and cultivate good (beautiful) *cetasika*. This is done by changing one’s habits via learning Dhamma and practicing it: see, “[Habits and Goals](#),” “[Sansāric Habits and āsavas](#),” and “[The Way to Nibbāna – Removal of Āsavā](#),” in that order.

1. Seven *cetasika* are in every *citta*. These are called **universals** (*sabba citta sādhāraṇa*):

- *Phassa* (contact); *vedanā* (feeling); *saññā* (perception); *cetanā* (volition); *ekaggatā* (One-pointedness) can become *Sammā Samādhi*; *jīvitindriya* (life faculty) *manasikāra* (memory).

2. Since they are universals, the above *cetasika* appears in both *kusala* and *akusala citta*. All are important mental factors:

- *Saññā* and *vedanā* are in *pañcakkhandha*.
- *Cetanā* determines *kamma*; it is the *cetasika* that “puts together a *citta*” by automatically incorporating other relevant *cetasika* according to one’s “*gati*.”
- *Ekaggatā* is the salient factor in *samādhi*.
- Consciousness cannot arise without *phassa*. Note that *samphassa* differs from *phassa*; see, “[Difference between Phassa and Samphassa](#).”
- *Jīvitindriya* maintains life.
- *Manasikāra* can be either *yoniso manasikāra* (important in attaining the *Sotāpanna* stage), and *ayoniso manasikāra* can lead to the accumulation of *akusala kamma*.

3. There are six *cetasika* that CAN appear in both types of *cittā*: *kusala* and *akusala*. However, they are found in only particular types of *cittā*. They are called **particulars** or *pakiṇṇaka*: [*pakiṇṇaka* : (adj.) [*pa+kiṇṇa* (pp. of *kirati*)+*ka*] scattered about; fig. miscellaneous, particular, opp. to *sādhāraṇa*.]

- *Vitakka* (focused application) can become *Sammā Saṅkappa*; *vicāra* (sustained application); *adhimokkha* (dominate). *Adhimokkha* is the *cetasika* that makes another *cetasika* to dominate a given *citta*; for example, to get *uddhacca*, *vicikicchā*, or *paṭigha* to strengthen.
- *Viriya* (effort) can become *Sammā Vāyāma*; *pīti* (joy); *chanda* (desire, not greed).
- **These are important *cetasika* and play key roles in morality/immorality since they can appear in both *kusala* and *akusala citta*.** For example, when one’s mind is covered with deep ignorance (*moha*), one may enjoy immoral deeds (*pīti*), makes a liking for them (*chanda*), and strive more (*virīya*) to do such acts.

4. Just like universals, these particulars can appear in either type of *cittā*, *kusala* or *akusala*. *Vitakka*, *vicāra*, and *pīti* are *jhāna* factors as well.

- *Viriya* and *chanda* are two factors in the four bases of mental power; see, “[The Four Bases of Mental Power \(Cattāro Iddhipāda\)](#).”
- *Adhimokkha* is important in decision making by making another *cetasika* dominant. All these factors can go in an *immoral* direction too.

5. There are 14 *asobhana cetasika* (**non-beautiful mental factors**) that appear only in *akusala citta*. Out of these, four universals appear in ALL *akusala citta*:

- **Moha** (delusion); *Ahira* (shamelessness); *Anottapa* (fearlessness in the wrong); *uddhacca* (restlessness or agitation).
- Both shamelessness and fearlessness of wrong encourage doing immoral acts. Restlessness causes unwise decision making.

The other ten are “occasionals” that appear in only particular types of *akusala citta*:

- **Lobha** (greed); *diṭṭhi* (wrong view); *māna* (conceit); **dosa** (hatred); *issā* (envy); *macchhariya* (extreme greed, also pretending one does not have wealth); *kukkucca* (worry, also feeling low); *thīna* (sloth, sluggishness); *middha* (torpor); *vicikicchā* (doubt arising from temptations).
- *Lobha* and *dosa* are two of the three immoral roots. Sloth and torpor normally rise together and are opposite of *virīya*; they are listed as one factor in Five Hindrances; see, “[Key to Calming the Mind](#).”

6. Twenty-five *sobhana cetasika* (**beautiful mental factors**) appear only in *kusala citta*. Out of those, 19 of them appear in every *kusala citta* and thus are called beautiful universals:

- *Saddhā* (faith); *sati* (moral mindfulness) can become *Sammā Sati*; *hiri* (shame of wrong); *ottappa* (fear of wrong); **alobha** (absence of greed); **adosa** (absence of hate/anger, of which *mettā* or “loving-kindness” is a part); *tatramajjhataṭṭā* (neutrality of mind, of which *upekkhā* is a part); *kāyapassaddhi* (tranquility of mental body); *cittapassaddhi* (tranquility of consciousness); *kāyalahutā* (lightness of mental body); *cittalahutā* (lightness of consciousness); *kāyamudutā* (malleability of the mental body); *cittamudutā* (malleability of consciousness); *kāyakammaññatā* (wieldliness of mental body); *cittakammaññatā* (wieldliness of consciousness); *kāyapāguññatā* (proficiency of mental body); *cittapāguññatā* (proficiency of consciousness); *kāyujjukatā* (rectitude of mental body); *cittujjukatā* (rectitude of consciousness).

The other six are occasionals that appear in only particular types of *kusala citta*:

- There are three abstinences: *Sammā Vācā* (right speech); *Sammā Kammanta* (right action); *Sammā Ājīva* (right livelihood).
- Two Illimitables (limit-less): *karuṇā* (compassion); *muditā* (appreciative joy; joy at other’s moral success).
- **Paññā** or *paññindriya* (wisdom or wisdom faculty). *Sammā Diṭṭhi* leads to *paññā*.

7. Mental factors in the **Noble Eightfold Path** are highlighted in green.

8. **Immoral roots** are highlighted in red. **Moral roots** are highlighted in purple.

9. As a rule, *sobhana* and *asobhana cetasika* CANNOT appear together in a given *citta*.

8.7 Rūpa (Material Form) – Table

Revised April 22, 2020; August 16, 2020; September 5, 2022

We discuss the 28 types of *rūpa* (material form) in Buddha Dhamma. For discussions on *rūpa*, see, “[What are Rūpa? \(Relation to Nibbāna\)](#)” and “[Rūpa \(Material Form\)](#).”

Concretely Produced (<i>Nipphanna</i>)	Abstract (<i>Anipphanna</i>) Rūpa
I. Great Elements (<i>Mahā Bhūta</i>)	VII. Limiting Phenomenon
1. <i>Pathavi</i> (Extension/Hardness)	19. <i>Ākasa dhātu</i> (space element)
2. <i>Āpo</i> (Cohesion/Fluidity)	IX. Communicating (<i>Viññati</i>) Rūpa
3. <i>Tejo</i> (Heat/Hotness)	20. <i>Kāya Viññati</i>
4. <i>Vāyo</i> (Motion/Pushing & Supporting)	21. <i>Vacī Viññati</i>
II. Internal (<i>Pasāda</i>) Rūpa	X. Mutable (<i>Vikāra</i>) Rūpa
5. <i>Cakkhu</i> (eye element)	22. <i>Lahutā</i> (lightness)
6. <i>Sota</i> (ear element)	23. <i>Mudutā</i> (Elasticity)
7. <i>Ghana</i> (nose element)	24. <i>Kammaññatā</i> (weirdness)
8. <i>Jivhā</i> (tongue element)	XI. Material Qualities (<i>Lakkhaṇa Rūpa</i>)
9. <i>Kāya</i> (body element)	25. <i>Upacaya</i> (production)
III. Gocara (Objective) Rūpa	26. <i>Santati</i> (continuity)
10. <i>Vaṇṇa</i> (visible)	27. <i>Jaratā</i> (Decay)
11. <i>Sadda</i> (Sound)	28. <i>Aniccatā</i> (Dissolving)
12. <i>Gandha</i> (Smell)	
13. <i>Rasa</i> (Taste)	
* <i>Phoṭṭhabba</i> (Tangibility, warmth, and movement) comes from 3 <i>mahā bhūta</i> of <i>pathavi, tejo, vāyo</i>	
IV. Bhāva (Faculties of sex) Rūpa	
14. <i>Itthi</i> (Feminine)	
15. <i>Purisa</i> (Masculine)	
V. Hadaya (Mind Base)	
16. <i>Hadaya Vatthu</i> (seat of the mind)	
VI. Life	
17. <i>Jīvitindriya</i> (Life faculty)	
VII. Nutritional	

18. *Oja* (Nutriment)**Types of *Rupā***

- The four great elements (#1 through #4), three *gocara rūpa* (#10, #12, #13), and nutriment (#18), ALWAYS appear together. They can NEVER be detected by themselves. They come together as *suddhaṭṭhaka* (meaning the smallest collection of those eight types of *rūpa*.) See “[The Origin of Matter – Suddhaṭṭhaka](#).”
- **There are nine *rūpā* created ONLY by kammic energy at the *paṭisandhi* moment.** Those are the five *pasāda rūpa* (#5 through #9), and four other *rūpa* (#14 through #17), including the seat of the mind (*hadaya vatthu*).
- **The 16 *rūpa* that are highlighted in blue are fine (*sukuma*) *rūpa*.** The other 12 are coarse (*oḷārika*) *rūpa*.
- *Nipphanna rūpa* are caused by *kamma*, *citta*, *utu* (*tejo*), and *āhāra* (*oja*). The other 10 (*anipphanna rūpa*) are not caused or conditioned by *kamma*, *citta*, *utu* (*tejo*), and *āhāra* (*oja*).
- The ten types of *anipphanna rūpa* (on the right side of the Table) are abstract *rūpa*.

Types of *Rūpā* Present in Different Realms

- All 28 *rūpā* arise in the *kāma*-realms. Eight *rūpā* comprising *sadda*, five *viññatti/vikāra-rūpā*, *jaratā-rūpa*, and *aniccatā-rūpa*, do not arise at the moment of birth (*paṭisandhi*.) During life time, they can arise.
- In the 15 *rūpa* realms, except for *Asañña*-realm, 23 *rūpā* arise (*ghāṇa-pasāda*, *jivhā-pasāda*, *kāya-pasāda*, *itthi-bhava* and *purisa-bhava* being excluded).
- Only 17 *rūpā* arise in the *Asañña* realm. They are the eight *avinibbhoga* (four *mahā bhūta* and *vaṇṇa*, *gandha*, *rasa*, *oja*), *jivita rūpa*, *ākāsa dhātu*, three *lahutadi*, and four *lakkhana-rūpā*;
- No *rūpa* above the *suddhaṭṭhaka* level arises (except for *hadaya vatthu*) in the *arūpa*-realms. Thus, only that trace of “matter” is present anywhere in the 31 realms. Ancient *yogis*, who attained all eight *anāriya jhānā*, could not see any *rūpa* in the *arūpa loka* and deduced that was *Nibbāna*. Only a Buddha can see a *hadaya vatthu*, i.e., a *suddhaṭṭhaka*. Thus, linkage to matter has not been severed in *arūpa loka*.

Definitions from *Dhammasaṅgaṇī*

The following are quoted from the “[WebLink: suttacentral: *Rūpavibhatti* DS 2.2.3](#)” section of *Dhammasaṅgaṇī* of the *Tiṭṭaka*.

- *Katamaṃ taṃ rūpaṃ itthindriyaṃ? Yaṃ itthiyā itthiliṅgaṃ itthinimittaṃ itthikuttaṃ itthākappa itthattaṃ itthibhāvo—idaṃ taṃ rūpaṃ itthindriyaṃ.*
- *Katamaṃ taṃ rūpaṃ purisindriyaṃ? Yaṃ purisassa purisaliṅgaṃ purisanimittaṃ purisakuttaṃ purisākappa purisattaṃ purisabhāvo—idaṃ taṃ rūpaṃ purisindriyaṃ.*
- *Katamaṃ taṃ rūpaṃ jīvitindriyaṃ? Yo tesaṃ rūpīnaṃ dhammānaṃ āyu ṭhiti yapaṇā yāpanā iriyaṇā vattanā pālanā jīvitaṃ jīvitindriyaṃ—idaṃ taṃ rūpaṃ jīvitindriyaṃ.*
- *Katamaṃ taṃ rūpaṃ kāyaviññatti? Yā kusalacittassa vā akusalacittassa vā abyākatacittassa vā abhikkamantassa vā paṭikkamantassa vā āloketassa vā vilokentassa vā samiñjentassa vā pasārentassa vā kāyassa thambhanā santhambhanā santhambhitattaṃ viññatti viññāpanā viññāpitattaṃ—idaṃ taṃ rūpaṃ kāyaviññatti.*

- *Katamaṃ taṃ rūpaṃ **vacīviññatti**? Yā kusalacittassa vā akusalacittassa vā abyākatacittassa vā vācā girā byappatho udīraṇaṃ ghoso ghosakammaṃ vācā vacībhedo—ayaṃ vuccati vācā. Yā tāya vācāya viññatti viññāpanā viññāpitattam—idaṃ taṃ rūpaṃ vacīviññatti.*
- *Katamaṃ taṃ rūpaṃ **ākāsadhātu**? Yo ākāso ākāśagataṃ aghaṃ aghagataṃ vivaro vivaragataṃ asamphuṭṭhaṃ catūhi mahābhūtehi—idaṃ taṃ rūpaṃ ākāśadhātu.*
- *Katamaṃ taṃ rūpaṃ rūpassa **lahutā**? Yā rūpassa lahutā lahupariṇāmatā adandhanatā avitthanatā—idaṃ taṃ rūpaṃ rūpassa lahutā.*
- *Katamaṃ taṃ rūpaṃ rūpassa **mudutā**? Yā rūpassa mudutā maddavatā akakkhaḷatā akathinatā—idaṃ taṃ rūpaṃ rūpassa mudutā.*
- *Katamaṃ taṃ rūpaṃ rūpassa **kammaññatā**? Yā rūpassa kammaññatā kammaññattam kammaññabhāvo—idaṃ taṃ rūpaṃ rūpassa kammaññatā.*
- *Katamaṃ taṃ rūpaṃ rūpassa **upacayo**? Yo āyatanānaṃ ācayo, so rūpassa upacayo— idaṃ taṃ rūpaṃ rūpassa upacayo.*
- *Katamaṃ taṃ rūpaṃ rūpassa **santati**? Yo rūpassa upacayo, sā rūpassa santati— idaṃ taṃ rūpaṃ rūpassa santati.*
- *Katamaṃ taṃ rūpaṃ rūpassa **jaratā**? Yā rūpassa jarā jīraṇatā khaṇḍiccaṃ pāliccaṃ valittacatā āyuno saṃhāni indriyānaṃ paripāko—idaṃ taṃ rūpaṃ rūpassa jaratā.*
- *Katamaṃ taṃ rūpaṃ rūpassa **aniccatā**? Yo rūpassa khayō vayo bhedo paribhedo aniccatā antaradhānaṃ—idaṃ taṃ rūpaṃ rūpassa aniccatā.*
- *Katamaṃ taṃ rūpaṃ kabalīkāro **āhāro**? Odano kummāso sattū maccho mamsaṃ khīraṃ dadhi sappi navanītaṃ telaṃ madhu phāṇitaṃ, yaṃ vā panaññampi atthi rūpaṃ yaṃhi yaṃhi janapade tesāṃ tesāṃ sattānaṃ mukhāsiyaṃ dantavikhādanaṃ galajjhoharaṇīyaṃ kucchivitthambhanaṃ, yāya ojāya sattā yāpenti—idaṃ taṃ rūpaṃ kabalīkāro āhāro.*

8.8 Rūpa – Generation Mechanisms

1. *Rūpa* (or matter) can be generated by four causes: *kamma*, *citta*, *utu*, and *Āhāra* (food). I will discuss these in detail later.

- *Kamma* here refers to volition (*cetanā*). The 25 kinds of *kamma* that produce *rūpā* are the volitions of the 12 *akusala citta*, 8 great *kusala citta*, and the five *rūpa loka kusala citta*. These *rūpa* are created with a time lag, when *kamma vipāka* bear fruits, like at the *paṭisandhi* to a new life. The three *rūpa dasaka* of *vatthu*, *kāya*, and *bhava* are created at *paṭisandhi* by *kamma vipāka*.
- The *rūpa* produced by the *citta* arise **at the same time as the *citta*** themselves, and only at the rising part of the *citta*. Out of the 89 possible *citta*, 75 *citta* can produce *rūpa* (4 *arūpa loka vipāka citta* and the two sets of fivefold sense consciousness cannot produce *rūpa*).
- Thus both *kammaja* and *cittaja* *rūpa* have mind as the direct cause. Both of these decay rapidly and are converted to *utuja rūpa*. What we normally see are the *utuja rūpa* and *āhārajā rūpa*, which have their origins also in the great elements of *tejo* and *oja*.
- The great element *tejo* is responsible for producing *utu samutthana rūpa*: Beginning from the moment of rebirth-linking, the internal *tejo* element found in the *rūpa kalāpas* born of *kamma* combines with the external *tejo* and starts producing organic material phenomena originating from *tejo*. Thereafter the *tejo* element in the *rūpa kalāpas* born of all four causes produces organic material phenomena born of *tejo* element throughout the life. Externally, *tejo* element also produces inorganic material phenomena, such as climatic and geological transformations.
- The nutritive essence, *oja*, is present in all *rūpa-kalāpas* both inside the body (internal) and outside the body (external). The external food, which is eaten, is digested in the stomach and dispersed through blood to all parts of the body. So the internal *oja* and the external *oja* meet in every part of the body. The combination of internal and external *oja* produce *āhārajā rūpas*.

2. The 8 *avinibbhoga rūpā* of *pathavi*, *āpo*, *tejo*, *vāyo*, *vaṇṇa*, *gandha*, *rasa*, and *oja* are ALWAYS found together. That unit or *kalāpa* is the smallest *rūpa* unit and is called the pure octad (*suddhaṭṭhaka*). **Those 8 *avinibbhoga rūpā* and the *ākāsa dhātu* are produced by all four causes.**

3. The four *lakkhaṇa rūpā* of *upacaya*, *santati*, *jaratā*, and *aniccatā* are not produced by any cause. They represent the nature of *rūpā*.

4. The remaining 15 *rūpa* are produced by different combination of the four possible causes as shown in the table below:

	Kamma Born	Citta Born	Utu Born	Āhāra Born
Cakkhu (eye)	Yes			
Sota (ear)	Yes			
Ghana (nose)	Yes			
Jivhā (tongue)	Yes			
Kāya (body)	Yes			
Sadda (sound)		Yes	Yes	
Itthi Bhva (femininity)	Yes			

Purisa (masculine)	Yes			
Hadaya vatthu (heart base)	Yes			
Jivitindriya (life faculty)	Yes			
Kāya viññatti (bodily intimation)		Yes		
Vacī Viññatti (vocal intimation)		Yes		
Lahuta (lightness)		Yes	Yes	Yes
Muduta (malleability)		Yes	Yes	Yes
Kammaññata (wieldiness)		Yes	Yes	Yes

8.9 Rūpa Kalāpa (Grouping of Matter)

Revised September 15, 2020; September 6, 2022; October 17, 2022 (#7); December 3, 2022 (#7)

1. There are 28 *rūpa* types discussed in *Abhidhamma*: “[Rūpa \(Material Form\) – Table](#).” They are not found separately in nature. The four causes produce them through tiny material groups called *rūpa kalāpā* or “elementary groups of matter.”

- All *rūpā* have origins in the four great elements of *pathavī*, *āpo*, *tejo*, and *vāyo*. However, they all arise together in the smallest unit of matter, a *suddhaṭṭhaka*. See “[The Origin of Matter – Suddhaṭṭhaka](#).” Four more *rūpā* (*vaṇṇa*, *gandha*, *rasa*, *oja*) derived from the great elements are in a *suddhaṭṭhaka*, making it an **octad** (composed of **eight** or an **aṭṭaka**.)
- There are 15 other elementary units (*rūpa kalāpā*) that derive from *suddhaṭṭhaka*. All 16 types of *rūpa kalāpā* are not further divisible. They are *avinibbhoga rūpa*.
- Let us briefly discuss them.

2. There are three *rūpa kalāpā* that have **nine units**: A *suddhaṭṭhaka* “energized” by *kammic* energy becomes a *jīvita navaka* (vital **nonad**) of nine units. That added unit is an “energy unit” called a *jīvita rūpa*. That *jīvita rūpa* keeps a physical body alive. Another element of nine units, a *sadda navaka* (sound nonad) is responsible for the sound created by *utu*, i.e., an *utuja rūpa*. Another is *kāyaviññatti navaka* created by *cittā* responsible for bodily intimation.

- Eight types of *rūpa kalāpā* have **ten units (dasaka or decad)** created by *kammic* energy: Here a *suddhaṭṭhaka* combines with a *jīvita rūpa* and another unit created by *kammic* energy to become a *dasaka*. Those eight types of *dasaka* are vital parts of a living being. For example, a *cakkhu pasāda rūpa* (together with the other nine units) creates a *cakkhu dasaka* responsible for seeing. In the same way *sota dasaka*, *ghana dasaka*, *jivhā dasaka*, *kāya dasaka* arise. *itthibhāva rūpa* and *purisabhāva rūpa* give rise to *itthibhāva dasaka* and *purisabhāva dasaka*. The seat of the mind, *vatthu dasaka* arises with the *hadaya vatthu*.
- The following are created only by *citta* (thoughts): One is *vacīvīññatti-sadda-dasaka* (vocal intimation decad) responsible for speech. *Kāyaviññatti-lahutādi-dvadasaka* (dodecad of bodily intimation) of 12 units with *kāyaviññatti* and three *lahutādi rūpa*. Another is *vacivīññatti-sadda-lahutādi-terāsaka* (tricad of sound) of 13 units with *vacivīññatti*, three *lahutādi rūpa*, and *sadda*.
- Then there is *lahutādi-ekadasaka* (*suddhaṭṭhaka* + *lahuta* + *muduta* + *kammaññata*) with 11 units created by *citta*. There is also *sadda-lahutādi-dvadasaka* (*suddhaṭṭhaka* + *lahuta* + *muduta* + *kammaññata* + *sadda*) with 12 units created by *utu*.

3. All *rūpa kalāpā* have the following characteristics.

1. All the *rūpā* in a *rūpa kalāpa* arise together, i.e., they have a common genesis.
2. They also cease or dissolve together, i.e. they have a common cessation.
3. They all depend on the four great essentials present in the *kalāpa* for their arising, i.e. they have a common dependence.
4. They are so thoroughly mixed that they cannot be distinguished, i.e. they co-exist.

4. It should be noted that *kalāpā* are so small that they are indistinguishable from pure energy. The origin of *rūpa* is a *javana citta*, which is formless and mass-less. Science has shown that the smallest “particle” detected, the Higgs boson, is indistinguishable from energy. See, “[The Origin of Matter – Suddhaṭṭhaka](#).”

5. There are 17 types of *kalāpā* produced in 21 ways:

9 *kammaja kalāpā* 6 *cittaja kalāpā* 4 *utuja kalāpā* 2 *āhāraja kalāpā* as shown below:

	Kamma Born	Citta Born	Utu Born	Āhāra Born
<i>Cakkhu dasaka</i> (eye decad)	Yes			
<i>Sota dasaka</i> (ear decad)	Yes			
<i>Ghana dasaka</i> (nose decad)	Yes			
<i>Jivhā dasaka</i> (tongue decad)	Yes			
<i>Kāya dasaka</i> (body decad)	Yes			
<i>Itthi dasaka</i> (female decad)	Yes			
<i>Purisa dasaka</i> (male decad)	Yes			
<i>Vatthu dasaka</i> (base decad)	Yes			
<i>Jivita navaka</i> (vital nonad)	Yes			
<i>Suddhaṭṭaka</i> (pure octad)		Yes	Yes	Yes
<i>Kāyaviññati navaka</i> (body intimation nonad)		Yes		
<i>Vacī viññati sadda dasaka</i> (vocal intimation decad)		Yes		
<i>Lahutādi eka dasaka</i> (undecad of mutability)		Yes	Yes	Yes
<i>Kayaviññati Lahutādi dva dasaka</i> (undecad of mutability)		Yes	Yes	
<i>Vaciviññati Sadda Lahutādi terasaka</i> (tridecad of mutability)		Yes		
<i>Sadda navaka</i> (sound decad)			Yes	

6. Internal and External Kalāpā

All the 21 *rūpa kalāpā* mentioned above occur internally in living beings. *Itthibhāva-dasaka* does not occur in males. Similarly, *pumbhava-dasaka* (or *purisabhāva-dasaka*) does not occur in females. For those who are born blind or deaf, *cakkhu-dasaka* or *sota-dasaka* are not present.

- **In the external (*bahiddha*) world, only the two *utuja-kalāpā* are found.** All inanimate things, such as trees, stones, earth, water, fire, corpses, etc., are made up of *utuja-suddhaṭṭhaka kalāpā*. The sounds produced by beating two sticks together, rubbing branches in the wind, or by instruments such as violin, piano, radio, cassettes, etc., are *utuja-sadda-navaka kalāpā*.

- From the internal *rūpas*, *kāya-pasāda*, *bhava-rūpa* (femininity and masculinity), *cittaja-rūpa*, *utuja-rūpa* and *āhāraja-rūpa* spread all over the body. So they will be present in the eye, the ear, the nose, the tongue and in every part of the body.

7. *Rūpa* in *Kāmaloka*

If circumstances permit, all 28 material qualities occur undiminished in an individual during a lifetime in *kāmaloka* (sense-sphere).

- In womb-born creatures, only three *kammaja-kalāpā* comprising body-decad, sex-decad and heart decad are manifested at the moment of conception (at *paṭisandhi*).

Here again, the sex-decad may not be manifested in some particular individuals. After conception, during life, the eye-decad and the rest are manifested slowly in due order. Of the groups of material qualities produced in four ways, *kammaja-rūpa* starts to form at the moment of conception and forms incessantly at every minor instant. *Cittaja-rūpa* begins to form from the second moment of consciousness, i.e., from the arising instant of the first *bhavaṅga*, which follows the rebirth-consciousness. *Cittaja-rūpa* continues to be formed for a lifetime.

- *Utuja-rūpa* starts to form from the existing instant of rebirth consciousness. The reason is that the *tejo-dhātu* (*utu*) present in the first *kammaja-kalāpā* comes to the static stage (*īhiti*) at that instant. From that time onward, the *tejo-dhātu* produces *utuja-rūpa* at every moment. Since *tejo-dhātu* is present in every *kalāpa*, every *kalāpa*, from the time it reaches the static stage, produces new *utuja-kalāpā* at every minor instant. And the new *utuja-kalāpā*, from the time they reach the static stage, again produce new *utuja-kalāpā* at every minor instant. So this process goes on forever.

Every *kalāpa* also contains the nutritional essence of *oja*. But *āhāraja-rūpa* forms when internal *oja* meets external *oja* at the time of diffusion of nutritional essence, and the combination of internal and external *oja* comes to the static stage. From that instant, *āhāraja-rūpa* is also formed at every minor instant. Old groups dissolve and disappear as new groups of material qualities are incessantly produced. Thus, the material phenomena go on uninterruptedly in the sense-sphere till the end of life like the flame of a lamp, or river stream.

Material Phenomena at Death: At the time of death, psychic life and physical life must cease together. This means that all *kammaja rūpa* that contains physical life must cease at the time of death. So at the beginning of the seventeenth *citta*, reckoned backward from the death-consciousness (*cuti citta*), the last *kammaja rūpa* is formed. This last *kammaja rūpa* will cease at the dissolving instant of the death-consciousness. *Cittaja rūpa* is formed till the arising instant of the *cuti citta*. This last *cittaja rūpa* will have lasted for a conscious-moment at the dissolution of *cuti citta* and thus will perish in another sixteen conscious-moments, which happens almost instantly. *āhāraja rūpa* is formed till the dissolving instant of the *cuti citta* because the support required for the formation of *āhāraja rūpa* can be furnished by *citta* up to that time. So at death, that last-formed *āhāraja rūpa* lasted only one minor instant. However in another fifty minor instants (*rūpa* lifespan – 51 minor instants or 17 conscious-moments), that *āhāraja rūpa* also ceases. Thus at the time of death, *kammaja rūpa*, *cittaja rūpa* and *āhāraja rūpa* cease almost instantly.

- But *utuja-rūpa* form and dissolve intill the corpse is converted into dust. A corpse consists of only *utuja-rūpa*.
- So when a person dies and is reborn in another life, material phenomena similarly arise from the instant of conception and go on arising till the time of death.

Arising of Material Phenomena in *Rūpa*-planes

In the *rūpa*-plane, nose-decad, tongue-decad, and *āhāraja-kalāpā* do not arise. At the *opapātika* rebirth, five *kammaja-kalāpā* (*vatthu*, *bhāva*, *kāya*, *cakkhu*, and *sota*) arise. During life, however, *cittaja kalāpā* and *utuja kalāpā* also arise. For the *Asañña Brahmā*, *hadaya vatthu* is there, but it is shielded by the

“physical body,” which has no *mana indriya*. Thus, it cannot interact with *dhammā* (or *viññāṇa dhātu*), and *cittā* cannot arise. Therefore, *cittaja kalāpā* do not arise.

- Thus in *kāma loka* and *rūpa loka*, the process of the arising of material phenomena should be understood in two ways, that is (1) at rebirth and (2) during life.
- For details, see “[Body Types in 31 Realms – Importance of Manomaya Kaya](#),” and “[Bhūta and Yathābhūta – What Do They Really Mean](#).”

8.10 Akusala Citta and Akusala Vipaka Citta

Revised November 4, 2017; October 22, 2021; October 27, 2021

Twelve Types of *Akusala Citta*

All ten *akusala kamma* are done with these 12 *akusala citta*. There are 8 greed-rooted, 2 hatred-rooted, and 2 delusion-rooted *citta*. Of course, *citta* (pronounced “chiththā”) are thoughts; any speech or bodily action starts with a thought.

- See, “[Conditions for the Four Stages of Nibbāna](#)” for a list of 12 *akusala citta*.

Both greed-rooted and hatred-rooted also have delusion as a root.

	Root	Assoc. with	Dissoc. with	Feeling	<i>Sasankhārika?</i>
1	Greed	Wrong view	—	Pleasure	No
2	Greed	Wrong view	—	Pleasure	Yes
3	Greed	—	Wrong view	Pleasure	No
4	Greed	—	Wrong view	Pleasure	Yes
5	Greed	Wrong view	—	Equanimity	No
6	Greed	Wrong view	—	Equanimity	Yes
7	Greed	—	Wrong view	Equanimity	No
8	Greed	—	Wrong view	Equanimity	Yes
9	Dislike	Aversion	—	Displeasure	No
10	Dislike	Aversion	—	Displeasure	Yes
11	Delusion	Vicikicchā	—	Equanimity	—
12	Delusion	Uddacca	—	Equanimity	—

1. The first *citta* is described as, “a thought rooted in greed (and delusion), associated with wrong views, accompanied by pleasure.” The others can be stated the same way.

- Those *cittā* that are associated with wrong views are the worst, even though wrong views are listed as #10 on the ten immoral actions, see, “[Ten Immoral Actions \(Dasa Akusala\)](#).”
- Citta* generated with pleasure means one is enthusiastic about it because of one’s habits (*gati*) or one starts liking it. For example, one who likes to go fishing has a bad habit; he gets pleasure by just thinking about it; thus it is stronger than one done with equanimity.
- A hateful *citta* is always arises with displeasure, but that displeasure can arise with ignorance. For example, someone who has wrong views may generate displeasure towards a moral person merely because of one’s wrong views. I have encountered some people who got upset with me when I pointed out that rebirth has evidence for it.
- Sasankhārika* means with less *javana* power.
- See, the notes at the end of the post “[Conditions for the Four Stages of Nibbāna](#)” for details.

2. Since *vicikicchā* is also due to wrong views, those five *cittā* marked in red are the strongest *akusala citta* done with “wrong views” or “*diṭṭhi*.” Those five *cittā* stop arising in the mind of a *Sotāpanna*.

They can condition one’s mind to a “*gati*” suitable for birth in the *apāyā*; see, “[What is in a Thought? Why Gati are so Important?](#).”

- The *vyāpāda* or the strong hate — that makes one eligible for birth in the *apāyā* — actually arises from the first four types of *lobha citta*. It is also called “*dvesa*” or “*dvesha*” which means “second manifestation” or (“*dvi* +”*vesa*”) of *lobha*. When one is burdened with extreme greed, it can turn to the second manifestation of extreme hate for anyone in the way.
 - Upon attaining the *Sotāpanna* stage, such habits or “*gati*” are removed, and thus no adverse *kamma vipāka* comes to mind at the dying moment, as we point out below. The “*pati+ichcha sama+uppada*” or what is born is similar to what is grasped, is at play at the dying moment. One automatically grasps things one has a habit of liking; they automatically come to the forefront of the mind at the dying moment.
3. The other 7 *akusala citta* are stopped from arising in stages as a *Sotāpanna* cultivates the Path further.
- The two dislike (*paṭigha*)-rooted *cittā* (together with some potency of the remaining 4 greed-based *citta*, i.e., *kāma rāga*) are reduced at the *Sakadāgāmī* stage.
 - Those two dislike-rooted *cittā* are stopped from arising at the *Anāgāmī* stage. Also, the potency of the remaining 4 greed-based *citta*, i.e., *kāma rāga* is reduced to just *kāma* level.
 - **Finally, the remaining 4 greed-based *citta* and the *uddhacca citta* are removed at the *Arahant* stage.** Thus an *Arahant* will never experience an *akusala citta*.

Seven Types of *Akusala Vipāka Citta*

4. These 12 types of *citta* lead to 7 types of *vipāka* (resultant) *citta*.
- None of the *vipāka citta* has any unwholesome roots (greed, hate, delusion); of course, they also do not have the wholesome roots. **Thus they are called rootless (*ahetuka*) *citta*.**
5. Five of these *akusala vipāka citta* are the ones that lead to (undesirable) sense events through the five physical senses. Thus they are responsible for eye consciousness (*cakkhu viññāṇa*), ear consciousness (*sota viññāṇa*), nose consciousness (*ghāṇa viññāṇa*), taste consciousness (*jivhā viññāṇa*), and body consciousness (*kāya viññāṇa*).
- Except for the body consciousness which is accompanied by pain, the other four are accompanied by equanimity; see, “[Avyākata Paticca Samuppāda for Vipāka Viññāṇa](#)” and “[How Are Paticca Samuppāda Cycles Initiated?](#)”
 - Thus any feelings of displeasure etc due to what is seen, heard, smelled, or tasted, are in the thoughts that follow this “event” experienced through one of the physical senses. We will discuss this in detail in the *Abhidhamma* section.
6. The sixth *akusala vipāka citta* is called receiving consciousness accompanied by equanimity (*upekkhā-sahagata sampatīcchana citta*). This is a *citta* that accepts the sense impression to the mind (we will discuss it in the *Abhidhamma* section).
7. The seventh *akusala vipāka citta* is called the investigating consciousness accompanied by equanimity (*upekkhā-sahagata santīraṇa citta*). This is the *citta* that is responsible for the birth in the *apāyā* (lowest four realms), i.e., it acts as the *paṭisandhi citta* for the birth in the *apāyā*.
8. One may wonder how a *Sotāpanna* avoids the *apāyā*, because he/she is still capable of generating the 7 *cittā* that are not associated with *diṭṭhi* (see the Table above), and thus it is possible to generate this *apāyagāmī-paṭisandhi citta*.
- The point is that after becoming a *Sotāpanna*, such *vipāka* thoughts do not come to the mind at the last thought processes; **only the good *kamma vipāka* come to the forefront of the mind close to the dying moment because he/she no longer has the “*gati*” suitable for a birth in the *apāyā*.**
9. It is hard to give up one’s bad habits (“*gati*”), mainly because one does not fully comprehend the true nature of the world, i.e., *anicca*, *dukkha*, *anatta*, and thus has wrong views about this world with 31

realms. One needs to comprehend that one's actions have consequences not only in this life, but (mainly) in the future lives; also, whatever one gains by such harmful actions is just temporary, AND do not leave one with a peaceful mind.

8.11 **37 Factors of Enlightenment**

Revised January 20, 2016; May 13, 2019; March 11, 2020; August 20, 2022 (added references)

1. The 37 factors of Enlightenment (*Bodhipakkhiya Dhamma*) are the combined number of individual factors in:

- Four Factors of Mindfulness (*Cattāro Satipaṭṭhāna*); see “[Mahā Satipaṭṭhāna Sutta](#),”
- Four Supreme Efforts (*Cattāro Sammappadhāna*); see, for example, “[WebLink: suttacentral: Padhāna Sutta \(AN 4.13\)](#).”
- Four Bases of Mental Power (*Cattāro Iddhipāda*); see a series of suttas starting with the “[WebLink: suttacentral: Apāra Sutta \(SN 51.1\)](#).”
- Five Faculties (*Pañca Indriya*); see a series of suttas starting with the “[WebLink: suttacentral: Suddhika Sutta \(SN 48.1\)](#).”
- Five Powers (*Pañca Bala*); see, for example, “[WebLink: suttacentral: Punakūta Sutta \(AN 5.16\)](#).”
- Seven Factors of Enlightenment (*Satta Bojjhaṅga*); see the series of suttas starting with “[WebLink: suttacentral: Himavanta Sutta \(SN 46.1\)](#).” and
- Factors of the Noble Eightfold Path (*Ariya Aṭṭhaṅgika Magga*); see the series of suttas starting with “[WebLink: suttacentral: Kalyānamitta Sutta \(SN 45.49\)](#).”

2. These factors focus on various mental factors (*cetasika*) and *citta* that incorporate those *cetasika*. They are labeled with different names under each category in the Table below to highlight their application.

- For example, the *paññā cetasika* is labeled as *vīmaṃsā* in Four Bases of Mental Power, as *dhammavicaya* in *Satta Bojjhaṅga*, and as *Sammā Dīṭṭhi* in the Noble Eightfold Path.
- Under each category, I have listed the term used for that *cetasika* in that category. For example, in the Noble Eightfold Path, *Sammā Vāyāma* is the *virīya cetasika*.
- Thus even though there are 37 factors of Enlightenment, there are **only 14 cetasika** that will be cultivated while cultivating all seven above categories.
- Those seven categories are all interrelated. Thus all 37 factors may be cultivated by focusing only on *Cattāro Satipaṭṭhāna*, *Satta Bojjhaṅga*, or the Noble Eightfold Path.

3. In the “[WebLink: suttacentral: Bhāvanā Sutta \(AN 7.71\)](#),” the Buddha explained that one needs to cultivate those 37 factors to reach Nibbāna.

- However, there is no need to go through all of them individually. Cultivation of one set in full WILL fulfill the others.
- For example, in the “[WebLink: suttacentral: Mahāsatipaṭṭhāna Sutta \(DN 22\)](#)” Buddha explained that the cultivation of *Satipaṭṭhāna* is a guaranteed way to *Nibbāna*.
- Similarly, “[WebLink: suttacentral: Ānāpānassati Sutta \(MN 118\)](#)” explains that the cultivation of *Ānāpānassati* will fulfill *Satipaṭṭhāna*.
- Therefore, there can be many different ways to get to *Nibbāna* (*Arahanthood*.) The key step is to get to the *Sotāpanna Anugāmi* stage by comprehending the Four Noble Truths/*Paṭicca Samuppāda*/*Tilakkhaṇa*. See “[Mahā Cattārisaka Sutta \(Discourse on the Great Forty\)](#).”

4. It is also important to realize that *cetasika* is related to one's character (*gati*): “[Cetasika – Connection to Gati](#)”

5. The Four Supreme Efforts (*Cattāro Sammappadhāna*) are the efforts to purify the mind: (i) **remove** defilements (*akusala*) that have arisen, (ii) **prevent** new defilement (*akusala*) from arising, (iii) **enhance**

wholesome states (*kusala*) that have arisen, (iv) **initiate** new wholesome states (*kusala*). [WebLink: suttacentral: AN 4.14 Samvarasutta \(Restraint\)](#).

- Not to let an unwholesome thought arise which has not yet arisen. → **restraint (00)**
- Not to let an unwholesome thought continue which has already arisen. → **abandonment (01)**
- To make a wholesome thought arise which has not yet arisen. → **development (10)**
- To make a wholesome thought continue which has already arisen. → **protection (maintaining) (11)**

6. All 37 factors of enlightenment are fulfilled at the Arahant stage.

Item	Parameter Involved	Four Supreme Efforts	Iddhipada	Five Faculties	Five Powers	Four Factors of Mindfulness	7 Factors of Enlightenment	Path Factors	Count
1	Paññā (wisdom)		vīmaṃsā	paññā	paññā		dhammavicaya	sammā diṭṭhi	5
2	Vitakka (initial application)							sammā saṅkappa	1
3	Sammā vācā							sammā vācā	1
4	Sammā kammanata							sammā kammanata	1
5	Sammā ājīva							sammā ājīva	1
6	Viriya	four efforts (see #4 above)	virīya	virīya	virīya		virīya	sammā vāyāma	9
7	Sati (mindfulness)			sati	sati	kāya, vedanā, citta, dhamma	sati	sammā sati	8
8	Samādhi (one-pointedness)			samādhi	samādhi		samādhi	sammā samādhi	4
9	Saddhā (faith)			saddhā	saddhā				2
10	Chanda (desire)		chanda						1
11	citta		citta						1
12	Pīti (joy)						pīti		1
13	Passaddhi (tranquility)						passaddhi		1

14	Upekkhā (equanimity)						upekkhā		1
----	-------------------------	--	--	--	--	--	---------	--	---

7. Also, see “[Two Versions of 37 Factors of Enlightenment](#).”

8.12 Conditions for the Four Stages of Nibbāna

Revised August 3, 2016; Revised November 19, 2018; August 21, 2022

1. The following Table shows the conditions to be fulfilled (i.e., factors to be eliminated) to attain each stage of *Nibbāna*.

- Each stage of *Nibbāna* can be characterized in various ways: The removal of ten *akusala citta*, fourteen types of *asobhana cetasika* associated with *citta*, ten *saṃyojana*, seven types of *anusaya*, four types of *āsava*, three types of *taṇhā*, etc.
- See #4 below for links to posts explaining those terms.

2. For example, to attain the *Sotāpanna* stage, three of the ten *saṃyojana* (or the ten fetters) are removed, *akusala citta* #1, 2, 5, 6, and 11 are removed (see #4 below for a list of the 12 types of *akusala citta*.) Also, the *apāyagāmī* strength in the other *citta* is removed at the *Sotāpanna* stage. *Citta* #9 and 10 weaken at lower stages and are removed at the *Anāgāmi* stage. The remaining *citta* (#3, 4, 7, 8 and 12) weaken with each stage of *magga phala* and are removed at the *Arahant* stage. There is a nice chart on p. 112 of *Bhikkhu Bodhi's* book “Comprehensive Manual of Abhidhamma.”

<i>Ariya Stage</i>	<i>Saṃyojana</i>	<i>Akusala Citta</i>	<i>Anusaya</i>	<i>Āsava (Asaya)</i>	<i>Kilesa (Asobhana Cetasika)</i>	<i>Taṇhā</i>	<i>Rāga</i>
<i>Sotāpanna</i>	<i>sakkāya diṭṭhi</i> ¹ , <i>vicikicchā</i> ² , <i>sīlabbata parāmāsa</i> ³	1, 2, 5, 6, 11 Also removes <i>apāyagāmi</i> strength in the rest	<i>diṭṭhi</i> , <i>vicikicchā</i>	<i>diṭṭhāsava</i>	Removed: <i>diṭṭhi</i> ⁶ , <i>vicikicchā</i> ¹⁴ , [<i>thina</i> ¹² , <i>middha</i> ¹³] Reduced: Rest of the <i>cetasika</i> . [<i>lobha</i> ⁵ , <i>dosa</i> ⁸ , <i>moha</i> ¹ to <i>rāga</i> ⁵ , <i>paṭigha</i> ⁸ , <i>avijjā</i> ¹]	<i>vibhava taṇhā</i>	All three <i>rāga</i> reduced
<i>Sakadāgāmi</i>	<i>kāma rāga</i> ⁴ (reduced) <i>paṭigha</i> ⁴ (reduced)	weakens 9, 10 also weakens <i>kāma rāga</i> in 3, 4, 7, 8	<i>kāma rāga</i> (reduced) <i>paṭigha</i> (reduced)	<i>kāmāsava</i> (reduced)	Especially reduced: <i>kāma rāga</i> ⁵ and <i>paṭigha</i> ⁸	Reduced: <i>kāma taṇhā</i>	All three <i>rāga</i> further reduced
<i>Anāgāmi</i>	<i>kāma rāga</i> ⁴ , <i>paṭigha</i> ⁵	9, 10 also removes <i>kāma rāga</i> in 3, 4, 7, 8	<i>kāma rāga</i> , <i>paṭigha</i>	<i>kāmāsava</i>	Removed: <i>kāma</i>	Removed: <i>kāma taṇhā</i>	<i>kāma rāga</i>

					<i>rāga</i> ⁵ and <i>paṭigha</i> ⁸ Regarding <i>cetasika</i>: <i>dosa</i> ⁸ , <i>issa</i> ⁹ , <i>macchariya</i> ¹⁰ , <i>kukkucca</i> ¹ removed.		
<i>Arahant</i>	<i>rūpa rāga</i> ⁶ , <i>arūpa rāga</i> ⁷ , <i>māna</i> ⁸ , <i>uddhacca</i> ⁹ , <i>avijjā</i> ¹⁰	3, 4, 7, 8, 12 (see below for a list of <i>akusala citta</i>)	<i>bhava rāga</i> , <i>māna</i> , <i>avijjā</i>	<i>bhavāsava</i> , <i>avijjāsava</i>	Removed: rest of the <i>asobhana cetasika</i> [<i>avijjā</i> ¹ , <i>ahirika</i> ² , <i>anattappa</i> ³ , <i>uddhacca</i> ⁴ , <i>māna</i> ⁷]	<i>bhava tanhā</i>	<i>rūpa rāga</i> , <i>arūpa rāga</i>

[***Saṁyojana*: Five Lower Bonds** (*pañca orambhāgiya saṁyojanā*) 1. *sakkāya diṭṭhi*, 2. *vicikicchā*, 3. *sīlabbata parāmāsa*, 4. *kāma rāga*, 5. *paṭigha*, **Five Upper Bonds** (*pañca uddhambhāgiya saṁyojanā*) 6. *rūpa rāga*, 7. *arūpa rāga*, 8. *māna*, 9. *uddhacca*, 10. *avijjā*.]

***Asobhana cetasika*:** 1. *moha* → *avijjā*, 2. *ahirika*, 3. *anottappa*, 4. *uddhacca*, 5. *lobha* → *rāga*, 6. *diṭṭhi*, 7. *māna*, 8. *dosa* → *paṭigha*, 9. *issa*, 10. *macchariya*, 11. *kukkucca*, 12. *thina*, 13. *middha*, 14. *vicikicchā*. Notes: → means “reduced to” after *Sotāpanna* stage.]

3. The ability to commit *akusala kamma* also is removed in stages as one progresses and is completely removed only at the *Arahant* stage. It is important to note that a *Sotāpanna* completely removes only one *akusala kamma*, that of having wrong views (*micchā diṭṭhi*): “[What is the only Akusala Removed by a Sotāpanna?](#).” But this leads to removing many *kilesa* (mental impurities); see the Table.

4. *Āsava* and *anusaya* are discussed in the post, “[Āsava, Anusaya, and Gati \(Gathi\)](#).” *Kilesa* is discussed in “[Diṭṭhi \(Wrong Views\), Sammā Diṭṭhi \(Good/Correct Views\)](#).” For a discussion on *Dasa Saṁyojana*, see “[Dasa Saṁyojana – Bonds in Rebirth Process](#).” The fourteen types of *asobhana cetasika* are discussed in “[Cetasika \(Mental Factors\)](#).”

- See “[Kāma Tanhā, Bhava Tanhā, Vibhava Tanhā](#)” for the three types of *tanhā*. Another way is to categorize into three types of *rāga*, i.e., *kāma rāga*, *rūpa rāga*, and *arūpa rāga*; see “[Lobha, Dosa, Moha versus Rāga, Paṭigha, Avijjā](#).”

5. The 12 types of *akusala citta* are listed in, “[Akusala Citta and Akusala Vipāka Citta](#).” But I thought it would be more explanatory to list them. The numbers below correspond to the numbers in the Table.

Lobha (Greedy) Citta (Also has the *moha* root)

1. *Citta* connected with a wrong view, accompanied by pleasure, and done with habit.

2. *Citta* **connected with a wrong view**, accompanied by pleasure, and done reluctantly.
3. *Citta* NOT connected with a wrong view, accompanied by pleasure, and done with habit.
4. *Citta* NOT connected with a wrong view, accompanied by pleasure, and done reluctantly.
5. *Citta* **connected with a wrong view**, accompanied by a neutral mind, and done with habit.
6. *Citta* **connected with a wrong view**, accompanied by a neutral mind, and done reluctantly.
7. *Citta* NOT connected with a wrong view, accompanied by a neutral mind, and done with habit.
8. *Citta* NOT connected with a wrong view, accompanied by a neutral mind, and done reluctantly.

Dosa (Hateful) Citta (Also has the *moha* root)

9. *Citta* associated with hate, accompanied by displeasure, done with habit.
10. *Citta* associated with hate, accompanied by displeasure, done reluctantly.

Moha Citta (only with the *moha* root)

11. *Citta* accompanied by a neutral mind, **associated with *vicikicchā*** (not aware of bad consequences)
12. *Citta* accompanied by a neutral mind, associated with *uddhacca* (unfocused).

Notes:

1. Even though recent Abhidhamma literature categorize *lobha* and *dosa citta* as *asaṅkhārika* (unprompted) and *sasaṅkhārika* (prompted), in original Abhidhamma, they were not categorized as such.
2. For example, the two *dosa-mūla cittā* are:
 - i. *Domanassa saḥagata paṭigha-sampayutta citta*.
 - ii. *Domanassa saḥagata sasaṅkhārika paṭigha-sampayutta citta*.
 - The first *citta* arises due to *sansāric* habits and thus is more potent. For example, someone who tends to easily get angry, normally generates such potent *citta*.
 - On the other hand, another person without such a habit, may not generate such a *citta* unless “forced hard”; it is done with reluctance, “when pushed to the limit”, or if the perceived “sense pleasures” are enticing. Then he/she is actually “incorporating new “*saṇ*” or initiating a new habit; thus, the name “*sasaṅkhārika*.”

8.13 Ultimate Realities – Table

1. This Table lists the three kinds of ultimate realities (*paramattha dhamma*) in this world of 31 realms; they are conditioned, i.e., they arise due to causes and perish subsequently on their own; nothing in this world is permanent. They do not arise if there are no causes, and when that happens *Nibbāna* is the result.

- *Nibbāna* is the unconditioned reality. It is attained when the six causes (*lobha, dosa, moha, alobha, adosa, amoha*) are not there. Then the mind cannot get a “foothold” anywhere in the material world.
- Cultivating the three causes of *alobha, adosa, amoha* (together with removing *lobha, dosa, moha*) is needed in following the Noble Eightfold Path, and when wisdom grows, all causes will be rejected by the mind automatically at the end.

2. Ultimate realities can be compared to the fundamental particles in physics. Even though it was believed in the early stages that atoms were the fundamental particles, now there are about 32 of such particles; but now the “particle nature” is dissolving into “energy packets” in elementary particle physics. In Buddha Dhamma, the 28 types of *rūpa* are very fine, and cannot be “seen” even with *abhiññā* powers; they are “energy packets.”

3. The table also shows how “this world of 31 realms” can be described via the five aggregates, the twelve sense bases, or 6 *dhatus* and how they incorporate the ultimate realities. There are other ways too. They are all compatible and consistent with each other.

- For example, 89 *citta* and 52 *cetasika* are included in the four “mental” aggregates, or in the mind base and mind objects, or just in the *viññāṇa dhātu*.
- Also note that the correct word is *khandha* and NOT *skandha* for the five “aggregates.” The Pāli (and Sinhala) word *khandha* means a “pile” (as in a pile of sand) and is still used to denote a hill in Sinhala. I just look up the meaning of “*skandha*” in Sanskrit and it says “Hindu god of war.” This is how the true meanings of the original words have been lost due to incorporation of “sophisticated sounding” Sanskrit words with no relevance.

Table: Analysis of the “world” and *Nibbāna* in terms of ultimate realities.

Lokaya (World of 31 Realms)				Nibbāna
Ultimate Realities (4 types)	Citta (89)	Cetasika (52)	Rūpa (28)	Nibbāna
Aggregates (5)		Vedanā khandha Saññā khandha Saṅkhāra khandha Viññāṇa khandha	Rūpa khandha	
Sense Bases (12)	Mind base	Mind Objects (also includes fine matter or sukuma rūpa)	5 internal (pasāda) rūpa 5 external rūpa (vaṇṇa, sadda, gandha, rasa, phoṭṭhabba)	
Dhātu (6)		Viññāṇa	pathavi, āpo, tejo, vāyo, ākāsa	
<i>saṅkhata</i> (<i>sankata</i> in Sinhala) include everything in this world (sentient beings have all six <i>dhātu</i> ; everything else in the world, like inert objects and plants, do not have <i>viññāṇa</i>)				asaṅkha ta
Notes: 1. Number of <i>citta</i> can be 121 in the alternate scheme; see, The 89 (121) Types of Citta				

2. Vedanā, saññā are two cetasika; saṅkhāra has the rest of 50 cetasika; for a list of cetasika, see [Cetasika \(Mental Factors\)](#)
3. For fine (sukuma) rūpa, see [Rūpa \(Material Form\) – Table](#).

8.14 **31 Realms of Existence**

May 20, 2016; revised May 30, 2018; December 16, 2019; June 11, 2020; August 24, 2020
(revised #5 and many lifetimes, added #6); September 6, 2022 (#2, #3)

Realm	Description	Cause of Birth in Realm (Note 1)	Lifetime
The Apāyā (Undesired Realms)			
1. Niraya (Hell)	Unimaginable suffering.	Anantariya papa kamma, Ten akusala kamma with established wrong views.	Variable
2. Tiracchāna (Animal; Tirisan in Sinhala)	Microscopic to large animals.	Ten akusala kamma with established wrong views.	Variable
3. Peta (Hungry Ghosts; Preta in Sinhala)	Some live in our world unseen to us.	Ten akusala kamma with established wrong views.	Variable
4. Vinipāta Asuras (Asuras)	Some live in our world unseen to us.	Ten akusala kamma with established wrong views.	Variable
Sugati (Desired <i>Kāma Loka</i> Realms)			
5. Manussa (Human)	Most valued birth of all realms.	Puñña abhisāṅkhāra (thiethuka, dviethuka, and aethuka)	Variable (Note 2)
6. Cātummahārājika Deva	Fine bodies from this realm; no diseases.	Puñña abhisāṅkhāra.	500 CY 9M HY (Note 3)
7. Tāvātimsā deva	Sakka lives in this realm.	Puñña abhisāṅkhāra.	1000 CY 36 HY
8. Yama deva		Puñña abhisāṅkhāra.	2000 CY 144M HY
9. Tusitā deva		Puñña abhisāṅkhāra.	4000 CY 576M HY
10. Nimmānaratī deva		Puñña abhisāṅkhāra.	8000 CY 2304M HY
11. Paranimmita Vasavattī deva		Puñña abhisāṅkhāra.	16000 CY 9216M HY
Rūpa Loka (Fine Material Realms)			
12. Brahma Parisajja deva	Jhānic bliss in this and higher realms.	First jhāna (minor)	<u>1/3</u> kappa (Note 5)

Realm	Description	Cause of Birth in Realm (Note 1)	Lifetime
13. Brahma Purohita deva		First jhāna (medium)	1/2 kappa
14. Brahmakayika (Maha Brahma)		First jhāna (highest)	1 kappa
15. Parittaba deva		Second jhāna (minor)	2 kappa
16. Appamanabha deva		Second jhāna (medium)	4 kappa
17. Abhassara deva		Second jhāna (highest)	8 kappa
18. Parittha Subha deva		Third jhāna (minor)	16 kappa
19. Appamana Subha deva		Third jhāna (medium)	32 kappa
20. Subha Kinhaka deva		Third jhāna (highest)	64 kappa
21. Vehappala deva		Fourth jhāna various levels from here and above	500 kappa
22. Asañña satta	Body only; no mind		500 kappa
23. Aviha deva	Only Anāgāmīs		1000 kappa
24. Atappa deva	Only Anāgāmīs		2000 kappa
25. Sudassa deva	Only Anāgāmīs		4000 kappa
26. Sudassi deva	Only Anāgāmīs		8000 kappa
27. Akanittakha deva	Only Anāgāmīs		16000 kappa
Arūpa Loka (Immaterial Realms); see Note 4			
28. Ākāśānancāyatana deva		Fifth jhāna	20,000 kappa
29. Viññāṇañcāyatana deva		Sixth jhāna	40,000 kappa
30. Ākiñcaññāyatana deva		Seventh jhāna	60,000 kappa
31. Nevasaññānāsaññā deva		Eighth jhāna	84,000 kappa

Notes:

1. See, "[Kamma, Saṅkhāra, and Abhisāṅkhāra – What Is “Intention”?](#)." *Akusala kamma* are the same as *apuññābhisaṅkhāra* (*apuñña abhisāṅkhāra*.)
2. The realms and the lifetimes are extracted from various *suttā*: see, for example, "[Dhammacakkappavattana Sutta Interpretation – Uddesa, Niddesa, Patiniddesa](#)", [WebLink: suttacentral: Saṅkhārupapatti Sutta \(MN 120\)](#), and "[Pathama Mettā Sutta \(AN 4.125\)](#)."
 - In particular, [WebLink: suttacentral: Sāleyyaka Sutta \(MN 41\)](#) discusses how different types of *kamma* lead to rebirth among the 31 realms.
 - The "[WebLink: suttacentral: Visākhā Sutta \(AN 8.43\)](#)" gives lifetimes of various *deva* realms.
3. *Tihetuka* means *kusala kamma* done with *alobha*, *amoha*, and *amoha*.
 - *Dvihetuka* means *kusala kamma* done with *alobha/amoha* or *adosa/amoha*. They have not removed all ten types of *micchā diṭṭhi* but may have removed many. They grasp the new *bhava* without fully understanding, i.e., *javana citta* at the *cuti-paṭisandhi* moment will have “weak *javana* power.”
 - In contrast, one with *tihetuka* birth grasps the new existence with a full understanding of the laws of *kamma*. Therefore, *amoha* means **removal** of the ten types of *micchā diṭṭhi*.
 - *Ahetuka* births occur purely as a *vipāka* of a good *kamma* but without generating any *javana citta*. They have not removed most of the ten types of *micchā diṭṭhi*. Thus, “*ahetuka*” does not mean “without *hetu*” there. It just means an “unfortunate birth.”
 - See, "[Paṭisandhi Citta – How the Next Life is Determined According to Gathi](#)” for details.
4. CE = Celestial Years; M HY = Millions of Human Years.
5. A *Mahā Kappa* is the time for the Solar system to go through a complete cycle. A quarter of this (or an *Asaṅkheyya Kappa* or 20 *kappa*) is the life of the Earth or the Solar system. The solar system is born, destroyed, and reborn like living beings. See, "[Buddhism and Evolution – Aggañña Sutta \(DN 27\)](#)." The Buddha describes the length of one *kappa* in the "[WebLink: suttacentral: Pabbata Sutta \(SN 15.5\)](#)." The lifetimes of many realms given in [Ref. 9](#); in the English translation, the lifetimes can be found in section [WebLink: suttacentral: 18.6.2. Age Limit](#).
6. The connection between various *jhānic* states and the corresponding *Brahma* realms in, "[WebLink: accesstoinsight.org: The Thirty-one Planes of Existence](#).”
7. The names of the four *arūpa* realms are descriptive of their characteristics.
 - *Akāśānancāyatana* comes from “*ākāsa*” + “*ananta*” or infinite + “*āyatana*,” or the realm where the infinite space is the focus of the mind (*ārammaṇa*).
 - *Vinnānancāyatana* comes from “*viññāṇa*” + “*ananta*” or infinite + “*āyatana*,” or the realm where the infinite *viññāṇa* is the focus of the mind (*ārammaṇa*).
 - *Ākincannayatana* comes from “*ākin*” + “*ca*” or mind + “*āyatana*,” or the realm where the focus of the mind (*ārammaṇa*) is only the mind.
 - *Neva saññā nā saññā* comes from “*na*” or not + “*asaññā*” or without perception + “*nā*,” or not + “*saññā*” or perception, i.e., the realm where one cannot say whether there is either “no perception” or “there is perception.” One could go on for a short time without perception (just like in the *asaññā* realm), but it comes back since the “*bhava*” is still there.
8. The following video gives a good general description of the 31 realms:

[WebLink: youtube: Bhante Anandajoti: The Planes of Exist](#)
9. All the realms and their characteristics detailed at "[WebLink: suttacentral: Dhammahadaya Vibhaṅga](#)”

- English translation at “[WebLink: suttacentral: 18. Analysis Of The Heart Of The Teaching.](#)”

9.1 Paṭicca Samuppāda – “Pati+ichcha” + “Sama+uppāda”

Revised November 3, 2018; July 29, 2019; re-written March 15, 2022

“Yo paticcasamuppādam passati,
so Dhammaṃ passati.
Yo Dhammaṃ passati,
so paticcasamuppādam passati.”

“One who sees *paticcasamuppāda*
sees the (Buddha) Dhamma.
One who sees the (Buddha) Dhamma
sees *paticcasamuppāda*.”

([WebLink: suttacentral: Mahāhatthipadopama Sutta \(MN 28\)](#); at the end)

- *Paṭicca Samuppāda* explains how we accumulate *kammic* energy to “power up” future births. That sustains the rebirth process and will bring rebirths mostly in the *apāyās*. Thus, *Paṭicca Samuppāda* explains how future suffering arises.
- Whenever we get attached to sensory inputs (*ārammaṇa*) and think, speak, act with *lobha*, *dosa*, *moha*, we will accumulate such *kammic* energy. We will discuss that in upcoming posts.
- Therefore, it is critical to understand *Paṭicca Samuppāda*, see the next post for details: “[Paṭicca Samuppāda – Overview](#).”
- Here is the pronunciation of *Paṭicca Samuppāda*:

[WebLink: Pronunciation of Paṭicca Samuppāda](#)

Paṭicca samuppāda, translated into English as “Dependent Origination,” does not convey the phrase’s accurate, complete meaning. It is better to keep the same name and understand what it means.

- **The closest English translation is “Willful attachment leading to the existence of similar kind.”**

1. *Paṭicca* = *paṭi* + *icca*; here “*paṭi*” is bonding, and “*icca*” (pronounced “ichcha”; see #12 below) is liking.
 - Thus, *Paṭicca* is “bonding to something willingly” or “getting attached to something through a liking for it.”
 - This bonding depends on one’s *gati* (habits and likings), which in turn are due to deep-seated *āsava*s (cravings).
 - There are many posts on the website on this key Pāli term: “*gati*.” One can get a list of relevant posts by typing “*gati*” in the “Search” box at the top right. Note that “*gati*” is pronounced as “gathi.”
2. *Samuppāda* = “*sama*” (same or similar) + “*uppāda*” (generation), i.e., an existence (*bhava*) of similar quality or kind.
 - Thus *samuppāda* means leading to existence or experience corresponding to defilements that made one attach to the situation (*ārammaṇa*) in the first place.
 - Everything in this world arises due to six root causes: *lobha*, *dosa*, *moha* and *alobha*, *adosa*, *amoha*; see, “[Six Root Causes – Loka Samudaya \(Arising of Suffering\) and Loka Nirodhaya \(Nibbāna\)](#).”
 - Different types of *paṭicca samuppāda* cycles operate based on which kind of causes are involved; see, “[Paṭicca Samuppāda Cycles](#).”

Connection to *Gati* – Simple Example

3. For example, when we generate potent hateful thoughts about a person, we could be in the mindset of an animal. At that moment, we may even behave like an animal, hitting and clawing at that person if things get out of hand. Even if we may not act physically, we will have that “animal-like” mindset.

- At that moment, we generate a *gati* (character) corresponding to “*bhava*,” or existence similar to an animal. That, in turn, leads to grasping a corresponding “*bhava*.” Then “*bhava paccayā jāti*” leads to a similar “*jāti*” or birth, i.e., to act like an animal.
- We generated a corresponding “*bhava*” in our mind because we got “bonded” to that situation via hateful thoughtful thoughts; we developed a corresponding “*bhava*” in our minds. Results (effects) correspond to causes: cause and effect. If we keep creating the same kind of “*bhava*,” that leads to forming “*gati*” or habits. They are all interconnected.
- Strong feelings under such conditions create subtle energies called “*kammic energy*.” **That energy can build up to create a subtle “*manomaya kāya*” (*gandhabba kāya*) corresponding to a new existence (*bhava*.)**

4. Now, if we keep getting into fights with that person (or with others) similarly, we will be building up that “*bhava*,” and this could lead to the formation of a very potent *kamma* seed; see, “[Sāṅkhāra, Kamma, Kamma Bīja, Kamma Vipāka](#).”

- Furthermore, it becomes a “*gati*” as well (see, “[Sāṁsāric Habits and Asavas](#)”). Then it is easier to get into such situations, and a vicious cycle starts leading to that *gati* taking hold.
- Here, it is critical to understand that “*uppāda*” or “birth” is according to the “bonding with liking” (*paṭi icca*) for CAUSES, not the birth itself. For example, no one wants to be born a dog. But one cannot avoid being born a dog if one willingly does “lowly things” appropriate for dogs and thus cultivates “*gati* suitable for a dog.”

5. Now we combine the two terms: “*Paṭicca Samuppāda*” means “attachment to something leading to the generation of the corresponding “*bhava*” (and thus *jāti*).

- The establishment of a *bhava*, in turn, leads to a corresponding *jāti* or birth: “when one gets attached, it sets up the likelihood of a new birth of similar characteristics.”
- For example, when someone acts with greed out of habit, they are prone to behave that way during a lifetime. Furthermore, it could be manifested more powerfully in a future birth by being born a *Peta* (hungry ghost).

Two Types of *Paṭicca Samuppāda*

6. Therefore, the establishment of an “existence” (*bhava*) could be two ways:

- Even during the current lifetime, a similar situation can arise. For example, “*gati*” formed via above mentioned “fights” with other people will tend to draw oneself to a similar outcome even with the slightest provocation. That is a “*pavutti bhava*” (and *jāti*) that lasts for a short time during current life; see, “[Idappaccayatā Paṭicca Samuppāda – Bhava and Jāti Within a Lifetime](#).” and “[Idappaccayatā Paṭicca Samuppāda](#).”
- If this hateful “*gati*” becomes profoundly ingrained and becomes a potent *kamma* seed, that could come to the mind at the dying moment. That could lead to a hateful “*uppatti bhava*” in the next existence, as an animal or even in the *niraya* (hell); see, “[Akusala-Mūla Uppatti Paṭicca Samuppāda](#)” and “[Bhava – Kammic Energy That Can Power an Existence](#).” [*uppatti* : [f.] rebirth; coming forth; origin. *upapatti* : [f.] birth; rebirth; approach.]

A *Uppatti Bhava* Can Lead to Many Births (*Jāti*)

7. Here, one should also be able to make a distinction between “*bhava*” (existence) and “*jāti*” (birth). For example, a *uppati bhava* may give rise to many births until the *kammic* energy in that *kamma* seed wears out; see, “[Bhava and Jāti – States of Existence and Births Therein.](#)”

- That is why, even though the human *bhava* is RARE, one may be reborn a human many times at a stretch. Only those born human in a previous life (or a few lives) may be able to remember those lives; see, “[Evidence for Rebirth.](#)”
- Different types of *Paṭicca Samuppāda* cycles discussed at: “[Paṭicca Samuppāda Cycles.](#)”

We Attach via *Taṇhā* and *Avijjā*

8. By perceiving illusory happiness, we willingly attached to pleasurable things. We also get attached to stuff via hate, and the root cause is an attachment to something related.

- For example, we get “attached” to a person with hate if that person is blocking our access to something that we like. We keep thinking about how bad he is, etc.
- Thus attachment is possible with greed or hate. That is what “*taṇhā*” (in Sinhala, “තැනට හැසීම” or “get fused or attached to” in English) means; see, “[Taṇhā – How We Attach Via Greed, Hate, and Ignorance.](#)”
- Therefore, it is essential to realize that “*taṇhā*” does not mean just greed. It could also be due to hate or dislike.

Unimaginable Suffering in Some existences (Among the 31 Realms)

9. Ultimately, both desire and hatred arise due to ignorance (*avijjā*). Ignorance of not knowing the unfruitful nature of “this world” of 31 realms, i.e., “[Anicca, Dukkha, Anatta.](#)”

- We think that living is pleasurable, but lives in some realms are filled with unimaginable suffering. Human birth is rare.
- There is unimaginable suffering in the lower four realms (see “[How the Buddha Described the Chance of Rebirth in the Human Realm](#)”).

We Create Our Future Lives!

10. There is no one, or no external force, keeping us bound to “this world” of 31 realms; see, “[The Grand Unified Theory of Dhamma.](#)” Just like an octopus grabbing its prey with all eight legs, we willingly cling to things in “this world” of 31 realms filled with suffering.

- Unless we see the true unfruitful and even dreadful (in the lower four realms) nature of ‘this world’ by comprehending “[Anicca, Dukkha, Anatta,](#)” we will not let go of it.

Use Pāli Words Without Translating to Other Languages

11. The Buddha advised NOT TO translate keywords in Pāli (and even verses in deep suttas) to other languages. In most cases, there are no equivalent words in other languages.

The translation of *Paṭicca Samuppāda* to Sanskrit as *Pratityasamutpāda* is an excellent example of this problem. See the explanation of *Pratityasamutpāda* (the Sanskrit word for *Paṭicca Samuppāda*) on Wikipedia: [WebLink: wiki: Pratityasamutpāda](#)

- I think you will agree that it is confusing at best, with multiple possible meanings.
- Even though “Dependent Origination” is better, it still does not convey the whole meaning.
- On the other hand, for someone knowledgeable in Pāli or Sinhala, the meaning is evident in the name itself: *paṭi + icca sama + uppāda*.

Pronunciation of Pāli Words

12. It is highly beneficial to learn how to pronounce Pāli words. When the European scholars started writing the Pāli *Tipitaka* with the English alphabet, they came up with a unique system that I call the **“*Tipitaka English*” Convention**. It has helped keep the ‘word length’ short.

- For example, even though written as “*gati*,” its pronunciation is “gathi.” Similarly, “*icca*” is for “ichcha.” If written as pronounced, “*dhammacakkappavattana*” would be “dhammachakkappavaththana.”
- See “[“Tipitaka English” Convention Adopted by Early European Scholars – Part 1](#)” and “[“Tipitaka English” Convention Adopted by Early European Scholars – Part 2](#)” for details.
- A pronunciation guide at “[Pāli Glossary – \(A-K\)](#)” and “[Pāli Glossary – \(L-Z\)](#).”
- Don’t be discouraged. Start getting used to the method of learning the meanings/pronunciations gradually. Learn the common keywords first.

9.2 Sakkāya Diṭṭhi and Paṭicca Samuppāda

February 4, 20121

Sakkāya Diṭṭhi arises in those who do not understand the *Paṭicca Samuppāda* process. We will discuss the steps in the *Paṭicca Samuppāda* process to clarify this critical point.

[Sakkāya Diṭṭhi – Wrong View of “Me” and “Mine”](#)

[What Reincarnates? - Concept Of A Lifestream](#)

[Anatta and Sakkāya Diṭṭhi – Two Different Concepts](#)

[Nibbāna - Rāgakkhaya Dosakkhaya Mohakkhaya - Part 1](#)

9.2.1 Sakkāya Diṭṭhi – Wrong View of “Me” and “Mine”

February 4, 2021; revised February 5, 2021 (added #9 and #10); major revision June 19, 2022; revised December 6, 2022

Sakkāya Diṭṭhi is the **wrong view of an unchanging essence** associated with a human. Materialists — who don’t believe in rebirth — believe the **essence is one’s physical body**. The other extreme is the belief that a **“soul-like” entity** survives the death of the physical body.

Definition of *Sakkāya Diṭṭhi*

1. Average humans who have not been exposed to the actual teachings of the Buddha have *sakkāya diṭṭhi*. Several *suttas* describe *sakkāya diṭṭhi* with the verse of [Ref. 1](#). In the following, I will discuss the meaning of that verse.

- **One group has the wrong view of *uccheda diṭṭhi*. They regard the physical body to be equivalent to “me.”** They believe that all mental phenomena arise in the body and are thus totally associated with the body. **Materialists of the present day** belong to this category. They believe that mental phenomena (thoughts) arise in the brain, and thus, they also stop with the physical’s body death.
- Therefore, those with *uccheda diṭṭhi* also believe that *vedanā, saññā, saṅkhāra, and viññāṇa* are **equivalent to “me.”** When the physical body dies, that is the end of all five entities, i.e., the five aggregates or *pañcakkhandha*.
- Thus, those with *uccheda diṭṭhi* have those **five types of wrong views** about an existence that is limited to just one life.

2. **The other group has the view that something unique to me (“essence of me that will never change and cannot be destroyed) must be moving from life to life. They don’t know what it is but the concept is the same as that of a “soul” in many other religions.** In those religions, a soul will live forever in heaven or hell.

- They have one of the following three views regarding their physical body: **it represents me, it is “in me”, or “me” is in the body temporarily.** Again, that “me” is a “soul-like entity.”
- They will also have the same views about mental factors (*vedanā, saññā, saṅkhāra, and viññāṇa*) as well. For example, regarding *vedanā* they have one of the following views: **it represents me, it is “in me”, or “me” is in *vedanā* temporarily.**
- People belonging to most major religions today have these **15 wrong views** of an “unchanging soul,” i.e., ***sassata diṭṭhi*.**

Those are the **20 types of wrong views** about existence: *vīsativatthukā sakkāya diṭṭhi*. I have done a deeper analysis with *Tipiṭaka* references in [“Sakkāya Diṭṭhi – Getting Rid of Deeper Wrong Views.”](#)

Getting Rid of *Sakkāya Diṭṭhi* Is the First Step to *Nibbāna*

3. To understand why those are wrong views (per Buddha Dhamma,) first, we need to clarify what kind of suffering the Buddha said can be stopped.

- When an average human thinks about suffering, they would think about the FEELING of pain or suffering. That could be physical suffering (injuries, sicknesses) or mental anguish like depression.
- But the Buddha taught that those kinds of suffering could only be “managed” but cannot be stopped. They can be managed by eating well, exercising, and following medical advice for injuries/sicknesses. One can control mental suffering partially by living a simple, moral life.

4. However, the Buddha said we must pay more attention to possible suffering in future lives. **Those lives are yet to arise, and we can stop ALL suffering associated with future births.** He taught that the death of the physical body does not end our suffering. One will be reborn either as human again or in one of 31 realms, including the animal realm.

- He said that most births in this process (called *saṃsāra*) are in the lowest four realms (*apāyās*) and that the animal realm is one of those four. Even though we cannot see those beings in the other realms, we can see the suffering of the animals, which is much harsher than for humans.
- The critical point is that we can stop such future suffering by attaining *Nibbāna*.
- When one understands the futility of seeking happiness in this world, one gets rid of *sakkāya diṭṭhi* and becomes a *Sotāpanna*. Then one follows the Noble Eightfold Path and becomes an *Arahant*, thereby attaining *Nibbāna*.

The Worst Wrong View Is *Uccheda Diṭṭhi* (Materialism)

5. From the above discussion, it is evident that Buddha Dhamma's main benefit is to help people attain *Nibbāna* and thus be free of future suffering in the rebirth process (*saṃsāra*.) The current body is a “result,” and *vedanā* that arises in that physical body cannot be stopped. We note that Ven. Mahā Moggallāna died a horrible death after being beaten due to a residue of an *ānantariya kamma* from a previous life.. However, ALL suffering for Ven. Mahā Moggallāna ended after his death (*Parinibbāna*.) For all others, there will be more future suffering after death.

- Thus it should be evident that the worst wrong view is to assume that one's life ends at death. If that is the case, there is not much benefit in studying Buddha Dhamma at a deeper level. One could be a “secular Buddhist” and try to live a moral life. **However, the term “secular Buddhist” is an oxymoron, just like the term “alone in a crowd” or “walking dead.”**
- Having the *sassata diṭṭhi* (believing in a permanent soul) is also wrong and is the other extreme. They may be reluctant (or afraid) to engage in immoral deeds for fear of being sent to hell permanently **but do not see any drawbacks in engaging in “legitimate sense pleasures.”**
- I say that those with the *uccheda diṭṭhi* may be worse because they do not need an INTRINSIC moral compass. Even though most materialists DO live perfectly moral lives, they could be more susceptible to committing offenses on impulse (when temptations become strong enough.)

If There is No Soul, “What” Is Reborn?

6. The two views of materialism and soul-view are easy to understand.

Materialism means one lives this life, when one dies, that is the end. Those with the soul-view do their best to live a moral life and hope to be born in Heaven (*Abrahamic* religions) or in a *Brahma* realm which is supposed to be permanent (Hinduism.)

- Most people have difficulty understanding Buddha's view. Since Buddha's view involves rebirth, it is difficult for them to see how it differs from the soul-view. The question frequently asked is: “What is reborn, if there is no soul?” *Paṭicca Samuppāda* explains that.

- **One quick way to see the difference is to compare Buddha's view with Hinduism's.** In *Abrahamic* religions, one will be born either in heaven or hell, i.e., there are not many rebirths. But in both Buddha Dhamma and Hinduism, there can be numerous rebirths. In Buddhism, that process ends when one attains *Nibbāna* (as an *Arahant*). In Hinduism, “reincarnation” ends when one is born in the realm of *Mahā Brahma*.
- The other key difference between Hinduism and Buddhism is the following. **In Hinduism, future lives are “reincarnations” of the same ātman** (similar to a soul in *Abrahamic* religions.) Reincarnation implies the same “essence” (as a soul) that moves from one life to another.
- In Buddha Dhamma, no such soul or *ātman* going from life to life. Instead of “REINCARNATION,” it is REBIRTH. That is THE crucial difference.

How Is Rebirth Different From Reincarnation?

7. Reincarnation implies that there is SOMETHING unique AND unchanging in a human that gets carried to the next life. The body can take different forms, but there is a “unique life force” (my characterization of “ātman”) that remains unchanged from life to life.

- [“WebLink: holy-bhagavad-gita.org: Bhagavad Gita: Chapter 2, Verse 22”](http://holy-bhagavad-gita.org/Bhagavad-Gita/Chapter-2/Verse-22) explains that, “As a person sheds worn-out garments and wears new ones, likewise, at the time of death, the soul casts off its worn-out body and enters a new one.”
- Thus, one may be born with a “different body” (outer garments), but the essence (personal identity or “ātman”) remains.
- **The mechanism is very different in Buddha Dhamma. Paṭicca Samuppāda dictates the process.** “Personality” can change drastically from one existence (*bhava*) to another. I have tried to explain it in the post [“What Reincarnates? – Concept of a Lifestream.”](#)

Concept of a Bhava – No Personality Involved

8. In Buddha Dhamma, a critical idea is the concept of a “*bhava*.” A “lifestream” makes transitions from *bhava* to *bhava* based SOLELY on *kammic* energy. There is NO “personality” that remains FIXED.

Different types of unwise thinking, speech, and actions (dictated by different types of *saṅkhāra*) lead to different kinds of *bhava* and *jāti*.

- However, in adjacent lives, there will be similarities in character/habits represented by the term “*gati*.” One’s *gati* will significantly influence the next *bhava*. For example, if one lived an immoral life suitable for an animal, they WOULD likely BE born an animal.
- *Paṭicca Samuppāda* explains that. *Saṅkhāra* (one’s thoughts, speech, and actions) that arise due to *avijjā* is at the beginning of the *Paṭicca Samuppāda* process. Then towards the end, it leads to a particular type of *bhava* (existence) and birth (*jāti*) in that existence.
- For example, if a human cultivates *arūpāvacara jhāna* (with *āneñjābhisaṅkhāra*), that will lead to existence as an *arūpāvacara Brahma*. See #5 of [“Saṅkhāra – What It Really Means”](#) for an explanation of how different types of *bhava* arise due to three broad categories of *abhisāṅkhāra*.

All Bhava Lead to Suffering

9. The *akusala-mūla Paṭicca Samuppāda* process describes how (*abhi*)*saṅkhāra* done with *avijjā* LEAD to various *bhava* and *jāti*. This is the first step in the *akusala-mūla Paṭicca Samuppāda* process: “*avijjā paccayā saṅkhāra*.” Towards the end, it leads to *bhava*.

- Those *bhava* lead to births (*jāti*) among the 31 realms. Without exception, any *jāti* ends up suffering. That is the last step in the *akusala-mūla Paṭicca Samuppāda* process: “*jāti paccayā jarā, maraṇa, soka-parideva-dukkha-domanassupāyāsā sambhavan’ti.*”
- In upcoming posts, we will go through the steps in *Paṭicca Samuppāda* to further clarify how the wrong view of *sakkāya diṭṭhi* sustains this process that keeps one bound to *samsāra*, the rebirth process. That is not the reincarnation of a “soul.”
- Until one understands that process, one has *avijjā*, i.e., ignorant about the Four Noble Truths.
- There is one more aspect that needs to be understood. Let us discuss that now.

Difference Between Wrong Views and Wrong Perceptions

10. Most texts describe *sakkāya diṭṭhi* as “self-illusion” or “personality belief,” i.e., “belief that a self or I exist” (you can Google “*sakkāya diṭṭhi*” and see). **Here it is essential to understand that there is a difference between “wrong view” and “wrong perception.”** A *Sotāpanna* would have removed the wrong view (*diṭṭhi*), but not the false perception (*saññā*.)

- But this **perception (*saññā*)** of a “self” (or a “soul” which is also called “*ātma*”) is NOT *sakkāya diṭṭhi* per *Tipiṭaka*, as we discuss below. That is a *saññā* (perception) we have carried from life to life. For a discussion on *saññā*, see “[What is Saññā \(Perception\)?](#)”.
- The deeply-embedded idea of a “self” or an innate sense of “me” is rooted in the *māna cetasika*.
- If one gets offended if treated with disrespect, that means one still has *māna* left. Even an *Anāgāmi* could be somewhat annoyed if they perceive being mistreated. A component of *māna* — called *asmi māna* — is still left at the *Anāgāmi* stage. *Māna* is removed not at the *Sotāpanna* stage but at the *Arahant* stage.

A Sotāpanna Removes Only Wrong Views About an “Unchanging Self”

11. At the *Sotāpanna* stage, the **wrong view (*diṭṭhi*)** that there is something unchanging and permanent, like a “soul” associated with oneself, goes away. Simultaneously, the wrong view that one can remove future suffering by just living a moral life (*sīlabbata parāmāsa*) will go away too. (However, living a moral life is necessary too.) Furthermore, any doubts about the teachings of the Buddha (*vicikicchā*) will also disappear simultaneously.

- When one can see that there is no “real essence” (like a “soul” or a “*ātma*”) associated with a living being, this wrong view of *sakkāya diṭṭhi* goes away. A lifestream evolves, according to *Paṭicca Samuppāda*; see, “[Anattā in Anattalakkhaṇa Sutta – No Soul or an Ātma.](#)”
- However, it is incorrect to believe that the **perception of a “me”** will go away at the *Sotāpanna* stage. That perception completely goes away only at the *Arahant* stage. See “[Vipallāsa \(Diṭṭhi, Saññā, Citta\) Affect Saṅkhāra.](#)”

References

1. The following verse appears in many *suttas*, for example in the “[WebLink: suttacentral: Cūḷavedalla Sutta \(MN 44\)](#)”: “*assutavā puthujjano, ariyānaṃ adassāvī ariyadhammassa akovido ariyadhamme avinīto, sappurisānaṃ adassāvī sappurisadhammassa akovido sappurisadhamme avinīto, rūpaṃ attato samanupassati, rūpavantaṃ vā attānaṃ, attani vā rūpaṃ, rūpasmiṃ vā attānaṃ. Vedanaṃ ... pe ... saññāṃ ... saṅkhāre ... viññāṇaṃ attato samanupassati, viññāṇavantaṃ vā attānaṃ, attani vā viññāṇaṃ, viññāṇasmiṃ vā attānaṃ. Evaṃ kho, āvuso visākha, sakkāyadīṭṭhi hotī.*”

9.2.2 What Reincarnates? – Concept of a Lifestream

Revised August 3, 2016; revised March 27, 2018; September 6, 2019; November 12, 2019; August 22, 2020; re-written February 8, 2021; added #9 February 9, 2021; February 14, 2021 (#3 and #8); revised August 7, 2022

Reincarnation Versus Rebirth

1. Reincarnation is a Hindu concept where the “*ātma*” (“*ātman*”) or the soul remains the same but takes a different form. The *Rigveda* compares it to a person discarding an old suit and wearing a new outfit. See “[Sakkāya Ditthi – Wrong View of “Me” and “Mine.”](#)”

- **In Buddha Dhamma, it is a rebirth since there is no soul to reincarnate.** We have accumulated many “*kamma* seeds” (*kamma bīja*) which contain various “habits” and “character qualities” (called “*gati*”) In our long journey through *samsāra*. Those lead to different types of rebirths; see, “[Saṅkhāra, Kamma, Kamma Bīja, Kamma Vipāka.](#)”
- At the end of this human existence, the *kammic* energy of the *kamma* seed for the present life is exhausted. At that moment, a new life starts with a new potent *kamma* seed. The selection of a new seed itself is a complicated process and depends on the potency of the available *kamma* seeds, but it happens within a thought moment.
- Let us first summarize Buddha’s description of sentient life. The following facts are indisputable.

No Discernible Beginning to *Samsāra* (Rebirth Process)

2. During the night of attaining the Buddhahood, the Buddha looked back at his rebirth process. He was able to scan eons in mere moments, but no matter how far back he looked, he could not see a “beginning.” He has given many similes (analogies) to indicate the “unimaginable length of the rebirth process.”

- For example, [WebLink: suttacentral: Assu Sutta \(SN 15.3\)](#) states: “*Bhikkhus*, this rebirth process has no discernible (*na pannāyati*) beginning. Beings whose minds are covered by ignorance and **are bound to this rebirth process with bonds of craving.**”
- Birth as a human is very rare among all those rebirths, as stated, for example, in the [WebLink: suttacentral: Nakhasikha Sutta \(SN 20.2\)](#). “*bhikkhus*, sentient beings reborn as humans are few as this bit of sand on my fingernail. But those not reborn as humans are many as the sand on this great Earth. Therefore, you should strive diligently and without delay to end this suffering in the rebirth process.”
- Further details in “[Rebirth – Connection to Suffering in the First Noble Truth.](#)”

The Concept of a Lifestream

3. **The Buddha used the term “*satta*” to describe a living being going through that rebirth process.** In the [WebLink: suttacentral: Satta Sutta \(SN 23.2\)](#), Ven. Rādhā asked the Buddha: “..they speak of this thing called a ‘sentient being.’ How is a sentient being defined?”

- The Buddha answered: “Rādhā, when there is liking (*chanda*), strong liking (*rāgo*), reveling (*nandī*), and the tendency to attach (*taṇhā*), then a ‘**sentient being with cravings**’ (*satta*) is spoken of.” **Note that the Pāli word ‘*satta*’ means “to attach.”**
- In other words, as long as a ‘sentient being’ highly values things in this world, it will be reborn in this world. It could be reborn, a human, an animal, a Deva, etc., at various times. Thus, associating any such existence with an “unchanging entity” (such as a soul) is impossible. When born a human, a *satta* behaves like a human, and when born an animal, it acts like an animal, etc.

- I use the English word to describe “*satta*” as a “lifestream.” The term “sentient being” is more suitable to refer to a “*satta*.” On the other hand, “a lifestream” refers to the process that a *satta* goes through in *Samsāra*.
- A given lifestream can take various forms in the rebirth process. **There is no “core” or “soul” or “ātman” to talk about! On the other hand, as long as that fact is not understood, there is a *satta* in the rebirth process.**

A Bodhisatta is a Special Satta

4. Buddha Gotama, like any other Buddha, made a heroic effort to become a Buddha through many eons. When he made enough progress, he was declared a “*Bodhisatta*” by Buddha Deepankara many eons ago.

- A *Bodhisatta* is a special *satta* destined to become a Buddha. “*Bodhi*” means “towards liberation/release.” When a *satta* has fulfilled enough *paramitā* to become a Buddha, he is declared a “*Bodhisatta*” by existing Buddhas. See, “[Pāramitā and Niyata Vivarana – Myths or Realities?](#).”
- Even after becoming a *Bodhisatta*, it is possible to be born in the animal realm (but NOT in the other three realms in the *apāyās*.)
- Therefore, a sentient being is born in any given bhava ONLY according to causes and effects. That is described in *Paṭicca Samuppāda*, which starts with “*avijjā paccayā saṅkhāra*” and ends in “*bhava paccayā jāti*” and *jāti paccayā jarā, maraṇa, soka-parideva-dukkha-domanassupāyāsā sambhavan’ti*.
- There is no reference to a “special/particular being” in that whole process. Future existences (*bhava*) and births (*jāti*) within that existence only depend on past *kamma* (*saṅkhāra*) done with *avijjā*!

Transcending the “Satta State” to Attain Puggala Stages

5. All other living beings (*sattā*) overcome the “*satta* state” by learning how to do that from a Buddha or a true disciple of a Buddha (*Ariya*.)

- Note that “*satta*” is pronounced, “*saththa*.” See “[“Tipitaka English” Convention Adopted by Early European Scholars – Part 1.](#)”
- There are eight such *Ariyā* (Noble Persons) as described in the “[WebLink: *suttacentral: Pathamapuggala Sutta* \(AN 8.59\).](#)” for example.
- They are: “*Sotāpanno, sotāpattiphalasacchikiriyāya paṭipanno (sotāpanna anugāmi), sakadāgāmī, sakadāgāmiphalasacchikiriyāya paṭipanno (sakadāgāmī anugāmi), anāgāmī, anāgāmiphalasacchikiriyāya paṭipanno (anāgāmī anugāmi), arahā, arahattāya paṭipanno (arahant anugāmi).*”
- Another special *satta* overcomes the “*satta* state” with his efforts. That is a *Pacceka* Buddha. A ***Pacceka* Buddha** has not fulfilled ALL the *paramitās* to become a ***Sammāsambuddha*** like Buddha Gotama. Therefore, a *Pacceka* Buddha cannot explain Dhamma like a *Sammāsambuddha*. Not that many *sattā* can attain *Nibbāna* during a *Pacceka* Buddha.

All Sattās Are Trapped in the Rebirth Process

6. Therefore, until the *Sotāpanna Anugāmi* stage is attained, all sentient beings are trapped in the rebirth process.

- They all have not overcome the “*satta* state” and thus could be born in the *apāyās* in the future.
- The lifestream of a *satta* in ANY of those 31 realms will flow ceaselessly until the fruitlessness AND danger in remaining in the rebirth process are comprehended.

- The danger is that most births in the rebirth process are in the lowest four realms (*apāyās*.) The reason for that is in the verse that describes a “*satta*” in #3 above: “**Rādhā, when there is liking (*chanda*), strong liking (*rāgo*), reveling (*nandī*), and the tendency to attach (*taṇhā*), then a ‘sentient being’ is spoken of.**”
- The Buddha referred to a sentient being (“*satta*”) as one with attachment to “worldly pleasures.”

Rest of the *Satta Sutta*

7. After explaining to Ven. Rādhā the meaning of a “*satta*,” Buddha explained to him why those sentient beings are trapped in the rebirth process filled with unimaginable suffering.

Here is the English translation at Sutta Central (my revisions are in bold):

“Suppose some boys or girls were playing with sandcastles. As long as they’re not rid of greed, desire, fondness, thirst, passion, and craving for those sandcastles, they cherish them, fancy them, treasure them, and treat them as their own. But when **they grow up**, they get rid of greed, desire, fondness, thirst, passion, and craving for those **useless** sandcastles. Then they scatter, destroy, and demolish them with their hands and feet, making them unplayable.

In the same way, you should scatter, destroy, and demolish **the desire for mind-pleasing things in this world** and reject them. And you should practice for the ending of craving. You should scatter, destroy, and demolish **the desire for** feeling ... perception ... *saṅkhāre* ... *Viññāṇam*, making them unplayable. ***Taṇhākkhaya hi, rādhā, nibbānan*” ti** (Rādhā, *Nibbāna* is the elimination of *taṇhā*).”

Overcoming the Desire to Build Sandcastles

8. Thus, the Buddha compared the behavior of any living being in the “*satta* state” to children enjoying building sandcastles on a beach. Due to their ignorance (*avijjā*), they don’t realize the futility of building sandcastles for enjoyment.

- In the same way, until one hears and comprehends the actual teachings of the Buddha (Four Noble Truths/*Paṭicca Samuppāda*/*Tilakkhaṇa*), one would not “see” the futility AND dangers in enjoying sense pleasures in this world. Children building sand castles only waste their time. On the other hand, *sattā* enjoying sensory pleasures pave the way to rebirths in the *apāyās* without realizing it.
- When one starts “seeing” the true nature of this world, one removes *sakkāya diṭṭhi* and becomes a *Sotāpanna Anugāmi*. That “vision” is fully established when one also removes any doubts (*vicikicchā*) and also sees that rituals (*sīlabbata parāmāsa*) will not get one released from the rebirth process. One is at the *Sotāpanna* stage at that point.
- However, that is only the beginning of the Noble Eightfold Path. Only the *diṭṭhi vipallāsa* (wrong vision) has been removed yet. With that “new vision” (*Sammā Diṭṭhi*), one needs to follow the other seven steps and get to *Sammā Samādhi* to remove *saññā vipallāsa* at the *Anāgāmi* stage and the *citta vipallāsa* at the *Arahant* stage. See, “**Vipallāsa (Diṭṭhi, Saññā, Citta) Affect Saṅkhāra.**”

Puthujjano Is a *Satta* in the Human Realm

9. Finally, a human in the “*satta* state” (i.e., who has not comprehended the Four Noble Truths) is a “*puthujjano*.” Thus, a *puthujjano* (normally translated as “uninformed ordinary person” in many translations) is a human with *sakkāya diṭṭhi*.

- In the “**WebLink: [suttacentral: Cūlavēdalla Sutta \(MN 44\)](#)**,” Ven. Dhammānanda is asked: “how does *sakkāya diṭṭhi* (identity view) come about?”
- She replied: “.. **uninformed ordinary persons** who have not been exposed to the teaching of the Noble persons have one of the following views. **One group has the wrong vision of *rūpa* (material**

form) in 4 ways: to regard *rūpa* as “mine,” or “I” as *rūpa*, or *rūpa* to be “in me,” or “I” to be “in *rūpa*.” Then there is the other group who regard one or more of the mental factors *vedanā* (feeling) ... *saññā* (perception) ... *saṅkhāra* (ways of thinking) ... *viññāṇa* (consciousness) as “mine,” or “I” as those, or them to be “in me,” or “I” to be “in them.” (We discussed this in #1 of the previous post, [“Sakkāya Diṭṭhi – Wrong View of ‘Me’ and ‘Mine.’”](#))

- Thus, any living being (human, *Deva*, *Brahma*, as well as any other living being) who has not comprehended the “world vision” of how suffering arises is a “*satta*.” A *satta* in the human realm is a *puthujjano*.

9.2.3 Anatta and Sakkāya Diṭṭhi – Two Different Concepts

February 13, 2021

Anatta is Not Sakkāya Diṭṭhi

1. As we discussed in the previous two posts [[Post 1](#) and [Post 2](#)], *sakkāya diṭṭhi* is the WRONG VIEW of “me” and “mine.” See, [“Sakkāya Diṭṭhi and Paṭicca Samuppāda.”](#)

- New existences (*bhava*) arise due to specific *kamma* done with different types of *abhisāṅkhāra* (*vacī abhisāṅkhāra* and *kāya abhisāṅkhāra*.) That is a process dictated by *Paṭicca Samuppāda*. Those *saṅkhārā* arise with having that wrong view (*avijjā*.) That is why the PS process starts with “*avijjā paccayā saṅkhārā*.”
- When one understands the *Paṭicca Samuppāda* process, one will see that it is such *saṅkhārā* (thoughts) arise because one believes that experiences in this world can bring happiness. Such experiences come through the body and mind, and one takes those as “me.” Those external things that be likes, one takes them to be “mine.” (To emphasize again, *saññā* and *citta vipallāsa* of “me” and “mine” will be removed only at *Anāgāmi* and *Arahant* stages. Removal of *sakkāya diṭṭhi* only removes the wrong view.)
- Those wrong views of a “me” and “mine” keep one bound to the rebirth process. **There is a living-being (*satta*) AS LONG AS there is the wrong of a “me” and “mine” associated with that lifestream.** We will discuss this in detail in upcoming posts.
- That wrong view is *sakkāya diṭṭhi*. As long as the *sakkāya diṭṭhi* is there, one will not overcome the “*satta*” state and become one of the 8 *Ariya puggalā*, as discussed in those previous two posts. **Furthermore, a “me” will exist (in the rebirth process) until that wrong view is removed.**
- That wrong view will be removed ONLY WHEN one sees nothing in this world TO BE CONSIDERED “me” or “mine.” Therefore, *sakkāya diṭṭhi* (the wrong view) is RELATED TO *anatta* (a characteristic of nature.)
- But *anatta* is NOT that wrong associated with a “me” or a “self.” **Anatta means EVERYTHING in this world is devoid of value.**

Anatta is Not “No-Self”!

2. Many people translate the word “*anatta*” as “no-self.” But the Buddha advised us to stay away from the following two extremes to describe a living-being (*satta*.)

- It is NOT correct to say that a *satta* (with the wrong view of a “self”) does not exist. That *satta* will live in one of the 31 realms as long as having that incorrect view. **Most importantly, life is real, and so is the suffering (together with infrequent happiness). Here, I am referring to the long rebirth process.**
- On the other hand, in ultimate reality, there is no “self” or a “soul” or an “*ātman*” traveling the rebirth process (*saṃsāra*.) When that is understood, that *satta* will cease to exist IN THIS WORLD, i.e., that lifestream will merge with *Nibbāna*.

- Instead of having endless debates about whether a “self” exists or not, it pays to focus on how the Buddha explained the existence of a *satta* suffering much in the rebirth process.
- **To repeat:** *abhisankhāra* ARISE in a mind BECAUSE a *satta* (living-being) acts with that wrong view. But if one understands this process, one can be mindful and stop such *sankhārā* from CONTINUING TO grow and LEAD TO new existences (*bhava*.) That is the basis of *Satipaṭṭhāna*.
- When one understands *Paṭicca Samuppāda*, one will see no need to follow either of those two extremes of whether there is a “self” or not.

What is *Anatta*?

3. The concept of *anatta* is intrinsically related to the other two: *anicca* and *dukkha*. Those three are the “three characteristics of nature.”

- None of those are DIRECTLY about a “person” or a “*satta*.”
- *Anicca*, *dukkha*, *anatta* are related by “*yadaniccā tam dukkham, yaṃ dukkham tadanattā*” (expanded: “*yad aniccā tam dukkham, yaṃ dukkham tad anattā*.”) That means, “everything in this world” is of *anicca* nature; (craving for them) leads to *dukkha*; therefore, **it is unfruitful to crave for anything in this world (*anatta*).**
- There are 12 *suttas* in the *Aniccavagga* of the *Saṃyutta Nikāya* 35 (SN 35.1 through SN 35.12), stating that ***anicca* (and *dukkha* and *anatta*) nature is associated with everything in this world.**
- There are 6 *suttas* in the *Aniccavagga* of the *Saṃyutta Nikāya* 2 (SN 22.12 through SN 22.17) stating the same and the above relationship among the three entities.

Inert Things Are of *Anatta* Nature Too!

4. The “[WebLink: suttacentral: Yadanattā Sutta \(SN 22. 17\)](#)” states: “*Rūpaṃ, bhikkhave, anattā. Yadanattā tam ‘netam mama, nesohamasmi, na meso attā’ ti evametam yathābhūtam sammappaññāya daṭṭhabbam. Vedanā anattā ...saññā anattā ...saṅkhārā anattā ...viññāṇam anattā.*”

Translated: “*Bhikkhus, rūpa is of anatta nature. It has no essence and is of no value.* Any *rūpa* (including external *rūpa*) should be seen as it really is — with correct wisdom — thus: ‘This *rūpa* is not mine, this I am not, this should not be taken as “me.”’ Then the same is stated for the four mental components.

- There are other *suttas* explicitly stating that the **external world is also of *anatta* nature.** For example, the “[WebLink: suttacentral: Bāhirāyatana Anatta Sutta \(SN 35.227\)](#)” says: “*Rūpā, bhikkhave, anattā. Saddā ... gandhā ... rasā ... phoṭṭhabbā ... dhammā anattā. Evaṃ passam ... pe ... nāparam itthattāyāti pajānāti*” ti.

Translated: “*Bhikkhus, sights, sounds, smells, tastes, touches, and dhammā are of anatta nature.* Seeing this ... (a Noble Person) understands: ‘There is no value in any of those... (for them) there is no return to any state of existence in this world (i.e., they will attain *Nibbāna*).’”

- **Does it make sense to say, “sights, sounds, smells, tastes, touches, and thoughts are not-self”?** Is having a “self” a possibility for sights, sounds, etc.? But that is the exact English translation of this *sutta* at Sutta Central!
- **Thus, it should be clear that ALL INERT THINGS in this world are also of *anatta* nature!**
- It is unfruitful AND dangerous to value them and to attach (*taṇhā*) to them.
- We will get to discuss this in detail in the future. But I just wanted to make the distinction between *sakkāya diṭṭhi* and *anatta*.

Sakkāya Diṭṭhi Is Related to *Anatta*

5. Of course, getting rid of *sakkāya diṭṭhi* and starting to comprehend *Tilakkhaṇa* (including *anatta* nature) happens simultaneously at the *Sotāpanna* stage. Those two concepts are related.

- This relationship is described in the “[WebLink: suttacentral: Anattalakkhana Sutta \(SN 22.59\)](#),” the second *sutta* delivered by the Buddha to the five ascetics.
- “*Rūpaṃ, bhikkhave, anattā. Rūpaṃca hidam, bhikkhave, attā abhavissa, nayidaṃ rūpaṃ ābādhāya saṃvattēyya, labbhettha ca rūpe: ‘evaṃ me rūpaṃ hotu, evaṃ me rūpaṃ mā ahoṣī’ti.’*” OR “*Bhikkhus, form no value and should not be considered one’s own. If rūpa (meaning one’s body in this case) belonged to oneself, one should be able to control it (without leading to sicknesses and injuries; one should be able to say: ‘Let my body be thus without affliction)’*”
- “*Yasmā ca kho, bhikkhave, rūpaṃ anattā, tasmā rūpaṃ ābādhāya saṃvattati, na ca labbhati rūpe: ‘evaṃ me rūpaṃ hotu, evaṃ me rūpaṃ mā ahoṣī’ti.*” OR “But this body has the *anatta* nature, it leads to affliction, and it is not possible to have it thus: ‘Let my body be this way; let my body not be the other way.’” **Therefore, “this body should not be considered as mine” is ONE ASPECT of the *anatta* nature.**
- In other words, one’s body is just like any other *rūpa* in this world. It is subject to the *anatta* nature dictated by *Paṭicca Samuppāda*. That is also why *sakkāya diṭṭhi* is wrong.
- The *sutta* explains that the same is true for the other four mental aggregates: *vedanā anattā, saññā anattā, saṅkhārā anattā, viññāṇaṃ anattā*.

Anattā Asārakaṭṭhenāti – Anatta Means Anything in this World is Void of Value

6. Finally, the following verse is in the “[WebLink: suttacentral: Khuddaka Nikāya Paṭisambhidāmagga 3.1. Mahāpaṇṇāskathā](#)” (towards the end) of *Paṭisambhidāmagga* in the *Tipiṭaka*: “*Rūpaṃ atītānāgatapaccuppannaṃ aniccaṃ khayaṭṭhena dukkhaṃ bhayaṭṭhena anattā asārakaṭṭhenāti..*”

- **Translated:** “any *rūpa* belonging to the past, present, or future is of *anicca* nature and (attaching to them) will lead to one’s downfall (*khaya*); it is of *dukkha* nature because it is dangerous (*bhaya*); it is of *anatta* nature because it is **useless (*asāra*)**” [*asāra* : [adj.] worthless; sapless; vain.]
- Thus it is evident that *anatta* CANNOT be translated as “no-self.”

The next verse there is; “*Rūpaṃ atītānāgatapaccuppannaṃ aniccaṃ saṅkhataṃ paṭiccasamuppannaṃ khayadhammaṃ vayadhammaṃ virāgadhammaṃ nirodhadhammanti tulayitvā tīrayitvā vibhāvayitvā vibhūtaṃ katvā rūpanirodhe nibbāne khippaṃ javatīti—javanapaṇṇā. Vedanā ... pe ... saññā ... saṅkhārā ... viññāṇaṃ ... cakkhu ... pe ... jarāmaraṇaṃ atītānāgatapaccuppannaṃ aniccaṃ saṅkhataṃ paṭiccasamuppannaṃ khayadhammaṃ vayadhammaṃ virāgadhammaṃ nirodhadhammanti tulayitvā tīrayitvā vibhāvayitvā vibhūtaṃ katvā jarāmaraṇanirodhe nibbāne khippaṃ javatīti—javanapaṇṇā. Javanapaṇṇatāya saṃvattantīti—ayaṃ javanapaṇṇā. (14)*”

- Here it is emphasized that EVERYTHING in this world, including all *rūpa*, *vedanā*, *saññā*, *saṅkhārā*, *viññāṇa*, *cakkhu ... pe ... jarāmaraṇa*, are all of *anicca* nature and arise via *Paṭicca Samuppāda*. They ALL lead to eventual suffering (*dukkha*). They ALL are of no real value (*anatta*.) See #3 above “*yad aniccaṃ taṃ dukkham, yaṃ dukkham tad anattā.*”
- That is why we first need to understand the *Paṭicca Samuppāda* process.
- This post has many Pāli verses. But I wanted to quote directly from the *Tipiṭaka* to make things absolutely clear. It is critical to understand these fundamental concepts.

9.3 Paṭicca Samuppāda – Essential Concepts

9.3.1 Nibbāna – Rāgakkhaya Dosakkhaya Mohakkhaya – Part 1

February 19, 2021

Nibbāna is defined as “*rāgakkhayo dosakkhayo mohakkhayo—idaṃ vuccati nibbānan’tī*” OR “*Nibbāna* is the ending of *rāga*, *dosa*, and *moha*.”

What Is *Nibbāna*?

1. The above verse explaining *Nibbāna* appears in many *suttas*. The above quote is from “[WebLink: suttacentral: Nibbānapañhā Sutta \(SN 38.1\)](#).”

- There is a stronger version of *rāga*, i.e., *lobha* (extreme greed.) Someone with a *lobha* mindset CANNOT comprehend the Four Noble Truths. That is why *Nibbāna* is defined as above.
- All future suffering arise due to *lobha*, *dosa*, *moha*. But until *lobha* is reduced to the *rāga* level, one cannot comprehend the Noble Truths. See, “[Lobha, Dosa, Moha versus Rāga, Paṭigha, Avijjā](#).”
- Someone with a “moral mindset” who has removed the ten types of wrong views NORMALLY has reduced versions of *rāga*, *paṭigha*, *avijjā*. However, their mindsets can also be elevated to stronger *lobha*, *dosa*, and *moha* under some conditions (if the temptation is high enough.)
- Someone who has removed the ten types of wrong views can comprehend the Four Noble Truths and remove *avijjā* (ignorance about this world’s real nature.) It happens in four stages culminating at the *Arahant* stage.
- That is a summary. We will discuss the details below and in upcoming posts.

Nibbāna Defined as Above Is the Ultimate Version

2. What is defined above is the ultimate version of *Nibbāna* or the “ultimate cooling down” via “eliminating ANY future suffering.”

- In the previous three posts in this series, I briefly laid out the key (and deeper) foundations of Buddha Dhamma. I did that so that one would see the outline. Of course, more explanations are needed to clarify them.
- We will gradually clarify those concepts.
- The way to do that is to realize that we CAN experience the early stage of “cooling down” by gradually reducing *lobha*, *dosa*, *moha* to the *rāga*, *paṭigha*, *avijjā* AND trying to maintain them there without re-elevating to the *lobha*, *dosa*, *moha* levels.
- **A single Pāli word** captures *lobha*, *dosa*, *moha* (and the reduced versions of *rāga*, *paṭigha*, *avijjā*.) That word is “*saṇ*.” See details in the section on “*San*.”

Sandiṭṭhikam Nibbānam* – One Needs to “See Defilements” to Get to *Nibbāna

3. One first needs to “see defilements” or “see ‘*saṇ*’” (*saṇ diṭṭhika*) to be able to see the path to *Nibbāna*.

- That is why the Buddha Dhamma is “*sandiṭṭhika*.” In the verse that points out the virtues of Buddha Dhamma, “*..bhagavatā dhammo sandiṭṭhiko akāliko ehipassiko opaneyyiko paccattam veditabbo viññūhīti*” it is one of the qualities that makes Buddha Dhamma unique.
- **One can experience the first stages of *Nibbāna* (cooling down of the mind) by “seeing the dangers of ‘*saṇ*’ and gradually getting rid of them.**
- That is the *Nibbāna* that can be experienced in this life! It is easily reached, especially if one can see the drawbacks of “*saṇ*” (greed, anger, delusion.)

4. That is what the Buddha explained to Jāṇussoṇi in the “[WebLink: suttacentral: Nibbuta Sutta \(AN 3.55\)](#).” A reasonable English translation is “[WebLink: suttacentral: Nibbāna \(AN 3.55\)](#).”

- Jāṇussoṇi asks the Buddha, “Master Gotama, it is said: ‘Directly visible *Nibbāna*, directly visible *Nibbāna*.’ In what way is *Nibbāna* directly visible, immediate, inviting one to come and see, applicable, to be personally experienced by the wise?”
- As explained there, a mind with **greed**, **hate**, and **delusion** (ignorance about the real nature) “..experiences mental suffering and dejection.”
- Thus if one can see the bad consequences of **greed, hate, and delusion (or ‘*saṇ*’)**, one can reduce those and reach a “better state of mind.” It is a “cooled state of mind” with less agitation and would not experience depression.
- In particular, it is easy to recognize when greed and anger arise in one’s mind. The one should make an effort to control them. **That is the basis of *Ānāpāna* and *Satipaṭṭhāna* meditations:** “being mindful.”
- That is why *Nibbāna* is directly visible AND can be experienced in this life itself!

***Ādittapariyāya Sutta* (The Fire Sermon) Is About the “Fire in a Mind”**

5. An English translation is at “[WebLink: accesstoinsight.org: Ādittapariyāya Sutta \(The Fire Sermon\)](#).” As with all English translations, it is a ‘word-by-word’ translation without clarifying what is meant by that “fire.” (see other translations at Sutta Central: “[WebLink: suttacentral: Āditta Sutta \(SN 35.28\)](#)”)

- It says, “The **eye** is burning, **forms** are burning, **eye-consciousness** is burning, **eye-contact** is burning, also **whatever is felt** as pleasant or painful or neither-painful-nor-pleasant that arises with eye-contact for its indispensable condition, that too is burning.” **That may not make sense if one does not see**

that it is **ATTACHMENT TO those 5 things that LEADS to “fires in the MIND.”** Those 5 are associated with “seeing.”

- Even the direct translation says, “Burning with what? Burning with the **fire of lust**, with the **fire of hate**, with the **fire of delusion**.”
- Such 5 types of “sources of fire” arise with the other senses: hearing, tasting, smelling, body touches, and the mind itself.
- But all those 30 “sources of fire” ALWAYS lead to “fires in mind.” We MUST note that all 30 types of sensory experiences register in the mind!
- It is the MIND that will burn (sooner or later) due to the actions one takes (*kamma* via *saṅkhāra*) with the desire for seeking pleasures with “seeing.”
- Some of that “burning” will materialize later in this life or even in future lives. **That “potential to bring suffering” is deposited as “kammic energy,” and that is also the same as “bhava” (cause for future suffering)!** That is a hard part of understanding. But we will get to that.

“Burning” (*Tāpa*) Has Root Cause in *Rāga* (Greed) and *Dosa* (Anger)

6. We attach to things that we like. This “attachment” is described in several ways by the Buddha: *icchā*, *taṇhā*, *nandī*, *piya*, *kāma*, etc. When exposed to such ‘likable things’ in this world, we become joyful and try to get more of them, even using immoral deeds. Therein lies the problem.

- Those things in this world that lead to such attachment and joyful feelings are called “things with *kāmaguṇa*” or “characteristics/sources of *kāma*.” We will discuss that soon.
- Even though they may provide temporary joy, they always lead to “heat/burning” (*tāpa*) in mind.
- The word “*tappati*” in the *Dhammapada* verse in #10 refers to a mind that is “heated/burning.”

Rāga and *Dosa* – Two Faces of a Coin

7. *Rāga* and *dosa* are like the two faces of a coin, and the coin itself is *moha* (*avijjā*.) As long as *avijjā* is there, *rāga* OR *dosa* can arise.

- *Dosa* (anger/hate/dislike) is the opposite of *rāga* (and *lobha*.) There are things that we don’t like in this world. Furthermore, we also dislike/hate people who get in our way in our efforts to seek more sensory pleasures.
- We tend to evaluate external objects (people or objects) based on their ability to provide us with enjoyment/happiness or whether they appear ugly/distasteful/tend to get in our way. **Thus, we tend to put anything into one of those two categories:** like/dislike. This is due to the root cause of *moha*. This explicit “measuring” or ‘evaluation’ is “*māna*.”
- We do that “measuring” with the perception of “me” and trying to decide what will enhance “my enjoyment” and minimize “my displeasure.” That is because of our *avijjā* or ignorance that such behavior will ONLY lead to future suffering.

Moha Is the Root Cause of *Rāga* and *Dosa*

8. Sometimes, the mind becomes uncertain (*vicikicchā*) about what to do. At other times, it becomes perturbed/excited (*uddhacca*) due to uncertainty about something. In such cases, only *moha* (or *avijjā*) is present.

- In other words, *moha* is the root cause of *rāga*, *dosa*, and all other *asobhana cetasika*.

- Furthermore, the deepest level of *moha* is in *māna*, *uddhacca*, *avijjā*. Those are removed only at the *Arahant* stage. It is one of the last five *Samyojana* (bonds to the *saṃsāric* process) of *rūpa rāga*, *arūpa rāga*, *māna*, *uddhacca*, *avijjā*.
- By the way, *kāma rāga* is removed at the *Anāgāmi* stage. When one becomes an “*Arahant Anugāmi*” at the next level, one loses *rūpa rāga* and *arūpa rāga*. It is only at the *Arahant* stage that one removes the last three: *māna*, *uddhacca*, and *avijjā*. Here, *māna* and *uddhacca* are the last traces of *rāga* and *dosa* left. *Avijjā* is the last trace of *moha* removed that breaks ALL bonds to the rebirth process (*saṃsāra*.)

Avijjā and Taṇhā Go Together!

9. Because of our unwise perception of a “me,” we tend to attach to some things (*rāga*) and try to stay away from other things (*dosa*.) Either way, we are ‘mentally bound’ to both types. We tend to think about ways to get likable things closer and to keep unlikable things away. Thus, *taṇhā* is involved in both cases. See, [“Taṇhā – How We Attach Via Greed, Hate, and Ignorance.”](#)

- It is impossible to get rid of *taṇhā* as long as we do not comprehend the real nature of this world explained by the Buddha and thereby get rid of *avijjā*.
- The first step towards that understanding is to live a moral life and cleanse the mind. That will enable one to comprehend this ‘previously unheard’ Dhamma: **Why sensory pleasures (*kāma*) WILL invariably lead to future suffering.**
- Therefore, we need to get to the next step of understanding *dasa akusala* and *dasa kusala*.
- Don’t worry too much about all these Pāli terms. They will become clear as we discuss further. There is no need to memorize. If you understand the concepts, they will become familiar.

Dasa Akusala and Dasa Kusala

10. The path to *Nibbāna* is to avoid immoral deeds or *dasa akusala* (“[Ten Immoral Actions \(Dasa Akusala\)](#)”) and to engage in meritorious deeds or *dasa kusala* (“[Dasa Akusala/Dasa Kusala – Basis of Buddha Dhamma.](#)”)

- The **drawbacks** of *dasa akusala* succinctly stated in the following *Dhammapada* verse:

Idha tappati, pecca tappati, Agony now, agony hereafter,
pāpakārī ubhayattha tappati. The wrong-doer suffers agony in both worlds.
“Pāpaṃ me katan”ti tappati, Agonized now by the knowledge that one has done wrong,
bhiyyo tappati, duggatim gato. one suffers more agony when gone to a state of woe.

- In the same way, the **benefits** of *dasa kusala* will be evident in this life and future lives:

Idha nandati, pecca nandati, Rejoicing now, rejoicing hereafter,
katapuñño ubhayattha nandati. The doer of wholesome actions rejoices in both worlds.
“Puññaṃ me katan”ti nandati, Rejoicing now in the knowledge that one has acted morally,
bhiyyo nandati, suggatim gato. one rejoices more when gone to a state of bliss.

- We will discuss the relationship of *rāga*, *dosa*, *moha* to *dasa akusala* and *dasa kusala* in the next post in this series.
- Before that please make sure to read the two posts: “[Lobha, Rāga and Kāmacchanda, Kāmarāga](#)” and “[Lobha, Dosa, Moha Versus Rāga, Patigha, Avijja.](#)” It is necessary to grasp the meanings of those various Pāli terms before reading the next post in this series.

9.3.2 Pañca Nīvaraṇa and Sensual Pleasures (Kāma)

February 28, 2021; revised March 1, 2021 (link in #1 revised, #8 and #9 re-written); July 17, 2021

Pañca Nīvaraṇa (Five Hindrances) are defilements that “cover the mind” and make the mind agitated or lethargic and susceptible to make bad decisions. Craving for sensory pleasures is the root cause for the covering of the mind.

Why Are They Called “Hindrances”?

1. These five are indicators for “mental states.” When they become elevated, one can easily make “bad decisions.” Furthermore, it is difficult for a mind to focus on any subject or comprehend new concepts with the five hindrances at high levels.

- *Pañca nīvaraṇa* does not cover a mind all the time. They can be triggered under the influence of temptations.
- In such instances, one could be tempted to engage in *dasa akusala* to ANY extent, depending on the temptation level. One may even do strong immoral deeds (*pāpa kamma*) that make rebirth in the *apāyās* possible.
- The possibility of *pañca nīvaraṇa* arising will permanently go away when one attains the *Sotāpanna* stage.
- That is why a *Sotāpanna* is permanently released from the *apāyās*.
- However, getting to the *Sotāpanna* stage REQUIRES **seeing (or understanding) that craving for sensory pleasures (kāma) is the root cause of all suffering**. Of course, even after “seeing” it correctly (i.e., removing the wrong vision) a *Sotāpanna* would still enjoy sensual pleasures because he had not removed the wrong perception (*saññā*).

What Is the “Previously Unheard Dhamma (Teachings)?”

2. The Buddha, in his first discourse, declared that his teachings had not been known to the world (in the absence of another Buddha.) That is the meaning of the verse, “*Idam dukkham ariyasaccan’ti me, bhikkhave, pubbe ananussutesu dhammesu.*” OR “*bhikkhus*, this is the noble truth of suffering **that was not heard before..**” **That highlighted part of the verse appears 12 times in the *sutta*** (3 times each for the Four Noble Truths)!

- The “previously unheard teaching” is that even though sensory experiences can provide short-lived pleasures, they ALWAYS lead to suffering in the long-term (during this life and especially in the rebirth process.)
- **The root cause for that suffering is the wrong view/perception of a “me” or *sakkāya diṭṭhi***. That view/perception, in turn, arises because of the perceived “pleasure” in sensory experiences.
- We attach to worldly pleasures (with *icchā/taṇhā*) with that wrong view AND perception BECAUSE we think they can provide long-lasting happiness. **But the Buddha explained that there is hidden suffering in those pleasures.** See the previous posts in “[Sakkāya Diṭṭhi and Paṭicca Samuppāda.](#)”
- Upon attaining the *Buddhahood*, the Buddha was able to see the minds of countless living-beings and was first discouraged that most of them would not be able to comprehend his teachings. Then he realized that some have the ability to comprehend his deep Dhamma.

Kāmato Jāyatī Soko – Kāma Is a Root Cause of Suffering

3. “[WebLink: tipitaka.net: Dhammapada Verse 215](#)” provides the key idea:

Kāmato jāyatī soko, **From desire,** arises grief,

kāmato jāyatī bhayaṃ; from desire arises fear;
Kāmato vippamuttassa, Completely free from desire,
natthi soko kuto bhayaṃ. there is no grief; how can there be fear?

- The above verse is the 7th verse in that link. The verses 4th through 8th are the same verses with **synonymous words** for *kāma*: *piya*, *pema*, *rati* (pronounced “rathi”), and *taṇhā*. We have discussed that *icchā* is also the same as *taṇhā*. In English, we can use words like desire, attachment, craving, liking, etc., to express the same meaning.
- There are pleasurable experiences. Those are NOT *kāma*. More details at, “[What is “Kāma”? It is not Just Sex.” It is critical to read that post.](#)”
- The desire to accumulate more such experiences is *kāma*. That desire has no bounds. If temptations are high enough, we may take extreme immoral actions to fulfill such desires. That is when we get into trouble. But the key is to figure out how to stop such temptations. That CANNOT be done with willpower.
- With that in mind, let us look into *pañca nīvaraṇa*.

What Are *Pañca Nīvaraṇa*?

4. *Pañca nīvaraṇa* are: *Kāmacchanda*, *vyāpāda* (or *byāpāda*), *thina-middha*, *uddhacca-kukkucca*, and *vicikicchā*. See “[Āvarananīvaraṇa Sutta \(SN 46.38\).](#)”

- In the *sutta*, the Buddha used two words, “*āvaraṇā*” and “*nīvaraṇā*” to describe these five. The word “*āvaraṇā*” means “to cover (the mind.)” When the mind is covered, it cannot grasp Buddha’s teachings, and thus *Nibbāna* (or cooling down) is prevented (the meaning of “*nīvaraṇā*.”)
- When a mind is “covered,” one cannot clearly see the consequences of one’s actions. It is like looking through a fog. One cannot see what lies ahead.
- Removing *pañca nīvaraṇa* from one’s mind is like lifting a fog. One can see far ahead with much clarity.
- But how do those 5 things cover a mind? We need to figure that out before we can remove them.

Kāmacchanda Is the Main *Nīvaraṇa*

5. *Kāmacchanda* is stronger than *kāma rāga*. It is like *lobha* but focused on *kāma*.

- *Kāmacchanda* is the highest level of attachment. Here one is willing to do abhorrent acts (killing, raping, etc.) to satisfy one’s desires.
- When *kāma* rises to the *kāmacchanda* level, one becomes unaware of the bad consequences of one’s actions. ***Kāmacchanda* comes from *kāma* + *icchā* + *anda*, or “being blinded by sensory attractions.”** Here, “*icchā*” is liking, and “*anda*” is blind.
- It is said that “one loses one’s mind” when blinded by attachment to sense pleasures, i.e., one cannot think rationally when one has *kāmacchanda*.
- See, “[Lobha, Rāga and Kāmacchanda, Kāmarāga.](#)”

Vyāpāda Is a Consequence of *Kāmacchanda*

6. The second *nīvaraṇa*, *vyāpāda*, arises because of *kāmacchanda*. But it is a different manifestation. Instead of becoming lustful, one becomes hateful and angry.

- That anger arises when one is prevented from satisfying one’s desire for sensual pleasures. *Paṭigha* (or displeasure) is a lower level of *vyāpāda* and is not a *nīvaraṇa*. One does not do “*apāyagāmī* deeds” with *paṭigha*.

- We have heard about people killing others to get their wealth or their spouses or other loved ones. That happens when one's mind becomes overwhelmed with *kāmacchanda*.
- *Dosa* (or *dvesha* in Sanskrit or Sinhala) is the ANGER that arises based on initial *lobha*. Here, *dvesha* comes from “*devana*” + “*vesha*” — දෙවන වෙශය — or second manifestation of *lobha*. We get angry when someone else is in the way of getting what we want. This statement is from “[Lobha, Dosa, Moha versus Rāga, Patigha, Avijjā](#).”
- With *dosa*, one will inevitably take a “downward path.” That is the meaning of *vyāpāda* (“*vaya*” or “downward”+ “*pāda*” or “direction.”) Thus, *vyāpāda* is the same as *dosa*.

Other Three Nīvaraṇa Also Have Roots in Kāmacchanda

7. When one gets attached to sensory pleasures, one's mind becomes dull (Pāli word is *thīna*.) Because of that, the mind gets stuck (*middha*.)

- Thus, *thīna-middha* refers to a mind that has become lethargic and stuck. Such a mind would not be able to focus on anything, let alone difficult concepts. A good example is those addicted to watching movies, TV, sports, etc., all day. Their minds are stuck. Some people forget even to eat.
- A different manifestation is *uddhacca-kukkucca*. Here, one becomes “high-minded” (*uddhacca*) with perceived wealth or power and starts doing lowly deeds (*kukkucca*.) For example, a powerful politician or a wealthy person may engage in “lowly deeds” like bribery, rape, etc.
- A mind is susceptible to cravings for sensory pleasures because it has no true faith in Buddha Dhamma. It is not certain that the concepts in Buddha Dhamma are correct. For example, there are doubts about the laws of *kamma* or rebirth. Having such doubts is *vicikicchā*. Such doubts will go away only when one comprehends the Four Noble Truths.
- Further details at, “[Key to Calming the Mind – The Five Hindrances](#).”

Noble Truth on Suffering – Kāma Is the Root Cause of Suffering

8. A key aspect of comprehending Noble Truths is to see that *kāma* (craving for sensory pleasures) is the root cause of future suffering.

- It is embedded in the verse that describes the root cause of suffering: “*yampicchaṃ na labhati tampi dukkhāṃ*” (“*Yam pi icchaṃ na labhati tam pi dukkham*.” See, “[Essence of Buddhism – In the First Sutta](#).”
- “*Yam pi icchaṃ*” means “whatever is **liked or craved** for.” “*Na labhati*” means “not getting,” “*tam pi dukkham*” means “that leads to suffering.”
- Therefore, that verse simply says: “If one does not get **what one craves or likes**, that leads to suffering.”
- Note that *kāma* arises due to *icchā*.

Importance of Getting Rid of Micchā Diṭṭhi

9. *Micchā Diṭṭhi* has TWO levels. Not knowing that *kāma* is the root cause of suffering is the **deeper level of micchā diṭṭhi**.

- First, one needs to get rid of the 10 types of wrong views that include not believing in the laws of *kamma* and rebirth. The deeper level of wrong views is removed when one becomes a *Sotāpanna* and realizes that attachment to worldly things only leads to future suffering, i.e., understand the Four Noble Truths.
- That deeper level of *micchā diṭṭhi* starts fading away when one becomes a *Sotāpanna*. At that point, ALL FIVE *nīvaraṇa* are removed permanently.

- **An average human (*puthujjano*) thinks exactly the opposite way;** That one should live FOR sensory pleasures. That is why it is so hard to change that ingrained mindset. But it is not that different from the mindset of a fish who only thinks about the tasty bait and does not see the hidden dangers in biting into that tasty bait.

9.3.3 What is “Kāma”? It is not Just Sex

Revised October 31, 2017; revised December 18, 2018 (#13, #14); February 28, 2021 (major revision); March 5, 2021

Kāma means “*saṅkappa rāga*” or “thinking about and planning to enjoy more sensual pleasures.” Another related meaning is “giving priority to mind-made pleasures.”

Kāma* Is Assigning High Value for Sensory Pleasures in *Kāma Loka

1. “*Kāma*” comes from “*kā*” meaning “eat or destroy” and “*ama*” means *Nibbāna*. In our human world, which is a part of “*kāma loka*,” temptations for staying away from *Nibbāna* come from five physical senses.

- Some people believe “*kāma*” is just about engaging in sex. Some others believe attractive sense objects are “*kāma*” objects, and those lead to defilements. Both are not correct.
- While “attractive sense objects” can lead to “*kāma assāda*” or “mind-made pleasures”, the objects themselves don’t have *kāma*. An *Arahant* is not tempted by any such object. But an *Arahant* would eat a delicious meal offered, but would not crave such meals.
- Furthermore, an *Arahant* gets to that stage by learning and contemplating *Dhamma* (cultivating wisdom) and NOT by living a harsh life.
- The lowest 11 realms are collectively called “*kāma loka*” because all such made-up pleasures are available through all five physical senses in those realms.

Sensory Experiences are Not *Kāma*

2. This is a critical point to understand. There are sensory contacts that naturally bring pleasurable FEELINGS. For example, eating a cake or smelling a rose gives a pleasurable feeling. That experience itself is not *kāma* or *kāma rāga*.

- Rather, it is the DESIRE to enjoy more of those sensory experiences is *kāma*. That is why the word “*icchā*” and “*taṇhā*” are closely associated with *kāma/kāma rāga*.
- In the “[WebLink: suttacentral: Na Santi Sutta \(SN 1.34\)](#),” the Buddha defined “*kāma*” as that second kind mentioned above: “*Na te kāmā yāni citrāni loke, Saṅkapparāgo purisassa kāmo..*”.

Translated: “World’s pretty things are not *kāma*, **a person creates his/her own *kāma* by generating mind-made pleasures (*rāga saṅkappa*)..**”.

- Buddha said that this world has many attractive pictures, sounds, tastes, smells, and touches. But those are not “*kāma*.” The initial sense experience could be pleasant, but it is a *kamma vipāka* (no *saṅkhāra* generated in the initial sense input).
- When one attaches to such a sensory experience and **keep thinking about them**, one makes “*saṅkappa rāga*” (සංකප්ප රාග in Sinhala) about it (by generating *vacī* and *kāya saṅkhāra*), that is “*kāma*.” Each person generates his/her own *kāma* based on his/her *gati* or *saṁsāric* habits/cravings.

Saṅkappa Rāga* Is *Kāma

3. We experience those external sensory inputs in two ways:

- **We experience them directly:** For example, we see a person; hear a song; taste a piece of cake; smell a fragrance; someone we love gives a kiss. Those are actual sense contacts and **are due to *kamma vipāka***.
- But then we tend to re-live that experience over and over in our MINDS. You may be surprised, but most of our “sense pleasures” or “*kāma assāda*” are created by our minds. A sensory contact comes and goes away relatively quickly; but we keep thinking about it, sometimes for hours. **This “*kāma assāda*” is the one that we CREATE IN OUR MINDS, via *vacī saṅkhāra***.
- For example, we may just see an attractive item in a store display that provides sensory pleasure while we are looking at it for a few seconds.
- But then we start thinking about how nice it would be to be able to buy it, enjoy it, and analyze how to go about paying for it, etc. We may be thinking about it for several days. Please take the time and contemplate this point.
- The initial sense contact of several seconds led to hours of thinking about it and making up “additional pleasure.” That is *kāma assāda*.

What Are *Saṅkappa*?

4. Let us discuss what is meant by “*saṅkappa rāga*”: *Saṅkappa* means thoughts. *Rāga* means giving a high-priority (craving) for pleasures in *saṁsāra*; see, “[Lobha, Rāga and Kāmacchanda, Kāmarāga](#).”

- Thus “*saṅkappa rāga*” means thinking about such sense pleasures and giving priority to them. We tend to think for hours about an actual sensory experience that we enjoyed in the past or one that we are about to experience in the future.
- Sometimes we also think for hours about how to enjoy a certain sense experience that seems out of reach for various reasons. In all these cases, we can spend hours and hours thinking about them and getting *kāma assāda* (or “*āsvāda*” in Sinhala) from it.
- In fact, most times sexual enjoyment comes from just thinking about a past experience or an anticipated one. The actual contact pleasure is relatively short-lived.

Pleasurable Sensory Experiences Due to Good *Kamma Vipāka*

5. As we pointed out in #3 above, **some actual sense contacts** arise due to *kamma vipāka* (good *kamma vipāka* lead to good sense experiences and bad lead to bad). Those are not *kāma* or *kāma assāda*.

- Even an *Arahant* experiences such sense experiences due to *kamma vipāka*, both good and bad. He/she may eat tasty food when offered, ride in a luxurious car, or see eye-catching pictures while on the road.
- But he/she will not keep thinking about how to enjoy such sense experiences, i.e., there is no “*saṅkappa rāga*.”

6. It is relatively easy to distinguish between sense pleasures due to *kamma vipāka* and those due to *kāma assāda*.

- When one is offered a tasty meal, for example, that is due to a previous good *kamma*, i.e., it is a *kamma vipāka*. But when one starts thinking how good that meal was and starts thinking about how to enjoy another such meal, that is *kāma assāda*.
- In the same way, one may be born to a wealthy family and get all types of luxurious sense contacts, those are *kamma vipāka*.
- Whether rich or poor, when one is thinking about acquiring and enjoying new sense pleasures or reminiscing on past sense pleasures, that is *kāma assāda*.

What Is Wrong With *Kāma Assāda* or *Saṅkappa Rāga*?

7. Now we have two questions.

A. Why is it OK to experience direct sense pleasures that **naturally comes** one's way, but not good to enjoy "made-up mental pleasures" by thinking about them? (It is important to realize that even those direct sense pleasures INITIATED by oneself do not count as harmless; when we think about it a bit, we realize that such instances have their beginnings at "*saṅkappa rāga*," i.e., one must have thought about to initiate it).

B. How can one experience an enjoyable sensory pleasure and not be "tempted by it", i.e., not make "*saṅkappa rāga*"?

8. The answers to those two questions can be found in one explanation. But that requires analyzing the situation from a different vantage point than we are used to. This is the "Dhamma that has never been known to the world.." or "*pubbe anamussutesu Dhammesu..*".

- The *akusala-mūla Paṭicca samuppāda* cycle starts with, "*avijjā paccayā saṅkhāra*." Those "made-up mental pleasures" or "*kāma assāda*" are precisely what *saṅkhāra* are. These have bad consequences, or *ādinava*, through the rest of the *Paṭicca samuppāda* (PS) cycle: "*saṅkhāra paccayā viññāṇa*," "*viññāṇa paccayā nāmarūpa*,.....up to "*jāti paccayā jarā, maraṇa, soka, parideva*,...". Thus the endpoint is suffering.
- When we experience a "direct sense contact" that naturally comes our way, that is not *saṅkhāra* or *kāma assāda*. That is a *kamma vipāka*. They do not lead to future suffering.
- In other words, *saṅkhāra* in "*avijjā paccayā saṅkhāra*" is *saṅkappa rāga*. They eventually lead to suffering. That is the hard point to understand.

Early Comprehension – Agitation of the Mind Due to Excess "Sensory Pleasures"

9. Now, one could say, "well, the more such *saṅkappa rāga* that I make, it is better. I don't mind if the mind gets many such *assāda* in a given time."

- In order to analyze that, we need to look at the *ādinava* (bad consequences) of such *assāda*, other than the mind being pushed and pulled in many directions as we discussed in the previous bullet.
- If you watch too many movies/ TV shows or play video games all day, your mind will be agitated. You may not get a good sleep. This is the key reason for the scattered-ness of our minds. This is called *tāpa* or "heat in the mind"; see, "[Satipatthāna Sutta – Relevance to Suffering in This Life.](#)"
- The problem is that each time we enjoy *kāma assāda*, we do (*abhi*)*saṅkhāra*, as we saw above. They lead to future suffering via the *akusala-mūla Paṭicca samuppāda* cycle. This is what we have been doing in countless births up to now.

10. That future suffering can arise both in this life as well as in future lives. It can materialize at different levels depending on the "strength of the *kāma assāda*."

- Let us start at the most extreme level. One decides that "I have to have this. I am going to do whatever it takes to get it." With such a mindset one can kill, steal, engage in sexual misconduct, lie, or make any number of other immoral acts with a "drunken mind" or a "covered mind."
- Of course, the bad consequences are many, even during this life. One could get caught and go to jail. Even otherwise, one will be under the constant stress of worrying about being caught.
- But stronger consequences will follow in future lives as well, with interest. Thus a normal moral person can see the "*ādinava*" in such strong *kāma assāda*.

- By contemplating on such “*ādīnava*,” it becomes easier for one’s mind to automatically reject doing such acts. That is “*nissaraṇa*.” Through an understanding of the consequences, one avoids such acts.

Long-Term Consequences of Craving “Sensory Pleasures”

11. At the next level, we may not do any of the immoral acts by body or speech, but may still accumulate *vacī saṅkhāra* via constantly thinking about them. It is important to realize that such conscious thoughts (*vitakka/vicāra*) are included in *vacī saṅkhāra*; see, “[Correct Meaning of Vacī Saṅkhāra](#).”

- The problem with *vacī saṅkhāra* or *kāma assāda* is that they are addictive. One can spend hours and hours enjoying past sense events of perceived future events (especially involving sex, food, and also about one’s enemies).
- And *vacī saṅkhāra* or *kāma assāda* appear to be harmless. No one else can know about them. One could spend hours on end generating *kāma assāda* about an object of interest and derive enjoyment. But they have consequences.
- It must also be remembered that all those *kāya saṅkhāra* and *vacī saṅkhāra* that one suppressed by one’s will power started off as *mano saṅkhāra* (thoughts that just come to one’s mind) and then one normally “keeps going” by generating CONSCIOUS deliberate thoughts or *vacī saṅkhāra*, which can lead to actual speech and even bodily actions.
- Thus even though *dasa akusala* corresponding to speech and bodily actions were avoided, those due to *vacī saṅkhāra* (*kāma assāda*) would still count as bad *kamma*.
- This is why keeping the conventional five precepts is not sufficient; the hard part is to purify one’s thoughts or the mind; see, “[The Five Precepts – What the Buddha Meant by Them](#).”

Connection to *Āsava* and *Anusaya*

12. A key problem with *vacī saṅkhāra* or the *kāma assāda* is that they lead to the formation of bad habits (*gati*), which in turn lead to the formation of new *āsava/anusaya* or in strengthening old *āsava/anusaya*; see, “[Āsava, Anusaya, and Gati \(Gathi\)](#),” and other related posts.

- It can become a vicious circle. In a way, this is the “wheeling process” of “*riya*” that sustains the cycle of rebirths; see, “[Nibbāna – Is it Difficult to Understand?](#).”
- Even though *vacī saṅkhāra* (*abhijjhā, vyāpāda, micchā diṭṭhi*) seem to be harmless, those can lead to birth in the *apāyā*.
- When one starts controlling such conscious thoughts (*vacī saṅkhāra*), one *gati* will gradually change, and then those “automatic bad thoughts” or *mano saṅkhāra* will become less and less frequent because one’s *āsava/anusaya* will gradually reduce.
- The best and permanent way to change *āsava/anusaya* is to comprehend *anicca, dukkha, anatta*. When one realizes that “nothing in this world can be maintained to one’s satisfaction in the long run” (*anicca*), one’s mind automatically stops thinking about such “made up pleasures.”

13. Connection to *pañca nīvaraṇa* discussed at, “[Pañca Nīvaraṇa and Sensual Pleasures \(Kāma\)](#).”

- All relevant posts at, “[Paṭicca Samuppāda – Essential Concepts](#).”

9.3.4 Icchā, Taṇhā, Kāma – Root Causes of Suffering

March 7, 2021; March 8, 2021 (#2, #3)

An average human sees and perceives sensual pleasures are to be pursued. The Buddha taught that craving for sensual pleasures is the root cause of suffering. However, sensual pleasures can be experienced without having cravings for them.

Difference Between *Kāma* and Sensory Pleasures

1. As we discussed in the post, “[What is “Kāma”? It is not Just Sex](#),” there is a huge difference between *kāma* and “good sensory experiences.”

- *Kāma* is the DESIRE/CRAVING to enjoy more of those sensory experiences. That is why the word “*icchā*” and “*taṇhā*” are closely associated with *kāma* and *kāma rāga*.
- Wealthy people, including Kings, offered the Buddha tasty meals. *Jetavanārāma*, where the Buddha lived for many years, was built like a palace.
- Of course, the Buddha decided to spend the last several months of his life traveling, even while suffering some ailments. He could have stayed in *Jetavanārāma* or one of many such temples. He probably wanted to illustrate the suffering that he himself was experiencing in his old age.
- The Buddha's main message was that one would not be free of future suffering as long as one does not see the long-term bad consequences of sensory pleasures. But, one needs to get there in a step-by-step way. It is impossible to give up sensory pleasures willfully. One MUST first SEE the bad consequences of craving sensory pleasures.

The Analogy of a Drunkard

2. Let us consider person X an alcoholic. He likes to drink whenever he gets a chance because it is a pleasurable experience for him.

- When X goes to a physical exam, he is asked about his alcohol consumption. Upon hearing how much X drinks, the physician advises him to cut down on drinking.
- Yet, X has a hard time getting rid of the habit. He tries hard to “cut down,” but he is back to his routine drinking after a few days.
- One day, he experiences severe abdominal pain and swelling. When admitted to the hospital, his physician takes a scan of his liver and explains to him that it has been damaged and that except for the brain, the liver is the most complex organ in the body. The physician explains that he will have serious health problems soon unless he stops drinking.

(i) Now, for the first time, X “sees” the dangers in drinking alcohol and can cut down his drinking habit drastically. He has lost “*diṭṭhi vipallāsa*” or “wrong/distorted **views**” regarding drinking.

(ii) After a year, X goes for a checkup, and the physician asks him about his drinking habit. X says he does not drink as much as he used to because he is afraid of dying at a young age. But he says he still likes to drink and would have a drink when the urge becomes too strong. He still has “*saññā vipallāsa*” or “wrong/distorted **perceptions**” regarding drinking.

- The doctor gives the following advice: (i) keep contemplating on the dangers of damaging his liver and (ii) also keep contemplating on the relief that he has gained by stop drinking (no more abdominal pain/swelling, etc.), (iii) don't associate with those who like to drink, (iv) associate with those who don't drink in excess.
- Following the advice of the physician, X gradually loses his desire to drink. After several months, he realizes that the desire to “have a drink” is not there anymore. Now he has lost “*saññā vipallāsa*” regarding drinking as well.

The Similarities in the Noble Path

3. Humans (and all living beings) are like the alcoholic X in the analogy in #2 above. They can only see the “immediate pleasures” that mind-pleasing things in this world provide.

- The Buddha is like the physician who can see the dangers of that mindset. But it is hard to convince an average human that craving those “mind-pleasing things” can be not only unfruitful but also WILL HAVE dangerous consequences in the future.
- A *Sotāpanna* learns the dangers of *kāma assāda* from a true disciple of the Buddha (an *Ariya*.) That transition to the *Sotāpanna* stage happened when he started “seeing” the dangers of *kāma assāda*.
- **There is one difference between the two cases:** Unlike the physician who was able to take a scan of the damaged liver and convince X of the dangers, it is harder to explain the dangers to those who don’t even believe in rebirth. However, once that stage is reached, the similarities are there as below.

(i) A *Sotāpanna* “seeing the dangers in craving sensory pleasures” is similar to X, who started “seeing the dangers in heavy drinking.” **He has now removed *diṭṭhi vipallāsa*** about “sensual pleasures.”

- **There is a second difference between the two cases:** While it is possible for X to “lose his willpower” and to go back to his “old ways” of being an alcoholic, the mindset of a *Sotāpanna* WILL NEVER change, even in future lives.

(ii) Analogous to X, a *Sotāpanna* still has **not removed the MINDSET (*saññā vipallāsa*)** that sensory pleasures can provide “enjoyment.” Of course, he/she will not engage in immoral deeds to experience such sensory pleasures.

- Similar to X, a *Sotāpanna* should contemplate the drawbacks of craving worldly pleasures (i.e., contemplate *anicca*, *dukkha*, *anatta* nature or engage in *aniccānupassanā*, *dukkhānupassanā*, *anattānupassanā*) and associate with like-minded people striving for *Nibbāna*.
- As he contemplates the drawbacks of craving worldly pleasures, *saññā vipallāsa* fades away and one day he/she **attains the *Anāgāmi* stage** by completely eliminating *saññā vipallāsa*. After that, any desire for sensual pleasures will be gone.
- Many people have a hard time understanding the difference between *diṭṭhi vipallāsa* and *saññā vipallāsa*. I hope the above analogy is useful.

Difference Between *Kāmacchanda* and *Kāma Rāga*

4. Another way to express the above is the following. A *Sotāpanna* has removed *kāmacchanda*, but *kāma rāga* remains. When *diṭṭhi vipallāsa* is removed, one would NOT be “blinded” by sensual pleasures, i.e., *kāmacchanda* removed. But the tendency to like sensual pleasures (*kāma rāga*) remains because *saññā vipallāsa* is still there.

- Thus, a *Sotāpanna* can live the normal life of a householder. He/she can be married and bring up a family.
- **Only when *kāma rāga* intensifies may one be tempted to engage in activities harmful to others and oneself.** That becomes likely when one drinks too much alcohol or takes drugs. A *Sotāpanna* would instinctively abstain from such activities.
- Association with “bad friends” could make an average person engage in harmful activities. For example, hunting and fishing are immoral activities to be abstained from. Such activities are considered to be accepted “sports activities,” and many people engaged in such activities without realizing the dangers. Such activities fall under the “*vihimsā*” category (hurting other living beings for one’s pleasure) in Buddha Dhamma.
- Note that *vihimsā* is different from *vyāpāda*. With *vyāpāda*, one does immoral deeds with anger/hate. Actions with *vihimsā* are done with ignorance (*avijjā*).

Jhāna Correspond to Mindset of *Brahmas* Who Have Overcome *Kāma*

5. One is born in *Brahma* realms when one has cultivated *jhāna*. To cultivate *jhāna*, one must overcome *kāma* at least temporarily.

- Thus, one must at least temporarily suppress *kāma rāga* to cultivate *jhāna*. In fact, one MUST abstain from *kāma*, *vyāpāda*, and *vihiṃsā saṅkappa* (i.e., abstain from thoughts involving sensual, angry, or otherwise harmful thoughts towards other living beings).
- This is why a *Brahma* in any *Brahma* realm is free of *kāma rāga*, *vyāpāda*, and *vihiṃsā* thoughts during that *Brahma* existence. But unless they have attained *magga phala*, they have all three “hidden” or “temporarily suppressed” during that existence (as *anusaya*.)
- That is just a “side-track” to show the connection to *jhāna*.

Difference Between an Average Human and a Noble Person

6. The following table shows what we discussed above in summary form. The first and second columns show an average human and a Noble Person (*Ariya*). The four rows for the Noble Person depict the Four Noble Truths, as indicated by the third column.

Average Human	Noble Person	Four Noble Truths
<i>Kāma</i> (sensual experiences) are valuable.	Sensual experiences are empty of value and are suffering.	First Noble Truth (What suffering is)
Pursuing <i>Kāma assāda</i> is beneficial.	Pursuing <i>Kāma assāda</i> leads to suffering.	Second Noble Truth (root cause of suffering)
Not having enough sensual pleasures is suffering.	Future suffering stopped by losing cravings for <i>kāma</i> .	Third Noble Truth (stopping future suffering)
Noble Eightfold Path is not pleasurable.	Noble Eightfold Path is the way to stop suffering (i.e., to lose cravings for <i>kāma</i>).	Fourth Noble Truth (the way to eliminate suffering)

- The **First Noble Truth** states what suffering is. It is not the suffering that one FEELS. Sensual pleasures are devoid of value and cause suffering even during this life (by stressing the mind). Of course, more suffering will materialize in future lives too.
- The root cause of suffering in this life, and future lives, is craving sensory pleasures (*kāma*). That is the **Second Noble Truth**.
- The average human (*puthujjano*) believes that lack of sensual pleasures is suffering. That is why he/she strives for more sensory pleasures. But the **Third Noble Truth** says that all suffering can be stopped by losing cravings for sensory pleasures (*kāma*.)
- The average human (*puthujjano*) cannot understand why a Noble Person lives a life staying away from sensual pleasures. He/she perceives such a life to be suffering. But the Noble Person lives a stress-free life and is free from the births in the *apāyā* where there is unimaginable suffering. The way to become a Noble Person (i.e., the way to lose cravings) is the Eightfold Noble Path. That is the **Fourth Noble Truth**.
- Again, remember that *kāma* means “*saṅkappa rāga*” or “having a mindset that sensual pleasures (and even *jhānic* pleasures) are beneficial. Of course, one must first remove the craving for sensual pleasures (*kāma rāga*) before tackling *rūpa rāga* and *arūpa rāga* (cravings for *jhānic* pleasures.)

Ichchā Is the Root Cause of Suffering – In the First Sutta

7. In his first *sutta*, the Buddha defined suffering to arise originating with *icchā*. The First Noble Truth is stated as: “*jātipi dukkhā, jarāpi dukkhā, byādhipi dukkho, maraṇampi dukkhaṃ, appiyeḥi sampayogo dukkho, piyeḥi vippayogo dukkho, yampicchaṃ na labhati tampi dukkhaṃ—saṅkhittena pañcupādānakkhandaḥ dukkhā.*” See, “[Essence of Buddhism – In the First Sutta.](#)”

- There, he stated that suffering arises when one does not get the desired outcome: “*yam pi icchāṃ na labhati tam pi dukkhaṃ*” OR “one suffers when one does not get (*na labhati*) what one desired (*icchāṃ*).”
- Because of that desires (*icchā*), one would try to keep close (*upādāna*) those things that one desires. Those things are parts of the *pañcakkhandhā* that one likes, i.e., *pañcupādānakkhandhā*.
- For details, see “[Icchā \(Cravings\) Lead to Upādāna and to Eventual Suffering.](#)”

8. The connection between *icchā*, *taṇhā*, and *kāma* comes in the Second Noble Truth on how that suffering arises: “*yāyaṃ taṇhā ponobbhavikā nandirāgasahagatā tatrataṭṭhābhinandinī, seyyathidaṃ—kāma taṇhā, bhava taṇhā, vibhava taṇhā.*”

- Because of the *icchā* (or liking/desire), we get attached (*taṇhā*): “it is this attachment (*taṇhā*) which leads to renewed existence. That *taṇhā* is just for those delightful things in this world (*kāma taṇhā*), for continued existence (for those who believe in rebirth, i.e., *bhava taṇhā*), and for optimum pleasures while this life lasts (for those who do not believe in rebirth, i.e., *vibhava taṇhā*)”
- Here we note that *kāma taṇhā* is common to both groups with *bhava taṇhā* and *vibhava taṇhā*.

9. The Third Noble Truth states how that suffering **can be stopped from arising (*nirodha*)**: “*yo tassāyeva taṇhāya asesā virāga nirodho cāgo paṇinissaggo mutti anālayo*” OR “it is the remainder-less fading away and **cessation** of that *taṇhā*, the giving up and relinquishing of it, freedom from it, losing all affection for it.”

- Of course, the way to stop future suffering is in the Fourth Noble Truth: “*ayameva ariyo aṭṭhaṅgiko maggo, seyyathidaṃ—sammādiṭṭhi ... pe ... sammāsamādhi*” OR “it is this Noble Eightfold Path. That is, *Sammā Diṭṭhi ... Sammā Samādhi*.”

Icchā, Taṇhā, Kāma – Can be Removed Only via Noble Eightfold Path

10. **The key point here is that those three (*icchā, taṇhā, and kāma*) CANNOT be removed directly by willpower or rituals.** First, one needs to comprehend WHY *icchā, taṇhā, and kāma* GIVE RISE to suffering. That is the first step in the Noble Eightfold Path: ***Sammā Diṭṭhi***.

- Once that is understood, one will automatically follow the Noble Path. First, one will think accordingly (*Sammā Saṅkappa*.) Then the rest will also follow. One will speak (*Sammā Vācā*), act (*Sammā Kammanta*), make an effort (*Sammā Vāyāma*), live (*Sammā Ājīva*), with that mindset (*Sammā Sati*). Then one will automatically get to *Sammā Samādhi*.
- There are two descriptive ways to understand the suffering hidden in *icchā, taṇhā, and kāma*. One is to comprehend *Paṭicca Samuppāda*, and the other is to comprehend *Tilakkhaṇa*.
- Of course, those two ways are inter-related. That will become more clear as we proceeded. It should already be clear to some extent by now.

11. All posts in this subsection at, “[Paṭicca Samuppāda – Essential Concepts.](#)”

9.3.5 Jāti – Different Types of Births

March 14, 2021; revised March 15, 2021; July 29, 2022

Before understanding *Paṭicca Samuppāda*, we need to understand the 11 terms there. One critical word is *jāti*. There are different meanings of the word *jāti*, depending on the context.

Three Main Meanings of *Jāti*

1. The commonly-used meaning of *jāti* is “birth,” as in the birth of a human body. We celebrate “birthdays” based on the day someone was born in this life. As we see below, Buddha Dhamma has two other (different) meanings depending on the context.

- In the *Uppatti Paṭicca Samuppāda*, *jāti* means the birth in a new realm among the 31 realms. For example, a living being can be born as a human, animal, *Deva*, *Brahma*, etc.; that is a birth in that existence. See, “[Akusala-Mūla Upapatti Paṭicca Samuppāda.](#)”
- On the other hand, in *Idappaccayatā Paṭicca Samuppāda*, one can be “born” in countless “states” during a given lifetime. See #3 below.
- The above TWO are the main meanings of “*jāti*” in Buddha Dhamma. After understanding the concepts, one could use the same term appropriate for a given situation.
- Note that *jāti* is pronounced “*jāthi*” with “th” sound as in “three.” See “[“Tipitaka English” Convention Adopted by Early European Scholars – Part 1.](#)”

“Birth of a Baby” as *Jāti* Needs to be Understood as the Mundane Version

2. The mundane meaning of “birth” as the birth of a human (or animal) baby is all we can “see” with our limited worldview.

- It takes a Buddha to comprehend the real nature of this complex world.
- The other two possible meanings of “*jāti*” require a basic understanding of the “wider world view.”
- That means possible births among 31 realms in a rebirth process. But it DOES NOT mean the “re-appearing” of a soul (as in Abrahamic religions) or a *ātman* (as in Hinduism.)

“Births” During a Lifetime – One Important Type of *Jāti*

3. This type of *jāti* happens during a lifetime. For example, one can become angry and be “born” in an “angry *bhava*” and “angry *jāti*” for a short time. An hour later, one may learn of a big promotion and become very happy. At that time, one is “born” in a “happy *jāti*.”

- Even before understanding births (*jāti*) in the rebirth process, it is important to understand how such temporary *jāti* arise. The Buddha discussed that in many suttas. See, for example, “[WebLink: suttacentral: Avijjā Sutta \(AN 10.61\).](#)” This sutta explains that one must associate with “good people,” cultivate good habits, and be mindful of one’s actions. That way, one is likely to be “born in good *jāti*” during a given *bhava*. That is the basis for guaranteeing good rebirths in the rebirth process (*saṃsāra*.)
- See “[Idappaccayatā Paṭicca Samuppāda](#)” for details on “temporary *jāti*.”

The Primary Meaning of *Jāti* – Birth in One of the 31 Realms

4. In the “[WebLink: suttacentral: Saccavibhaṅga Sutta \(MN 141\).](#)” Ven. Sariputta explains in a bit more detail the material in the “*Dhammacakkappavattana Sutta* (SN 56.11).” That *sutta* states: “*Katamā cāvuso, jāti? Yā tesam tesam sattānam tamhi tamhi sattanikāye jāti sañjāti okkanti abhinibbatti khandhānam pātubhāvo āyatanānam paṭilābho, ayaṃ vuccatāvuso: ‘jāti’.*”

Translated: “What is *jāti*? It is the birth of beings in the various realms with one or more of the following stages: *jāti sañjāti okkanti abhinibbatti khandhānam pātubhāvo āyatanānam paṭilābho*. This is called birth.”

- English translations try to translate those words directly, but that does not convey the real meaning of those words. See, for example, “[WebLink: accesstoinight.org: Discourse on The Analysis of the Truths.](#)”

Births in the *Brahma* and *Deva* Realms Have Only the First step – *Jāti*

5. For *opapātika* (instantaneous) births in the *Deva* and *Brahma* realms, *jāti* is the ONLY stage involved. A *Brahma* or a *Deva* is born instantaneously, complete with “all parts of the body.” [*opapātika* : lit. ‘accidental’ (from *upapāta*, accident; not from *upapatti*, as PTS Dict. has); ‘spontaneously born’, i.e. born without the instrumentality of parents. This applies to all heavenly and infernal beings.]

- Here the “body” refers to the combination of the mental body and physical body composed of the four great elements. Of course, the physical bodies of *Brahmas* only have a few units of *suddhaṭṭhaka*. *Devas* have more “solid bodies” but are still not visible to us.
- More details in “[Manomaya Kāya \(Gandhabba\) and the Physical Body](#).”

Humans and Animals Have Other Additional Stages of “Birth”

6. Humans and animals have those other four stages as follows. Let us describe human birth.

- (i) A human is first “born” with just 3 sets of *suddhaṭṭhaka* (*vatthu dasaka*, *kāya dasaka*, and *bhava dasaka*.) This happens at the *jāti* stage.
- (ii) Within a split second, 4 more *dasaka* (4 *pasāda rūpa* of *cakkhu*, *sota*, *ghāna*, and *jivhā*) are incorporated, leading to the *sañjāti* stage. **This is the same as the *gandhabba* state.** That *gandhabba* then stays for the duration of the human existence (*bhava*.) It is periodically pulled into a womb by *kammic* energy to be “born with a physical body.”
- (iii) When pulled into a womb, the *gandhabba* merges with a zygote, which is the *okkanti* state.
- (iv) Then, that embryo grows in the womb in the *abhinibbatti* stage.
- (v) When all body parts are formed, that is the *khandhānaṃ pātubhāvo* stage, and a baby then comes out of the womb. **That last stage is what we commonly call a “birth.”**
- (vi) The **sensory faculties** start working as *āyatana* after the baby is born. This is the last *āyatanānaṃ paṭilābho* stage.
 - See “[Manomaya Kāya \(Gandhabba\) and the Physical Body](#)” and “[Buddhist Explanations of Conception, Abortion, and Contraception](#)” for details.

Repeated “Births” Within Human and Animal *Bhava*

7. When that physical body dies, that is not necessarily the end of the “human *bhava*.” That *gandhabba* comes out of the dead body and waits for another womb. We also call this “repeated *jāti*” within that same human *bhava*. See “[Bhava and Jāti – States of Existence and Births Therein](#).” Per our discussion above, “*jāti*” in that post refer to the mundane meaning – which is the same as the *khandhānaṃ pātubhāvo* stage in #6 above. Thus, we need to understand the meaning of a word appropriate for the situation.

- When the *kammic* energy for the human *bhava* (human existence) is depleted, that *gandhabba* dies, which is the end of human *bhava*. Then it can grasp a new existence as a *Deva*, *Brahma*, an animal, etc.
- Therefore, we can see that a human can be in the ‘human *bhava*’ as a human *gandhabba* for many thousands of years. The same holds for animals. A fly lives with a visible “fly body” only for several days, but that “fly *bhava*” can last thousands of years. That is the “repeated births” within a given *bhava*. There are many more details that can be found by searching for posts on *gandhabba*; type the word “*gandhabba*” in the “Search” box on the top right.

There Are Other Types of *Jāti* Too!

8. When one gets deeper into Buddha Dhamma, one can see that everything in this world is “born” due to causes and effects, i.e., *Paṭicca Samuppāda*. For example, a tree is born out of a seed. A car is “born” in a factory. *Paṭicca Samuppāda* can describe all those.

- The Buddha explained this to Vāsetṭha in the “[WebLink: suttacentral: Vāsetṭha Sutta \(MN 98\)](#).” The English translation there is good enough to get the idea: “[WebLink: suttacentral: With Vāsetṭha \(MN 98\)](#).” **However, there is no need to get into those aspects initially.**
- However, in that *sutta*, the Buddha told Vāsetṭha that humans are the same as a species. But they can be “born” in various “*gati*” according to their actions. For example, one who steals is “born” a thief. In another example, the Buddha says, “I don’t call someone a *brahmin* (of high caste) based on the mother or womb they came from.” Furthermore, even an immoral person can change to be “born a moral person of good character.”
- Those are also “types of *jāti*.”

Jātidhammā* Different From *Jāti

9. It is to be noted that *jātidhammā* means something different from *jāti*.

- As explained in the “[WebLink: suttacentral: Saccavibhaṅga Sutta \(MN 141\)](#),” *Jātidhammā* are *dhammā* responsible for *jāti*. Similarly, *jarādharmā*, *byādhidhammā*, and *sokaparidevadukkhadomanassupāyāsādharmā* are *dhammā* responsible for old age, disease, and all other sufferings associated with *jāti*: sorrow (*soka*), lamentation (*parideva*), suffering (*dukkha*), misery (*domanassa*), and despair (*upāyāsa*).
- A fairly good English translation: “[WebLink: accesstoinsight.org: Discourse on The Analysis of the Truths](#).”

Summary

10. The term *jāti* (birth) needs to be understood according to the given situation.

- When someone says, “I was born 30 years ago,” that refers to his/her birth with the present physical body. That person would not know when he/she was first “born” in the human realm. Thus we normally refer to birth as “to be born with a human body.” We say the same about animals; “This dog was born ten years ago.”
- However, in Buddhist terminology, birth (*jāti*) refers to two main types discussed above: the first happens many times during a given lifetime.
- The second type of *jāti* is the moment of appearance in any given realm. A living being could be born a *Deva*, *Brahma*, human, animal, etc.
- After the *Parinibbāna* (death) of an *Arahant*, birth (*jāti*) in any of the 31 realms of this world will not take place. In the “[WebLink: suttacentral: Dhammacakkappavattana Sutta \(SN 56.11\)](#),” the Buddha stated, “*ayamantimā jātī*” or “this is my last birth.” At *Parinibbāna* (merging with *Nibbāna*), suffering stops without a trace.
- As long as there is a *jāti*, it ALWAYS ends up in death. That is why all *Paṭicca samuppāda* cycles end with decay (*jarā*) and death (*marañā*.) Even the *kusala-mūla* version of *Paṭicca Samuppāda* ends up with just “*jāti paccayā jarā marañam*.” See, “[Kusala-Mūla Paṭicca Samuppāda](#).”

Thus, even a Noble Person on the way to *Nibbāna* will encounter death. Of course, death is stopped at *Parinibbāna*.

- The *akusala-mūla* version of *Paṭicca Samuppāda* has “*jāti paccayā jarā, marañā, soka-parideva-dukkha-domanassupāyāsā sambhavan’ti*.” That has other types of suffering as well. See, “[Akusala-Mūla Upapatti Paṭicca Samuppāda](#).”

9.3.6 Bhava – Kammic Energy That Can Power an Existence

March 21, 2021; revised March 27, 2021; May 31, 2022 (#4); August 31, 2022 (esp. #4)

Bhava is *kammic* energy created by the mind. It can power a new existence in *kāma bhava*, *rūpa bhava*, or *arūpa bhava*. Buddha means “to stop *bhava*” (*bhava* + *uddha*.)

Grasping a *Bhava* (*Kammic* Energy) Leads to *Jāti* (Birth) in That *Bhava*

1. There are different types of *jāti* or births. See, “[Jāti – Different Types of Births](#).”

- Nothing can arise without a cause and sufficient energy. **Any birth can arise only if *kammic* energy can sustain that birth.** Different types of energy can sustain different types of births.
- Three main types of *bhava* refer to *kammic* energies that can sustain existences in the *kāma loka*, *rūpa loka*, or *arūpa loka*. The Buddha explained that to Ven. Ānanda in the “[WebLink: suttacentral: Pathamabhava Sutta \(AN 3.76\)](#).” Venerable Ānanda asked the Buddha “*Bhante*, they speak of this thing called ‘*bhava*’. **How is *bhava* defined?**”
- As we know, all 31 realms in this world can be divided into three categories: 11 realms in *kāma loka*, 16 in *rūpa loka*, and four in *arūpa loka*. See, “[31 Realms Associated with the Earth](#).”
- Existences in those three are supported by *kāma bhava*, *rūpa bhava*, and *arūpa bhava*. We will see below that three different types of **energies** are created by the mind.

Kāma Bhava Required for Births in *Kāma Loka*

2. The Buddha explained *kāma bhava* as follows: “*Kāmadhātuvepakkaṇca, ānanda, kammaṃ nābhavissa, api nu kho kāmabhavo paññāyethā*”*ti*?

Translated: “If, Ānanda, a *kammic* energy established in the sensual plane (*kāmadhātuvepakkaṇca* or *kāma dhātuve pakkaṇca*) is not entered (*nābhavissa* or *na abhavissa*), can an existence in a sensual realm (*kāma bhavo*) come about?”

- Venerable Ānanda replied that it would not be possible. To be born in any of the 11 realms in the *kāma loka*, such an appropriate type of energy must be cultivated and then grasped to “start that birth in *kāma loka*.”
- Of course, there are different varieties of *kammic* energy powering the 11 realms in *kāma loka*.
- But they all have one thing in common: **craving sensory experiences** associated with all five six senses, and in particular, **the five physical senses**. Thus the term *pañca kāma* or “**five types of *kāma***.”
- Note that *Devas* in the 6 *Deva* realms have less dense bodies than humans. But they still have dense enough bodies to experience all five physical sensory inputs.

Rūpa Bhava Required for Births in the *Rūpa Loka*

3. In the same way as above, the Buddha explained *rūpa bhava*: “*Rūpadhātuvepakkaṇca, ānanda, kammaṃ nābhavissa, api nu kho rūpabhavo paññāyethā*”*ti*?

Translated: “If, Ānanda, a *kammic* energy established in the *rūpa* plane (*rūpadhātuvepakkaṇca* or *rūpa dhātuve pakkaṇca*) is not entered (*nābhavissa* or *na abhavissa*), can an existence in the *rūpa* plane (*rūpa bhavo*) come about?” No.

- Therefore, one must have cultivated the necessary type of energy to grasp a birth in one of the 16 *rūpāvacara Brahma* realms in *rūpa loka*. **Such energies are created with *rūpāvacara jhāna*.**

- To cultivate *rūpāvacara jhāna*, one MUST give up cravings for the **strongest** of the *pañca kāma*, i.e., those sensory experiences associated with a physical body. **Those are smell, taste, and physical touch.**
- That is why *rūpāvacara Brahmas* do not have **physical bodies**. **Those Brahmas are satisfied with just sights and sounds.**
- There is no need for a physical body if smell, taste, and body touches are not needed. A *rūpāvacara Brahma* has only a *manomaya kāya* or a “mental body.”
- As we have seen human *gandhabbas* can still see and hear after coming out of the physical body. A physical body with eyes and ears is not necessary to see and hear. Only the *cakkhu* and *sota pasāda rūpa* (in the *manomaya kāya*) are required for seeing and hearing. See, “[Mental Body Versus the Physical Body](#).”

Arūpa Bhava Required for Births in the Arūpa Loka

4. As can be expected, the Buddha explained **arūpa bhava** as follows: “*Arūpadhātuvepakkañca, ānanda, kammaṃ nābhavissa, api nu kho arūpabhavo paññāyethā*”ti?

Translated: “If, Ānanda, a *kammic* energy established in the *arūpa* plane (*arūpadhātuvepakkañca* or *arūpa dhātuve pakkañca*) is not entered (*nābhavissa* or *na abhavissa*), can an existence in the *arūpa* plane (*arūpa bhavo*) come about?” No.

- Therefore, one must have cultivated the necessary energy associated with the *arūpa bhava* to grasp a birth in one of the four *arūpāvacara Brahma* realms in **arūpa loka**. **Such energies are created with arūpāvacara jhāna.**
- To cultivate *arūpāvacara jhāna*, one MUST give up cravings for **all of the pañca kāma**. That is why *arūpāvacara Brahmas* do not have any *pasāda rūpa*. It has only *hadaya vatthu* in the *manomaya kāya*. They can not even see or hear. **They can only think.**
- Thus the only “matter” in *rūpāvacara Brahma* realms is the *suddhaṭṭhaka* in the *hadaya vatthu* of those *Brahmas*.
- We notice a trend from the above summary. Let us discuss that now.

“Level of Suffering” Decreases With “Decreasing Matter”

5. **In general**, “Level of Suffering” Decreases With “Decreasing Matter.” We see that sensory experiences with all six senses are available only in the 11 realms of the *kāma loka*. That is where most suffering is too! While the *Deva* realms with “less dense bodies” have optimum sensory pleasures with all six senses, the four lowest realms (*apāyās*) have the most suffering. The human realm in the middle has both pleasures and suffering.

- Of course, *pañca kāma* pleasures are available only in *kāma loka*. They include body touches, tastes, smells, sights and sounds. The first three types REQUIRE dense bodies to have “close contacts.” But there is a “price to pay” as we will discuss below.
- Furthermore, those who cultivate *rūpāvacara jhāna* (*Ariya* or *anāriya*) can see that “*jhānic* pleasures” are much better and longer-lasting than “*pañca kāma* pleasures.”
- The *rūpāvacara jhāna* are the first four *jhāna*. If one keeps going up to higher *jhāna*, they can see that the higher four *arūpāvacara jhāna* are better than the *rūpāvacara jhāna*.
- That is why it is easier for those who have cultivated *jhāna* to see that there is stress associated with “sensory contacts.” The closer the contact is, the stronger the stress level.

- However, there are some exceptions to this “rule.” While that trend holds well for the realms above the human realm, there are exceptions in the four lowest realms. In particular, some *petas* (hungry ghosts) have subtle (not dense) bodies.

Increasing “Cooling Down” With Decreasing Sensory Contacts

6. **In the long-run**, having more faculties for sensory experiences has “built-in” suffering much more than any pleasures. The ability to smell, taste and touch **requires** a dense physical body. Such a physical body comes with bodily pains, diseases, and can be subjected to injuries. Such drawbacks are minimum in *Deva* realms where those bodies have the least density. But in other realms in the *kāma loka*, such sufferings can be unbearable, especially in the *apāyās*.

- Those who cultivate such *rūpāvacara jhāna* can experience this “relief” in this life itself. As one progresses towards higher *rūpāvacara jhāna*, the physical body is felt less and less. In the fourth *jhāna*, one does not feel the physical body at all. Furthermore, those who cultivate such *rūpāvacara jhāna* are invariably born in *rūpāvacara Brahma* realms at the death of the present human body.
- When one transcends the fourth *jhāna* and gets into the higher *jhānās*, one will start seeing that **even *rūpāvacara jhāna* are stressful**. The relief becomes even higher as one proceeds to the highest *arūpāvacara jhāna*. At the highest *arūpāvacara jhāna*, one just feels that one is alive and the stress level is at the minimum. However, one with *anāriya jhāna* cannot go beyond that and stop that remaining stress, because one still has *anusaya* (latent defilements.) Furthermore, one with *anusaya* can be reborn even in the *apāyās* in future lives. This is why *anāriya jhānās* are useless in the end. See, [“Samādhi, Jhāna, Magga Phala – Introduction.”](#)
- But an *Arahant* who can attain the highest *jhāna* can “stop life altogether” and get into “*nirodha samāpatti*.” That can last up to 7 days, and one can “experience full *Nibbāna*” during that time. **But that is not an experience in this world that can be described with the *vedanā cetasika***. We have no idea of what that would be like.

Parinibbāna Is Where There Is No Suffering

7. Not even a trace of stress – let alone any suffering — is left when an *Arahant* attains *Parinibbāna* at death. All three planes of existence (*kāma bhava*, *rūpa bhava*, *arūpa bhava*) are absent in *Parinibbāna*!

- This is why “this world of 31 realms” and *Parinibbāna* are mutually exclusive. One can exist ONLY in either “this world” OR in “full *Nibbāna*” (*Parinibbāna*.)
- Note that even an *Arahant* lives in “this world” until death, and is subject to suffering due to *kamma vipāka*. Even the Buddha had some ailments and Ven. Moggallāna was beaten to death.
- Therefore, even an *Arahant* is subjected to suffering as long as living in “this world of 31 realms.” Thus *Nibbāna* is not complete until the death of the *Arahant*.

Summary

8. *Bhava* is *kammic* energy created by the mind. In the above, we discussed three main types of *bhava* responsible for ALL births (*jāti*) in this world of 31 realms.

- As we can see, the mind creates the required *kammic* energy. That is quite clear in the cases of *rūpa bhava* and *arūpa bhava* where the corresponding *jhāna citta* produce that energy.
- Energies associated with *kāma bhava* are also produced in *javana citta*. Such *javana citta* arise when we are engaged in a strong *kamma*. For example, *javana* energy to fuel a birth in the *niraya* or hell (the lowest realm) is produced in the mind of the murderer while doing that killing.
- That is how different types of *bhava* are related to different types of *kamma*. Cultivating *jhāna* is a type of *kamma* too.

- Buddha means “to stop *bhava*” (*bhava* + *uddha*.) Only a Buddha can figure out how to stop grasping various types of *bhava* (*kammic* energies) that we have accumulated, and thus stop any and all future suffering. That is why “Buddha” is a shared title for all the Buddhās.

All posts in this subsection at “[Paṭicca Samuppāda – Essential Concepts](#).”

9.3.7 Bhava and Punabbhava – Kammic Energy Giving Rise to Renewed Existence

March 28, 2021

Bhava is *kammic* energy. When a *vipāka* due to that *kammic* energy is grasped (*upādāna*), that leads to a new existence (*punabbhava*.)

Summary of the Previous Post

1. *Bhava* is *kammic* energy created by the mind. It can power a new existence in *kāma bhava*, *rūpa bhava*, or *arūpa bhava*. Those are three main types of *bhava* responsible for ALL births (*jāti*) in this world of 31 realms.

- As humans, we can generate all three types of energies that CAN power a new existence in those three *bhava*. Depending on the details of *kammic* energies (i.e., specific *kamma* committed,) they CAN lead to births (*jāti*) in the 4 *apāyās*, the human realm, and 6 *Deva* realms in *kāma bhava*, or in 16 *Brahma* realms in the *rūpa bhava* or 4 *Brahma* realms in *arūpa bhava*.
- See, “[Bhava – Kammic Energy That Can Power an Existence](#).”

Bhava and Punabbhava

2. Just because there are energies that CAN power a new existence, that second step of **grasping** (*upādāna*) a new existence (*punabbhava*) DOES NOT happen automatically. **To be reborn in a new existence, *bhava* MUST become *punabbhava*** (“*puna*” + “*bhava*,” where “*puna*” is “repeat/renewed.”) In other words, the mind must grasp (*upādāna*) that “stored energy” (*bhava*) to energize the next existence.

- For example, Aṅgulimala killed 999 people just before he met the Buddha. So, he had created a strong *kammic* energy that could have led to a birth in the *niraya*, the lowest realm. That *kammic* energy was there in a “*niraya bhava*” to support existence in a *niraya*.
- To INITIATE that “*niraya bhava*,” his mind must latch onto that energy at the *cuti-paṭisandhi* moment at the end of the human *bhava*. However, he learned Dhamma and became an *Arahant*. Therefore, Ven. Aṅgulimala’s mind had become purified and would not latch onto existence in the *niraya*.
- In fact, since he had attained the *Arahanthood*, his mind would not latch onto ANY existence (*bhava*) in this world. He probably cultivated *jhanas* before his death, but birth in a *Brahma* realm was also not possible.
- **Thus, it is critical to understand the difference between *bhava* and *punabbhava*.**

To Be Born in an Existence (*Bhava*) It Must Be Grasped (*Upādāna*)

3. We all have done MANY of both good and bad *kamma* in this life and previous lives. At the end of the human *bhava*, one can bring a new existence (*punabbhava*.) For that to happen, the mind needs to go through the “*upādāna paccayā bhava*” step in *Paṭicca Samuppāda* at the *cuti-paṭisandhi* moment.

- However, depending on the “level of purity” of a given mind, it may not grasp certain types of *bhava*. For example, a *Sotāpanna*’s mind would not “grasp” (*upādāna*) a *bhava* in an *apāya*; such a *bhava* would not be compatible with the *gati* of a *Sotāpanna*.

- Similarly, an *Anāgāmi*'s mind would not grasp even a human or a *Deva bhava*. Since *Anāgāmi* has “seen” the perils of births in *kāma loka* (*kāma bhava*), “renewed *bhava*” (*punabbhava*) in the *kāma bhava* WILL NOT happen.
- The mind of an *Arahant* has seen the perils of ALL existences in this world. Thus, it would not grasp an existence in this world. At death, an *Arahant* will be released and will merge with *Nibbāna*.
- Even an *Arahant* would have accumulated many types of *bhava* (*kammic* energies), especially in previous lives. However, none of them will lead to *punabbhava* or “renewed existence” since that mind would not grasp any existence in this world. That mind has realized that no existence is free of suffering.

If There Is No New Existence (*Punabbhava*), There Is No Rebirth (*Jāti*)

4. Now we can clearly see what the Buddha stated in his first *sutta*, “[WebLink: suttacentral: Dhammacakkappavattana Sutta \(SN 56.11\)](#)”: “*Ñāṇaṇca pana me dassanaṃ udapādi: ‘akuppā me vimutti, **ayamantimā jāti**, natthi dāni **punabbhavo**’*” ti.

Translated: “The knowledge and vision arose in me: ‘Unshakable is the liberation of my mind. **This is my last birth**. Now there is no more **renewed existence**.’”

- There are many *suttas* with similar statements for *Arahants*. You can search for the verse “*natthi dāni punabbhavo*” at Sutta Central Search. That phrase means, “now there is no more renewed existence.”

“*Upādāna Paccayā Bhava*” Step in *Idappaccayatā Paṭicca Samuppāda*

5. We must understand many of the terms in *Paṭicca Samuppāda*, depending on the context. I have pointed out many times that “*viññāṇa*” in the “*saṅkhāra paccayā viññāṇa*” is ALWAYS a *kamma viññāṇa* and NOT a *vipāka viññāṇa* (like *cakkhu viññāṇa* or “seeing.”)

- In *Paṭicca Samuppāda* cycles that run **DURING a lifetime** (*Idappaccayatā Paṭicca Samuppāda*), the “*upādāna paccayā bhava*” step leads to TWO effects. (1) It CREATES *kammic* energies (or *bhava*) that can manifest AT THAT TIME. One can get to that *bhava* temporarily and be “born” in that *bhava* temporarily. (2) Also, part of the *kammic* energy generated will be preserved as a *kamma bīja* in the *viññāṇa* plane.
- For example, when someone gets into a fight, that angry mindset generates *kammic* energy in his/her *javana citta*. Part of that energy leads to a “temporary angry *bhava*” and, thus, a “temporary angry *jāti*.” An onlooker can see the change in his/her body: face will transform to an “angry face.” Also, part of the *kammic* energy generated will either give rise to a new *kamma bīja* or strengthen an existing *kamma bīja* for a *bhava* in the *apāyās*. Of course, that will be a tiny *kamma* seed. If one kills a human, that *kamma bīja* (or *bhava* energy) will become much stronger and could become strong enough to bring in a *punabbhava* (new existence) in the *apāyās*.
- The more he/she engages in similar actions throughout life (even without killing anyone), such *kamma bīja* (*bhava*) will grow and could contribute to *punabbhava*.

“*Upādāna Paccayā Punabbhava*” Step in *Upapatti Paṭicca Samuppāda*

6. There are different types of *Paṭicca Samuppāda* cycles that run in different situations. A special type of *Paṭicca Samuppāda* cycle (*Upapatti Paṭicca Samuppāda*) operates at the moment when the *kammic* energy (or *bhava* energy) for the current *bhava* runs out. **That is when a new or “renewed existence” is grasped** (*upādāna*).

- In this particular case, the “*upādāna paccayā bhava*” step becomes “*upādāna paccayā punabbhava*.”
- Therefore, in a *Paṭicca Samuppāda* cycle that runs at the *cuti-paṭisandhi* moment (at the end of the current existence), the step MUST BE interpreted as “*upādāna paccayā punabbhava*.”

7. Note that neither type of *Paṭicca Samuppāda* cycles operate for an *Arahant*, since the steps “*taṇhā paccayā upādāna*” OR “*avijjā paccayā saṅkhāra*” WILL NOT take place for an *Arahant*.

- All posts in this subsection at “[Paṭicca Samuppāda – Essential Concepts](#).”

9.3.8 Concepts of Upādāna and Upādānakkhandha

April 3, 2021

Important concepts of *upādāna* and *upādānakkhandha* are discussed in this subsection:

[Difference Between Physical Rūpa and Rūpakkhanda](#) (This post is also in the section on “[The Five Aggregates \(Pañcakkhandha\)](#).”)

[Where Are Memories “Stored”? – Connection to Pañcakkhandha](#)

[Loka Sutta – Origin and Cessation of the World](#)

[Dukkha Samudaya Starts With Samphassa-Jā-Vedanā](#)

[Key Steps of Kammic Energy Accumulation](#)

[Generating Kammic Energy in the “Upādāna Paccayā Bhava”](#)

9.3.8.1 Where Are Memories “Stored”? – Connection to Pañcakkhandha

April 7, 2021; revised April 8, 2021; September 10, 2022; March 4, 2023

Records of our memories (*nāmagotta*) are permanent. A handful of people worldwide have autobiographical memories, i.e., they can recall their past experiences in great detail. These memory records are the same as “*atīta pañcakkhandha*.”

Memory Versus Autobiographical Memory

1. An average human can only recall relatively few memories even from this life. During our waking hours, we experience many things. How many events from yesterday can you recall in detail? If you are asked what you ate for lunch or wore to work on a specific day last month, can you recall?

- There are only a handful of people in the world who CAN recall such things in great detail. They can remember **anything they experienced** on any given day for many years. That is a unique ability, and scientists call it “**Highly Superior Autobiographical Memory**” or HSAM.
- Note that this is not an ability of memorization. As we see below, some of them CANNOT memorize a poem, for example. They can recall whatever they saw, heard, stated, smelled, touched, or thought about. That is why it is called “**autobiographical memory**.”
- They can recall ONLY those things that they experienced. Suppose they had watched a TV show on a specific day, even several years ago. They can “bring back that memory” in their mind and re-live that experience. It is like “playing back” that TV show again in their mind!

- If you ask them what they ate for lunch on a specific day back in 1980, for example, they can “playback” that scene of them eating lunch on that day: They can tell you not only what they ate, but what the weather was like, and who they were with, etc. **It is as if their brain is a video recorder, and they can play back on any past event. But the brain cannot “store” events in such detail.**
- The critical point is that those with HSAM capability are RECALLING those memories from a depository. There is no way that such details can be stored in the brain. Scientists are “stuck” and have not been able to explain the phenomenon of HSAM; see the review article at the end of the post.
- Whatever ALL OF US experience goes into a depository in the *viññāṇa* plane (*nāma loka*) as we will discuss below. Different people have varying capabilities to retract that information.

First Recorded Case of Autobiographical Memory

2. That AMAZING ability first came to light with Jill Price, who contacted a team of scientists in the early 2000s about her ability to recall anything from 1974 onwards. Here is a video of her with Diane Sawyer on an ABC News program in 2008:

- She cannot recall all of her life, but just those events after 1974. The ability of HSAM just got “turned on” when she was a teenager.

[WebLink: youtube: The woman that never forgets - Jill Price First Interview!](#)

The Amazing Recalling Ability of Jill Price

3. Let us discuss the main points from the above video.

@1:10 minutes: She remembers everything since she was 14 years old.

@2:50 minutes: Diane Sawyer tests Jill’s ability to recall past events. She passes all tests.

@4:20 minutes: Jill says she has a “split-screen” in her head. She talks to Diane while “watching” the playback of whatever past event she recalls. She describes what she had for lunch on May 27, 2006. Remember that the above interview was recorded in 2008. Since she kept a detailed diary, anyone can check these accounts. One may think she has memorized all those detailed records, but that is impossible, especially since she can’t memorize even a poem.

Connection to *Nāmagotta* and *Atīta Pañcakkhandha*

4. Let us pause and make the connection to Buddha Dhamma.

- As discussed in the post, “[Difference Between Physical Rūpa and Rūpakkkhandha](#),” *rūpakkkhandha* is 11 types. But all 11 types are in 3 main categories: *atīta*, *anāgata*, *paccuppanna* (past, future, current.) All other types are included in these three types. For example, internal (related to one’s own body) and external *rūpa* must be of past, future, or present.
- The *paccuppanna* (or current) *rūpa* are those being experienced now. In a moment, it will go to the past and be added to the *atīta* (past) *rūpa* category. The category of *anāgata* (future) *rūpa* is those we hope/expect to experience.
- As we can see, the *atīta* (past) *rūpa* category dominates one’s *rūpakkkhandha*. It is also clear that *rūpakkkhandha* is one’s own; it is what one has experienced. **One person’s *rūpakkkhandha* is different from someone else’s.**
- Furthermore, those *atīta* (past) *rūpa* (i.e., *atīta rūpakkkhandha*) are just RECORDS of past *rūpa* that one has experienced. They are PERMANENT. Whatever happened cannot be changed.

Memories Are the Same as *Atīta Pañcakkhandha* (Past Experiences)

5. Now, here is another KEY point to remember. Whenever an event (registering of one of six kinds of *rūpa*) registers in the mind, corresponding mental aggregates (*vedanā, saññā, saṅkhāra, viññāṇa*) also register. **Thus all five aggregates (*pañcakkhandha*) arise and immediately go into *atīta pañcakkhandha*.**

- For example, suppose we hear a pleasing sound, for example. It may register as a *sukha vedanā*, and we recognize what that sound is (*saññā*.) Then we think about it (*saṅkhāra*) and the overall sensory experience is *viññāṇa* (in this case, *sota viññāṇa*.)
- Thus not only is that sound (*sadda rūpa*) registered in the mind but those mental components are also registered. Thus, a *rūpakhandha* ALWAYS arises with the other four *khandhas* (aggregates.) In other words, *pañcakkhandha* arises with any sensory event and is immediately recorded as ***atīta pañcakkhandha*.**
- **Those records (*atīta pañcakkhandha*) are in the *viññāṇa* plane (*nāma loka*) and can be recalled at any time in the future. They are called “*nāmagotta*.”** (With each sensed event, a record of it gets added to *nāmagotta* in *viññāṇa dhātu* — via the *mana indriya* in the brain.)
- Details at “[Arising of Five Aggregates Based on an Ārammana](#),” “[Our Two Worlds: Material and Immaterial](#),” and “[Where Are Memories Stored? – Viññāṇa Dhātu](#).”
- Please note that reading and understanding the posts I refer to is necessary if one wants to understand these concepts. **Just reading a post or two will not do.**

People With *Iddhi* (Supernormal) Powers Can Recall Past Lives

6. Now, we can see how the Buddha could “look back” and recall his past lives extending trillions of years to the past.

- Just like Jill Price can recall any event that took place in HER life, the Buddha could recall any event that happened in his life. The only difference is that Jill Price can recall ONLY her current life from 1974. The Buddha could recall any event in his ANY previous life!
- By the way, anyone who can cultivate the fourth *jhāna* (*Ariya* or *anāriya jhāna*) could recall at least a few past lives. Even before the Buddha, many yogis could recall several past lives. Note that some children can remember events from their previous life.
- **One can recall past lives only because records of all past experiences are preserved in the *viññāṇa* plane (*nāma loka*).** Those memories are NOT stored in the brain, but the brain plays a role in “bringing those memories back.” A discussion on this subject is in “[Brain and the Gandhabba](#).”
- When an average human recalls (some of) past events, it is those *nāmagotta* that they recall. It is just that an average human can recall only significant events of his/her life. Many people with HSAM can recall all events from their current life.

Nāmagotta (*Atīta Pañcakkhandha*) Has Records of One's Life Experiences

7. Let us go back to discussing the video of #2 above.

@5:15 minutes: Jill Price says she was not “good in school” and could not memorize even a simple poem. She meant that she was an average student who was not exceptionally intelligent. What she has is not KNOWLEDGE, but an ability to RECALL memories. As she explains, **her memory is autobiographical**, i.e., she can **recall ONLY those events she has experienced** (seen, heard, tasted, smelled, touched, and thought about.)

@6:40 minutes: She says that she “travels in her head.” That means she can travel to the past and relive an experience as if it is happening now!

@6:40 minutes: She says she cannot go on the TV show “Jeopardy” and win because she does not have general knowledge about the world. She can recall ONLY those EVENTS that she experienced, for example, by watching TV. This is a critical point that I want to emphasize. It is not knowledge/wisdom that she has, but the ability to RECALL past events in great detail!

Summary

8. All our memories (including those from previous lives) are preserved in the *viññāṇa* plane (*nāma loka*.)
- The ability to recall memories is a complex subject. A Buddha can recall events from ANY life in the past. An average human can recall only bits and pieces from the current life. Between those two extremes, there is a huge variety of that capability.
 - Recalling a memory means playback of that old experience in one’s mind. Recalling an “experience” recreates that whole past event. That includes that part of the *rūpakkkhandha* and the events’s mental attributes (other four aggregates). Thus, it plays back that part of the “*atīta pañcakkhandha*.”
 - The five aggregates (*pañcakkhandha*) are one’s own. It has one’s past experiences, experiences happening at the present moment, and hopes/expectations of future experiences.

Implications

9. Each person is automatically attached (*taṇhā*) based on one’s past experiences. One would like to “keep them close,” i.e., have “*upādāna*” for those things. Those past experiences (*atīta pañcakkhandha*) influence one’s character/habits (*gati*.) That is how “*pañca upādānakkhandha*” arises. All these concepts are interrelated. I hope you can at least begin to appreciate these relationships.

- To break bad *gati* and to avoid *taṇhā/upādāna* for things that can get one into trouble, one must be able to clarify these concepts and “see” how future suffering arises due to them.
- The “cooling down of the mind” can result ONLY via gaining knowledge of this process. Following moral guidelines (precepts) is essential to get to the right mindset. But it is *paññā* (wisdom) that eventually leads to the right vision (*Sammā Ditṭhi*) at the *Sotāpanna* stage.

Further Information

10. Putting all the necessary information into one post is impossible. If one desires to comprehend these concepts, one must spend some time reading all related posts. I have mentioned some above.

9.3.8.2 Loka Sutta – Origin and Cessation of the World

April 16, 2021; revised September 27, 2021; rewritten with new chart March 18, 2023

The *Loka Sutta* succinctly states the origin of the suffering-filled world (i.e., the continuation of the rebirth process.) It is the attachment to sensory inputs triggering the *Paṭicca Samuppāda* process.

Buddhism – In Charts 6. Timeline of *Loka Samudaya*

Download/Print: ["WebLink: PDF Download: 6. Timeline of *Loka Samudaya*"](#)

Loka Sutta – Arising of One's World

1. Here is how the Buddha described the "arising of one's world" in the "[WebLink: suttacentral: *Loka Sutta* \(SN 12.44\)](#)" (I separated the verse into five steps to match the above chart): "*Katamo ca, bhikkhave, lokassa samudayo?* (i) *Cakkhuñca paṭicca rūpe ca uppajjati cakkhuvīññāṇaṃ*. (ii) *Tiṇṇaṃ saṅgati phasso*. (iii) *Phassa paccayā vedanā*; (iv) *vedanā paccayā taṇhā*; (v) *taṇhā paccayā upādānaṃ*; *upādāna paccayā bhava*; *bhava paccayā jāti*; *jāti paccayā jarāmaraṇaṃ sokaparidevadukkhadomanassupāyāsā sambhavanti*. *Ayaṃ kho, bhikkhave, lokassa samudayo*."

Translated: "And what, *bhikkhus*, is the **origin of the world**? (i) In dependence on the eye and forms (*rūpa*), eye-consciousness arises. (ii) That is followed by "contact with the three types of '*saṃ*' " or "*samphassa*." (iii) With *samphassa* as condition, *samphassa-jā-vedanā* come to be; (iv) with *samphassa-jā-vedanā* as condition, *taṇhā*; (v) with *taṇhā* as condition, *upādāna*; with *upādāna* as condition, existence (*bhava*); with *bhava* as condition, birth; with birth as condition, aging-and-death, sorrow, lamentation, pain, displeasure, and despair come to be. **This, *bhikkhus*, is the origin of the world.**" [For the word "*saṃ*" see "[What is "Saṃ"? Meaning of Saṃsāra \(or Saṃsāra\)](#)."]]

- The word *samudaya* comes from "*saṃ*" + "*udaya*" which rhymes as "*samudaya*." There is "*saṃ*" again! Now, "*udaya*" means to arise, and thus, "*samudaya*" means "arising due to *saṃ*." **This means not the arising of the whole world with trillions of stars/planets but the re-arising of the world at death**

with a new rebirth. If “*saṇ*” (or the defilements of greed, hate, and ignorance) were to have been removed, one would not be reborn and experience this suffering-filled world again.

- Note that just a sensory experience CANNOT be the root cause of suffering. Rather, the attachment to sensory experience **with *samphassa*** is the root cause. That is the KEY POINT of this *sutta*. This is why I have bolded the verse, “*tiṇṇaṃ saṅgati phasso.*”
- Let us discuss the time sequence stated in the whole verse. The above chart is a summary.

Time Sequence in the Above Verse – The first Step Happens to Anyone

2. (Step 1 in the Chart) The whole process starts with a sensory input through one of the six senses. The above verse describes what happens when someone sees an object they attach to (the other five sense faculties work the same way.) That attachment (*tanhā*) eventually leads to suffering in some form.

- The process starts with “*cakkhuñca paṭicca rūpe ca uppajjati cakkhuvīññāṇaṃ.*” That means *cakkhu vīññāṇa* arises when one sees an object. It just sees what that object is. No *kamma* generated here. That “seeing event” or *cakkhu vīññāṇa* occurs with the help of the *phassa cetasika*. **This *phassa* (contact) is between *cakkhu* and *rūpa*.**
- As discussed, *phassa cetasika* is a universal *cetasika* that arises with ANY sensory event. When you hear a sound or taste food, that involves the *phassa cetasika*. Any living being, including an *Arahant*, will experience all six sensory inputs.
- The next step is “*tiṇṇaṃ saṅgati phasso.*”

Tiṇṇaṃ Saṅgati Phasso – Misunderstood Key Verse

3. (Step 2 in the Chart.) This short verse is commonly mistranslated as, “The meeting of the three is contact.” See the English translation of the *Loka Sutta* at Sutta Central: “[WebLink: suttacentral: The World \(SN 12.44\).](#)”

- It does not make any sense to say “the meeting of *cakkhu*, *rūpa*, and *cakkhu vīññāṇa*.” Instead, *cakkhu vīññāṇa* (or seeing the object)” happens with the contact or meeting of *cakkhu* and *rūpa*. **There is no “meeting of the three.”**
- Instead, what happens in this second step is “contact with defiled *gati*” or “*samphassa*.” Here *samphassa* is “*saṇ phassa*” (“*saṇ*” + “*phassa*,” where “*saṇ*” are defilements (greed, anger, ignorance). It rhymes as “*samphassa*.” **Thus *samphassa* (contact with defilements) is an internal process in mind.**

4. To learn about “*saṇ*” see “[What is “Saṇ”? Meaning of Saṇsāra \(or Samsāra\)](#)” and “[List of “Saṇ” Words and Other Pāli Roots.](#)”

- There are **three** main “defiled *gati*” or “*saṅgati*”: ***lobha, dosa, and moha***. Those are the “**three**” referred to in verse. It can also refer to one’s defilements associated with the three entities of *cakkhu*, *rūpa*, and *cakkhu vīññāṇa*.
- Such detailed explanations are in the three Commentaries within the *Tipiṭaka*. The above explanation of “*phassa*” as “*samphassa*” is given here: “[WebLink: suttacentral: Paticca Samuppāda Vibhaṅga \(Abhidhamma Vb 6\).](#)” For details, see “[Difference between Phassa and Samphassa.](#)”

“Phassa Paccayā Vedanā” Is “Samphassa Paccayā Samphassa-Jā-Vedanā.”

5. (Step 3 in the Chart) Therefore, the third step, “*phassa paccayā vedanā*,” that comes after the step “*tiṇṇaṃ saṅgati phasso*” is “*samphassa paccayā samphassa-jā-vedanā*.” **This is a “mind-made *vedanā*” due to *samphassa*.**

- Note that “*jā*” means “generated by,” and thus “*samphassa-jā-vedanā*” means “*vedanā* generated by *samphassa*.” That *vedanā* would arise ONLY IF one gets attached to that sensory input.
- Now it is clear that the fourth step of “*vedanā paccayā taṇhā*” really is “*samphassa-jā-vedanā paccayā taṇhā*.” **An Arahant generates *vedanā* (in Step 1) but not *samphassa* or *samphassa-jā-vedanā* (in Step 3.)**
- One would attach to that *ārammaṇa* ONLY because it led to “*samphassa*” with the step “*tiṇṇaṁ saṅgati phasso*.”
- Again, the above analysis is at “[WebLink: suttacentral: Paṭiccasamuppāda Vibhaṅga \(Abhidhamma Vb 6\)](#).”

“*Vedanā Paccayā Taṇhā*” Is “*Samphassa-Jā-Vedanā Paccayā Taṇhā*”

6. (Step 4 in the Chart) The critical step of “attaching to the sensory input” happens if one’s mind becomes joyful/stressful. For example, if one sees a beautiful object, hears a pleasing sound, eats tasty food, etc., one would want more of it. Thus, the mind can attach and “get stuck” with that sensory input. **That happens with a “new type of consciousness” or a “*kamma viññāṇa*” with a desire to fulfill an expectation.**

- As the “[WebLink: suttacentral: Paṭiccasamuppāda Vibhaṅga \(Abhidhamma Vb 6\)](#)” explains, this “attachment” can take place for all six sensory inputs, i.e., there are six types of *taṇhā*: *Rūpa taṇhā*, *sadda taṇhā*, *gandha taṇhā*, *rasa taṇhā*, *phoṭṭhabba taṇhā*, *dhamma taṇhā*.
- That automatic attachment occurs because of the mindset that “it is possible to fulfill expectations and be PERMANENTLY happy by pursuing pleasurable things in this world.”
- Thus, one would make efforts “acquire such things” without realizing those are defilements (“*saṅ*”) that WILL lead to future suffering.

7. With such a mindset, “*cetana*” become *saṅcetanā* (defiled intentions); with such “defiled intentions,” one would engage in (*abhi*)*saṅkhāra*. Here, “*saṅkhāra*” means “*saṅ* + *khāra*” or “actions with “*saṅ*.”

- That leads to the perpetuation of the rebirth process or *Saṁsāra* (“*sāra*” means “fruitful”; thus, *Saṁsāra* results because of that wrong view/perception of a “fruitful world.”)
- To remove that wrong view, one must “see” the correct worldview of the Buddha, see the perils of “*saṅ*,” and become “*Sandiṭṭhiko*” at the *Sotapanna* stage. Thus the verse, “*Sandiṭṭhikam Nibbānam*” in the “[WebLink: suttacentral: Nibbata Sutta \(AN 3.55\)](#).” Note that *diṭṭhi* here means “to see.”

Kamma Generation Starting With “*Taṇhā Paccayā Upādāna*”

8. (Step 5 in the Chart) The *Akusala-Mūla Paṭicca Samuppāda* process starts at this point of getting to the “*taṇhā paccayā upādāna*” step in a sensory event. This is where *kamma* accumulation (responsible for rebirths) starts. **That is why the Buddha called it the “origin of the world.”**

- One starts acting with *avijjā* and generates *abhi**saṅkhāra* with a “*kamma viññāṇa*”: “*avijjā paccayā (abhi)saṅkhāra, (abhi)saṅkhāra paccayā (kamma)viññāṇa, ..*” leading to the whole mass of suffering: “*Evametassa kevalassa dukkhakkhandhassa samudayo hoti*.”
- For details, see “[Tanhā Paccayā Upādāna – Critical Step in Paṭicca Samuppāda](#),” “[Generating Kammic Energy in the “Upādāna Paccayā Bhava” Step](#),” and “[Difference Between Tanhā and Upādāna](#).”
- Above is a summary of the Buddha’s description of “*loka samudaya*,” or “origin of one’s world,” per the short “[Loka Sutta \(SN 12.44\)](#).” As you can see, even such a short *sutta* needs to be explained in detail.
- **This is why I emphasize that reading “word-by-word translations” of *suttas* is a waste of time, especially for those not well-versed in Buddha Dhamma’s fundamentals.**

“Loka Samudaya” Will Not Take Place for an Arahant

9. All steps after the first step of “seeing an object” will not arise for an Arahant because an Arahant would not generate *samphassa*. See #3 and #9 of the post “[Difference between Phassa and Samphassa](#).”

- Another way to state the same is to say that an Arahant does not have *saṅgati* (“*saṅ* gati”) or “defiled gati.” Arahant’s mind is pure, devoid of greed, hate/anger, and ignorance. Note that “gati” is pronounced “gathi,” like in “Thief.”
- For an Arahant, a “seeing event” is just that. No attachment. Thus, any sensory event would be limited to just experiencing that sensory input. The critical step of “*tiṇṇaṃ saṅgati phasso*” WILL NOT take place for an Arahant. Thus all other steps following it would not be there!
- That is why Arahant is free from future suffering. The root causes for the “arising of the world” (“*saṅgati*”) have been eliminated for an Arahant.

How Can Someone Get to the Arahant hood?

10. Now the question is: “How can someone attain Arahant hood, i.e., stop the rebirth process and attain Nibbāna?”

The Buddha provided the answer in the second part of the “[WebLink: suttacentral: Loka Sutta \(SN 12.44\)](#)”: “*Katamo ca, bhikkhave, lokassa atthaṅgamo? Cakkhuñca paṭicca rūpe ca uppajjati cakkhuviññāṇaṃ. Tiṇṇaṃ saṅgati phasso. Phassa paccayā vedanā; vedanā paccayā taṇhā. Tassāyeva taṇhāya asesavirāganirodhā upādāna nirodho; upādāna nirodhā bhava nirodho ...pe... evametassa kevalassa dukkhakkhandhassa nirodho hoti. Ayam kho, bhikkhave, lokassa atthaṅgamo.*”

Translated: “And what, bhikkhus, is the **cessation/ending** of the world? In dependence on the eye and forms, eye-consciousness arises. **That is followed by “contact with the three types of “*saṅ*” or “*samphassa*.”** With *samphassa* as a condition, *samphassa-jā-vedanā* come to be; with *samphassa-jā-vedanā* as condition *taṇhā*. **But with the remainder-less fading away and cessation of *taṇhā* result in the cessation of *upādāna*;** with the cessation of *upādāna*, cessation of existence (*bhava*); with the cessation of existence, cessation of birth; with the cessation of birth, aging-and-death, sorrow, lamentation, pain, displeasure, and despair cease. Such is the cessation of this whole mass of suffering. This, bhikkhus, is the cessation/ending of the world.

The removal of *taṇhā* starts at the *Sotāpanna* stage by comprehending the above-summarized process. Complete cessation of *taṇhā* happens in four stages: *Sotāpanna*, *Sakadāgāmi*, *Anāgāmi*, and Arahant.

- Until Arahant hood, anyone COULD generate *samphassa*, depending on the sensory input. As one attains higher *magga phala*, there will be fewer *ārammaṇa* that could lead to *samphassa* or “contact with defilements.” For example, after attaining the *Anāgāmi* stage, one would not “attach to” any sensual pleasures available in *kāma loka*.
- An Arahant would have removed all defilements, and thus, the *Akusala-Mūla Paṭicca Samuppāda* process starting with “*avijjā paccayā saṅkhāra*” would not be initiated. That is the **cessation/ending of the world** for that Arahant!

A Sensory Experience is a Trigger to Initiate a PS Process

11. As *Loka Sutta* points out, the accumulation of *kammic* energy to “power up” future existences starts with sensory experiences. *Kamma* generation in *Paṭicca Samuppāda* (PS) process takes place in the “*taṇhā paccayā upādānaṃ*” step in #8 above.

- As discussed in the second part of the *Loka Sutta*, the critical point is the stopping of the sequence of events following a sensory experience at the arising of *taṇhā* due to “*samphassa-jā-vedanā*.” We cannot control it at that moment since it happens within a split second.
- **(Additional information:** Two critical things need to happen to reduce and eliminate *taṇhā* over time: (i) First, one must comprehend this whole process that we are discussing and also how the *Paṭicca Samuppāda* process works. That is the “*dassanā pahātabbā*” step, where a large fraction of wrong views is removed at the *Sotāpanna* stage by getting rid of wrong views. (ii) Once getting to the *Sotāpanna* stage, one needs to remove the tendency to attach to sensory pleasures with *Ānāpāna* and *Satipaṭṭhāna Bhāvanā*. One reaches higher stages of *magga phala* in this second stage of the “*bhāvanā pahātabbā*” step. In the [WebLink: suttacentral: Sabbāsava Sutta \(MN 2\)](#), “*dassanā pahātabbā*” is the “first removal,” and “*bhāvanā pahātabbā*” is the “last removal.”)
- We will discuss that in future posts again. But it has been discussed in some existing posts. See, for example, “[Vipallāsa \(Ditṭhi, Saññā, Citta\) Affect Saṅkhāra](#).”

***Paṭicca Samuppāda* process Is Initiated by a Sensory Experience**

12. Therefore, the *Akusala-Mūla Paṭicca Samuppāda* process does not automatically start with “*avijjā paccayā saṅkhāra*.” No one would act with *avijjā* WITHOUT a cause. The cause for acting with *avijjā* is a TEMPTATION brought up by a SENSORY EXPERIENCE.

- One can see that by combining the *Loka Sutta* (SN 12.44) discussed above with the “[WebLink: suttacentral: Sabba Sutta \(SN 35.23\)](#).”
- This theme is seen in many *suttas*, including the *Chachakka Sutta* (MN 148). I have discussed that *sutta* in detail in another series of posts on the “[Worldview of the Buddha](#).” Just look at the introductory post of that series, “[Buddhist Worldview – Introduction](#).”
- Other posts in the series: “[Paṭicca Samuppāda – Essential Concepts](#).”

9.3.8.3 Dukkha Samudaya Starts With Samphassa-Jā-Vedanā

April 23, 2021; revised September 7, 2022

Dukkha samudaya means “origin of suffering.” *Kammic* energies for future suffering accumulate via *Paṭicca Samuppāda* (PS). We start acting with *avijjā* and initiate PS when sensory inputs trigger temptations and generate “*samphassa-jā-vedanā*” or “mind-made feelings.”

Critical Conclusions from *Loka Sutta* (SN 35.23)

1. In the previous post, “[Loka Sutta – Origin and Cessation of the World](#),” we reached the following conclusions. (you may want to print it and refer to it as we proceed.)

- *IPaṭicca Samuppāda* (PS) describes the key steps leading to future suffering.
- However, that process DOES NOT initiate with “*avijjā paccayā saṅkhāra*.” We don’t AUTOMATICALLY start acting with *avijjā*!

- **A sensory input (*ārammaṇa*) triggers the *Paṭicca Samuppāda* process:** sight, sound, taste, smell, touch, or the memory of a past event (*dhammā*.)
- **If the mind attaches to such a sensory event (*taṇhā*)** that attachment leads to *upādāna* (keeping it in mind and getting stuck in it.) Then **while in the “*upādāna paccayā bhava*” step**, we accumulate *kammic* energy for future births with *mano*, *vacī*, and *kāya saṅkhāra*. That is how the PS process gets to “*avijjā paccayā saṅkhāra*.”
- Before we discuss those details, it is critical to understand how this whole process starts with “getting attached” to certain sensory inputs (*ārammaṇa*) with “*samphassa-jā-vedanā*” or “**mind-made feelings.**”
- By the way, “*dukkha samudaya*” is the same as “*loka samudaya*.” That is why *Nibbāna* implies “stopping future rebirths” or “stopping the re-arising of this word.” **It may take time to absorb this critical point.**

“*Samphassa-jā-Vedanā*” – Example 1

2. A sensory input comes through one of the six senses: eyes (sights), ears (sounds), nose (smells), tongue (tastes), body (touches), and mind (memories). In Pāli, they are six types of *vipāka viññāṇa*.

- Let us consider a simple example starting with *cakkhu viññāṇa*. Suppose three people A, B, and C, sit in a small coffee shop. They are all facing the door, and person X walks in. Suppose that person X is a close friend of A, the worst enemy of B, and that C does not know X at all. We will also assume that all 4 are males.
- So, let us see what happens within a split second. A recognizes X as his friend, and a smile comes to his face. B recognizes X as his enemy, and his face gets darkened.
- On the other hand, X is just another person to C. He immediately goes back to whatever he is doing.

3. **That is an example of a “*cakkhu viññāṇa*,” a “seeing event.”** It is over within a split second, just like taking a photo with a camera takes only a split second, where the image is captured on the screen instantaneously.

- **However, something very complicated happens in the human mind when a “seeing event” occurs.**
- It is critically important to go slow and analyze what happens to see how complicated this process is (for a human mind) to capture that “seeing event.” It is much more complicated than just recording “a picture” in a camera.

4. Within that split second, A recognizes X as his good friend, and joy arises in his mind, and he becomes happy. B recognizes X as his worst enemy, and bad emotions arise in his mind, and he becomes angry. On the other hand, no extra feelings arise in him. He goes back to whatever he was doing.

- As we can see such vastly varying feelings arise due to the three steps that follow the “seeing event” or *cakkhu viññāṇa*. As we remember from the previous post (refer to the printout) those three steps are “*Tiṇṇaṃ saṅgati phasso; Phassa paccayā vedanā; vedanā paccayā taṇhā*.” As we discussed, the last two steps are “*samphassa paccayā samhassa-jā-vedanā*” and “*samphassa-jā-vedanā paccayā taṇhā*.”
- The three people, A, B, and C, generate different “*saṅ gati*” upon seeing X. Even though they all see the same person X, three different types of “*samphassa-jā-vedanā*”: joy, anger, and neutral feelings arise respectively in A, B, and C.
- How does the SAME “seeing event” (seeing X) lead to all these very different changes in the minds of three different people? (and the emotions even show up on their faces!)

5. Since all three people A, B, and C, are average humans, they have not removed “*san gati*” or defilements from their minds. Such “*san gati*” remain hidden as “*anusaya*” in all three.

- However, a trigger is needed to bring those “*san gati*” to the surface. A has had “good experiences with X,” and thus “affectionate *san gati*” arose in him upon seeing X. B’s experiences with X were not good, and those “bad memories” were triggered by seeing X.
- On the other hand, C has had no prior experiences with X. Thus, a trigger for “*samphassa-jā-vedanā*” was not there. But if C sees a person he is familiar with, that may trigger his “*san gati*.”
- If C were an *Arahant*, he would not have any “*san gati*” left. Thus, affection or anger would not arise upon seeing ANY person.
- The best way to comprehend this key point is to think about your own experiences.

Kamma Generation Depends on One’s Actions Based on the Initial “Attachment”

6. Once bound to an event with “*samphassa*,” that leads to corresponding “mind-made feelings” or *samphassa-jā-vedanā*. Joyous feelings arose in A and angry feelings arose in B upon seeing X. Both A and B got “attached” to that event. **Thus, *taṇhā* can arise via greed or anger.**

- Person A may start talking to X excitedly, especially if X is a close friend. B’s face may darken and many angry thoughts about his past experiences with X may arise in him. Both are “*samphassa-jā-vedanā paccayā taṇhā*” and “*taṇhā paccayā upādāna*.”
- The next step of “*upādāna paccayā bhavo*” depends on what happens next. In this case, B may start accumulating “bad *kamma*” just by cultivating “bad *vacī saṅkhāra*” in his mind, even if he does not say or do anything. Such “bad thoughts” arise via “*avijjā paccayā saṅkhāra*” where *saṅkhāra* are *vacī saṅkhāra* (not speaking out but talking to himself.)
- But it could get worse if B’s anger rises and he says something bad to X. That is also “bad *vacī saṅkhāra*.” If X responds and the situation escalates, B may hit X. That is getting to the “bad *kāya saṅkhāra*” stage. All these lead to the accumulation of “bad *kamma*” for B.
- That is a brief example of how one could generate *kammic* energy for future existences, even if this particular action may not be strong enough to “power up” a new birth. However, if the situation escalates and B kills X, then that would certainly be a strong *kamma* leading to new birth in an *apāya*.

“*Samphassa-jā-Vedanā*” – Example 2

7. Let us clarify it further with an example since it is critical to understand this issue. Suppose a friend visits an alcoholic (X) and brings a bottle of alcohol. Again, let us follow the steps in #2 of the previous post.

- First, X sees that his friend has brought a bottle of alcohol, his favorite kind. This is the “seeing event” in this example: “*cakkhuṇṇa paṭicca rūpe ca uppajjati cakkhuviññāṇaṃ*.” This *cakkhu viññāṇa* is a *vipāka viññāṇa* and no *kamma* generated. Even an *Arahant* would see the bottle.
- Next is the CRITICAL step “*tiṇṇaṃ saṅgati phasso*” where X’s mind instantly makes the “*san phassa*” or “defiled contact” with his “alcoholic *gati*.”
- **Note the two types of “contacts” in the above two processes.** In the first, the “*phassa cetasika*” in *cakkhu viññāṇa* makes the “contact” between *cakkhu* and *rūpa* (alcohol bottle) to give rise to *cakkhu viññāṇa* (seeing the bottle.) The second is a “defiled contact” (*samphassa*) that arises due to his craving for alcohol.
- On the other hand, if someone brought a bottle of alcohol to an *Arahant*, he would also see the bottle, i.e., *cakkhu viññāṇa* with the “*phassa cetasika*” will also arise in him. But there would be no “*tiṇṇaṃ saṅgati phasso*” and, thus, the process will stop there.

8. Once X got “attached” to the bottle of alcohol with *samphassa* he becomes joyful and that joyous feeling is *samphassa-jā-vedanā*: *Samphassa* led to “*Samphassa-jā-vedanā*.”

- Therefore, the “extra *vedanā*” made up by the mind is the “*samphassa-jā-vedanā*.” Here, “*jā*” means “generated with.” **That *vedanā* was generated by *samphassa* (*san phassa*).**
- Suppose X’s wife is also home when the friend brings the bottle. She would not be happy to see the bottle, especially if she is trying to break the “drinking habit” of her husband. She may even get angry with her friend. That is also a *samphassa-jā-vedanā*.
- On the other hand, the *Arahant* will also see the bottle and will identify it as such. But there will be no joy or dismay. There will be no *samphassa-jā-vedanā*.

9. The “*samphassa-jā-vedanā*” of joyous feelings in X makes him attach (*taṇhā*), which immediately leads to the next step of *upādāna*. Which means his mind is now focused on the alcohol bottle.

- If his wife opposes him having alcohol often, she may become agitated. Even if she may not say anything, she could get mad at the friend for bringing the alcohol bottle. Does he not know that he is easily tempted? Did the two of them plan to “have a drink” without her knowing? She also gets to the “*taṇhā*” and “*upādāna*” stages.
- Of course, an *Arahant* would not “get attached” or “get stuck” (no *taṇhā* or *upādāna*.)

Generating *Kamma* Starts With the “*Taṇhā Paccayā Upādānaṃ*” Step

10. Therefore, once getting attached with *taṇhā*, the next step of “getting stuck and proceeding along” is likely to happen with “*taṇhā paccayā upādāna*” and “*upādāna paccayā bhavo*” steps.

- This is where X started getting ready to “have a good time with the friend.” He would think, speak, and act to have a “good time” with his friend.
- However, it is possible to stop the process at that point by acting mindfully. If X has seen the dangers of keeping his “drinking habit” he can think about the bad consequences of engaging in that practice and tell the friend that he is trying to eliminate his drinking habit. Thus he could start acting with “*vijjā*” (or wisdom) and NOT engage in “*avijjā paccayā saṅkhāra*.”
- **That is the basis of the correct *Ānāpānasati* or *Satipaṭṭhāna Bhāvanā*.**

9.3.8.4 Key Steps of Kammic Energy Accumulation

May 1, 2021; revised May 2, 2021; October 13, 2022

Here we discuss the critical steps in *kamma* accumulation. *Paṭicca Samuppāda* (PS) explains how one creates one’s future with our actions (*kamma* generated via *saṅkhāra*.) However, that *kamma* accumulation process starts not at the beginning of PS but in the middle of PS with a sensory experience.

Chronological Order of *Kamma* Accumulation

1. Let us first list the critical steps involved.

- (i). A sensory experience with one of the six sense inputs (seeing, hearing, smell, taste, touch, memory recall) is the first step.
- (ii). Attachment (*taṇhā*) to that sensory experience based on our habits/character (*gati*.)
- (iii). Embracing (willingly getting involved) in that sensory experience with specific goals.
- (iv). Thinking, speaking, and doing things to accomplish that goal.
 - During that last step, we accumulate *kammic* energy to bring about future rebirths and all other types of *kamma vipāka*.

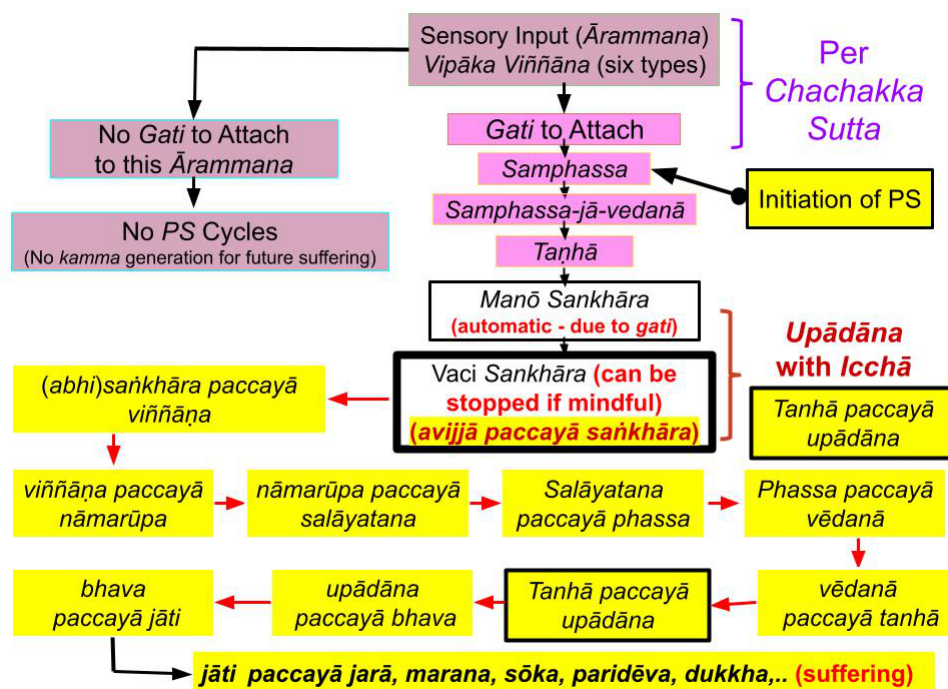

Matching the Steps in *Paṭicca Samuppāda*

2. We experience those sensory inputs with our five physical senses and the mind. In Pāli, those six are “*saḷāyatana*” or “all *āyatana*.”)

- A sensory experience starts with the “*saḷāyatana paccayā phasso*” step in PS. That verse means “making contact with one of the six *āyatana*.”
- Here, it is critical to see that an *Arahant* does not have “*āyatana*” but only “*indriya*.” *Arahant*’s six senses only capture a sensory experience. An *Arahant* has *indriya*, but they DO NOT become “*āyatana*.” ***Indriya become āyatana when rāga, dosa, moha (or “saṇ”) come into play.***

3. So, IF someone’s mind “gets involved” with a sensory experience and starts the “*saḷāyatana paccayā phasso*” step, that person’s *indriya* becomes *āyatana*. **That is the beginning of a PS process** based on that *ārammaṇa*. Then the mind automatically goes to the next few steps of “*phassa paccayā vedanā*,” “*vedanā paccayā taṇhā*,” and “attaches” (*taṇhā*) to that *ārammaṇa*. **As we discussed in previous posts, “*vedanā*” here really is “*samphassa-jā-vedanā*.”** See “[Loka Sutta – Origin and Cessation of the World](#)” and “[Dukkha Samudaya Starts With Samphassa-Jā-Vedanā](#).”

- Once “attached,” the mind automatically “pulls it close (*upādāna*)” and will start thinking, speaking, and acting on it. That is the “*upādāna paccayā bhavo*” step taking a side-step leading to “*avijjā paccayā saṅkhāra*.” This is when the PS process starts from the beginning. The following chart illustrates this critical point.

Download the pdf: “[WebLink: suttacentral: Icchā to Upādāna to Suffering.](#)”

- Let us take an example to illustrate this critical point.

Example of “*Salāyatana Paccayā Phasso*” Leading Automatically to “*Upādāna Paccayā Bhavo*” Step

4. Husband and wife are walking down the street, and the wife stops and looks at a beautiful painting on display in a store window. The husband looks at it, shrugs his shoulders, and wants to move on. But the wife is “attached” to that painting. So, she asks her husband whether they can go inside and take a good look at it.

- In this particular case, both saw the painting, i.e., “*cakkhuñca paṭicca rūpe ca uppajjati cakkhuvīññāṇaṃ*” took place for both. But the critical step of “*tiṇṇaṃ saṅgati phasso*” DID NOT take place in the husband’s mind. Note that this is the sequence of events described in the *Loka Sutta*. See “[Loka Sutta – Origin and Cessation of the World.](#)”
- The exact sequence of events is stated slightly differently in the PS process (for the wife.) It starts with “*salāyatana paccayā phasso.*” It immediately goes through “*phassa paccayā vedanā,*” “*vedanā paccayā taṇhā,*” and “*taṇhā paccayā upādāna*” steps. **Now she is “stuck” with that *ārammaṇa* or the painting.** See, [Dukkha Samudaya Starts With Samphassa-Jā-Vedanā.](#)
- It is a good idea to have both of those posts printed out for reference.
- Now, the wife is at the “*upādāna paccayā bhavo*” step in PS and the *Loka Sutta* steps. **I hope you can see that the steps in the two versions describe the same processes that the wife’s mind underwent.**

Kamma Accumulation in the “*Upādāna Paccayā Bhavo*” Stage

5. At this point, the wife starts acting with *avijjā*. She starts generating *kamma* via “*avijjā paccayā saṅkhāra,*” “*saṅkhāra paccayā viññāṇa,*” “*viññāṇa paccayā nāmarūpa,*” etc., down to “*upādāna paccayā bhava*” again!

- Before we discuss those details, let me digress a bit to address some related issues.

Additional Details

6. Here, I want to emphasize an important point. Getting attached to a painting is not an immoral deed. But in a deeper sense, such actions keep one bound to the *kāma loka* and away from *Nibbāna*. That is why it falls under *avijjā*. **But only *Sotāpannas* who are trying to attain the *Anāgāmi* stage automatically avoid such actions.** I am just taking an example that everyone can understand.

- They both saw the same painting as a *vipāka vedanā*. Here, one should not assign such “*vipāka vedanā*” to a single past *kamma*. Our physical body is the result of incalculable past *kamma*. A “mundane event” CANNOT be traced back to a SINGLE *kamma* done in the past. **Only strong *kamma* (like killing a human) can lead to a specific *vipāka* (like getting a bad rebirth.)**
- That was just the “seeing event.” As discussed in *Abhidhamma*, **most *vipāka vedanā* are neutral**, like seeing or hearing. The exceptions are bodily contacts — either bodily *dukkha vedanā* (like an injury or a headache) or *sukha vedanā* (like getting a massage or being in an air-conditioned room on a hot day) — depending on whether it is a bad or a good *vipāka*.
- Now let us get back to our example.

“*Upādāna Paccayā Bhavo*” Stage Explained With the Above Example

7. Let us continue with our example to see how the wife keeps accumulating *kamma* with different types of *saṅkhāra* with the “*upādāna paccayā bhava*” step in PS.

- The painting is expensive, so the wife is considering whether they can afford it now, but she would really like to buy it. The husband is not interested in it and thinks it is a waste of money. Those are *saṅkhāra* done with *avijjā*, i.e., “*avijjā paccayā saṅkhāra*.” Now we can see how the PS process starts from the beginning starting with the “*upādāna paccayā bhava*” step.
- Now, any “happy feeling” in the mind of the wife would be due to her “*san gati*” that comes to play at the “*tiṇṇaṃ saṅgati phasso*” stage of getting attached to a sensory event; see, “[Dukkha Samudaya Starts With Samphassa-Jā-Vedanā](#).” This is also called *kāma assāda*.
- Such a “happy feeling” did not arise in the husband’s mind. This is an important point. The “happy feeling” in the wife could not have been a property of the painting; if so, it should have given the same “happy feeling” to the husband! Only the wife had “*taṇhā*” and “*upādāna*” for the painting.
- Now that she is “attached” to the painting, the wife keeps looking at it for a while. She will be enjoying “*kāma assāda*” about that picture even after they leave that place by thinking back about it. Now she has made a “*viññāṇa*” and a “*bhava*” for it.

Repeated PS Cycles Based on One *Ārammaṇa*

8. Numerous such *Paṭicca Samuppāda* cycles can operate for her based on that *ārammaṇa* even several days later.

- For example, that “*kāma assāda*” can resurface with *Paṭicca Samuppāda* cycles that involve only the mind when she is at home. It can now start with “*manaṇca paṭicca dhamme ca uppajjati manoviññāṇaṃ*,” i.e., she just remembers the painting while washing dishes. How does she start thinking about the painting when she is busy with another task?
- One way to explain that is to say that “she had ‘cultivated’ a *viññāṇa*” for that painting, and now it can sometimes resurface even without a prompt. This is sometimes known as the “subconscious”; see, “[3. Viññāṇa, Thoughts, and the Subconscious](#).”
- Another way to explain it by saying that she had made a “*bhava*” for liking that painting and it is a *dhamma* that can come back to the mind when the conditions are right: “*manaṇca paṭicca dhamme ca uppajjati manoviññāṇaṃ*.”

9. Of course, that “*manaṇca paṭicca dhamme ca uppajjati manoviññāṇaṃ*” step will be followed by, “*tiṇṇaṃ san gati phasso*” and “*(san)phassa paccayā vedanā*”; see, “[Difference between Phassa and Samphassa](#).” Her “*gati*” for liking such pictures will make her mind “*samphassa*,” which in turn will lead to “*samphassa paccayā vedanā*” or, more accurately, “*samphassa-jā-vedanā*.”

- As long as that “*kamma viññāṇa*” (expectation of owning the painting) is present in her, the possibility of cultivating more *saṅkhāra* with that *ārammaṇa* (painting) will be there. Again, “cultivating *saṅkhāra*” here means to think and act on the desire to own the painting; see “[Saṅkhāra – What It Really Means](#).”
- However, that particular *dhamma* or concept or thought would never come to her mind if she were listening to a discourse or thinking about a critical concept like *anicca*. But such a “subconscious *viññāṇa*” gets an opportunity to come to the surface while doing a mundane task (washing dishes, in this case.)

One Way That *Kamma Viññāṇa* May be Removed from Her Mind

10. One way that can happen is IF IT BECOMES CLEAR that it would be impossible for her to fulfill her expectation due to events beyond her control. Suppose that a week later they are walking by the same store. The wife looks for the painting but finds it no longer there; someone had bought it. Now, think about what happens to the two of them.

- The wife will be distraught: “I should have bought it; now I may not be able to find such a nice painting.” But the husband will not have any bad feelings, except may be some bad feelings about his wife not being able to get what she wanted.
- This is the suffering that we can stop from arising even in this life. It is not a *vipāka vedanā* but a “*samphassa-jā-vedanā*.” The wife got distraught only because she got attached to that painting, but the husband did not.
- I have discussed this example and more in the post, “[Kāma Assāda Start with Phassa Paccayā Vedanā or Samphassa-Jā-Vedanā](#).”

11. Once it becomes clear to the wife that owning that painting is no longer possible, that expectation will automatically disappear from her mind. In other words, that “*viññāṇa* to own the painting” will no longer be there.

- Therefore, she will no longer think or act based on that *viññāṇa*. Since that *viññāṇa* is no longer there to trigger the step “*avijjā paccayā saṅkhāra*.” The rest of the steps in PS will also stop.
- **However, it is essential to note that her “*san gati*” have not changed.** A similar *viññāṇa* can re-appear in her mind if that painting is returned to the store and will become available to purchase. Another similar painting could also do it.

Second Way That *Kamma Viññāṇa* May be Removed from Her Mind

12. The second way she could lose that desire for the painting (and thus that *viññāṇa* “to own the painting”) is if she attained the *Anāgāmi* stage. This time, the removal is permanent, with no “*san gati*” or “*anusaya*” left for sensual pleasures.

- One gets to the *Anāgāmi* stage by realizing the fruitlessness of “owning such sense-pleasing objects.”
- **At that stage, she will not desire to own ANY “sense-pleasing objects.” In other words, her “*san gati*” (or *anusaya*) would have been permanently removed from her mind.**
- That is a deeper discussion involving the “*anicca* nature.”

9.3.8.5 Generating Kammic Energy in the “Upādāna Paccayā Bhava”

May 7, 2021

Bhava is the energy that powers mindsets, existences, and rebirths. That energy is produced in the “*upādāna paccayā bhava*” step in *Paṭicca Samuppāda*. That is also where we cultivate “*bad gati*” to attach to various sensory inputs. That is the process we need to control to gradually reduce *taṇhā* to attain *Nibbāna* with *Ānāpānasati* and *Satipaṭṭhāna* meditations.

Sensory Trigger Is “*saḷāyatana paccayā phasso*” step in PS.

1. In the past two posts (“[Loka Sutta – Origin and Cessation of the World](#)” and “[Dukkha Samudaya Starts With Samphassa-Jā-Vedanā](#)”), we discussed the fact that **it is an *ārammaṇa* through one of the 6**

“sense doors” that triggers PS processes. The Pāli verse that describes such a trigger is, “*cakkhuñca paṭicca rūpe ca uppajjati cakkhuviññāṇam..*” Let us call this “trigger description 1.”

- We did not specifically say it, but it is easy to see that this is the same thing that happens at the “*saḷāyatana paccayā phasso*” step in the “moment-to-moment PS” or the “*Idappaccayatā PS*.” See, “[Idappaccayatā Paticca Samuppāda](#).” Let us call this “trigger description 2.”
- In “trigger description 1” we have the first few steps of “*cakkhuñca paṭicca rūpe ca uppajjati cakkhuviññāṇam, tiṇṇam saṅgati phasso, phassa paccayā vedanā; vedanā paccayā tanhā*.”
- In “trigger description 2” the corresponding steps are, “*saḷāyatana paccayā phasso, phassa paccayā vedanā, vedanā paccayā tanhā*,”
- The two processes highlighted in blue are the same. That becomes clear when we see that *saḷāyatana* (all “*āyatana*”) takes into account “contact with defiled *gati*” or “*saṅ phassa*” or “*samphassa*.”
- Please make sure you understand that point by reading the recent previous posts in “[Concepts of Upādāna and Upādānakkhandha](#).”
- By the way, there are many *suttās* that discuss “trigger description 1” and “trigger description 2.” See, “[315 results for tiṇṇam saṅgati](#)” and “[738 results for paticca AND uppajjati](#).”

Samphassa Is Already Included in “*Saḷāyatana Paccayā Phasso*” Step in PS

2. The above key point is also explained in “[WebLink: suttacentral: Paṭiccasamuppāda Vibhaṅga \(VB 6\)](#)” in one of the original commentaries: “*Tattha katamo saḷāyatana paccayā phasso? Cakkhusamphasso sotasamphasso ghānasamphasso jivhāsamphasso kāyasamphasso manosamphasso—āyam vuccati “saḷāyatana paccayā phasso.”*”

Translation: “What is *saḷāyatana paccayā phasso*? It is *cakkhusamphasso sotasamphasso ghānasamphasso jivhāsamphasso kāyasamphasso manosamphasso*.”

Thus, contact with an “*āyatana*” MEANS a “defiled contact.” An *Arahant* DOES NOT have 6 *āyatana* (*cakkhāyatana* and so on). Instead, an *Arahant* has 6 *indriya* (*cakkhu indriya* and so on.) Thus an *Arahant* can see, hear, etc. But his mind will not make contact with “*saṅ gati*” because “*saṅ gati*” are absent. That means the step “*tiṇṇam saṅgati phasso*” will not occur as we discussed in the previous two posts.

- As I explained in the post, “[Sutta Interpretation – Uddesa, Niddesa, Paṭiniddesa](#),” a fundamental concept is first stated succinctly (“*uddesa*” or “utterance.”) That is the version of PS in most *suttās* where the 11 steps are briefly stated.
- Then a “*niddesa*” is a “brief explanation” that can be found in the commentaries (above verse is a good example. Of course, one should rely on the 3 original commentaries and NOT on more recent commentaries like *Visudhimagga*; see the above post.
- Then the concept needs to be explained in detail with examples (“*paṭiniddesa*”) My explanation of “*samphassa*” in the post “[Dukkha Samudaya Starts With Samphassa-Jā-Vedanā](#)” is an example of that.

Importance of the “*Upādāna Paccayā Bhava*” Step

3. **In other words, we start acting with *avijjā* ONLY IF we get attached to a sensory event (also called *ārammaṇa*.)**

- Attachment (*tanhā*) to an *ārammaṇa* directly leads to “*tanhā paccayā upādāna*” and “*upādāna paccayā bhava*” steps.

- It is at the “*upādāna paccayā bhava*” step that we start acting with *avijjā* via “*avijjā paccayā saṅkhāra*.” **That is when we start generating “kammic energy” for a corresponding existence (bhava.)** That “kammic energy seed” can germinate in the future and give rise to a corresponding birth (*jāti*.) Each *jāti* ends up in old age, disease, and death.
- (Note that the term “*jāti*” could also mean a “temporary birth” DURING a lifetime. For example, someone can get drunk and be “born” in a “drunken state” for a few hours.)
- **Thus, the origin of future suffering starts (i.e., the PS cycle starts at the beginning) WITHIN the “*upādāna paccayā bhava*” step.** A trigger is a sensory event. Let us discuss this critical issue.

Tendency to Attach to *Ārammaṇa* Is Cultivated in the “*upādāna paccayā bhava*” step.

4. Thus, it is at the “*upādāna paccayā bhava*” step that the full PS cycle starts as follows: “*avijjā paccayā saṅkhāra; saṅkhāra paccayā viññāṇa; viññāṇa paccayā nāmarūpa, nāmarūpa paccayā saḷāyatana, saḷāyatana paccayā phassa, phassa paccayā vedanā, vedanā paccayā tanhā, tanhā paccayā upādāna, upādāna paccayā bhava, bhava paccayā jāti, jāti paccayā jarā, maraṇa, soka-parideva-dukkha-domanassupāyāsā sambhavan’ti.*” See “[Idappaccayatā Paticca Samuppāda](#).”

- But the above verse is in the “*uddesa*” version. It is a highly condensed statement of a complex process. It needs to be explained at least in “*niddesa*” (brief explanations) and in the “*paṭiniddesa*” version, preferably in a verbal discourse with many examples as needed to clarify subtle issues. My posts are somewhat in between *niddesa* and *paṭiniddesa*.
- For details on that see, “[Sutta Interpretation – Uddesa, Niddesa, Patiniddesa](#).”
- Let us re-visit an example to clarify what we discussed above in the “*paṭiniddesa*” version.

Re-Visiting a Previous Example

5. At #7 of the post, “[Dukkha Samudaya Starts With Samphassa-Jā-Vedanā](#),” we discussed the case of an alcoholic (X) tempted by the seeing of an alcohol bottle.

- As soon as X saw the alcohol bottle, his “*saṅ gati*” (craving for alcohol) emerged via “*tiṇṇaṁ saṅgati phasso*.” Then he immediately started generating *saṅkhāra* via “*avijjā paccayā saṅkhāra*.”
- With such *saṅkhāra*, he started cultivating a *viññāṇa* (expectation to have a drink) with “*saṅkhāra paccayā viññāṇa*.” Note that the “trigger event” for the whole process was a “*vipāka viññāṇa*” (*cakkhu viññāṇa*.) Now, he is cultivating a “*kamma viññāṇa*” (expectation to have a drink) via “*saṅkhāra paccayā viññāṇa*.”

“Feeding the *Viññāṇa*” – Generating Kammic Energy for “*Kāma Bhava*”

6. All of X’s conscious thoughts (*vacī saṅkhāra*) and actions (*kāya saṅkhāra*) lead to a *kamma viññāṇa* via the “*saṅkhāra paccayā viññāṇa*” step. All these *saṅkhāra* strengthens his “alcoholic mindset.” His thoughts, speech, and actions are based on that mindset.

- Note that until he gets drunk, he is not committing any immoral deeds. Yet, his desire to get drunk leads to a corresponding mindset. To put it differently, someone cultivating *jhāna* WOULD NOT get into such a situation because that person knows that such a mindset is not compatible with *rūpa/arūpa* realms (i.e., *rūpa/arūpa jhāna*.) It is compatible with realms in *kāma loka*, at least in the human realm.
- As long as one cultivates *saṅkhāra* compatible with *kāma loka*, it is impossible to be freed from *kāma loka*. **Even seeking “harmless sense pleasures” binds one to *kāma loka*. This is a deep and critical point.**

If Immoral *Saṅkhāra* Generated Suffering Will be Higher

7. Now, if X gets really drunk, he could start acting like an animal. In an extreme case, he and his friend could get drunk (and may be even using drugs) and become totally incoherent, and they may not be able to stay upright. That is getting into the mindset of animals. At some “wild parties,” immoral deeds like rapes could happen with such a mindset. If so, X could be cultivating the mindset suitable for an animal. This is called “establishing *viññāṇa* suitable for animal *bhava*.” That sets up a possible birth in a lower realm of *kāma loka*.

- That is the meaning of “*saṅkhāra paccayā viññāṇa*.” Such *kamma viññāṇa* are “fed” by strong *saṅkhāra* or “*abhisāṅkhāra*.”
- The key point is that repeatedly engaging in unwise behaviors will feed both “bad *gati*” and “*kamma viññāṇa*.” As we can see, “bad *gati*” directs one to engage in more similar actions. That feeds “*kamma viññāṇa*” or “*kamma bija*” that can become strong enough to bring about a “bad *jāti*” such as one in the animal realm, and thus to future suffering.
- That is a brief going-over of the whole PS cycle ending up with future suffering.
- One can think about how other types of activities (triggered by sensory inputs) can lead to different PS cycles. For another example see, “[Idappaccayatā Paṭicca Samuppāda](#).”

Samphassa Takes Place Because of “*Saṅ Gati*”

8. From the recent posts so far, we see that “getting attached to an *ārammaṇa*” starts with the “*tiṇṇaṃ saṅgati phasso*” step. That happens because of “*saṅ gati*” or “defiled *gati*,” as discussed in #6 of that post.

- For example, someone who has an “angry character” is more likely to be triggered with an insult. A “greedy character” is easy to be bribed. An alcoholic is easily tempted to “have a drink.” Therefore, the critical step of “*tiṇṇaṃ saṅgati phasso*” or “*samphassa*” is closely associated with one’s *gati* (character/habits.)
- An *Arahant* has no “*saṅ gati*” left, and thus his/her mind does not attach to ANY such sensory event (*ārammaṇa*). Of course, all sensory events like “*cakkhuñca paṭicca rūpe ca uppajjati cakkhuvīññāṇaṃ*” takes place for an *Arahant*, i.e., he/she will see, hear, etc. But “*tiṇṇaṃ saṅgati phasso*” will not take place. An *Arahant* has removed *taṇhā*!
- **The key to eliminating *taṇhā* is to gradually reduce “*saṅ gati*” in the 4 stages of *Nibbāna* and eventually eliminate it at the *Arahant* stage!**
- To get rid of such “*saṅ gati*,” one needs to see the bad consequences in engaging in related activities. Thus, an alcoholic needs to understand the bad consequences in two ways: (i) drinking alcohol can lead to health problems and also can get one to engage in immoral activities, (ii) these activities involve “bad *saṅkhāra*” that can lead to births in lower realms.

Clarification of *Saṅkhāra*

9. Most people are familiar with the phrase “*avijjā paccayā saṅkhāra*” but do not comprehend the meaning of that phrase. Translation of “*saṅkhāra*” as “mental formations” may not convey the real meaning. Let me go through the example to make it clear.

- Let us look briefly at the actions of X once he is “attached.” Now, he wants to have a “drink” with his friend with snacks and watch a game on TV.
- All such activities are done with *mano*, *vacī*, *kāya saṅkhāra*. **First, he automatically thinks about such activities (*mano saṅkhāra*.) Then he will come up with a plan and starts speaking about such activities (*vacī saṅkhāra*). He then starts working to put that plan in action with *kāya saṅkhāra*.** Note that all 3 types of *saṅkhāra* arise in mind.

- **Kammic energy is generated in such *saṅkhāra* and lead to *kamma viññāṇa*.** Thus, “*saṅkhāra paccayā viññāṇa*” is really “*abhisāṅkhāra paccayā kamma viññāṇa*.” Sometimes, especially in Sinhala, it is also stated as “*abhisāṅkhāra paccayā abhiviññāṇa*,” where “*abhiviññāṇa*” just means “strong *kamma viññāṇa*.”
- The point is that this *viññāṇa* (that arises in the PS process) is DIFFERENT from the *vipāka viññāṇa* that arises in a sensory event like “*cakkhuṇca paṭicca rūpe ca uppajjati cakkhuviññāṇam*.” **That *cakkhu viññāṇa* was a *vipāka viññāṇa* and had no *kammic* energy in it.**

Summary

10. The initial trigger for *kamma* accumulation is a *vipāka viññāṇa* that arises with sensory input (*ārammaṇa*.) That can be described in two ways: (i) “*cakkhuṇca paṭicca rūpe ca uppajjati cakkhu viññāṇam* (any one of the six types of *vipāka viññāṇa*).” OR (ii) the “*saḷāyatana paccayā phasso*” in the PS cycle. Both describe the same process.

- If that person attaches to that sensory event (i.e., if it matches a “*saṅ gati*”), then he/she will start thinking/acting to engage with that experience. That starts PS processes at “*avijjā paccayā saṅkhāra*” and leads to the progression of that cycle ALL THE WAY to the end.
- That process is AUTOMATIC. We don’t have control over the initial steps of “getting attached.”
- The only way to control is to reduce one’s “*saṅ gati* gradually.” The key here is to realize that one is “attached” and is “generating *saṅkhāra*” and to stop generating such “bad *saṅkhāra*” once one becomes aware of it.
- If that alcoholic understood the PS process, he/she would realize that one needs to control one’s urges. This is what is meant by “being mindful” in the *Ānāpānasati* or *Satipaṭṭhāna* meditations.
- If X becomes good at controlling his urges, his “*saṅ gati*” (craving alcohol) will gradually diminish, and he will be free of that addiction over time.
- That is the way to break any bad habit (“*saṅ gati*.) On the other hand, one should willingly engage in activities that cultivate “good *gati*.” Those are the “*āna*” and “*āpāna*” in *Ānāpānasati*. See, “[6. Ānāpānasati Bhāvanā \(Introduction\)](#).”

9.3.9 Six Root Causes – Loka Samudaya (Arising of Suffering) and Loka Nirodhaya (Nibbāna)

July 19, 2018; revised December 23, 2018; re-written June 3, 2021 (like a new post); re-written August 21, 2022

Loka Samudaya is not about “creating a whole new world.” When someone dies and is reborn, that is “arising into a new world” for that person. The stopping of the rebirth process is *loka nirodhaya*, the same as *Nibbāna*.

Meanings of *Samudaya* and *Nirodhaya*

1. *Loka Samudaya* (“*saṇ*” “*udaya*”) means “arising (again) into this suffering-filled world.” *Loka nirodhaya* (“*nir*” “*udaya*”) means “stopping the rebirth process permanently.” Then the world will cease to exist for that lifestream.

- As we have discussed before, the meanings of words (whether Pāli or in any language) need to be understood in the context. Thus, *loka Samudaya* is not about “creating a whole new world/universe.” It is about being reborn upon death.
- That may sound bad. But that will make sense when one understands that most rebirths are into realms filled with suffering.
- Let us consider an example to understand the implied meaning.

Life in the 31 Realms Arise Due to Six Root Causes

2. **There are six root causes (*mūlika hetu*) that lead to the arising of one's world:** *lobha* (greed), *dosa* hate/anger), *moha* (having ten types of *micchā diṭṭhi*), and *alobha* (non-greed), *adosa* (non-hate/anger), *amoha* (absence of *moha*). **Those latter three are only “superficial” and thus are mundane versions of *alobha*, *adosa*, and *amoha*.**

- When one acts with one or more of *lobha*, *dosa*, and *moha*, one is giving rise to *kamma bīja* (*kammic* energy) that can lead to rebirth in the four “bad realms” or the *apāyās*. In other words, one is generating bad *abhisāṅkhāra* or “*apuñña abhisāṅkhāra*,” therefore, “bad *viññāṇa*,” etc., which lead to “bad *bhava*” and “bad *jāti*” (see, “[Paticca Samuppāda](#)”).
- In the same way, one or more mundane *alobha*, *adosa*, or *amoha*, give rise to *kamma bīja* that can lead to rebirth in the “good realms” at or above the human realm. There, one is generating good *abhisāṅkhāra* or “*puñña abhisāṅkhāra*” with “good *viññāṇa*,” etc., which leads to “good *bhava*” and “good *jāti*.”

There Are No “Good Reams” In Ultimate Reality

3. However, those “good realms” at and above the human realm are also NOT free from suffering. Old age and death are inevitable in any realm.

- To look at it from another point of view, the **two sets** of root causes are like the **two faces of a coin**. Getting rid of just one face of a coin is impossible.
- In other words, getting a “good rebirth” does not mean one will not get “bad rebirths” subsequently. Most rebirths are in the “bad realms.”
- Only when one comprehends the Four Noble Truths (closer to *Anāgāmi*/*Arahant* stages) can one clearly understand the futility and dangers of rebirths in ANY realm of “this world.”
- That is why one must follow the path sequentially. See “[Is It Necessary for a Buddhist to Eliminate Sensual Desires?](#)”

Lobha, Dosa, Moha Lead to *Apāya* Births – Mundane *Alobha, Adosa, Amoha* to Births in Good Realms

4. *Lobha*, *dosa*, and *moha* are food (*āhāra*) for the *apāyās* (the lowest four realms.) They give rise to the worse form of *saṅkhāra*, i.e., *apuñña abhisāṅkhāra* (or *apuññābhisāṅkhāra*.) One does *pāpa kammā* (immoral deeds) with *lobha*, *dosa*, and *moha*.

- One does *puñña kammā* (moral deeds) with the **mundane versions of *alobha*, *adosa*, and *amoha***, i.e., with *puññābhisāṅkhāra*.

- The problem is that not only *pāpa kammā* but also *puñña kammā* are done with *avijjā* (ignorance.) **The ignorance here is that of the Four Noble Truths (which says birth in any of the 31 realms will not stop future suffering.)**

Moha and Mundane Amoha Can Arise in Any Average Human (Puthujjano)

5. In an average human, thoughts can arise with EITHER moral roots (based on **mundane amoha**) OR immoral roots (based on **moha**.)

- Moral deeds (*puñña kamma*) are done with mundane *amoha* and involve *puñña abhisāṅkhāra* (*puññābhisāṅkhāra*.) Immoral deeds (*pāpa kamma*) done with *moha* involve *apuñña abhisāṅkhāra* (*apuññābhisāṅkhāra*.)
- *Puñña kammā* make a mind joyful and bring good *vipāka*. *Pāpa kammā* leads to a stressed-out mind and leads to bad *vipāka*.
- For an average human, **avijjā remains as anusaya (hidden)** even with **mundane amoha**. This is why a *puñña kamma* done by an average person belongs to *puññābhisāṅkhāra* that arises with “*avijjā paccayā saṅkhāra*” in “[Akusala-Mūla Upapatti Paṭicca Samuppāda](#).”
- Only *kusala kamma* can lead to *Nibbāna* via “*kusala-mūla paccayā saṅkhāra*” in “[Kusala-Mūla Paṭicca Samuppāda](#).”
- ***Puñña Kammā* become *kusala kammā* and lead to stopping the rebirth process and, thus, attaining *Nibbāna* upon becoming a *Sotāpanna Anugāmi*; see “[Kusala-Mūla Paṭicca Samuppāda](#).”**

All Six Root Causes Sustain the Rebirth Process

6. **Therefore, all six root causes lead to the continuation of the rebirth process. However, one needs to work to stop only the three “bad root causes” to stop the rebirth process ((AND cultivate *paññā*)):** “*rāgakkhayo dosakkhayo mohakkhayo—idaṃ vuccati nibbānan’ti*.” See “[WebLink: suttacentral: Sāmandaka Sutta – SN 39.1](#)”

- The path to *Nibbāna* involves the **reduction of the three immoral roots and the cultivation of the three mundane moral roots first. Then one must comprehend the Four Noble Truths and cultivate *paññā* or wisdom.** That is when one can turn *puñña kammā* to *kusala kammā*.
- To attain *Nibbāna*, one MUST be born in a good realm. Therefore, the first objective is to avoid births in the *apāyās*. The three bad roots (*lobha, dosa, moha*) are also called *kilesa* (or *keles* or impure) because they can lead to rebirths in the *apāyās*.
- Once one is born in a good realm (especially the human realm), one can learn the Noble Truths from a Noble Person (*Ariya*) and, with sufficient work, comprehend them. That will elevate mundane *amoha* to *paññā* gradually.

Paññā Is Not Mundane Amoha – It Is Comprehension of Noble Truths

7. Mundane *amoha* is just the absence of *lobha* (greed) and *dosa* (hate/anger.) The deeper (*lokuttara*) *amoha* is *paññā* (wisdom) comprehension of the Four Noble Truths (which is the same as comprehending *Paṭicca Samuppāda* or *Tilakkhaṇa*.) One would understand all three if one understands one of those three.

- **When one comprehends the Four Noble Truths, one will lose the desire to be reborn in the “good realms,” too.** That is the same as “seeing the *anicca* nature.” It is also the same as truly understanding how cultivating various types of *saṅkhāra* (with *avijjā*) leads to births among the 31 realms.

- When one's *paññā* becomes optimum at the *Arahant* stage, one's MIND will not go through the “*upādāna paccayā bhava*” step in *Paṭicca Samuppāda* leading to ANY rebirth. See “[Concepts of Upādāna and Upādānakkhandha](#).”
- That is why completing the eighth step of *Sammā Samādhi* in the Noble Eightfold Path enables one to get to the *Sammā Ñāṇa* stage (when *paññā* is optimized.) Then one attains *Sammā Vimutti* (complete release from this world), i.e., “*dasa aṅgehi samannāgato Arahant*.”

“*Kusala-Mūla Paccayā Saṅkhāra*” In *Kusala-Mūla Paṭicca Samuppāda*

8. When someone starts following the Noble Path, that *avijjā anusaya* will be removed in stages. Thus, at least some *puñña kamma* will be effectively become *kusala kamma*.

- That is why the type of *saṅkhāra* in the *kusala-mūla Paṭicca Samuppāda* are “*kusala-mūla paccayā saṅkhāra*.” Thus such *saṅkhāra* may be called “*kusala saṅkhāra*.”
- “*Kusala*” comes from “*ku*” + “*sala*,” or getting rid of immoral (“*ku*”). All *kusala kammā* involve the three “good roots” of *alobha*, *adosa*, *amoha*, AND comprehension of the Noble Truths.
- As we know, *puññābhisaṅkhara* come under “*avijjā paccayā saṅkhāra*” in *akusala-mūla Paṭicca Samuppāda*. See #6 of “[Saṅkhāra – What It Really Means](#).”
- By *Arahanthood*, all *puñña kamma* would become *puñña kiriyā*. Since an *Arahant* would not have defilements, there are no *akusala* to deal with. Thus, any *puñña kamma* done by an *Arahant* becomes NOT a *kusala kamma* but a *puñña kiriyā* (just a good deed without *kammic* power.)

Difference Between *Puñña Kamma* and *Kusala Kamma*

9. Therefore, one can do *puñña kamma* without getting rid of *avijjā*, i.e., without cultivating *paññā*. Most people (who are not even Buddhists) engage in giving, have compassion for others, etc. Being a Buddhist (in particular, a Noble Person) is more than that. That is a crucial point to remember.

- Only Noble Persons (at or above the *Sotāpanna Anugāmi* stage) can do *kusala kamma*. That requires an understanding of the Four Noble Truths/*Paṭicca Samuppāda*/*Tilakkhaṇa*.
- Therefore, for Noble Persons (up to the *Arahant* stage), *puñña Kammā* effectively become *kusala kammā* and lead to stopping the rebirth process; see “[Kusala-Mūla Paṭicca Samuppāda](#).”
- An *Arahant* has no *akusala* to remove, thus any *puñña Kammā* by an *Arahant* becomes a *puñña kiriyā* (just a good deed without *kammic* power) as explained in #8.

Two Eightfold Paths

10. Before getting to the Noble Eightfold Path, one must follow the mundane eightfold path; see “[Mahā Cattārisaka Sutta \(Discourse on the Great Forty\)](#).”

- Therefore, “good deeds” are done at two levels: within the mundane eightfold path, one can do *puñña kamma*. More and more of the same deeds become “*kusala kamma*” as one starts comprehending the Noble Truths; see, “[Puñña Kamma – Dāna, Sīla, Bhāvanā](#).”
- In other words, *puñña kamma* are “contaminated” to some degree, and they become more potent *kusala kamma* in the Noble Path with the increasing comprehension of *Tilakkhaṇa*.
- For example, in “mundane *alobha*,” one loses the craving for some things and is willing to share those with others. In “*lokuttara alobha*,” one just loses craving by seeing the worthlessness of things in this world.

Until Comprehending Noble Truths, All *Kamma* Perpetuate the Rebirth Process

11. It is inevitable that even the most moral “average person (*puthujjano*)” WILL generate “bad *abhisankhāra*” either during this life or in the future life until one REMOVES the three bad root causes from the mind via comprehending *Tilakkhaṇa*. They remain as *anusaya* and come to the surface under suitable conditions.

- For example, X may see an enticing object, and greed (*lobha*) may come to his mind.
- But at another time, X may see a hungry person and buy that person a meal with MUNDANE non-greed (*alobha*), non-hate (*adosa*), and *amoha*.
- An *Arahant* has removed all six root causes. But he/she may provide a meal to a hungry person out of *paññā* (wisdom) — doing the appropriate thing; it is also called a *kiriya*, just action without *kammic* consequences.

9.4 Kamma and Paṭicca Samuppāda

[Kamma and Paṭicca Samuppāda – Introduction](#)

[Dhamma and Dhammā – Different but Related](#)

[Difference Between Dhammā and Saṅkhāra](#)

[Kāma Assāda – A Root Cause of Suffering](#)

[Gati \(Habits/Character\) Determine Births – Saṃsappanīya Sutta](#)

9.4.1 Kamma and Paṭicca Samuppāda – Introduction

March 27, 2020

The uniqueness of Buddha Dhamma (Buddhism)

Kamma and *Paṭicca Samuppāda* are closely related, with *saṅkhāra* bridging the gap. We will get to the role of *saṅkhāra* in the next post.

1. Many Eastern religions (Buddhism, Hinduism, Jainism, Sikhism) believe in *kamma* and rebirth. So, what is the difference in Buddhism?

- *Abrahamic* religions do not believe in rebirth. But they also teach that the way to get to a state of permanent happiness is to live a moral life. That means one needs to do good *kamma* and avoid doing bad *kamma*.
- On the other hand, all religions other than Buddhism are based on finding a permanent existence of happiness in a heavenly world. **Buddha Dhamma does not promise sensory pleasures in a heavenly realm. Attachment to sensory pleasures is what leads to future suffering.**
- By the way, Buddhism is not a religion. It is a fully self-consistent world view. When one comprehends that world view, one can see a permanent solution to the problem of suffering.
- **Understanding the Four Noble Truths** first requires understanding that **suffering exists in the rebirth process**. That understanding will reveal three more truths at the same time. (i) The Causes of future suffering, (ii) that those causes CAN BE REMOVED, and (iii) the WAY to stop that suffering from arising. **Therefore, it is necessary to first understand the “previously unknown suffering” that the Buddha revealed to the world.**

2. Buddhism (Buddha Dhamma) says the following.

- (i) There is no existence in this world where suffering is absent permanently. There are existences in higher-realms that are almost suffering-free, but they also have limited lifetimes.
- (ii) Even if one does good deeds and lives a moral life, one can have bad future births because of *kamma* from previous lives.
- (iii) On the other hand, even if one has lived immorally in this life, it is possible to attain *Nibbāna* in this life.
 - **Those three points may not be clear. In the next few posts, I will address those issues.**
 - The answers to those questions will also clarify the following. **The Buddha taught that it is not a good starting point to insist on whether a “self” exists or not.** Instead, we need to start by investigating how future births (and thus future suffering) arise. Just like in science,
 - Like science, Buddha Dhamma is based on the Principle of Causality. Nothing can happen without causes. **Yet, NOT all causes inevitably lead to their outcomes.** That is a crucial point to understand too.

Causes and Conditions Bring Future Births

3. If all causes just lead to their consequences, then *kamma* would lead to deterministic outcomes. For example, some religions teach that immoral deeds WILL lead to their results. So, they try to find ways to remove existing bad *kamma*. That is what the Buddha also tried to do for six years while striving to attain the Buddhahood.

- **On the night of his Enlightenment, the Buddha discovered that causes could bring their effects (results) ONLY if the right conditions are there.** That is *Paṭicca Samuppāda*, the Principle of Causes and Conditions. But one must understand what those conditions are. That is why *Paṭicca Samuppāda* is a profound concept.
- By the way, *Paṭicca Samuppāda* pronounced, “*patichcha samuppaada*.” The way Pāli words are written is different from standard English; see, [“*Tipitaka English*” Convention Adopted by Early European Scholars – Part 1](#)” and [“*Tipitaka English*” Convention Adopted by Early European Scholars – Part 2](#).”
- *Paṭicca Samuppāda* explains how causes lead to their effects UNDER suitable conditions. **Therefore, we do not need to remove past *kamma*. We can purify our minds so that CONDITIONS for those bad *kamma* to bring *vipāka* will be absent.** That is how Aṅgulimāla, who killed almost a thousand people, was able to attain the *Arahanthood*; see below.
- Since this principle of CAUSES and CONDITIONS is a crucial point, let us discuss this a bit more with that analogy of a seed.

An Example of the Requirement of Conditions

4. An apple seed has the POTENTIAL to bring an apple tree to life, so the CAUSE is there in the seed.

- Suppose one prepares a plot by preparing the soil, providing water, and plants the seed there. If sunlight is also available, the apple seed will germinate, and an apple tree will grow. Those are the necessary CONDITIONS for that apple seed to germinate and give rise to an apple tree.
- However, if one keeps the apple seed in a cool, dry place, it will not germinate, i.e., necessary CONDITIONS are not present in that case for an apple tree to come to life. After a long time, the seed will become a “dud” and will never be able to give rise to a tree.
- Furthermore, when an apple seed is planted, a mango tree will not result from that, only an apple tree. **The RESULT (*vipāka*) is according to the CAUSE (*kamma* or more specifically *kamma bīja*).**

Example From *Tipiṭaka* – The account of Aṅgulimāla

5. In the same way, someone who attains the *Arahanthood* may have done highly immoral deeds even in the present life. But he/she would have eliminated the CONDITIONS that can bring the results of those deeds to fruition.

- The account of Aṅgulimāla is a good example to illustrate this point. He had killed almost a thousand people. Thus he had done enough bad *kamma* to be born in the *apāyā* many times. Yet he was able to attain the *Arahanthood* in a few weeks! See, [“*Account of Aṅgulimāla* – Many Insights to Buddha Dhamma](#).”
- When one does a bad *kamma*, a *kamma bīja* (*kamma* seed) is created. Under suitable conditions, that *kamma* seed can “germinate” and lead to a new birth, just as a seed can lead to the birth of a plant. We will discuss how such a *kamma* seed is created by one’s powerful thoughts (*javana citta*.)
- However, unlike in the case of plant seed, even potent *kamma* CANNOT bring *vipāka* to an *Arahant* to bring rebirth. In the case of Aṅgulimāla, the strong bad *kamma* of killing almost a thousand people was done in the same life that he attained *Parinibbāna*. At his death, those *kammic* energies were there,

but his mindset would not grasp them, i.e., the “*upādāna paccāyā bhava*” step in PS would not take place.

- Of course, we need to discuss that last point in detail in the upcoming posts.

6. Furthermore, the result (if it manifests) is compatible with the *kamma*. That is analogous to only an apple tree arising due to an apple seed. *Akusala kamma* (an immoral deed) will only lead to a birth in the *apāyā*. It will not lead to a birth in the human realm or a higher realm.

- Similarly, a *kusala kamma* (a good deed) will not lead to a birth in the *apāyā*. It will only lead to a birth in a good realm.
- Most importantly, even if the causes are there, corresponding results (*vipāka*) would not materialize if necessary conditions are not fulfilled.
- We all have done uncountable *kusala* and *akusala kamma* in our previous lives. **We need to be mindful to make conditions for good *kamma* to bring their *vipāka* AND for bad *kamma* not to bring their *vipāka*.**
- So, we can see why both CAUSES and CONDITIONS play roles in our daily life and in the rebirth process.

“Self” and “No-Self” Are Misleading Concepts

7. We can get some insights about the concept of a “self” from the fact that an *Arahant* would not have a rebirth. **If a permanent “self” existed, it would be impossible for an *Arahant* to attain *Parinibbāna* and to end the rebirth process.** That means there was no everlasting “self” like a “soul” or an “*Atman*” or “*ātma*.”

- However, that *Arahant* was possibly born in most of the 31 realms uncountable times in the past. During a human existence, for example, there was a “self” living his/her life. He/she was making his/her decisions.
- When that *Arahant* was born an animal, it would have had the mindset of an animal. When born in a *Deva* realm, that *Deva* would have enjoyed sensual pleasures for a long time.
- **Therefore, the idea that there is “no-self” while one is living life does not make sense either.** There is obviously “a self,” making decisions about how to live life. Even a wild animal has to decide how to get the next meal.

8. We can summarize as follows. While we live this life, we cannot deny that we exist. On the other hand, the idea of a “self” is a temporary one. That “self” keeps changing even during life, but will change drastically when grasping a “new *bhava*.” Thus, it is also not correct to talk about an “everlasting self.”

- The “sense of a self” goes away entirely only at the *Arahant* stage. Until then, we need to try to comprehend WHY it is unfruitful to take anything in this world to be “mine.”
- That does not mean one needs to start giving away everything that one owns. We have responsibilities to fulfill. Furthermore, the “giving” and “letting go” will happen AUTOMATICALLY as the mindset changes. I have personally experienced that.
- **Another critical point is that having the “big picture” helps clarify many issues.** That may sound contradictory, but that is true. See, “[The Framework of Buddha Dhamma](#).”

The Bigger Picture of 31 Realms

9. As we discussed in many previous posts, our world is much more complicated than what we can experience with our limited senses. I will summarize some relevant key points to the current discussion.

- The 31 realms in our world belong to three types of “loka” or “worlds.” The “*kāma loka*” has 11 realms, including the human realm. There are 16 realms in “*rūpa loka*” where *rūpāvacara Brahmā* live. Then, there are four realms in “*arūpa loka*” for *arūpāvacara Brahmā*.
- Those higher-lying two *lokā* are the simplest. In those 20 realms, there is only *jhānic* pleasure. A human can experience all those by cultivating *jhāna*. The lower four *jhānā* correspond to the *jhānic* experiences of the 16 *rūpāvacara Brahma* realms. The higher four correspond to the four *arūpāvacara Brahma* realms. All those *Brahmā* do not have “dense bodies” like ours. Their “bodies” have very little matter. They are even harder to “see” than even *gandhabbā*.
- The remaining 11 realms are in the *kāma loka*. Sensory pleasures associated with eating, smelling, and body touches are available only in those 11 realms. Living beings in those 11 realms have relatively “dense solid bodies” or *karaja kaya*. There is a complex variety of “bodies” in *kāma loka*. We can see very high complexity even within the animal realm. In general, *Devā* in the six realms have “bodies” much lighter than ours but denser than *Brahma*.

What Leads to Rebirth in Different Realms?

This has answers from the close relationship between *kamma* and *Paṭicca Samuppāda*, where **saṅkhāra** plays a key role.

10. To be born in those higher 20 realms, a human must cultivate *jhānā*.

- It is not necessary to follow Buddha Dhamma to cultivate either type of *jhānā* and to be born in those higher 20 realms. *Anāriya* (or non-Noble) meditation techniques (breath and *kaṣiṇa* meditations) can be used to cultivate those *anāriya jhāna*.
- However, that birth in a *Brahma* realm lasts only for the duration of the life there. Then one will be born back in the *kāma loka* based on the strongest *kamma vipāka* that comes to the mind of that *Brahma* at the dying moment.
- Rebirths in various realms in the *kāma loka* are much more complex. We will discuss those in the next post, where we will discuss the role of *saṅkhāra*.

Summary

11. We have discussed other ways of looking at the basic principles in Buddha Dhamma before. See, for example, “[The Framework of Buddha Dhamma](#).”

- The above is a simple summary of yet another way. We will continue to explore the connection between *kamma* and *Paṭicca Samuppāda* in the next post.
- It is essential to grasp the basic framework from different “vantage points.” Then we can slowly get into more profound aspects.
- Reviewing the “bigger picture” from different angles is necessary to get an idea of the beginning-less rebirth process. The world is complex, and understanding it is like putting together a big jigsaw puzzle. It takes a real effort, but it becomes joyful when one gets some traction.
- Once one starts understanding the essential aspects, one will see the value of the Buddha, his *Dhamma* (teachings), and the *Saṅgha*, who understood this profound Dhamma and transmitted it faithfully over 2500 years. **That is the real faith** (*saddhā*.)
- All previous posts in the series at “[Origin of Life](#).”

9.4.2 Dhamma and Dhammā – Different but Related

December 30, 2022; revised January 2, 2023

Dhammā means to “bear or give rise to things in this world,” and Dhamma explains how. Buddha Dhamma explains how such *dhammās* arise and how to stop them from arising.

Introduction – Different Types of Dhamma

1. In the post “[Dhamma – Different Meanings Depending on the Context](#),” we briefly mentioned that Dhamma generally means “various teachings/principles about our world.” But most of the discussion was focused on Buddha Dhamma, the teachings of the Buddha.

- All other types of dhamma are “*lokiya* dhamma.” They express various viewpoints about the world.
- Most religious teachings say that a Supreme being created the world, a Creator God; if one lives a moral life, one will be born in a heavenly realm with a permanent existence. Otherwise, one will be born in hell for eternity. People who follow such teachings are “**theists**.”
- Others believe that life ends with the death of the physical body; there is no afterlife. Because they don’t believe in a Divine entity creating life, they are called “**atheists**.”
- **Buddha Dhamma** has a unique position away from both above worldviews. It says rebirth happens according to the merits of deeds (laws of *kamma*.) Furthermore, it says most rebirths lead to much suffering. That suffering-filled rebirth process can be ended by understanding the causes/conditions for rebirth and removing necessary conditions. The endpoint is *Nibbāna* with no more suffering. **Buddhists** do not belong to either of the above two camps.

Underlying Principles for Various Teachings/Worldviews

2. The idea of a Creator can neither be proven nor disproven. It is faith-based. According to that belief held by **theists**, the Creator created both the physical world and humans.

- **Atheists** believe that the physical body defines life and that our thoughts originate in the brain. When the physical body dies, that is the end of life. The world originated with the “Big Bang,” and life evolved from inert matter over billions of years.
- **Buddhists** believe that life arises due to causes and suitable conditions for those causes to lead to their corresponding effects. The world itself and each sentient being (not only humans) have existed for eternity, i.e., but a beginning is not discernible. That is the natural conclusion for a theory based on cause and effect. There would be no “First Cause” as in the case of a Creator, where the Creator is the First Cause. The world does not arise without a cause as in the “Big Bang theory” either.

Three Worldviews – Details of the Theories

3. How do things (people, animals, plants, mountains, oceans, etc.) come into existence? A self-consistent worldview needs to explain that.

- The “**Creator theory**” is the easiest to state but impossible to verify. It says the Creator created the world and the humans in it. Of course, it cannot be proven scientifically.
- Atheists’ position on the origin of the material world is the “**Big Bang Theory**” proposed by scientists. It states that everything in the universe originated in a “Big Bang,” where all the matter came into existence some 15 billion years ago. However, scientists cannot explain what happened before or at the moment of the “Big Bang.” Furthermore, it says that sentient beings evolved from inert matter over time; but the transition from inert matter to living sentient beings with minds has not been explained.
- **Buddha Dhamma has a self-consistent theory.** Summarizing that worldview in a paragraph or even a single post is impossible.
- I have dedicated a section to discuss all three worldviews, where the worldview of the Buddha is discussed in detail. See “[Origin of Life](#).” I will extract some critical elements from that to elaborate on the topic of this post.

4. Now, we can see the main arguments of the theists and atheists against each other.

- **Theists** say that consciousness cannot and does not arise from inert matter in the brain (as claimed without proof by scientists.)
- **Atheists** argue that there is no proof that a Creator can create everything in this world, including living beings.
- **Buddha Dhamma** teaches that there is no Creator and consciousness does not arise from inert matter. However, no permanent entity like a soul goes to the next life. Everything in this world (including our rebirths) arises via *Paṭicca Samuppāda*, the Principle of Causation in Buddha Dhamma.
- All three worldviews are discussed in detail in the section “[Origin of Life](#).”

What Are “*Dhammā*” in the Three Worldviews (Dhammas)?

5. Buddha Dhamma is the teachings/worldview of the Buddha followed by **Buddhists**. They believe that “*dhammā*” or “*kammic energies*” bear things (inert and living) in this world.

- In that sense, Christianity, Judaism, Islam, and Hinduism are examples of other “religious Dhammas” followed by the **theists**. They are Christians, Jews, Moslems, Hindus, etc. Except for Hinduism, in other religions, the **Creator “bears everything in this world.”** Hinduism is a hybrid of a Creator (*Mahā Brahma*) but also believes in the laws of *kamma* (even though not the same as Buddhism.)
- Modern science is an example of a “non-religious Dhamma” followed by many **atheists**. In modern science, **laws of physics “bear things made of inert matter.”** How all that matter was created at the “Big Bang” is unresolved. Even though modern science can explain many material phenomena, it cannot explain the origin of consciousness either.

6. Let us briefly discuss some contradictions/implausibilities with the worldviews (Dhammas) of the **theists** and **atheists**.

- **Theists** say the world (the Earth) was created in a day and is supposed to remain forever. But we know the Earth will be destroyed in a few billion years. Also, the Creator only created only a man and a woman. Where did billions of other people come from? If only the DNA in the original couple is responsible (without each human having a soul,) where did the other souls come from? That is a direct contradiction to their view of an unchanging soul that survives death.
- **Atheists** say that mental phenomena arise in the brain. But they have not made ANY progress in providing evidence for that. Also, they cannot explain numerous Near-Death Experiences (NDE) tabulated by heart surgeons and other physicians. Of course, there are numerous rebirth accounts from countries all over the world. Also, they cannot explain how all these galaxies came into existence in one moment some 15 billion years ago in a “Big Bang.”
- I have discussed these in detail in “[Origin of Life](#).”

Dhammā – What “Bear” Things in the World

7. In Buddha’s detailed theory, “*dhammā*” (with a long “ā” and usually starting with a lowercase “d”) means “to bear things in this world.” For example, “*Ye dhammā hetuppabhavā*” means “those *dhammā* that sustain the rebirth process or *saṁsāra*.”

- See “[Ye Dhammā Hetuppabhavā.. and Yam Kiñci Samudaya Dhammam.](#)”
- ***Dhammās*** are *kammic* energies created by ***abhisāṅkhāra***. Such *dhammā* with *kammic* energies are created in *javana citta* while cultivating *abhisāṅkhāra*; see “[Javana of a Citta – The Root of Mental Power](#).”

- Such *kammic* energies are strengthened in the “*upādāna paccayā bhava*” step. Such *kammic* energies (also called *kamma bija*) can bring *kamma vipāka* during a lifetime or lead to rebirths (*jāti*.) Thus, ***dhammā***, *kammic* energy, *bhava*, and *kamma bija* are closely related.
- Those *dhammā* are the *kammic* energies we all have accumulated through the rebirth process. We accumulate *kammic* energies with the *Akusala-Mūla Paṭicca Samuppāda* process, starting with “*avijjā paccayā (abhi)saṅkhārā*.”

8. Such *kammic* energies are established in the “*upādāna paccayā bhava*” step, where the PS cycles loop back to the “*avijjā paccayā (abhi)saṅkhārā*” step repeatedly, thus initiating many PS cycles. It is good to understand the: “[Difference Between Tanhā and Upādāna](#).”

- Such *kammic* energies (also called *kamma bija*) can bring *kamma vipāka* during a lifetime or lead to rebirths (*jāti*.) Thus, ***dhammā***, *kammic* energy, *bhava*, and *kamma bija* are closely related.
- **Everything in this world arises based on “*dhammā*” based on various types of *adhamma*.** Buddha Dhamma or *saddhamma* does not give rise to *dhammā*. Instead, **Buddha Dhamma help neutralizes/deactivates the *dhammā* that “sustains the world of 31 realms.”**

***Dhammā* May Include Everything in This World**

9. *Dhammā* is a complex word that embeds different meanings in different contexts.

- The second meaning of *dhammā* is a watered-down version of “bearing something in this world.” The Buddha explained that to Ven. Ānanda in the “[WebLink: suttacentral: Ānanda Sutta \(SN 22.21\)](#).”
- For example, **our physical body or any other material object** (at present) bears the results of causes that led to its arising. The Buddha says: “*Rūpaṃ kho, ānanda, aniccaṃ saṅkhatam paṭicasamuppannam khayadhammam veyadhammam virāgadhammam nirodhadhammam.*”

Translated: “Ānanda, any *rūpa* is of *anicca* nature, prepared (by the mind), originated via *Paṭicca Samuppāda* (PS,) is a *khaya dhamma*, a *vaya dhamma*, a *nirodha dhamma*.”

- That verse needs to be explained in detail. **The word-by-word translation in the above link**, as follows, is WRONG or INCOMPLETE: “Ānanda, form is impermanent, conditioned, dependently originated, liable to end, vanish, fade away, and cease.”
- We will discuss in detail what is meant by “*khayadhammam veyadhammam virāgadhammam nirodhadhammam*” in upcoming posts.
- For example, a *nirodha dhamma* can be stopped from arising. The five types of *dhamma* discussed in this *sutta* arise via *Anuloma* PS and can be stopped arising via *Paṭiloma* PS. All those entities stop arising at the *Parinibbāna* of an *Arahant*. See “[Patiloma Paṭicca Samuppāda – Key to Nibbāna](#)” and “[Distortion of Pāli Keywords in Paṭicca Samuppāda](#).”

10. Next, the Buddha states that any *vedanā*, *saññā*, *saṅkhārā*, and *viññāṇa* arising at any moment are also *dhammā* since they “bear” the mental states at that time.

- Therefore, *rūpa*, *vedanā*, *saññā*, *saṅkhārā*, and *viññāṇa* arising are also ***dhammā***. Therefore, in general, *dhammā* may include everything in this world.
- Note also that *dhammā* can be the plural of *dhamma*. **Also, note that Dhamma (not italicized and without a long “a”) refers to teaching or explanation.**
- In a series of *suttas*, “[WebLink: suttacentral: Aniccādisuttanavaka \(35.43–51\)](#),” the Buddha stated that **anything in this world (*sabba*)** is of *anicca*, *dukkha*, and *anatta* nature. Note that *dukkha* and *anatta* nature are listed below the main text on *anicca*. (By the way, “*Sabbam, bhikkhave, anattā*” is a direct statement that contradicts the interpretation of *anatta* as “no-self.” The translator translates that as “Mendicants, **all is not-self**. ...” in the English translation, there: “[WebLink: suttacentral:](#)

[Aniccādisuttanavaka \(35.43–51\).](#)” Does that make any sense? How can we talk about a “self” for any *rūpa*, including a tree or a rock? But that is not the topic of this post.)

Dhammā* Arising via *Abhisāṅkhārā* Responsible for All *Dhammā

11. As we saw in #9 and #10 above, the Buddha stated, “Ānanda, any *rūpa* (or *vedanā*, *saññā*, *saṅkhārā*, or *viññāṇa*) is of *anicca*, *dukkha*, *anatta* nature, prepared (by the mind), **originated via *Paṭicca Samuppāda* (PS)**, is a *khaya dhamma*, a *vaya dhamma*, a *nirodha dhamma*.“

- **All types of “secondary *dhammā*” (discussed in #9, #10) arise via the primary type of *dhammā* (*kammic* energy, *bhava*, *kamma bija*) created in *Paṭicca Samuppāda* (PS) processes.** These are the *dhammā* that bring *vipāka* via, “*manaṅca paṭicca dhamme ca uppajjati mano viññāṇaṃ*.” These *kammic* energies are created in *javana cittās* with *abhisāṅkhārā*.
- As we have discussed, three types of *abhisāṅkhārā* initiate the creation of *kammic* energies (*bhava*) that can give rise to existences in the 31 realms in *kāma loka*, *rūpa loka*, and *arūpa loka*. Any *rūpa*, *vedanā*, *saññā*, *saṅkhārā*, or *viññāṇa* arising in any realm have root causes in those *kammic* energies (*dhammā*.)
- A basic description at “[Six Root Causes – Loka Samudaya \(Arising of Suffering\) and Loka Nirodhaya \(Nibbāna\)](#).” Many sections provide detailed explanations; see, for example, “[Basic Framework of Buddha Dhamma](#).” Also see various subsections in “[Paṭicca Samuppāda](#).”

9.4.3 **Difference Between *Dhammā* and *Saṅkhārā***

Revised March 22, 2017; April 17, 2017; November 5, 2017; July 19, 2018; August 9, 2019; January 11, 2020; June 7, 2022 (#8); rewritten January 6, 2023; revised January 9, 2023 (Heading of #9)

We discuss *dhammā* and *saṅkhārā* in the context of “*sabbe saṅkhārā aniccā*, *sabbe saṅkhārā dukkhā*, and *sabbe dhammā anattā*.“

***Dhammā* May Include Everything in This World**

1. A word meaning different things in different contexts is common in any language. For example, in English, “I **object** to the ruling” and “Moon is an **object** in the sky” mean two different things for the word “**object**.” The word *dhammā* may mean somewhat different things.

- As pointed out in the post “[Dhamma and Dhammā – Different but Related](#),” *dhammā* may include **everything in this world, in general**; see #9 and #10 there. Also, see the three *suttas* on *anicca*, *dukkha*, and *anatta* starting with “[WebLink: suttacentral: Sahetuanicca Sutta \(SN 22.18\)](#)” explicitly stating that.
- Anything can exist only if there is energy to sustain its existence. In that sense, anything in existence is a “*dhammā*” and is “bearing the causes” that gave rise to it.
- Our physical bodies can live for only up to about 100 years. Our human *gandhabbas* (the mental body) may live for thousands/millions of years depending on the *kammic* energy acquired at the *paṭisandhi* moment of “grasping this human existence.” A star, like our Sun, may last billions of years.
- The shortest existing entity in this world is a *citta*. It lasts less than a billionth of a second. There must be a “seat of the mind” or a *hadaya vatthu* to provide energy to give rise to a *citta*.

2. Thus, any mental or physical entity that arises (*uppāda*) stays in existence (*thiti*) and dies (*bhaṅga*.) These entities are *rūpa* (alive or inert) and the mental states (*vedanā*, *saññā*, *saṅkhārā*, and *viññāṇa*) associated with *rūpa* with sentient life. Those entities (*rūpa*, *vedanā*, *saññā*, *saṅkhārā*, and *viññāṇa*) are, thus, also called *saṅkhata* (prepared.) See “[WebLink: suttacentral: Saṅkhatalakkhana Sutta \(AN 3.47\)](#).”

- (By the way, we NEVER experience a single *citta* but only experience trillions of *citta* (aggregates or *khandha*), even over a short time. Even seeing a *rūpa* happens one trace at a time, and we experience only *rūpakkhandha*. See “[Vision Is a Series of “Snapshots” – Movie Analogy.](#)”)
- Thus, in a way, all *saṅkhata* are *dhammā* in general.

Dhammā With Embedded Kammic Energy

3. **However, a specific type of *dhammā* (kammic energies arising via *abhisāṅkhāra*) is the root cause of all *dhammā***; see #11 of “[Dhamma and Dhammā – Different but Related](#).” That is a deeper meaning of *dhammā*, **the root cause of all *dhammā***.

- Those *dhammās* are the *kammic* energies we all have accumulated through the rebirth process. We accumulate *kammic* energies with the *Akusala-Mūla Paṭicca Samuppāda* process, starting with “*avijjā paccayā (abhi)saṅkhāra*.”
- Thus, **a specific type of *dhammā* (kammic energies arising via *abhisāṅkhāra*) is the root cause of all *dhammā***. They eventually lead to all *dhammā*, including those in #1.

4. The Buddha taught that everything in this world has eventual causes in mind: “[Manopubbangamā Dhammā](#).” The verse, “*manopubbangamā dhammā*” means “all *dhammā* in this world have mind as the precursor.”

- That is why the famous verse: “*Ye dhammā hetuppabhavā, Tesam hetum tathāgato āha; Tesañca yo nirodho, Evañvādī mahāsamaṇo*” captures the essence of the Four Noble Truths, as pointed out in the *Peṭakopadesa*, one of the three original commentaries included in the *Tipitaka*.
- See “[WebLink: suttacentral: 1. Ariyasaccappakāsanapathamabhūmi](#),” where I have pointed to that verse. It says that **the verse represents the Four Noble Truths** (*Tattha katamāni cattāri ariyasaccāni?*.)
- I have discussed that in the post “[Ye Dhammā Hetuppabhavā.. and Yam Kiñci Samudaya Dhammanī](#).”
- Now we have the proper background to examine three famous *Dhammapada* verses in proper context. They refer to **specific *dhammā*, the root cause of all *dhammā*, i.e., *kammic* energies arising via *abhisāṅkhāra***.

Famous Dhammapada verses

5. The following three sentences appear in the *Dhammapada* verses 277, 278, and 279:

- “*Sabbe saṅkhārā aniccā*” or “all *saṅkhāra* are *anicca* (they give rise to *saṅkhata* that we cannot maintain to our satisfaction in the long run). A deeper interpretation is that it is futile to seek a “permanent happy existence” in the rebirth process.
- “*Sabbe saṅkhārā dukkhā*” or “all *saṅkhāra* eventually lead to *dukkha* (suffering).”
- “*Sabbe dhammā anattā*” or “all *dhammā* generated via such (*abhi*)*saṅkhāra* are without substance (not fruitful) at the end.”

6. An often-asked question is **why the first two verses refer to *saṅkhāra* and the third to *dhammā***.

- That question is reasonable because, as we saw in #1 above, everything in this world has the three characteristics: *anicca*, *dukkha*, and *anatta*. Thus, in general, *saṅkhāra* is included in *dhammā* too. Therefore, “*Sabbe saṅkhārā anattā*” and “*Sabbe dhammā aniccā*” are also correct statements.
- The point here is to highlight the fact that it is fruitless to engage in *saṅkhārā* and to generate the specific type of *dhammā* with *kammic* energies to give rise to future existences! That is what we discussed in #3 above.
- Because of that implication, those three famous verses in #5 also appear in several *suttas*. See, for example, “[WebLink: suttacentral: Uppādā Sutta \(AN 3.136\)](#).” There it is emphasized that those three

statements are inviolable; they are *dhammaniyāma*: “Uppādā vā, bhikkhave, tathāgatānaṃ anuppādā vā tathāgatānaṃ, tithāva sā dhātu dhammaṭṭhitatā *dhammaniyāmatā*” or “Bhikkhus, whether a Buddha arises or not, these are the laws of nature that always hold.”

Dhamma and Dhammā

7. We discussed Dhamma and *dhammā* in “[Dhamma and Dhammā – Different but Related](#).” The word “*Dhamma*” is related to “*dhammā*” (with a long “a” indicating plural.)

- First, “**Dhamma**” (with uppercase “D” and a short “a”) means “teaching.” Thus **Buddha Dhamma** is “**teachings of the Buddha**” or “teachings that can lead to *Nibbāna*” (“*bhava uddha*” or “stopping *bhava* and thus rebirth.”) See “[A Buddhist or a Bhaddhayā?](#)”
- “*Dhammā*” (with a long “a”) is a broad category meaning “to bear things in this world.”

8. Everything in this world arises based on “*dhammā*” (with *kammic energies*) created via various types of *adhamma*.

- **Buddha Dhamma or saddhamma** does not give rise to *dhammā*; instead, Buddha Dhamma help neutralizes/deactivate *dhammā*. We will address that below. In other words, *dhammā* are associated with anything in this world, and **Buddha Dhamma** help transcend this world and attain *Nibbāna*, “the deathless state.”
- A short *sutta*, “[WebLink: suttacentral: Dhamma Sutta \(AN 10.182\)](#),” clarifies **Buddha Dhamma or saddhamma** and *adhamma*. It says, “taking a life, stealing, abusing sense pleasures, speaking untruth, slandering, harsh speech, gossiping, greed, ill-will, wrong views” belong to *adhamma*. Those are *dasa akusala*; see “[Kilesa – Relationship to Akusala, Kusala, and Puñña Kamma](#).” Abstaining from *dasa akusala* is *saddhamma*.
- Another short *sutta*, “[WebLink: suttacentral: Dhamma Sutta \(AN 10.138\)](#),” describes *adhamma* as: “Wrong views, wrong thoughts, wrong speech, wrong actions, wrong livelihood, wrong effort, wrong mindset, wrong *samādhi*, wrong understanding, wrong *vimutti*.” The opposite, *Sammā Dīṭṭhi* through *Sammā Vimutti*, is *saddhamma*.
- However, *saddhamma* with *Sammā Dīṭṭhi* through *Sammā Samādhi* has two versions followed by the mundane and Noble Eightfold Paths. Those on the Noble Path have comprehended “[Paṭicca Samuppāda, Tilakkhana, Four Noble Truths](#).”

Adhamma and Mundane Version of Saddhamma Give Rise to Rebirths

9. In the post “[Dhamma – Different Meanings Depending on the Context](#),” we discussed different types of Dhamma.

- (i) “*Deva dhammās*” bear energy to sustain a *Deva* existence (*bhava*.) Thus, if one lives with “*Deva Dhamma*” and accumulates “*Deva dhammā*,” one is likely to be born a *Deva*. Similarly, *manussa dhammā* and *Brahma dhammā*, for example, bear energies to sustain human and *Brahma* existences.
 - (ii) In the same way, if one lives an immoral life, according to “animal Dhamma,” one is likely to be born an animal; one living with *niraya dhamma* (engaged in killings, rapes, etc.) one can be born in a *niraya* (hell.) One would accumulate “*niraya, peta, asura, animal dhammā*” by living an immoral life or living by *adhamma*.
- The first category is “**mundane saddhamma**” per the “mundane eightfold path” mentioned in #8. The second category is *adhamma*.
 - It is essential to understand that any *dhammā* “bears and sustains” things in this world of 31 realms; see #1 above.

- Both categories do not lead to *Nibbāna*, but the first category is NECESSARY to cultivate the Noble Path to *Nibbāna*.

Dhammā With Kammic Energies Responsible for Rebirth

10. At the moment of death, a strong *kamma bija* or a *dhammā* comes to the mind via “*manañca paṭicca dhamme ca uppajjati mano viññāṇaṃ*.” That new *viññāṇa* is the *paṭisandhi viññāṇa* for the new life; see, “[What are rūpa? – Dhammā are rūpa too!](#)”. (However, “*manañca paṭicca dhamme ca uppajjati mano viññāṇaṃ*” can also bring *kamma vipāka* and memories during a lifetime as well; those are the “general type of *dhammā*.”)

- Therefore, a new life is now formed due to potent *dhammā* (or *kamma bija*) originated via *abhisankhāra*. This new lifeform is also a *saṅkhata* because it arose due to that *abhisankhāra*.
- Details at “[Icchā \(Cravings\) Lead to Upādāna and to Eventual Suffering](#)” and “[Difference Between Tanhā and Upādāna](#).”
- After *Arahanthood*, the **generation of *dhammā* with kammic energy stops** because the *Akusala-Mūla Paṭicca Samuppāda* process, starting with “*avijjā paccayā (abhi)saṅkhāra*,” would not operate for an *Arahant*. However, the “general type of *dhammā*” will bring *kamma vipāka* memories **until the death of an *Arahant***.
- That is why all *dhammās* are “*nīrodha dhammā*” or “***dhammā* that can be stopped from arising.**” Of course, that happens with the total elimination of *avijjā* and the stopping of *Akusala-Mūla Paṭicca Samuppāda* processes starting with “*avijjā paccayā (abhi)saṅkhāra*.”

Saṅkhārā Are Our Thoughts Leading to Speech and Actions

11. *Saṅkhārā* are involved in thinking, speaking, and acting based on our intentions, hopes, and dreams. It is essential to realize that ALL *saṅkhārā* are based on our thoughts.

- “*Saṅkhāra*” include all three types (*kāya saṅkhāra*, *vacī saṅkhāra*, *mano saṅkhāra*) that lead to any action, speech, or just thought (in that order). They all arise in *citta* (our thoughts).
- We say “hello” to someone with *vacī saṅkhāra*. If we walk from the living room to the kitchen to get a drink, that is done with *kāya saṅkhāra*. But those do not initiate *kamma vipāka* and are *kammically* neutral.
- But if such thoughts involve *lobha*, *dosa*, and *moha*, they become strong *saṅkhāra* (*abhisankhāra*.) More on *saṅkhāra* at “[Saṅkhāra – What It Really Means](#).”
- *Abhisankhāra* (potent or strong *saṅkhāra*) gives rise to *kamma bīja*, which belongs to the primary type of *dhammā*.

Buddha Dhamma Does Not Lead to New Dhammā

12. At the beginning of the post, I mentioned that “*dhammā*” bear everything in this world of 31 realms. In #9 above, we discussed how rebirths in other realms arise via different types of *dhammā* created by following corresponding paths or Dhamma.

- Any teaching/way of life other than Buddha Dhamma is based on attempts to seek happiness while remaining in this world of 31 realms.
- Most people don’t even go that far. They only seek happiness in this life. The basic idea for most people is to get a good education and a job. **That is all most people are concerned with.**
- Then there are “religiously motivated people” who believe in an afterlife and follow a religion seeking to be born in a heavenly realm. They believe that will be a permanent existence full of happiness. But there is a “theory” that explains any reasoning behind that belief.

- In contrast, Buddha Dhamma is a “self-consistent theory” that explains the reasoning. That analysis is in the *Sutta Piṭaka* in the form of an outline but is more thorough in the *Abhidhamma Piṭaka*. The *Abhidhamma* analysis is the ultimate “Grand Unified Theory” that Einstein was seeking. However, he was very much off the track since such analysis MUST be based on mental phenomena, not material phenomena.

Buddha Dhamma Leads to Stopping of Arising (*Nirodha*) of *Dhammā*

13. Buddha Dhamma teaches how to stop potent *dhammā* from bringing rebirths.

- As discussed above, *dhammā* are *kammic* energies created as *bhava* in the *Akusala-Mūla* (or *anuloma*) PS processes.
- Those processes are initiated by an *ārammaṇa* coming to mind via one of the sensory inputs. Such processes lead to the creation of new *dhammā* and the grasping of new *bhava* (existence) at the *cuti-paṭisandhi* moment, i.e., at the end of the current *bhava*.
- That process is reversed in the “[Paṭiloma Paticca Samuppāda – Key to Nibbāna](#)” leading to *Nibbāna*. Also, see “[Distortion of Pāli Keywords in Paticca Samuppāda](#).”
- As a Noble Person progresses through the *Sotāpanna*, *Anāgāmi*, and *Arahant* stages, the possibility of grasping existence in an *apāyās*, *kāma loka*, and all 31 realms are removed respectively. **Rebirth in any realm WILL NOT lead to the end of suffering.**

14. That is why it is “*bhava uddha*” (Buddha) Dhamma. Instead of creating new *dhammā*, a Noble Person strives to “stop the accumulation of new *dhammā*” and “de-energize” existing *dhammā*! **That is the correct meaning of “*nirodha dhammā*”** in #9 of “[Dhamma and Dhammā – Different but Related](#).”

- Stopping (*nirodha*) of any *saṅkhata* at the *Parinibbāna* of an *Arahant*. After that, nothing of this world can arise, and thus, ***Nibbāna is the asaṅkhata*** or the “unconditioned” as translated commonly. See the second half of the “[WebLink: suttacentral: Saṅkhatalakkhana Sutta \(AN 3.47\)](#).” ***Nibbāna*** does not arise due to causes and conditions; **it is what results** when all conditions to bring the results (*vipāka*) of past causes (*kamma*) are removed. **Those conditions are *lobha*, *dosa*, *moha*, and the mundane versions of *alobha*, *adosa*, and *amoha*.**
- Also, see “[Nirodha and Vaya – Two Different Concepts](#).”

9.4.4 Kāma Assāda – A Root Cause of Suffering

April 4, 2020; revised April 6, 2020

Kāma Assāda – Sensory Pleasures

1. ***Kāma assāda*, or simply “*kāma*,” means “sensory pleasures.”** See, “[What is “Kāma”? It is not Just Sex.](#)”

- We all like and crave sensory pleasures. An average human likes to eat tasty foods, smell perfumes, and experience soothing bodily contacts, including sex. He/she also wants to see related objects and listen to related sounds. Thus, an average human enjoys such sensory events through all five physical senses.
- Besides, we also tend to endlessly think about such “pleasures” and how to get more of them. Thus, we use all six senses to “enjoy sensual pleasures.” **That leads to *kāma taṇhā*, one of the three types of *taṇhā*: *kāma taṇhā*, *bhava taṇhā*, *vibhava taṇhā*.**
- The Buddha pointed out that we are trapped in the suffering-filled rebirth process because of this tendency to value sensory pleasures or *kāma assāda*. That is another way to discuss the “previously unknown suffering” that the Buddha introduced in his first discourse, *Dhammacakkappavattana Sutta*. The dangers in *kāma assāda* stated there as one extreme way to live life, or “*kāmasukhallikānuyogo*.”

- It is important to note that Buddha rejected the opposite extreme, too (“*attakilamathānuyogo*.”) There is no need to force oneself to eat less or to eat not-tasty food, be subject to unpleasant bodily contacts, etc. The “middle way” is to live a simple life away from both extremes and to contemplate and comprehend the “true nature of this world 31 realms.”
- It is not easy to comprehend the bad consequences/danger (*ādīnava*) of *kāma assāda*. We will go through a systematic analysis.

Connection to the Previous Post

2. In the previous post, we discussed that causes (*kamma bīja*) are not enough to bring about their results (*kamma vipāka*.) Just because one has done bad *kamma* does not mean one will have to face adverse consequences, especially unfortunate rebirths. The same is true for good *kamma*.

- We all have done enough good and bad *kamma* to sustain the rebirth process over billions of years. However, even Aṅgulimāla, who killed almost a thousand people, was able to nullify that *kamma*. He did that by purifying his mind (attaining *Arahantship*) and removing *avijjā* and *taṇhā* that fuel the *Upapatti Paṭicca Samuppāda* process.
- That indirect way of “overcoming” a *kamma bīja* is called *kammakkhaya*. It does not destroy any previous *kamma bīja*. Instead, one would remove the conditions for such *kamma bīja* to “germinate.” As we know, the removal of *avijjā* will stop the tendency to attach to “worldly things” (*taṇhā*). Then, the “*upādāna paccayā bhava*” step in *Upapatti Paṭicca Samuppāda* will not take place.
- The key message of the Buddha was that the rebirth process in “this world” is filled with suffering. When one comprehends that “hidden suffering” of “this world,” one will strive to overcome the rebirth process and to attain *Nibbāna*.
- “This world” (“*ayaṃ loko*”) consists of three *loka*: *kāma loka* (with 11 realms,) *rūpa loka* (with 16 realms,) and the *arūpa loka* (with four realms.) As we know, at the *Sotāpanna* stage, one overcomes rebirths in the four lowest realms (*apāyā*.) Rebirths in all realms in *kāma loka* will stop at the *Anāgāmi* stage. At the *Arahanthood*, rebirths in all three *lokā* (i.e., in all 31 realms) will end, and *Nibbāna* realized.

Most Living Beings Are Trapped in the Four Lowest Realms (*Apāyā*)

3. Over 99% of the living beings are trapped in the four lowest realms (*apāyā*) in the *kāma loka*. It is extremely difficult to get rebirth in a higher realm.

- For example, there are less than eight billion people on Earth. But there are a million times more ants on Earth! **There are a trillion types of lifeforms on Earth**; see, “[WebLink: sciencealert.com: The Largest Study of Life Forms Ever Has Estimated That Earth Is Home to 1 TRILLION Species](http://sciencealert.com/The-Largest-Study-of-Life-Forms-Ever-Has-Estimated-That-Earth-Is-Home-to-1-TRILLION-Species).” These are mind-boggling numbers! That is not counting the other three realms in the *apāyā* that we cannot see.
- While it is hard to get rebirth in the human and Deva realms, it is EVEN HARDER to get rebirths in *rūpa loka* and *arūpa loka*, collectively called *Brahma loka*. That is because one has to overcome (at least temporarily suppress) *kāma rāga* (craving for sensory pleasures) to get a birth in a *Brahma* realm. If one can attain a *jhāna*, that means one has at least temporarily suppressed (during this lifetime) attachment to sensory pleasures, especially desire for sex.
- That is why it is tough for most people to attain *jhāna*.

Easy to Describe and Hard to Imagine Life in the Two *Brahma Loka*

4. Those *Brahmā* do not need “solid, dense bodies” like ours since they have overcome the desire for physical touch, taste, and smell. Solid, dense bodies are required for those three sensory contacts.

- *Rūpāvacara Brahmā* still have cravings for seeing and listening. But those two functions can be achieved without dense bodies and just with the two corresponding *pasāda rūpa*. A *pasāda rūpa* is a *suddhaṭṭhaka* that is “energized” by *kammic* energy. A *rūpāvacara Brahma* also has *hadaya vatthu* (seat of mind), another “energized” *suddhaṭṭhaka*.
- Those living-beings in the highest *loka*, the *arūpāvacara Brahma loka*, have only the mind. They have given up the desire to see and hear as well. Thus, they just have *hadaya vatthu*, just a single *suddhaṭṭhaka*!
- It is not easy for an average human to even imagine such lifeforms. Only a Buddha can discover such details about the “wider world of 31 realms.”
- Anyway, the point is that it is much easier to explain the lifeforms in the highest 20 realms. Furthermore, they mainly experience *jhānic* pleasures. Therefore, even sensory experience is easy to explain. That was briefly discussed in the previous post, “[Kamma and Paticca Samuppāda – Introduction](#).”

Eleven Realms in *Kāma Loka* Are Very Complex – Simplest Are the *Deva* Realms

5. Compared to the higher-lying 20 *Brahma* realms, life in the 11 realms in *kāma loka* is very complex.

- The 6 *Deva* realms in the *kāma loka* are the simplest. They have *opapātika* births (instantaneous births) without a “growth stage” like ours. Even though they have all five physical senses, their “physical bodies” are much less dense, almost like the *gandhabbā*.
- As we have discussed, a *gandhabba* is born with a mental body that is similar to a *Brahma*. That means just with a *hadaya vatthu* and a set of *pasāda rūpa*. Then that *gandhabba* can absorb aroma (scents) and become a bit denser, but still cannot be seen by average humans. See, “[Ghost 1990 Movie – Good Depiction of Gandhabba Concept](#).” A *Deva* is similar to a *gandhabba* that has a “bit more dense body” than just the mental body.
- *Devā* enjoy sensory pleasures and do not experience significant bodily ailments or diseases. Thus, the main difference between them and *Brahmā* is while *Brahmā* enjoy *jhānic* pleasures, *Devā* enjoy sensual pleasures or *kāma assāda*.

Complexity Starts at the Human Realm

6. As we know, suffering is the highest in the lowest four realms including the animal realm.

- Therefore, the human realm is unique. Some humans enjoy life, almost like some *Devā*, without even any health problems. Then are others who suffer almost like some animals due to either financial or health issues. Furthermore, a human could cultivate *jhāna* and enjoy *jhānic* pleasures like *Brahmā*.
- *Brahmā* and *Devā* are content with their sensual or *jhānic* pleasures. It is mostly those who had attained *magga phala* as humans who are interested in following the Path. On the other hand, those in the *apāyā* do not have the mental capacity even to comprehend Dhamma.
- That is why the human realm is the best-suited to follow the Noble Path. Humans can comprehend Dhamma. Furthermore, other than a relatively few, they do experience enough suffering to be motivated to think about the problem of suffering.
- In this and a few upcoming posts, we will focus more on the reasons for living-beings to be born in all these different realms. That will help us understand the critical principles of *Paṭicca Samuppāda*.

Overview of the Three *Lokā*

7. We know that causes are not ENOUGH to bring rebirths in respective realms, as discussed in the previous post, “[Kamma and Paticca Samuppāda – Introduction](#).” But causes are NECESSARY to bring rebirth in a given realm. Without a cause, there cannot be a rebirth in a given realm.

- A discussed in that post, one MUST cultivate a *jhāna* to get rebirth in a *Brahma* realm. A *rūpāvacara jhāna* leads to rebirth in one of 16 realms in the *rūpāvacara Brahma* realms (in *rūpa loka*). An *arūpāvacara jhāna* will lead to rebirth in an *arūpāvacara Brahma* realm (in *arūpa loka*).
- **Of the three types of loka, *kāma loka* is the “default loka” for living beings.** Living beings have cravings for sensory pleasures (*kāma assāda*), and that is *kāma rāga*. One who has very strong *kāma rāga*, and is willing to do immoral deeds to enjoy them, has *lobha*.
- Those with *lobha* also have a higher version of *paṭigha*, and that is *dosa*. One acting with *lobha/dosa* can do immoral deeds (*pāpa kamma*) and make *kamma bīja* suitable to bring rebirths in the *apāyā* (four lowest realms in *kāma loka*.)
- To summarize, *lobha/dosa* are strong versions of *kāma rāga/paṭigha*; see, “[Lobha, Dosa, Moha versus Rāga, Patigha, Avijjā](#).”
- Those with *kāma rāga/paṭigha* are capable of engaging in moral actions (*puñña kamma*.) Such *puñña kamma* are the causes to bring “good rebirths” in the human realm or the six *Deva* realms.
- The bottom line is that living-beings in *kāma loka* have strong cravings for sensual pleasures (*kāma rāga*.) Until those cravings are removed, it is not possible to overcome rebirths in *kāma loka*.
- As we know, even a *Sotāpanna* has *kāma rāga*. Only an *Anāgāmi* has removed *kāma rāga*.

Craving for Sensory Pleasures Is the Root of Most Suffering

8. From the above discussion, it should be clear that suffering in the rebirth process can be attributed to the innate tendency of living-beings to crave sensual pleasures (i.e, to have *kāma rāga*.)

- When they do immoral deeds (*pāpa kamma*) in their pursuit of sensual pleasures, they build-up *kammic* energies (*kamma bīja*) to bring about rebirths in the *apāyā*.
- Even those who just enjoy sensual pleasures (without doing immoral deeds like killing, stealing, sexual misconduct, etc) they cannot “escape” the realms in the *kāma loka*. This is clear in the “*taṇhā paccayā upādāna*” and “*upādāna paccayā bhava*” steps in *Paṭicca Samuppāda*.
- In order to overcome or transcend the *kāma loka*, one MUST lose the cravings for sensual pleasures or *kāma assāda*. I will try to use the term “*kāma assāda*” in the future since it relates directly to *kāma loka*. Here “*assāda*” means “pleasures” and thus *kāma assāda* are sensual pleasures (taste, smell, and touches including sex.)

Dangers in *Kāma Assāda*

9. What we discussed above is an essential teaching of the Buddha that is hidden these days. **The Buddha described “*kāma assāda*” or just “*kāma*” to be very dangerous.**

- [Bhaya Sutta \(AN 6.23\)](#) says: “ ‘*Bhayan*’*ti*, bhikkhave, *kāmānametaṃ adhivacanāṃ*; ‘*dukkhan*’*ti*, bhikkhave, *kāmānametaṃ adhivacanāṃ*; ‘*rogo*’*ti*, bhikkhave, *kāmānametaṃ adhivacanāṃ*;..” OR “ ‘**Danger**’, ‘**suffering**’, ‘**disease**’,..are terms for **sensual pleasures**.”
- [Bhaya Sutta \(AN 8.56\)](#) says, “ ‘danger’ is a term for sensual pleasures. ‘Suffering’, ‘disease’, ‘infected wound’, ‘pierced by spear’, etc. are terms for sensual pleasures. And why is ‘danger’ a term for sensual pleasures? Someone who is caught up in sensual greed and shackled by lustful desire is not freed from dangers in the present life or in lives to come. That is why ‘danger’ is a term for sensual pleasures..”
- See the English translations there for more details.

- There are many *suttā* that emphasize the hidden dangers in *kāma assāda* or *kāma rāga*. For example, [*Mahādukkhakkhandha Sutta* \(MN 13\)](#), [*Cūladukkhakkhandha Sutta* \(MN 14\)](#), [*Cūladhammasamādāna Sutta* \(MN 45\)](#), and many others discuss the *ādīnava* or “bad and dangerous consequences of indulging in sensual pleasures, i.e., dangers of *kāma assāda*.”
- I have given the links to the Pāli versions of those *suttā* at Sutta Central. One can access translations to several languages, including English, by clicking on the “down arrow” above the name of the *sutta*.

10. We will make the connection of various types of rebirths to *saṅkhāra* and *Paṭicca Samuppāda* in the next post.

9.4.5 Gati (Habits/Character) Determine Births – Saṃsappanīya Sutta

April 11, 2020

Gati (Habits/Character) is a key concept

1. *Gati* (Habits/Character) is a key concept that has been hidden for hundreds of years, just like the true meanings of *anicca* and *anatta*. I just did a search for the keyword “*gati*” on *Tipiṭaka* at the Sutta Central and came up with [“WebLink: suttacentral: 515 results of search for gati.”](#) At the end of the post, I will discuss one *sutta* as an example, which describes how one with “crooked *gati*” is a candidate to be “reborn crooked.”

- Any given person thinks, speaks, and acts based on his/her views. If started with wrong views, one tends to go in the wrong direction. That is why *Sammā Diṭṭhi* or “correct views” comes first in the Noble Eightfold Path.
- *Avijjā* and *micchā diṭṭhi* go together. See, for example, [“WebLink: suttacentral: Avijjā Sutta \(SN 45.1\).”](#)
- Any person will have a certain set of *gati* at a given time, based on *avijjā* and *micchā diṭṭhi* at that time. As one makes progress on the path, *avijjā* and *micchā diṭṭhi* will be reduced and one’s bad *gati* will be reduced too.
- *Gati* is a common Sinhala word with the same meaning as in Pāli, so it would be easier for a Sinhala-speaking person to understand this post (ගති. “බලපත්‍රය” නිවැරදිවනම් බලපත්‍රයක් ලබාගන්නා බැවිනි.)
- The Buddha explained that if one cultivates “dog *gati*” that could lead to rebirth as a dog in the [“Kukkuravatika Sutta \(Majjhima Nikaya 57\) – Kammakkhaya.”](#)
- An introduction to *gati* at, [“The Law of Attraction, Habits, Character \(Gati\), and Cravings \(Āsava\).”](#) Further information at, [“9. Key to Ānāpānasati – How to Change Habits and Character \(Gati\).”](#)
- It is also important to know the difference between standard English and “*Tipiṭaka* English.” See, [““Tipiṭaka English” Convention Adopted by Early European Scholars – Part 1](#)” and [““Tipiṭaka English” Convention Adopted by Early European Scholars – Part 2.”](#)

Five Main Types of Gati

2. The Buddha explained that there are five main types of *gati*. The [WebLink: suttacentral: Gati Sutta \(AN 9.68\)](#): “*Pañcimā, bhikkhave, gatiyo. Katamā pañca? Nirayo, tiracchānayo, pettivisayo, manussā, devā—imā kho, bhikkhave, pañca gatiyo. Imāsaṃ kho, bhikkhave, pañcannaṃ gatīnaṃ pahānāya ... pe ... ime cattāro satipaṭṭhānā bhāvetabbā*”ti.”

Translated: “*Bhikkhus*, there are five character qualities (*gati*). What five? (Those belonging to) hell, the animal realm, the ghost realm, humans (*manussā*), and *Devā*. To eliminate those five types of *gati*, you should cultivate *Satipaṭṭhānā*.”

- In the [WebLink: suttacentral: Saṅgīti Sutta \(DN 33\)](#): “*Pañca gatiyo—nirayo, tiracchānayo, pettivisayo, manussā, devā*.”
- By the way, *Saṅgīti Sutta* provides definitions of many key Pāli words.
- It is to be noted that all six *Deva* and 26 *Brahma* realms are included in the *Deva* category in many *suttā*, including the *Dhammacakkappavattana Sutta*. See #7 of, “[Dhammacakkappavattana Sutta Interpretation – Uddesa, Niddesa, Paṭiniddesa](#).”

3. In many English translations, the Pāli word “*gati*” is mistranslated as “destination.” But the correct translation is “habits/character” as explained in detail in the links in #1 and also at #8 below. We can also see that in other *suttā*, for example, in the *Mahāparinibbāna Sutta* (DN 16.)

- In the [WebLink: suttacentral: 9. Anāvattidhammasambodhiparāyana \(DN 16\)](#) section of *Mahāparinibbāna Sutta*, Venerable Ānanda asks the Buddha about several people who had recently died: “*sālho nāma, bhante, bhikkhu nātike kālaṅkato, tassa kā gati, ko abhisamparāyo?*” OR “the monk named Sālha has passed away in Nāḍika. What is his *gati* (that led to the new birth) and **where has he been reborn?**”
- However, it is true that one with “bad *gati*” (or *dugati*), for example, will have a “bad destination” (or *duggati*.) Similarly, one with “good *gati*” (or *sugati*), will have a “good destination” (or *sugati*.) Note the subtle difference in *dugati* and *duggati*, whereas the same word “*sugati*” is used for both “*gati*” and “destination.”
- Now, let us look at the connections between *gati*, *saṅkhāra*, and rebirths in various realms.

Connection to *Paṭicca Samuppāda*

4. As we know, *Paṭicca Samuppāda* dictates future existences (*bhava*) and births (*jāti*.) One generates (*abhi*)*saṅkhāra* due to *avijjā* and engages in three types of *abhisāṅkhāra*. This was discussed in detail in the posts, “[Kamma, Saṅkhāra, and Abhisāṅkhāra](#)” and “[Kamma are Done with Saṅkhāra – Types of Saṅkhāra](#).” It is essential to understand those posts.

- As explained there, those three types of *abhisāṅkhāra* are, *Puññābhisāṅkhāra* (*puñña abhisāṅkhāra*), *apuññābhisāṅkhāra* (*apuñña abhisāṅkhāra*), and *āneñjābhisāṅkhāra* (*āneñja abhisāṅkhāra*.)
- Those lead to various types of rebirths, per *Paṭicca Samuppāda*.

5. We can understand the connection between those three types of *abhisāṅkhāra* and the five types of *gati*, in simple terms, as follows.

- *Apuñña abhisāṅkhāra* (in the mind) lead to the ten types of *akusala kamma* and thus lead to rebirths in the *apāyā*. In other words, such *kamma* committed by those with *niraya*, *tiracchāna*, and *peta gati*.
- On the other hand, one with *manussa* or *deva gati* does *puñña kamma* with *puñña abhisāṅkhāra*. They lead to rebirths in the human, *Deva*, and the 16 *rūpāvacara Brahma* realms. It is to be noted that cultivation of the four lower *jhāna* falls under *puñña abhisāṅkhāra*.
- *Āneñja abhisāṅkhāra* are cultivated while practicing the highest four *jhānā* leading to rebirths in the four *arūpāvacara Brahma* realms. It is interesting to note that “*āneñja*” means “un-dying” and thus “permanent.” Ancient *yogis* (including Ājāra Kālāma and Uddaka Rāmaputta) thought these realms have infinite lifetimes and equated rebirths there to the cessation of the rebirth process. Of course, the Buddha found out that those also have finite lifetimes, even though extremely long, lasting eons (billions of years).
- Also see, “[Saṅkhāra, Kamma, Kamma Bija, Kamma Vipāka](#)” and #14 of “[Vacī Saṅkhāra – Saṅkappa \(Conscious Thoughts\) and Vācā \(Speech\)](#)”

Good Realms Are *Sugati* and Bad Realms Are *Duggati*

6. There are several *suttā* that discuss various types of behaviors that lead to good and bad rebirths. Those with “good *gati*” tend to reborn in “realms with good *gati*” or “*sugati*” (“*sukha*” + “*gati*.”) On the other hand, those with “bad *gati*” tend to reborn in “realms with bad *gati*” or “*duggati*” (“*dukkha*” + “*gati*.”)

- For example, see, “[WebLink: suttacentral: Dukkha Sutta \(AN 5.3\)](#),” “[WebLink: suttacentral: Dukkha Sutta \(AN 6.75\)](#),”

7. The last verse of the “[WebLink: suttacentral: Vinopama Sutta \(SN 35.246\)](#)” is informative: “*Evameva kho, bhikkhave, bhikkhu rūpaṃ samanvesati yāvatā rūpassa gati, vedanaṃ samanvesati yāvatā vedanāya gati, saññaṃ samanvesati yāvatā saññāya gati, saṅkhāre samanvesati yāvatā saṅkhārānaṃ gati, viññāṇaṃ samanvesati yāvatā viññāṇassa gati. Tassa rūpaṃ samanvesato yāvatā rūpassa gati, vedanaṃ samanvesato ... pe ... saññaṃ ... saṅkhāre ... viññāṇaṃ samanvesato yāvatā viññāṇassa gati. Yampissa taṃ hoti ahanti vā mamanti vā asmīti vā tampi tassa na hoti*”ti.”

Translated: “So too, *bhikkhus*, a *bhikkhu* investigates a *rūpa* to see the connection to *gati* in that *rūpa*, he investigates feelings to see the connection to *gati* in those feelings, he investigates a perception to see the connection to *gati* in that perception, he investigates *saṅkhāra* to see the connection to *gati* in that *saṅkhāra*, he investigates *viññāṇa* to see the connection to *gati* in that *viññāṇa*. Through those investigations, *whatever notions of ‘I’ or ‘mine’ or ‘I am’ had occurred to him before no longer occur to him.*”

- The Buddha described a living being as a “collection” of the five aggregates: *rūpa*, *vedanā*, *saññā*, *saṅkhāra*, and *viññāṇa*. A living-being, in any of the 31 realms, arises due to a certain *paṭisandhi viññāṇa* cultivated with a certain *gati*.
- What this deep *sutta* is saying that when one understands the *Paṭicca Samuppāda* process, one would be able to “see” how various types of *gati* lead to **corresponding rebirths**.
- Now we will discuss the [WebLink: suttacentral: Saṃsappanīya Sutta \(AN 10.216\)](#) which explains how a human can be reborn a “creeping creature” like a snake. [*sappana* :[nt.] crawling. *saṃsappi* : [aor. of *saṃsappati*] crept along; crawled; moved slowly.]

Saṃsappanīya Sutta (AN 10.216)

8. In this *sutta*, the Buddha has explained that one who engages in *dasa akusala* has “**bad *gati***” or “*dugati*” or “crooked/bad character.” Such people are eligible for rebirth in “bad realms” or “***duggati***.”

- Similarly, one who abstains from *dasa akusala* has “**good *gati***” or “*sugati*” or “straight/good character.” Such people are eligible for rebirth in “good realms” or “***sugati***.”

I am going to skip some standard verses and translate (explain) the critical verses to provide the essence.

- “*Bhikkhus*, I will explain to you how creeping, crooked creatures like snakes are born in this world.”

“Crooked *Kamma*” Done With “Crooked *Gati*” Lead to “Crooked Births”

9. “And what, *bhikkhus*, is that explanation of the Dhamma on creeping creatures? *Bhikkhus*, living-beings are the owners of their *kamma*, the heirs of their *kamma*. **They have *kamma* as their origin, *kamma* as their bondage, bound to their *kamma*.** Whatever *kamma* they do, good or bad, they will inherit the corresponding *vipāka*.

- In the following, the numbers refer to each of the *dasa akusala*.

(1) “Consider **someone who destroys life**. He is murderous, bloody-handed, given to blows and violence, merciless to living beings. He is crooked in bodily actions, speech, and thoughts. His bodily *kamma*, verbal

kamma, mental *kamma* are all crooked. His ***gati* is crooked and his rebirth is crooked (*jimhā gati*, *jimhupapatti***, where “*jimhā*” is “crooked” and “*jimhupapatti*” is “*jimhā*” + “*upapatti*”).

- For one with a crooked *gati* and rebirth, I say, there is one of two destinations: either the exclusively painful hells or a species of creeping animal. And what are the species of creeping animals? The snake, the scorpion, the centipede, the mongoose, the cat, the mouse, and the owl, or any other animals that creep away when they see people.
- **Thus a being is reborn from a being, meaning one is reborn through one's deeds.** When one has been reborn, one makes more (defiled) sensory contacts (to be born again.) **It is in this way, I say, that beings are the heirs of their own *kamma*.**

(2) “Similarly, someone takes what is not given ... (3) ... engages in sexual misconduct ... (4) ... speaks falsehood ... (5) ... speaks divisively ... (6) ... speaks harshly ... (7) ... indulges in idle chatter ... (8) ... is full of greed ... (9) ... has a mind of ill will and intentions of hate ... (10) ... holds the ten types of *micchā diṭṭhi*. He creeps along by body, speech, and mind. His bodily *kamma* is crooked ... His *gati* crooked and his rebirth is crooked....

- **Thus a being is reborn from a being, meaning one is reborn through one's deeds.** When one has been reborn, one makes more (defiled) sensory contacts (to be born again.) **It is in this way, I say, that beings are the heirs of their own *kamma*.**

“Straight *Kamma*” Done With “Straight/Honest *Gati*” Lead to “Good Births”

10. “*Bhikkhus*, beings are the owners of their *kamma*, the heirs of their *kamma*. They have *kamma* as their origin, *kamma* as their relative, *kamma* as their resort. Whatever *kamma* they do, good or bad, they are its heirs.

(1) “Consider someone **who has abandoned the destruction of life**. With the weapons laid aside, conscientious and kindly, he dwells compassionate toward all living beings. He does not engage in crooked bodily actions, speech, and thoughts. His bodily *kamma*, verbal *kamma*, mental *kamma* are all straight. His *gati* are straight and his rebirth is straight (good.)

- For one with a straight *gati* and rebirth, I say, there is straight *gati* (***uju gati***; where “*uju*” means “straight”) and births (***ujupapatti***). They have rebirths in either pleasurable heavens or eminent families, such as those of affluent householders, families that are rich, with great wealth and property, abundant gold and silver, abundant treasures and belongings, abundant wealth and grain.
- **Thus a being is reborn from a being, meaning one is reborn through one's deeds.** When one has been reborn, one makes more (defiled) sensory contacts (to be born again.) **It is in this way, I say, that beings are the heirs of their own *kamma*.**

(2) “Having abandoned the taking of what is not given, someone abstains from taking what is not given ... (3) ... abstains from sexual misconduct ... (4) ... abstains from false speech ... (5) ... abstains from divisive speech ... (6) ... abstains from harsh speech ... (7) ... abstains from idle chatter ... (8) ... is without longing ... (9) ... is of goodwill ... (10) ... holds correct views. He does not creep along by body, speech, and mind. His bodily *kamma* is straight ... His *gati* are straight and his rebirth is straight....

- **Thus a being is reborn from a being, meaning one is reborn through one's deeds.** When one has been reborn, one makes more (defiled) sensory contacts (to be born again.) **It is in this way, I say, that beings are the heirs of their own *kamma*.**

“*Bhikkhus*, beings are the owners of their *kamma*, the heirs of their *kamma*. They have *kamma* as their origin, *kamma* as their relative, *kamma* as their resort; whatever *kamma* they do, good or bad, they are its heirs.

11. Again, it is necessary to understand the posts, “[Kamma, Saṅkhāra, and Abhisāṅkhāra](#)” and “[Kamma are Done with Saṅkhāra – Types of Saṅkhāra](#).”

9.5.1 Paṭicca Samuppāda – Introduction

October 4, 2021; revised August 31, 2022; rewritten March 4, 2023

Resources in the *Tipiṭaka*

1. In the “[WebLink: suttacentral: Saṃyutta Nikāya 12](#)” in the *Sutta Piṭaka*, there are over 100 *suttas* on *Paṭicca Samuppāda*. However, the first 70 are the more critical. The series starts with the “[WebLink: suttacentral: Paṭiccasamuppāda Sutta \(SN 12.1\)](#).” That first *sutta* introduces the terms in *Paṭicca Samuppāda*, and the second one, “[WebLink: suttacentral: Vibhaṅga Sutta \(SN 12.2\)](#)” provides brief descriptions of the terms in *Paṭicca Samuppāda*.

- Of course, many other vital *suttas* and sections spread over the whole *Tipiṭaka* because it is the essence of Buddha Dhamma. For example, “[WebLink: suttacentral: Mahānidāna Sutta \(DN 15\)](#)” is a key *sutta* on *Paṭicca Samuppāda*.
- To get to deeper explanations, one needs to refer to the “[WebLink: suttacentral: Paṭiccasamuppādavibhaṅga \(Abhidhamma Vb 6\)](#)” in “*Vibhaṅga Pakaraṇa*,” one of the three original Commentaries included in the *Tipiṭaka*. As usual, SOME of the English translations there are NOT correct. Of course, the original Pāli versions (in English letters) are accurate.
- The Commentary, *Visuddhimagga*, written (much later, around 450 CE) by Ācariya Buddhaghosa is completely inadequate. It only discusses the *Akusala-mūla Uppatti Paṭicca Samuppāda* and does not even discuss the *Kusala-Mūla Paṭicca Samuppāda*. In brief, the *Akusala-Mūla Uppatti Paṭicca Samuppāda* explains how different types of births arise in the rebirth process and the *Kusala-Mūla Paṭicca Samuppāda* explains the way to stop the rebirth process and attain *Nibbāna*.

A Novel Approach

2. I have discussed *Paṭicca Samuppāda* in the section “[Paṭicca Samuppāda](#).” I want to take a different approach in this series, hopefully providing new insights.

- Almost all explanations of *Paṭicca Samuppāda* follow the standard sequence starting with “*avijjā paccayā saṅkhāra*.” That is because the main cause for the rebirth process is *avijjā*, and its result is suffering (the last step in *Paṭicca Samuppāda*, i.e., “*jāti paccayā jarā, maraṇa, soka-parideva-dukkha-domanassupāyāsā sambhavan’ti*”). As we have discussed, the rebirth process and all that

suffering arise due to ignorance of the Four Noble Truths/ *Tilakkhaṇa/ Paṭicca Samuppāda*; see, [“Buddha Dhamma – Noble Truths, Paṭicca Samuppāda, Tilakkhaṇa.”](#)

- However, in real life, we don’t start acting with *avijjā* without reason. Our unwise actions ALWAYS begin based on an *ārammaṇa* that comes through one of the six senses.

Mind “Turns On” With an *Ārammaṇa*

3. Our minds are inactive if we are unconscious or deeply asleep. While in a deep sleep, we are unaware of the “world” around us. But, of course, we are still alive and our bodies are kept alive by *kammic* energy.

- We take action in response to an external stimulus called an *ārammaṇa*. Some actions are “morally bad,” some are “morally good” and others are “neutral.”
- An *ārammaṇa* can come in on its own. For example, while walking we may see and hear various things. Most are “neutral,” and we ignore them.
- But if we see something “eye-catching” we may even stop and look at it. If we hear a loud noise, we may walk away from it. In such cases, we take action based on such an *ārammaṇa*.
- The inputs coming through the five physical senses are easy to recognize. But many *ārammaṇa* come through the mind itself. For example, thoughts about memory a future plan may come to mind. We may act on those too. For example, if thoughts about meeting a friend last week or a planned activity for tomorrow may come to mind while waiting to fall asleep. We may act on those too. For example, if thoughts about an old friend come to mind, one may decide to call that friend.

What Happens When an *Ārammaṇa* Brings a Sensory Input?

4. It is helpful to see how the Buddha described what happens when an *ārammaṇa* comes to mind. That will help our analysis of how a *Paṭicca Samuppāda* process is initiated.

- If we see something while walking, our eyes capture an image of a particular object, say a person (X.) It just happened because that person was also walking on the road. Even though the eyes capture that image, it is not the eyes that “see” that person. It is our mind that “sees.” We don’t need to understand the details, but here is what happens: The image of person X captured by the eyes is processed by the brain and then transmitted to the *cakkhu pasāda rūpa* in the “mental body” or the *gandhabba*.
- At the SAME MOMENT the *cakkhu pasāda rūpa* (abbreviated as “*cakkhu*”) receives such an image from the brain, it passes that image (called “*rūpa*”) to the seat of the mind, *hadaya vatthu*. That is how the mind becomes aware of that person X, i.e., how a “*cakkhu viññāṇa*” arises.
- That interaction between the *cakkhu* and a *rūpa* leading to the “awareness of an external object” is written in Pāli as, “*cakkhuñca paṭicca rūpe ca uppajjati cakkhu viññāṇam*.” For details, see the post, [“Phassa \(Contact\) – Contact With Pasāda Rūpa.”](#)
- **Don’t be discouraged by these Pāli words.** Try to get the basic idea. **The main point is that “seeing” does not happen in the physical eye. The mind sees (not the eyes and not the brain)!**

5. The Pāli verse, “*cakkhuñca paṭicca rūpe ca uppajjati cakkhu viññāṇam*” is commonly translated as, “eye-consciousness arises dependent on the eye and sights.” But we must remember that the “contact” is NOT between the PHYSICAL EYES and the PHYSICAL OBJECT (a person in our above example.)

- In that verse, “*cakkhu*” refers to the *cakkhu pasāda rūpa* and “*rūpa*” refers to the “image of person X” (formed by the brain based on the image received from the physical eyes.) The “meeting of the *cakkhu* and *rūpa*” is indicated by “*paṭicca*” in the above verse, which leads to the mind “seeing an image of person X” (*cakkhu viññāṇa* or eye-consciousness).
- Therefore, there are a few CRITICAL things to remember: “*cakkhu*” is not physical eyes; “*rūpa*” is not the actual object (a person in this example); “*cakkhu viññāṇa*” does not arise in the eyes or the brain or

even in the *cakkhu pasāda rūpa* (*cakkhu*.) That *cakkhu viññāṇa* (eye-consciousness) arises in one's mind!

- The other processes involving ears, nose, tongue, and the physical body (touch) must be understood similarly.

Two Meanings of *Paṭicca*

6. The Pāli word “*paṭicca*” has TWO possible meanings, depending on the context. The term “*Paṭicca Samuppāda*” means “getting attached willingly” or “*paṭi*” + “*icca*” (“*paṭi*” means to “bind.”) See “[Paṭicca Samuppāda – “Pati+ichcha” + “Sama+uppāda”](#)”

- However, in the above verse, *paṭicca* [*paṭi* + *ca* = bind + and = and bind = in dependence] implies “**two entities (that are compatible) making contact.**” A *rūpa* does not “make contact” with one of the other four *indriya* like “*sota pasāda rūpa*” or “*ghāṇa pasāda rūpa*.” Similarly, a sound (*sadda*) does not “make contact” with “*cakkhu pasāda*” or “*ghāṇa pasāda*.”
- In the “[Samyojana Sutta \(SN 44.9\)](#),” the Buddha explains the second meaning: “*Seyyathāpi, bhikkhave, telaṇca paṭicca vaṭṭiṇca paṭicca telappadīpo jhāyeyya*” OR “*Bhikkhus, an oil lamp burns in dependence on oil and a wick (oil getting soaked in the wick).*” An old-fashioned oil lamp has a wick partially immersed in oil. That oil soaks the wick gets to the burning wick's tip, and sustains the flame. Therefore, oil and wick are compatible and will “*paṭicca*.” If one puts a “wick made out of the plastic” in oil, the oil will not soak the plastic, i.e., they are incompatible and thus would not “get together” or *paṭicca*.
- Now let us return to our example of “seeing a person.”

Cakkhu Viññāṇa Is More Than Just “Seeing”

7. Suppose that person X is a friend. The moment we see person X, we identify him. Think about it. It does not take more than a split second to identify X. How does that happen?

- A complex process happens in mind during the event of “*cakkhuṇca paṭicca rūpe ca uppajjati cakkhu viññāṇam*.” **That process happens in that single *citta* which lives only for less than a billionth of a second.** Only a Buddha can discern something that can happen that fast. We can verify that to be true only by seeing that it is compatible/consistent with nature.
- **The mind needed to compare it with previous experiences to identify X as a friend.** Otherwise, how would it identify person X?
- It is possible because the mind can access our memories “stored” as the five aggregates (*pañcakkhandha*)! To understand that process, one must understand the “[The Five Aggregates \(Pañcakkhandha\)](#)” (see the first six posts there) and “[Where Are Memories “Stored”? – Connection to Pañcakkhandha](#).”
- As we have discussed, the mind can access our past experiences and future hopes (within an unimaginably short time.) *Rūpakkhanda* is of 11 types, including “past *rūpa* we have experienced” and the same is true for the other four aggregates: *vedanā*, *saññā*, *saṅkhāra*, *viññāṇa*. The mind can scan our memories/hopes and IDENTIFY the sense object (we have had prior experiences with it). That is how the mind identified person X as “a friend.” **The amazing thing is that it happens so fast.** See, “[Amazingly Fast Time Evolution of a Thought \(Citta\)](#).”
- Further details and examples in “[Arising of the Five Aggregates With an Ārammana](#).”

Ref. 1: “[What Did the Buddha Mean by a “Loka”?](#)”

Ref. 2: Rest of the posts in the subsection: “[Paṭicca Samuppāda, Tilakkhaṇa, Four Noble Truths](#).”

- That should be enough to get to at least the *Sotāpanna Anugāmi* stage.

9.5.2 What Did the Buddha Mean by a “Loka”?

October 11, 2021; revised March 4, 2023

By the word “*loka*” the Buddha did not mean only the “physical world” we can experience. He meant various types like *kāma loka*, *rūpa loka*, *arūpa loka*, *manussa loka*, *Deva loka*, etc. [*Loka* means the 31 realms of existence.]

Introduction

1. In the previous post, “[Paṭicca Samuppāda – Introduction](#),” we started a new discussion on *Paṭicca Samuppāda*. In the [WebLink: suttacentral: Sāmyutta Nikāya 12](#) in the *Sutta Piṭaka*, there are over 100 *suttas* on *Paṭicca Samuppāda*.

- Recently I realized that these *suttas* are in a particular order. Even though it is impossible to discuss all those *suttas*, it is beneficial to see the progression of *suttas* there to get some key insights. Furthermore, I will discuss only those *suttas* relevant to our ongoing discussion on the connection between *Paṭicca Samuppāda* and *Tilakkhaṇa* (and the Noble Truths.)
- In the previous post, I pointed out that the first two *suttā* briefly introduce *Paṭicca Samuppāda*. See “[Paṭicca Samuppāda – Introduction](#).”

2. The third *sutta*, “[WebLink: suttacentral: Paṭipadā Sutta \(SN 12.3\)](#)” points out that the steps in the standard *Akusala-mūla Paṭicca Samuppāda* describe unwise actions (starting with “*avijjā paccayā saṅkhāra*”) that lead to future suffering (“*jāti paccayā jarā, maraṇa, soka-parideva-dukkha-domanassupāyāsā sambhavan’ti*”). Therefore, it describes an average human’s ***micchā paṭipadā* (immoral practices/way of living)**. Such future suffering can be stopped by stopping the steps in *Akusala-Mūla Paṭicca Samuppāda*. That is accomplished by cultivating wisdom (knowledge of the Noble Truths) and removing *avijjā*. Once one understands the true nature of this world (*Tilakkhaṇa*) at the *Sotāpanna* stage, one will follow ***sammā paṭipadā* (correct practices/way of living)** or the **Noble Eightfold Path** to get to *Nibbāna*.

- Then there are seven *suttas* (SN 12.4 through 12. 10) that describe how most recent 7 Buddhas discovered how future suffering arises via the *Paṭicca Samuppāda* process, i.e., why an average human follows the ***micchā paṭipadā***. (The teachings of a given Buddha last only a limited time. That is why each Buddha must discover this process independently.) Of course, simultaneously, each Buddha figures out how to stop future suffering in the rebirth process, i.e., ***sammā paṭipadā***.
- The following *sutta* in the series (of interest to the present discussion) clarifies a “*loka*.” In almost all English translations, “*loka*” is translated as “world” and gives the impression that the Buddha meant the “physical world around us” or even “the universe with its stars, planets, galaxies, etc.” **But the Buddha meant something broader, as we see below.**

Kaccānagotta Sutta (SN 12.15) – “*Loka*” Is Not the “Physical World”

3. The “[WebLink: suttacentral: Kaccānagotta Sutta \(SN 12.15\)](#)” provides the first clues. Venerable Kaccānagotta asks the Buddha what is meant by “*sammā diṭṭhī*” and the Buddha explains in the following way: “*Dvayanissito khvāyaṃ, kaccāna, loko yebhuyyena—atthitañceva natthitañca.*”

- The world (*loka*) arises mainly based on two extreme views:
 - (i) the world lasts forever (*atthitañca*), and
 - (ii) the world ends at the death of the present physical body (*natthitañca*.)

- Here the Buddha is NOT talking about the physical world with stars, planets, galaxies, etc. He is referring to the existence of a living being. Just like these days, people mainly had two extreme views: (i) a living being exists forever (i.e., the belief of a “soul” or “*ātman*”), and (ii) “one’s world” (*loka*) ends at the death of the physical body (the materialistic view of today).

4. Then the Buddha explains that both those views are incorrect. A living being will exist (within the 31 realms) as long as the (*Akusala-Mūla*) *Paṭicca Samuppāda* process is in effect and thus exists in a “*loka*.” Of course, most existences are filled with unbearable suffering. And that will not end until that living being starts comprehending the Four Noble Truths (or *Tilakkhaṇa* or *Paṭicca Samuppāda*) and becomes a *Sotāpanna*.

Thus the Buddha almost always used the word “*loka*” to refer to the “world of a living being.” The next verse in this *sutta* also confirms that: “*Tañcāyaṃ upayupādānaṃ cetaso adhiṭṭhānaṃ abhinivesānusayaṃ na upeti na upādiyati nādhīṭṭhātī: ‘attā me’ti. ‘Dukkhamēva uppajjamānaṃ uppajjati, dukkhaṃ nirujjhamānaṃ nirujjhatī’ti na kaṅkhati na vicikicchati aparapaccayā nāṇamevassa ettha hoti. Ettāvataṃ kho, Kaccāna, sammā diṭṭhi hoti.*”

Translated: “But someone with the right view does not cling to existence. **He does not see any benefit of existence in this world, i.e., anything in this world is of no value (and thus should be considered mine or ‘attā me’ti). He has no perplexity or doubts that what arises is only suffering; what ceases is only suffering. In this way, Kaccāna, there is CORRECT VIEW.**”

5. The verses at the end of the *sutta* provide further confirmation:

“*Sabbam atthī’ti kho, kaccāna, ayameko anto. ‘Sabbam natthī’ti ayam dutiyo anto.*

Ete te, kaccāna, ubho ante anupagamma majjhena tathāgato dhammaṃ deseti:

– ‘*avijjāpaccayā saṅkhārā; saṅkhārapaccayā viññānaṃ ...pe... evametassa kevalassa dukkhakkhandhassa samudayo hoti.*

– *Avijjāya tveva asesavirāgaṇirodhā saṅkhāraṇirodho; saṅkhāraṇirodhā viññāṇaṇirodho ...pe... evametassa kevalassa dukkhakkhandhassa nirodho hotī’ti.*

Translated:

“ ‘**All exists**’: Kaccāna, that is one extreme. ‘**All does not exist**’: that is the second extreme.

Without veering towards either of these extremes, the *Tathāgata* teaches the Dhamma by the middle:

– ‘With *avijjā* as condition, *saṅkhāra* arise; with *saṅkhāra* as condition, *viññāṇa* (and the rest of steps in PS).... Such is the origin of this whole mass of suffering.

– But with the remainderless fading away and cessation of *avijjā* comes the ending of *saṅkhāra*; with the cessation of *saṅkhāra*, cessation of *viññāṇa* (and the rest of steps in PS).... Such is the end of this whole mass of suffering.”

- Also, note that the Buddha has defined “**all (*sabba*)**” as “**all that pertains to a living being**,” i.e., the five aggregates/twelve *āyatana*/six *dhātu*/etc. Thus, by “all,” he did not restrict to the physical world (that is, of course, a part of “all”). The five aggregates/twelve *āyatana*/six *dhātu*/etc. include the physical and mental worlds. See, “[WebLink: suttacentral: 256 results for kiṇca AND sabbam.](#)”
- But in a *sutta* elsewhere in the *Tipiṭaka*, the Buddha did discuss the “physical world” too.

***Rohitassa Sutta* (AN 4.45) – A *Sutta* That Addresses the “Physical World”**

6. In the “[WebLink: suttacentral: Rohitassa Sutta \(AN 4.45\)](#)” *Rohitassa Deva* comes to the Buddha and asks whether it is possible to “travel to the end of the physical world.” Buddha answers that it is not possible. The *Rohitassa* says he had confirmed that in a previous life where he had developed *abhiññā* powers as a

yogi. With his *manomaya kāya* (*gandhabba*-like), he could travel the distance from one ocean to another in one stride. One day, he decided to see the “end of the world.” He said he traveled for a hundred years and died on the way.

Then the Buddha makes the following deeper point: “*Yattha kho, āvuso, na jāyati na jīyati na mīyati na cavati na upapajjati, nāhaṃ taṃ gamanena lokassa antaṃ ñāteyyaṃ daṭṭheyyaṃ patteyyaṃ’ti vadāmi. Na cāhaṃ, āvuso, appatvāva lokassa antaṃ dukkhassa antakīriyaṃ vadāmi. Api cāhaṃ, āvuso, imasmiṃyeva byāmamatte kaḷevare sasaññimhi samanake lokaṃ paññāpemi loka samudayaṃ loka nirodhaṃ loka nirodhagāminiṃ paṭipadanti.*”

- **The following is the concept described by the Buddha in the above verse:** “Without attaining *Nibbāna*, it is not possible to get to an “end of the world” by traveling. **Until the suffering (associated with the rebirth process) is ended, one cannot reach the “end of this world.”** For it is in this physical body with its *manomaya kāya* with perception and mind (*sasaññimhi samanake*) restricted to moment-to-moment arising (*byāmamatte*) **that I declare the arising and cessation of this world** and the practice that leads to its cessation.”

7. Modern science admits that it cannot find “an edge to the universe.” The size of the universe is genuinely mind-boggling. The furthest a human has traveled in outer space is to the Moon. It is doubtful that humans can travel to even the nearest star system anytime soon or probably ever.

- Distances between stars are too large to be measured in km or miles. Such vast distances are calculated in “light-years.” One light-year is the distance traveled by light in a year. The closest star to us is over four light-years away, **meaning it will take a light beam over four years to travel to that star.**
- **For comparison, the distance to the Moon is only about 1.3 light-seconds!** (Meaning it takes only 1.3 seconds for Moonlight to reach the Earth). Of course, our fastest rockets take about three days to get to the Moon. Such a rocket will take over 80,000 years to get to the vicinity of the nearest star! You can Google that to verify.
- Then there are billions of stars in our galaxy and billions of such galaxies in the universe. There is no way to count all galaxies, and there may not even be a limit!
- That is why the Buddha said there is no point in investigating the physical universe. We will NEVER be able to even fully explore the closest stars and their planets, let alone the whole universe.

“Loka” Is One’s World!

8. Therefore, it is critical to understand that when the Buddha referred to “*loka*,” he meant the existence of a living being.

- That is why the Buddha only talked about various types of *loka* encompassing the 31 realms: In one category, we have *kāma loka*, *rūpa loka*, and *arūpa loka* with 11, 16, and 4 realms, respectively. Within the *kāma loka*, there are various “*lokā*”: *manussa loka* (human world), *peta loka* (loka of hungry ghosts), *Deva loka*, etc. The 20 realms in *rūpa loka* and *arūpa loka* are all inhabited by *Brahmas* and thus are commonly known as *Brahma loka*.
- A living being WILL ALWAYS live in one of those “worlds” until *Parinibbāna* is attained (the death of an *Arahant*.) Thus, the “world” does not cease to exist until then.
- **Thus, we can also see that “cessation of the world” is the same as *Nibbāna*.**

What Are “Loka Samudaya” and “Loka Nirodha”?

9. When the current existence (say, human existence) ends, that is the end of the current “human *bhava*” in the “*manussa loka*.” But all of us (who are not *Arahants*) still have many accumulated *kammic* energies to “power up” different types of “*bhava*” for different kinds of “*loka*.”

- For example, that human may grasp a “*Deva bhava*” and thus be born in a “*Deva loka*.” Someone who has cultivated *jhāna* will grasp a “*Brahma bhava*” and thus be born in a “*Brahma loka*.” Yet another who had killed a parent will grasp a “*niraya bhava*” and be born in a “*niraya*.” For each of them, that will be their “*loka*” until that *kammic* energy runs out.
- However, there will always be many possible *bhava* for any average living being. We all have accumulated many such “seeds” in our past lives and maybe even a few in this life. That is why there is no end to this process until *Arahanthood*. The creation of such a *kammic* energy (to power up a new *bhava*) is the “arising of a “*loka*” or “*loka samudaya*.”
- That “*loka samudaya*” takes place via the *Akusala-Mūla Paṭicca Samuppāda* process. It describes how such *kammic* energies accumulate via acting with *avijjā*. We will continue that discussion in the next post.
- Accumulation of new *bhava* (and grasping such accumulated *bhava*) will stop at the *Arahant* stage. Then no more existences in any realm in the *loka*, and that is “*loka nirodha*” or *Nibbāna*. We will get to that discussion on the *Kusala-mūla Paṭicca Samuppāda* process later.

Paṭicca Samuppāda, Tilakkhaṇa – Details of Four Noble Truths

10. One cannot fully comprehend the Four Noble Truths without understanding *Paṭicca Samuppāda*. *Tilakkhaṇa* provides another way of looking at the same concepts.

- All the posts in this subsection are at “[Paṭicca Samuppāda, Tilakkhaṇa, Four Noble Truths.](#)”

9.5.3 Future Suffering (*Loka/Dukkha Samudaya*) Starts With Sensory Input (*Ārammaṇa*)

October 18, 2021; revised March 4, 2023

As pointed out in many *suttas*, future suffering (*Loka/Dukkha Samudaya*) starts with sensory input (*ārammaṇa*). We specifically discuss the *Loka Sutta* and the *Dukkha Sutta* as part of our discussion of the *suttas* in *Saṃyutta Nikāya* 12 on *Paṭicca Samuppāda*.

Previously Unheard Dhamma – Arising of Suffering Same as Arising of the World

1. I have emphasized this before. However, this is so contradictory to our perception of the world that I need to repeat it.

- **An average person has a wrong “*nicca view/perception*”** that one can succeed and be happy by striving to “make money and acquire things of worldly value” such as houses, cars, etc. That is because our time horizon is VERY short.
- Some people believe that there is no afterlife. Most of those who may believe in rebirth are too busy living this life. Both those groups focus on “enjoying life while it lasts.”
- However, the Buddha pointed out that we will be reborn, and MOST of the future existences are guaranteed to be “filled with much suffering.” That is true for even the most moral person living today until understanding the Noble Truths. I have explained this in detail before.
- Until that is understood, people will inevitably have the “*nicca view/perception*,” i.e., everything will work out if we try to be “successful” by getting a good job and acquiring worldly things. **However, the world has the “*anicca characteristic*.”**

“The World” Includes Both Physical and Mental Worlds

2. Modern science is focused on the “physical world.” But the Buddha taught that one’s world includes both the physical and mental worlds. The mental world is more important than the physical world.

- The Buddha defined the “world” (same as “*sabba*” or “all”) in several different ways. All of them encompass the physical world and the mental world.
- For example, the Buddha taught that everything in the world comes under six *dhātu*: *pathavī*, *āpo*, *tejo vāyo*, *ākāsa*, *viññāṇa*. As you can see, the first five include everything in the physical world. Everything in the mental world comes under *viññāṇa dhātu*.
- The Buddha also described everything in the world as *pañcakkhandha* (five aggregates): *rūpakkkhandha*, *vedanākkhandha*, *saññākkhandha*, *saṅkhārakkhandha*, and *viññāṇakkhandha*. In this categorization, the first five *dhātu* are included in *rūpakkkhandha*. *Viññāṇa dhātu* covers the other four aggregates.

A Sentient Being Has All Six *Dhātu*/Five Aggregates

3. It is evident that the difference between sentient living beings and everything else (rocks, houses, planets, stars, etc., as well as plant life) is that a conscious being has *viññāṇa dhātu*.

- All physical entities (including the physical bodies of living beings) are made of the four great elements (*pathavī*, *āpo*, *tejo vāyo*) and are **in specific locations** in space (*ākāsa*.)
- However, *viññāṇa dhātu* has no such space location. It permeates the whole space and is accessible to any sentient being from anywhere. For example, astronauts can function well on the Moon, just as on Earth. Their memories remain intact, i.e., memory has no spatial locations and is accessible from anywhere.
- Therefore, any living being anywhere in the universe will have all six *dhātu*/ five aggregates.

Loka Sutta (SN 12.44) – Existence in a *Loka* Means Subjected to Suffering

4. The Buddha starts the “[WebLink: suttacentral: Loka Sutta \(SN 12.44\)](#)” by saying, “*Bhikkhus*, I will teach you the **origin** and the **cessation** of the **world**.” (“*Lokassa*, *bhikkhave*, ***samudayañca atthaṅgamañca*** *desessāmi*.”)

- One’s world does not end at the death of the physical body. For example, when a human dies, he will be reborn with a different human body if more kammic energy remains in the human *bhava*. Otherwise, he will grasp a new *bhava*, and the rebirth will be in that appropriate realm (among the 31 realms.) That is “***loka samudaya***” or “**origin of the world**” above.
- As we have discussed, “**cessation of the world**” (stopping the rebirth process) happens at **Arahanthood**, and that *Arahant* will be “totally separated from this world” at *Parinibbana* (death of the physical body.)

5. Next, the Buddha explained how “***loka samudaya***” happens: “*Katamo ca, bhikkhave, lokassa samudayo? Cakkhuñca paṭicca rūpe ca uppajjati cakkhu viññāṇam. Tiṇṇam saṅgati phasso. Phassa paccayā vedanā; vedanā paccayā taṇhā; taṇhā paccayā upādānam; upādāna paccayā bhavo; bhava paccayā jāti; jāti paccayā jarāmaraṇam sokaparidevadukkhadomanassupāyāsā sambhavanti. Ayam kho, bhikkhave, lokassa samudayo.*”

Translated: “And what, *bhikkhus*, is the **origin of the world**? When *cakkhu* and *rūpa* “get together” (*paṭicca*), *cakkhu viññāṇa* arises. Then contact with “*saṇ*” (*samphassa* or “*saṇ*” + “*phassa*”) happens due to one’s *saṅgati* (“*saṇ*” + “*gati*”). As a result, “*samphassa-jā-vedanā*” arises; with *samphassa-jā-vedanā* as condition, craving; with craving as condition, clinging; with clinging as condition, existence; with existence as condition, birth; with birth as condition, **aging-and-death, sorrow, lamentation, pain, displeasure, and despair** come to be. That, *bhikkhus*, is the **origin of the world**.”

- I have discussed this in the previous series on “[Origin of Life](#).” You can review the relevant posts under the “Worldview of the Buddha” subsection. I discussed the “*Chachakka Sutta* (MN 148),” which discusses sensory inputs through the six sense faculties. But we will discuss that verse briefly again.
- It is CRITICAL to note that the Buddha equated birth in any realm (*loka samudaya*) the same as the **origin of suffering**!
- The second part of the *sutta* describes how “**cessation of the world**” (or *loka nirodha/atthaṅgama*.) See #8 below.

Seeds for the “Origin of the World” (Rebirths) Initiate With Our Response to Sensory Inputs (*Ārammaṇa*)

6. Then, the verse is repeated for the other five senses. Thus, the “origin of the world” (or the rebirth process) can start with sensory input (i.e., *ārammaṇa*) coming through any of the six senses.

- That is explained (in summary form) in the following part of the verse: “*Phassa paccayā vedanā; vedanā paccayā taṇhā; taṇhā paccayā upādānaṃ; upādāna paccayā bhavo; bhava paccayā jāti; jāti paccayā jarāmaraṇaṃ sokaparidevadukkhadomanassupāyāsā sambhavanti*.”
- That is how “seeds” for future rebirths accumulate with strong *akusala kamma*. Even though only a tiny fraction of sensory interactions lead to the creation of such “seeds” (or “*kamma bija*”), we all have accumulated countless such seeds over previous lives. Luckily, they DID NOT inevitably bring future rebirths, and we will discuss that. (Otherwise, no one will be able to attain *Nibbāna*.)
- Now let us discuss the *Dukkha Sutta* (SN 12.43), which comes just before the *Loka Sutta* (SN 12.44).

Dukkha Sutta (SN 12.43) – Origin of Suffering Same as Origin of the World (Rebirth)

7. The Buddha starts the “[WebLink: suttacentral: Dukkha Sutta \(SN 12.43\)](#)” by saying, “*Bhikkhus, I will teach you the **origin** and the **cessation** of suffering.*” (“*Dukkhassa, bhikkhave, **samudayaṇca atthaṅgamaṇca** desessāmi.*”)

- Then the Buddha explained “***dukkha samudaya***”: “*Katamo ca, bhikkhave, **dukkhassa samudayo**? Cakkhuṇca paṭicca rūpe ca uppajjati cakkhu viññāṇaṃ. Tiṇṇaṃ saṅgati phasso. Phassa paccayā vedanā; vedanā paccayā taṇhā. Ayaṃ kho, bhikkhave, **dukkhassa samudayo**.*”
- Comparing this verse with that in #5 above from the *Loka Sutta* (SN 12.44) makes the following very clear: “***Loka samudaya** is the SAME as **dukkha samudaya**.*”
- In other words, “**arising of a new world in a new birth**” is the SAME as “**arising of another mass of suffering**.”

End of Suffering (*Nibbāna*) Is Cessation of the World (Rebirth Process)

8. In the second part of the *Dukkha Sutta* the Buddha says how that suffering can be stopped from arising: “*Katamo ca, bhikkhave, **dukkhassa atthaṅgamo**? Cakkhuṇca paṭicca rūpe ca uppajjati cakkhuvīññāṇaṃ. Tiṇṇaṃ saṅgati phasso. Phassapaccayā vedanā; vedanāpaccayā taṇhā. Tassāyeva taṇhāya asesavirāganirodhā **upādāna nirodho**; upādānanirodhā **bhava nirodho**; bhava nirodhā **jāti nirodho**; jāti nirodhā **jarāmaraṇaṃ sokaparidevadukkhadomanassupāyāsā nirujjhanti**. Evametassa kevalassa dukkhakkhandhassa nirodho hoti. Ayaṃ kho, bhikkhave, **dukkhassa atthaṅgamo**.*”

- That is also the same verse as the second part of the *Loka Sutta* (SN 12.44.) In other words, “**Stopping the arising of a new world (new birth)**” is the SAME as “**stopping the arising of another bout of suffering**.”

- The above verse requires a detailed discussion. We will do that in upcoming posts.
- It is a good idea to understand what an *ārammaṇa* is before we get into that discussion. See [“Ārammaṇa Plays a Critical Role in a Sensory Event.”](#)

9. We know that *Nibbāna* is the cessation of suffering. We see clearly from the above two *suttas* that the end of suffering stops the rebirth process (*bhava* and *jāti*).

- Of course, there are many more *suttas* stating the same. These two *suttas* are in the [“*Saṃyutta Nikāya* 12”](#) on *Paṭicca Samuppāda* that we are discussing presently.

Connection to *Paṭicca Samuppāda*

10. The other important point is that the above two *suttā* illustrate the connection of *loka samudaya/dukkha samudaya* to *Paṭicca Samuppāda*.

- As I have pointed out before, the *Paṭicca Samuppāda* process starts with “*saḷāyatana paccayā phasso*,” i.e., with sensory input (*ārammaṇa*) coming to one of the six sensory faculties.
- That is what the verse in #8 above says. As we can see, it has the following steps (in the latter part) of the *Paṭicca Samuppāda* sequence: “*Phassa paccayā vedanā; vedanā paccayā taṇhā. Tassāyeva taṇhāya asesavirāganirodhā upādāna nirodho; upādāna nirodhā bhava nirodho; bhava nirodhā jāti nirodho; jāti nirodhā jarāmaraṇaṃ sokaparidevadukkhadomanassupāyāsā nirujjhanti. Evametassa kevalassa dukkhakkhandhassa nirodho hoti.*”
- I have discussed this in the previous series on [“*Origin of Life*”](#) as mentioned in #5 above.
- We will look at it from a bit different point of view here, highlighting the steps in *Paṭicca Samuppāda*.

11. The process by which that future suffering arises is (*Akusala-Mūla*) *Paṭicca Samuppāda*.

- In plain English, the following happens. One gets attached to an *ārammaṇa* and starts doing foolish/immoral deeds (“*avijjā paccayā saṅkhāra.*”) Such actions are going to have future consequences, ALWAYS leading to suffering at the end.
- But that process starts only with a strong sensory input or an *ārammaṇa*. See [“*Ārammaṇa Plays a Critical Role in a Sensory Event.*”](#)
- The critical point is that those consequences can also manifest in future lives. Strong immoral deeds lead to future births in “undesired existences,” the four lowest realms.

Future Suffering (*Loka/Dukkha Samudaya*) Starts With Sensory Input (*Ārammaṇa*)

12. As we can see in #5 and #7, the two *suttas* state that *loka samudaya/dukkha samudaya* (origin of the world/origin of suffering) starts with: “*Cakkhuṇca paṭicca rūpe ca uppajjati cakkhu viññāṇaṃ..*” The *suttas* repeat that verse for all six senses. That is the same as the “*saḷāyatana paccayā phasso*” step in *Paṭicca Samuppāda*.

- Then, attachment (*taṇhā*) to such a sensory input lead to the subsequent steps leading to suffering at the end: “*phassa paccayā vedanā, vedanā paccayā taṇhā, taṇhā paccayā upādāna, upādāna paccayā bhavo, bhava paccayā jāti, jāti paccayā jarā, maraṇa, soka-parideva-dukkha-domanassupāyāsā sambhavan’ti*”
- It is at the “*upādāna paccayā bhavo*” step that *Paṭicca Samuppāda* goes to the step “*avijjā paccayā saṅkhāra*” and starts accumulating kamma to that could power future existences.
- We will discuss that in the next post.

9.5.4 Sotāpanna – One With the “Wider Worldview” of the Buddha

October 25, 2021; revised #4 on October 27, 2021

Introduction

1. We covered a lot of material in the recent few posts about “original of the world” (*loka samudaya*) and “origin of suffering” (*dukkha samudaya*.) See, [“Paticca Samuppāda, Tilakkhana, Four Noble Truths.”](#)

- As we saw, the Buddha equated the world’s origin (with each new birth in the rebirth process) as the origin of suffering. That is because even if that particular existence (e.g., a *Deva* realm) may not have extreme suffering, the possibility of suffering in the future (in a lower realm) is there.
- We used direct Pāli quotes from relevant *suttas* in those posts.
- Some people (justifiably) stress out just seeing Pāli words. Here, I want to provide a summary in simple English to clarify the key conclusions.
- I want to do that because the concepts discussed in those posts are contrary to the views/perceptions of an average human. Once comprehend the key message, they can go back and review those posts. They may also want to carefully go through the *suttas* to ensure that I have not distorted a single verse.
- I welcome thoughtful discussions based on the *Tipiṭaka*. If my writings are contradictory to anything in the *Tipiṭaka*, please provide references, and discuss them. **Understanding the primary message of the Buddha is ESSENTIAL before trying to follow his path to Nibbāna!**

The Suffering Buddha Referred to – In the Rebirth Process

2. Many people go to meditation retreats to get rid of the daily stresses of life by calming the mind. There is nothing wrong with that. However, Buddha’s teachings are there to tackle a much bigger problem.

- That problem is the unimaginable suffering in the rebirth process that is inevitable for all those who have not understood the “wider world view” of the Buddha.
- The Buddha described a world consisting of 31 realms, out of which an average human is aware of only two: the human and the animal realms. He taught that our lives don’t end with the death of this physical body. We can be reborn anywhere in the 31 realms, but most rebirths are in the four lowest realms (*apāyās*.) where the level of suffering can be much higher than that we can see in the human and animal realms.
- We will address the validity of that “wider worldview” in the next post. Let us finish our summary of recent posts.

Suffering Is Inevitable in the World and Absent in Nibbāna

3. The main two conclusions for the previous two posts are the following:

- i. Both suffering and sensory pleasures are present in the world of 31 realms, i.e., in the rebirth process among the 31 realms. The higher realms have more happiness than suffering, while the suffering in the lowest four realms is unbearable. Since any given living being spends most of the time in the *apāyās*, suffering dominates this world.
- ii. There is no suffering or sensory pleasures in *Nibbāna* (after the death of an *Arahant*.) Nothing of this world exists in *Nibbāna*. In terms of the language of mathematics, “this world and *Nibbāna* are mutually exclusive.” Material objects, feelings and perceptions about them, etc., all belong to this world, and NONE of them exist in *Nibbāna*. Even a Buddha cannot “describe” what is in *Nibbāna* because we don’t have that terminology in this world. The only way to conclusively describe *Nibbāna* is to say that there is no suffering in *Nibbāna*; that is how the Buddha ALWAYS described *Nibbāna*.

- Another critical point is that *Nibbāna* is also, “**rāgakkhayo dosakkhayo mohakkhayo—idaṃ vuccati nibbānan**” ti OR “the **ending of rāga**, ending of anger/hate, and ending of ignorance/delusion is **Nibbāna**.” See, for example, “[WebLink: suttacentral: Nibbānapaṇhā Sutta \(SN 38.1\)](#).”
- Equating *Nibbāna* to *rāgakkhaya* provides a CRITICAL clue to our current discussion. We will discuss that in #7 below.

4. Only an *Arahant* in *Nirodha Samāpatti* can experience the complete “*Nibbānic* bliss” (total absence of suffering.) An *Arahant* can stay in *Nirodha Samāpatti* only for up to seven days at a time. During this time, the physical body of the *Arahant* appears to be dead (even the heart stops beating), but *kammic* energy maintains the body temperature.

- However, one can experience more and more of the “*Nibbānic* bliss” as one proceeds up the four stages of *magga phala*. That “reduced level of mental stress” has been referred to as “cooling down of the mind” in the *Tipiṭaka*.
- On the other hand, bodily suffering (aches, injuries, sicknesses, etc.) will persist until the death of the physical body of an *Arahant*. That is because even an *Arahant* has to live in this world until the demise of the physical body. With the death of the physical body, an *Arahant* departs from this world. That is *Parinibbāna* or “full *Nibbāna*.” No more rebirths in this world and no more suffering!

The Reality of any Existence in This World

5. We all would like to live a “comfortable and pleasurable life” among our friends and family. But the reality is that no one has been able to sustain that EVER. **Anyone who ever lived had to give up everything at death.** We would not even know where we would be reborn.

- After some years, we may be reborn with a human body if more *kammic* energy remains in this human *bhava*. Until then we will only have the “mental body” or the “*gandhabba kāya*.” Of course, even then, we don’t know exactly where that birth would be.
- If there is no more *kammic* energy left in the human *bhava*, we have no idea where we will be reborn. **That depends not only on how we lived this life but also on what types of *kammic* energies have been accumulated in previous lives.**
- However, those who have attained stages of *Nibbāna* would have eliminated rebirths in lower realms. A *Sotāpanna* would not be reborn in the four lowest realms (*apāyās*.) A *Sakadāgāmi* would be born only among the six *Deva* realms. An *Anāgāmi* would be reborn only in certain *Brahma* realms. They all will attain full *Nibbāna* within a relatively short time.

Importance of Becoming a *Sotāpanna*

6. Most people cannot imagine that there can be suffering in the realms above the human realm. But we all can clearly see the suffering in the human and especially the animal realm. The animal realm is the only *apāya* that we can see. The Buddha has described the suffering in the other three lowest realms, and those descriptions are scary. That is why the main goal of a Buddhist is to attain the *Sotāpanna* stage.

- Most humans cannot even fully understand the suffering we experience in the human realm because their minds are “covered” by anticipated bouts of “future pleasures” that one hopes to achieve. But anyone can see the suffering in the animal realm. Since a *Sotāpanna* would avoid rebirth in all four lowest realms, that should incentivize one to attain the *Sotāpanna* stage.
- Once getting to the *Sotāpanna* stage, one will begin to see the suffering in the human realm. But a *Sotāpanna* may still have the perception that life in a *Deva* or a *Brahma* realm could be good.
- **Therefore, for anyone below the *Sotāpanna* stage, there is no need to comprehend suffering in higher realms.** But the point is that life in that higher realm WILL end, and one WILL end up in the lower realms.

- The only REQUIREMENT to attain the *Sotāpanna* stage is to understand the “wider worldview of the Buddha.” The Buddha said that just that understanding (or getting to the correct worldview) would remove an unimaginable amount of defilements. It is the **removal of defilements by clear vision** (“*dassanā pahātabbā*”) in the “[WebLink: suttacentral: Sabbāsava Sutta \(MN 2\)](#).” We can see that from a different perspective too. Let us discuss that first.

“*Rāgakkhayo Nibbānan*” – Nibbāna Is Ending of *Saṃsāric* Travel

7. Without exception, the current English translation of “*rāga*” is “greed.” However, “greed” is “*lobha*.” Furthermore, have you ever wondered why *Nibbāna* is NOT defined as “*lobhakkhayo dosakkhayo mohakkhayo—idaṃ vuccati nibbānan*” *ti*? That would be the logical choice there since the three immoral roots are *lobha*, *dosa*, *moha*.

- The correct “*pada nirutti*” (etymology) of “*rāga*” comes from “*rā*” + “*agga*” where “*rā*” means to “travel (in the *saṃsāric* journey)” and “*agga*” is to “give priority.” Thus, “*rāga*” means to “travel (the *saṃsāric* journey).” Here, one may not even believe in rebirth but would still enjoy the world as long as it lasts. In other words, anyone craving things in this world would have some type of *rāga*. [*agga* : [adj.] the highest; the top-most. (m.), the end; the top.]
- *Rāga* arises because one believes there are pleasures to be had in this world (i.e., one believes the world to be of *nicca* nature.) But one would NOT do highly immoral things with just *rāga*. Specifically, *kāma rāga* needs to escalate to *lobha* for immoral actions to take place.
- The *saṃsāric* journey is among three types of *loka*: *kāma loka*, *rūpa loka*, and *arūpa loka* (with the 31 realms distributed among these three.) As explained in *Paṭicca Samuppāda*, one’s birth will be according to one’s cravings for things in this world. When one has *kāma rāga*, one will be born among the 11 realms in the *kāma loka*. Those who have (at least temporarily) overcome *kāma rāga* (and cultivate *rūpāvacara jhāna*) may still have *rūpa rāga* and thus will be born in the 16 realms in *rūpa loka*. Those who have overcome *kāma rāga* and *rūpa rāga* (and cultivate the *arūpāvacara jhāna*) will be born in one of the four realms in the *arūpāvacara loka*.
- To attain *Nibbāna*, one must permanently overcome all three types of *rāga*, and thus “*rāgakkhayo nibbānan*.”

8. The relevant point to our discussion is the following: If one can understand the material in the previous two posts in this series, one would realize that future suffering is INEVITABLE unless the rebirth process is stopped. “The suffering-filled world” will keep arising at death.

- Please read that again and contemplate on it. The Buddha said that arising of any new birth (anywhere among the 31 realms) means the suffering has not stopped.
- *Saṃsāric* suffering (future suffering in the rebirth process) will not stop until one comprehends this KEY POINT.
- That is the same as understanding the “wider worldview of the Buddha” of the rebirth process among the 31 realms.
- One becomes a *Sotāpanna Anugāmi* when starting to understand that critical point. When that understanding takes root in the mind irreversibly, one would attain the *Sotāpanna* stage at that moment.
- That is the **removal of defilements by clear vision** (“*dassanā pahātabbā*”) mentioned in #6 above per *Sabbāsava Sutta* (MN 2.) That is the Noble *Sammā Diṭṭhi* (“Noble Correct View”) of a *Sotāpanna*.

A *Sotāpanna* Starts on the Noble Eightfold Path with *Sammā Diṭṭhi*

9. **It is at that point one can start on the Noble Eightfold Path as a *Sotāpanna*.** All others below the *Sotāpanna Anugāmi* stage are still on the mundane eightfold path (a *Sotāpanna Anugāmi* WILL become a *Sotāpanna*.) The [WebLink: suttacentral: Mahācattārīsaka Sutta \(MN 117\)](#) discusses the two eightfold paths; see, “[Mahā Cattārīsaka Sutta \(Discourse on the Great Forty\)](#).”

- In the “[WebLink: suttacentral: Dutiyasāriputta Sutta \(SN 55.5\)](#)” the Buddha discussed the *Sotāpanna* stage with Ven. Sariputta. The Buddha asked, “*Sotāpanno, sotāpanno’ti hidaṃ, sārīputta, vuccati. Katamo nu kho, sārīputta, sotāpanno’ti?*” OR “Sārīputta, they speak of ‘a *Sotāpanna*’. Who is a *Sotāpanna*?”
- Venerable Sariputta replied: “*Yo hi, bhante, iminā ariyena aṭṭhaṅgikena maggena samannāgato ayaṃ vuccati sotāpanno, svāyaṃ āyasmā evaṃnāmo evaṅgotto’ti.*” OR “**Bhante, someone who has embarked on the Noble Eightfold Path is a *Sotāpanna*,**” and the Buddha consented.

10. Furthermore, in several *suttas* *Sammā Diṭṭhi* is described as, “understanding the truth about suffering.”

- That “previously unheard truth about suffering” is that “the origin of suffering is the origin of the world (with each rebirth)” as we discussed.
- For example, in the “[WebLink: suttacentral: Saccavibhaṅga Sutta \(MN 141\)](#)”: “*Katamā cāvuso, sammā diṭṭhi? Yaṃ kho, āvuso, **dukkhe ñāṇaṃ**, dukkhasamudaye ñāṇaṃ, dukkhanirodhe ñāṇaṃ, dukkhanirodhagāminiyā paṭipadāya ñāṇaṃ, ayaṃ vuccatāvuso: ‘sammā diṭṭhi’.*”
- As we saw, “*dukkha samudaya*” is the same as “*loka samudaya*”; “*dukkha nirodha*” is the same as “*loka nirodha*”; “*dukkhanirodhagāminiyā paṭipadā*” is the same as “*lokanirodhagāminiyā paṭipadā*.”
- **That is “*dukkhe ñāṇaṃ*” or the knowledge on the Noble Truth about suffering.**

It Is a *Sotāpanna* Who Can Cultivate the Other Seven Factors on the Noble Path

11. Therefore, one must first see the “wider worldview of the Buddha” to get to *Sammā Diṭṭhi*, or “the correct vision about the world.” **At that point, one has SEEN the unfruitful/dangerous nature (*anicca nature*) of this world.** That is the same as comprehending the First Noble Truth on suffering. That is also the same as comprehending *Tilakkhaṇa* (Characteristics of this world) and *Paṭicca Samuppāda* (how suffering arises due to causes and conditions.)

- A *Sotāpanna* WILL NOT lose that understanding even through future lives. Even if it takes several more births to complete, a *Sotāpanna* WILL cultivate the remaining seven steps on the Noble Path and WILL get to the *Arahanthood*.
- That is why understanding the Four Noble Truths/*Tilakkhaṇa*/*Paṭicca Samuppāda* is ESSENTIAL to becoming a *Sotāpanna Anugāmi* first. Sometimes a *Sotāpanna Anugāmi* is called a *Cula-Sotāpanna*, even though that term is not in the *Tipiṭaka*.
- This turned out to be a long post. But the essence of the Buddha Dhamma is summarized here.

9.5.5 *Sotāpannā* – Just Starting on the Noble Path

November 1, 2021

A *Sotāpanna* is at the beginning stage of the Noble Path, and needs to overcome *kāma rāga*, *rūpa rāga*, and *arūpa rāga*.

Getting to *Nibbāna* Is a Step-by-Step Process

1. In the recent posts, I have outlined the ULTIMATE GOAL of a Buddhist. Those posts may discourage some people. They may think that they will never be able to get to *Nibbāna*. However, I just wanted to emphasize that it is a “previously unknown worldview.” **But getting to that ultimate goal is a step-by-step process.** Even a *Sotāpanna* is far away from losing attachments to “this world.” But many people attribute qualities of an *Arahant* to a *Sotāpanna*.

- Thus, many people waste precious time by trying to suppress sense desires. In some cases, they try to eliminate the innate sense of “me” or “a self.” That is an impossibility! Their goal should be to understand the “worldview of the Buddha” and first become a *Sotāpanna*. It is a good idea to read the post, “[Is It Necessary for a Buddhist to Eliminate Sensual Desires?](#)”
- Some others also waste time doing *Ānāpānasati/Satipaṭṭhāna* using “breath meditation.” **Only a *Sotāpanna* knows how to cultivate them properly.** At the beginning of the “[WebLink: suttacentral: Ānāpānassati Sutta \(MN 118\)](#),” Buddha clearly stated that ALL the *Bhikkhus* listening to the discourse had various stages of *magga phala*, i.e., all were at or above the *Sotāpanna* stage.
- You can read this English translation at Sutta Central: “[WebLink: suttacentral: Mindfulness of Breathing \(MN 118\)](#).” Of course, the title is quite misleading, and the latter part of the *sutta* translated incorrectly. But the detailed description of the assembled *bhikkhus* proves my point. That description starts with, “*Bhikkhus*, this assembly is free from prattle, this assembly is free from chatter. It consists purely of heartwood..” close to the beginning of the *sutta*. [*Apalāpāyaṃ, bhikkhave, parisā; nippalāpāyaṃ, bhikkhave, parisā; suddhā sāre paṭiṭṭhitā.*] [*parisā* : [f.] a company; an assembly. *palāpa* : [m.] chaff (of corn); prattle; nonsense; voice of essence. *nippalāpa* : [adj.] free from chaff or prattle. *sāra* : (m.), essence; the pith of a tree; the choicest part. (adj.) essential; excellent; strong. *paṭiṭṭhita* : [pp. of *paṭiṭṭhahati*] was established; stood firmly; found a support.]

2. The same *sutta* also has the following verse: “*Nāhaṃ, bhikkhave, muṭṭhassatiṣṣa asampajānassa ānāpānassatiṃ vadāmi.*” In the above translation: “I do not say that there is the development of mindfulness of breathing for one who is **forgetful**, who is **not fully aware**.”

- But the real meaning of that Pāli verse is more like, “I do not teach *ānāpānassati* to those who do not know where to establish *sati* (*muṭṭhassatiṣṣa*) and not know how to sort out “*san* or defilements” (*asampajānassa*).
- Therefore, the priority is to understand the worldview of the Buddha that we discussed in previous posts and become a *Sotāpanna Anugāmi*. It is also a good idea to dispel some other myths about *Sotāpanna Anugāmi/Sotāpanna*.

***Sotāpanna Anugāmi/Sotāpanna* – Knows the *Anicca* Nature of This World**

3. As I explained in the previous post, one gets to the *Sotāpanna* stage by removing wrong views about the world (worldly things can be fruitful/beneficial.) **That is the wrong view that the world is of “*nicca* nature.”**

- We are bound to “this world” with ten *saṃsāric* bonds (*saṃyojana*.) They are “mental bonds.” At the *Sotāpanna* stage, only three of those ten bonds break and **ALL three are about wrong views only.**
 - (i) First there is *sakkāya diṭṭhi* is the **WRONG VIEW** of a “*nicca* worldview.” Breaking of that bond leads to the simultaneous breaking of the other two bonds.
 - (ii) *Vicikicchā* is to have doubts that Buddha discovered the true nature of this world, his Dhamma is the correct world view, and his Noble disciples can end the *saṃsāric* suffering.
 - (iii) *Sīlabbata parāmāsa* is the wrong view that end of suffering is achievable by just following a set of rituals, without understanding the broader worldview.)

4. A *Sotāpanna* has *Sammā Dīṭṭhi* or “the correct world view” and would be able to follow the Noble Path without further assistance. A *Sotāpanna* also knows and understands the other seven steps to get to *Arahanthood*. That takes place via three more stages: *Sakadāgāmi*, *Anāgāmi*, *Arahant*. The two primary bonds that break at the *Sakadāgāmi* and *Anāgāmi* stages are *kāma rāga* (craving sensory pleasures) and *paṭigha* (tendency to get upset/angry when obstacles come in the way of fulfilling such cravings.).

- The Buddha laid down a systematic way for a *Sotāpanna* to reach those higher goals. He first described them in the *Ānāpānassati Sutta*. He gave more details in the *Mahā Satipaṭṭhāna Sutta* (DN 22.) The *Ānāpānassati Sutta* (MN 118) has the following verse: “*Evam bhāvitā kho, bhikkhave, ānāpānassati evam bahulikatā cattāro satipaṭṭhāne paripūreti*” OR “*Bhikkhus, that is how ānāpānassati, developed and cultivated, fulfills the four foundations of mindfulness (cattāro satipaṭṭhāna).*” Thus, *ānāpānassati* is just a brief version of *satipaṭṭhāna*.

It is Not Easy to Remove *Kāma Rāga* and Get to the *Anāgāmi* Stage

5. The question is: If a *Sotāpanna* KNOWS that craving worldly things hinder getting to *Nibbāna*, why is it hard for a *Sotāpanna* to lose those cravings? Why did the Buddha systematize that process to make it easier? **The short answer is that even though a *Sotāpanna* has removed the wrong views (*dīṭṭhi*) about this world, wrong perceptions (*saññā*) about mind-pleasing things in the world still remain intact.**

- The analogy of an alcoholic can be helpful to understand the difference. To give up alcohol, first, he must come to the right view, i.e., that alcohol is bad for health. But most alcoholics get stuck at the second step of getting rid of the “good *saññā*” associated with drinking. He must persistently be thinking about the bad consequences of drinking. In the same way, even though a *Sotāpanna* KNOWS that sensual pleasures lead to suffering, it is hard to get rid of that “good *saññā*” associated with sense pleasures. **That is where *ānāpānassati* and *satipaṭṭhāna* meditations are required.**
- It is a good idea to read the post, “[Saññā – What It Really Means](#)” and understand the concept of *saññā*. Further details of the difference between *dīṭṭhi* and *saññā* at “[Vipallāsa \(Dīṭṭhi, Saññā, Citta\) Affect Saṅkhāra.](#)”

6. That is where many people get confused. Some people INCORRECTLY believe that a person needs to abstain from sensory pleasures completely to GET TO the *Sotāpanna* stage. Of course, one MUST refrain from extreme immoral actions seeking sensory pleasures to get to the *Sotāpanna* stage. **But as we discussed above, *kāma rāga* can be removed only AFTER the *Sotāpanna* stage. Even then, it will take a considerable effort.**

- A simple analogy is an alcoholic. There is no hope of getting rid of that habit without first “seeing” the harmful consequences of drinking. But even after “getting to the correct view,” it takes considerable effort not to “have a drink” when the urge comes! An alcoholic MUST keep thinking about the adverse consequences of drinking. That is precisely what a *Sotāpanna* would do while engaging in *ānāpānassati/satipaṭṭhāna Bhāvanā*. It is NOT about breathing in and out! Reread #1, #2 above carefully (and read those references) if you have any doubts.
- Now let us discuss some key features of the *Sotāpanna* stage to dispel some more common myths.

The *Sotāpanna* Stage – Per *Tipiṭaka*

7. Valuable information about the *Sotāpanna* Stage is in the “*Sotāpattisaṃyutta*,” where a series of *suttas* from SN 55.1 through SN 55.74 provide a lot of information.

- The first one, “[WebLink: suttacentral: Cakkavattirāja Sutta \(SN 55.1\)](#),” states that a *Sotāpanna* is better off than an Emperor who rules the whole world because that Emperor is not free of rebirth in the *apāyās*. The four realms in the *apāyās* are also named *niraya* (hell), animal, *peta*, and *vinipāta asura*.

Furthermore, a *Sotāpanna* has unbreakable faith (*aveccappasādena*) in the Buddha, Dhamma, *Saṅgha* and has unbreakable moral conduct (*ariyakānta sīla*.)

- One who gets to the *Sotāpanna* stage can figure that out by himself. That is in the “[WebLink: suttacentral: Pathamagiṇṇakāvasatha Sutta \(SN 55.8\)](#).” It specifically states that one would know that one is free from the four *apāyās*. **Furthermore, one is free to declare that attainment if so desired.** Many people believe one should not state such attainments. Even though one should not brag about it, the above *sutta* clearly shows that the Buddha allowed it. There are more such myths.

More Myths About the *Sotāpanna* Stage

8. A *Sotāpanna* has only “seen” what *Nibbāna* is and knows the path but has just started. His new mindset will not allow any *apāyagāmi kamma* (immoral deeds that will lead to rebirth in the *apāyās*).

- Sarakāni was an old *Brahmin* who used to drink a lot. At old age, he listened to a discourse by the Buddha and attained the *Sotāpanna* stage. Soon afterward, he died, and the Buddha stated that he was born in a *Deva loka*. Some people laughed at the notion that an alcoholic could be born in a *Deva loka*. Buddha explained that those were ignorant of the Buddha Dhamma. That account is in the “[WebLink: suttacentral: Pathamasaranānisakka Sutta \(SN 55.24\)](#).” We also know that *Āṅgulimāla* killed almost a thousand people and was able to attain *Arahanthood*!

9. Another myth is that a *Sotāpanna* would not crave sensory pleasures. But there were millions of *Sotāpannas* who got married and led normal family lives during the days of the Buddha. For example, *Viśākhā* (or *Viśākā*), who was the leading female lay disciple at the time, attained the *Sotāpanna* stage at age seven and went on to get married and have twenty plus children. She did not abstain from sex. She still had *kāma rāga* since she was not an *Anāgāmi*. Of course, she would not have engaged in sex outside the marriage.

- **There are only six types of strong *kamma* that will not happen by a *Sotāpanna*:** killing mother, father, or an *Arahant*, injuring a Buddha, causing “*saṅghabheda*,” and following a path other than that of the Buddha. These are in the “[WebLink: suttacentral: Bahudhātuka Sutta \(MN 115\)](#).” So, it is a myth to say that a *Sotāpanna* will not break any of the five precepts. It is an *Arahant* who is incapable of breaking them.
- That is not to minimize the status of a *Sotāpanna*. A *Sotāpanna* would NEVER be born in an *apāya*.

A *Sotāpanna* Understands the *Paṭicca Samuppāda* Process

10. In the “[WebLink: suttacentral: Dutiyasāriputta Sutta \(SN 55.5\)](#),” the Buddha discussed the *Sotāpanna* stage with Ven. *Sāriputta*. As we discussed in the previous post, **someone who has embarked on the Noble Eightfold Path is a *Sotāpanna*.** That *sutta* also states how one can get to the *Sotāpanna* stage. Venerable *Sāriputta* says, “*Sappurisasamsevo hi, Bhante, sotāpattiyaṅgaṃ, saddhammassavanam sotāpattiyaṅgaṃ, yoniso manasikāro sotāpattiyaṅgaṃ, dhammānudhammappaṭipatti sotāpattiyaṅgaṃ*” ti OR “*Bhante*, the necessary conditions are: associating with Noble Persons, listening to the true teaching, *yonisomanasikāra*, and practicing in line with the teaching.” Here, the key point is that one cannot be exposed to the correct Dhamma unless taught by someone who has understood it first. Another is the term *yoniso manasikāra* (mundane translation “proper attention”) meaning “to understand how various types of births (*bhava* and *jāti*) arise via *Paṭicca Samuppāda*.”

- The “[WebLink: suttacentral: Pathamabhayaverūpasanta Sutta \(SN 55.28\)](#)” in the same series explains *yonisomanasikāra* as follows: “*Idha, gahapati, ariyasāvako paṭiccasamuppādaññeva sādhukam yoniso manasi karoti—iti imasmim sati idam hoti, imassuppādā idam uppajjati; iti imasmim asati idam na hoti, imassa nirodhā idam nirujjhati; yadidam avijjāpaccayā saṅkhārā, saṅkhārapaccayā viññāṇam ...pe... evametassa kevalassa dukkhakkhandhassa samudayo hoti.*” In other words, one has *yonisomanasikāra* when one understands *Paṭicca Samuppāda*.

- I have only provided a summary of the most essential facts about the *Sotāpanna* stage above. It is good to scan through the available English translations, even though they are not correct in some aspects. Here is the link to the first *sutta* in the series at Sutta Central: “[WebLink: suttacentral: A Wheel-Turning Monarch \(SN 55.1\).](#)”

Summary

11. Living moral life is NECESSARY but NOT ENOUGH to get to the *Sotāpanna* stage. One MUST see the dangers in the rebirth process, just like an alcoholic must first see the dangers (health risks) associated with drinking.

- Many people have wrong ideas about the *Sotāpanna* stage. I have addressed some in this post.
- *Sotāpanna Anugāmi*/*Sotāpanna* stages are the beginning stages of the Noble Path, not the end. A *Sotāpanna* has understood the dangers in remaining in “this world” (rebirth process) but has to overcome *kāma rāga*, *rūpa rāga*, and *arūpa rāga* (that binds one to the *kāma loka*, *rūpa loka*, and *arūpa loka*.) But a *Sotāpanna* has overcome the lowest realms in the *kāma loka* and thus is free from MOST of the suffering in the rebirth process.
- Many people start “meditating” even before understanding “what to meditate on.” Of course, if one is doing “breath meditation,” **there is nothing to learn**. Breath meditation can be used as a “*Samatha Bhāvanā*” to calm the mind. But it WILL NOT get one closer to the “end of suffering.”

9.5.6 Yoniso Manasikāra and Paṭicca Samuppāda

November 9, 2021; revised December 14, 2022

Yoniso manasikāra is to understand *Paṭicca Samuppāda* and thereby have a mindset that this world has the three characteristics of *anicca*, *dukkha*, and *anatta*.

To get to the *Sotāpanna* stage, one must understand the mechanism by which future suffering arises, i.e., *Paṭicca Samuppāda*. One first gets on the Noble Path by understanding the rudimentary aspects of *Paṭicca Samuppāda* as a *Sotāpanna Anugāmi*. When that understanding takes a firm hold in mind, one gets to the *Sotāpanna* stage. That is not stated directly in a single *sutta*, but we will discuss a few *suttas* to clarify it.

Four Conditions Required to Attain the *Sotāpanna* Stage

1. There are four conditions NECESSARY to get to the *Sotāpanna* stage.

In many *suttā*, including [WebLink: suttacentral: Sotāpattiphala Sutta \(SN 55.55\)](#) and [WebLink: suttacentral: Dutiya Sariputta Sutta \(SN 55.5\)](#), the four requirements for someone to attain the *Sotāpanna* stage of *Nibbāna* are stated: “*Cattārome, bhikkhave, dhammā bhāvitā bahulikātā sotāpattiphalasacchikiriyāya saṃvattanti. Katame cattāro? Sappurisasamsevo, saddhammassavanaṃ, yonisomanasikāro, dhammānudhammapaṭipatti.*”

- i. Association with “*sappurisa* (*sath + purisa* or “Noble friend,” i.e., an *Ariya*),” sometimes called a “*kalyāṇa mittā*” (“*kalyāṇa mitrā*” in Sanskrit.)
- ii. Listening to Dhamma discourses (while reading is enough to get to the *Sotāpanna Anugāmi* stage, listening is necessary to attain the *Sotāpanna* stage).
- iii. Understanding *yoniso manasikāra* (how different existences arise and that all existences end with suffering, i.e., *Paṭicca Samuppāda*).
- iv. Start following *Dhammanudhamma patipadā* (after seeing how future suffering can be eliminated; see, “[What is Unique in Buddha Dhamma?](#)”).

A Noble Friend Needed to Fulfill First Two Requirements

2. To get to a destination, we need to get directions from someone who KNOWS how to get to that destination. These days, many people give directions to *Nibbāna* (i.e., facts about the Noble Path.) You cannot get to the correct destination if you follow someone who does not know the “path to *Nibbāna*.” If someone has attained at least the *Sotāpanna* stage, they would know.

- We discussed that in detail in the post “[The Sotāpanna Stage](#).”
- The other two requirements can be fulfilled ONLY through such a Noble friend, i.e., learn *Paṭicca Samuppāda* (Dhamma/Buddha Dhamma) and associated “*anudhamma*” (*Tilakkhaṇa*, *saṃyojana*, etc.) See #13 of “[Four Conditions for Attaining Sotāpanna Magga/Phala](#).”
- Now, you may ask: “Why do I need someone to tell me the correct path? Isn’t it described in the *Tipiṭaka*?” The problem is that the translations of *Tipiṭaka* are incorrect in most cases.

Degradation of Buddha Dhamma and the Revival of that “Distorted Version”

3. We are fortunate to have the original Pāli *Tipiṭaka*, as recited in the first four Buddhist Councils by *Arahants*. Those *Arahants* at the Fourth Council wrote down that Pāli *Tipiṭaka*. That was 2000 years ago. See, “[Preservation of the Buddha Dhamma](#).”

- However, the distortion of key concepts started soon after the Fourth Buddhist Council. The main reason for that was the mundane interpretations *Mahāyāna* Buddhism introduced in India about 2000 years ago.
- Even though Buddhism in India faded away and disappeared at least 500 years ago, those *Mahāyāna* concepts took root in many other Buddhist countries, including Sri Lanka. Therefore, even though the Pāli *Tipiṭaka* remained intact, its translations became incorrect. For example, the Sinhala translation of the *Tipiṭaka* (Buddha Jayanti edition) has *anicca* and *anatta* translated incorrectly as impermanence and “no-self.”
- When Europeans discovered Buddhism in Asian countries, those two (and more) misinterpretations were deeply rooted in all those countries. I have given a brief account in the post, “[Misinterpretation of Anicca and Anatta by Early European Scholars](#).”
- By the time Europeans arrived, Buddhism had declined in those countries. Most Buddhist places of worship were in poor condition. Those European scholars and the British government helped restore many of those places. More importantly, they collected and preserved the original Pāli documents, they are still in the British museum today. That is how the Pāli *Tipiṭaka* survived.
- European scholars readily accepted the incorrect interpretations that had taken root in most countries, including Sri Lanka. Even though they were “academic scholars”, they were even less familiar with the deep concepts in Buddha Dhamma. So, those “mundane interpretations” made perfect sense to them. They widely disseminated those incorrect interpretations using the printing press invented around that time. See “[Preservation of the Buddha Dhamma](#).”

“Mundane Interpretations” Are Easy to Grasp

4. There is a reason for the degradation of Buddha Dhamma. Let us consider two examples of *anicca* as impermanence and *Ānāpānasati* as breath meditation.

- It is very easy for anyone to see the “impermanent nature of things.” We can easily see that anything in this world is not permanent. Especially these days, science has shown that even our Sun will be destroyed in several billion years.
- In the same way, it is easy to accept that *Ānāpānasati* is breath meditation. Even though the more profound meaning is to “discard immoral” and “take in morals,” these days it is interpreted as “breathing

in and breathing out.” In addition, “watching the breath” calms the mind, so many people are impressed by that.

- Even though this gradual degradation started with *Mahāyāna*, those concepts gradually got incorporated into *Theravāda* Buddhism. A turning point was Buddhaghosa’s writing, especially his *Visuddhimagga*. For details, see “[Buddhaghosa’s Visuddhimagga – A Focused Analysis](#).”
- The Pāli *Tipiṭaka* was set aside in almost all Buddhist countries, and Buddhaghosa’s *Visuddhimagga* was adopted. The accepted theory was that there was no need to go through the 56 volumes of the *Tipiṭaka*. Buddhaghosa summarized it all in a single commentary!

Concepts in the *Tipiṭaka* Need to be Explained

5. Fortunately, there are three original commentaries prepared by *Arahants* that have survived as part of the *Tipiṭaka*: *Patisambhidamagga*, *Petakopadesa*, and *Nettipakarana*.

- No one had bothered to read them for hundreds of years. Even if read, it is impossible to grasp those deep concepts unless explained by a Noble Person (*Ariyā*). Such Noble Persons are born occasionally and they revive the correct teachings. They are “*jāti Sotāpannas*” who had attained the *Sotāpanna* stage in previous lives.
- Waharaka Thero was such a *jāti Sotāpanna*. In his discourses, he described how the correct meanings naturally came to him. When he grew up he was able to go through the *Tipiṭaka*. With the help of those three original commentaries mentioned above, he was able to revive the correct interpretations. Of course, each person needs to verify that by comparing his interpretations (which I provide on this website) with other interpretations.
- With that background, let us discuss the remaining two requirements for the *Sotāpanna* stage mentioned in #1 above. Hopefully, you can see which version is correct by comparing my analysis with other current versions.

Yoniso Manasikāra – Connection to *Paṭicca Samuppāda* and *Tilakkhaṇa*

6. The third condition for the *Sotāpanna* stage is to have “*yoniso manasikāra*.” Here “*yonī*” means “origin,” “*so*” means “oneself,” and “*manasikāra*” here means “with this in mind.”

- The origin of future existence (*bhava*) and births within them (*jāti*) is explained in *Paṭicca Samuppāda*. As we have discussed, “*avijjā paccayā saṅkhāra*” means to do “unwise actions due to ignorance of the Noble Truths.” That ALWAYS ends with “*bhava paccayā jāti, jāti paccayā jarā, maraṇa, soka, parideva, dukkha, domanassupāyasā sambhavan’ti*” or the “whole mass suffering.”
- To put it another way, one’s future births (and associated suffering or happiness) are according to one’s actions. Births in the “good realms” lead to mostly happiness and births in “bad realms” lead to suffering. However, the problem is that MOST births are in the “bad realms.” At a deeper level, the reason for that is the tendency to act with “*ayoniso manasikāra*” the OPPOSITE of “*yoniso manasikāra*.”

7. The *Vibhangapakarana* (BJ edition Book 2, p. 234) explains *ayoniso manasikāra* as follows: “*Tattha katamo ayoniso manasikāro? Anicce “niccan”ti ayoniso manasikāro, dukkhe “sukhan”ti ayoniso manasikāro, anattani “attā”ti ayoniso manasikāro, asubhe “subhan”ti ayoniso manasikāro, saccavippaṭikulena vā cittassa āvaṭṭanā anāvaṭṭanā ābhogo samannāhāro manasikāro—ayaṃ vuccati “ayoniso manasikāro”.*”

- At Sutta Central, you can find it toward the end of section “3. *Tikaniddesa*” at “[WebLink: suttacentral: Khuddakavattuvibhaṅga \(KN vb 17\)](#)”
- In many English translations, *ayoniso manasikāra* is “**improper attention**.” See, for example, the “[WebLink: suttacentral: English Translation of Mahāli Sutta \(AN 10.47\)](#)” at Sutta Central.

- However, the above verse says: “*ayoniso manasikāra* is to consider *anicca* as *nicca*, *dukkha* as *sukha*, and *anatta* as *atta*.”
- To state that briefly, if one believes that things in this world can provide happiness in the long run, then one acts with *ayoniso manasikāra*. To act with *yoniso manasikāra* is to see the unfruitfulness of these struggles to attain something that is not attainable, and thus to work diligently towards at least the *Sotāpanna* stage because this life is so short.
- As discussed in many posts, this world has *anicca*, *dukkha*, and *anatta* nature. However, an average human (who has not understood Buddha Dhamma) perceives this world as *nicca*, *sukha*, and *atta* nature. See, “[Basic Framework of Buddha Dhamma](#).”
- A different but related description of *ayoniso manasikāra* in terms of *Paṭicca Samuppāda* is in “[Four Conditions for Attaining Sotāpanna Magga/Phala](#).”

Critical Inferences

8. The discussion in #6 and #7 points to the following.

Now it is clear that the third requirement is a natural extension of the first two requirements. Without a Noble friend, it is impossible to fulfill the third requirement, i.e., to understand what is meant by *yoniso manasikāra* because that requires an understanding of *anicca*, *dukkha*, and *anatta* (*Tilakkhaṇa*).

- It also confirms the value of the original three commentaries discussed in #5 above. The critical verse from *Vibhangapakarana* in #7 clarifies *yoniso manasikāra*.
- But an understanding of that verse REQUIRES comprehension of the true meanings of *anicca*, *dukkha*, and *anatta*.
- Recently, those meanings have become apparent due to our *kalyāṇa mittā*, Waharaka Thero. He provided a consistent picture based on the *Tiṭṭaka* simply because he was born a *jāti Sotāpanna*.
- The fourth requirement, *dhammānudhammappaṭipatti*, and its connection to *Paṭicca Samuppāda* in “[Dhammānudhamma Paṭipatti – Connection to Paṭicca Samuppāda/Tilakkhaṇa](#).”

Previous posts in this subsection at, “[Paṭicca Samuppāda, Tilakkhaṇa, Four Noble Truths](#).”

9.5.7 Dhamma – Different Meanings Depending on the Context

November 16, 2021; rewritten December 23, 2022

Dhamma means teaching, and *anudhamma* means associated concepts. Even though *dhamma* could mean any teaching, it is commonly used to indicate Buddha's teachings or “Buddha Dhamma.”

Introduction

1. In the post “[Yoniso Manasikāra and Paṭicca Samuppāda](#),” we discussed the four requirements for someone to attain the *Sotāpanna* stage. There we discussed the first three requirements. The fourth is *dhammānudhammappaṭipatti*. It means “to follow Buddha Dhamma and associated concepts.”

- The Pāli word *dhammānudhammappaṭipatti* is the combination of three words: *dhamma*, *anudhamma*, and *paṭipatti*. Note that when two Pāli words are combined and have “a”s at the joint, those two “a”s become a long “ā.” Thus, the combination of *dhamma* *anudhamma* leads to “*dhammānudhamma*.”
- Therefore, we need to discuss the words “*dhamma*” and “*anudhamma*.” As we will see, “*dhamma*” can have different meanings based on the context.
- We have many examples in English where the same word gives different meanings based on the context. For example, the term “right” conveys unrelated things in “turn right” and “you are right.”

- That is why it is dangerous to translate Pāli texts word-by-word, as commonly done these days. I have pointed out such issues with specific examples. See “[Distortion of Pāli Keywords in Paṭicca Samuppāda](#).”

Different Types of Dhamma

2. Some people say, “I am learning Dhamma,” by which they mean, “I am learning Buddha Dhamma” or “Buddhism.”

- But Dhamma is the generic word applicable to any teaching or principle or a “path one follows.”
- If we need to be specific, “*sath Dhamma*” (pronounced “*saddhamma*”) to indicate “good” (“*sath*”) Dhamma. The opposite of that is “*adhamma*.”
- Any teaching other than Buddha Dhamma teaches one how to “succeed in this world,” i.e., how to make money and live a happy life. Other “religious teachings” may teach how to be born in *Deva* or *Brahma* realms. They are “*lokiya dhamma*.”
- But Buddha Dhamma teaches that it is impossible to remove future suffering via any of those ways. No matter how successful one can become, that success will end in death. The same holds for births in any heavenly realm. Any birth in this world ends in death.
- Thus, Buddha Dhamma is *saddhamma*, and all other Dhamma in this world are *adhamma*. Of course, there are different levels of *adhamma*, as we will see below (#11.)

3. We can take an analogy to clarify. The Pāli generic word for “odor” is “*gandha*.” The words “*sugandha*” and “*dugandha*” must be used to indicate a pleasant or foul odor.

- However, it is common to use the word “*gandha*” to mean “*dugandha*” (the exact words are used in the Sinhala language too.)
- Even in English, we say “it smells” to indicate a “bad odor.” However, “smell” means “odor.” To indicate a foul odor, we should say, “it smells bad,” just like when we say, “it smells good” to indicate a pleasing odor.
- Thus, one must be aware of these common usages. **In many cases, Buddha Dhamma is referred to as “Dhamma.”**

Dhammo have rakkhati dhammacārīṃ

4. The verse, “*Dhammo have rakkhati dhammacārīṃ*” means “Dhamma will **guide and protect** those who follow Buddha Dhamma.”

- The result of following a Buddha Dhamma is to be free of future rebirths with suffering. Thus, the goal is to be free of even a trace of suffering.
- If one follows *adhamma*, one will end up in an *apāya* sooner or later. That is explained in *Paṭicca Samuppāda*.

Adhamma and Saddhamma

5. “[WebLink: suttacentral: Dhamma Sutta \(AN 10.182\)](#)” succinctly describes *adhamma* and *saddhamma* (note that the *sutta* uses “*dhamma*” to denote “*saddhamma*.”)

- **Adhamma are the *dasa akusala*:** *Pāṇātīpātā*, *adinnādāna*, *kāmesumicchācāra*, *musāvāda*, *pisuṇā vācā*, *pharusā vācā*, *samphappalāpa*, *abhijjhā*, *vyāpāda*, *micchā diṭṭhi*. They are: “killing, stealing, sexual misconduct, lying, slandering, harsh talk, empty talk, greed, hate, and wrong views.”
- The same *sutta* defines *saddhamma* as the **avoidance of *dasa akusala***.
- There are subtle issues to discuss. But the above *sutta* provides the basic idea.

Anāriyadhamma and Ariyadhamma

6. Sometimes, the words “*anāriya dhamma*” and “*Ariya dhamma*” are used in place of *adhamma* and *saddhamma*.

- See, for example, “[WebLink: suttacentral: Ariyadhamma Sutta \(AN 10.179\).](#)”
- As we can see, they are defined based on *dasa akusala*, the same way as *adhamma* and *saddhamma*.
- Many other religions do not strictly teach avoiding killing animals. Furthermore, all other religions have several of the ten types of wrong views (*micchā diṭṭhi*.) Thus, only **Buddha Dhamma** is strictly *saddhamma* or *Ariya dhamma*.”
- These and related concepts are described in many *suttas*, some of which are discussed in “[Dasa Akusala/Dasa Kusala – Basis of Buddha Dhamma.](#)”

Asappurisa and Sappurisa

7. Those who follow *saddhamma* or *Ariya dhamma* are “*sappurisa*” (“*sath*” + “*purisa*.”) They are the eight types of Noble Persons (*Ariyas*) who are at or above the *Sotapanna Anugāmi* stage.

- That is evident in the “[WebLink: suttacentral: Sappurisadhamma Sutta \(AN 10.192\).](#)” Another synonym for *adhamma* is introduced in that *sutta*, “*asappurisadhamma*,” indicating that an *asappurisa* engages in *dasa akusala*. The opposite, “*sappurisadhamma*,” is the same as “*saddhamma*.”
- As we know, one of the four conditions to attain the *Sotāpanna* stage is to **associate with a sappurisa** or “*Sappurisasamsevo*.” See #3 of “[Four Conditions for Attaining Sotapanna Magga/Phala.](#)”
- **Thus, it is clear that a “sappurisa” is a Noble Person (Ariya), not merely a “good person”** as translated in “[WebLink: suttacentral: Sappurisadhamma Sutta \(AN 10.192\).](#)”

Why Are “Moral People” Not Included in “Sappurisa”?

8. We tend to think that most people are moral. But then there are cases where a person entirely accepted as a “moral person” commits a highly-immoral deed such as rape or taking a large bribe.

- Any person who has not attained at least the *Sotāpanna Anugāmi* stage can be tempted to engage in an immoral deed. Anyone with *sakkāya diṭṭhi* can be triggered to commit an *apāyagāmi* deed (an action that can lead to rebirth in an *apāya*)!
- This can be explained easily with an analysis of a *citta vūthi*. A *citta vūthi* runs based on an *ārammaṇa*. If the *ārammaṇa* is strong enough, the “decision to engage” is made at the *votthapana citta* and carried out with the subsequent *javana citta*. Suppose the person has not overcome the first three *saṃyojana* (including *sakkāya diṭṭhi*). If the *ārammaṇa* is strong enough, the “decision to engage” is made within a split second, even without conscious decision-making.
- I have explained the basic process in “[Avyākata Paticca Samuppāda for Vipāka Viññāna.](#)” I plan to write more about that in the future.

Paṭicca Samuppāda Is Buddha Dhamma!

9. The “[WebLink: suttacentral: Mahāhatthipadopama Sutta \(MN 28\)](#)” ends with the statement, “*Yo Paṭtīcasamuppādam passati, so Dhammam passati; yo Dhammam passati so paṭtīcasamuppādam passatī*”ti.” That means, “One who sees *paṭicca samuppāda* sees the **Dhamma**; one who sees the Dhamma sees *paṭicca samuppāda*.” **To understand Buddha Dhamma, one needs to know how future suffering arises via the *Paṭicca Samuppāda* process.**

- In the above verse, “Dhamma” refers to Buddha Dhamma or “*saddhamma*.”

- In other words, *Paṭicca Samuppāda* is the same as **Buddha Dhamma**. It describes the **Four Noble Truths**.
- See, for example, “[WebLink: suttacentral: Tithāyatana Sutta \(AN 3.61\)](#).”

Dhamma and Anudhamma

10. *Dhamma* is the “principle/main Dhamma,” and *anudhamma* refers to “minor/related Dhamma.”

- *Paṭicca Samuppāda* is the Dhamma in Buddha Dhamma. See #9 above.
- All other related teachings/concepts, **like *Tilakkhaṇa*, are *anudhamma***.
- There are four *suttā*, starting with the “[WebLink: suttacentral: Anudhamma Sutta \(SN 22.39\)](#)” that describe various “*anudhamma*” like *anicca*, *dukkha*, and *anatta*.

All Other Dhamma Are *Lokiya* Dhamma

11. Regarding *lokiya dhamma* that sustains worldly entities, *dasa akusala* leads to rebirths in the four lowest realms (*apāyā*.) These are also called “*pāpa kamma*.” These are listed in the “[WebLink: suttacentral: Pathamaadhamma Sutta \(AN 10.171\)](#)” as “killing living creatures, stealing, and sexual misconduct; speech that is false, divisive, harsh, or nonsensical; greed, ill will, and wrong view.”

- The same *sutta* lists the **avoidance of the above ten types** as *dhamma*, i.e., “**good *dhamma***.”
- Thus we can see that teachings in other religions have many “good *dhamma*” but also have “*adhamma*,” especially in terms of wrong views (e.g., the view of an eternal self/soul/*ātman*.)

12. Then what are the “*anudhamma*” in those cases of “*lokiya dhamma*”? There are three *anudhamma* associated with each (*a*)*dhamma*.

- For example, killing living beings is an *adhamma*. Helping others in killings, encouraging others to kill, and praising killings by others are the *anudhamma* associated with that *adhamma*. While personally making a killing is the worst, helping others to kill, encouraging others to kill, and praising killings by others also count as evil deeds and will have dire *kammic* consequences.
- Avoiding killing living beings is a (good) *dhamma*. Not helping others in killings, not encouraging others to kill, and not praising killings by others are *anudhamma* and also count as “good deeds.”

Lokiya Dhamma and Buddha Dhamma

13. Another way to categorize Dhamma is as “*lokiya dhamma*” and Buddha Dhamma.

- “*Lokiya*” means “belonging to this world of 31 realms. *Dhammā* (with a long “a”) that “bear things in this world” arise via *Akusala-Mūla Paṭicca Samuppāda*. See “[What are Rūpa? – Dhammā are Rūpa too!](#)”
- As we know, that process starts with “*avijjā paccayā saṅkhāra*” and leads to “*upādāna paccayā bhava*” and “*bhava paccayā jāti*.” That is how anything in this world is born (*jāti*.)
- To be precise, *Akusala-Mūla Paṭicca Samuppāda* explains how existences and rebirths arise due to the accumulation of “*lokiya dhamma*.” Some *lokiya dhammas* lead to rebirths in the “good realms;” teachings of other religions belong to this category.
- **However, they also fall under the *Akusala-Mūla Paṭicca Samuppāda***, starting with “*avijjā paccayā saṅkhāra*,” i.e., actions based on *avijjā* or ignorance of the Four Noble Truths. See “[Saṅkhāra – What It Really Means](#).”

14. On the other hand, the *Kusala-Mūla Paṭicca Samuppāda* process starts with “*kusala-mūla paccayā saṅkhāra*” and leads to “*adhimokkha paccayā bhava*” and “*bhava paccayā jāti*.” But here, only “*Ariya jātī*” can arise, i.e., only the eight types of Noble Persons are “born.” Of course, these “births” happen during a lifetime. For example, an average human can become a *Sotāpanna*.

- **Comprehension of both versions** of *Paṭicca Samuppāda* will lead to stopping future rebirths (*bhava uddha* = **Buddha**) and attaining *Nibbāna*. Thus, **Buddha Dhamma** means “**Dhamma** that leads to *bhava uddha* or stopping rebirths.” That is the “*lokuttara dhamma*,” or the deeper version of Dhamma.

Arahanthood Is Not Annihilation

15. Some people are terrified of “losing their existence” with *Nibbāna*. They ask, “Will I be annihilated/eradicated?” That question is asked with the wrong view of an “everlasting soul/*ātman*.”

- Only a person with *sakkāya diṭṭhi* will raise that question. When one removes *sakkāya diṭṭhi*, one knows there is no “me” or “I” traversing the rebirth process. Rebirths are according to existing causes and conditions.
- **In any case, why worry if there is indeed an everlasting “I” or “me”?** If that is the case, there should be no fear of losing something permanent.
- There is nothing everlasting to be annihilated or eradicated! *Anuloma* PS leads to existences, and *Paṭiloma* PS leads to the stopping of that process; see “[Patiloma Paticca Samuppāda – Key to Nibbāna](#).” Also, see “[Yamaka Sutta \(SN 22.85\) – Arahanthood Is Not Annihilation but End of Suffering](#).”

16. However, the description in #15 DOES NOT say we do not exist. **It is wrong to translate “anatta” as “no-self.”** We do exist as long as we have ignorance (*avijjā*) and experience much more suffering than brief spans of happiness in the rebirth process.

- The Buddha pointed out that we commit immoral deeds and are born in suffering-filled realms BECAUSE of the **wrong view and wrong perception** of an everlasting soul/*ātman*. *Avijjā* (ignorance of Noble Truths/*Paṭicca Samuppāda*/*Tilakkhaṇa*) is the cause of both.)
- One gets rid of that wrong view (*sakkāya diṭṭhi*) at the *Sotāpanna* stage. But the perception (*saññā*) of an everlasting soul/*ātman* goes away at the *Arahant* stage. Suffering stops entirely at the *Parinibbāna* (passing away) of the *Arahant*. See “[Vipallāsa \(Diṭṭhi, Saññā, Citta\) Affect Saṅkhāra](#).”
- As I emphasized in #15, one should not worry about “being annihilated” if their view of an everlasting soul/*ātman* is correct. But the Buddha proved with *Paṭicca Samuppāda* that such an everlasting entity does not exist. See “[Patiloma Paticca Samuppāda – Key to Nibbāna](#).”
- Reading and understanding all the posts linked above is essential if one has the desire and drive to comprehend Buddha Dhamma.

9.5.8 Dhammānudhamma Paṭipatti – Connection to Paṭicca Samuppāda/Tilakkhaṇa

November 21, 2021

Dhammānudhamma Paṭipatti Leads one to *Nibbāna*.

What Is *Dhammānudhamma Paṭipatti*?

1. The Pāli word *dhammānudhammapaṭipatti* (*dhamma anudhamma paṭipatti*) is the combination of three words: *dhamma*, *anudhamma*, and *paṭipatti*. In the previous post, we did an overview: “[Dhamma – Different Meanings Depending on the Context](#).”

- Dhamma* here is Buddha Dhamma. The “[WebLink: suttacentral: Mahāhatthipadopama Sutta \(MN 28\)](#)” ends with the statement, “*Yo Paṭiccasamuppādam passati, so Dhammam passati; yo Dhammam passati so paṭiccasamuppādam passatī*”ti.” That means, “One who sees *paṭicca samuppāda* sees the Dhamma; one who sees the Dhamma sees *paṭicca samuppāda*.” **To understand**

Buddha Dhamma, one needs to know how future suffering arises via the *Paṭicca Samuppāda* process.

- ii. We discussed “*anudhamma*” briefly in the previous post. Those are other aspects (one could say, subcategories) that fall under *dhamma*. There are four *suttas* that clarify “*anudhamma*” at a deeper level. They are “[WebLink: suttacentral: Anudhamma Sutta \(SN 22.39\)](#)” through “[WebLink: suttacentral: Catutthaanudhamma Sutta \(SN 22. 42\)](#)” We will discuss them below. **Simply stated, “*anudhamma*” means “according to Dhamma” or “according to *Paṭicca Samuppāda*.”**
- iii. *Paṭipatti* is conduct or practice.

Therefore, the literal translation of *dhammānudanudhammapaṭipatti* is “to live according to *dhamma* and *anudhamma*.”

Requirements for the *Sotāpanna* Stage

2. We listed the four requirements for someone to attain the *Sotāpanna* stage in a previous post, “[Yoniso Manasikāra and Paṭicca Samuppāda](#).” There we discussed the first three requirements.

- The first two requirements reflect that one must hear the “previously unknown teachings of the Buddha” from a Buddha or a true disciple of a Buddha who has understood those teachings. The framework of Buddha Dhamma can be stated in three inter-related ways: Four Noble Truths, *Paṭicca Samuppāda*, *Tilakkhaṇa*.
- The third condition (*yoniso manasikāra*) is to UNDERSTAND those concepts, i.e., how the suffering-filled rebirth process continues because the true nature of this world is not understood.
- The fourth condition (*dhammānudanudhammapaṭipatti*) is where that understanding becomes established permanently in mind. That happens when it becomes clear without a doubt that the word of 31 realms has the three characteristics of *anicca*, *dukkha*, *anatta*, and thus it is not possible to stop future suffering until stopping of the rebirth process.

Anudhamma – At Deeper Level

3. As we discussed in the previous post, “*anudhamma*” — at the primary level — means “moral living.” After comprehending the deeper Dhamma, one would realize that just moral living is not enough to stop suffering in future lives.

- **Deeper level *anudhammā* are concepts related to *Paṭicca Samuppāda*. *Tilakkhaṇa* (*anicca*, *dukkha*, *anatta*) are those *anudhammā*.**
- It is important to note that “moral living” is based on mundane versions of *alobha*, *adosa*, and *amoha* have “hidden ignorance.” That is ignorance of *Tilakkhaṇa*.

4. *Anudhamma* at the deeper level is discussed in a series of four *suttas*, as mentioned in #1 above. Following is the English translation of the “*Anudhamma Sutta* (SN 22.39)“:

- “A *bhikkhu* lives by the Dhamma (*Dhammānudanudhammapaṭipadā*), after he understands what is meant by Dhamma (i.e., *Paṭicca Samuppāda*). Then **he lives without attaching (*nibbidābahulo*)** to *rūpa*, *vedanā*, *saññā*, *saṅkhāra*, *viññāṇa*. He fully understands the real nature of *rūpa*, *vedanā*, *saññā*, *saṅkhāra*, *viññāṇa* and thus he is freed from rebirth, aging, and death; he is free from sorrow, lamentation, pain, displeasure, and despair; he is free from all suffering (through future rebirths).”
- The Pāli verse is in [Ref. 1](#) below.
- The next three *suttas* in that series explain why a *bhikkhu* would not attach to (or crave) anything in this world (*rūpa*, *vedanā*, *saññā*, *saṅkhāra*, *viññāṇa*)

Connection to *Tilakkhaṇa*

5. The REASON why someone would not attach to (or crave) *rūpa*, *vedanā*, *saññā*, *saṅkhāra*, *viññāṇa* is he has understood that they all have *anicca*, *dukkha*, *anatta* nature! That is explicitly stated in the three *suttas* of [Ref. 2](#), [Ref. 3](#), and [Ref. 4](#) below.

- “[WebLink: suttacentral: Dutiya Anudhamma Sutta \(SN 22.41\)](#)” states that such a *bhikkhu* would have seen the **anicca nature** of *rūpa*, *vedanā*, *saññā*, *saṅkhāra*, *viññāṇa* (the five aggregates or *pañcakkhandha*.)
- “[WebLink: suttacentral: Tatiya Anudhamma Sutta \(SN 22.42\)](#)” states that such a *bhikkhu* would have seen the **dukkha nature** of *rūpa*, *vedanā*, *saññā*, *saṅkhāra*, *viññāṇa* (the five aggregates or *pañcakkhandha*.)
- “[WebLink: suttacentral: Catuttha Anudhamma Sutta \(SN 22.43\)](#)” states that such a *bhikkhu* would have seen the **anatta nature** of *rūpa*, *vedanā*, *saññā*, *saṅkhāra*, *viññāṇa* (the five aggregates or *pañcakkhandha*.)

Connection to the First Discourse – *Dhammacakkappavattana Sutta*

6. We note that the Buddha is referring to the five aggregates (*pañcakkhandha*) above.

- **Attaching** to *pañcakkhandha* is *pañcupādānakkhandha* (*pañca upādāna khandha*). That is the root cause of future suffering.
- One would lose the craving for things in this world when he sees the dangers of such desires. As we have discussed, “this world” means *rūpa* in this world and our mental impressions of them (*vedanā*, *saññā*, *saṅkhāra*, *viññāṇa*.) That is *pañcupādānakkhandha*.
- We have discussed the fact that the Buddha summarized suffering as “*saṃkhittena pañcupādānakkhandhā dukkhā*.” See, “[Essence of Buddhism – In the First Sutta](#).”
- The main task in studying Buddha Dhamma is to understand the truth of the above statement. There are many ways to tackle that.

Different Approaches

7. The [puredhamma.net](#) website is tailored to provide that understanding. I have presented it in several ways. The most recent approach started with the section, “[Basic Framework of Buddha Dhamma](#).” Then we proceeded to the next step: “[Paticca Samuppāda, Tilakkhaṇa, Four Noble Truths](#).” This current post is in the second section.

- In those sections, we discussed *Tilakkhaṇa* (*anicca*, *dukkha*, *anatta*) or three characteristics of this world. We can summarize them as follows: *Anicca* means our expectation to get rid of suffering cannot be achieved within this world. *Dukkha* means what we perceive to be desirable in this world leads to suffering. *Anatta* means “therefore, any efforts to get rid of suffering would be in vain.”
- Ignorance of *Tilakkhaṇa* (*avijjā*) leads to unwise actions via *saṅkhāra*. In an 11-step process that leads to future births and, thus, the continuation of suffering. That process is *Paticca Samuppāda*. It describes how our efforts (*saṅkhāra*) based on *avijjā* WILL INEVITABLY lead to rebirth among the 31 realms. While some of those existences are mostly suffering-free, they are only temporary, AND the probability of such “good births” is very low. Most rebirths are in the suffering-filled four lowest realms (*apāyās*.)

Dhammānudhamma Paṭipatti Leads to Nibbāna

8. The “[WebLink: suttacentral: Nalakalāpī Sutta \(SN 12.67\)](#)” has the following verse at the end (see [Ref. 5](#) below): “If a *bhikkhu* is practicing for the purpose of release from aging-and-death via losing attachment (*virāgāya*) and cessation (*nirodhāya*), he can be called a *bhikkhu* who is practicing in accordance with the Dhamma (*dhammānudhammapaṭipanno*). If through such practice a *bhikkhu* has lost attachment

(*virāgāya*) and attained cessation (*nirodhāya*), he can be called a *bhikkhu* who has **attained Nibbāna** in this very life..”

References

1. The “[WebLink: suttacentral: Anudhamma Sutta \(SN 22.39\)](#)” states:

“Dhammānudhammappaṭipannassa, bhikkhave, bhikkhuno ayam **anudhammo hoti** yaṃ rūpe **nibbidābahulo** vihareyya, vedanāya **nibbidābahulo** vihareyya, saññāya **nibbidābahulo** vihareyya, saṅkhāresu **nibbidābahulo** vihareyya, viññāṇe **nibbidābahulo** vihareyya. 9.6.1 Distortion of Pāli Keywords in Paṭicca Samuppāda

November 29, 2021; revised October 16, 2022

Distortion of Pāli keywords in *Paṭicca Samuppāda* is quite common in current English translations. I will analyze two critical *suttas* to make that clear.

First Two *Suttas* in *Udāna*

1. The *suttas* in the *Udāna* section are the “joyful utterances” of the Buddha and many of his disciples. Let us look at the first two *suttas* in *Udāna*. They describe how the Buddha comprehended *anuloma* and *paṭiloma* *Paṭicca Samuppāda* during the night of the Enlightenment. First, I will reproduce the English translations of the two *suttas* verbatim. [*paṭiloma* : [adj.] reverse; opposite; contrary.]

The following verse is from the first *sutta*. The Pāli version of the corresponding verses is in [Ref. 1](#) :

“In the first part of the night, he reflected on dependent origination in forwarding order:

When this exists, that is, due to the arising of this, that arises. That is: Ignorance is a condition for choices. Choices are a condition for consciousness. Consciousness is a condition for name and form. Name and form are conditions for the six sense fields. The six sense fields are conditions for contact. Contact is a condition for feeling. The feeling is a condition for craving. Craving is a condition for grasping. Grasping is a condition

for continued existence. Continued existence is a condition for rebirth. Rebirth is a condition for old age and death, sorrow, lamentation, pain, sadness, and distress to come to be. That is how this entire mass of suffering originates.”

- The complete English translation: “[WebLink: suttacentral: Upon Awakening \(1st\) by Sujato \(KN Ud 1.1\).](#)” The second translation is almost the same: “[WebLink: suttacentral: The First Discourse about the Awakening Tree by Anandajoti \(KN Ud 1.1\).](#)”

2. The following verse is from the second *sutta*. The Pāli version of the corresponding verses is in [Ref. 2](#) :

“In the second part of the night, he reflected on dependent origination in reverse order:

When this doesn’t exist, that is not; due to the cessation of this, that ceases. That is: **When ignorance ceases, choices cease. When choices cease, consciousness ceases.** When consciousness ceases, name and form cease. When name and form cease, the six sense fields cease. **When the six sense fields cease, contact ceases. When contact ceases, feeling ceases.** When feeling ceases, craving ceases. When craving ceases, grasping ceases. When grasping ceases, continued existence ceases. When continued existence ceases, rebirth ceases. When rebirth ceases, old age and death, sorrow, lamentation, pain, sadness, and distress cease. That is how this entire mass of suffering ceases.”

The complete English translation: “[WebLink: suttacentral: Upon Awakening \(2nd\) by Sujato \(KN Ud 1.2\).](#)” The second translation there is almost the same: “[WebLink: suttacentral: The Second Discourse about the Awakening Tree by Anandajoti \(KN Ud1.2\).](#)”

Overview of the Two Suttas

3. Those two *suttas* summarize the key findings of the Buddha upon his Enlightenment.

- The first *sutta* describes how future suffering arises via future rebirths. It all starts with the step, “*avijjā paccayā saṅkhārā*.”
- The second *sutta* explains that removing ignorance from a mind prevents **future rebirths**.

4. Both English translations of the second *sutta* are blatantly incorrect. Buddha’s mind became free of ignorance (*avijjā*) upon Enlightenment that night. **Does that mean he stopped all the subsequent steps as stated in the translation of #2 above?**

- If so, he would not have generated any *saṅkhāra* from the moment of attaining Enlightenment (Buddhahood.) *Vedanā* and *saññā* are in ALL types of *saṅkhāra*. Does that mean he would not feel anything or be unable to perceive and identify anything?
- The literal word-by-word translation is blatantly wrong for all the steps in the second *sutta*.
- The cessation of those steps would also hold for any *Arahant* since they have no trace of *avijjā* left in their minds!

Insane Discussions in Discussion Forums

5. There is a recent discussion at Dhamma Wheel: “[WebLink: dhammawheel.com: Do Arhats experience contact with their sixfold sense media? What about vedanā?](#)” It is a clear example of the confusion caused by such translations. The participants are understandably confused by the above translation of the second *sutta* in #2.

- The translation in #2, without a doubt, says that when *avijjā* is not there, choices (*saṅkhāra*), consciousness, name and form, six sense fields, contact (with the sense fields), feeling, craving, grasping (*upādāna*), continued existence (*bhava*), rebirth, and the entire mass of suffering ceases.
- We all agree that the Buddha and *Arahants* do not have even a trace of *avijjā* (ignorance about the Four Noble Truths) left.

- Then, according to the translations in #2 above, they would not generate any more *saṅkhāra*. They do not experience the six sensory facilities (i.e., don't hear, taste, smell, touch, or think) and will not feel anything. That means they would essentially not be living!
- On the contrary, we know that the Buddha lived for 45 years after Enlightenment. He experienced all six sensory faculties, used them optimally, and had the best mind. He could recall any event in the past as far as he desired. But he also felt all types of *vedanā*, including bodily *dukkha vedanā* (he had back problems and once was injured by Devadatta)

6. So, where is the problem? Is that second *sutta* wrong?

- Both *suttas* are perfectly fine. Such problems arise when translators start translating Pāli *suttas* word-by-word without paying attention – or not understanding the basic concepts in Buddha Dhamma.
- As I have repeatedly emphasized, each Pāli word (especially in deep *suttas*) needs to be handled in the context of the discussed issue. We run into similar situations, even in English. The word “**park**” means two different things in the same sentence, “She will **park** the car so we can walk in the **park**.”

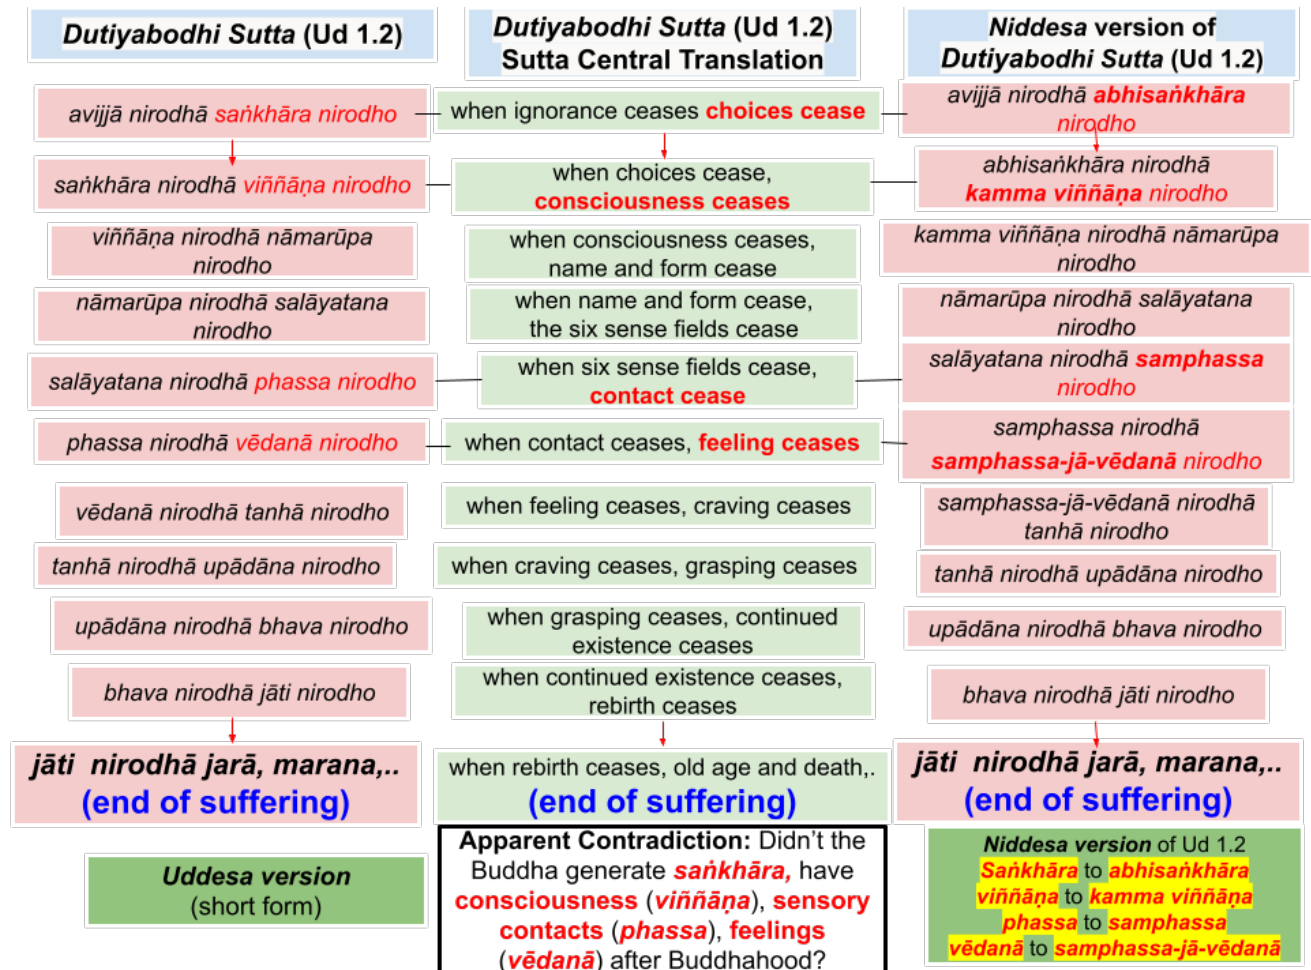

Sutta Interpretation – Uddesa, Niddesa, Paṭiniddesa

7. The steps in *Paṭicca Samuppāda* (and those in the reverse or the *Paṭiloma Paṭicca Samuppāda*) are in the “utterance (*uddesa*)” form. That is to recite the 11 steps.

- Those steps need explanations in either the *niddesa* (brief descriptions) or the *paṭiniddesa* (detailed explanations.) Details at “[Sutta Interpretation – Uddesa, Niddesa, Paṭiniddesa](#).”
- There are many verses like that in the *Tipiṭaka*. Another is “*Ye dhammā hetuppabhavā, Tesam hetum tathāgato āha; Tesaṅca yo nirodho, Evaṁvādī mahāsamaṇo.*” Upatissa (Ven. Sāriputta before becoming a *bhikkhu*) attained the *Sotāpanna* stage just by hearing the “*uddesa* version.” Of course, he was the chief disciple of the Buddha and had the sharpest mind next to the Buddha.
- For a few other people at the time of the Buddha, the *niddesa* version would have been enough to understand the meaning of that verse.

8. However, for most people, that verse needs to be explained in detail, i.e., the *paṭiniddesa* version is required. **Most current English translations provide word-by-word translations of that “*uddesa* version” without any explanation.** That can have disastrous outcomes, as illustrated by the translation of the second *sutta* in #2 above.

The following chart illustrates the problem I am trying to highlight. The first column shows the “*uddesa* version” of the *sutta* in the *Tipiṭaka*. The Sutta Central “word-by-word translation” of that *uddesa* version is in column 2, which is incorrect.

Download pdf: [“WebLink: PDF Download: Paticca Samuppāda Figure”](#)

Niddesa and Paṭiniddesa Versions of Some Steps in Paṭicca Samuppāda

9. I have explained those 11 steps in *Paṭicca Samuppāda* in many posts. Below I will briefly state the correct interpretations. It is impossible to discuss even a single term with a single essay.

- First, *saṅkhārā* in the step “*avijjā paccayā saṅkhārā*” refers to “*abhisāṅkhārā*.” [“WebLink: suttacentral: Patिकासamuppāda Vibhaṅga \(Abhidhamma Vb 6\)”](#) explains the step “*avijjā paccayā saṅkhārā*” as, “*Tattha katame avijjā paccayā saṅkhārā? Puññābhisāṅkhāro, apuññābhisāṅkhāro, āneñjābhisāṅkhāro.*” **Translated:** “What is meant by ‘*avijjā paccayā saṅkhārā*’? That means *Puññābhisāṅkhāra, apuññābhisāṅkhāra, āneñjābhisāṅkhāra.*” For details, see [“Saṅkhārā – What It Really Means.”](#)
- Abhisāṅkhārā* leads to the cultivation of “*kamma viññāṇa*,” which are different from *cakkhu viññāṇa*, *sota viññāṇa*, etc. The latter are the six sensory fields, which are “*vipāka viññāṇa*.”
- Therefore, an *Arahant* would have the six sensory fields intact (contrary to the translation in #2 above) but would not generate *kamma viññāṇa*. See, [“Viññāṇa – What It Really Means.”](#)
- Nāmarūpa* in the step “*viññāṇa paccayā nāmarūpa*” is a bit harder to explain. See: [“Kamma Viññāṇa and Nāmarūpa Pariccheda Ñāṇa.”](#) I may get to address all these terms again, but let us finish our overview.

10. In the next step, “*salāyatana*” does not refer to the “six sense fields” but only when those sensory fields (*indriya*) are used as “*āyatana*.” For example, an *Arahant* would have “*cakkhu indriya*,” i.e., he can see just like anyone else. But an *Arahant* would not use eyes for pleasure-seeking, and thus it will not become “*cakkhu āyatana*” (or “*cakkhāyatana*.”) See, [“How Do Sense Faculties Become Internal Āyatana?”](#)

The above becomes clear when we look at the next step, “*saḷāyatana paccayā phasso*.” Here, “*phassa*” means “*samphassa*.” The contact between *cakkhu* and *rūpa* is “*phassa*,” and that leads to “seeing” or “*cakkhu viññāṇa*.” Details at “[Indriya Make Phassa and Āyatana Make Samphassa](#).”

- A special kind of “*phassa*” (*samphassa*) comes into play JUST AFTER that “seeing” or “*cakkhu viññāṇa*.” As I explained in that post, “*samphassa*” means “contact of the mind with *lobha*, *dosa*, *moha* (defilements in mind called *anusaya*.)” That will happen ONLY IF one gets attached to that sight. Such “*samphassa*” then leads to “*samphassa-jā-vedanā*.” That is a type of *vedanā* made up by a defiled mind. Therefore, the *niddesa* version of “*phassa paccayā vedanā*” is “*samphassa paccayā samhassa-jā-vedanā*.”
- It is *samphassa-jā-vedanā* that leads to *taṇhā* in the step “*vedanā paccayā taṇhā*.” Therefore, not all *vedanā* lead to *taṇhā*. It is only those *samphassa-jā-vedanā* that lead to *taṇhā*.

Correct Explanation of the Second Sutta

11. Now, one should get at least an idea of the real meaning of the second *sutta*.

- A living *Arahant* would not generate *abhisankhāra* (which involves *lobha*, *dosa*, and *moha* to various degrees.) But an *Arahant* can think, speak, and do bodily actions. Those involve *mano*, *vacī*, and *kāya sankhāra*. But they will not become *abhisankhāra*!
- Living *Arahants* can see, hear, etc., as anyone else. Thus, they will have all six sensory faculties. But they will not use them seeking sensory pleasures, i.e., they will not become “*āyatana*.”
- Each sensory event will have *vedanā cetasika*. That means an *Arahant* can “feel” just like anyone else. But there will be no “*samphassa-jā-vedanā*.”
- Of course, since there is no *taṇhā*, the rest of the steps will not materialize, i.e., there will be no *upādāna*, *bhava*, or *jāti* (future rebirths.)

12. Any rebirth (*jāti*) leads to “old age and death, sorrow, lamentation, pain, sadness, and distress,” as stated in #1. Since an *Arahant* would not be reborn, all such suffering would not arise. That is the “*parinibbāna*” (or “full *Nibbāna*”) reached by an *Arahant* at the death of the physical body.

- However, focusing on “ending rebirths” is not advisable at the beginning of the Path. If a child thinks about getting a Ph D. in nuclear physics, she will be quickly discouraged. She must first go through primary and secondary schools. One’s first goal should be the *Sotāpanna* stage; even then, one must first learn the basic concepts. See, “[Is It Necessary for a Buddhist to Eliminate Sensual Desires?](#)” Still, it is a good idea to have the “big picture” laid out by the Buddha (and the ultimate goal of *Nibbāna*) in the back of the mind.

Summary

13. We can reach two critical conclusions.

- i. *Paṭicca Samuppāda* IS Buddha Dhamma. Simply stating the 11 steps is useless. A detailed explanation of each step is necessary.
 - ii. There is danger in translating Pāli verses word-by-word without understanding their meanings which depend on the context.
- It is sad to go through discussions in various “Buddhist discussion forums” to see how many people struggle to figure out the true meanings/concepts in multiple *suttas*. But they run into problems because most translations are wrong, and there are apparent contradictions.
 - This “mindless word-by-word translation process” has been going on for years. Just read old posts at Dhamma Wheel. Many topics have been repeatedly discussed, citing the identical wrong translations! **But those translations are not consistent with other translations (by even the same author)**

because the translators do not understand the meanings of keywords in the context of some *suttas*. Many words have different meanings depending on the context. For example, “*viññāṇa*” DOES NOT mean the same thing everywhere! That is the problem. See my recent post, “[Dhamma – Different Meanings Depending on the Context](#).”

- It is time for those translators to come to their senses and learn the genuine and pure Buddha Dhamma and not continue cranking out meaningless translations of highly-condensed *suttā*!

9.6.1.1 Saṅkhāra – An Introduction

.1

January 26, 2023; rewritten March 26, 2023

It is critically important to understand what is meant by “*saṅkhāra*.” Without getting a basic idea of *saṅkhāra*, one cannot hope to understand *Paṭicca Samuppāda*, i.e., Buddha’s teachings.

Buddhism – In Charts 7. Saṅkhāra – An Introduction

Download/Print: [“WebLink: PDF Download: 7. Saṅkhāra – An Introduction”](#)

Saṅkhāra – Various Types

1. Saṅkhārā arise in mind in response to sensory inputs (ārammaṇa.) They are “a mixture of feeling/perception/intention” arising based on the ārammaṇa AND one’s gati. Those arising automatically (without thinking) are “citta/mano saṅkhāra.” Then we may start thinking about the ārammaṇa with “vacī saṅkhāra” and may speak out with them too. If we start bodily actions, those involve stronger kāya saṅkhāra. That is one primary division of saṅkhāra. All living beings (including Arahants) generate them.

- Our thoughts, speech, and actions can be defiled/corrupted by greed (*lobha*), anger (*dosa*), or ignorance (*moha*); those would fall into **apuñña/akusala (immoral) saṅkhāra**. They can bring **harmful consequences in the future**; thus, the prefix “abhi” is attached too, i.e., they are **apuñña/akusala abhisāṅkhāra**.
- The **opposites or the moral types** with generosity, compassion, and wisdom can bring good/beneficial results in the future, and they are **puñña abhisāṅkhāra**.

2. For example, if we hear a brief loud sound, we may be annoyed but not generate anger; that involves only *mano saṅkhāra*. However, if that loud noise persists, we may get angry and start (internally) cursing the person causing the noise; if the sound persists, we may speak out with anger; both those actions involved *vacī abhisāṅkhāra*. If we then confront the “sound maker,” we may hit that person with anger, and that *kamma* is done with *kāya abhisāṅkhāra*.

- **Saṅkhārā without the “abhi” prefix** do not have **kammic consequences** in the future, i.e., they do not have associated **kammic energies**.

- Therefore, “*avijjā paccayā saṅkhārā*” should be explained as “*avijjā paccayā abhisāṅkhārā*” because *saṅkhārā* can arise in a Buddha or an *Arahant*, yet *abhisāṅkhārā* (due to *avijjā*) do not arise in them.
- In *Paṭicca Samuppāda*, even though the *uddesa* version is “***avijjā paccaya saṅkhāra,*” those due to *avijjā* are ALWAYS *abhisāṅkhāra*.** That is why it is not a good idea to translate verses in the *suttas* mechanically, word by word. That lead to contradictions and confusion; see “[Distortion of Pāli Keywords in Paticca Samuppāda.](#)”
- Many *suttas* (especially discussing deeper concepts) are in the “utterance or *uddesa*” format. Translating them word for word can lead to confusion. They must be explained (*niddesa*.) Sometimes long explanations with examples and analogies (*paṭiniddesa*) are needed. See, “[Sutta Interpretation – Uddesa, Niddesa, Patiniddesa.](#)”
- Let us first look at the “definitions” of the three main types of *saṅkhāra*.

Three Types of *Saṅkhāra* Responsible for Actions, Speech, and Thoughts

3. There are succinct statements in the “[WebLink: suttacentral: Cūlavedalla Sutta \(MN 44\)](#)” on the types of *saṅkhāra* generated in mind:

“*Tayome, āvuso visākha, saṅkhārā—kāyasaṅkhāro, vacīsaṅkhāro, cittasaṅkhāro*”*ti.*

– There are three types of *saṅkhāra* – *kāya saṅkhāra*, *vacī saṅkhāra*, *citta saṅkhāra*.

“*Katamo panāyye, kāyasaṅkhāro, katamo vacīsaṅkhāro, katamo cittasaṅkhāro*”*ti?*

– What are *kāya saṅkhāra*, What are *vacī saṅkhāra*, What are *citta saṅkhāra* (or *mano saṅkhāra*)?

“*Assāsapassāsā kho, āvuso visākha, kāyasaṅkhāro, vitakkavicārā vacīsaṅkhāro, saññā ca vedanā ca cittasaṅkhāro*”*ti.*

– *Assāsa passāsā* are *kāya saṅkhāra*, ***vitakka vicāra* are *vacī saṅkhāra***, *saññā* and *vedanā* constitute *citta saṅkhāra*.

“*Kasmā panāyye, assāsapassāsā kāyasaṅkhāro, kasmā vitakkavicārā vacīsaṅkhāro, kasmā saññā ca vedanā ca cittasaṅkhāro*”*ti?*

– Why are the three types of *saṅkhāra* categorized in that way?

“*Assāsapassāsā kho, āvuso visākha, kāyikā ete dhammā kāyappaṭibaddhā, tasmā assāsapassāsā kāyasaṅkhāro. Pubbe kho, āvuso visākha, vitakketvā vicāretvā pacchā vācaṃ bhindatī, tasmā vitakkavicārā vacīsaṅkhāro. Saññā ca vedanā ca cetasikā ete dhammā cittappaṭibaddhā, tasmā saññā ca vedanā ca cittasaṅkhāro*”*ti.*

– *Assāsa passāsā* (breathing in and out) is associated with the body (movements). Thus, *assāsa passāsā* is *kāya saṅkhāra*.

– ***Vitakka/vicāra* arise before speech “breaks out.” Therefore, *vitakka/vicāra* are *vacī saṅkhāra*.**

– *Saññā* and *vedanā* are associated with any *citta*. Thus, *Saññā/vedanā* are *citta (mano) saṅkhāra*.

Assāsa Passāsā* Are not *Abhisāṅkhāra

4. “*Assāsa passāsā*” in verse “*assāsa passāsā kāya saṅkhārā*” does refer to the type of *saṅkhāra* involved in “breathing in out.”

- Even though we don’t realize it, breathing in and out happens via *citta vīthi*, i.e., “thoughts” if we translate *citta* as “thought.” But these are “weak *citta*” without any *javana* power. Such weak *citta*

vīthis run through our minds even while we are sleeping. Now, breathing involves moving body parts, and **any bodily movement MUST involve *citta* because the mind controls the body.**

- Breathing, walking, running, or any bodily movement that does not arise with greed, anger, or ignorance in mind are *kammically*-neutral *saṅkhāra*. **They are NOT *abhisāṅkhāra*.**

5. **Those definitions in #3 above are for *saṅkhāra* in general.** Whether they become *abhisāṅkhāra* or not will depend on whether or not greed (*lobha*), anger (*dosa*), or ignorance (*moha*) will be involved.

- For example, *saññā* and *vedanā* arise in *cittā* of *Arahants*, too. Thus, *mano saṅkhāra* arising in *Arahants* are not *abhisāṅkhāra*. **However, if *vedanā* turn to *samphassa-jā-vedanā*, then they definitely become *abhisāṅkhāra*.**
- *Vitakka/vicāra* can be simply stated as “deliberations.” When an *ārammaṇa* comes in, one may start internally debating how to proceed. An example is given in #6 below. Those deliberations can be immoral, moral, or neutral and must be handled based on the context. However, when specifically referred to as *savitakka/savicāra*, those are “**good *vacī saṅkhāra***” that, for example, arise in an *Arahant*.
- For details, see “[Vacī Saṅkhāra – Saṅkappa \(Conscious Thoughts\) and Vācā \(Speech\)](#),” “[Correct Meaning of Vacī Saṅkhāra](#),” and “[Vitakka, Vicāra, Savitakka, Savicāra, and Avitakka, Avicāra](#).”

Saṅkhāra and Abhisāṅkhāra

6. Understanding how they arise makes it easier to remember the functions/deployment of the three main types of *saṅkhāra* mentioned above. Either good or bad types of *abhisāṅkhāra* come into play when we attach to sensory input (*ārammaṇa*) and greed, anger, or ignorance arise in mind.

- Let us consider an example. Suppose person X is watching TV. X is just watching a “bland program.” But then the program switches to a commercial showing a beautiful half-naked actress in a recently released movie. That automatically leads to lustful thoughts in X, and he starts watching it with interest. Those initial thoughts of lust arise automatically due to his hidden defilements (*kāma rāga anusaya*.) Those are ***citta/mano abhisāṅkhāra*** arising automatically due to his character/habits (*gati*) to be aroused/enticed by such visuals.
- ***Mano abhisāṅkhārā*** arise automatically according to *gati* and are the weakest form of ***abhisāṅkhāra***.
- Now he starts generating lustful thoughts consciously; here, he is “talking to himself,” thinking about how nice it would be to watch the movie; these are the “deliberations” or “*vitakka/vicāra*” mentioned in #5 above. Those are a form of ***vacī abhisāṅkhāra***. He calls out to his friend to come and see the commercial. His speech here is also *vacī abhisāṅkhāra*.
- Both watch the commercial while talking excitedly about the actress and the movie and decide to go to the movie. Then they get dressed and drive to the movie theater. All those bodily actions are *kāya saṅkhāra*. Furthermore, since the root cause of those bodily actions is **lust in mind**, they are ***kāya abhisāṅkhāra***.
- *Vacī* and *kāya abhisāṅkhāra* are more robust since they arise in *javana citta*, with conscious thinking.

7. The types of *abhisāṅkhāra* in #6 above are not strong enough to directly cause a specific rebirth. However, they do generate *kammic* energy that can bring *vipāka* in *kāma loka*.

- But these types of lust-induced *abhisāṅkhāra* can grow and lead to committing rape, for example. That specific *kamma* can lead to an unfortunate rebirth (as an animal, for example.)
- I hope that explains the fundamental difference between *saṅkhāra* and *abhisāṅkhāra*.
- Another way to understand: ***abhisāṅkhāra* involves *javana citta*, which are strong *citta* that arises with greed, anger, or ignorance (about moral implications.)**

Cetanā and Sañcetanā

8. In the “[WebLink: suttacentral: Nibbedhika Sutta \(AN 6.63\)](#)“, the Buddha declared, “*cetanāham, bhikkhave, kammaṃ vadāmi.*” Thus, what determines the type of *kammā* is the *cetanā* or the “intention.”

- If the “intention” does not involve *lobha, dosa, or moha (avijjā)*, it is only a *cetanā* or “intention” to get something done. Here, *kamma* done is just an action without *kammic* consequences. For example, if one walks to the kitchen to get a glass of water, that is done with a neutral *cetanā*; the “intention” is to quench the thirst. It is NOT a *sañcetanā*.
- A *cetanā* becomes a *sañcetanā* (*sañ + cetanā*) if it involves “*sañ*” or *lobha, dosa, moha (avijjā)*. See “[San – A Critical Pāli Root](#)” and “[Details of Kamma – Intention, Who Is Affected, Kamma Patha.](#)”

9. There is a detailed analysis (*niddesa* version) of *Paṭicca Samuppāda* in “*Vibhaṅgapararāṇa*” (the *Tipiṭaka* Commentary.) See “[WebLink: suttacentral: Paṭiccasamuppādavibhaṅga \(Abhidhamma Vb 6\).](#)”

- There it is explained what is meant by “*avijjā paccayā saṅkhārā*”: It says, “*Kāya sañcetanā kāyasāṅkhāro, vacī sañcetanā vacīsāṅkhāro, mano sañcetanā citta (mano) saṅkhāro. Ime vuccanti “avijjā paccayā saṅkhārā.”*”
- That means *saṅkhāra* that arise with *avijjā* have “*sañcetanā*” or “defiled *cetanā*” or “defiled intentions.” Those are *abhisāṅkhārā*.
- Therefore, only *abhisāṅkhārā* with *sañcetanā* are included in “*avijjā paccayā saṅkhārā*.”

10. In the “[WebLink: suttacentral: Sañcetanā Sutta \(SN 27.7\)](#)” the Buddha stated, “*rūpa sañcetanāya chandarāgo, cittasseso upakkilesa.*”

- That means “attachment/craving (*chanda rāga*) for *rūpa*” lead to the arising of defiled intentions (*sañcetanā*.) Defiled intentions are those with greed, anger, and ignorance.
- Then that verse is repeated for attachment to sounds, smells, tastes, touches, and *dhammā* (*dhamma sañcetanā*.) Note that *dhammā* are *ārammaṇa* that come directly to the mind; see “[Dhamma and Dhammā – Different but Related.](#)”

Example

11. Let us take an example. If we see someone walking with a knife, we would only know that he is generating *kāya saṅkhārā* because moving the body involves *kāya saṅkhārā*. We would not know whether they are *kāya abhisāṅkhārā* until we see what he does with that knife.

- If he carries the knife intending to hurt/kill someone, then *sañcetanā* come into play, and he is engaged in “*avijjā paccayā saṅkhārā*” where the *saṅkhārā* is an *akusala abhisāṅkhārā* of the specific type of *kāya abhisāṅkhārā*.
- But if he just bought that knife and is taking it home, it is just a *cetanā*, NOT a *sañcetanā*. Thus it is just a *kāya kamma* (bodily action) done with *kāya saṅkhārā* that DOES NOT belong to “*avijjā paccayā saṅkhārā*.”
- Therefore, *saṅkhārā* with neutral *cetanā* lead to neutral *kammā*; they do not have future *kammic* consequences. But *abhisāṅkhārā* with *sañcetanā* are done with “*avijjā paccayā saṅkhārā*,” and they can bring *kamma vipāka* in the future.
- Any *saṅkhārā* (*kāya, vacī, or mano*) can be included in the category of “*avijjā paccayā saṅkhārā*” ONLY IF one’s intention involves *lobha, dosa, moha (avijjā)*.

Saṅkhārā and Kamma – Closely Related

12. *Saṅkhārā* are closely related to *kammā*. “*Kamma*” is typically translated as “action,” but all *kammā* have their origin in mind.

- Just like there are *citta/mano*, *vacī*, and *kāya saṅkhāra*, there are *mano*, *vacī*, and *kāya kamma*. Furthermore, they are closely related. *Mano saṅkhārā* give rise to *mano kammā*, *vacī saṅkhārā* give rise to *vacī kammā*, and *kāya saṅkhārā* give rise to *kāya kammā*.
- Now we can see that there are ***apuñña/akusala kamma*** and ***puñña/kusala kamma***.

13. *Paṭicca Samuppāda* explains how various types of *abhisāṅkhāra* lead to corresponding results (*vipāka*) in the future.

- Such *vipāka* can materialize in the current life or future lives. Strong *kammā* (with strong *abhisāṅkhāra*) lead to good or bad future births via *Uppatti Paṭicca Samuppāda*; see “[Uppatti Paṭicca Samuppāda \(How We Create Our Own Rebirths\)](#).” Other, weaker *kammā* can bring their *vipāka* during a lifetime, either in this or a future life, which is explained in “[Paṭicca Samuppāda During a Lifetime](#).”
- The critical issue is that **some *kammā* (actions)** not merely get the job done at that time but **can lead to consequences in the future**, even in future lives. **Those having a “carry-over” effect are the first two types of moral and immoral *kammā* taking place via *abhisāṅkhāra*.**

Manopubbangamā Dhammā..

14. The Buddha taught that everything arising in this world originates in our thoughts, speech, and actions. It may take a lot of reading to comprehend that fully, but that is the only way to learn Buddha Dhamma.

- That principle is embodied in the Dhamma verse, “[Manopubbangamā Dhammā](#).” Here, “*mano*” represents the mind, and *dhammā* (with a long “a”) means those *kammic* energies that bring *vipāka* (including rebirth). I have discussed that in various ways; for example, “[Kamma and Paṭicca Samuppāda](#).”
- Those born and growing up in the Western world have a “materialistic worldview” from their upbringing. **It is difficult for some to understand how “solid matter” (say, our physical bodies) can have its origins in mind.** However, even though I now live in the United States, I was raised in a practicing Buddhist family in Sri Lanka. **It took a long time, but I have now realized the necessity to explain this “mind-body” connection in detail, especially to a Western audience.**
- Our thoughts (specifically *abhisāṅkhāra*) may not directly lead to the creation of ALL “solid matter.” It is a subtle but quite logical/scientific process. I discussed that in the “[Origin of Life](#)” series, but I now think I must explain some basic concepts in detail.

15. All posts on *saṅkhāra* at “[Saṅkhāra – Many Meanings](#).” Discussing all aspects of *saṅkhāra* in one or two posts is impossible. Please make sure to read them and fully understand *saṅkhāra*. That will go a long way in comprehending *Paṭicca Samuppāda*.

- All the posts in this new “series of review posts with charts” at “[Buddhism – In Charts](#).”

9.6.1.1 Saṅkhāra - Should Not be Translated as a Single Word

December 7, 2021; revised December 10, 2021 (#3); August 27, 2022; January 25, 2023 (#8)

Saṅkhāra is a critical Pāli word with different meanings depending on the context. It should not be translated with a single word, like choices, processes, activity, mental formations, etc., as commonly done these days.

Introduction

1. I referred to English translations of two key *suttas* where “*saṅkhāra*” translated as “choices” and “mental formations.” See “[Distortion of Pāli Keywords in Paṭicca Samuppāda](#).”

- According to those translations, ALL *saṅkhāra* would stop from arising if a mind is devoid of *avijjā*. In the two English translations quoted in the above post, “*avijjā nirodhā saṅkhāra nirodho*” is translated

as “When ignorance ceases, choices cease” and “from the cessation of ignorance, there is the cessation of volitional processes.”

- We all know that the Buddha's mind became free of *avijjā* upon attaining Buddhahood. But then he lived for 45 years. Did not the Buddha generate any *saṅkhāra* during that whole time?
- As discussed below, one cannot think, speak, or do anything without generating *saṅkhāra*!
- That clearly illustrate the dangers of mindlessly translating Pāli suttas word by word without understanding the meaning of the sutta in the context of the topic.

Several Types of *Saṅkhāra*

2. The “[WebLink: suttacentral: Cūlavedalla Sutta \(MN 44\)](#)” discusses three types of *saṅkhāra*: *kāya saṅkhāra*, *vacī saṅkhāra*, *citta saṅkhāra*. The last type is (almost) the same as *mano saṅkhāra*.

- In the English translations of this *sutta* at Sutta Central, three translators translate those three types of *saṅkhāra* in three different ways: “Physical, verbal, and mental processes,” “bodily process, the speech process, the mental process,” and “physical activity, verbal activity, and mental activity.”
- However, all three types of *saṅkhāra* are MENTAL; they arise in mind. They are NOT physical processes, but they can control physical processes.
- *Kāya saṅkhāra* arises in mind and controls bodily actions. *Vacī saṅkhāra* also occurs in the mind and may lead to speech. All three types of *saṅkhāra* appear in mind.
- It is NOT POSSIBLE to find a single English word representing the different meanings of *saṅkhāra* in various suttas. We will discuss another way to categorize *saṅkhāra* below, but let us first briefly examine these three types of *saṅkhāra*.

Any Thought Has *Mano Saṅkhāra*

3. In the [WebLink: suttacentral: Cūlavedalla Sutta \(MN 44\)](#), *citta (mano) saṅkhāra* defined as, “*vedanā* and *saññā*.” See [Ref. 1](#) below.

- In most English translations, *vedanā* and *saññā* are feelings and perception (or recognition).
- But *vedanā* is more like “sensing an external sensory input.” *Saññā* is the recognition of the sensory input (but includes one's biases for such a sensory event.)
- For example, tree roots feel *vedanā* (of nutrients in the soil), and the leaves of a tree feel the sunlight. Each can respond to such stimuli. For instance, we know that a plant “turns” towards sunlight over time, and tree roots “pull-in” suitable nutrients.
- Therefore, plants and trees have a basic form of *vedanā* and *saññā*. A plant can “feel” when sunlight falls on it (*vedanā*), and recognize that as sunlight (*saññā*). However, a plant CANNOT generate *saṅkhārā* (in thoughts or *cittā*) about those *vedanā* and *saññā*. See, “[Contact Between Āyatana Leads to Vipāka Viññāna.](#)”
- Only sentient beings (like people and animals) can generate *saṅkhāra*. For example, we know that a dog becomes joyful when seeing its owner but is aggressive towards strangers. A dog can generate *lobha* (affection for the owner) or *dosa* (in this case aversion toward the stranger.)

4. Therefore, only living beings generate *mano saṅkhāra*. In other words, *mano saṅkhāra* are in any *citta* (“thought.”)

- *Abhidhamma* clarifies this issue. Any *citta* (loosely translated as a thought) will ALWAYS arise with seven *cetasika* (mental factors.) Two of those seven are *vedanā* and *saññā*. Therefore, any “thought” is ALWAYS associated with *vedanā* and *saññā*.
- **In other words, it is impossible to think without generating *mano saṅkhāra*!**

***Vacī Saṅkhāra* That Arise in the Mind Lead to Speech**

5. The [WebLink: suttacentral: Cūlavedalla Sutta \(MN 44\)](#) defines *vacī saṅkhāra* as, “*vitakka vicārā vacī saṅkhāro*”; see [Ref. 1](#).

- *Vitakka* and *vicāra* are two cetasika that MAY ARISE in a *citta*. They arise when we consciously start thinking about something. Simply put, *vitakka* means to “turn attention to an *ārammaṇa*,” and *vicāra* is to “stay on that *ārammaṇa* to investigate.”
- When we do that, we either “talk to ourselves” or “speak out.” Both involve *vacī saṅkhāra*. See [“Correct Meaning of Vacī Saṅkhāra.”](#)
- **Since the Buddha spoke to others for 45 years after attaining the Buddhahood, it is clear that he generated a lot of *vacī saṅkhāra*.**

All Bodily Actions Are Based on *Kāya Saṅkhāra* That arise in the Mind

6. *Kāya saṅkhāra* is defined as “*Assāsa passāsā kāya saṅkhāro*” in [Ref. 1](#). Which means, “breathing in and out is due to *kāya saṅkhāra*.”

- All bodily activities are due to *kāya saṅkhāra*. Breathing is just one aspect. The mind controls breathing, but we don't need to breathe consciously. Then why is it called a type of *saṅkhāra*?
- Again, we need to refer to *Abhidhamma*. All mental activities involve *citta vīthi*. A single *citta* does not arise by itself. *Cittas* ALWAYS occur in a series of *citta (citta vīthi)*. **However, we “feel” only those *citta vīthi* that contain *javana citta*.** Those *citta vīthi* that maintain breathing do not have *javana citta*, and they are *atiparittārammaṇa citta vīthi* (i.e., “weak *citta vīthi*”).
- The fact that *citta vīthi* are involved in breathing becomes apparent when you think about asthma patients. They need to breathe willfully, i.e., “make an effort to breathe.”
- That *sutta* is mentioned because it happens all the time, except when unconscious. When unconscious, *citta vīthi* cannot arise, and *kammic* energy keeps the body alive.
- The critical point is that ANY body movement involves *kāya saṅkhāra*. **To write, walk, run, or move any body part, we must do that with *kāya saṅkhāra*.**

***Avijjā* Is Not Involved in Most *Saṅkhāra*!**

7. Therefore, we generate numerous *saṅkhāra* during the day. That was true for the Buddha and Arahants as well. As long as one lives in this world, one will generate *kāya*, *vacī*, and *mano saṅkhāra*.

- That is why it is foolish to translate “*avijjā nirodhā saṅkhāra nirodho*” as “When ignorance ceases, **choices cease**” or “from the cessation of ignorance, there is the **cessation of volitional processes**” in the two translations cited in the post, [“Distortion of Pāli Keywords in Paṭicca Samuppāda.”](#) We can also see that the English words “choices” and “volitional processes” do not apply to some types of *saṅkhāra*. For example, there is no need to make “choices” or “mental formations (consciously)” to breathe, but breathing involves *kāya saṅkhāra*.
- **Those translators don't seem to realize that only *abhisāṅkhāra* will cease to arise in an Arahant.** An Arahant would not have a trace of *avijjā* but obviously would generate all three types of *saṅkhāra* discussed above!
- That type of translation distorts Buddha Dhamma! I have repeatedly pointed out that it leads to much confusion in discussion forums.
- Now, let us discuss another way to categorize *saṅkhāra* that is directly relevant to “*avijjā paccayā saṅkhāra*.” These types of *saṅkhāra* are *abhisāṅkhāra*, some of which (*apuññābhisāṅkhāra*) can lead to “bad *kamma vipāka*” as various forms of suffering. Some kinds of *abhisāṅkhāra*

(*puññābhisaṅkhāra*) can lead to temporary relief from suffering (and even bouts of happiness) **but will NEVER lead to a permanent end of suffering.**

- Let us discuss the special categorization of *abhisaṅkhāra* now.

Akusala-Mūla Paṭicca Samuppāda Involves Abhisaṅkhāra

8. *Saṅkhāra* in the step “*avijjā paccayā saṅkhāra*” refers to “*abhisaṅkhāra*.” “[WebLink: suttacentral: Paṭiccasamuppāda Vibhaṅga \(Vb 6\)](#)” explains the step “*avijjā paccayā saṅkhāra*” as, “*Tattha katame avijjā paccayā saṅkhārā? Puññābhisaṅkhāro, apuññābhisaṅkhāro, āneñjābhisaṅkhāro.*”

Translated: “What is meant by ‘*avijjā paccayā saṅkhārā*?’ That means *Puññābhisaṅkhāra*, *apuññābhisaṅkhāra*, *āneñjābhisaṅkhāra*.” For details, see “[Saṅkhāra – What It Really Means.](#)”

- Such *abhisaṅkhāra* can be *kāya*, *vacī*, or *mano saṅkhāra* that we discussed above. But only a part of *kāya*, *vacī*, and *mano saṅkhāra* are *abhisaṅkhāra*.
- Also, see “[WebLink: suttacentral: Saṅkhāra Sutta \(AN 3.23\)](#).” The English translation is not that good, but it gives the basic idea. Note that “*sabyābajjhaṃ kāyasaṅkhāraṃ abhisaṅkharoti*” means “engaging in generating *apuññābhisaṅkhāra*. The opposite “*abyābajjhaṃ kāyasaṅkhāraṃ abhisaṅkharoti*” means “engaging in generating *puññābhisaṅkhāra*. Note that *puññābhisaṅkhāra* are “moral deeds done without the comprehension of the Noble Truths”; see #11 and #12 below.
- **In other words, *abhisaṅkhāra* leads to *kamma* done with *lobha*, *dosa*, and *moha*.** They are *dasa akusala* (three with the body, four with speech, and three with the mind). They are *kāya kamma*, *vacī kamma*, and *mano kamma*. See, “[Ten Immoral Actions \(Dasa Akusala\)](#).”

9. Then a question arises: How can *puññābhisaṅkhāra* (*puñña abhisaṅkhāra* or MORAL ACTIONS) be done with *lobha*, *dosa*, *moha*?

- ***Puññābhisaṅkhāra* leads to *puñña kamma* that can bring “good results” in this world.**
- That means such “good *kamma*” leads to “good *kamma vipāka*” (like health and wealth) during such “good existences.” Stronger ones can lead to rebirth in “good realms.”
- However, such benefits are only temporary. Such births in “good realms” are rare. Even if we think we only do good deeds in this life, we may have done many “bad deeds” in past lives, which can still bring rebirths in “bad realms.” *Puñña kamma* becomes *kusala kamma* (that leads to *Nibbāna*) ONLY with the comprehension of *Tilakkhaṇa*; see #11 below.

Examples

10. As we already noted, breathing takes place via *kāya saṅkhāra*. Raising one's hand involves *kāya saṅkhāra*. Eating food involves *kāya saṅkhāra*. All these activities are NECESSARY to live life. We cannot categorize them as “good” or “bad.” Those are *kammically* neutral activities.

- On the other hand, hitting another person with anger involves the *apuññābhisaṅkhāra* version of *kāya saṅkhāra*. So does stealing or sexual misconduct. Telling a lie is done with the *apuññābhisaṅkhāra* version of *vacī saṅkhāra*.
- Preparing a meal and offering that to a *bhikkhu* or a homeless person involves the *puññābhisaṅkhāra* version of *kāya saṅkhāra*. Teaching Buddha Dhamma (or anything valuable) to others involves *kāya* and *vacī saṅkhāra* that belong to the category of *puññābhisaṅkhāra*.
- Having a greedy or angry mindset is a *mano saṅkhāra* belonging to the *apuññābhisaṅkhāra* version. The same is true for having the ten types of wrong views. The opposites of those belong to the *puññābhisaṅkhāra* category.

Doing Good Deeds (Puñña Kamma) Is Not Enough to Stop Future Suffering

11. The point is that while “good deeds (*puñña kamma*)” can lead to periods of happiness in good realms, that would not remove the possibility of future rebirths in the *apāyās*.

- Another way to say this is: “rebirths the *apāyās* will stop only upon understanding the dangers in the rebirth process, i.e., that this world is of *anicca, dukkha, anatta* nature (*Tilakkhaṇa*.) That is when one becomes a *Sotāpanna*. **Attempts to overcome past “bad deeds” by ONLY engaging in “good deeds” or *puñña kamma* will not be successful.** However, it is necessary to engage in *puñña kamma* to gain that insight.
- Instead, (while engaging in *puñña kamma* with *puññābhisaṅkhāra*) one MUST try to understand the three characteristics of this world of 31 realms. **That is the ONLY WAY to avoid severe suffering in the future.**
- Understanding *Tilakkhaṇa* leads to the cultivation of “*Kusala-Mūla Paṭicca Samuppāda*,” which leads to various stages of *Nibbāna*. See, “[Kusala-Mūla Paṭicca Samuppāda](#).”

Difference Between *Puñña Kamma* and *Kusala Kamma*

12. It is essential to understand the difference between *puñña kamma* and *kusala kamma*. ***Puñña kammā* BECOME *kusala kammā* IF one comprehends *Tilakkhaṇa*!**

- *Puññābhisaṅkhāra* lead to *puñña kamma*.
- The same *puñña kamma* done with the comprehension of *Tilakkhaṇa* are NOT *puññābhisaṅkhāra*. They are not *abhisaṅkhāra*. They are no “*Kusala-Mūla saṅkhāra*.”
- That is why the *Kusala-Mūla Paṭicca Samuppāda* process (that leads to *Nibbāna*) starts with “*kusala-mūla paccayā saṅkhāra*.”
- For details, see, “[Kilesa – Relationship to Akusala, Kusala, and Puñña Kamma](#)” and “[Kusala-Mūla Paṭicca Samuppāda](#).”
- For those unfamiliar with these terms, it may take a repeated reading of relevant posts to understand these concepts. Things will fall into place once one can get a foothold (like in a jigsaw puzzle).

“*Tayome, āvuso visākhā, saṅkhārā—kāya saṅkhāro, vacī saṅkhāro, citta saṅkhāro*”*ti.*

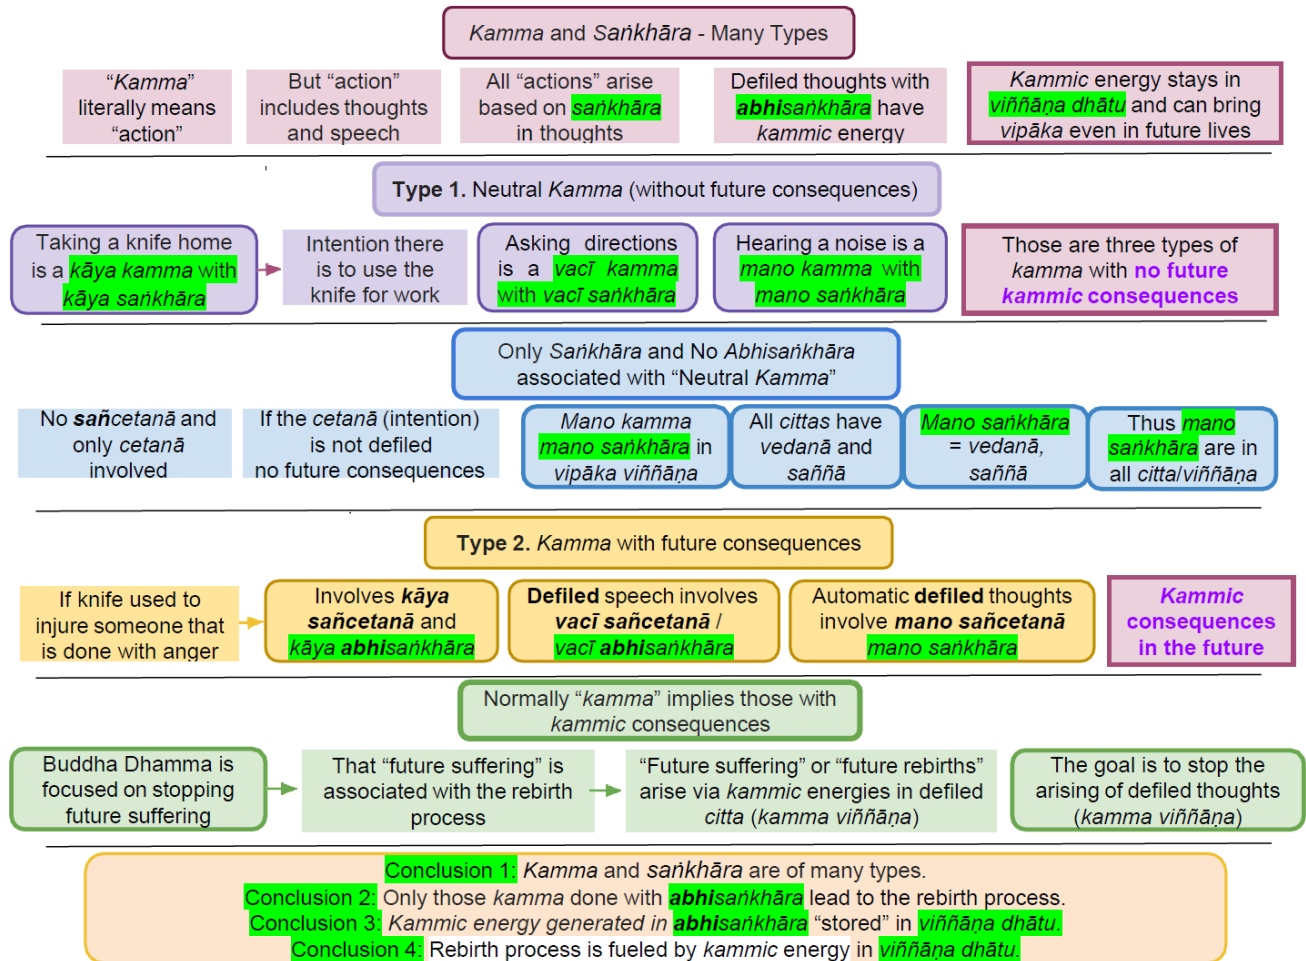

“*Katamo panāyye, kāya saṅkhāro, katamo vacī saṅkhāro, katamo citta saṅkhāro*”*ti?*

“*Assāsapassāsā kho, āvuso visākhā, kāya saṅkhāro, vitakka vicārā vacī saṅkhāro, saññā ca vedanā ca citta saṅkhāro*”*ti.*

9.6.1.1 Kamma and Saṅkhāra, Cetanā and Sañcetanā

December 14, 2021; revised August 27, 2022; November 24, 2022; March 17, 2023; rewritten April 2, 2023

Cetanā expresses the “intention” via a set of *cetasika*. *Saṅkhāra* leads to action with that intention. *Kamma* is the deed done with that intention.

Buddhism – In Charts 8. Kamma and Saṅkhāra

Download/Print: [“WebLink: suttacentral: 8. Kamma and Saṅkhāra”](#)

Introduction

1. Most people use the word “kamma” to indicate “bad deeds” or even “results of past bad deeds” (which are really “kamma vipāka.”) When something terrible happens, they say, “Oh, this is my kamma.”

- But *kamma* is a generic word that means “action.” That could mean moving the body, speaking, or thinking (*kāya*, *vacī*, and *mano kamma*.) Kamma can be of mainly three types:
 - (i) Neutral *kamma*: like using a knife to cut vegetables or asking directions from someone.
 - (ii) *Akusala* (or *pāpa/apuñña*) *kamma*: e.g., stabbing someone with a knife or telling a lie to make money.
 - (iii) *Puñña kamma*: e.g., using a knife to cut loose a trapped animal or explaining Dhamma to others. A *kusala kamma* is a *puñña kamma* done with the comprehension of the Four Noble Truths, i.e., by a Noble Person. Of course, all *puñña kamma* become *kusala kamma* only for an *Arahant*.
- **All three types are done with a specific intention.** We must engage in various kinds of *kamma* of the first type in our daily lives to get things done. The “intention” in the second type is evil or immoral, while that in the third type is good or moral.

2. **The first type of kamma yields results at that time only; they do not lead to “kammic consequences” in the future.** Those actions do not have morally good or bad intentions.

- **The second/third type can bring “bad/good results” at that time or in the future.** Moral or immoral “intentions” that arise lead to the creation of an unseen “kammic energy” that remains in “*viññāṇa dhātu*” and can bring *vipāka* in the future. See below.

- That “intention” is not in the *cetanā cetasika* (mental factor), *per se*, but is incorporated via a set of other “moral/immoral” *cetasika*, as explained below. [*per se* : [adverb] with respect to its inherent nature.]
- *Cetanā cetasika* only incorporates appropriate *cetasikas* into a *citta*; “*cetanā*” means to “assemble a *citta* (with appropriate) *cetasika*.”
- With intention, one generates three types of *saṅkhāra* to “take action.” *Kamma* is the deed done with *saṅkhāra*. *Kāya*, *vacī*, and *mano saṅkhāra* lead to *kāya*, *vacī*, and *mano kamma*. A *kamma* becomes immoral or moral with the incorporation of immoral or moral (*sobhana/asobhana*) *cetasika*, as explained below.

Cetanā Is In Every Citta!

3. “[Nibbedhika Sutta \(AN 6.63\)](#)” is a vital *sutta* that explains many keywords in Buddha Dhamma. Toward the end, it defines *kamma*: “*Cetanā*, I tell you, is *kamma*. With intention, one does *kamma* through body, speech, and mind.” See [Ref. 1](#).

- Now, *cetanā* is a “universal *cetasika*,” meaning it is in every *citta*. This is a CRITICAL observation. We don’t do good or bad *kamma* at all times. Thus, *kamma* means any bodily activity, speech, or even thoughts. For example, we saw that even breathing happens with *cittās*.
- Therefore, even any action, like lifting an arm, is a *kamma*. One may also speak and think about getting some task done that would NOT have morally good or bad intentions. Those would NOT belong to *akusala*, *pāpa*, *puñña*, or *kusala kamma*. They are just *kamma*. Such “neutral *kamma*” would not have *sobhana* (moral) or *asobhana* (immoral) *cetasika*. However, *cetanā cetasika* is still there since it is a universal *cetasika*.

4. There are seven such “universal *cetasika*” in every *citta*: *Phassa* (contact with an (*ārammaṇa*); *vedanā* (feeling); *saññā* (perception); *cetanā* (putting together all relevant mental factors); *Ekaggatā* (One-pointedness); *jīvitindriya* (life faculty); *manasikāra* (memory.) See [Ref. 2](#).

- *Mano saṅkhāra* are defined as “*vedanā* and *saññā*,” see “[Saṅkhāra – Should Not be Translated as a Single Word](#).” Since *vedanā* and *saññā* are universal *cetasika*, *mano saṅkhāra* arise in every *citta*. Thus, a “neutral *kamma*” is done with only *mano saṅkhāra*.
- A new *citta vīthi* arises when a new *ārammaṇa* comes in. That contact with the new *ārammaṇa* is *phassa*. The mind “feels” that (*vedanā*) and recognizes it (*saññā*) with the help of the *manasikāra cetasika* that can recall similar past events. *Ekaggatā* helps keep the mind focused on that *ārammaṇa*. See “[Citta and Cetasika – How Viññāna \(Consciousness\) Arises](#).”
- That complex process occurs within a billionth of a second (lifetime of a *citta*.) See “[Amazingly Fast Time Evolution of a Thought \(Citta\)](#).” It is critical to read that post to understand this primary process.
- When *cetanā* starts incorporating “defiled intentions,” it becomes *sañcetanā*, and *saṅkhāra* becomes *abhisaṅkhāra*.

Cetanā Becomes Sañcetanā

5. The word “*sañcetanā*” comes from “*saṇ*” + “*cetanā*.” Thus, it means *cetanā cetasika* has incorporated “*saṇ*” that can contribute to generating *kammic* energy for future rebirths. I have discussed the importance of “*saṇ*” in many posts. See “[Saṇ – A Critical Pāli Root](#).”

- Therefore, *saṅkhāra* are associated with *cetanā*, and *abhisaṅkhāra* (those that contribute to the rebirth process) involve *sañcetanā*.
- The intention becomes “defiled” when certain types of *cetasika* arise. For example, an “angry state of mind” is expressed by incorporating *dosa* and *moha cetasika* into the *citta*. When becoming greedy, *lobha*, *moha*, and even jealousy (*issā*) *cetasika* may arise in *citta*.

- When *cetanā* incorporates types of *cetasika* responsible for future *vipāka*, it becomes **sañcetanā**. Then *saṅkhāra* become **abhisāṅkhāra**.

6. Only **abhisāṅkhāra** with **sañcetanā** are responsible for the rebirth process or **saṁsāra**.

- The word “**saṁsāra**” comes from “*saṇ*” + “*sāra*” where “*sāra*” means “good” or “beneficial.” Thus, one is trapped in the rebirth process because of the wrong view that “living in this world is beneficial.”
- This is why the types of *saṅkhāra* that arise due to the ignorance of the Four Noble Truths (i.e., “*avijjā paccayā saṅkhārā*”) are *kāya saṅkhāra*, *vacī saṅkhāra*, and *citta (mano) saṅkhāra* that involve *kāya sañcetanā*, *vacī sañcetanā*, and *mano (or citta) sañcetanā*.
- “[WebLink: suttacentral: Patīccasamuppāda Vibhaṅga \(Abhidhamma Vb 6\)](#)” states: “*Kāyasañcetanā kāya saṅkhāro, vacīsañcetanā vacī saṅkhāro, manosañcetanā citta saṅkhāro. Ime vuccanti “avijjā paccayā saṅkhārā”*. Therefore, *saṅkhāra* in *Uppatti Paṭicca Samuppāda* always involve **abhisāṅkhāra** with **sañcetanā**.
- However, only *kāya abhisāṅkhāra* and *vacī abhisāṅkhāra* directly lead to the rebirth process. *Mano (or citta) sañcetanā* do not become **abhisāṅkhāra**. That is a subtle point we will address in the future.
- A Buddha or an *Arahant* would not generate **abhisāṅkhāra** or **sañcetanā**, but they do generate **saṅkhāra with cetanā** until *Parinibbāna*. Their actions, speech, or thoughts would have *kammically-neutral kāya, vacī, and mano saṅkhāra* associated with them.

“Intention” Comes from *Cetasikas* Added Based on the *Ārammaṇa* and One’s *Gatī*

7. If the *ārammaṇa* is mind-pleasing, *lobha* (greed) can arise in the mind. When the *lobha cetasika* is incorporated into the *citta*, it becomes a “*lobha citta*.” On the other hand, seeing an enemy would generate *dosa* (anger), and the corresponding *citta* would be angry because *cetanā* would incorporate the *dosa cetasika* into it. Thus, *cetanā* is like a supervisor/administrator who adds other relevant *cetasika* (good or bad) based on the “state of mind.”

- Returning to the types of *kamma* in #1 above, we can now make sense of the role of the *cetanā cetasika*. **The “intention” comes from the types of *cetasika* that arise in the mind based on the *ārammaṇa* and one’s *gatī*.** For example, someone with “angry *gatī*” is more likely to be angered by even a mild accusation. For an introduction to *gatī*: “[The Law of Attraction, Habits, Character \(Gatī\), and Cravings \(Āsava\)](#).”
- The *cetanā cetasika* “constructs” a *citta* by incorporating appropriate *cetasika* **based on one’s *gatī* and the type of *ārammaṇa*. Thus, *gatī* and the *ārammaṇa* will dictate the “intention.”** This is a CRITICAL point to understand.

8. If one does a task with *lobha*, *dosa*, *moha*, then it is an *akusala* (or *pāpa*) *kamma*. Another subtle way to say that is any action done with *chandarāga* (with a mindset that says worldly pleasures are worthwhile pursuing) has at least a trace of *akusala* nature.

- A particular activity involving generosity, compassion, etc., is a ***puñña kamma***. Here, ***alobha* and *adosa cetasika* are incorporated into *cittā***. *Cetanā* here is still “**sañcetanā**” IF one has not comprehended the dangers of the rebirth process, i.e., since one still has *avijjā* (not comprehending the Noble Truths.)
- That is because those “good *kamma*” are done with the expectation of “better rebirths/good *vipāka*” in the higher realms of the *kāma loka* (human and *Deva* realms.)
- A ***kusala kamma*** is a “better version” of a *puñña kamma* done with an understanding of the Noble Truths/*Paṭicca Samuppāda*/*Tilakkhaṇa*.
- If the same ***puñña kamma*** is done by someone who comprehends the Four Noble Truths/*Paṭicca Samuppāda*/*Tilakkhaṇa*, it would automatically be a ***kusala kamma***. Such *kusala*

kammā are done WITHOUT expectations for worldly benefits, but ONLY with the expectation of attaining *Nibbāna* and, thus, stopping the suffering-filled rebirth process.

- Details in “[Six Root Causes – Loka Samudaya \(Arising of Suffering\) and Loka Nirodhaya \(Nibbāna\)](#)” and “[Kilesa – Relationship to Akusala, Kusala, and Puñña Kamma.](#)”

Kammic Energy Arises In the Mind

9. The three types of *kamma* are *kāya*, *vacī*, and *mano kamma*. They are done based on *kāya*, *vacī*, and *mano saṅkhāra*.

- When a “neutral *kamma*” is done with *saṅkhāra* (that are not *abhisāṅkhāra*), the *kammic* energy generated is only enough to get the task done. There is no “residual *kammic* energy” deposited in the *viññāṇa dhātu* that can bring *vipāka* in the future.
- However, when a *kamma* is done with *abhisāṅkhāra* (with *sañcetanā*), part of the *kammic* energy generated is deposited in the *viññāṇa dhātu*. Those can bring *vipāka* in the future, including rebirths.

Kammic Energy Remains in Viññāṇa Dhātu to Bring Vipāka

10. It is difficult for those in the Western world to wrap their minds around the concepts relating to *kamma*. That is mainly because the focus is primarily on the material world. Ancient Greeks tried to describe the world only in terms of matter, a tradition that has continued with modern science. Modern science investigates material phenomena involving material objects located in space. With the terminology of Buddha Dhamma, that description restricts the “world” to just five “*dhātus*”: *pathavi*, *āpo*, *tejo*, *vāyo*, and *ākāsa*. All material objects are made of *pathavi*, *āpo*, *tejo*, and *vāyo* and located in *ākāsa dhātu*.

- However, in Buddha Dhamma, there is a sixth *dhātu*, *viññāṇa dhātu*, and that is the most important. ***Viññāṇa – arising in mind (mano) – is the precursor to the material world.*** See “[Manōpubbangamā Dhammā.](#)”
- *Kammic* energies generated in defiled *cittas* (as well as all memories or *namagotta*) are “stored” in the *viññāṇa dhātu*. See “[Where Are Memories Stored? – Viññāṇa Dhātu.](#)”
- It may not be easy to understand that post without understanding *Paṭicca Samuppāda* (PS). I plan to direct this series of posts to clarify all the terms in PS to complete that picture.

All posts in the new series: “[Buddhism – In Charts](#)”

References

1. From [WebLink: suttacentral: Nibbedhika Sutta \(AN 6.63\)](#): “*Kammaṃ, bhikkhave, veditabbaṃ ... pe... kammanirodhagāminī paṭipadā veditabbāti, iti kho panetaṃ vuttaṃ. Variant: kammanirodhagāminī → sabbatthapi evamevaKiñcetaṃ paṭicca vuttaṃ? Cetanāhaṃ, bhikkhave, kammaṃ vadāmi. Cetayitvā kammaṃ karoti—kāyena vācāya manasā.*”
2. The “[WebLink: suttacentral: Sammāditthi Sutta \(MN 9\)](#)” defines *nāma* (mentality) as, “*Vedanā, saññā, cetanā, phasso, manasikāro—idaṃ vuccatāvuso, nāmaṃ.*” In *Abhidhamma*, two more *cetasika* of *jīvitindriya* and *ekaggatā* are listed together with the above five *cetasika*. Thus, there are seven *cetasika* in every *citta*. The point is that “intention” is not a good translation for *cetanā*. One’s “intention” comes through the types of other good or bad *cetasika* (such as *lobha* or *alobha*) included in the *citta*. The *cetanā cetasika* “puts together appropriate *cetasikā* and builds the *citta*.” See “[What is a Thought?](#)”

9.6.1.1 **Kusala-Mūla Saṅkhāra Are Needed to Attain Nibbāna**
.4

December 20, 2021; revised August 31, 2022

“*Kusala-mūla saṅkhārā*” lead to *Nibbāna*. This category of *saṅkhārā* is generated via wisdom or *paññā*, the opposite of *avijjā*.

We Live Life with *Saṅkhārā*

1. As discussed in recent posts, everyone (including *Arahants*) generates *saṅkhārā* while living in this world.
 - *Saṅkhārā* are, in simple terms, THOUGHTS.
 - Everything we do involves thoughts. Thoughts can vary: compassionate, loving, greedy, angry, jealous, etc. Then we speak and do things with such thoughts with an intention.
 - *Mano saṅkhārā* are thoughts that arise in the mind automatically according to one’s *gati* (character/habits). If the sensory input (an *ārammaṇa*) is interesting, one starts thinking about it and *vacī saṅkhārā* arise; such *vacī saṅkhārā* also lead to speech. If then one decides to take action, corresponding body movements happen via *kāya saṅkhārā*.
 - For example, you automatically start looking at an item in a shop if your *gati* matches it. Then if you think it is worthwhile to investigate it further, you keep looking at it, debating whether to buy it. If you lean toward buying it, you may decide to pick it up and look at it more carefully. Those involve *mano*, *vacī*, and *kāya saṅkhārā*, respectively. **Such THOUGHTS related to attachment to worldly things (i.e., with *chandarāga*) are *Abhisāṅkhārā*.** *Arahants* generate *saṅkhārā*, but not *abhisāṅkhārā*.

Chandarāga Lead to *Abhisāṅkhārā*

2. The easiest way to see the difference between *saṅkhārā* and *abhisāṅkhārā* is as follows. *Saṅkhārā* with *chandarāga* are *abhisāṅkhārā*.
 - The correct “*pada nirutti*” (etymology) of “*rāga*” comes from “*rā*” + “*agga*” where “*rā*” means to “travel (in the *saṃsāric* journey)” and “*agga*” is to “give priority.” Thus, “*rāga*” means to “willingly engage (in the *saṃsāric* journey.)”
 - “*Chanda*” (“*ca*” + “*anda*”) means “blinded mind.” **Therefore, one with “*chandarāga*” has not comprehended the dangers of remaining in the rebirth process.** See, “[Lobha, Rāga and Kāma chanda, Kāma rāga.](#)”
 - *Chandarāga* is of three types: *Kāma rāga* (attachment to *kāma loka*), *rūpa rāga* (attachment to *rūpa loka*, the 16 *rūpāvacara Brahma* realms), and *arūpa rāga* (attachment to the four *arūpāvacara Brahma* realms.)
 - Note that *kāma rāga*, *rūpa rāga*, and *arūpa rāga* are three *saṃyojana* (*saṃsāric* bonds) that bind one to the rebirth process — *Kāma rāga* broken at the *Anāgāmi* stage and the other two bonds broken at the *Arahant* stage.
 - Thus, the removal of *chandarāga* leads to *Nibbāna*; see [Ref. 1](#).

Three Main Types of *Saṅkhārā*

3. The following categorization could be helpful:
 - i. Our thoughts, speech, and actions involved in daily activities are “*kammically* neutral.” Thus they involve “***kammically-neutral saṅkhārā***.”
 - ii. ***Abhisāṅkhārā*** keeps one on the rebirth process. These are *saṅkhārā* arising due to *avijjā*, i.e., “*avijjā paccayā saṅkhārā*” in the *Akusala-mūla Paṭicca Samuppāda* process; see, “[Akusala-Mūla Uppatti Paṭicca Samuppāda.](#)”
 - iii. Then there are “***kusala-mūla saṅkhārā***” cultivated by those on the Noble Path (Noble Persons above the *Sotāpanna Anugāmi* stage.) Those *saṅkhārā* arise with the comprehension of the Noble

Truths. Those are the “*kusala-mūla paccayā saṅkhāra*” in the *Kusala-mūla Paṭicca Samuppāda* process; see, “[Kusala-Mūla Paṭicca Samuppāda.](#)”

We Have to Attain *Nibbāna* While in This World

4. We cannot do ANYTHING in this world without generating *saṅkhāra*. Thus, working toward *Nibbāna* also involves *saṅkhāra*.

- To work towards attaining *Nibbāna*, one needs to engage in physical activities (with *kāya saṅkhāra*), and discuss Dhamma concepts (with *vacī saṅkhāra*.) Furthermore, when the mind is in an appropriate state (*samādhi*), certain Dhamma concepts automatically come to mind as *mano saṅkhāra*.
- Those are “*kusala-mūla saṅkhāra*.” One would start cultivating *kusala-mūla saṅkhāra* from the *Sotāpanna Anugāmi* stage. However, until the *Arahant* stage, some *abhisāṅkhāra* can arise via the *Akusala-mūla Paṭicca Samuppāda* process.
- Once attaining the *Arahanthood*, *abhisāṅkhāra* would not arise at all. However, *Arahants* would still generate *saṅkhāra* after attaining *Nibbāna*, until *Parinibbāna*. See, “[Saṅkhāra – Should Not be Translated as a Single Word.](#)”

Three Types of *Abhisāṅkhāra*

5. In the post, “[Saṅkhāra – Should Not be Translated as a Single Word.](#)” we discussed **three types of *abhisāṅkhāra* that can come into play in “*avijjā paccayā saṅkhāra*.”** See #8 there.

- First, there are *apuññābhisāṅkhāra* (“bad *saṅkhāra*”) involving *lobha*, *dosa*, *moha* (and other related *cetasika* like jealousy. They are “*apuñña abhisāṅkhāra*” that can lead to rebirths in lower realms (*apāyās*.) Such *apuññābhisāṅkhāra* will move one away from *Nibbāna*. That is easy to see.
- However, we saw that two other types of “good *saṅkhāra*” can move one away from *Nibbāna*. Those “relatively good” *abhisāṅkhāra* that can lead to rebirths in the “good realms” at or above the human realm. Those are *puññābhisāṅkhāra* and *āneñjābhisāṅkhāra*.

6. *Puñña kamma* with *puññābhisāṅkhāra* can bring “good results” in this world, including rebirths at or above the human realm. Giving, moral living, and meditation come under *puñña kamma*; see, “[Puñña Kamma – Dāna, Sīla, Bhāvanā.](#)” *Puññābhisāṅkhāra* also includes the cultivation of *rūpāvacara jhāna* (first four *jhāna*) that lead to rebirths in the 16 *rūpāvacara Brahma* realms.

- *Āneñjābhisāṅkhāra* comes into play in the cultivation of the four higher (*arūpāvacara*) *jhānas* that lead to rebirths in the four *arūpāvacara Brahma* realms.

Per #2 above, all three types of *abhisāṅkhāra* arise due to *chandarāga*.

How Can *Puññābhisāṅkhāra* and *Āneñjābhisāṅkhāra* Arise Due to *Avijjā*?

7. For those who do not have a solid background in the basics, it will be difficult to see why *puññābhisāṅkhāra* and *āneñjābhisāṅkhāra* also arise due to *avijjā*. The simple explanation is that one MAY act with *avijjā* until one understands the Four Noble Truths/*Paṭicca Samuppāda*/*Tilakkhaṇa*. When one starts comprehending the Noble Truths, one would see why striving for future rebirths even in the higher realms can be dangerous in the long run.

- That is related to the fact that one would understand many deep *suttas* ONLY after one gets that critical understanding.
- That is also why it is dangerous to translate deep *suttas* word by word without understanding the deeper concepts in Buddha Dhamma.
- I hope to discuss those in detail soon. Let us now discuss another related issue.

All Religions Encourage Doing Good Deeds to Achieve Happiness

8. Before the Buddha, people believed in morally good, morally wrong, and neutral deeds. All religions (to some extent) taught that one must abstain from evil deeds and engage in good deeds. In Pāli terms, that means one should avoid *apuññābhisaṅkhāra* and need to cultivate *puññābhisaṅkhāra*.

- The principle behind that rationale is that doing good will lead to good results, and the opposite will happen to those engaged in evil deeds. That is the “BASE LEVEL of understanding of laws of *kamma*.”

Difference Between Buddha Dhamma and Major Religions

9. Buddha also advised people to live moral lives and to cultivate *puññābhisaṅkhāra*.

- But there is a DEEPER LEVEL of understanding in Buddha Dhamma. That involves understanding the “real nature” of this world of 31 realms embedded in the Three Characteristics of Nature or *Tilakkhaṇa*. That understanding goes hand-in-hand with understanding *Paṭicca Samuppāda* and the First Noble Truth on Suffering. That DEEPER teaching says that suffering will NEVER come to an end until the true nature of this world is understood. That truth says it is foolish (*avijjā*) to assume that one can stop future suffering by just doing “good deeds” and by abstaining from “bad deeds.”
- The deeper point (that may be initially hard to understand) is the following: The Buddha saw the real suffering in this world at his Enlightenment. There is a broader world with 31 realms among which rebirths occur. Living beings commit “bad deeds” pursuing worldly pleasures and end up in the four lowest realms (*apāyās*.) He explained the process (*Paṭicca Samuppāda*) by which future rebirths occur.
- Until that process is understood (and thus one can comprehend *Tilakkhaṇa*), one would still have that “subtle wrong view” of our world. That is the deeper level *micchā diṭṭhi* removed at the *Sotāpanna* stage! That is the DEEPER LEVEL of understanding mentioned above.

Doing Good Deeds Is Not Enough to End Suffering

10. The CRITICAL point is that “good results” from “good deeds” do not last forever. Since we all have done “bad deeds” in past lives, their results can bring “bad births.”

- Suppose person X avoids doing ANY evil deeds in this life. When this life ends within 100 years or so, there will be two possibilities:
 - (i) Kammic energy for this human bhava has not been exhausted, and thus X will be reborn human again. Suppose X can avoid doing any evil deeds in that life and possibly a few more human lives. Eventually, X has to face option (ii) below.
 - (ii) X will be reborn in a new existence (bhava,) and it will be determined not only by the “good kamma” that X has accumulated in the current human bhava but also by any “bad kamma” accumulated in previous lives extending to billions of years to the past.
- That danger is evident in some accounts in the *Tiṇṇaka*. Even after stating the *Arahanthood*, Ven. Moggallāna was beaten to death. That was due to a trace of *kamma vipāka* leftover from killing his parents in a previous life. Aṅgulimāla killed almost a thousand people and would have been born in an *apāya* if he could not attain the *Arahanthood*. **If such highly-regarded Arahants had committed such heinous crimes in the past, how can we say that we have not?**

11. That is why Buddha Dhamma needs to be understood in the context of the rebirth process. Of course, it is up to each individual to decide the validity of the rebirth process.

- Not believing in rebirth is one of the ten types of wrong views (*micchā diṭṭhi*) in Buddha Dhamma. Thus, it would be impossible to make ANY progress with that wrong view. One gets to mundane *Sammā Diṭṭhi* by getting rid of such wrong views. Only then would one be able to comprehend more profound

concepts like *Paṭicca Samuppāda* and *Tilakkhaṇa* and get to the *lokuttara Sammā Dīṭṭhi* and start on the Noble Path.

- **It is a good idea to contemplate the above. It is a waste of time to discuss deep *suttas* without understanding these basic concepts.**

Difference Between *Kusala Kamma* and *Puñña Kamma*

12. Any “good deed” done with the BASE LEVEL of understanding is a *puñña kamma*. The same deed done with the DEEPER LEVEL of understanding is a *kusala kamma*. Let us discuss that briefly next.

Let us start with ten types of *akusala kamma* (*dasa akusala*.) Three by actions: *pāṇātipātā* (killing), *adinnādānā* (taking what is not given), *kāmesu micchācārā* (not just sexual misconduct, but also excessive of sensory pleasures.) Four by speech: *musāvāda* (Lying), *pisuṇā vācā* (slandering), *pharusā vācā* (harsh speech), and *sampappalāpā* (frivolous talk). Then there are three directly by the mind: *Abhijjhā* (covetousness; greed for other's belongings), *Vyāpāda* (ill-will, hatred), and *Micchā Dīṭṭhi* (wrong views.) [See [Ten Immoral Actions - Dasa Akusala](#).]

- Those ten become stronger IF THEY ARE DONE WITH *micchā dīṭṭhi*. Such strong versions of *akusala kamma* are *pāpa kamma*. They involve *apuññābhisaṅkhāra* that can DIRECTLY lead to rebirths in the *apāyās*. In *Abhidhamma*, such “*apāyagāmi* deeds” are done with “*dīṭṭhi sampayutta citta*” or “*citta* that arise with wrong views.” **We can also say that they involve *apuññābhisaṅkhāra*.** Yet another way to say that a stronger version of *avijjā* (or *moha*) is in play when one has one or more of the ten types of *micchā dīṭṭhi* or wrong views.
- The ten types of wrong views are discussed in “[Micchā Dīṭṭhi, Gandhabba, and Sotāpanna Stage](#).”
- Again, if one has any of the ten types of *micchā dīṭṭhi*, one can act with *moha* (under high temptations) and do “*apāyagāmi pāpa kamma*.” Note that it DOES NOT mean one with *micchā dīṭṭhi* will always act with wrong views and will inevitably do *pāpa kamma*. But the possibility is there.

Akusala Kamma May Be Done by Anyone Except a *Arahant*

13. The critical point is that even if one does not have the ten types of *micchā dīṭṭhi*, one could act with *avijjā* and still do *pāpa kamma* and be reborn in an *apāya*. **But the possibility of that is much less than that for someone with the ten types of *micchā dīṭṭhi*.**

- That is why only those above the *Sotāpanna Anugāmi* stage are genuinely free from rebirths in the *apāyās*. In addition to losing the ten types of wrong views, they have understood the following: **The possibility of Future suffering in the *apāyās* will be there as long as one believes that one can achieve permanent happiness within the rebirth process.**
- (However, even a Noble Person below the *Arahant* stage can do “mild *akusala kamma*” that can lead to rebirths in the human or higher realms.)
- What if one does not believe that there is a rebirth process?
- Then there is no need to read deep *suttas* about *Nibbāna*. One WOULD NOT be able to understand them. But even more importantly, why bother reading about *Nibbāna* if one does not believe in the concept of *Nibbāna*?
- That is why not believing in the rebirth process is one of the ten wrong views.

Wasting Time Discussing (Incorrectly Translated) Deep *Suttas*

14. Many people can save time by carefully reading and understanding what I discussed above. Of course, word-by-word translations of such deep *suttas* make it worse. The problem is that even the translators do not understand the concepts I discussed above. If they did, they would not do such nonsensical translations.

- I see many people have engaged in the same discussion in discussion forums over many years. They have wasted a lot of valuable time. Of course, some people do not even take these discussions seriously. It is like discussing philosophy for them.
- But if one even starts to understand the key message of the Buddha, one would not waste any time. We have a limited time of fewer than 100 years to use this rare opportunity.

Summary

15. The “[Kusala-Mūla Paṭicca Samuppāda](#)” process leads to *Nibbāna*. That process starts with “*kusala-mūla paccayā saṅkhāra*.”

- On the other hand, the rebirth process continues with “[Akusala-Mūla Paṭicca Samuppāda](#).” That process starts with, “*avijjā paccayā saṅkhāra*.” Good, moral deeds done without comprehending the Noble Truths (i.e., *puñña kamma*) also fall under this category.
- The same kind of moral deeds done with the comprehension of Four Noble Truths/*Paṭicca Samuppāda*/*Tilakkhaṇa* are *kusala kamma*.
- But many people believe moral, good deeds by anyone belong to the *kusala kamma* category. That is not correct. *Kusala kamma* can be done only with the comprehension of the Noble Truths.

Reference

1. “[WebLink: suttacentral: Chandarāga Sutta \(SN 22.25\)](#).” English translation there: “[WebLink: suttacentral: Desire and Lust \(SN 22.25\)](#).” Note that “*chandarāga*” is translated as “desire and lust.” That is not correct, as I explained in #2 above.

9.6.1.1 Rebirths Take Place According to Abhisāṅkhāra

December 27, 2021; revised December 28, 2021; June 15, 2022; July 2, 2022

Rebirths take place according to *abhisāṅkhāra* cultivated. That mechanism is explained in *Akusala-mūla Paṭicca Samuppāda*.

Three Types of Abhisāṅkhāra Leading to Rebirth in the 31 Realms

1. As we have discussed, the 31 realms in this world (*loka*) are distributed among three levels: *kāma loka*, *rūpa loka*, and *arūpa loka*.
 - *Kāma loka* has 11 realms: the four lowest realms (*apāyās*), the human realm, and the six *Deva* realms.
 - *Rūpa loka* consists of the sixteen *rūpāvacara Brahma* realms.
 - *Arūpa loka* has four *arūpāvacara Brahma* realms.
- In previous posts, we saw that three types of *abhisāṅkhāra* are generated with the *Akusala-mūla Paṭicca Samuppāda* process that leads to rebirths among the 31 realms. See, #8 of “[Saṅkhāra – Should Not be Translated as a Single Word](#).”
2. Those three types of *abhisāṅkhāra* lead to rebirths among the 31 realms as follows:
 - The worst type, *apuññābhisāṅkhāra*, lead to rebirths in the four lowest realms.
 - The next higher level of *puññābhisāṅkhāra* leads to rebirths in the higher seven realms in the *kāma loka* and the 16 realms in the *rūpa loka*.
 - The best type of *āneñjābhisāṅkhāra* lead to rebirths in the highest four realms of this world belonging to the *arūpa loka*.

Akusala-Mūla Paṭicca Samuppāda Dictates the Rebirth Process

3. The *Akusala-Mūla Paṭicca Samuppāda* describes how rebirths (*jāti*) take place in this world starting with “*avijjā paccayā (abhi)saṅkhāra*” step.

As we discussed, *saṅkhāra* in the step “*avijjā paccayā saṅkhāra*” refers to “*abhisāṅkhāra*.” [“WebLink: suttacentral: Pattecasamuppāda Vibhaṅga \(Vb 6\)”](#) explains the step “*avijjā paccayā saṅkhāra*” as, “*Tattha katame avijjā paccayā saṅkhārā? Puññābhisāṅkhāro, apuññābhisāṅkhāro, āneñjābhisāṅkhāro.*”

Translated: “**What is meant by ‘*avijjā paccayā saṅkhārā*’?** That means *puññābhisāṅkhāra*, *apuññābhisāṅkhāra*, *āneñjābhisāṅkhāra*.” For details, see “[Saṅkhāra – What It Really Means.](#)”

- Such *abhisāṅkhāra* can be *kāya*, *vacī*, or *mano saṅkhāra* that we discussed above. But only a part of *kāya*, *vacī*, and *mano saṅkhāra* are *abhisāṅkhāra*.
- In other words, ***abhisāṅkhāra*** leads to *kamma* done with ***lobha***, ***dosa***, ***moha***, and **mundane versions of *alobha*, *adosa*, *amoha***.
- They are *akusala kamma* or *dasa akusala* (three with the body, four with speech, and three with the mind). They can be *kāya kamma*, *vacī kamma*, and *mano kamma*. See, “[Ten Immoral Actions \(Dasa Akusala\)](#)”

Apuññābhisāṅkhāra – Connection to Lobha, Dosa, Moha

4. ***Apuññābhisāṅkhāra*** (“worst *abhisāṅkhāra*”) can lead to rebirths in the four lower realms (*apāyās*.) Such “bad *abhisāṅkhāra*” arise due to *lobha*, *dosa*, *moha* (and other related *cetasika* like jealousy.)

- Such ***apuññābhisāṅkhāra*** (“*apuñña abhisāṅkhāra*”) lead to *apuñña kamma* (or “*pāpa kamma*.”) That is the worst form of *akusala kamma* based on *lobha* (greed), *dosa* (hate/anger), *moha* (worst than *avijjā*).
- 5. “[WebLink: suttacentral: Pattecasamuppāda Vibhaṅga \(Vb 6\)](#)” explains ***apuññābhisāṅkhāra*** as follows: “*Tattha katamo apuññābhisāṅkhāro? Akusalā cetanā kāmāvacarā—ayaṃ vuccati ‘apuññābhisāṅkhāro’* OR “***apuññābhisāṅkhāra*** are *akusala cetanā* associated with the *kāma loka*.”
- *Akusala cetanā* (or intention of doing an *akusala kamma*) is in “*akusala citta*” or “defiled thoughts.”

Puññābhisāṅkhāra and Āneñjābhisāṅkhāra – Connection to (Mundane) Alobha, Adosa, Amoha

6. Then there are two types of “good *saṅkhāra*” that lead to rebirths in the higher 27 realms. Those “relatively good” *abhisāṅkhāra* lead to rebirths in the “good realms” at or above the human realm. Those are ***puññābhisāṅkhāra*** and ***āneñjābhisāṅkhāra***. Those two categories arise based on **the mundane versions of *alobha*, *adosa*, and *moha*** (i.e., without comprehension of the Four Noble Truths/*Tilakkhaṇa*/*Paṭicca Samuppāda*.)

- *Puñña kamma* with ***puññābhisāṅkhāra*** can bring “good results” in this world, including rebirths in the human realm and the six *Deva* realms. Giving, moral living, and meditation come under *puñña kamma*; see, “[Puñña Kamma – Dāna, Sīla, Bhāvanā.](#)” ***Puññābhisāṅkhāra*** also includes the cultivation of *rūpāvacara jhāna* that lead to rebirths in the 16 *rūpāvacara Brahma* realms.
- ***Āneñjābhisāṅkhāra*** comes into play in the cultivation of the four *arūpāvacara samāpatti* that lead to rebirths in the four *arūpāvacara Brahma* realms: *ākāsānañcāyatana*, *viññānañcāyatana*, *ākīñcaññāyatana*, and *nevasaññānāsaññāyatana*.
- ***Akusala kamma* is any *kamma* that keeps one in the rebirth process.** Thus, *puñña kamma* done without comprehension of the Four Noble Truths/*Tilakkhaṇa*/*Paṭicca Samuppāda* belong to *akusala kamma*. That is why *puññābhisāṅkhāra* and *āneñjābhisāṅkhāra* also arise due to *avijjā*.

Three Levels of Abhisañkhāra

7. Therefore, now we have an easy way to remember what types of *abhisañkhāra* lead to rebirths among the 31 realms in this world. To summarize:

- Worst form of *akusala kamma* are *apuñña kamma* or *pāpa kamma*. They are done with *apuñña abhisañkhāra* (***apuññābhisāṅkhāra***) and lead to the rebirths in the lowest four realms. Those four realms are collectively called *apāyās* and deliver the worst forms of suffering.
- The next (higher) level of *abhisañkhāra* are *puñña abhisañkhāra* (*puññābhisāṅkhāra*.) *Puñña kamma* (like giving to charity, taking care of parents/elders/*bhikkhus*, etc) lead to rebirths in the human realm and the six *Deva* realms. There is a higher level of *puññābhisāṅkhāra* that leads to rebirths in the 16 *rūpāvacara Brahma* realms; those involve the cultivation of *rūpāvacara jhāna*. Thus, ***puññābhisāṅkhāra*** lead to rebirths in 23 realms.
- The highest level of *abhisañkhāra* is *āneñja abhisañkhāra* (***āneñjābhisāṅkhāra***.) Those involve the cultivation of the four *arūpāvacara samāpatti*. They, of course, lead to rebirths in the four *arūpāvacara Brahma* realms.

Thus we can now clearly see how the rebirth process takes place among the 31 realms according to the types of *abhisañkhāra* cultivated via “*avijjā paccayā saṅkhāra*.”

All Types of Abhisañkhāra Arise Due to Avijjā!

8. As explained in #1 above, all types of *abhisañkhāra* within the three categories arise due to *avijjā*. What is *avijjā*?

- “[WebLink: suttacentral: Pattecasamuppāda Vibhaṅga \(Vb 6\)](#)” explains *avijjā* as follows: “*Tattha katamā avijjā? Dukkhe aññāṇaṃ, dukkhasamudaye aññāṇaṃ, dukkhanirodhe aññāṇaṃ, dukkhanirodhagāminiyā paṭipadāya aññāṇaṃ—ayaṃ vuccati “avijjā”.*”

Translated: “What is *avijjā*? It is the ignorance of the Four Noble Truths or **the absence of four types of knowledge** (*ñāṇa*): knowledge about the Truths on suffering (*Dukkhe aññāṇaṃ*), the origin of suffering (*dukkha samudaye aññāṇaṃ*), cessation of suffering (*dukkha nirodhe aññāṇaṃ*), and the way to reach the cessation of suffering (*dukkha nirodha gāminiyā paṭipadāya aññāṇaṃ*.)

- As we saw above, starting with the “*avijjā paccayā saṅkhāra*” step in *Akusala-mūla* PS different types of existences (*bhava*) and corresponding rebirths (*jāti*) arise among the 31 realms.

Connection to Tilakkhaṇa and Paṭicca Samuppāda

9. The key here is to understand the First Noble Truth. In other words, instead of “*dukkhe aññāṇaṃ*” (not comprehending the Noble Truth on Suffering) get to “*dukkhe ñāṇaṃ*” (knowledge of the Noble Truth on Suffering.)

- What is *dukkha* (suffering)? It is not the relatively minor sufferings that we experience in this life. Most people are happy with their lives.
- To understand the REAL suffering, one must understand the “wider worldview” seen by the Buddha upon his Enlightenment. **He saw that most living beings are trapped in the four lowest realms for very long times.** That is the suffering referred to by the Buddha!
- Even though relatively reduced levels of suffering manifest in the higher realms at or above the human realm, ANY given “sentient being” spends most time in the *apāyās*.
- More details at, “[Pattecca Samuppāda, Tilakkhaṇa, Four Noble Truths.](#)”

Apuññābhisāṅkhāra Done With Moha or Avijjā

10. The worst form of *apuññābhisaṅkhāra* is done with the **worst form *avijjā* of *moha***. One may FREQUENTLY act with *moha* if one still has one or more of the ten types of *micchā diṭṭhi*.

- With the removal of the ten types of *micchā diṭṭhi* the tendency to act with *moha* and generate *apuññābhisaṅkhāra* will be reduced.
- **But as long as one has not comprehended the Four Noble Truths/*Tilakkhaṇa*/*Paṭicca Samuppāda*, one may act with *avijjā* and may generate *abhisaṅkhāra* of all three types.**
- As we saw above, *Paṭicca Samuppāda* clearly explains how different types of rebirths arise due to *avijjā*. That is why it is critical to understand that process.

Cultivation of *Anāriya Jhāna* Done With *Avijjā*

11. We can clearly see now that the cultivation of all types of *anāriya jhāna* is done with *avijjā* (“anāriya” means “non-Buddhist”). Such *anāriya jhāna* are cultivated using *anāriya* meditation techniques such as *kasiṇa* mediation (using *kasiṇa* objects) and breath meditation (which is NOT *Ānāpānasati* meditation.) The sole purpose of such efforts is to attain such *jhānās*, and NOT *Nibbāna*. Cultivation of such *jhāna* leads to rebirths in the *Brahma* realms, as we saw above.

- **Any effort to seek a rebirth anywhere in the 31 realms is done with *avijjā*** because ANY such existence will have a finite lifetime.
- When that existence in such *Brahma* realm comes to an end, rebirths in lower realms will take place, inevitably ending up in the *apāyās*. That is why such efforts will NOT lead to the ending of *samsāric* suffering.
- The only way to stop future suffering is to stop the rebirth process.
- Thus, we can see that another way to describe *avijjā* is as follows: As long as one has the mindset that “existence ANYWHERE among the 31 realms is beneficial,” one would have *avijjā*. That is why the cultivation of (*anāriya*) *jhāna* is done with *avijjā*!

12. Note that *Ariya jhāna* is NOT cultivated with the goal of getting a rebirth in a *Brahma* realm. *Ariya jhānās* are realized automatically by some people with *magga phala* (if one has cultivated *anāriya jhānās* in recent past lives.)

- But some *Arahants* have cultivated *Ariya jhāna* deliberately and the Buddha had recommended that too. A good example is Ven. Moggallāna. After the cultivation of such *jhānās*, he developed *abhiññā* powers. Then he frequently visited *Deva* and *Brahma* realms to teach Dhamma to those *Devas* and *Brahmas*.
- By the way, there is a series of *suttas* that describe how Ven. Moggallāna attained all *jhānās* in sequence. That series starts with the “[WebLink: suttacentral: Pathamajhānapaṇhā Sutta \(SN 40.1\)](#).” Those who have questions about the terms *vitakka/vicāra*, *avitaṅka/avicāra*, and *savitakka/savicāra* should read that series of *suttas*.

9.6.1.2 Viññāṇa – Two Critical Meanings

January 3, 2022

[Abhisankhāra Lead to Kamma Viññāṇa](#)

[Two Types of Kamma Viññāṇa](#)

[Summary of Key Concepts About Viññāṇa and Saṅkhāra](#)

[Anidassana, Appatigha Rūpa Due to Anidassana Viññāṇa](#)

9.6.1.2 Abhisankhāra Lead to Kamma Viññāṇa .1

January 3, 2022; revised August 31, 2022

All *viññāṇa* belong to either six types OR two types: *vipāka viññāṇa* and *kamma viññāṇa*.

Two Categories of *Viññāṇa*

1. *Viññāṇa* needs to be understood based on the context. All *viññāṇa* belong to either six types OR two types:

- i. The **six types of *viññāṇa*** [sensory experience] are: *cakkhu viññāṇa*, *sota viññāṇa*, *jivhā viññāṇa*, *ghāṇa viññāṇa*, *kāya viññāṇa*, and *mano viññāṇa*.
- ii. The **two types of *viññāṇa*** [resultant and action] are: ***vipāka viññāṇa*** and ***kamma viññāṇa***.
 - Five types of *viññāṇa* in the first category are ALWAYS *vipāka viññāṇa*. *Mano viññāṇa* can be either *vipāka viññāṇa* or *kamma viññāṇa*.
 - *Kamma viññāṇa* are ALWAYS *mano viññāṇa*.

Sensory Experience (*Vipāka Viññāṇa*) Versus *Abhisankhāra* Generation (*Kamma Viññāṇa*)

2. An easy way to remember those categories is as follows.

- **The six types of *viññāṇa* arise when sensory inputs come in through the six senses:** *cakkhu*, *sota*, *jivhā*, *ghāṇa*, *kāya*, and *mano*. I have discussed them in “[Chachakka Sutta – Six Types of Vipāka Viññāṇa](#).” They are just **sensory experiences** and no *kammic* energy is produced. **These are all *vipāka viññāṇa*.**
- ***Kamma viññāṇa* are strictly *mano viññāṇa*. These are the *viññāṇa* that arise in *Paṭicca Samuppāda*.** They **generate *kammic* energies** that can lead to future *vipāka* and even “power up” future rebirths. They arise in “[Akusala-Mūla Uppatti Paṭicca Samuppāda](#),” and “[Idappaccayatā Paṭicca Samuppāda](#).”
- Therefore, the five types of **sensory experiences involving the five physical senses (*cakkhu viññāṇa*, *sota viññāṇa*, *jivhā viññāṇa*, *ghāṇa viññāṇa*, *kāya viññāṇa*)** are ALWAYS *vipāka viññāṇa*.
- On the other hand, *mano viññāṇa* can be either ***vipāka viññāṇa*** or ***kamma viññāṇa***.

All *Viññāṇa* Arise in the Mind

3. The six types of *viññāṇa* ALL arise in mind. The six types indicate the “sense doors” through which they come in. For example, a sensory input coming through the eyes is a *cakkhu viññāṇa*, one coming through the ears is a *sota viññāṇa*, ..one comes through the mind is a *mano viññāṇa* (six types.)

- Such six types of *viññāṇa* only give rise to an experience. We see something with *cakkhu viññāṇa*, hear with *sota viññāṇa*, .. and recall something with *mano viññāṇa* (six types.)
- **Note:** *Vipāka viññāṇa* DOES NOT mean that each sensory event has a one-to-one correspondence with a past *kamma*. When born with a human body due to past *kamma*, that body will be subjected to all kinds of sensory experiences associated with the human *bhava*. That is a result (*vipāka*) of being born human.
- Based on *vipāka viññāṇa*, we may start accumulating “new *kamma*” with *kamma viññāṇa*.

Kamma Viññāṇa – More Than Experience

4. BASED ON *vipāka viññāṇa* (i.e., sensory input,) we may start thinking, speaking, and doing things thereby accumulating new *kamma* (mainly leading to *vacī* and *kāya kamma* based on *vacī* and *kāya abhisāṅkhāra*, as we have discussed.)

- All those initiate with *mano viññāṇa* that arise via “*avijjā paccayā abhisāṅkhāra*” followed by “*abhisāṅkhāra paccayā kamma viññāṇa*” **in *Paṭicca Samuppāda*.**
- **In the course of that process, the mind generates *kammic* energy.** That is why it will be easy to remember that by calling those “*kamma viññāṇa*.”

Kamma/Vipāka Viññāṇa Categorization – Not in the *Tipiṭaka*

5. The categorization of *vipāka* and *kamma viññāṇa* is not mentioned explicitly in the *Tipiṭaka*. But it helps separate the two types.

- Otherwise, it can lead to much confusion even for the translators as I pointed out in the post, “[Distortion of Pāli Keywords in *Paṭicca Samuppāda*](#)” among many others.
- *Kamma viññāṇa* is the type of *viññāṇa* that *bhikkhu* Sāti said would “travel from *bhava* to *bhava*” (presumably from his *Vedic* background) in the “[WebLink: suttacentral: *Mahātanhāsāṅkhaya Sutta* \(MN 38\)](#).” But we know that various types of *kamma viññāṇa* are cultivated by us, and only one of them can give rise to existence at a time.
- Just like *bhikkhu* Sāti was confused, present-day translators are also confused (or may be not even aware of) that *viññāṇa* CAN BE many types. When they translate *viññāṇa* as “consciousness” that would only include *vipāka viññāṇa*. That leave out *viññāṇa* arising via, “*abhisāṅkhāra paccayā kamma viññāṇa*” in *Paṭicca Samuppāda*.

Vipāka Viññāṇa Do Not Involve *Abhisāṅkhāra*

6. Any mental EVENT (involving *vipāka* or *kamma viññāṇa*) will have associated *vedanā*, *saññā*, *saṅkhāra*, and *viññāṇa*.

- *Vedanā* “detects” the sensory event and *saññā* identifies what it is. *Saṅkhāra* means to “prepare” that *citta* (loosely called “thought”), and that is done with the *cetanā cetasika*, as we have discussed. See, “[Kamma and Saṅkhāra, Cetanā and Sañcetanā](#).”
- That is why *vedanā*, *saññā*, and *cetanā* are three of seven “universal *cetasika*” that arise in ANY *citta*. In other words, ANY mental event (involving *vipāka* or *kamma viññāṇa*) will have *vedanā*, *saññā*, and *saṅkhāra*. The totality of that experience is *viññāṇa*.
- That is also why *vedanā*, *saññā*, *saṅkhāra*, and *viññāṇa* are the principle “mental aggregates.”
- **Now, when the *cetanā cetasika* “prepares the *citta*,” that is *saṅkhāra*.** Thus, we can now see that *mano saṅkhāra* are in EVERY *citta* because *vedanā* and *saññā* are in every *citta*! Now, if we consciously think (with *vacī saṅkhāra*) about doing something and then do it (with *kāya saṅkhāra*) that could lead to new *kamma*. See [Ref. 1](#).
- **Note:** Breathing is via *kāya saṅkhāra* (so is raising a hand) but those do not lead to new *kamma*.

Mano Saṅkhāra Cannot be *Abhisāṅkhāra* Leading to Rebirth

7. The critical point here is that *mano saṅkhāra* are in *vipāka viññāṇa* as well as in *kamma viññāṇa*, i.e., in any type of *viññāṇa*. In fact, they are also in “pure *citta*” or “*pabhassara citta*” of an *Arahant* in *Arahant-phala samādhī*.

- *Mano saṅkhāra* can NEVER become *abhisāṅkhāra* that can lead to rebirth.

- To generate *kammic* power (in *javana citta*), we need to generate defiled thoughts CONSCIOUSLY. Those involve *vacī* and *kāya saṅkhāra*. *Kamma viññāṇa* (in *javana citta* with *kammic* energy) arises only in *Paṭicca Samuppāda*.
- It is not necessary to fully understand the above in #7. It is there for completeness.

First Two Steps in *Paṭicca Samuppāda* in the *Niddesa* Version

8. I have pointed out that “*avijjā paccayā saṅkhāra*” is the *uddesa* version (or the brief version) frequently used in the *suttas*. The *niddesa* (or a bit more descriptive) version is “*avijjā paccayā abhisāṅkhāra*.”

- In the same way, we can now see that the next step of “*saṅkhāra paccayā viññāṇa*” would be a bit more explanatory (*niddesa* version) in “*abhisāṅkhāra paccayā kamma viññāṇa*.” In fact, we used that terminology in #4 above. The three different ways of explaining concepts discussed in, “[Sutta Interpretation – Uddesa, Niddesa, Patiniddesa](#).”
- As discussed above, our conscious thoughts (with *vacī* and *kāya saṅkhāra*) in the *Paṭicca Samuppāda* processes create *kammic* energy. Some *kammic* energies may result in *kamma vipāka* during life, but some can lead to future rebirths.
- On the other hand, no *kamma viññāṇa* can arise when an *ārammaṇa* comes in via one of the six sense faculties. Those are *vipāka viññāṇa* (just seeing, hearing, etc.)

Difference Between *Kammic* Energy and “Food-Produced” Energy

9. Some people get confused when I say *kāya saṅkhāra* are needed to take bodily actions, i.e., to move body parts. They may be asking, “how can thoughts move body parts?”

- That is a valid question from a mundane perspective. I have seen many materialistic scientists and philosophers ask the same question.
- **The key is to understand that the mind only INITIATES the movement of body parts.** That body movement is carried by the brain. The energy needed to move body parts comes from the food we eat.
- The brain is made of inert matter and is like a computer. All body movements are coordinated by the brain. The food we eat provides energy not only to move body parts but also, to keep the brain working. Since the brain is the interface between the mind and the body, it consumes a lot of energy by itself, about 25% of all the energy from the food we eat.
- Consider the following analogy of a soldier (mind/mental body or the *gandhabba*) driving a fully-enclosed military tank (physical body.) The soldier can see the outside only with the video cameras (eyes.) To drive the tank, to see outside, and fire artillery, the soldier depends on the on-board computer (brain.) The amount of work by the soldier (mind/mental body or the *gandhabba*) is minuscule compared to that generated by oil powering the vehicle and the guns (food powering body movements.)
- See “[Gandhabba in a Human Body – an Analogy](#)” for further details. **It is critical to understand that analogy.**

Connection Between *Kamma* and *Saṅkhāra*

10. In other words, *kāya kamma* (like offering food) involves moving body parts; one has to prepare and offer the food. **Those are bodily actions.** Those activities are powered by the food we eat.

- The mind only makes the decision to make the offering. It directs the body to do certain tasks with *kāya saṅkhāra*. Since they involve *alobha/adosa/amoha*, those are *kāya abhisāṅkhāra*.
- This is why *cetanā* determines *kamma*. Bodily movements are BASED ON *cetanā* (*saṅkhāra*.) If we see a man carrying a big knife we don’t know what his intention is. It could be cut loose a trapped animal (good deed) or to kill someone (bad deed.)

- The same holds for speech. One intends to utter certain words with **vacī saṅkhāra**. Then the brain gets the words out by moving the tongue and lips with **vacī kamma**. Now, if one generates such **vacī saṅkhāra** with an angry mindset, they would be **apuññābhi vacī saṅkhāra** (i.e., **vacī abhisāṅkhāra**.) Just asking someone for directions would involve just **vacī saṅkhāra** (no **abhisāṅkhāra**.)

Only *Kamma Viññāṇa* via *Abhisāṅkhāra* Generate *Kammic* Energy

11. As we have discussed, a *vipāka viññāṇa* can only “bring in a sensory input” and we just experience it. Our minds do not generate any *abhisāṅkhāra* or *kammic* energy.

- But, based on such a sensory input, we may get attached to it and start generating ***abhisāṅkhāra*** and accumulate ***kamma*** (or more correctly *kammic* energies). **Such *kammic* energies are unimaginably TINY compared to the energy required to move a hand, for example.**
- Then such *kammic* energies can bring in future *kamma vipāka*, some of which can lead to rebirth.

Mental Aspects Are with the Mental Body (*Gandhabba*)

12. The fact that the brain is NOT the mind is quite apparent from numerous rebirth accounts and Near-Death-Experience (NDE) studies.

- With more rebirth accounts published worldwide, it is becoming impossible to avoid their validity. The same is true for NDE studies.
- Furthermore, scientists have been trying hard to come up with an explanation of how consciousness can arise in the brain. Despite many studies and proposals, they have not been able to make ANY progress. A popular approach is to say consciousness arises in neurons.
- But they seem to ignore the following basic question: “How can joy or sorrow arise in inert atoms/molecules? Anything in the brain is made of atoms/molecules!
- **No one will ever be able to prove that consciousness can arise in the brain.** Some philosophers are beginning to see the truth of that; see [Ref. 2](#).

[All machine and no ghost- McGinn-2012](#)

A recent book by Nagel shows that he leans further toward the possibility that mind is primary: “Mind & Cosmos: Why the Materialist Neo-Darwinian Conception of Nature Is Almost Certainly False” by Thomas Nagel (Oxford University Press, 2012).

9.6.1.2 Two Types of Kamma Viññāṇa

January 9, 2022

There are two types of *kamma viññāṇa*. One brings *vipāka* at that time [[Idappaccayatā Paṭicca Samuppāda](#)] and the other in the future [[Akusala-Mūla Uppatti Paṭicca Samuppāda](#)].

Overview of Types of Viññāṇa

1. As we have discussed in recent posts, *kamma viññāṇa* is different from *vipāka viññāṇa*. *Kammic* energy created via *kamma viññāṇa* can bring *vipāka* in this life or future lives. ***Vipāka viññāṇa* are just sensory experiences (consciousness.)**

- ***Kamma viññāṇa* are strictly *mano viññāṇa*. These are the *viññāṇa* that arise in *Paṭicca Samuppāda*.** They generate **kammic energies** that can lead to *vipāka* and even “power up” future rebirths.
- “[Idappaccayatā Paṭicca Samuppāda](#)” describes how *kamma viññāṇa* can bring *vipāka* in the present life itself at that time. “*Ida*” (or “*idha*”) means “here” or “at that time.” “*Ida paccayā*” (based on the conditions at this time) rhymes as “*idappaccayā*.” [*idappaccayatā* : [f.] having its foundation based on the conditions at this time, i.e., causally connected.]
- On the other hand, arising of future rebirths via *kamma viññāṇa* is described in “[Akusala-Mūla Uppatti Paṭicca Samuppāda](#).”
- In *Abhdhammic* language, those two types of *kammic* energies (*kammic* potential) are *nānākkhaṇikā* (for rebirth) and *sahajātā* (in the present life); see [Ref. 1](#). No need to go into such details for our discussion.
- To refresh memory on *kamma viññāṇa*, see, “[Abhisankhāra Lead to Kamma Viññāṇa](#).”

Simple Example 1

2. A strong *kamma* (say hitting a human) originates with *abhisankhāra* arising in mind (say in person X.) Of course, X does such a deed without knowing (or forgetting about) the harmful consequences. Due to either reason, *avijjā* had arisen in mind leading to “*avijjā paccayā abhisankhāra*” and “*abhisankhāra paccayā kamma viññāṇa*.” *Kamma viññāṇa* is the mindset to achieve a particular goal (in this case, to hurt the other person.)

- He may hurt that person based on that intention (by becoming a violent person.)
- “[Idappaccayatā Paṭicca Samuppāda](#)” describes that process. However, his INTENTION to hurt the other person will generate *kammic* power that will bring back *vipāka* to HIMSELF in the future, well into future lives. “[Akusala-Mūla Uppatti Paṭicca Samuppāda](#)” explains that second process.
- Let us see how X is “born” a violent person in this life via “[Idappaccayatā Paṭicca Samuppāda](#).”

Idappaccayatā Paṭicca Samuppāda Example

3. First, hateful thoughts (with *dosa*) arise in X’s mind, and those are *vacī abhisankhāra*. That gives rise to a defiled mindset (*kamma viññāṇa*). As one keeps generating *vacī abhisankhāra*, anger grows and that *kamma viññāṇa* will become strong.

- Those defiled thoughts create *javana* power (*kammic* energy) in *javana citta*. This energy accumulates in the “*kamma bhava*” (we will discuss that in the future.) Part of that energy leads to *vipāka* in the present life by turning him into a violent person at that moment. The rest of that *kammic* energy can bring *vipāka* in the future.

- Now, as X keeps getting angrier, part of that *kammic* energy brings *vipāka* by transforming him into a temporary *bhava* (state of a violent person in this case). His face becomes dark, and he will be visibly agitated. “[Idappaccayatā Paticca Samuppāda](#)” describes that process.
- If he gets “worked up,” he may get into physical violence with *kāya abhisāṅkhāra*, and that could lead to even killing of the other person. *Kāya abhisāṅkhāra* are even more potent. The accumulated *kammic* energies can bring a future rebirth in a lower realm. “[Akusala-Mūla Uppatti Paticca Samuppāda](#)” explains that process.

Birth Within Birth – Innocent Teenager to a Drunkard

4. “[Idappaccayatā Paticca Samuppāda](#)” can also explain the transformation of an innocent teenager to a drunkard over a longer time (still within the present life.) Suppose X is a teenager growing up in a nice family. At school, he starts hanging out with bad friends and starts drinking. In the beginning, he is reluctant even to taste the alcohol but cannot resist the “peer pressure.”

- Once getting started, he develops a new “*gati*” (habit) to like drinking and related activities. The more he wants to get drunk, the more he starts thinking about it (i.e., frequently generating *vacī abhisāṅkhāra*.) Here he starts building a new *kamma bhava* that can make him born a “drunkard” again in this life. On the other hand, future *vipāka* will contribute to a rebirth in a lower realm.
- A *kamma viññāṇa* is the desire to get something done or work toward a specific goal. X is cultivating a “*viññāṇa* of a drunkard” or the “mindset of a drunkard.” **The more X thinks about getting together with friends and drinking, the more “drunkard *viññāṇa*” grows and contributes *kammic* energy to the corresponding *kamma bhava*.**
- **That is a CRITICAL point that differentiates *kamma viññāṇa* from a *vipāka viññāṇa*.** It is discussed (as usual in the summary or “*uddesa*” form) in the *Cetanā Sutta* (SN 12.38); see below.

Establishment and Growth of a *Kamma Viññāṇa*

5. As we have discussed, *kamma* accumulation does not start until the following two conditions are satisfied:

- (i) A sensory input (*ārammaṇa*) comes in, which could be through any of the six senses.
- (ii) Mind gets attached to that sensory input. It could be seeing an attractive person, hearing a pleasing sound, etc.
 - **Note that step (i) involves a *vipāka viññāṇa*.** There is no *kamma* accumulation. It is just seeing, hearing, etc.
 - **Step (ii) would not occur unless the mind gets attached to that *ārammaṇa*.** Once getting attached, the mind starts generating *citta* (thoughts) about that sensory input (how to enjoy it more/get possession of it, etc.). Such *citta* develop (within a billionth of a second) **into a *kamma viññāṇa*.** That ***kamma viññāṇa* (expectation) can grow with more *abhisāṅkhāra*.**

Correct Translation of *Cetanā Sutta* (SN 12.38)

6. Let us see how the “[WebLink: suttacentral: Cetanā Sutta \(SN 12.38\)](#)” explains the above process. The link at Sutta Central provides both the English translation by *Bhikkhu Sujato* and the Pāli version side-by-side.

- The third verse there is: “*Ārammaṇe sati patiṭṭhā viññāṇassa hoti.*” That means a ***kamma viññāṇa*** establishes upon the mind getting attached to an *ārammaṇa*. Note that it is a ***vipāka viññāṇa*** that had started the process. “*Ārammaṇe sati*” means focusing the mind on that *ārammaṇa*.
- Next verse, “*Tasmim patiṭṭhite viññāṇe virūlḥe āyatim punabbhavābhiniḍḍatti hoti*” means **“when that *kamma viññāṇa* is established and grows, it will produce *kammic* energy for future**

renewed existence” (*punabbhava* means repeated existence.) Of course, *bhava* would be according to the type of *kamma*.

- Note that the English translation at Sutta Central says: “When **consciousness is established and grows**, there is rebirth into a new state of existence in the future.” **How can consciousness grow? Consciousness means awareness. Most translators translate it the exact wrong way without distinguishing between the initial *vipāka viññāṇa* and the subsequent *kamma viññāṇa*. Only *vipāka viññāṇa* fall into the category of “consciousness.”**
- (By the way, I was not trying to pick on *Bhikkhu* Sujato above. *Bhikkhu* Bodhi also has a translation (about the same as *Bhikkhu* Sujato), but it does not have the Pāli text side-by-side.

Simple Example 2

7. Let us take a simple example to illustrate the sequence of events when person X sees his arch-enemy Y.

- “Seeing Y” is a *vipāka viññāṇa* and Y becomes the *ārammaṇa* (thought object) for X.
- X starts generating angry thoughts (*vacī abhisāṅkhāra*) about Y, resulting in the establishment of a *kamma viññāṇa* (an expectation.) Because of that mindset, X says something terrible to Y; that is an escalation of *vacī abhisāṅkhāra*, and the *kamma viññāṇa* grows. X has now started accumulating *kammic* energy that brings him to an “angry *bhava*.” His face becomes dark, and he is visibly getting upset.
- If Y also says something hostile in return, the situation can escalate. X may become angrier, generating more *vacī abhisāṅkhāra*, and the *kamma viññāṇa* grows to the extent that X may decide to attack Y physically. Such an attack involves *kāya abhisāṅkhāra* and even more *kammic* energy generated. Of course, part of that energy would also bring *vipāka* in the future.

Summary

8. Understanding Buddha Dhamma means understanding *Paṭicca Samuppāda*. That requires knowing what is meant by each term in *Paṭicca Samuppāda*. Most translators don’t seem to understand what is meant by basic terms like *saṅkhāra* and *viññāṇa*, let alone more complex *nāmarūpa*, *bhava*, etc.

- In previous posts, I pointed out that “*saṅkhāra*” is a generic term, and in some instances, it is necessary to use *abhisāṅkhāra* even though the “*uddesa* version” just says “*saṅkhāra*.”
- In the same way, *viññāṇa* is a generic term. One needs to know the difference between *vipāka viññāṇa* (consciousness or awareness) and the *kamma viññāṇa* (mindset to achieve a goal/expectation.)
- Translating deep *suttas* word by word without understanding those differences has hindered many, particularly those in the Western world who rely on English translations. Also, see, “[Distortion of Pāli Keywords in Paṭicca Samuppāda](#).”
- Up to now, such incorrect translations could have been justified because correct interpretations had not been available. But I, and a few others, have been trying to point these issues over the past few years. We are not saying to accept our explanations blindly. But if our descriptions are not correct, those errors need to be pointed out. Such comments can be made at the discussion forum.

9.6.1.2 Summary of Key Concepts About Viññāṇa and Saṅkhāra .3

January 16, 2022; revised August 31, 2022

We have discussed several key concepts about *viññāṇa* and *saṅkhāra* in the recent series of posts. It could be beneficial to summarize them in one post.

Difference Between a *Vipāka Viññāṇa* and a *Kamma Viññāṇa*

1. It is CRITICAL to distinguish between **recognizing a sensory input** and **thinking about it to achieve a particular goal**.

- **The first is just a sensory experience called consciousness or awareness.** One becomes aware of sight, sound, taste, smell, touch, i.e., “eye-consciousness through body-consciousness (touch sensation).”
- **The second is MORE THAN consciousness/awareness. The mind wants to accomplish something** based on that **sensory input**. The second type occurs ONLY IF the mind is attracted/attached to that sensory experience.
- It is essential to see the connection between the two cases and the time sequence. A *kamma viññāṇa* may arise only after a *vipāka viññāṇa*.

Vipāka Viññāṇa – Initial Sensory Experience

2. The first type is a *vipāka viññāṇa*. Any person living in the human world (whether it is an average human or a Buddha) will experience this type of *viññāṇa*.

- For example, imagine our Buddha Gotama living in *Jetavanārāma* (a luxurious residence offered to the Buddha and the *bhikkhus* by the wealthy merchant Anāthapiṇḍika.) He would see and hear the same things as anyone else there. If someone offered a good meal, they all would agree that it was tasty.

Kamma Viññāṇa – Expectation (Goal) Based on the *Vipāka Viññāṇa*

3. The second type, *kamma viññāṇa*, will take place ONLY IF one got attracted/attached to the sensory experience of the first type, a *vipāka viññāṇa*.

- The mind MUST first be made aware of “something attractive thing,” whether it is a sight, sound, taste, smell, or a touch to get attached. Of course, it could also be a MEMORY of a previous sensory experience. For example, the memory of a tasty food eaten last week may come to the mind as a *vipāka viññāṇa* too. **That is why a *vipāka viññāṇa* can be *cakkhu*, *sota*, *jivhā*, *ghāṇa*, *kāya*, or *mano viññāṇa*.**
- However, we don’t get attached to all we see, hear, etc. We get enticed by only a fraction of such sensory inputs (*ārammaṇa*.) But if we do attach, we start building expectations along with that. We do that by thinking about acting on that *ārammaṇa* (how to enjoy it more if it is enjoyable.) **All that happens at the mind-door (*manodvāra*), and thus *kamma viññāṇa* is always a *mano viññāṇa*.**

Saṅkhāra and *Abhisāṅkhāra* – Critical Difference

4. Thus, the cultivation of a *kamma viññāṇa* starts with *vitakka/vicāra*. In simple terms, *vitakka* is to “focus on that *ārammaṇa*” and *vicāra* is to “think along that *ārammaṇa*.” For example, if we see an appealing person, we may **think about** approaching that person.

- Thus the initiation/cultivation of a *kamma viññāṇa* starts with “*vitakka/vicāra*.” Such *vitakka/vicāra* are *vacī saṅkhāra*. **If such thoughts involve *lobha*, *dosa*, and *moha*, they become *vacī abhisāṅkhāra*.**

- If that *kamma viññāṇa* becomes more assertive, we may take physical action to fulfill that *kamma viññāṇa* (expectation.) In the above example, we may walk to that person and start talking to the person. Such activities involve *kāya saṅkhāra*. Again, **if such thoughts also involve lobha, dosa, and moha, they become kāya abhisāṅkhāra.**
- Thus, we can see that *abhisāṅkhāra* are associated only with *kamma viññāṇa* and NOT with *vipāka viññāṇa*.

It Is Necessary to Understand Those Key Concepts

5. I hope the above summary on *saṅkhāra/abhisāṅkhāra* and their relationships to *vipāka viññāṇa/kamma viññāṇa* is clear. If you go back and read the previous posts, that may solidify your understanding.

- It is essential to understand those critical concepts before being able to comprehend *Paṭicca Samuppāda* or *Tilakkhaṇa* or the Four Noble Truths.
- **The English words “consciousness” or “thoughts” do not convey the meaning of *viññāṇa*, especially *kamma viññāṇa*.** Learning about the relationship between *citta* and *viññāṇa* could be helpful.

A Citta Evolves to a Viññāṇa

6. Why did the Buddha analyze our world with five entities (five aggregates) of *rūpa*, *vedanā*, *saññā*, *saṅkhāra*, *viññāṇa*?

- The world offers sensory inputs with six types of *rūpa*: *rūpa rūpa* (sights), *sadda rūpa* (sounds), *rasa rūpa* (tastes), *gandha rūpa* (smells), *phoṭṭhabba rūpa* (touches), and *dhamma rūpa* or *dhammā* (*kammically*-produced fine *rūpa*).
- That last category of *dhammā* includes *rūpa* below the *suddhaṭṭhaka* stage. A *suddhaṭṭhaka* is the smallest *rūpa* belonging to the other five types of *rūpa*. In other words, modern science can detect the first five types of *rūpa* with their instruments but will never detect *dhammā*.
- For details, see “[Chachakka Sutta – Six Types of Vipāka Viññāṇa](#)” and “[What are Rūpa? – Dhammā are Rūpa too!](#)”
- The *suttas* refer to *dhammā* as “*anidassana appaṭigha rūpa*” (which cannot be seen or detected with the physical instruments). I will discuss how *dhammā* are related to *kamma viññāṇa* in the next post. An intro to the next post is in #10 below.

7. **When any of those six types of *rūpa* makes contact with the mental body (*gandhabba*), then *vedanā*, *saññā*, *saṅkhāra*, *viññāṇa* arise as *vipāka viññāṇa*.** That is how we experience such a *rūpa*. The brain plays a crucial role in the above process; see, “[Brain – Interface between Mind and Body](#).”

- All four of those mental aggregates rise in *citta*. A *citta* arises with a certain number of *cetasika* (mental factors.) At least seven *cetasika* arise with a *citta*, and *vedanā* and *saññā* are two of those “universal *cetasika*.”
- The inclusion of more *cetasika* in a *citta* comes under “*saṅkhāra*.” If any *sobhana* (good or “mundane *alobha*, *adosa*, *amoha*”) or *asobhana* (bad or *lobha*, *dosa*, *moha*) *cetasika* arise, then those become *abhisāṅkhāra*. That is a simple way to remember the difference between *saṅkhāra* and *abhisāṅkhāra*.
- The overall sensory experience is *viññāṇa*. Any *citta* starts with the seven universal *cetasika* and will incorporate more *cetasika* (*saṅkhāra* generation) and ends up as *viññāṇa*. That happens very fast (within a billionth of a second), and only a Buddha can “see” such a rapid process.

- That is a bit of very basic *Abhidhamma* that everyone needs to know. It is not necessary to learn the details at the beginning.

8. I hope now you can see the inter-relationships among the five aggregates.

- The six types of *rūpa* bring sensory experiences via *vipāka viññāṇa*.
- The four aggregates of *vedanā*, *saññā*, *saṅkhāra*, and *viññāṇa* help describe such a sensory experience.
- **If we attach to such sensory experiences**, the mind will generate **kammic energies (*dhammā*) via *kamma viññāṇa***.
- Such *dhammā* can lead to future rebirths of a sentient being AND more of the six types of *rūpa*. That is all explained by *Paṭicca Samuppāda*.

***Paṭicca Samuppāda* Can Be Deep and Explain Everything in This World**

9. That is also the critical meaning of the first two verses in *Dhammapada*: “[Manopubbangamā Dhammā](#).” It is the mind that creates the future lives and the physical world. That is a profound subject, and we are at the beginning of such a discussion.

- Of course, it is NOT necessary to learn such processes in detail.
- But it is good to realize that **Buddha Dhamma (*Paṭicca Samuppāda*) should not be taken lightly, as the Buddha admonished Ven. Ananda** in the “[WebLink: suttacentral: Mahānidāna Sutta \(DN 15\)](#).” The first few verses in the English translation recount that exchange between the Buddha and Ven. Ananda.

***Anidassana Viññāṇa* – What Does That Mean?**

10. As we discussed above, it is a *kamma viññāṇa* that creates ***dhamma rūpa* or *dhammā*** – the sixth type of *rūpa* in Buddha Dhamma addressed in #6 above.

- The phrase “*viññāṇaṃ anidassanaṃ*” has invoked many discussions; see, for example, “[WebLink: suttacentral: Viññāṇa anidassana: the state of boundless consciousness](#).”
- However, it has a simple meaning, “*viññāṇa* is not visible.” Yet, for those who assume *viññāṇa* can only mean “consciousness” it is intriguing. They think, “of course, consciousness is invisible. So, why did the Buddha say that?” **The answer is that a *kamma viññāṇa* is much more than just consciousness.**
- That phrase “*viññāṇaṃ anidassanaṃ*” appears in the [WebLink: suttacentral: Brahmanimantanika Sutta \(MN 49\)](#) and the [WebLink: suttacentral: Kevatta Sutta \(DN 11\)](#) and **refers explicitly to *kamma viññāṇa***. The CRITICAL POINT to understand is that a *kamma viññāṇa* can generate “*anidassana rūpa*” (*dhammā*).
- That discussion in “[Anidassana, Appatigha Rūpa Due to Anidassana Viññāṇa](#).”

Summary

10. A sensory experience starts with a *vipāka viññāṇa*. If the mind gets attached to it, then it may begin to generate *abhisāṅkhāra* and thereby generate *kammic* energies via *kamma viññāṇa*. Such *kammic* powers bring future *vipāka*, and thus the *samsāric* process drags on.

- Any type of *viññāṇa* starts as a *citta*, “the primary unit of cognition” in Buddha Dhamma. A set of *cetasika* arises with a *citta* that defines the *citta* as good, bad, or neutral.
- That *citta* evolves into a complex entity called *viññāṇa* (by incorporating various *cetasika*) within a billionth of a second. During that astonishingly short time, the original *citta* gets contaminated depending

on two factors: (i) the sensory input and (ii) the *gati* (character/habits) of the person. See “[Gati \(Habits/Character\) Determine Births – Saṃsappanīya Sutta.](#)”

- Comprehending Buddha Dhamma requires studying various interconnected aspects. It is like working on a jigsaw puzzle. With time and effort, a clear picture will emerge.

9.6.1.2 Anidassana, Appaṭigha Rūpa Due to Anidassana Viññāṇa

.4

January 23, 2022; revised December 23, 2022

The famous verse, “*viññāṇam anidassanam anantaṃ sabbato pabham*” in *Kevaṭṭa Sutta* (DN 11) and *Brahmanimantanika Sutta* (MN 49) refers to the creation of *anidassana appaṭigha rūpa (dhammā)* by *kamma viññāṇa*.

Viññāṇam anidassanam anantaṃ sabbato pabham – Correct Translation

1. The phrase, “*anidassana viññāṇa*” needs to be analyzed within the longer verse, “*viññāṇam anidassanam anantaṃ sabbato pabham*.”

- That extended verse appears in two *suttas*, “[WebLink: suttacentral: Brahmanimantanika Sutta \(MN 49\)](#)” and “[WebLink: suttacentral: Kevaṭṭa Sutta \(DN 11\)](#)”; see [Ref. 1](#) and [Ref. 2](#).
- That verse means: “***Viññāṇa*** is unseen, infinite, and is **the origin of all existence (*bhava*)**.” Here, it refers specifically to ***kamma viññāṇa*** that arises via “*avijjā paccayā saṅkhāra*,” “*saṅkhāra paccayā viññāṇa*” in *Paṭicca Samuppāda*. As we know, that leads to “*upādāna paccayā bhava*.”
- The “[WebLink: suttacentral: Dutiyabodhi Sutta \(Ud 1.2\)](#)” and many other *suttas* confirm that. It states that *avijjā nirodhā* (cessation of *avijjā*) leads to the **cessation of *kamma viññāṇa*** that, in turn, leads to the **cessation of *bhava* and future suffering**.
- See, “[Distortion of Pāli Keywords in Paṭicca Samuppāda](#)” where I pointed out the problem with translating “*viññāṇa*” as just “consciousness.” The six types of *vipāka viññāṇa* do not cease with the cessation of *avijjā* and will exist until *Parinibbāna*.
- Now, let us see how most translators have incorrectly translated that verse, “*viññāṇam anidassanam anantaṃ sabbato pabham*,” in both those *suttas*.

Viññāṇam anidassanam anantaṃ sabbato pabham – Incorrect Translations

2. *Bhikkhu Sujato* translates, “*viññāṇam anidassanam anantaṃ sabbato pabham*” as “consciousness that is invisible, infinite, **entirely given up**,” “[WebLink: suttacentral: On the Invitation of Brahmā \(MN 49\)](#).” I have no idea how he translated “*pabham*” as “given up.”

- *Bhikkhu Bodhi* translates the same verse as, “consciousness non-manifesting, boundless, **luminous all-around**,” see [Ref. 3](#).
- I have seen others translate “*pabha*” as “luminous,” too. That confusion comes from equating “*pabha*” to “*pabhā*” (with a “long a.”) Those two words have very different meanings; see #3 below.
- All of us agree that the first part means, “*viññāṇa* is unseen, infinite.” **As I show below, those are general characteristics of *viññāṇa dhātu*.**

Pabha Is Different from *Pabhā*

3. The “[WebLink: budsas.org: Concise Pāli-English Dictionary](#)” by Buddhadasa Mahathera defines “*pabhava*” as “origin, source” and “*pabhā*” (with a long “a”) as “light, radiance.”

- Both those are correct. It is also good to know that the word “*pabhava*,” “*pa*” means again and again, and “*bha*” is related to “*bhava*.” Thus *pabhava* means “repeated existence” that arises via *Paṭicca Samuppāda*, as pointed out in #1 above.
- The word “*pabha*” appears in another critical verse, “*Ye dhammā hetuppabhavā*,” see [Ref. 4](#), [Ref. 5](#), and [Ref. 6](#).
- The meaning of “*pabhā*” (with a long “a”) as “light” is easily seen in the short “[WebLink: suttacentral: Pabhā Sutta \(AN 4.142\)](#).”
- To get a good idea of how bad the translations of #2 are, we need to look at the background of the two *suttas* where the verse “*viññāṇam anidassanam anantaṃ sabbaṃ pabham*” appears.

Brahmanimantanika Sutta (MN 49)

4. This *sutta* describes an account of a “debate” between the Buddha and Baka *Brahma*, the “leader” of the *Mahā Brahma* realm. Baka *Brahma* thought that his existence was eternal and superior to the Buddha.

- During that discussion, the Buddha explained to the *Brahma* that Baka *Brahma* was not even aware that there are realms above the *Mahā Brahma* realm.
- Then they discussed how attachment to worldly things made of *pathavi*, *āpo*, *tejo*, and *vāyo* would lead to various existences. The Buddha pointed out to *Brahma* that he did not understand the fundamental nature of the four primary elements (*pathavi*, *āpo*, *tejo*, and *vāyo*) present in all the realms.

5. That is when the Buddha made the general statement in [Ref. 1](#) to point out that it is (*kamma*) *viññāṇa* that leads to the continuation of the rebirth process among all those realms where the four primary elements are present.

- **Translation of the first part of the verse in [Ref. 1](#):** “*Viññāṇa* is unseen, infinite, and leads to the rebirth process for all. With *viññāṇa* one cannot comprehend the real nature of *pathavi*, *āpo*, *tejo*, *vāyo*, *bhūtā*, *deva*, *pajāpati brahma*, *abhassara brahma*, *subhakinha brahma*, *vehapphala brahma*, etc. (in any realm) in this world (*sabba*)”.
- The last part of the verse in [Ref. 1](#), “*sabbassa sabbattena ananubhūtaṃ*” means the following. Without comprehending *kamma viññāṇa* (that it is invisible, infinite, and gives rise to existences based on the four primary elements), one would not be able to comprehend the fundamental nature of this world.
- The verse in [Ref. 1](#) is the critical to this relatively long *sutta*. **Even though the rest of the *sutta* could be translated word by word, that verse requires a detailed explanation.**
- Next, the *Kevaṭṭa Sutta* directly states that cessation of (*kamma*) *viññāṇa* leads to the stopping of the rebirth process.

Kevaṭṭa Sutta (DN 11)

6. *Kevaṭṭa Sutta* is even longer. But most of this *sutta* **can also be** translated word by word. The Buddha explains to *Kevaṭṭa* that trying to convert people of other faiths by performing miracles/supernatural deeds like flying through the air is not good. When people understand the deeper aspects of the Buddha Dhamma, they will not give any value to such miracles.

- Section 4 of the *sutta*, where the background story starts leading to the verse in [Ref. 2](#). The following question arose in the mind of a certain *bhikkhu*: “Where do these four primary elements (*pathavi*, *āpo*, *tejo*, *vāyo*) cease to exist?”
- Then the Buddha explains to *Kevaṭṭa* how that *bhikkhu* (who had *abhiññā* powers) went to higher realms looking for the answer to his question. No one knew the answer, and he returned to ask the Buddha. That account takes most of Section 4.

- The verse of importance to us comes at the end of the *sutta* in Section 4.1. There, the Buddha explains that the question needs to be re-phrased, as we discuss next.

Nibbāna Reached with the Cessation of Kamma Viññāṇa

7. The point is that one cannot find any existence where those four primary elements are absent. Instead, one should re-phrase the question as, “How would those four primary elements (*pathavi, āpo, tejo, vāyo*) not find a footing anywhere (among the 31 realms)?” That is the same as asking, “How can one stop the rebirth process?”

- The answer is at the end of the verse: “***Viññāṇassa nirodhena etthetaṃ uparujjhatī’ti.***” “They (the four primary elements) will cease to exist with the cessation of *viññāṇa*.” Of course, it refers only to *kamma viññāṇa*.
- The four primary elements will cease to exist in *Parinibbāna* or “full *Nibbāna*” (realized after the death of an *Arahant*.) Once the *Arahant* dies, they will not be reborn in this world made of the four primary elements.

8. As we have discussed, *kamma viññāṇa* ceased to exist for the Buddha upon his Enlightenment. But he lived in this world for another 45 years until *Parinibbāna* and experienced *vipāka viññāṇa* during that whole time! Thus, the “cessation of the four primary elements” was realized only after the *Parinibbāna*. See, “[Distortion of Pāli Keywords in Paticca Samuppāda.](#)”

- I hope now you can see why the English translations in #2 above of the verse “*viññāṇaṃ anidassanaṃ anantaṃ sabbaṃ pabhaṃ*” are wrong. Of course, there are several more wrong translations of the same verse. We will discuss one more next.

Anidassana Viññāṇa Is the Second Arupāvacara Jhāna?

9. In the previous post, I mentioned the fact that there have been many discussions at discussion forums on *anidassana viññāṇa*. See, for example, “[WebLink: discourse.suttacentral.net: Viññāṇa anidassana: the state of boundless consciousness.](#)” The author points out to a reference that equates *anidassana viññāṇa* to *Nibbāna*!

- The author of the above essay does not go that far, but says, “I show here that ***viññāṇa anidassana*** is not *nibbāna*, but a poetic description of the **state of boundless consciousness, the second “formless” meditation state.**”
- So, the author attempts to prove that *anidassana viññāṇa* is a state of higher consciousness, the second *arupāvacara jhāna* or the “*viññāṇaṇcāyatana*.”
- It is also interesting to read the comments following that essay. *Bhikkhu* Sujāto agrees with the essay’s author, saying, “It makes a lot of sense, especially the idea of *anidassana* being equivalent to *arūpa*..” *Bhikkhu* Brahmāli states, “Excellent essay! It is clear, and I think the conclusion you arrive at is solid.”

10. That is why I have been emphasizing that most translators of the *Tipiṭaka* do not even understand basic concepts like *viññāṇa* and *saṅkhāra*. I hope those *bhikkhus* and other translators will think through the FACTS presented here.

- One can get a good idea of the sad state of Buddha Dhamma in the present day by reading the above essay and the following series of comments. It was a depressing experience for me.

Ananta Viññāṇa – Characteristic of Viññāṇa Dhātu

11. The author of the essay cited in #9 above extracted “boundless consciousness” from the next word, ***anantaṃ***, in verse: “*viññāṇaṃ anidassanaṃ anantaṃ sabbaṃ pabhaṃ*..” The Pāli word “*ananta*” does mean “infinite.”

- However, *viññāṇa dhātu* itself is boundless and that characteristic is NOT limited to the second *arūpāvacara jhāna*. In the transition from *ākāsānañcāyatana* (the first *arūpāvacara jhāna*) to the *viññāṇañcāyatana*, *viññāṇa dhātu* separates from the *ākāsa dhātu*. At that point, the mind separates from any *rūpa* and perceives ONLY the “*ananta* (infinite) *viññāṇa*.”
- Note that everything in this world is represented by the five aggregates (*pañcakkhandha*), twelve *āyatana*, or six types of *dhātu*. Those six types of *dhātu* are *pathavi*, *āpo*, *tejo*, *vāyo*, *ākāsa*, *viññāṇa*. **Both *ākāsa* and *viññāṇa dhātu* are infinite.**

12. **Any type of *viññāṇa* is “spread out” without bounds. A mind has access to its own *viññāṇa dhātu* from anywhere.** That is why whether we are on Earth, go to the Moon, or even to another planetary system at the other end of the universe, we will be able to recall memories and think just like while on Earth. On the other hand, **the five physical senses detect only localized, dense *rūpa*.**

- The astronauts who went to the Moon could not see, hear, smell, taste, or touch anything that was not on the Moon. But they could recall their memories as if they were on the Earth. That is because *viññāṇa* is infinite.
- Put another way, dense *rūpa* (experienced by the five physical senses) are localized, but the *nāma* category (*vedanā*, *saññā*, *saṅkhāra*, *viññāṇa*) is NOT localized. In between such **dense (*sappaṭigha*) *rūpa*** and ***anidassana/appaṭigha nāma***, there are ***anidassana/appaṭigha rūpa (dhammā)***.
- Both ***nāma*** and ***dhammā*** are not localized and **are included in *viññāṇa dhātu***. See, “[What are Rūpa? – Dhammā are Rūpa too!](#)”

Sappaṭigha Rūpa and Appaṭigha Rūpa (Dhammā)

13. In modern terms, ***sappaṭigha rūpa*** can be detected with five physical senses AND scientific instruments. On the other hand, ***appaṭigha rūpa (dhammā)*** and ***appaṭigha nāma*** cannot be detected with scientific instruments and can be detected only by the mind.

- Note that out of the five types of ***sappaṭigha rūpa***, only *rūpa rūpa* (visual objects) can be seen (*dassana*) because sounds (*sadda rūpa*), tastes (*rasa rūpa*), odors (*gandha rūpa*), and touches (*phoṭṭhabba rūpa*) cannot be seen (*anidassana*).

Anidassana Viññāṇa Means “Viññāṇa Cannot Be Seen”

14. The phrase, “*viññāṇāṇaṃ anidassanaṃ*” means, “*viññāṇa* is invisible.”

- If any *viññāṇa* is purely mental belonging to the *nāma* category (i.e., just consciousness or awareness), then what is the point of saying, “*viññāṇa* is invisible”?
- As I have explained in previous posts, it is only the *vipāka viññāṇa* that pertains to just consciousness (strictly within the *nāma* category.) In contrast, ***kamma viññāṇa* is more than consciousness and has energy.** *Kamma viññāṇa* gives rise to **subtle *rūpa (dhammā)*, the sixth type of *rūpa* in Buddha Dhamma.**

15. In this world, there are *nāma*, *rūpa*, and *nāmarūpa* (for example, living beings have *nāmarūpa* represented by the five aggregates). **There are different meanings of all three words depending on the context.**

- The verse in question, “*viññāṇāṇaṃ anidassanaṃ anantaṃ sabbaṃ pabhaṃ..*” refers to the unique property of a ***kamma viññāṇa***. It is “in the middle between the category of pure *nāma* (*vedanā*, *saññā*, *saṅkhāra*, *vipāka viññāṇa*) and **dense (*sappaṭigha*) *rūpa*** (*rūpa rūpa*, *sadda rūpa*, *gandha rūpa*, *rasa rūpa*, and *phoṭṭhabba rūpa*.)
- In Buddha Dhamma, there is a sixth type of **fine (*appaṭigha*) *rūpa* called “*dhammā*,”** as we have discussed, for example, in “[What are Rūpa? – Dhammā are Rūpa too!](#)” ***Dhammā*** are invisible and arise due to ***kamma viññāṇa***. That is why the need to emphasize that ***kamma viññāṇa*** is also invisible.

Kamma Viññāṇa = Paṭisandhi Viññāṇa = Gandhabba (Mental Body)

16. Thus, a *kamma viññāṇa* that comes to play in *Paṭicca Samuppāda* is MORE THAN consciousness. It CREATES *kammic* energies (*dhammā* or *kamma bīja*) to power future rebirths. **That *kammic* energy creates the “seed” of a future human at the *cuti-paṭisandhi* moment. That “seed” is the “mental body” or “*gandhabba*.”** That *gandhabba* is so tiny that it is invisible to the naked eye or even the most powerful scientific instruments.

- Note that *gandhabba* is not a *kamma viññāṇa*, but the RESULT of a *kamma viññāṇa*. At the *cuti-paṭisandhi* moment (grasping a new existence or *bhava*, that *kammic* energy creates the “seed” of the sentient beings in the new existence. In many cases, like a *Deva* or *Brahma*, that seed itself is the new living being, i.e., a *Deva* or a *Brahma*. We would not be able to see them.
- In the case of humans and animals, that seed (*gandhabba*) needs to get into a womb to grow into a human with a dense physical body. See “[Buddhist Explanations of Conception, Abortion, and Contraception](#).”
- That *gandhabba* is “*anidassana*” too, i.e., invisible. Even though some *suttas* refer to a *gandhabba* descending to a womb (e.g., [WebLink: suttacentral: Mahā Tanhāsankhaya Sutta \(MN 38\)](#)), other *suttas* (e.g., [WebLink: suttacentral: Mahā Nidāna Sutta \(DN 15\)](#)) refer to a “*paṭisandhi viññāṇa*” descending to a womb. **Thus, both refer to the “seed” of a human, which grows inside a womb taking food from the mother.**

Summary

17. “*Anidassana viññāṇa*” in the verse, “*viññāṇaṃ anidassanaṃ anantaṃ sabbato pabhaṃ*” refers explicitly to *kamma viññāṇa* that creates *kammic* energy (or *dhammā* or *kamma bīja*.)

- We may have created numerous such *kamma viññāṇa* (or *kamma bīja*) that can “power up” births in various realms in the future. When it is time to grasp a new existence (at the end of the current *bhava*) one *kamma bīja* comes to mind as an *ārammaṇa*.
- If that *ārammaṇa* is grasped, that creates the mental body/*gandhabba*/*paṭisandhi viññāṇa*. Thus, *paṭisandhi viññāṇa* is actually not a *viññāṇa*, but the result of a *kamma viññāṇa*.
- More details at, “[Anidassana Viññāṇa – What It Really Means](#).”

References

1. In the “[WebLink: suttacentral: Brahmanimantanika Sutta \(MN 49\)](#)”: “*Viññāṇaṃ anidassanaṃ anantaṃ sabbato pabhaṃ, taṃ pathaviyā pathavattena ananubhūtaṃ, āpassa āpattena ananubhūtaṃ, tejassa tejattena ananubhūtaṃ, vāyassa vāyattena ananubhūtaṃ, bhūtānaṃ bhūtattena ananubhūtaṃ, devānaṃ devattena ananubhūtaṃ, pajāpatissa pajāpatittena ananubhūtaṃ, brahmānaṃ brahmattena ananubhūtaṃ, ābhassarānaṃ ābhassarattena ananubhūtaṃ, subhakiṇhānaṃ subhakiṇhattena ananubhūtaṃ, vehapphalānaṃ vehapphalattena ananubhūtaṃ, abhibhussa abhibhuttena ananubhūtaṃ, sabbassa sabbattena ananubhūtaṃ.*”
2. In the “[WebLink: suttacentral: Kevatta Sutta \(DN 11\)](#)”: “*Viññāṇaṃ anidassanaṃ, anantaṃ sabbatopabhaṃ—Ettha āpo ca pathavī, tejo vāyo na gādhati. Ettha dīghaṇca rassaṇca, añuṃ thūlaṃ subhāsubhaṃ; Ettha nāmaṇca rūpaṇca, asesam uparujjhati; Viññāṇassa nirodhena, etthetaṃ uparujjhatī’ti.*”
3. Bhikkhu Bodhi, “The Middle Length Discourses of the Buddha” Wisdom Publication (2009), p. 428. A lengthy footnote on p. 1249 (footnote 513) describes how he has agonized over choosing from three different explanations for this verse.
4. “*Ye dhammā hetuppabhavā,*

Tesaṃ hetuṃ tathāgato āha;

Tesañca yo nirodho,

Evaṃvādī mahāsamaṇo.” (See [Ref. 5](#) below)

- Upon hearing this verse uttered by Ven. Assaji, Upatissa (later Ven. Sāriputta) became a *Sotāpanna*. That is the fundamental concept of Buddha Dhamma and is explained in detail in the *Paṭicca Samuppāda*.
- The correct translation is the following. “Buddha declared that all *dhammā* (some of which are *kamma bīja*) **that give rise to everything** (including the rebirth process,) are caused by “three *saṃ*” (*lobha, dosa, moha*); he has also explained how we can stop those causes from arising (and thus end the rebirth process).”
- That is essentially the translation of the above verse given in many English texts; see, for example, the following from [Ref. 6](#) below: “Of all those things that from a cause arise, Tathagata the cause thereof has told; And how they cease to be, that too he tells, This is the doctrine of the Great Recluse.”

5. From “[WebLink: suttacentral: Petakopadesa \(KN Pe 1\)](#)” (around the midway in the link):

“*Tattha katamāni cattāri ariyasaccāni? “Ye dhammā hetuppabhavā, Tesaṃ hetuṃ tathāgato āha; Tesañca yo nirodho, Evaṃvādī mahāsamaṇo”ti. Hetuppabhavā dhammā dukkhaṃ, hetusamudayo, yaṃ bhagavato vacanaṃ.*”

9.6.1.3 Memory, Dhammā, and Viññāṇa Dhātu

February 1, 2022

[Critical Influence of Wrong Views on Akusala Citta](#)

[Near-Death Experiences \(NDE\): Brain Is Not the Mind](#)

[Gandhabba \(Mental Body\) Separating from Physical Body in Jhāna](#)

[Where Are Memories Stored? – Viññāṇa Dhātu](#)

9.6.1.3 Critical Influence of Wrong Views on Akusala Citta

.1

February 1, 2022; revised May 15, 2023 (#6)

Wrong views (*micchā diṭṭhi*) play the dominant role in *akusala citta*. The same *akusala kamma* done by someone with wrong views leads to a much stronger *kamma vipāka* than the same *kamma* done by another person without wrong views.

Critical Role of Wrong Views

1. Wrong views in Buddha Dhamma refer to wrong views about the nature of our world.

- The Buddha taught that our world operates on a set of natural laws based on the laws of *kamma*.
- **The first level of wrong views** is not believing in the laws of *kamma*. They include not believing that immoral deeds (*akusala kamma*) will bring dire consequences (bad *kamma vipāka*) and that good *kamma* will bring good *kamma vipāka*. Another is not believing in the rebirth process. They fall under the ten types of *micchā diṭṭhi*. See, “[Micchā Diṭṭhi, Gandhabba, and Sotāpanna Stage](#).”
- Someone who does not have the ten types of *micchā diṭṭhi* can learn the correct version of Buddha Dhamma and get rid of the **second and deeper layer of micchā diṭṭhi**. An average human thinks that the world is of *nicca, sukha, and atta* nature, i.e., it is possible to have a happy future. However, the “future” in Buddha Dhamma is not restricted to this life but also to future lives. Realizing the true *anicca, dukkha, and anatta* nature will remove that deeper layer of wrong views.

Akusala Kamma Based on Akusala Citta

2. There are ten types of *akusala kamma*, three by the mind, four by speech, and three by bodily actions. However, *akusala kamma* by speech and bodily actions also originate in the mind. In other words, 12 types of *cittā* (loosely called “thoughts”) are responsible for all *akusala kamma*.

- **Thus, all ten *akusala kamma* are done with these 12 *akusala cittā*.** There are eight greed-rooted, two hatred-rooted, and two delusion-rooted *cittā*. Of course, *cittā* (pronounced “chiththā”) are thoughts; any speech or bodily action starts with a thought.
- As we know, all *akusala cittā* arise in mind due to *lobha* (greed), *dosa* (anger), and *moha* (delusion). Out of 12 *akusala cittā*, eight arise due to greed, 2 with anger, and 2 with delusion (a worse form of *avijjā*.)

Lobha (Greedy) Citta (Also has the *moha* root)

1. *Citta* connected **with wrong views**, accompanied by pleasure, and done with the habit (*gati*).
2. *Citta* connected **with wrong views**, accompanied by pleasure, and done reluctantly (with encouragement by others.)
3. *Citta* **without wrong views**, accompanied by pleasure and done with habit.
4. *Citta* **without wrong views**, accompanied by pleasure and done reluctantly.
5. *Citta* connected **with wrong views**, accompanied by a neutral feeling, and done with habit.
6. *Citta* connected **with wrong views**, accompanied by a neutral feeling, and done reluctantly.
7. *Citta* **without wrong views**, accompanied by neutral feeling and done with habit.
8. *Citta* **without wrong views**, accompanied by neutral feeling and done reluctantly.

Dosa (Angry/Hateful) Citta (Also has the *moha* root)

9. *Citta* associated with hate, accompanied by displeasure, done with habit.
10. *Citta* associated with hate, accompanied by displeasure, done reluctantly.

Moha Citta (only with the *moha* root, i.e., without greed or anger)

11. *Citta* accompanied by a neutral feeling and associated **with *vicikicchā*** (not aware of bad consequences)
12. *Citta* accompanied by a neutral feeling and associated with *uddhacca* (excited/scattered mind).

The Strong Influence of Wrong Views

3. One starts on the Noble Eightfold Path as a *Sotāpanna* (or *Sotāpanna Anugāmi*) by getting rid of both layers of wrong views discussed in #1 above.
 - At the *Sotāpanna* stage, three of the ten *samyojana* (fettors) are removed, and thereby *akusala cittā* #1, 2, 5, 6, and 11 stop arising. **Furthermore, *apāyagāmi* strength in the other types of *cittā* goes away.**
 - Thus, a *Sotāpanna* does not need to control the arising of such *cittā* consciously. Such *cittā* WILL NOT arise for any reason.
 - Therefore, only the remaining seven types of *cittā* can arise in the mind of a *Sotāpanna*.

Effect of Attaining Higher Stages of *Nibbāna*

4. The remaining *akusala cittā* are progressively removed as one gets to the higher stages of *Nibbāna*.
 - The potency of the two *paṭigha*-rooted *cittā*, and the remaining four greed-based *citta*, i.e., *kāma rāga*, are reduced at the *Sakadāgāmi* stage.

- The two *paṭigha*-rooted *cittā* (#9, #10) stop from arising at the *Anāgāmi* stage. Also, the potency of the remaining four greed-based *citta*, i.e., *kāma rāga*, is reduced to just *kāma* level.
- Finally, the remaining four greed-based *citta* (#3, #4, #7, #8) and the *uddhacca citta* (#12) stop from arising at the *Arahant* stage. Thus an *Arahant* will never experience any *akusala citta*.

Key Observations

5. Generally, the *kammic* strength of *cittā* in each category decreases in descending order. Thus *citta* #1 is stronger than any other in that category. *citta* #9 is stronger than #10. *Citta* #11 is stronger than #12.

- With higher *magga phala*, the strengths of ALL *cittā* are reduced, and some cease arising altogether.
- As we can see, a *Sotāpanna* mainly removes wrong views. **But that will also reduce the strength of other types of *cittā*.** Thus *kāma rāga* is reduced too for a *Sotāpanna*; it is further reduced for a *Sakadāgāmi* and stops at the *Anāgāmi* stage.

Role of *Gati/Anusaya* and Association with *Asappurisa* (“Bad People”) with Wrong Views

6. As we can see, the strongest *lobha citta* (#1) arises due to one's bad *gati* (character/habits.) Such *cittā* arise automatically.

- A common question is: “Where are *anusaya* or defilements stored?”
- They stay with the *hadaya vatthu*. Of course, at the *cuti-paṭisandhi* moment, existing *anusaya* are transferred to the new *hadaya vatthu* created by *kammic* energy. Thus, *anusaya* keep changing during each lifetime, but are eliminated in stages with each stage of *magga phala*. See “[Conditions for the Four Stages of Nibbāna](#).”
- Records of all memories (*nāmagotta*) remain intact in the *nāma loka* or *viññāṇa dhātu*.
- For details, see “[Nāma Loka and Rūpa Loka – Two Parts of Our World](#),” “[What are Rūpa? – Dhammā are Rūpa too!](#)” and “[Where Are Memories Stored? – Viññāṇa Dhātu](#).”

7. In some cases, one may engage in evil deeds due to the influence of immoral friends (*asappurisa*), and *cittā* of type #2 can arise. Such *citta* have weaker strength. However, if one continues associating with such friends, one may cultivate such bad *gati* and thus start generating the worse type (#1) of *akusala citta*.

- On the other hand, if one associate with “good/Noble friends” (*sappurisa*) one will get rid of bad *gati* and cultivate good *gati*.
- Several *suttas* point out the importance of choosing one's associates/friends. See, for example, “[WebLink: suttacentral: Dutiyaasappurisa Sutta \(SN 45.26\)](#).” More at, “[WebLink: suttacentral: 30 results for asappurisa](#).”

Value of *Abhidhamma*

8. The above analysis of *akusala citta* is in basic *Abhidhamma*.

- *Abhidhamma* can become very useful in resolving “knotty issues.” Once the basics are understood, it is possible to avoid lengthy explanations of certain concepts.
- See p. 32 of [Ref. 1](#) for further details. Also, see “[Akusala Citta and Akusala Vipāka Citta](#)” and “[Conditions for the Four Stages of Nibbāna](#).”

9.6.1.3 **Near-Death Experiences (NDE): Brain Is Not the Mind** .2

February 7, 2022; August 31, 2022

Recent studies show that near-death experiences (NDE) are common occurrences while the brain is inactive. That means consciousness does not arise in the brain.

Materialistic View – A Dangerous Wrong View in Buddha Dhamma

1. In the prevalent materialistic view (especially in the western world,) consciousness arises in the brain. Thus, when a person dies, the brain dies with it, the END. **That means a materialist only needs to worry about any suffering we experience in this life (of course. That is a wrong conclusion based on an incorrect view.**

The Buddha taught that life continues after the death of this physical body. The following birth is according to the causes and conditions prevailing at the moment of death and is according to *Paṭicca Samuppāda*. **Most future existences/births are in the four lowest realms (*apayās*), where suffering dominates.**

- That “future suffering” associated with rebirth stops only after attaining *Nibbāna*.
- **The materialistic view is a STRONG wrong view (*micchā diṭṭhi*) in Buddha Dhamma and will lead to rebirth in the *apayās*.** How can one even start learning about “how to stop future suffering” if one does not believe in future lives?
- Therefore, evaluating the evidence for and against the rebirth process is a good idea.

2. If the materialist view of consciousness arising in the brain is correct, that assumption leads to the following inferences: (i) ALL rebirth accounts and NDE accounts are fake, and (ii) ALL our memories are stored in the brain.

- Therefore, it is critical to look at the following two related issues.
 - (i) How strong is the evidence for past lives? How reliable are the NDE accounts where brain activity is confirmed to have ceased?
 - (ii) Is it possible for a brain to store ALL our memories?

One White Crow Is Enough to Disprove the Hypothesis, “All Crows Are Black”

3. If even a SINGLE rebirth account or an NDE is valid, then the hypothesis “consciousness arises in the brain” is false. American philosopher William James stated the following that is widely quoted today ([Ref. 1](#)):

In order to disprove the assertion that all crows are black, one white crow is sufficient.

- That is a logical statement. It is unnecessary to prove that all or even many rebirth accounts/NDE accounts are true. Even if just one account is valid, that is enough to conclude that the brain is not the “seat of the mind.”
- We have thousands of rebirth/NDE accounts scrutinized by scientists/physicians.

In rebirth accounts: Since a brain can store only the memories from this life, there is no way to recall memories from a previous life. Instead, the brain helps in recalling memories (from *viññāṇa dhātu*) while the *gandhabba* is inside the body. I will discuss that in future posts.

In NDE accounts: Since the patient's brain activity had ceased (and even pronounced dead for a short time), the subject could not have "seen" and "heard" what was happening with the inactive brain. Furthermore, many saw their physical bodies "from the above (close to the ceiling)."

- Therefore, even if just ONE rebirth/NDE account is accurate, the hypothesis "consciousness arises in the brain" is wrong!

Recent Developments

4. Several scientific findings within the past 50 years have converged to THREE types of investigations that point to the fact that the brain is not the "seat of consciousness." These findings indicate that while the brain plays a crucial role in consciousness, it is NOT where our thoughts arise, i.e., **the brain is not the mind!**

ONE: Rebirths accounts by children have been common knowledge in many Asian countries for ages. Most people in those countries were Buddhists who accepted those accounts without question. Only recently, Western countries became interested after two significant developments: Systematic studies conducted by Professor Ian Stevenson ([Ref. 2](#)) and easy access to rebirth accounts via the internet. Also, see "[Evidence for Rebirth.](#)"

TWO: Accounts of Near-Death Experiences (NDE) in the absence of any brain activity. Some NDE accounts are by those declared dead for periods ranging from a few minutes to many minutes. They say that "they were outside of the physical body." They were looking down at their bodies from the ceiling!

THREE: Reports of "extraordinary memory recall" by several people. They can recall the past several years in great detail, and it is unlikely that the brain could have "stored" such minute details as a video recorder.

- We will discuss the second category in this post and the third in the next post.

What Are Near-Death Experiences (NDE)?

5. Near-death experiences (NDE) occur when someone "almost dies" under a medical condition. For example, it may happen during a coma induced by cardiac arrest or someone badly injured in an accident.

- Of course, only a tiny fraction of such patients experience NDE. However, "**..estimates put the number of people who have had one in the past fifty years at more than 25 million worldwide.**" ([Ref. 3](#), p. 9)
- In such cases, the "mental body" (*gandhabba*) comes out of the physical body, and the patients **can watch their physical bodies from above! Furthermore, they correctly reproduced the conversations among the doctors and nurses while their brains were not functioning.**

Accounts of NDE

6. Physicians have conducted several systematic studies on NDE within the past 20-30 years.

[WebLink: youtube: A Cardiologist and Life after Death | An interview with Pim van Lommel](#)

[WebLink: youtube: The Joy of Dying: Understanding Near Death Experience](#)

- In the second video, make sure to watch the following segments:

@ **36.30 mins:** addressing the objections by skeptics of NDE. In particular, he talks about his patients looking at their bodies from above while the body is "lifeless."

@ 40 mins: Most compelling evidence for Dr. Long is the account of one of his patients born blind but was able to see for the first time in her life.

@ 41.15 mins: The patient's vision was not restricted to the forward direction. **She had 360° vision, i.e., she could see all around.** That is consistent with a *gandhabba* (mental body) seeing all around, not just the forward direction. See #8 below.

@43 mins: Based on the accounts of NDE, Dr. Long believes in the afterlife and thinks that the afterlife will be wonderful. I will also discuss this in #8 below.

Seeing for the First Time in Life!

7. I am unsure whether the following video is from the woman Dr. Long referred to in the above video. But she was born blind and could see for the first time in her life during an NDE.

[WebLink: youtube: Near Death Experience - Blind woman 'sees' while out of body](#)

Seeing and Hearing Is Better During an NDE

8. The mental body (*gandhabba*) is trapped inside the physical body. The brain processes the visuals captured by the eyes and passes them to the mental body trapped inside. I have discussed that complex process in “[Brain – Interface between Mind and Body](#).”

- Humans are born with dense physical bodies because such a body is required to sense smells, tastes, and body touches, including sex. The mental body (*gandhabba*) is almost devoid of matter and cannot be seen by an average human. However, once outside the physical body, the capability for seeing and hearing is vastly enhanced. Furthermore, the woman in the above video verified that her “weightless” mental body could go through the ceiling. Thousands of people have experienced those phenomena. See [Ref. 4](#).
- We don't realize the burden of “bearing a dense physical body.” But those who experience NDEs were especially experiencing bodily pains. Thus, it is an indescribable relief to be outside that “suffering-filled physical body.” That is why some even say they visited heaven!
- But they were not in heaven but in “*paraloka*” that world of the *gandhabbas*. They have been in that state only for a brief time, several minutes. If they stay there for long times, they will “miss” the ability to smell, taste, and touch bodily, including sex. That is why even *Brahmas* are “itching to come back to *kāma loka*” at the beginning of a “new Earth”; see.” [Buddhism and Evolution – Aggañña Sutta \(DN 27\)](#).”
- There are many youtube videos and books on the subject. See [Ref. 5](#) for a sample.

9.6.1.3 Gandhabba (Mental Body) Separating from Physical Body in Jhāna

February 14, 2022

The “mental body” (*gandhabba*) may automatically come out of the physical body during near-death experiences (NDE.) A meditator (*yogi*) can willfully do that in the fourth *jhāna*.

Materialistic View of the Mind

1. The “brain is the mind” materialistic hypothesis CAN explain the fact that we can recall memories even when we are on the Moon; we carry the brain with us everywhere.

- Of course, that hypothesis cannot explain memories of past lives, because the brain could not have stored memories from past lives.
 - It cannot explain NDEs experienced while the brain was inactive.
 - It also cannot explain memory recall with such precision by some people. We will postpone that discussion to the next post.
- We discussed the above framework in the previous post [“Near-Death Experiences \(NDE\): Brain Is Not the Mind.”](#)
 - However, all those observations can be explained in Buddha Dhamma.

Explanation in Buddha Dhamma

2. There are THREE key points:

- Consciousness arises in the “mental body” (*manomaya kāya* or *gandhabba*), not in the brain. “Human life” is in the “mental body” and not in the “physical body.” The physical body is just a shell, energized by the mental body.
 - Memory records (*nāmagotta*) of ALL our past experiences are in *viññāṇa dhātu*. We can recall them from anywhere.
 - While the mental body (*gandhabba*) is inside the physical body, memories come to the *gandhabba* via the brain. While outside the physical body, *gandhabba* can directly recall memories.
- **“Mental body,” “*manomaya kāya*,” “*gandhabba*,” “*gandhabba kāya*” all mean the same.** I will use them interchangeably.

3. Our *nāma loka* (*viññāṇa dhātu*) is VERY DIFFERENT from our *rūpa loka*. Our *manomaya kāya* can access the memory records from anywhere. It is as if we are “carrying” all those records with us.

- **If the *gandhabba* is outside the physical body (as in NDE)** memories can be directly accessed and are much clear. This is why many NDE subjects say “their life events flashed vividly in their minds.”

- If the *gandhabba* is inside the physical body, then the brain plays a critical role in extracting memory records (*nāmagotta*) from the *viññāṇa dhātu*. When certain parts of the brain are damaged, the ability to recall memories — even from this life — stops.
- In the case of NDEs, the *gandhabba* comes out of the physical body accidentally. It happens only on occasion.
- However, there is a way to come out of the physical body with the mental body (*gandhabba*) willfully. Those who can cultivate (*Ariya* or *anāriya*) *jhāna* can come out with the *gandhabba kāya* while in the *jhāna*.

Just Like a Sword Is Pulled Out of a Scabbard (or Sheath)

- There are several *suttas* that describe pulling the *gandhabba kāya* out of the physical body at any time.
 - One must cultivate the fourth *jhāna* to the highest level to be able to do that. The “[WebLink: suttacentral: Sāmaññaphala Sutta \(DN 2\)](#)” (among a few other *suttas*) describes the process step-by-step. One starts with abstaining from immoral deeds, abstain from excessive sensual pleasures, and starts cultivating *jhāna* one by one until getting to the fourth *jhāna* and then being able to get into that *jhāna* instantly.
 - The English translation gives enough details: Section “4.3.3.2. Mind-Made Body” has the following description (I am slightly revising the translation in the above link):

“When their mind has become immersed in *samādhi* like this—purified, bright, flawless, rid of defilements, pliable, workable, steady, and imperturbable—they extend it and project it toward the “mental body” (*manomayaṃ kāyaṃ*). From this physical body, they (come out with) that “**mental body**”, **complete in all its various faculties, not deficient in any faculty**.”

- Then three analogies are provided to get an idea of how that *manomaya kāya* or *gandhabba kāya* comes out of the physical body: (i) a person was pulling out a reed from its sheath or (ii) drawing a sword out from its scabbard, and (iii) a snake shedding its skin. The following youtube video makes the third process clear.

[WebLink: suttacentral: How a Snake Sheds its Skin](#)

- Of course, you can easily visualize a sword being pulled out of its sheath/scabbard. I am not sure how many people have seen the first analogy.

“Miracles” Performed With the *Gandhabba Kāya*

- Once coming out with the *manomaya kāya* or *gandhabba kāya* the *yogi* can perform many types of “miracles.”

- One of those “miracles” of course is to be able to see and hear without physical eyes and ears **over long distances**. They can see and hear much better than with the physical body. That is what is meant by “From this physical body, they (come out with) that “**mental body**”, **complete in all its various faculties, not deficient in any faculty**” in the quoted verse in #4 above.
- Another is the ability to go through solid objects like ceilings and walls. Some NDE accounts verify that too.

- The critical point associated with that last ability is that the *manomaya kāya* or *gandhabba kāya* has only a trace of matter. **It is a “body that cannot be seen.”** It can go through walls, mountains, water, etc., as confirmed by some NDE accounts.

- For example, when a heart patient is having an NDE, they are floating above their physical body and no one in the room can see him/her.
- Another special aspect of such a *manomaya kāya* is the ability to travel anywhere just by thinking. Several NDE accounts say they were able to get to distant places “instantly.”

- For details on what other “miracles” are possible with a *manomaya kāya*, see “[Pāṭihāriya \(Supernormal Abilities\) of a Buddha – Part I](#)”

Kammic Energy Creates the Manomaya Kāya

6. **The most important thing to remember is that the *manomaya kāya* (*gandhabba*) is the essence of a human.** It is created by *kammic* energy at the moment of grasping the human *bhava*.

- That *gandhabba* consists of just six *suddhaṭṭhaka* (*hadaya vatthu* and five *pasāda rūpa*). But they are very special *suddhaṭṭhaka* WITH LIFE. **That is the essence of a living being and it CAN NOT be created anyway other than by *kammic* energy. That is why Artificial Intelligence (AI) is NEVER going to be a reality.**
- Human *bhava* can last many thousands of years. As we know, these days a physical human body can last only around 100 years or less. The initiation of a physical body is the *manomaya kāya* being pulled into a suitable womb. It merges with the zygote cell in the womb and grows into a baby by taking in food from the mother. Once born, the baby grows by eating food. Thus, the physical body grows due to food intake, just like a seed growing to a tree.

Gandhabba/Para Loka Concept Is Critical to Understand!

7. That *manomaya kāya* or *gandhabba* will last for thousands of years until that *kammic* energy is exhausted. During that time, the *gandhabba* can be born in “this world” (i.e., with a physical body) many times. When in a physical body, it is in “this world” or “*ayaṃ loka*.” In between two consecutive lives with physical bodies, *gandhabba* is in the “other/nether world” or “*para loka*” and is invisible to us.

- Note that not believing in “*ayaṃ loka*” and “*para loka*” are two of the ten types of *micchā diṭṭhi* that can lead to rebirths in the *apāyās*. See, “[WebLink: suttacentral: Pathamanirayasagga Sutta \(AN 10.211\)](#)”
- The following is the translation of the relevant verse: “They have the wrong view. Their perspective is distorted: “There’s no meaning in giving, sacrifice, or offerings. There’s no fruit or result of good and bad deeds. **This world is not real. There’s no afterlife (*para loka*).** There’s no obligation to mother and father. No beings are reborn spontaneously. And there’s no ascetic or *brahmin* who is well attained and practiced, and who describes **this world and afterlife (*para loka*)** after realizing it with their own insight. Someone with these ten qualities is cast down to hell. (Pāli verse in [Ref. 1.](#))”
- Thus, it is critical to understand that our physical bodies are secondary and the *manomaya kāya* or *gandhabba* is primary. Also see, “[Micchā Diṭṭhi, Gandhabba, and Sotāpanna Stage.](#)”

Mental Body (Gandhabba) Is Primary!

8. Human existence (*bhava*) is NOT limited to one life with a physical human body.

- Some children die very early, even within weeks. **Are their human existences limited to a few weeks or even just a day?**
- Human existence can last thousands of years. **Within that time, there is a single human *gandhabba*.** When one physical human body dies (in a few days to 100 or so years) that *gandhabba* comes out of the dead body. It will be pulled into another womb by *kammic* energy. While waiting for another womb, that *gandhabba* is not in “this world” but in “*para loka*.”
- Thus, there can be many births (*jāti*) with a human body within a single human existence (*bhava*.) That is the “*bhava paccayā jāti*” step in *Paṭicca Samuppāda*.
- At the end of the human *bhava*, that human *gandhabba* dies and that is the *cuti-paṭisandhi* moment, where a new existence (*bhava*) is grasped. It is very important to understand this relationship between *bhava* and *jāti*. See, “[Bhava and Jāti – States of Existence and Births Therein.](#)”

Experiences of Yogis Are Superior to those With NDE

9. People with NDE are average humans with many defilements. Thus, even when they come out of the physical body with the *gandhabba kāya* their abilities are much less. They just experience the unbelievable “relief/lightness” of being outside the heavy and pain-ridden physical body. That is why many of them say they were “in heaven” during the NDE.

- Those *yogis* who can come out of the physical body can stay in that state for long times. That is an optimum “*jhānic sukha*” discussed in *suttas*. But they need to successfully cultivate the fourth *jhāna* with SUPPRESSION of defilements (*anariya yogis*) or REMOVAL of defilements (at least at the *Anāgāmi* stage.)
- Therefore, only those *yogis* will be able to perform other types of “miracles” discussed in “[Pāṭihāriya \(Supernormal Abilities\) of a Buddha – Part I.](#)”
- One such miracle is to recall past lives.

10. Depending on how well the fourth *jhāna* is cultivated, they can recall many previous lives. The Buddha was able to look as far back as he wanted, and also could access the *nāmagotta* of other people. He provided accounts of the lives of many previous Buddhas in the “[WebLink: suttacentral: Mahāpadāna Sutta \(DN 14\).](#)”

- That is another indication that memories from past lives could not be in the brain of the current physical body.
- During the time of the Buddha, people did not know much about the brain. So, the *Tipiṭaka* does not have an explanation of memory recall with the aid of the brain. However, we can put together a reasonable explanation; see “[Patient H.M. – Different Roles of Brain in Memory.](#)”

9.6.1.3 Where Are Memories Stored? – Viññāṇa Dhātu

.4

February 21, 2022; revised February 28, 2023; April 6, 2023

Viññāṇa dhātu represents the *nāma loka*. It has no spatial location. That is why we can recall memories from anywhere.

Nāma Loka (Viññāṇa Dhātu) Is Different Compared to Rūpa Loka!

1. A question that comes up frequently is: “Where are our memories stored?” Are they stored in the brain?

- The Buddha could recall memories of previous births trillions of years past. See, for example, “[WebLink: suttacentral: Mahāpadāna Sutta \(DN 14\).](#)” Those memories of his birth in the distant past could not have been in his brain!
- Below, we will discuss scientific evidence that the brain cannot hold our memories.
- Then we will discuss the Buddha’s explanation of “memory storage/recall.” The brain plays a crucial role in recalling memories, but the memories are in our *nāma loka* (*viññāṇa dhātu*.)

- We are used to thinking in terms of the *rūpa loka* represented by the other five types of *dhātu* (*pathavi, āpo, tejo, vāyo, ākāsa*) where objects remain in specific locations. But *viññāṇa dhātu* has no specific location in space. We will discuss some unique properties of our *nāma loka* or *viññāṇa dhātu*.

Recent Evidence Against the “Brain as the Mind” Hypothesis

2. As discussed in several posts, scientific findings within the past 50 years have converged into THREE investigations that point to the fact that the brain is not the “seat of consciousness.” These findings indicate that while the brain plays a crucial role in consciousness, it is NOT where our thoughts arise, i.e., **the brain is not the mind!** In addition, our memories are not “stored” in the brain either.

ONE: Rebirth accounts by children have been common knowledge in many Asian countries for ages. Most people in those countries were Buddhists who accepted those accounts without question. Only recently, Western countries became interested after two significant developments: Systematic studies conducted by Professor Ian Stevenson ([Ref. 1](#)) and easy access to rebirth accounts via the internet. Also, see [“Evidence for Rebirth.”](#)

TWO: Accounts of Near-Death Experiences (NDE) which happen without brain activity. Some NDE accounts are by those declared dead for periods ranging from a few minutes to many minutes. They say that “they were outside of the physical body.” They were looking down at their bodies from the ceiling! **That means they saw without a brain** (while in their *manomaya kāya* or *gandhabba kāya*).

- We discussed the second category in recent posts; see [“Near-Death Experiences \(NDE\): Brain Is Not the Mind”](#) and [“Gandhabba \(Mental Body\) Separating from Physical Body in Jhāna.”](#)

THREE: Reports of “extraordinary memory recall” by several people. They can recall the past several years in great detail, and it is unlikely that the brain could have “stored” such minute details as a video recorder.

- Let us discuss briefly the third now.

Extraordinary Memories – Impossible to be Stored in the Brain!

3. Strong evidence has emerged recently that a “complete record” of one’s past exists somewhere, just like a complete record of an event is in a videotape. These studies started with Jill Price, who contacted a team of scientists in the early 2000s about her ability to recall anything from 1974 onwards. Here is a video of her interview with Diane Sawyer on an ABC program:

[WebLink: suttacentral: The woman that never forgets - Jill Price First Interview!](#)

- She says she can “see” what happened on any day in the past. She does not merely recall a “summary” or the gist of what happened. She can recount the whole episode in detail. **Even the date and time come out effortlessly. That is amazing!**
- **@2:50 minutes:** Diane Sawyer tests Jill’s ability to recall past events. She passes all tests.

4. Since then, several such individuals have been studied in detail. More details in [“Recent Evidence for Unbroken Memory Records \(HSAM\),”](#) [“Autobiographical Memory – Preserved in Nāma Loka,”](#) and [“Where Are Memories “Stored”? – Connection to Pañcakkhandha.”](#)

- **The brain cannot “store” that much information in such detail.** Scientists are unable to explain these fantastic accounts.
- The point is that even one such account of “detailed memory recall” (as by Jill Price above) is enough to negate the “memories in the brain” hypothesis. The American philosopher William James said, “If you wish to upset the law that all crows are black. it is enough if you prove ONE crow to be white.”

Viññāṇa Dhātu is Accessible from Anywhere in Ākāsa Dhātu

5. A mind has access to *viññāṇa dhātu* from anywhere.

- That is why whether we are on Earth, go to the Moon, or even to another planetary system at the other end of the universe, we will be able to recall memories and think just like while we are on Earth.
- The brain helps to extract memories from the *nāma loka (viññāṇa dhātu)* and pass them to *hadaya vatthu*, the seat of the mind.
- On the other hand, **the five physical senses help detect** localized, dense *rūpa*. Again, the brain plays a critical role in that process; see, “[Brain – Interface between Mind and Body](#).” **However, it is the mind that experiences all *rūpā* and memories.**

Our World – *Rūpa Loka* and *Nāma Loka*

6. Our world consists of *rūpa loka* and *nāma loka*. *Rūpa loka* consists of physical *rūpa* that we can see, hear, smell, taste, or touch. Other humans and animals are included in one’s *rūpa loka*. They are at specific locations in *ākāsa dhātu* (space.)

- The *nāma loka* includes the “mental aspects” or *nāma*, specifically *vedanā*, *saññā*, *saṅkhāra*, and *vipāka viññāṇa*.
- ***Kamma viññāṇa* (associated with *dhammā*) do not strictly fall into the *nāma* category but are also in *nāma loka (viññāṇa dhātu)*.**
- **We all share the same *rūpa loka*. However, each person has their own *nāma loka*, because *vedanā*, *saññā*, *saṅkhāra*, *viññāṇa* are one’s own.**
- Unlike *rūpa* (located in specific places in space), *nāma* in *nāma loka (viññāṇa dhātu)* can be recalled from anywhere in space (*ākāsa dhātu*).

Nāma and Two Types of *Rūpa*

7. The astronauts who went to the Moon could not see, hear, smell, taste, or touch anything that was not on the Moon. But they could recall their memories as if they were on Earth. That is because we can access *viññāṇa dhātu* from anywhere.

- Put another way, **dense (*sappaṭigha*) *rūpa*** (experienced by the five physical senses) are localized, but the ***nāma*** category (*vedanā*, *saññā*, *saṅkhāra*, *viññāṇa*) is NOT localized.
- In addition to the dense ***rūpā*** and ***nāma***, another category combine “pure *nāma*” (without energy) and *rūpa*. Those are the ***dhammā*** in “*manaṇca paṭicca dhamme ca uppajjati manoviññāṇam*” in the “[WebLink: suttacentral: Chachakka Sutta \(MN 148\)](#).”
- *Vedanā*, *saññā*, *saṅkhāra*, and “*vipāka viññāṇa*” belong to the ***nāma*** category. “*Kamma viññāṇa*” are ***dhammā*** (*anidassana/appaṭigha rūpa*.)
- In between such **dense (*sappaṭigha*) *rūpa*** and ***nāma***, there is ***anidassana/appaṭigha rūpa (dhammā)***. These ***dhammā*** are below the *suddhaṭṭhaka* stage and are *kammic* energies created by *kamma viññāṇa*; see, “[Dhammā, Kamma, Saṅkhāra, Mind – Critical Connections](#).”
- Both ***nāma*** and ***dhammā*** are not localized and **are in *viññāṇa dhātu***. See, “[What are *Rūpa*? – *Dhammā* are *Rūpa* too!](#)”

The Sixth Type of *Rūpa* in Buddha Dhamma

8. As discussed below, *nāma* (or “thoughts with *nāma*”) arise when an external *rūpa* comes into contact with an internal *rūpa*.

- Our thinking process always starts with an *ārammaṇa* that comes to a “sense door.” We discussed the five physical sense doors above.

- The sixth sense door is the mind itself. It can become active upon receiving a “*dhammā*” as we have discussed previously; see, for example, #6 in “[Summary of Key Concepts About Viññāna and Saṅkhāra](#)” and the two posts referred to there.
- *Dhammā* (with a “long a”) are memory records (*nāmagotta*) with embedded *kammic* energies. They are *kamma bīja* (*kammic* energies) that bring *vipāka*. The contact of such *dhammā* directly with the *hadaya vatthu* is described in the “[WebLink: suttacentral: Chachakka Sutta \(MN 148\)](#)” as “*manaṇca paṭicca dhamme ca uppajjati manoviññāṇaṃ*.” Also, see “[Chachakka Sutta – Six Types of Vipāka Viññāna](#).”
- Where are such *dhammā* or *kamma bīja* “stored”?

Dhammā Are in Viññāṇa Dhātu (or Nāma Loka)

9. Our world consists of six types of *dhātus*: *pathavi*, *āpo*, *tejo*, *vāyo*, *ākāsa*, and *viññāṇa*.

- We are familiar with the *rūpa loka* associated with the first five types of *dhātus*. “Things” made of *pathavi*, *āpo*, *tejo*, and *vāyo* are in specific places in *ākāsa dhātu* or “space.”
- The Buddha described a *nāma loka* associated with the *viññāṇa dhātu*. *Nāmagotta* and *dhammā* in the *nāma loka* do not have spatial locations. They can make contact with the *hadaya vatthu* from anywhere in space. We discussed that starting with #11 in the recent post “[Summary of Key Concepts About Viññāna and Saṅkhāra](#).”
- Let us think about that because it can provide more insights.

Difference Between “Dense *Rūpa*” in *Ākāsa Dhātu* and “*Nāmagotta/Dhammā*” in *Viññāṇa Dhātu*

10. To experience any of the five types of “dense *rūpa*” DIRECTLY with the five corresponding physical senses, we need to “bring them together” at the appropriate location.

- **However, we can recall any of the above experiences from anywhere.** Even if you go to the Moon, you can remember past experiences (*nāmagotta*). **Does that mean you took all those memories with you to the Moon?**
- Some scientists believe that all memories are in the brain. But despite intense effort within the past several decades, they cannot provide any evidence.
- Furthermore, there is an ever-increasing collection of evidence from the accounts of past lives and near-death experiences (see #2.) **Even if just one of those accounts is confirmed, we can rule out the “memory storage in the brain” hypothesis.**

Internal (*Ajjhatta*) and External (*Bahiddha*) *Rūpa*

11. There are five types of *rūpa* in the external world (*bahiddha rūpa*): *rūpa rūpa* or *vaṇṇa rūpa*, *sadda rūpa*, *gandha rūpa*, *rasa rūpa*, and *phoṭṭhabba rūpa*.

- Five types of subtle internal *rūpā* (*ajjhatta rūpa*) are associated with a living being for making contact with the five types of *rūpa* located in *ākāsa dhātu*. They are the five *pasāda rūpa* of *cakkhu*, *sota*, *ghāṇa*, *jivhā*, and *kāya*.
- In addition, as we discussed in #7, *dhammās* are *rūpa* below the *suddhaṭṭhaka* stage with only *kammic* energy. They are detected directly by the seat of the mind (*hadaya vatthu*.)
- *Hadaya vatthu* and a set of *pasāda rūpa* arise at the beginning of a new *bhava* (existence.)
- Note that the external *vaṇṇa rūpā* are experienced (or sensed) with the internal *cakkhu pasāda rūpa*; external *sadda rūpa* experienced with internal *sota pasāda rūpa*, etc.
- Both internal and external *rūpā* are made of the four fundamental elements (*pathavi*, *āpo*, *tejo*, *vāyo*.)

The uniqueness of the Set of Internal *Rūpa*

12. Internal *rūpā* are very special. They can be created only by *kammic* energy.

- Materialists think thoughts (*nāma*) arise in the brain. But they have not found ANY evidence of that despite intensive research over the past 60 plus years.
- **How can feelings of joy or sorrow arise in inert molecules, no matter how complex they become?**
- As I discussed in the first few posts in the “[Origin of Life](#)” series, even the first cells are created by *kammic* energy!

13. Note that *pasāda rūpā* are in the mental body or *gandhabba*. They cannot be seen even with the most powerful microscopes. They are each made of a single *suddhaṭṭhaka* (elementary unit of matter in Buddha Dhamma.) A *suddhaṭṭhaka* is a billionth times smaller than an atom in modern science.

- The eyes, ears, nose, tongue, and physical body only capture the external sensory inputs. Those signals get processed by the brain and transmitted to the mental body with the *hadaya vatthu* and a set of *pasāda rūpa*.
- *Nāma* (*vedanā*, *saññā*, *saṅkhāra*, *viññāṇa*) arise at *hadaya vatthu* in the mental body (*gandhabba*.) See “[Brain – Interface between Mind and Body](#).” It is not necessary to learn such details. But it is necessary to understand the difference between the sensory system in the physical body (eyes, ears, nose, tongue, body, and brain) and that in the mental body (*hadaya vatthu* and five *pasāda rūpa*.) **Thoughts (*nāma*) arise in the mental body.**

Contact Between External and Internal *Rūpa* Give Rise to *Nāma* (Mental Attributes)

14. ***Nāma* arises when an external *rūpa* comes in contact with an internal *rūpa*.** For example, when an external *rūpa* is seen with the *cakkhu pasāda rūpa*, *cakkhu viññāṇa* arises. That “seeing sensation” is felt with *vedanā*, *saññā*, *saṅkhāra*, and the overall experience is *cakkhu viññāṇa*. All five “physical senses” work the same way.

- By the way, those five types of sensory experiences (*cakkhu*, *sota*, *ghāna*, *jivhā*, and *kāya viññāṇa*) are *vipāka viññāṇa*.

[**Not included from here to before the References.**]

What Are *Nāmarūpa*?

Nāma loka includes two types of “*nāmarūpa*”:

- (i) The primary type of *nāmarūpa* is “in-between *nāma* and *rūpa*” and arises in *Uppatti Paṭicca Samuppāda*. **This is the “mental body” or “*gandhabba*” produced by *kammic* energy!**
- (ii) The second type belongs to the “*nāma*” category and arises in the *Idappaccayatā* PS.
 - In this post, we will discuss only to the first type of *nāmarūpa*.

15. **The set of *ajjhata rūpa* defines a living being. It is also the primary type of *nāmarūpa* because it can generate *nāma*!**

- “*Nāma*” arises at the “seat of the mind” (*hadaya vatthu*) with the help of the five *pasāda rūpa*. Each *pasāda rūpa* is a “doorway” to the *hadaya vatthu*. For example, *vaṇṇa rūpa* makes contact with the *cakkhu pasāda rūpa*, and that contact is transferred to the *hadaya vatthu*.
- We can see that this primary type of *nāmarūpa* has the remarkable ability to generate *nāma* or “mental attributes”: *vedanā*, *saññā*, *saṅkhāra*, and *vipāka viññāṇa*.

- **The *hadaya vatthu* and the five *pasāda rūpa* go by “mental body” or *gandhabba*.** It has the unique ability to generate *nāma* upon interactions with the five types of external *rūpa*.

16. Some living beings, particularly the *Brahmas* in the highest 20 realms, have only such a “mental body.” They do not have dense physical bodies like humans or animals.

- *Rūpāvacara Brahmas* in the first 16 *Brahma* realms have *hadaya vatthu* and two *pasāda rūpa* (*cakkhu* and *sota*.) Thus they can only see and hear.
- *Arupāvacara Brahmas* in the four *arūpāvacara Brahma* realms have only the *hadaya vatthu*. They cannot see or hear either. But they can think! That brings up another type of *rūpa* that we discuss now.
- The *hadaya vatthu* of any *Brahma* (or any living being) is unique; it is formed by the specific *kammic* energy that gave rise to its existence.

External *Rūpa* are Inert; Internal *Rūpa* Are Not Inert

17. The critical observation is that the set of internal *rūpa* (*hadaya vatthu* and the set of *pasāda rūpa*) are not inert. That set is the “mental body” or “*manomaya kāya*” or “*gandhabba*.”

- Those are the ONLY *rūpa* that can give rise to *nāma* (*vedanā, saññā, saṅkhāra, vipāka viññāṇa*.)
- The Pāli word “*nāma*” can mean “to bend/adjust” (in Sinhala, නමැනීම.) The internal *rūpā* generated by *kammic* energy is compatible with that existence.
- Our dense physical bodies (just like plants) are made of inert matter. “Consciousness” arises in the “mental body.”

18. For each human, *kammic* energy creates a *manomaya kāya* with a *hadaya vatthu* and five *pasāda rūpa*. Until it is pulled into a suitable womb, that *gandhabba* or *manomaya kāya* lives in the “*para loka*.” That means those of us in “this *loka*” (*ayaṃ loka*) cannot see them; they are in a “different *loka*” (*para loka*) that is unseen.

- While in *para loka*, a *gandhabba* can see and hear just like a *rūpāvacara Brahma*. Even though a human *gandhabba* has *ghāṇa, jivhā, and kāya pasāda rūpa*, those cannot make contact with *gandha, rasa, and phoṭṭhabba* until getting a physical body.
- A physical body starts when the *gandhabba* enters a womb and merges with a zygote. Then it grows inside the womb getting food from the mother. Once that baby leaves the womb, it grows into an adult eating food.
- Thus, our physical bodies are inert matter, like plants or rocks. They are all made of *pathavi, āpo, tejo, and vāyo*. **That is why it becomes inert as soon as the *gandhabba* leaves.**
- It is CRITICAL to have this basic understanding; see “[Micchā Dīṭṭhi, Gandhabba, and Sotāpanna Stage](#).”

9.6.2 Citta Vīthi – Fundamental Sensory Unit

January 6, 2021; revised January 10, 2021 (#9)

Citta vīthi is the smallest sensory unit that is experienced by the mind. It is a series of *citta* with 17 *citta* for a *pañcadvāra citta vīthi*. A *manodvāra citta vīthi* can have a variable number of *citta*.

Introduction

- This subsection is a continuation of the series of posts in “[Buddha Dhamma – A Scientific Approach](#).”
 - In this bottom-up analysis, we will get to the fundamentals of Buddha Dhamma. That involves tackling some basic features of *Abhidhamma*. Thus it will require some effort.
 - But it will be a rewarding experience for those who make an effort.

Buddha Dhamma can be understood via the Four Noble Truths or *Tilakkhaṇa* or *Paṭicca Samuppāda*. **If one understands any one of those three, one would understand all three.**

 - Our approach here is to look at the fundamental processes involved in a sensory event. That will provide invaluable insights to *Paṭicca Samuppāda*.

A Citta Lasts Only a Billionth of a Second

- What we call a “thought” is the cumulative effect of billions of *citta* flowing through a mind. The mind — which processes *cittā* — is the fastest entity in the world ([Ref. 1](#))
 - Furthermore, a single *citta* does not arise in isolation. A *citta* ALWAYS arise in a *citta vīthi* (series of *cittā*), some with 17 *cittā*; see below. Billions of such *citta vīthi* can flow through a mind in a second. What we “feel” is the cumulative effect of billions of such *citta vīthi*.
 - When exposed to a new *ārammaṇa* (new sensory input), the first series of *citta vīthi* arises without even being aware. We will start experiencing them within a short time, and when we do, we CAN have control over the SUBSEQUENT *citta vīthi* related to those that arose first.
 - But if we don’t pay attention, such *citta vīthi* can progress on their own and induce us to speak badly or even do bad things.
 - That is why the need to be “mindful.”**
 - For example, when someone says something nasty, we may automatically respond with bad speech or even bodily actions. Some people are prone to do that more than others. But ANYONE can cultivate mindfulness and be able to have control over one’s speech or actions. Of course, it will take time to cultivate mindfulness. Our analysis here will help understand that process too.

Roles of *Ārammaṇa* and *Gatī* in a Sensory Event

- To emphasize, we DO NOT have control over how *citta vīthi* first arise due to new sensory input. They arise AUTOMATICALLY based on two things: The particular *ārammaṇa* (sense object) and one’s habits/character (*gatī*.) Note that “*gatī*” is pronounced “*gathi*” as in “**Th**ailand.” That is easier to explain with a few simple examples.
 - Consider a husband who likes alcohol and his wife, who dislikes alcohol. A friend visits them and brings a bottle of alcohol.
 - That bottle of alcohol is the *ārammaṇa*. When the husband sees it, he feels happy. His wife sees the bottle at the same moment and becomes unhappy. Therefore, that same *ārammaṇa* induced different types of *citta vīthi* in the husband and the wife’s minds! That means different types of *cetasika* (mental factors) arise in the *citta* in those two types of *citta vīthi*.
 - Prior experiences of the husband with alcohol are “happy occasions” for the husband. He has a *gatī* to be attracted to alcoholic drinks. On the other hand, his wife cannot even stand the smell of alcohol, and she believes alcohol is bad to drink.

- **However, *gati* can change.** At a later time, the husband may give up alcoholic drinks after seeing the bad consequences of drinking. It is also possible that the wife may start associating with a group of friends who drink alcohol and gradually begin to form a liking for alcohol taste.
- See [Ref. 2](#) for details on the critical roles of *ārammaṇa* and *gati*.

One Sensory Unit (*Citta Vīthi*) At a Time – But They Flow Incredibly Fast

4. Let us consider that sensory event of “seeing a bottle of alcohol” when a friend brings that bottle. Let us consider the thoughts that flow through the husband’s mind at that time of the visit.

- At the time of seeing the bottle, he is likely to be talking to that friend. It appears that talking, hearing the friend’s words, and seeing the bottle in the friend’s hands all happen simultaneously.
- They may happen at ABOUT the same time. But even just two sensory events CANNOT happen simultaneously (say, hearing the friend say “hello” and seeing the bottle in his hands).
Hearing his friend say “hello” happens with a *citta vīthi* of 17 *cittā*. That auditory sensory input **comes through the ears**. It is a “*sotadvāra citta vīthi*.” The sensation of “hearing” or *sota viññāṇa* arises in such a *sotadvāra citta vīthi*.
- Seeing the friend with the bottle happens with a TOTALLY DIFFERENT *citta vīthi* triggered by the visual event **coming through the eyes**. It is a “*cakkhudvāra citta vīthi*.” The sensation of “seeing” or *cakkhu viññāṇa* arises in such a *cakkhudvāra citta vīthi*.

Mind Can Process Numerous *Citta Vīthi* Very Fast

5. A given *citta vīthi* is based on ONE *ārammaṇa*. Until that series of *citta* run its course, another *citta vīthi* WILL NOT start.

- In the above example, hearing the sound “hello” was based on one *citta vīthi*. The sight of the friend was with another *citta vīthi*. But since they happened so fast that one would think they happened simultaneously.
- **Countless *citta-vīthi* involving ALL SIX senses can flow alternatively in a split-second!**
- The mind is capable of “sorting out” different types of *ārammaṇa* (sights, sounds, smells, etc.) That is why the Buddha said that the mind is the fastest entity in the whole world.
- Because these *citta-vīthis* flow VERY FAST, and the mind can keep up with fast processing, **we feel as if they all happen simultaneously!** For details, see [Ref. 3](#).

Each “Data Packet” From a Sense Door Analyzed by a *Citta Vīthi*

6. As discussed in [Ref. 3](#), the following sequence of events happens before we experience a sensory input. Consider seeing the bottle of alcohol in the above example. (1) Eyes capture the scene of the friend holding the bottle. That captured frame is of about 10-millisecond duration. (2) That signal is sent to the brain via the optic nerve. (3) Brain processes that “data packet” and transfers to the *gandhabba*’s “invisible body.” (4) That signal is transferred to the “*cakkhu pasāda rūpa*.” (5) The *cakkhu pasāda rūpa* transfers the signal to the *hadaya vatthu* (seat of the mind.”)

- We also discussed the above aspects briefly in #7 and #8 of [Ref. 4](#). Now, let us see in a bit more detail what happens when the *cakkhu pasāda rūpa* hits *hadaya vatthu* and transfers the signal to *hadaya vatthu*.
- The best way to understand this process is to visualize the *hadaya vatthu* surrounded by five *pasāda rūpa*. Only one *pasāda rūpa* can “hit” (or make contact) with the *hadaya vatthu* at any given time.
- Of course, those entities (*pasāda rūpa* and *hadaya vatthu*) can never be seen, even by the most sensitive instruments. **Thus, the following is just an analogy to visualize the process easier.**

The “Bell Analogy”

7. Imagine a big metal ball (*hadaya vatthu*) surrounded by five smaller balls (five *pasāda rūpa*.) When one smaller metal ball hits the big metal ball, that big metal ball will “ring” (vibrate) a certain number of times. For a *pañcadvāra citta vīthi*, that number is ALWAYS 17.

- This is similar to the “ringing” of an old fashioned bell (like the Liberty Bell in Philadelphia) when hit by a metal object.
- **In fact, Buddhist temples have bells that were originally designed to convey this idea of a *citta vīthi*:** One pulls a rope tied to a small metallic ball inside a metal dome so that the metal ball hits the dome, and that emits a “ringing sound.”
- **At the very fundamental level, such a “contact” of a *pasāda rūpa* with *hadaya vatthu* is the only brief moment of sensory experience! (see [Ref. 5](#).)**
- The Pāli word “*phassa*” represents that “contact.”

Phassa – Contact Between a *Pasāda Rūpa* and *Hadaya Vatthu*

8. Therefore, that “contact” (*phassa*) DOES NOT happen, for example, between the physical eyes and a physical object (*rūpa*.) First, the brain processes that picture captured by the eyes and transfers it to the *cakkhu pasāda*; See [Ref. 4](#). It is only then the *cakkhu pasāda* transfers that signal to *hadaya vatthu* by “hitting” the *hadaya vatthu* (just like the dome of a bell getting hit by the mental ball.)

- **This is what is meant by the Pāli term “*phassa*.”** For example, in the Pāli verses, “*saḷāyatana paccayā phasso*” and “*phassa paccayā vedanā*” refer to the “contact of an external sensory input with the mind (*hadaya vatthu*)” and “that contact leading to experiencing the sensory input.”

Contact (*Phassa*) by a *Pasāda Rūpa* Makes *Hadaya Vatthu* Vibrate 17 Times

9. When the *hadaya vatthu* is “hit” by a given *pasāda rūpa* (i.e., when it transfers the sensory signal to *hadaya vatthu*.) that leads to 17 vibrations of *hadaya vatthu*; no more and no less. That is a ***citta niyāma*** or a universal law. **With each “vibration,” the *hadaya vatthu* generates a *citta*.**

- That is the source of a *citta vīthi* with 17 *cittā* (“thought moments”) in a sensory event involving *pañcadvāra* or the five physical doors (eyes, ears, nose, tongue, body.)
- **The duration of those 17 thought-moments is how long that sensory experience lasts in reality (see [Ref. 5](#)).** It is a billionth of a second! Of course, billions of such *citta vīthi* flow through the mind it appears to us as if we are continuously experiencing it. But the mind falls to the *bhavaṅga* state numerous times in between those *citta vīthi*.
- Note that a *pasāda rūpa* plays a role ONLY in signals coming through the *pañcadvāra* (five physical senses), i.e., the rule of 17 *cittā* per *citta vīthi* holds ONLY for *pañcadvāra citta vīthi*.

Manodvāra Citta Vīthi Do Not Have the 17-Citta Limit

10. When a *dhammā* comes to the mind or *hadaya vatthu* (via the *mana indriya* in the brain,) there is no *pasāda rūpa* involvement. That signal goes directly to *hadaya vatthu*. Furthermore, the “17-citta rule” does not apply to *manodvāra citta vīthi*. They can have ANY number of *citta*, usually more than 10 *citta*.

- For example, in *jhāna samāpatti*, *manodvāra citta vīthi* can run for many hours continuously (as long as one is in that *samāpatti*.)
- But when in a “regular *jhāna*,” there could be *pañcadvāra citta vīthi* running between *manodvāra (jhānic) citta vīthi*. That means one could hear external sounds, for example, while in a regular *jhāna*.

- But when in a *jhāna samāpatti*, that *jhānic citta vīthi* runs continuously. *Pañcadvāra citta vīthi* do not get a chance to “interfere.” Thus, when one is in a *jhāna samāpatti*, one is totally oblivious to what happens around him/her.

Citta Vīthi – Building Block of Thoughts

11. It is a good idea to get some familiarity with *citta vīthi*. That will make it easier to understand future discussions and get a deeper insight into *Paṭicca Samuppāda*. Further details on *citta vīthi* in the post, “[Citta Vīthi – Processing of Sense Inputs](#).”

- Of course, the descriptions of *citta vīthi* is not in the *Sutta Piṭaka* but the *Abhidhamma Piṭaka*. The easiest way to review my description above is to consult *Bhikkhu Bodhi's* “A Comprehensive Manual of Abhidhamma” ([Ref. 6.](#))
- However, the explanation in #6 - #8 is not in *Bhikkhu Bodhi's* book. That explanation was based on *Waharaka Thero's* discourses and my own incorporation of current scientific knowledge. I have explained that approach in “[Interpretation of the Tipitaka – Gandhabba Example](#).”

References

1. Buddha said it is hard to find any phenomena in this world that change faster than the mind: “[WebLink: suttacentral: Aṅguttara Nikāya \(1.48\)](#).”

The short sutta says: “*Nāhaṃ, bhikkhave, aññaṃ ekadhammampi samanupassāmi yaṃ evaṃ lahu-parivattaṃ yathāyidaṃ cittaṃ. Yāvañcīdaṃ, bhikkhave, upamāpi na sukarā yāva lahu-parivattaṃ cittaṃ*”ti.”

Translated: “I consider, *bhikkhus*, that **there is no phenomenon that comes and goes so quickly as *citta***. It is not easy to find an analogy (a simile) to show how quickly *citta* can change.”

2. “[Ārammaṇa Plays a Critical Role in a Sensory Event](#).”
3. “[Vision Is a Series of “Snapshots” – Movie Analogy](#).”
4. “[How Do We See? – Role of the Gandhabba](#).”
5. This is the very brief sensory experience that the Buddha explained to Bāhiya Dārucīriya with the verse, “*diṭṭhe diṭṭha mattaṃ bhavissati*.” It means, “**what is seen is seen only for a brief moment.**” *Mattaṃ* is “*mātra*” in Sinhala or Sanskrit or a “trace of something.” What we feel is the cumulative effect of such a large number of contacts that take place in a short time. **Yet, the “real experience” lasts only a billionth of a second!** See “[Does any Object \(Rūpa\) Last only 17 Thought Moments?](#)”
6. *Bhikkhu Bodhi*, “[A Comprehensive Manual of Abhidhamma](#).” This downloadable version is from <https://www.pariyatti.org>. The above material is discussed in detail in Chapter IV (p. 149.)

9.6.3 Does any Object (Rūpa) Last only 17 Thought Moments?

Revised October 29, 2015; April 5, 2016; August 18, 2019; February 18, 2020; December 19, 2020; re-written January 10, 2021; revised November 30, 2022

It is a *hadaya rūpa* (a series of vibrations of *hadaya vatthu*) that lasts only 17 thought moments. In contrast, some *rūpa* (like a star) can last billions of years.

Does Any Object Live Only For 17 Thought-Moments?

1. I have seen the following statement by many when discussing *Abhidhamma*: “Anything in this world lasts only a brief moment. Then it is re-formed, and the process continues ceaselessly.”

- Here is a direct quote from a couple of sources, one of which is a popular book on *Abhidhamma*: “..a *rūpa* is very short-lived – it endures only for 17 conscious moments. **Whatever object formed is almost instantly gone**”. Thus it is a widespread misconception.
- I Googled the following: “*Abhidhamma* ..a *rūpa* is very short-lived – it endures only for 17 conscious moments.” Here is the search result: [WebLink: google search: Abhidhamma ..a rūpa is very short-lived – it endures only for 17 conscious moments – Google Search](#). As you can see, several links make that statement.

The origin of Confusion

2. “Anything in this world” has a common name in Buddha Dhamma: a *saṅkhata*.

- A *saṅkhata* arises due to causes and lasts until those causes are there. Therefore, a *saṅkhata* has a finite lifetime. **That lifetime can range from a split-second (for thought) to billions of years (for a star like our Sun.)** Everything in this world is *saṅkhata*.
- The arising of a *saṅkhata* is due to *Paṭicca Samuppāda*. That is the “*udaya*” (or “arise”) part described in *udayavaya ñāṇa*.
- A *saṅkhata* can be STOPPED from arising IF the causes and conditions are removed, i.e., by stopping the *Paṭicca Samuppāda* process. That is “*vaya*.”

Stopping of *Paṭicca Samuppāda* with *Paṭiloma Paṭicca Samuppāda*

3. *Paṭiloma Paṭicca Samuppāda* is the “reverse” of the standard *Akusala-Mūla Paṭicca Samuppāda* process. Which means it is the way to *Nibbāna*. See, [“Paṭiloma Paṭicca Samuppāda – Key to Nibbāna.”](#)

- In other words, the standard *Akusala-Mūla Paṭicca Samuppāda* process leads to the continuation of the rebirth process. It is also known as the *Anuloma Paṭicca Samuppāda*. The opposite (or the stopping of the rebirth process via eliminating *avijjā*) is *Paṭiloma Paṭicca Samuppāda*. **That is the “destruction” or “vaya” of the process** that leads to the arising of all *saṅkhata* (including our future births.) [*paṭiloma* : [adj.] reverse; opposite; contrary.]
- Therefore, *udayavaya ñāṇa* is a deeper concept. It describes, in yet another way, how the rebirth process can be stopped. It is a bit more complicated and is discussed in the section “[Udayavaya Ñāṇa](#).”
- So, why do some people say that any *rūpa* (*saṅkhata*) has a lifetime of only 17 thought-moments (lasting only a split-second)?

4. It seems that this misinterpretation comes from taking the life of a “*hadaya rūpa*” and applying that to ANY *rūpa*!

- As we discussed in “[Citta Vīthi – Fundamental Sensory Unit](#),” the lifetime of “vibration” of the *hadaya vatthu* (seat of the mind) is 17 thought moments. In *Abhidhamma*, that vibration is called a ***hadaya rūpa***.
- First, let us clarify that a *saṅkhata* (ANY *rūpa* in the external world) may have a lifetime of billions of years! An example is any star.

Some *Saṅkhata* May Have Lifetimes of Billions of Years!

5. Different *saṅkhata* have different lifetimes. A fly may live for a few days, a human for about 100 years; a building may last hundreds of years, the Earth will last about 4-5 billion more years, etc. However, a *saṅkhata* will decay gradually over time.

- An inert object, like a building, will start slowly decaying. If a building lasts 1000 years, then each day, it will “decay” by a little bit, though decay will accelerate towards the end.

- From the present time to the final destruction (or until death in the case of a living being), any given *saṅkhata* will change. If we consider a baby born today, it will first grow to become a young person. Then it will gradually weaken while becoming an older adult and eventually die one day. Therefore, the critical aspect is not destruction but change. While the baby is growing, the cells in the body will multiply; but more cells will die in an older person's body.

A *Saṅkhata* Keeps Changing – Not “Appear and Disappear”

6. This constant change is not discernible to us on a real-time basis. A person does not age while we are watching him/her. But we can see the change over several years, especially if they are very young or over middle age.

- Mayflies have a lifetime of the order of a day (after the larval stage), and some live only several hours; here is a short video by the National Geographic channel:

[WebLink: youtube: The 24-Hour Life of the Mayfly | Nat Geo Wild](https://www.youtube.com/watch?v=24-Hour-Life-of-the-Mayfly)

- **Thus there is a HUGE difference between saying that a given material object CHANGES moment-to-moment versus saying that the object is “RECREATED” every 17 thought moments.**
- During an *Abhidhamma* discourse that I listened to, the presenter showed a pen and said that the pen was “destroyed and recreated” after 17 thought moments! Extending that logic, one could say that any entity (say, the Earth) vanished and is “recreated” within 17 thought moments! A complete misunderstanding of the *Udayavaya* process of a *saṅkhata*.
- The 17 thought moments' origin is explained in the post “[Citta Vīthi – Fundamental Sensory Unit](#).”
- As explained there, those 17 thought moments (or 17 *cittā*) arise when the **seat of the mind (*hadaya vatthu*)** vibrates 17 times when one of the five *pasāda rūpa* transfers a sensory input. Those 17 vibrations make up a “*hadaya rūpa*” in the *Abhidhamma* language. Note that a “*hadaya rūpa*” is different from “*hadaya vatthu*.” A *hadaya rūpa* arises every time the *hadaya vatthu* gets hit by a *pasāda rūpa* while transferring a sensory signal. See “[Citta Vīthi – Fundamental Sensory Unit](#).”

A *Hadaya Rūpa* Has a Life of 17 Thought-Moments

7. So, where does this incorrect statement come from? “.. *rūpa* is very short-lived – it endures only for 17 conscious moments. Whatever object formed is almost instantly gone.”

- Confusion arises when one does not understand the concept of a *hadaya rūpa*. A *hadaya rūpa* is generated in the *hadaya vatthu* by a sensory event through one of the five physical senses. **The lifetime of a *hadaya rūpa* is the time taken to experience that external sense event, which lasts 17 thought moments corresponding to 17 vibrations of *hadaya vatthu*.** During that time, an impression of the external *rūpa* is made in mind by a *citta vīthi*).
- See “[Citta Vīthi – Fundamental Sensory Unit](#)” and “[What is Mind? How do we Experience the Outside World?](#)”
- It is **WRONG** to take this time to be the lifetime of an external object (a *saṅkhata*).

Huge Difference Between a *Rūpa* (a *Saṅkhata*) and a *Hadaya Rūpa*

8. Therefore, It is critical to understand the difference between ANY *rūpa* (*saṅkhata*) and a *hadaya rūpa* that lasts only for a blink of an eye. **Also, a *hadaya rūpa* is different from a *hadaya vatthu*.** A *hadaya rūpa* is 17 vibrations of a *hadaya vatthu*.

- **The lifetime of a *hadaya rūpa* is just the time it takes for the mind to be AWARE of any *saṅkhata*.** We experience outside material things (*saṅkhata*) in our world through our five physical

senses. We see with our eyes, hear with our ears, smell with our noses, taste with our tongues, and touch with our bodies.

- During the lifetime of a *hadaya rūpa*, our minds only catch a brief (a thought moments worth) of the seeing, hearing, etc., experience at a time. It is not that the object lives a short time; it is just that we sense it only for a brief moment at a time!
- It is unnecessary to spend time on the concept of a *hadaya rūpa* unless one is deep into *Abhidhamma*. However, it is good to know about it because one may come across it and may confuse it with a *hadaya vatthu*.
- The main point is that any object in the world (conventionally called a *rūpa*) is a *saṅkhata*. Some *saṅkhata* (like the Earth or a star) have lifetimes of billions of years. That is not to be confused with the *hadaya rūpa* (or a *citta vīthi*) that lasts only 17 thought-moments!

Other posts in this subsection are at [“Understanding the Terms in Paṭicca Samuppāda.”](#)

9.6.4 Phassa (Contact) – Contact With Pasāda Rūpa

January 15, 2021; revised January 16, 2021

Phassa (Contact) comes in the middle of the *Paṭicca Samuppāda* (PS) process. However, PS processes start with “*saḷāyatana paccayā phasso*” or “an *āyatana* making contact.” That contact is between a *rūpa* and one of the six *āyatana* (*cakkhu*, *sota*, *gandha*, *jivhā*, *kāya*, *mano*.) At the fundamental level, **a rūpa makes contact with the mind** via one of the five *pasāda rūpa* or directly with the mind (*hadaya vatthu*.)

Importance of *Phassa* (Contact) in *Paṭicca Samuppāda*

1. The standard PS cycle starts with “*avijjā paccayā saṅkhārā*.” However, we do not just start generating *saṅkhārā*. Furthermore, *avijjā* is not there in a mind all the time. Only when we see, hear, taste, smell, touch, or think about an enticing “thought object” (*ārammaṇa*) that we start generating *saṅkhārā* due to *avijjā*.

- For example, if we **eat something tasty**, we may generate greedy thoughts (*saṅkhārā*) of eating more even if we are not hungry. If we **see an enemy X**, we may generate angry thoughts (*saṅkhārā*) about that person.
- Do those two “contacts” occur between the **food and the tongue/eyes and person X**?
- In other words, does the *vedanā* (feeling) of “good taste” arise in the tongue? Does “seeing of X” happen in the eyes? No.
- Some say those *vedanā* arise in the brain. But the brain is also made of inert atoms/molecules. Those cannot SENSE anything!
- Only a Buddha can accurately describe the actual sensing process. **That “experience” takes place in the mental body (*gandhabba*.)**

Contact (*Phassa*) Is Between a *Rūpa* and an *Āyatana* (*Pasāda Rūpa*)

2. When we see person X, for example, that is contact (*phassa*) between our internal *āyatana* (eyes or more correctly, *cakkhu pasāda rūpa*) and external *āyatana* (an image of person X in this case). That is the process stated in verse, “*cakkhuñca paṭicca rūpe ca uppajjati cakkhuviññāṇam*.” The word “*paṭicca*” here refers to that **contact (*phassa*)**.

- Due to that contact, a series of *cittā* flow in mind. That is a *citta vīthi*. We discussed that in detail in [“Citta Vīthi – Fundamental Sensory Unit.”](#) Also, see [Ref. 1](#).

- That leads to a mental phenomenon that we call consciousness (in this case, *cakkhu viññāna*). When we look at person X, we can instantly identify that person. **This is amazing because the image that falls in the back of the eye is tiny.** See [Ref. 1](#).
- Humans and animals generate such “awareness” or consciousness when seeing, hearing, smelling, tasting, touching, or thinking about an external *rūpā*.

Cakkhāyatana Is Cakkhu Pasāda Rūpa

3. *Cakkhāyatana* is not the eyes. The “seeing” takes place in the mind, and the “seat of the mind” is the *hadaya vatthu*. The image captured by the eyes gets transmitted to the *cakkhu pasāda rūpa*, which transfers the image to the *hadaya vatthu*. See the previous post, “[Citta Vīthi – Fundamental Sensory Unit](#).” It is a good idea to review that post.

- All five physical senses (*cakkhu, sota, ghāna, jivhā, kāya*) work that way. See [Ref. 2](#) for a *Tipiṭaka* reference.
- Memories and other concepts come to the mind via *mana indriya* in the brain. Those signals get directly transferred to the *hadaya vatthu*. We may get to those details in future posts.

What Is Meant by “*Cakkhu, bhikkhave, aniccaṃ*”?

4. Many *suttas* state, “*Cakkhu, bhikkhave, aniccaṃ*.” (and similarly for *sota, ghāna*, etc.) It should be clear that “*cakkhu*” does not refer to the physical eyes. The *cakkhu pasāda rūpa* in the *gandhabba* can last many thousands of years.

- After the human *bhava*, we get another *cakkhu pasāda rūpa* (with another mental body corresponding to the new *bhava*).
- However, what kind of *bhava* we get will NOT be due to our liking/expectations. **It will be due to our past *kamma* and will be dictated by the *upapatti* PS process; see [Ref. 3](#). That is what is meant by “*anicca*.”**

Vedanā and Saññā Can Arise Without a Mind

5. There are a couple of “mental factors” (or *cetasika*) that may arise without a “mind.” Crude versions of *vedanā* and *saññā* can arise even without a mind in “living things” (like plants) in the absence of a mind.

- *Vedanā* comes from (“*ve*” + “*danā*”) which means “විඳි දැනීම” in Sinhala. That means to “become aware of something.” **When we make contact with an “external *āyatana*” via our six senses, we become aware of that external *rūpā*; that is *vedanā*.** See, “[Vedanā \(Feelings\)](#).”
- At the fundamental level, *Saññā* means “recognition” of an object or a person, or a concept, for example. In general, it is the recognition of an “external *āyatana*” or “external *rūpā*.” See, “[Saññā – What It Really Means](#).”
- Therefore, plants and trees have a crude basic form of *vedanā* and *saññā*. **A plant can “feel” when sunlight falls on it (*vedanā*), and “recognize” (*saññā*) that as useful for its survival.**

Awareness in Living Things (Plants) and in Living Beings

6. Therefore, plants and trees also seem to be aware of the external world and can even respond in some cases. For example, a plant or a tree can “turn” towards sunlight. Their roots grow towards water sources and away from dry soil. One may ask: “Then how does a plant turn towards sunlight?.”

- Plants are like robots. A moving robot may have sensors that can detect obstacles in the way. That involves *vedanā* and *saññā* in the elementary sense.
- A robot has a built-in computer that can instruct how to go around an obstacle, for example.

- The working of a plant is very similar. A plant seed has necessary “programs” installed in its cells to deal with the external environment. We discussed this in the section on “[Origin of Life](#).”

Plants Do Not Generate *Saṅkhārā* and *Viññāṇa*

7. Therefore, some “live things” like plants can generate rudimentary versions of *vedanā* and *saññā*. However, a plant CANNOT generate *saṅkhārā* (thoughts) about those *vedanā* and *saññā*.

- *Saṅkhārā* arises via “*avijjā paccayā saṅkhārā*.” Based on *avijjā*, a mind generates defiled thoughts. Plants do not generate *saṅkhārā* and *viññāṇa* via “*avijjā paccayā saṅkhārā*” and “*saṅkhārā paccayā viññāṇa*.”
- Of course, totally inert things like rocks do not have *vedanā* and *saññā* either.

Living Beings Have All Four *Nāma Dhammā* (*Vedanā, Saññā, Saṅkhārā, Viññāṇa*)

8. Now, let us go back to the discussion in #1 above. A sensory contact (*phassa*) leads to some mental activity in a living being. We are happy to encounter “pleasing sights, sounds, etc.” and dislike the opposites.

- As we discussed in #1, if we **eat something tasty**, we may generate greedy thoughts of eating more even if we are not hungry. If we **see an enemy X**, we may generate angry thoughts about that person.
- First, in both cases, an idea about enjoying/disliking that contact comes to mind. That is the *mano saṅkhārā* stage.
- Then we start thinking about enjoying/getting rid of that sensory input. This is the *vacī saṅkhārā* stage, EVEN IF we are not saying anything out loud. Talking oneself — as well as talking — involves *vacī saṅkhārā*. In this case, two types of *cetasika* (*vitakka* and *vicāra*) are involved.
- If one really gets “attached” (via like or dislike) to that *ārammaṇa*, one may take physical actions. Such physical actions are done with *kāya saṅkhārā* that arise in mind.

Two Types of *Viññāṇa*

9. **In the beginning of a *cakkhudvāra citta vīthi***, we “see” the image. This is the *cakkhu viññāṇa*. It is a visual **sensing experience**, and it is a ***vipāka viññāṇa***. These *citta* DO NOT have *javana* power to create new *kamma*. They experience the presence of a *rūpa* (sight, sound, taste, etc.). Thus *cakkhu*, *sota*, *ghāṇa*, *jivhā*, and *kāya viññāṇa* are ALWAYS ***vipāka viññāṇa***.

- If we “attach” to what we saw/ate, etc., we start **generating *vacī* and *kāya saṅkhārā***. That is when we start acting with *avijjā* and generate ***kamma viññāṇa*** via “*avijjā paccayā saṅkhārā*” and “*saṅkhārā paccayā viññāṇa*.” Such *kamma viññāṇa* are EXCLUSIVELY *mano viññāṇa*. The unique aspect here is the presence of *javana citta*.
- That ***kamma generation*** happens with *javana citta* **in the second stage of a *citta vīthi***, as we will discuss. However, *mano viññāṇa* can be *vipāka viññāṇa* too (for example, when we recall memories).
- Such *javana citta* (generating new *kamma* via ***kamma viññāṇa***) are absent in the *citta vīthi* of *Arahants*. However, *Arahants* do experience the ***vipāka viññāṇa***. That is another way to see the difference between ***kamma viññāṇa*** and ***vipāka viññāṇa***.
- We will be able to clearly see that there are two types of *viññāṇa* when we analyze a *citta vīthi* in upcoming posts.

References

1. “[How Do We See? – Role of the Gandhabba](#),”

2. “[WebLink: suttacentral: Āyatanavibhaṅga](#)” explains a *āyatana* as follows:

Dvādasāyatanaṇi— cakkhāyatanaṇ, sotāyatanaṇ, ghāṇāyatanaṇ, jivhāyatanaṇ, kāyāyatanaṇ, manāyatanaṇ, rūpāyatanaṇ, saddāyatanaṇ, gandhāyatanaṇ, rasāyatanaṇ, phoṭṭhabbāyatanaṇ, dhammāyatanaṇ.

Tattha katamaṇ cakkhāyatanaṇ? Yaṇ cakkhu catunnaṇ mahābhūtānaṇ upādāya pasādo attabhāva-pariyāpanno anidassano sappaṭigho, yena cakkhunā anidassanena sappaṭighena rūpaṇ sanidassanaṇ sappaṭighaṇ passi vā passati vā passissati vā passe vā, cakkhumpetāṇ cakkhāyatanaṇpetāṇ cakkhudhātupesā cakkhundriyāmpetaṇ lokopeso dvārāpesā samuddopeso paṇḍarampetāṇ khetṭampetaṇ vatthumpetaṇ nettampetaṇ nayanāmpetaṇ orimaṇ tīrāmpetaṇ suñño gāmapeso. Idaṇ vuccati “cakkhāyatanaṇ”.

- The others are explained similarly.
- In the above verse, “*anidassano*” means “cannot be seen.” Thus, *cakkhāyatana* is not the physical eye. It refers to *cakkhu pasāda rūpa* in the mental body (*gandhabba*) that cannot be seen. As we know, in Out-of-Body Experiences, that *gandhabba* comes out of the physical body and can see without physical eyes. Details at “[How Do We See? – Role of the Gandhabba](#).”

9.6.5 Arising of the Five Aggregates With an Ārammaṇa

January 20, 2021; revised January 21, 2021 (#2, #6, #8, #9); October 3, 2021

Arising of the Five Aggregates (*pañcakkhandha*) happens with the creation of a “mental image” of a thought-object (“*ārammaṇa*.”) For example, when we see an object, the mind re-creates its own version of that object. When we taste the food, the mind prepares its own version of that taste. All six sensory inputs work that way. In other words, *pañcakkhandha* (“Five Aggregates”) are one’s own. **This is why different people respond differently to the same sensory event.** [*ārammaṇa* (where the mind dwells) is also called *ālambana* (to hang [hold] on to)]

- This is a critical post to understand. It may take repeated readings and understanding of previous posts in this series: “[Understanding the Terms in Paticca Samuppāda](#)” and the references provided here. Don’t hesitate to ask questions.

Paticca Samuppāda (PS) Cycles Start with an Ārammaṇa (Focus of Thoughts)

1. The standard PS cycle starts with “*avijjā paccayā saṅkhārā*.” However, we do not spontaneously start generating *saṅkhārā*. **We start generating *saṅkhārā* based on an *ārammaṇa* (thought object) that we like or dislike.**

- *Cakkhu viññāṇa*, for example, arises when *cakkhu* (*cakkhu pasāda rūpa*) makes contact (*phassa*) with the *rūpa* (an image of the object seen). In the *suttas*, that is stated as, “*cakkhuṇca paṭicca rūpe ca uppajjati cakkhu viññāṇaṇ*.” See the previous post, “[Phassa \(Contact\) – Contact With Pasāda Rūpa](#).”
- Different people respond differently to the same sensory input. **Furthermore, that response is swift.** We have discussed several examples in [Ref. 1](#).
- A new series of thoughts (*citta vīthi*) starts with a new *ārammaṇa*.

Figuring Out Which Sense Faculty (*Pañcadvārāvajjana Citta*)

2. For example, suppose person X is relaxing at his desk during his lunch break. His mind is not focused on any specific task. It is said to be in the “*bhavaṅga*” state. I have discussed the “*bhavaṅga*” state in “[State of Mind in the Absence of Citta Vīthi – Bhavaṅga](#).”

- Now, an unfriendly co-worker walks into the office. Person X looks up from the desk, sees the unfriendly co-worker. **There are two *cittas* involved here.** One is the *pancadvaravajjana citta* to investigate “which of the five senses causes the disturbance.” Then X realized that it is coming through the eye *indriya*, i.e., it is a *cakkhudvāra citta* giving rise to *cakkhu viññāṇa*.
- We discussed the basic aspects of a *citta vīthi* in the previous post; see [Ref. 2](#). **Up to now, the *citta vīthi* has gone through 5 *cittā* in a *citta vīthi* with 17 *cittā*.** “Releasing the mind from the *bhavaṅga* state” takes 3 *cittā*. **I will discuss that later.**
- So, the series of events start with “seeing the unfriendly co-worker.” That is a *cakkhu viññāṇa*. That happened without X taking the initiative. Any event that happens without taking the initiative is a *kamma vipāka*. Therefore, that *cakkhu viññāṇa* is a *vipāka viññāṇa*. His focus of attention was shifted due to the sight of the co-worker.
- That sight led to the arising of “bad thoughts with anger” in his mind instantaneously. He may then possibly react by saying something bad to the co-worker. That development (response to the *cakkhu viññāṇa*) **happens at the later stage of the same *citta vīthi*!**
- First, we discuss what happens with a single *citta* bringing a new sensory input, i.e., the *cakkhudvāra citta* giving rise to *cakkhu viññāṇa*.

Initiation of a Sensory Event Can be at One of Six Senses

3. In the above example, seeing the co-worker started with “*cakkhuṅca paṭicca rūpe ca uppajjati cakkhuvīññāṇam*.”

- Our attention abruptly changes when we encounter a new sensory input. That could come via any of the six senses, including the mind by itself. For example, we may be doing something, and all of a sudden, thoughts about an old friend may come to mind. That happens via “*manaṅca paṭicca dhamme ca uppajjati manovīññāṇam*.”
- Of course, switching among several different *ārammaṇa* can happen in rapid succession. When we watch a movie, we see the movie screen and hear the dialogues. They switch so rapidly that we feel that watching and hearing happen simultaneously! We discussed a simple example in #4 of [Ref. 2](#).

Two Possible Meanings of “*Paṭicca*”

4. Going back to our example, seeing the co-worker starts with “*cakkhuṅca paṭicca rūpe ca uppajjati cakkhu viññāṇam*.” Therefore, a *cakkhu viññāṇa* arises when a *rūpa* (the figure of the co-worker) makes contact (*paṭicca*) with *cakkhu pasāda rūpā*.

- That *cakkhu viññāṇa* arises with a single *citta*, which is one of the 17 *cittā* in a *citta vīthi*.
- By the way, “*paṭicca*” has TWO possible meanings, depending on the context. In the term “*Paṭicca Samuppāda*,” it means “getting attached willingly” or “*pati*” + “*icca*” (“*pati*” means to “bind.”) See [Ref. 3](#).
- However, in the above verse, *paṭicca* implies “**two entities (that are compatible) making contact.**” A *rūpa* does not “make contact” with one of the other four *indriya* like ears or nose. Similarly, a sound does not “make contact” with the eyes or the nose. The Buddha explained that a wick would soak up oil because wick and oil are compatible and will “*paṭicca*” ([Ref. 4](#).)

The Role of Universal *Cetasika*

5. A complex process happens in mind during the event of “*cakkhuñca paṭicca rūpe ca uppajjati cakkhu viññāṇam*.” **That process happens in that single *citta* which lives only for less than a billionth of a second.** Only a Buddha can discern something that can happen that fast. We can verify that to be true only by seeing that it is compatible/consistent with nature.

- That “contact” between “the image of a *rūpa*” and “*cakkhu pasāda rūpa*” is made by the “*phassa*” *cetasika* that arises with that *citta*.
- Then that “event” is registered in the mind as a *sukha*, *dukkha*, or *adukkhamasukha vedanā* (pleasant, unpleasant, or neutral feeling.) The “*vedanā*” *cetasika* is responsible for that.
- Then the mind recognizes the object with the “*saññā*” *cetasika*.
- During the SAME *citta* (where *cakkhu viññāṇa* arises,) a bit more complex process happens that involves the “*cetanā*” *cetasika*.

How Does Cognition/Recognition (*Saññā*) Happen In a Single *Citta*?

6. An unimaginably complex process occurs during that SAME *cakkhudvāra citta*, which lasts only a billionth of a second.

- The mind needed to compare it with previous experiences to identify that object. For example, recognition of the co-worker in the example discussed in #2 above requires comparing the image just received with one’s previous experiences. Otherwise, how does the mind recognize the person who walked in to be a co-worker and that one has had bad experiences with him in the past?
- That ultra-fast recognition (*saññā*) happens with the aid of the *manasikāra cetasika*. To get an idea of what happens when we recognize an object, see the video below (especially starting at 3:30 minutes):

[WebLink: youtube: What is a Thought? How the Brain Creates New Ideas | Henning Beck | TEDxHHL](https://www.youtube.com/watch?v=HnNjHhLHhHk)

7. At 3:30 minutes, we see a “face” made up of fruits and vegetables. Even though it is not a real human face, it takes us just a split second to realize that it represents a face.

- But as Mr. Beck points out, a computer will never recognize the human face’s representation depicted there.
- At 9:00 minutes, he starts a discussion on identifying a chair. Again, a computer runs into a problem identifying “less obvious” structures that can serve as chairs.
- In both these instances, what the computer is missing is *saññā* (loosely translated to English as “perception”). Even animals can recognize objects relevant to their survival. For example, a dog can instantly recognize its owners and any other pets living in the house. It can recognize foods that it likes, etc. See “[Saññā – What It Really Means](#).” Also, see [Ref. 5](#).
- During **that same *citta***, more processes happen to make that recognition possible.

Creation of an Image of the External Object in the Mind by the *Cetanā Cetasika*

8. For that recognition to occur, another important *cetasika* of “*cetana*” comes into play. **It CREATES a “*cittaja rūpa*” in mind (a *rūpa* created by the mind) according to one’s *gati/anusaya*.** This is a CRITICAL point that we will discuss in more detail. The “*saṅkhārā*” aggregate represents this process. For those familiar with *Abhidhamma*, this is where “*mano saṅkhārā*” arises AUTOMATICALLY.

- It is the *manasikāra cetasika* that helps incorporate one’s past experiences, future hopes, etc. (represented by *gati/anusaya*) and helps the *cetana* make that “*cittaja rūpa*” or the “mental picture.” **It is that “mental picture” that we “see” or “experience.”**

- There are two more *cetasika* that ALWAYS arise with any *citta*: *ekaggatā* and *jīvitindriya*. The *jīvitindriya cetasika* keeps the *hadaya vatthu* alive (with *kammic* energy). *Ekaggatā cetasika* keeps the mind on that particular *ārammaṇa* (in this case, a *rūpa rūpa* or a sight.)
- **The above description is at the heart of all mental phenomena**, i.e., creating a “mind-made image.” In the recent post, “[How Do We See? – Role of the Gandhabba](#),” we asked the question, “How do we see?” **The answer is in the above description.** Please re-read that post, and things will become more clear.

Connection to the Five Aggregates

9. The above description also explains how the five aggregates arise in that single *cakkhudvāra citta* representing the first instance of “experiencing a visual sensory input.”

- The “*rūpa aggregate*” is represented by the “*phassa*” *cetasika*.
- *Vedanā* and *saññā cetasika* generate the “*vedanā aggregate*” and the “*saññā aggregate*.”
- The *cetanā cetasika* plays a key role in generating “*saṅkhāra aggregate*” with the help of the other six *cetasika*. This is where the mind CREATES its own version of the sense object, a visual *rūpa* in this case.
- **We experience only a “mind-made image” of the external *rūpa* that is out there in the physical world.** Thus, the *viññāṇa aggregate* arises from the above processes’ overall effect.
- That is how the Five Aggregates arise with ANY sensory input via one of the six senses.

The Arising of the Five Aggregates (*Pañcakkhandha*) in a Single *Citta*!

10. That is how the five aggregates arise within that single *cakkhudvāra citta*. **The same process takes place for any *ārammaṇa* coming through any of the six senses.**

- The five aggregates arise due to the *cetasika* of *phassa*, *vedanā*, *saññā*, and *cetanā*. However, all SEVEN *cetasika* (*phassa*, *vedanā*, *saññā*, *cetanā*, *manasikāra*, *ekaggatā*, and *jīvitindriya*) are essential ingredients of ANY *citta*.
- **Those 7 *cetasika* arise with all *citta* and thus are universal (*sabba citta sādharmaṇa*) *cetasika*.**
- The above process takes place in all types of sensory experiences. The sound we hear is not the “real sound,” but it is “modified” according to one’s *gati/anusaya*. **The same is true for all 6 sensory experiences, including smells, tastes, touches, and concepts (*dhammā*).**

The Same Person Could be Perceived as Likeable or Unlikeable

11. Suppose two strangers (with opposite political views) watch TV in a bar while having their drinks. A famous politician comes on TV.

- At that moment, one person’s face gets darkened, and angry thoughts arise in him. Simultaneously, the other person’s face brightens up, and pleasant thoughts arise in him.
- How is that possible? It was the same picture that they were looking at.
- The reason is what we discussed above. The “mental image” formed in one person’s mind depicts a “bad person.” On the other hand, the other person’s mind had created a “bad picture” that gave rise to bad thoughts.
- We can think of many examples. I have discussed another example in [Ref. 1](#).

Viññāṇa Is a Magician!

12. The above description explains why the Buddha called *viññāṇa* a “magician” (Ref. 6). What we experience as *cakkhu*, *sota*, *ghāṇa*, *jivhā*, *kāya*, and *mano viññāṇa* DO NOT represent reality. It is like looking at the world with tinted glasses. Depending on the level of defilements in the mind is (i.e., *gati/anusaya*), the sensory experience is biased.

- This was explained with examples in the posts, “[Amazingly Fast Time Evolution of a Thought \(Citta\)](#)” (especially see #4 to #6) and “[The Amazing Mind – Critical Role of Nāmagotta \(Memories\)](#).” It is essential to read all relevant posts and understand these fundamental ideas.
- I will continue the discussion in the next post. Please make sure to read all the relevant posts. Otherwise, future posts will not make sense.
- The mind is an amazing entity. It is unbelievably fast. That is why we are fooled into thinking that there are fruitful things that will please us. However, the reality is different. There is unimaginable suffering hidden in enticing “sense pleasures” or *kāma rāga*.
- **That can be seen not with eyes but with wisdom.** That is the *yathābhūta ñāṇa*, the wisdom to “see” the real nature with wisdom. As we discuss further, that real picture will become clear.

4. In the “[WebLink: suttacentral: Saṃyojana Sutta \(SN 44.9\)](#),” the Buddha explains, “*Seyyathāpi, bhikkhave, telaṇca paṭicca vaṭṭiṇca paṭicca telappadīpo jhāyeyya*” OR “*Bhikkhus*, an oil lamp burns **in dependence** on oil and a wick.” An old fashioned oil lamp has a wick partially immersed in oil. That oil soaks the wick and gets to the tip of the burning wick, and sustains the flame. Therefore, oil and wick are compatible and will “*paṭicca*.” If one puts a metal rod in oil, the oil will not soak the metal, i.e., they are not compatible and thus would not *paṭicca*.
5. The above video is also discussed in “[Citta – Basis of Our Experience and Actions](#).” It is a good idea to read that post too.

9.7 Paṭicca Samuppāda – Overview

Revised November 4, 2018; August 27, 2022

1. Nothing can happen without a cause (“*hetu*” in Pāli or Sinhala). Everything happens for reasons or causes. Usually, many things simultaneously arise due to multiple causes.

- However, if one cause dominates, it appears to have happened due to one cause.

2. Due to our ignorance of the true nature of this world, we keep initiating new causes. If we do not add more fuel to the fire, the fire will extinguish when existing fuel runs out.

- *Akusala kammā* is fuel to the *saṃsāric* journey or the rebirth process.
- *Saṃsāric* journey does not end because we keep adding “fuel to the fire,” i.e., keep doing *akusala kamma*.

3. The *Paṭicca Samuppāda* (let us shorten it as PS) describes that process. It explains the arising of future births due to accumulated *kammic* energies.

- *Ācariya* Buddhaghosa understood only one aspect (the *akusala-mūla* PS) of the numerous applications of PS. Since Theravāda Buddhism adopted Visuddhimagga as the basis of Dhamma, this deep knowledge of PS went underground. [*ācariya* : [m.] teacher.]
- Many variations of PS can be found in the [WebLink: suttacentral: Pattecasamuppādavibhaṅga \(Vb 6\)](#) of the *Vibhaṅgappakarana* in the *Abhidhamma Piṭaka*.

4. Here are the main subsections in this section:

- Several PS cycles are discussed in this section: “[Patteca Samuppāda Cycles](#).” However, please read #7 below before going there.
- For those who want to avoid too many Pāli words: “[Patteca Samuppāda in Plain English](#).”
- What is meant by “*paccayā*” (conditions) and discussions on different types of conditions: “[Patthāna Dhamma](#).” An introduction to “*paccayā*” is in #5 below.
- “[Imasmim Sati Idam Hoti – What Does It Really Mean?](#)”

5. Even if there is a cause, its result (effect) does not manifest until the right conditions (“*paccayā*” in Pāli) appear.

- For details, see “[What Does “Paccayā” Mean in Patteca Samuppāda?](#).” We can get the basic idea from a few examples here.
- A matchstick has the potential to bring about a fire. But unless it is heated by striking on a hard surface, fire does not ignite.
- A bomb can explode and create much destruction. But it will not go off until triggered.
- We all have bad habits, but they do not manifest until triggered by an *ārammaṇa* or a “thought object” (a picture, sound, smell, touch, or thought). See “[Worldview of the Buddha](#).”

6. Therefore, if one acts mindfully, one can PREVENT many *akusala vipāka* and FORCE many *kusala vipāka*.

- We all have innumerable *akusala* accumulated in this *saṃsāra*;
- See, “[What is Kamma? Is Everything Determined by Kamma?](#),” and “[The Law of Attraction, Habits, Character \(Gati\), and Cravings \(Āsavā\)](#).”

7. It is necessary to understand that the terms in the standard PS cycle: “*avijjā paccayā saṅkhāra; saṅkhāra paccayā viññāṇa; viññāṇa paccayā nāmarūpa, nāmarūpa paccayā saḷāyatana, saḷāyatana paccayā phassa, phassa paccayā vedanā, vedanā paccayā taṇhā, taṇhā paccayā upādāna, upādāna*”

paccayā bhavo, bhava paccayā jāti, jāti paccayā jarā, maraṇa, soka-parideva-dukkha-domanassupāyāsā sambhavan'ti” are highly condensed.

- One could write a book on each term.
- At a minimum, one needs to get the basic idea of each keyword: *avijjā, saṅkhāra, ..bhava, jāti*.

8. Most modern texts in English translate those keywords to single words in English, which often leads to misinterpretations.

- **It is better to understand the meaning of each of those Pāli words and use those words. They can have different meanings based on the context.**

9. In the following, I will provide a few posts to read to get an idea of what those Pāli words mean. **The following terms are associated with the *akusala-mūla* PS.**

Avijjā: “[What is Avijjā \(Ignorance\)?](#).”

Saṅkhāra: In most cases, what comes to play is *abhisāṅkhāra* or “strong *saṅkhāra*.” But it is necessary to get the basic idea of “*saṅkhāra*” first: “[Saṅkhāra – What It Really Means](#).”

Viññāna: One of the complex Pāli words: “[Viññāna – What It Really Means](#).”

Nāmarūpa: Another complex word: “[Viññāna paccayā Nāmarūpa](#).”

Salāyatana: *Salāyatana* (six *āyatana*) are not six sense faculties, “[Nāmarūpa paccayā Salāyatana](#).”

Phassa: What comes into play in PS is not “*phassa*” but “defiled contact” or *samphassa*, “[Difference between Phassa and Samphassa](#).”

Vedanā: *Vedanā* in PS does not mean “feelings,” but “*samphassa jā vedanā*”: “[Vedanā \(Feelings\) Arise in Two Ways](#).”

Tanhā: “[Tanhā – How We Attach Via Greed, Hate, and Ignorance](#).”

Upādāna: “[Difference Between Tanhā and Upādāna](#).”

Bhava and Jāti: “[Bhava and Jāti – States of Existence and Births Therein](#)” and “[Gati to Bhava to Jāti – Ours to Control](#).”

- Of course, *gati* is another key Pāli word not discussed much these days. See “[The Law of Attraction, Habits, Character \(Gati\), and Cravings \(Āsava\)](#).”
- You can find more posts on each word using the “Search” box at the top. **Note:** only for online website.

10. It is clear from #7 above that all future suffering (*jarā, maraṇa, soka-parideva-dukkha-domanassupāyāsā sambhavan'ti*) will stop with the stopping of the *akusala-mūla* PS.

- **It is also clear that all future suffering ends when there is no rebirth, i.e., when the step “*bhava paccayā jāti*” stops and thus “*jāti paccayā jarā, maraṇa, soka-parideva-dukkha-domanassupāyāsā*” step stops.**
- As long as there are *jāti* (or births), the suffering will not end.

11. The *akusala-mūla* PS can be terminated by working on two main targets: *avijjā* and *tanhā*.

- It is pretty clear why we need to remove *avijjā*. If there is no *avijjā* (i.e., if one comprehends the Four Noble Truths), then an *akusala-mūla* PS will not even get started.
- *Tanhā* gradually reduces with changing our *gati*. That is discussed in the post: “[Difference Between Tanhā and Upādāna](#).”

9.8 How Are Paṭicca Samuppāda Cycles Initiated?

November 6, 2015; Major revision October 13, 2017; #12 added November 3, 2017; January 8, 2021; March 29, 2023

Paṭicca Samuppāda (PS) cycles have many varieties and can be analyzed in great detail reveal subtle aspects and clarify our understanding of the world we live in.

Two Categories of PS Cycles

1. There are two broad categories of PS cycles.

- i. The standard *Paṭicca Samuppāda* describes how our actions (*saṅkhāra*) lead to the generation of new *kammā*. Thus they could be called “*kammā* generating” PS cycles.
- ii. The other category of PS cycles is responsible for bringing in *kammā vipāka*, and thus could be called “*vipāka* generating” PS; this type of a PS cycle is labeled in the *Tipiṭaka* as an *avyākata* PS; *avyākata* means “*kammicaly* neutral”; not generating new *kammā*. The Pāli word is *avyākata*, and the Sinhala word is *avyākruta*. But in many places, it is written as *abyākata*.

Sensory Experience Starts With *Avyākata* PS

2. Everything that we INITIALLY EXPERIENCE is due to a *kammā vipāka* and is brought in by an *avyākata* PS. That PS process makes us see, hear, smell, taste, experience bodily sensations, and bring new thoughts to mind.

- However, the feelings (*vedanā*) that we experience due to such sensory inputs are not the same for different persons, except in the case of bodily sensations. Everyone feels the same if getting hit (pain), or getting a good massage (pleasure).
- The other five sensory inputs initially bring “neutral *vedanā*” as *vipāka*. However, mind-made *samphassa-jā-vedanā* are generated depending on the person. For example, a teenager may like a heavy metal song, but his grandfather may not. See “[Vipāka Vedanā and “Samphassa jā Vedanā” in a Sensory Event.](#)”
- In all cases, each person RESPONDS to the sensory input in one’s own way. This response may lead to new *kammā* and is described by the “*kammā* generating” PS cycles.

We Don’t Have Control Over *Avyākata* PS

3. We do not have control over the *avyākata* PS — which brings *kammā vipāka* by initiating new sense events; once started, they cannot be stopped. Even *Arahants* cannot avoid *kammā vipāka*.

- But the “*kammā* generating” PS cycles that arise as our response to such sense events can be controlled by us based on our *gati* (*saṃsāric* habits). This is the basis of *Satipaṭṭhāna/Ānāpāna* meditations.
- *Avyākata* PS bring *kammā vipāka* when suitable conditions are available; see, “[Anantara Samanantara Paccaya.](#)”

Avyākata PS May Lead to New *Kamma*

4. Now, depending on what we see, hear, etc due to a *kammā vipāka*, we MAY start making *saṅkhāra*, and a new “*kammā* generating” PS cycle may be initiated; then we make more *kammā vipāka*.

- For example, **when we see** an appealing object, we may generate *lobha* (greedy) thoughts (*apuññābhi saṅkhāra*); **when we see** a distasteful object, we may generate hateful thoughts (*apuññābhi saṅkhāra*). **If we see** a beggar on the street, we may generate *alobha* thoughts (*puññābhi saṅkhāra*), which may lead to a meritorious act (giving some money to that person).

- All those “seeing events” arose due to *avyākata* PS cycles. But those different responses, generating *saṅkhāra*, were done by “*kammā* generating” PS cycles, that operate based on one’s *gati* (*samsāric* habits), as will discuss below.

Not All *Avyākata* PS Lead to New *Kamma*

5. **ALL** our actions are initiated by *avyākata* PS cycles; but not all *avyākata* PS cycles lead to “*kammā* generating” PS cycles generating new *kammā*. You may want to think about this and see if it is true.

- Thousands of people see an item on display in a shop. Many glances at it and don’t give it another thought. Some will stop and take another look since they like it. There could also be someone who really wanted it, but may not have money, and even think about stealing it!
- There is no “fixed person with *avijjā*.” *Avijjā* can arise in any normal human (without *magga phala*), if the sensory input is strong enough! You may also want to read the post [“Self and no-self: A Simple Analysis – Do We Always Act with *Avijjā*?”](#)
- Whether *avijjā* arises depends on the particular sense input and the person (more correctly, the person’s *gati*).

6. We do not even notice most of these sense events. When we travel in a car, we see a million things, but only a few “catch our attention.” Only those few events lead to the initiation of “*kammā* generating” PS cycles.

- But even one initiation of a “*kammā* generating” PS cycle can, in turn, initiate many “follow-up” PS cycles. For example, while walking, we may see a house by the road we like (due to a *kammā vipāka*). We may get attached to it (form *taṇhā*), and then start thinking about building a house like that. Then we may remember a nice house that belongs to a friend, and then start thinking about that friend, which could lead to thinking about a common enemy. Suddenly, we have started a stronger “*kammā* generating” PS cycle that could lead to a worse *kammā vipāka*.
- This is the “wheeling process” that we discussed in the post [“Nibbāna – Is it Difficult to Understand?”](#) and many other posts; enter the keywords “wheeling process” in the Search box at the top right, and you will get many posts. Our *samsāric* journey is fueled by uncountable “*kammā* generating” PS cycles.

Kamma to *Vipāka* to *Kamma* – *Samsāric* Journey

7. This vicious cycle of “*vipāka*” leading to “*kammā*” leading to more “*vipāka*” is the process that binds us to the *samsāra* of endless rebirths, or perpetuates our “world” of suffering.

- The Buddha describes this as, “*kammā vipākā vaddanti, vipāko kamma sambhavo, tasmā punabbhavo hoti, evan loko pavattati.*”
- That means, “*kammā* lead to *vipāka*, *vipāka*, in turn, lead to *kammā* and thus to rebirth (*punabbhavo*), and that is how the world (existence) is maintained.”
- There “*sambhava*” is “*saṇ*” + “*bhava*,” or “adding more existences.” Also, “*loka*” is the world, and “*pavatta*” means “maintain.”

“Moral” Is Relative – Any Pothujjana Can Act Morally or Immorally

8. We usually call a person “moral” when he/she acts morally in most cases.

However, that does not mean that a “moral person” will not generate immoral thoughts at times. If a “tempting sense input comes in” via any of the six senses, he/she may act with *avijjā* and start an *Akusala-Mūla* PS.

- Similarly, one labeled as a criminal (because of his prior acts) may see someone in danger and act with kindness, initiating a meritorious deed.
- This is why the Buddha said there is no “unchanging self,” but there is no “self” either. What happens at a given moment depends on what kind of PS cycle is “triggered,” and the level of *avijjā* triggered. *avijjā* can range from *moha* (morally blind) to just not knowing the *anicca* nature.
- Any “average human (*pothujjana*) is considered to be “moral” might act with *moha* and commit a severely immoral act if the trigger was tempting enough.

Stopping the *Saṃsāric* Journey

9. The key point is that unless one has at least attained the *Sotāpanna* stage, one COULD act with *avijjā* at the level of *moha*, and generate *kammā* (*saṅkhāra*) that COULD generate *kammā bhava* corresponding to possible birth in the four lowest realms (*apāyā*).

- In other words, depending on the trigger, it is possible for the *pañcanīvaraṇa* to “cover the mind” and initiate strong *Akusala-Mūla* PS cycles for any human being not yet attained the *Sotāpanna* stage.
- For example, we have heard stories about people with “good moral backgrounds” committing rape, under conditions that led to *kāmacchanda nīvaraṇa* taking over their minds. *Kāmacchanda* comes from “*kāma + iccha + andha*,” where *iccha* is liking, and *andha* is blind; thus, *kāmacchanda* means “blinded by *kāma* or sense pleasures.”
- We have also heard stories about murders that were committed by “moral people” who were enraged by the sight of their spouse in bed with another person. Here the second *nīvaraṇa*, *vyāpāda*, covered their minds.
- Those two are the strongest *nīvaraṇa*, but we can think about cases when the other three also could lead to immoral acts: *thina middha* (frozen or lazy mind), *uddhacca kukkucca* (tendency to do lowly things with high-mindedness), and *vicikicchā* (tendency to do unwise things due to not knowing the *anicca* nature).

10. When one attains the *Sotāpanna* stage, the COARSE level of *pañcanīvaraṇa* (that can lead to rebirths in *apāyā*) is permanently removed.

- That is why **potent *Akusala-Mūla* PS cycles** — which could lead to rebirths in the *apāyā* — are not triggered for a *Sotāpanna*; see “[Key to Calming the Mind – The Five Hindrances](#).”
- One’s *gati* permanently changes with *magga phala*. More changes happen at higher *magga phala*.

More Information

11. Different types of PS cycles are discussed in: “[Paṭicca Samuppāda Cycles](#).”

- The *avyākata* PS is discussed in the post, “[Avyākata Paṭicca Samuppāda for Vipāka Viññāna](#).”
- The “*kammā* generating” PS processes can be divided into two broad categories again: those generating “bad *kammā*” and “good *kammā*”: “[Akusala-Mūla Paṭicca Samuppāda](#)” and “[Kusala-mūla Paṭicca Samuppāda](#).”
- Those “*kammā* generating” PS processes where one can see the consequences during this life itself are discussed in “[Idappaccayatā Paṭicca Samuppāda](#).”
- There can be many other types too. But one can get a good idea of how PS works in different situations and can be grasped by understanding those key processes.
- A bottom-up approach to PS processes is discussed in “[Understanding the Terms in Paṭicca Samuppāda](#).”

12. Finally, there is another important way that we start generating new *kamma*. This is when we “get random thoughts coming to our minds that get us started on a pleasurable activity.”

- For example, we may be doing something, and all of a sudden, we get a thought about watching a movie or even start thinking about an enemy and what can be done to him/her. These are initiated by “*manañca paṭicca dhamme ca uppajjati manoviññāṇam*,” where *dhammā* coming to our minds; see, “[What are rūpa? – Dhamma are rūpa too!](#).”
- These are also *kamma vipāka*. These are more common than *vipāka* coming through the other five senses; for example, just seeing an enemy by chance, hearing something one likes, etc.
- In either case, we must always be mindful and catch such “new *kamma* generations.” This is the key to *Ānāpāna/Satipaṭṭhāna Bhāvanā*.

9.9 What Does “Paccayā” Mean in Paṭicca Samuppāda?

Revised April 27, 2016; August 25, 2019

Before we start discussing the various forms of *Paṭicca Samuppāda* (PS), it is essential to be clear about what is meant by “*paccayā*” (pronounced “pachchayā”). *Paṭṭhāna Dhamma* provides a complete description. We will introduce the concept here.

Introduction

1. The PS cycle starts as: “*avijjā paccayā saṅkhāra, saṅkhāra paccayā viññāṇa, viññāṇa paccayā nāmarūpa, nāmarūpa paccayā saḷāyatana,.....*”

- And since PS describes the “cause and effect” in Buddha Dhamma, most people think “*avijjā paccayā saṅkhāra*” means “*avijjā* causes *saṅkhāra*” or “ignorance causes one to acts that generate bad *kamma*.”
- Even an ordinary person has *avijjā*, he/she will not ALWAYS act accordingly; most of the time, people act appropriately or morally. However, as long as *avijjā* is there, at times one WILL likely act with *avijjā* and do inappropriate or immoral things.
- Similarly, many people think that “*saṅkhāra paccayā viññāṇa*” means “*saṅkhāra* causes *viññāṇa*” or “bad *kamma* lead to corresponding consciousness”, and so on down the whole PS cycle.
- As we discuss below, the steps should be translated as, “with *avijjā* (ignorance) as **condition**, *saṅkhāra* arise”, “with *saṅkhāra* as **condition** *viññāṇa*, etc.

Key Role Of Conditions

2. It will clarify a lot of things down the line if one understood that PS does not refer to a “direct link” between causes and effects. Just because we have done many good/bad *kamma* (generated via *saṅkhāra*) DOES NOT mean they ALL lead to *kamma vipāka*.

- That was pointed out in item #5 in the previous post “[Paṭicca Samuppāda – Overview](#).” But in case the point was missed, I wanted to emphasize the point in this post.
- Any effect **must have** a cause. But there can be possible causes without leading to any results. Otherwise, *Nibbāna* would not be possible. That needs some contemplation, and I will give some examples below.
- However, without suitable CONDITIONS, causes (*kamma*) cannot automatically bring results (*vipāka*).

3. The easiest way is to consider the following example: A seed contains necessary causes (ingredients) for bringing up a new tree. But just because a seed is there, a tree is not going to come to existence. If the seed is in a cool, dry place, one could keep it that way for a long time. Or one could burn or crush it, and it will not bring up a tree.

- SUITABLE CONDITIONS must be present for causes to bring about corresponding effects. That is what *paccayā* means.
- When such suitable conditions are present, causes WILL bring about corresponding effects. Thus when some effect is brought about, it is called “*paccuppanna*”, i.e., born (“*uppanna*”) via suitable conditions (“*paccayā*”); of course, if the root causes must be there, to begin with).
- In the above example, the seed could germinate and grow to a tree if one plants that seed (**cause**) in the ground and provides water, nutrients, and sunlight (**suitable conditions**).

Not All *Kamma* Lead to *Kamma Vipāka*

4. When causes are there, corresponding effects (results) are **LIKELY** if suitable conditions for the effects of taking place. **That is why *kamma* is not deterministic**; see, “[What is Kamma? – Is Everything Determined by Kamma?](#).”

- However, the critical point in PS is that the effect – IF AND WHEN IT HAPPENS – is in accordance with the cause, and also the **CONDITIONS** was one's choosing: “*Pati ichcha*” leads to “*sama uppāda*” or simply: “when one gets attached, that leads to a new birth of similar characteristics.” **If and when the causes bring forth the consequences, they will be of the similar nature.**

5. It is not necessary to get into further details unless one is interested in “digging deeper”, but there are 24 “*paccayā*” or “conditions” that can actually cause the effect to materialize; these are “*Paṭṭhāna Dhamma*”).

- Let us briefly discuss three such *paccayā*, “*hetu paccayā*”, “*anantara samanantara paccayā*”, and “*aññamañña paccayā*” to see what happens.

Three Important Conditions (*Paccayā*)

6. Nothing happens without a root cause or a *hetu* (pronounced “*hāthu*”); see the pronunciation key in “[Pāli Glossary \(A-K\)](#) and [Pāli Glossary \(L-Z\)](#)”).

- For example, a bomb causes damage because of the explosives in it; but someone has to trigger it to go off. If the bomb sits somewhere for a long time, its propellants may degrade, and then the “cause” may disappear; most *kamma* seeds are like that too.
- Thus, without the root cause, there will not be an explosion. **That is “*hetu paccayā*.”**

7. My favorite example of the “*anantara samanantara paccayā*” is the germination of a seed that I discussed above in #3. Just because there is an apple seed, it will not cause an apple tree to appear.

- An apple seed will stay without germinating for many years in a cool, dry place. But if planted in the ground with water and sunlight present, it will sprout and give rise to an apple tree; see, “[Anantara and Samanantara Paccaya](#)” for details.
- Of course, just like with the bomb, if the apple seed sits there for too long, it may lose its potency and may not yield an apple tree at all. Thus the *hetu paccayā* must always be satisfied.

8. The third one, “*aññamañña paccayā*,” means dependent on each other: For example, *viññāṇa* and *nāmarūpa* depend on each other:

- It usually is stated that “*viññāṇa paccayā nāmarūpa*” or “depending on the *viññāṇa*, *nāmarūpa* arise.” For example, *viññāṇa* of the *cuti citta* at the moment of death causes a matching *nāmarūpa* to rise in the next birth: a hateful thought could lead to birth in the *niraya* or the animal realm.
- However, *viññāṇa* in turn, depends on the type of *nāmarūpa*: with the *nāmarūpa* of an animal, it is not possible to get into *jhāna*. Only certain types of *nāmarūpa* can “support” certain types of *viññāṇa*.
- Depending on the situations one or more of 24 *paccayā* (or conditions) can simultaneously come into play. We will discuss this in future posts.

Paṭṭhāna Dhamma

9. I just wanted to give a brief introduction to the complex “*Paṭṭhāna Dhamma*” which describes 24 such “*paccayā*” involved in *Paṭicca Samuppāda*. In other words, cause(s) and effect(s) have complicated relationships. We can only discern significant relationships. Only a Buddha can sort out all such complexities.

- But there is no need to analyze everything in great detail to understand the message of the Buddha. One can become a *Sotāpanna* just by comprehending the *Tilakkhaṇa*: *anicca*, *dukkha*, *anatta*.

10. So why am I also providing information on these complex topics? It is for three reasons:

- First, it helps build *saddhā* (faith) in Buddha Dhamma. Anyone who takes time to examine these concepts can see that it provides a COMPLETE explanation for everything that we experience and more.
- Secondly, it is intellectually satisfying to see how all pieces nicely fit into the “big picture”: I hope I have been able to give the sense of joy that I have experienced in “seeing how these pieces fall into place.”
- Finally, this “self-consistency” is critical in the process of sorting out which version of Buddha Dhamma is the correct one. As the Buddha himself pointed out, any version that is not self-consistent should be discarded; see, “[Saddharma Pundarika Sutra \(Lotus Sutra\) – A Focused Analysis](#).”

Next in the series, “[Anantara and Samanantara Paccaya](#)”, ..

9.10.1 Avyākata Paṭicca Samuppāda for Vipāka Viññāna

October 17, 2017

1. First, a word about the nomenclature: The Pāli word is *avyākata* (or *abyākata*) and the Sinhala word is *avyākṛuta*. It means “not designated as *kusala* or *akusala*, i.e., **kammically neutral**”: there are no *javana citta* involved that generate *abhisankhāra*.

- *Kamma vipāka* are kammically neutral. But based on those *kamma vipāka*, we initiate new *kamma*; see, “[How Are Paṭicca Samuppāda Cycles Initiated?](#).” I recommend reading that first, before continuing on this post.
- Both categories — *kamma vipāka* and *kamma* generation — can be described by *paṭicca samuppāda* (PS).
- **Another key point I want to point out is that *avyākata* PS cycles NEVER start with a *pabhassara citta* [Radiant Mind]; see below.**

2. Past *kamma vipāka* bring sense inputs via the six senses and IF we get attached — *taṇhā* — to those sense inputs, THEN that leads to new *kamma* by us. That is why it is a never-ending process, until one attains *Nibbāna*. After the *Arahanthood*, one will still experience such *kamma vipāka*, but WILL NOT get attached to them, i.e., no new *kamma* will be generated.

This cyclic process can be described in three steps:

- i. One sees, hears, smells, tastes, makes body contacts, or a “*dhamma*” comes to one’s mind. These do not “just happen”; they happen due to reasons (causes). They come about due to *kamma vipāka*, and those thoughts that arise due to them are called ***vipāka citta* OR *avyākata citta***, since they are *kammically neutral*.
 - ii. Then, based on one’s *gati* (pronounced “gathi”), *āsava*, *anusaya*, one’s mind may automatically get interested in a sense input (called an *ārammaṇa*), and may get attached to that sensory input. This happens within a billionth of a second and **we DO NOT have control over that initial response either; *mano saṅkhāra* are generated AUTOMATICALLY in one’s mind**. These are also part of the ***avyākata citta* since they arise AUTOMATICALLY within the same *citta vīthi***.
 - iii. **IF we one gets attached, then one starts generating new *kamma* by thinking CONSCIOUSLY about that sense input (generating *vacī saṅkhāra*), i.e., one starts “wheeling around” accumulating “*saṇ*” that contribute to new *kamma*; see, “[Saṅkhāra, Kamma, Kamma Bīja, Kamma Vipāka](#).” That new *kamma* can get stronger if we may also start doing *kāya saṅkhāra* via speech and bodily actions.**
3. All those three steps may start even before our minds register that we have started accumulating new *kamma*. This is because *citta vīthi* are very fast, and all those happen within a single *citta vīthi*; see below. But if we are mindful, we can “catch” such “wheeling around” within a few seconds and stop just the *apuññābhi saṅkhāra* (we should not stop *puññābhi saṅkhāra* or moral thoughts).

- But that requires careful monitoring of our “automatic responses” to such sense inputs; this is what is called “being mindful.” With practice, one can “catch” them quickly and stop bad thoughts/speech/actions.
- If we keep doing that, then OVER TIME, our *gati* will change for the better, and our attachments to “bad things” will fade away; see, “[Difference Between Tanhā and Upādāna](#).” What is described in that post is the basis of *Satipaṭṭhāna/Ānāpāna Bhāvanā*. If one can grasp this concept, and implement it diligently over a few months, one will be able to see for oneself the benefits!
- Also see, “[Gati, Bhava, and Jāti](#)” to read about the very important concept of *gati*. **It is not correct to say we have a “self” or “no-self”; we just have *gati* that can be changed.**
- That is the basis of *Satipaṭṭhāna/Ānāpāna bhāvanā*. If one can grasp this concept, and implement it diligently over a few months, one will be able to see for oneself the benefits!
- One can try it with “bad habits” (smoking, drugs, over-eating, etc) first to see the power of it, and then extend to other *dasa akusala*. This is also the way to *Sotāpanna* stage because then one will be able to grasp *Tilakkhaṇa* too.

4. It is very important to understand the above steps, and the post “[Tanhā – How We Attach Via Greed, Hate, and Ignorance](#)” is a necessary first read too. What happens is explained in a bit more detail in “[Vedanā \(Feelings\) Arise in Two Ways](#),” “[Kāma Assāda Start with Phassa paccayā vedanā or Samphassa Jā vedanā](#),” and has been discussed in a more fundamental way in the subsection: [Living Dhamma – Fundamentals](#).”

- Grasping this cyclic process of how we have traversed this suffering-filled rebirth process can be quite helpful but one must be willing to spend some time on those posts.

5. All PS processes can be broadly divided into three categories:

- i. What we will discuss in this post is how past *kamma vipāka* bring in sense inputs via *avyākata* (Sinhala: *avyākruta*) PS process, and also automatically generate *mano saṅkhāra*.
- ii. Then *akusala-mūla* PS processes may contribute to generating new *kamma* that extends the rebirth process. These also start within seconds, but as mentioned above, we can catch and stop them if we are mindful (*Satipaṭṭhāna/Ānāpāna*).
- iii. The *kusala-mūla* PS process describes how one can accumulate new “good *kamma*” that will eventually help us attain *Nibbāna* by following the Noble Path. If the *kamma vipāka* generated such a “good PS” process, we should cultivate those. That is also part of *Satipaṭṭhāna/Ānāpāna*.

The *akusala-mūla* and *kusala-mūla* PS processes are discussed in: “[Paṭicca Samuppāda Cycles](#).” So, this post on *avyākata* (*abyākata* in Sanskrit) (Sinhala: *avyākruta*) PS process will complete that subsection.

6. Now we can make the connection between the categories in #2 to categories in #5.

- The sense inputs initiation #2 (i), and the initial response to it #2(ii), are generated by the *avyākata* PS process of #5(i).
- Our CONSCIOUS response to those sense inputs in creating new *kamma* (*apuññābhisaṅkhāra* or *puññābhisaṅkhāra*) in #2(iii), are carried out by the two kinds of PS processes in #5(ii) and #5(iii).

7. This *avyākata* PS process is not discussed in current *Theravāda* texts including *Visuddhimagga*. It is of course in the *Tipiṭaka*, and only the Pāli version is available at: “[WebLink: suttacentral: Paṭicca Samuppāda Vibhaṅga \(Vb 6\)](#)” (Section 2.11 on *Abyākata Niddesa* is about three-quarters of the way down from the top).

- I have not seen any current texts or internet sites in English that describe the *avyākata* PS process. But is needed to complete the picture of how *kamma vipāka* bring in sensory inputs to us AND initiate new *kamma*.

8. Here is the initiation of the *avyākata* PS process per *Tiṭṭaka* reference in #7 above: “..*vipākam cakkhuvīññāṇam* uppannam hoti *upekkhā saḥagatam rūpārammaṇam*, tasmīṃ samaye *saṅkhāra paccayā vīññāṇam*, *vīññāṇa paccayā nāmaṃ*, *nāma paccayā chaṭṭhāyatanaṃ*, *chaṭṭhāyatana paccayā phasso*, *phassa paccayā vedanā*, *vedanā paccayā bhavo*, *bhava paccayā jāti*, *jāti paccayā jarāmaraṇam*. *Evametassa kevalassa dukkhakkhandhassa samudayo hoti*.” [Weblink: [suttacentral: 2.11. Abyākataniddeśa 2.11 Ahetukakusalavipākacitta 2.11.1.1 Ahetukakusalavipākacitta 2.11.1.1.1. Cakkhuvīññāṇacitta](https://suttacentral.net/2.11.Abyākataniddeśa.2.11.Ahetukakusalavipākacitta.2.11.1.1.Ahetukakusalavipākacitta.2.11.1.1.1.Cakkhuvīññāṇacitta)]

- We can translate the initial part of this verse as, “..when a *rūpārammaṇa* (seeing an object) gives rise to a *vipāka cakkhu vīññāṇa* with **neutral feelings** (i.e., just seeing)...”
- Thus, “seeing” event is a neutral *vedanā*, as are all *vipāka* that come through all senses except the body: Only *kāya vīññāṇa* — coming through the physical body — can directly generate *sukha* or *dukkha vedanā* due to *kamma vipāka* (as in getting hit by something or getting a massage).
- The other five types sensory inputs, at the moment of receiving, generate only neutral feelings (*upekkhā vedanā*). This is an important point to grasp. All these like seeing, hearing, could generate “good or bad feelings” based on our *gati*, and those secondary feelings arise moments later (even though we cannot perceive that because it is so quick).
- But we can clearly see that, for example, some may generate “good feelings” and others may generate “bad feelings” upon hearing the same song. Seeing the same politician may cause “good feelings” in his supporters and “bad feelings” in those in the opposite party, and neutral feelings in others.

9. Unless it is pre-planned, a seeing event (any sense event) is initiated by a *kamma vipāka*. (However, going to see a movie is a deliberate action, in which case the real starting point is an idea or a *dhamma* coming to the mind as a *kamma vipāka*; think about it!)

- Again, it is important to grasp that a seeing event itself is a neutral event (*upekkhāsaḥagatam rūpārammaṇam*) EVEN IF it is the seeing of a good object or a bad object. “Good or bad” is a relative thing depending not on the object but only on one’s *gati*, as explained in #8 above.
- One way to think about it, *this initial cakkhu vīññāṇa* is just the “seeing”, i.e., it is like taking a picture with a camera.

10. In the same way, *sota vīññāṇa* is just the “hearing”, *ghāṇa vīññāṇa* is just the “smelling,” etc. Whether they are “good or bad *vedanā*” depends on the individual.

- When that image is presented to the mind, it instantly matches the image with one’s cravings, likes, dislikes (i.e., *gati*), and *mano saṅkhāra* are generated AUTOMATICALLY, leading to *vīññāṇa*.
- Now, this second *vīññāṇa* is the *vīññāṇa* which has incorporated one’s *gati*, not the *cakkhu vīññāṇa* captured by the eyes; of course, *cakkhu vīññāṇa* is also **registered** in the mind.

11. This is explained in the next step in #8 above, “tasmīṃ samaye (at that time) *saṅkhāra paccayā vīññāṇam*, *vīññāṇa paccayā nāmaṃ*, *nāma paccayā chaṭṭhāyatanaṃ*, *chaṭṭhāyatana paccayā phasso*, *phassa paccayā vedanā*, *vedanā paccayā bhavo*, *bhava paccayā jāti*, *jāti paccayā jarāmaraṇam*. *Evametassa kevalassa dukkhakkhandhassa samudayo hoti*.”

This is the *avyākata* PS due to the *kamma vipāka*.

- Note that this PS process is different than the *akusala-mūla* and *kusala-mūla* PS processes; see the highlighted part of the *avyākata* PS above.
- First, it does not start with “*avijjā paccayā saṅkhāra*.” There will be no *kamma* done with *avijjā*. This is just a *kamma vipāka*.

12. Without going into this complex process, only the mindset of the person is changed based on the contact (*phassa*) of the *ārammaṇa* with the *gati* of the individual.

- We note here that there are no “*nāmarūpa*” involved here, but just “*nāma*.” This is a deeper point, but the generation of “*nāmarūpa*” involves *javana citta* which actually performs *kamma*. In this *vipāka* cycle, no *kamma* is done by the mind; the mind just matches the “picture” that it received against one’s *gati*, and automatically recognizes if it is an object that one likes/dislikes.
- For example, if an alcoholic sees a bottle of his favorite alcohol, he will be temporarily be “born” (*jāti*) as an alcoholic at that instant. But if it was a person who has no such *gati*, this process will end right there (just seeing).
- But if it did lead to the person being born in the “alcoholic state”, then a new *akusala-mūla* PS process will run inside that *avyākata* PS process starting at “*bhava paccayā jāti*” step.

13. Therefore, subsequent to that *avyākata* PS, new *akusala-mūla* PS processes may start. That is the “new *kamma* generation.” Even though an *Arahant* will experience a similar *avyākata* PS, that WILL NOT lead to an *akusala-mūla* PS process.

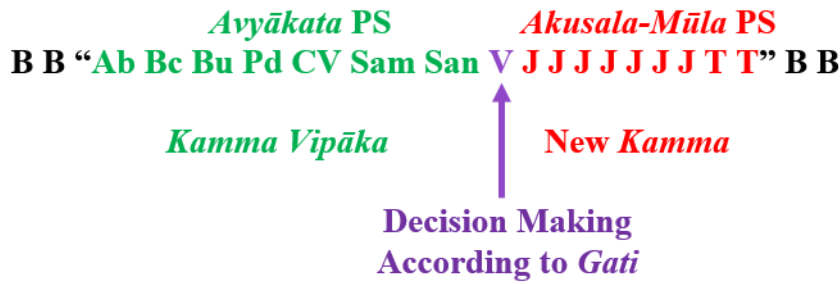

- An *akusala-mūla* PS process MAY NOT be initiated even in a normal human if he/she did not have *gati* to be attached to that sense input (*ārammaṇa*).
- But that does NOT mean that the *avyākata* PS in that case involved “*pabhassara citta*” [Radiant Mind] or “pure uncontaminated *citta*.” It just means that person did not have *gati* to be interested in that particular sensory input.

14. Both the initial *avyākata* PS and the subsequent *akusala-mūla* PS process will take place within the same *citta vīthi* (in the above example a *cakkhudvāra citta vīthi* with 17 *citta*), which lasts only a billionth of a second!

- Such fast processes are not discernible to any human other than a Buddha. But we have the ability to study it and realize that indeed that must be correct. In that sense, we must not focus on just this process, but realize that it fits in nicely with any phenomenon that we experience.
- As one learns deeper concepts, it will be difficult not to be amazed by the capabilities of a Buddha. This is how one builds one’s faith (*saddhā*).
- The following discussion will illustrate how the processes that we discussed above fit in nicely with the concept of a *citta vīthi*.

15. The following may not be fully graspable by someone who is not familiar with the details of *citta vīthi*. But just read on and try to get the basic idea without worrying about the details.

- The following figure shows a typical thought process (*citta vīthi*) that is started when eyes capture a “seeing event” (*rūpa ārammaṇa* or *rūpārammaṇa*).

B = *bhavaṅga*, **Ab** = *atīta bhavaṅga*, **Bc** = *bhavaṅga calana*,
Bu = *bhavaṅga upaccheda*, **Pd** = *pañcadvāra vajjana*, **CV** = *cakkhu viññāṇa*,
Sam = *sampaṭicchana*, **San** = *santīraṇa*, **V** = *votthapana*, **J** = *javana*, **T** = *tadārammaṇa*.

B = Life-Continuum, **Ab** = Past *bhavaṅga*, **Bc** = Vibrational *bhavaṅga*,
Bu = Arresting *bhavaṅga*, **Pd** = Five-Door Adverting, **CV** = Eye-Consciousness,
Sam = Receiving, **San** = Investigating, **V** = Determining, **J** = Swift Run (*javana*),
T = Registration.

Click the following link to magnify and download: [WebLink: PDF File: Avyākata Paticca Samuppāda](#)

- For a discussion on *citta vīthi*, see, “[Citta vīthi – Processing of Sense Inputs.](#)”

16. In between *citta vīthi*, the mind is in the “*bhavaṅga* state”; see, “[Pabhassara Citta, Radiant Mind, and Bhavaṅga.](#)” That post is also a bit advanced, and I will try to make a new section on “simple *Abhidhamma*” in the future.

- If you see someone not active and just staring into space (not really thinking or concentrating on an idea), then that person’s mind is likely to be in the *bhavaṅga* state (**B** in the figure). This is also explained in the post, “[Citta vīthi – Processing of Sense Inputs.](#)”
- When the mind switches from this *bhavaṅga* state to a picture that is brought to its attention, it takes three thought moments to “break away” from that *bhavaṅga* state and to focus the attention on the new sensory input.
- With the **PD** *citta*, the mind sees that it is coming through the “eye door” (*cakkhu dvāra*) and in the next *citta* captures that picture. This is the initiation of the *avyākata* PS process: “..*vipākam cakkhuvīññāṇam uppannam hoti*” in #8 above.

17. Then, during the next two *citta* (“**Sam**” for *sampaṭicchana*, and “**San**” for *santīraṇa*), the mind matches that picture (sense input) with its own *gati* and may get attached to it. This is what is described in “*tasmim samaye saṅkhāra paccayā viññāṇam, viññāṇa paccayā nāmaṁ, nāma paccayā chaṭṭhāyatanaṁ, chaṭṭhāyatana paccayā phasso, phassa paccayā vedanā, vedanā paccayā bhavo, bhava paccayā jāti.*”

- Then the person is “temporarily born” in a different state (a person with “alcoholic *gati*” will be born instantly as an alcoholic upon seeing his/her favorite drink), and may start a new *akusala-mūla* PS process, as discussed below.
- That decision to acting with *avijjā* based on that “matching” happens at the **all-important** *votthapana* (**V**) *citta*.

18. Then a new *akusala-mūla* (or *kusala-mūla*) PS process starts and one starts generating *kamma* with *javana citta* (**J**), as shown in the above figure. So, this new PS process starts with the standard, “*avijjā paccayā saṅkhāra, saṅkhāra paccayā viññāṇa....*”

- When this initial *citta vīthi* ends, more such *akusala-mūla* PS cycles will follow, if one got “attached.” Even within a second, there could be thousands of such *akusala-mūla* PS cycles running (and each becoming stronger due to the past ones), even before one is fully consciously aware of it.
- But as humans (with the neocortex that slows down this fast processing; see, “[True Brain: How the Mind Rewires the Brain via Meditation/Habits](#),” we have the ability to stop those *akusala-mūla* PS cycles from building up to doing bad speech and bad actions.
- This is the key to *Satipaṭṭhāna/Ānāpāna Bhāvanā*: to be mindful and catch any “impulsive wrong actions” before they get out of hand. With practice, one will be able to “catch oneself” very early in this process.

19. This is also why *Satipaṭṭhāna/Ānāpāna bhāvanā* cannot just be limited to a “sitting meditation session.” One needs to be engaged during all waking hours and be mindful. **Then with time, our *gati* will change for the better, and we will stop doing “foolish and damaging things.”**

- Then our minds will become pure and we will be able to grasp more of Buddha Dhamma. It is a gradual process, especially initially.
- **Now it should also be clear that one will NOT have a “*pabhassara citta*” [Radiant Mind] at any time unless one is an *Arahant*.** It should be clear that one can never stop that initial *avyākata citta vīthi*. It is gone within a billionth of a second.
- However, we do need to stop those *akusala-mūla* PS processes, as soon as we become aware of them. Terminology does not matter if one is doing the correct procedure.

20. Don’t be discouraged if you find this post too technical. *Paṭicca samuppāda* can go to very deep levels. Just get the overall idea and things will become clear with time if you read the other posts referenced.

9.10.2 Akusala-Mūla Upapatti Paṭicca Samuppāda

This is an early post; revised May 10, 2018; March 13, 2021; May 10, 2021; May 13, 2021; re-written May 21, 2021; revised August 18, 2021

Akusala-mūla upapatti Paṭicca Samuppāda describes how our present actions dictate the rebirth process among the 31 realms. [*upapatti* : [f.] birth; rebirth; approach.]

Six Root Causes That Determine Future Births

1. One is born in this world due to the **six root causes**.

- One is born in the *apāyā* or *dugati* (and also subjected to suffering even when born in good realms) due to bad *gati* arising mainly due to ***lobha, dosa, moha***. The two main version of *akusala-mūla* PS operate when actions, speech, and thoughts occur with these three root causes; see #2.
- One is born in the remaining “good realms” or *sugati* (and experience mundane sense pleasures) due to good *gati* due to ***alobha, adosa, amoha***. The *kusala-mūla* PS operates when actions, speech, and thoughts occur with these three root causes with the comprehension of the Noble Truths; see “[Kusala-Mūla Paṭicca Samuppāda](#).” In particular, that post explains why *puññābhisāṅkhāra* (moral deeds) become *kusala* (i.e., truly *alobha, adosa, amoha*) only with an understanding of the Four Noble Truths/*Paṭicca Samuppāda*/*Tilakkhaṇa*.
- Also, see “[Six Root Causes – Loka Samudaya \(Arising of Suffering\) and Loka Nirodhaya \(Nibbāna\)](#).”

Two Types of PS Processes Based on *Lobha, Dosa, Moha*

2. *Akusala-mūla* PS describes the PS process when one acts with *lobha, dosa, moha*, the three root causes that bring “bad outcomes.” It is also two-fold:

- The **upapatti PS** describes how a “lifestream” or a being makes the *samsāric* journey via repeated births in the 31 realms.
- The **Idappaccayatā PS** describes the moment-to-moment progression of a “lifestream” or a being. This is discussed at “[Idappaccayatā Paticca Samuppāda](#).”
- It is important to note that Buddhaghosa (in *Visuddhimagga*) described only the *upapatti* PS. In recent times, Waharaka Thero has discussed the *Idappaccayatā* PS in detail.

Upapatti Paticca Samuppāda Process

3. Let us now discuss the *upapatti* PS, which describes how the PS cycle goes through a new birth at the end of current life. The steps in this cycle are:

“*avijjā paccayā saṅkhāra; saṅkhāra paccayā viññāṇa; viññāṇa paccayā nāmarūpa, nāmarūpa paccayā salāyatana, salāyatana paccayā phasso, phassa paccayā vedanā, vedanā paccayā taṇhā, taṇhā paccayā upādāna, upādāna paccayā bhava, bhava paccayā jāti, jāti paccayā jarā, maraṇa, soka-parideva-dukkha-domanassupāyāsā sambhavan’ti*” [[Weblink: suttacentral: Majjhima Nikāya 115 Bahudhātukasutta](#)]

And that is how this whole mass of suffering arises: “*Evametassa kevalassa dukkhakkhandhassa samudayo hoti*”

Let us briefly discuss those steps.

Saṅkhāra – Thoughts, Speech, Actions Due to Avijjā

4. With ignorance of the Four Noble Truths as a condition, one thinks, speaks, and acts with those “bad root causes” of *lobha, dosa, moha*. Such thoughts, speech, and actions arise due to *mano, vacī, and kāya saṅkhāra*. We must note that these are really *abhisāṅkhāra*, i.e., they are strong *saṅkhāra*; “*abhi*” means “strong.” See, “[Saṅkhāra – What It Really Means](#).”

- We are born without ANYTHING material other than our tiny baby body, which actually started as a **single cell** in the mother’s womb. We grow up and start acquiring “stuff” both material and non-material: knowledge, material things, friends, spouse, children, fame, etc.
- While we acquire these “things” we also acquire new habits (*gati*) or strengthen ones that we brought from previous lives; these take place according to the *Idappaccayatā* PS at every moment: “*pati + ichcha sama uppāda*,” i.e., **we do things that we like and get similar kind of results**.
- When we die, we take with us only the *kamma* seeds (both good and bad) from our actions; the habits (*gati*) and cravings (*āsavā*) are embedded in them. **These are in the *manomaya kāya*, and the *manomaya kāya* (or *gandhabba*) leaves the dead physical body with those “updated” *kamma* seeds.** This is basically the “net result” of our life here.
- One of the existing *kamma* seeds (from this life or previous lives) gives rise to the next life, where we acquire more of them BASED ON the *gati* and *āsavas*. So the cycle perpetuates.

Viññāṇa in Upapatti PS Is Paṭisandhi Viññāṇa

5. With *saṅkhāra* as a condition, energy for a new *bhava* or a *paṭisandhi viññāṇa* arises.

- This *viññāṇa* of the new life arises according to the nature of the *kamma* seed that gave rise to it. If that *kamma* seed was due to some hateful act(s), then the *viññāṇa* will be matching: “*pati + ichcha sama uppāda*.” If it is a seed due to an act of generosity done with loving kindness, it could be the *viññāṇa* of a Brahma.
- Thus the “base level of *viññāṇa*” for animal life is VERY DIFFERENT from that of human life, even for the same “lifestream,” i.e., when a human is reborn as an animal the “base level of *viññāṇa*” makes a

huge downward transition. This is why it is NOT correct to say that “*viññāṇa* is transferred from life to life.” See, “[What Reincarnates? – Concept of a Lifestream.](#)”

What Are *Nāmarūpa*?

6. With *viññāṇa* as condition, *nāmarūpa* arise.

- *Nāmarūpa* in the *upapatti* PS is different from those come to play in the *Idappaccayatā* PS.
- For clarification of *nāmarūpa*, see “[Viññāṇa Paccayā Nāmarūpa.](#)”
- A deeper discussion at “[Kamma Viññāṇa and Nāmarūpa Paricceda Ñāṇa.](#)”

Salāyatana Means To Use the Sensory Faculties With a “Unpurified Mind”

7. With *nāmarūpa* as a condition, *salāyatana* arises.

- In *upapatti* PS, *salāyatana* (six sense doors) refers to those that arise for the new existence. For example, six sense doors arise for an animal while just three sense doors (eye, ear, and mind) arise for a *Brahma*.
- See, “[Nāmarūpa Paccayā Salāyatana](#)” for details.

Phassa, in This Case, Is “Defiled Contact” or *Samphassa*

8. With *salāyatana* as a condition, *phassa* arises.

- The meaning of the root word “*phassa*” is “contact.” Any living being sees with eyes, hears with ears, etc.
- **However, in *akusala-mūla* PS, *phassa* is really “*samphassa*” or “*saṅ phassa*.”** See #9.
- This is why this *Akusala-mūla Paṭicca Samuppāda* is not applicable for an *Arahant* (and also for other *Ariyā* too at most times). An *Arahant* does not generate “*samphassa*” but just “*phassa*” without “*saṅ*.”
- Many posts on the website on this important concept; see, “[Search Results for samphassa.](#)”

Vedanā Is *Samphassa-Jā-Vedanā*

9. With (*saṅ*) *phassa* as condition, *vedanā* arise.

- The root level of *vedanā* arises due to *phassa* for living beings, including *Arahants*.
- It is important to realize that NOT all *vedanā* play a role in *akusala-mūla* PS. Only those *vedanā* that arise due to *samphassa* (“*samphassa jā vedanā*”) play a role here.
- **When greed, anger, or ignorance take over, a mind generates *samphassa-jā-vedanā*.**
- Such “*samphassa jā vedanā*” depend on the *gati* and *āsava*s: see, “[Vedanā \(Feelings\) Arise in Two Ways.](#)” Also, see step #3 in “[Tanhā – How We Attach Via Greed, Hate, and Ignorance.](#)”
- We discussed this recently in the post, “[Dukkha Samudaya Starts With Samphassa-Jā-Vedanā.](#)”

“Attaching” or *Tanhā*

10. With *samphassa-jā-vedanā* as a condition, *tanhā* arise.

- *Tanhā* arise when one gets “attached,” or “fused” into a thing or situation: with *sukha vedanā*, one attaches with greed; with displeasure, one attaches with hate; one also attaches with not knowing what to do (with a highly agitated mind); see, “[Tanhā – How We Attach Via Greed, Hate, and Ignorance.](#)”

The Key Step of *Upādāna*

11. With *taṇhā* as condition, *upādāna* arise.

- **At the moment of death**, in the last *citta vīthi*, the dying person gets a *kamma nimitta*. This is normally a vision or a sound that depicts the nature of the strong *kamma* seed that came to the forefront of the mind.
- For example, if the *kamma* seed that is about to give the next birth was due to killing, then the person may see a gun or hear the sound of it, or even see himself as getting ready to shoot; thus, the person will have the same hateful thoughts arise and just like at the time of the crime, the person embraces that situation automatically (*upādāna*) because one has such “*gatī*” or habits.
- I highly recommend the subsection on “[Concepts of Upādāna and Upādānakkhandha](#)” that will also clarify the previous steps.

Kammic Energy Accumulation in the Step “*Upādāna Paccayā Bhavo*”

12. With *upādāna* as condition, a new existence (*bhava*) is grasped at the *cuti-paṭisandhi* moment.

- The next *citta vīthi* starts with the new existence or “*bhava*” matching that state of mind: “*pati + ichcha sama uppāda*.” Depending on the *kamma nimitta* that was grasped, a matching existence, a human, animal, *deva*, etc. arise; see, “[Paṭicca Samuppāda – “Pati+ichcha”+“Sama+uppāda](#).”
- More details in “[Concepts of Upādāna and Upādānakkhandha](#).” A deeper analysis of “[Difference Between Tanhā and Upādāna](#).”

Bhava Paccayā Jāti – Kammic Energy Giving Rise to Rebirth in a New Realm

13. With *bhava* as a condition, *jāti* (new birth) arises. **Note that except for human and animal realms, *bhava* and *jāti* are essentially the same.** See, “[Bhava and Jāti – States of Existence and Births Therein](#).”

- At this step, a birth matching the *bhava* starts for the human and animal realms. The selected “human/animal *bhava*” will last until the *kammic* energy associated with that *kamma* seed is exhausted, as explained in the above post.
- Thus, if the *kamma* seed has the potential for thousands of years of life, the next birth will still be in the human realm when the current life ends.

Each Birth Ends Up With “Various Types of Suffering”

14. With *jāti* as condition, “*jarā, maraṇa, soka-parideva-dukkha-domanassupayasa sambhavan’ti*”.

- *Jāti* inevitably results in decay and eventual death. Therefore, this process describes how *dukkha* arises in the rebirth process.
- No matter where one is born in the 31 realms, one grows old and eventually dies. During that time, one goes through all kinds of suffering, particularly in the human realm and below. Aging and death are certainties.
- And at death, the whole cycle re-starts unless the Arahant hood had not been realized. One WILL BE born somewhere in the 31 realms, and the whole process will continue.

15. The above steps describe the *upapatti* PS. The other aspect, i.e., what happens during a given lifetime, is described in “[Idappaccayatā Paṭicca Samuppāda](#).”

- **Of course, ALL *kamma* accumulation happens in the *Idappaccayatā* PS.** The *upapatti* PS explains how rebirths take place according to such accumulated *kammic* energies.

- All the steps in the *akusala-mūla Paṭicca Samuppāda* are described in detail in the series: “[Paticca Samuppāda in Plain English](#).”
- Also, see the new subsection, “[Paticca Samuppāda – Essential Concepts](#).”

9.10.3 Uppatti Paṭicca Samuppāda (How We Create Our Own Rebirths)

July 6, 2019; revised October 4, 2021; November 3, 2022

Rebirths Arise Due to Our Actions

1. *Uppatti Paṭicca Samuppāda* describes how we create our rebirths. *Idappaccayatā Paṭicca Samuppāda* explains how we make our *kamma vipāka*. The post, “[Bhava paccayā Jāti....Jarā , Marana,...](#)” discusses the differences between *kamma bhava* and *uppatti bhava*. [*upapatti* : [f.] birth; rebirth; approach.][*uppatti* :[f.] rebirth; coming forth; origin.]

- Both types of *bhava* or existences arise due to the generation of (*abhi*)*saṅkhāra* due to *avijjā*. We remember that we do all kinds of *kamma* (*kāya kamma*, *vacī kamma*, *mano kamma*) with *saṅkhāra* (*kāya*, *vacī*, and *mano saṅkhāra*) or “how we think and then act on such thinking.”
- **ALL *saṅkhārā* arise in the MIND. As we know, *saṅkhārā* make *kammā* that lead to future rebirths with physical bodies. That is why the Buddha said: “*Mano pubbangamā dhammā..*” or “ALL *dhammā* arise with the mind as precursor..”**
- When we generate (*abhi*)*saṅkhāra* that creates a “future expectation” or a *viññāṇa*; see, “[Viññāṇa Aggregate](#).” That ALWAYS leads to a *kamma bhava*, which is a “seed” to bring about a future existence in this life or future life.
- A *kamma bhava* can become a *uppatti bhava* if it becomes strong enough to give rise to rebirth. For example, killing a parent WILL generate a *uppatti bhava* that WILL bring in birth in an *apāya* in the very next rebirth.

2. That is the crucial difference between *Idappaccayatā Paṭicca Samuppāda* and *Uppatti Paṭicca Samuppāda*; see, “[Paticca Samuppāda Cycles](#).”

- *Idappaccayatā Paṭicca Samuppāda* generates *kamma* seeds or *kamma bhava* moment-to-moment.
- Those *bhava* (or *kamma* seeds or *kamma bīja*) that bring *kamma vipāka* during a lifetime (whether in this life or WITHIN a future life) are called “***kamma bhava***.”
- Some *bhava* are strong enough to bring in a new future existence (whether in a bad realm or a good realm) and are called “***uppatti bhava***.”
- Regardless of whether it is a *kamma bhava* or a *uppatti bhava*, **we generate them** every time we act with *avijjā* and make *viññāṇa* via the steps, “*avijjā paccayā saṅkhāra*” and “*saṅkhāra paccayā viññāṇa*.”
- Then subsequent *Paṭicca Samuppāda* steps invariably lead to “*bhava paccayā jātī*” and “*jāti paccayā jarā, maraṇa, soka, perideva, dukkha, domanassa, upasaya sambhavanti. Evametassa kevalassa dukkhakkhandhassa samudayo hoti.*” or “the whole mass of suffering.”

Grasping a *Bhava* Happens Automatically

3. We do not have any control over which “*uppatti bhava*” comes at the end of a *bhava* (*cuti*, not *marāṇa*). The strongest with the most “*upādāna*” associated with it gets to the front automatically. The Buddha gave a simile to explain how this selection of a “*uppatti bhava*” or a potent *kamma* seed happens at the *cuti-paṭisandhi* transition at death.

- Imagine a barn that keeps the cows in for the night. In the morning, all the cows are anxious to get out and roam around. When the gate opens, the strongest cow comes to the front and is out of the gate first. The weaker cows don't even make an effort to go to the gate.
- Just like that, it is the most potent "*kamma* seed" or a "*paṭisandhi bhava*" that wins at the *cuti-paṭisandhi* transition.
- We discussed the case of a teenager in the previous post, "[Bhava paccayā Jāti....Jarā , Marana,...](#)". Suppose he created a potent *kamma* seed with an action depicting "animal-like" behavior. In that case, it will bring about an animal's existence at the *cuti-paṭisandhi* transition.

4. A Buddha could analyze such a *paṭisandhi Paṭicca Samuppāda* cycle in detail to pinpoint even the type of animal. That is because a Buddha can see not only a person's whole history in the present life but going back many eons. Thus, he could see which *kamma* seed will bring the following existence and exactly which kind of "*gati*" are associated with that *kamma* seed. We can only discuss the general trends, and here we have discussed only the main ideas of how these *Paṭicca Samuppāda* cycles operate.

- Going back to the teenager, In this case, it is the *paṭisandhi Paṭicca Samuppāda* cycle that operates, and "*bhava paccayā jātī*" here leads to the birth in a new existence as an animal using that *uppatti bhava*.

Difference Between *Bhava* and *Jāti*

5. It is essential to realize that the *cuti-paṭisandhi* transition DOES NOT necessarily happen when a human dies. They can be reborn many times as humans within a given "human *bhava*"; see, "[Bhava and Jāti – States of Existence and Births Therein](#)."

- Once born (*jāti*) in such an animal existence (*bhava*), that animal will grow and then start the old age ("*jarā*") and eventually die ("*marañā*").
- Since most violent animals have shorter lifetimes, only a fraction of that *kammic* energy is likely to have been spent. That animal will keep going through many similar births ("*jātī*") until the power of that *kamma* seed is consumed. Many animals keep coming back to the same life many hundreds of times.

6. That is the difference between "*bhava*" and "*jāti*." Once one gets a new existence or "*bhava*," one could have many births ("*jātī*") in that existence until the energy in the *kamma* seed runs out. I keep repeating this because it is essential to understand the difference between "*bhava*" and "*jāti*."

- Thus, we can see that the last step of "*jāti paccayā jarā, marañā, soka, parideva, dukkha, domanassa, upasaya sambhavanti. Evametassa kevalassa dukkhakkhandhassa samudayo hoti*." will be with that "teenager" for a long time to come. It is not just one birth but many that will correspond to that existence as that animal.
- In general, while in the human "*bhava*" one could be reborn many times before the energy of that "good *kamma* seed" is depleted. That is why some people can recall memories from recent past lives. A human *bhava* can last thousands of years, but each human birth (*jāti*) lasts only about 100 years.
- **However, getting another "human *bhava*" is difficult;** see "[How the Buddha Described the Chance of Rebirth in the Human Realm](#)."

How Are Certain Rebirths Stopped?

7. We mentioned earlier that anyone would have accumulated numerous good and bad *kamma* seeds strong enough to give rise to good and bad rebirths. Then the following question arises. Does a person attain the *Sotāpanna* stage by eliminating all those corresponding bad *kamma* seeds?

- While it is possible to reduce the potency of *kamma* seeds and maybe even eliminate some, it may not be possible to remove all. The *Ariya Mettā Bhāvanā* – discussed in the "[Bhāvanā \(Meditation\)](#)" section

– can lessen the potency of some kamma seeds. Even the Buddha had 11 instances of bad *kamma vipāka*, including a back problem.

- Therefore, it is very likely that we all have many good and bad *kamma* seeds strong enough to energize many good and bad rebirths.

8. What happens at the *cuti-paṭisandhi* moment involves the “*upādāna paccayā bhava*” step in the *uppatti Paṭicca Samuppāda* cycle.

- Suppose a person dies, and that was the last possible human birth for them. Then at the dying moment, that potent *kamma* seed will generate a corresponding *nimitta* (or sign of that *kamma*).
- Whether they will willingly grasp that *nimitta* will depend on whether they still have such “*gati*.”

9. Let us again consider the case of the violent teenager discussed in #3 in the previous post, “[Bhava paccayā Jāti....Jarā , Marana....](#)” Suppose he continued his violent acts and built up a “*uppatti bhava*” suitable for a fierce animal. Then, at the dying moment, he could see in his mind (like in a dream), a rival gang member trying to “steal a drug deal”; he would also see a gun close-by. **That is the *nimitta*.**

- If that person still has the same *gati*, he will get angry, grab the gun, and shoot that person by his instincts.
- That is the “*upādāna paccayā bhava*” step for the new existence. That person has willingly grasped the mindset of an animal, and he will be born as an animal.
- This process is explained from beginning to end in detail in the series of posts, “[Paṭicca Samuppāda in Plain English](#).”

How Does a Sotāpanna Avoid Bad Rebirths?

10. Let us now go back to the question of how a *Sotāpanna* avoids such bad rebirths even if they have many bad *kamma* seeds. Suppose that *Sotāpanna* has the same kind of strong (and bad) *kamma* seed as that teenager (could be from a previous life).

- What happens is that a *Sotāpanna* will not grab the gun and shoot that person even if it is their worst enemy. **His mindset or “*gati*” has permanently changed.** Thus “*upādāna paccayā bhava*” step will not be executed for that *kamma* seed.
- In that case, now the next potent *uppatti bhava* will come to the forefront. If that is also a bad one suitable for rebirth in the lowest four realms, *Sotāpanna*’s mind will reject that too. Eventually, he will grasp a rebirth compatible with his “*gati*” at that dying moment. A *Sotāpanna* has removed the “*gati*” of a being in one of the four lowest realms.
- **All that happens automatically and very quickly. We do not have any conscious control over it.**

11. How one lives this life AND how one lived previous lives can contribute to future rebirths. One would generate “*kamma* seeds” or “*uppatti bhava*” for possible future existences according to how one lives a life.

- **However, bad *bhava* will not result if one has changed one’s *gati* PERMANENTLY (via attaining at least the *Sotāpanna* stage).** EVEN IF one had committed bad *kamma* suitable to bring in a “bad *bhava*,” one’s mind would not grasp a “bad *bhava*” at the *cuti-paṭisandhi* moment.
- That is why *Paṭicca Samuppāda* means “*pati + ichcha*” leading to “*sama*” + “*uppāda*.” What one grasps willingly and habitually is what one that will operate automatically at the dying moment; see, “[Paṭicca Samuppāda – “Pati+ichcha”+“Sama+uppāda](#).”
- It is better to use *Paṭicca Samuppāda* even in English rather than “dependent origination.” Most Pāli words have “built-in” explanations (*pada nirutti*). One needs to understand what those Pāli words mean and use them. [*pada* :[nt.] foot; foot-step; a word; position; place; reason; cause; a line of stanza; the final rest. *nirutti* : (f.) [Sk. nirukti, nis+vac] one of the Vedāṅgas (see *chaḷaṅga*), expln of words, grammatical analysis, etymological interpretation; pronunciation, dialect, way of speaking, expression.]

- I have explained this with *saññā*, *saṅkhāra*, and *viññāṇa* as well; see, “[Mental Aggregates](#).” Those DO NOT have corresponding SINGLE English words. In particular, it is WRONG to translate *viññāṇa* as just “consciousness”; see, “[Viññāṇa Aggregate](#).”

Relevance to “Origin of Life” Issue

12. I hope it is clear how we create our future births by doing strong *kamma*. Good *kamma* lead to good *vipāka* and good births. Bad *kamma* leads to bad *vipāka* and bad births.

- We can also avoid bad births (in the lower four realms) by removing our “bad *gati* that could lead to such births.” Attainment of *Sotāpanna* stage ensures this.
- In the same way, we can stop births in the human and *deva* realms (remaining realms in *kāma loka*). Removal of “*kāma gati*” or cravings for sense pleasures gets one there. The need to take this step may not become apparent until one attains the *Sotāpanna* stage.
- Even the higher *Brahma* realms have some form of suffering (especially at the moment of death). Removal of “all *gati*,” including craving for *jhānic* pleasures in *Brahma* realms, leads to the cessation of all future suffering. That happens of course at the *Arahant* stage.

13. It should also be clear that “new lives” do not randomly come into existence. A new *jāti* based on a new *bhava* arises ONLY as a continuation of an existing lifestream; see, “[What Reincarnates? – Concept of a Lifestream](#).”

- A living being automatically grasps a new *bhava* when the current *bhava* ends (except for an *Arahant*.)
- That is how the rebirth process continues. And that is also why there is no “traceable beginning to life.”
- A detailed discussion in a new series of posts on “[Origin of Life](#).”

14. A deeper description is at “[WebLink: suttacentral: Gatikathā \(KN Ps 1.6\)](#)” of the *Tipiṭaka* Commentary *Paṭisambhidāmagga*. [4.1 *Paṭisandhikkhaṇe pañcakkhandhā saḥajātapaccayā honti, aññamaññapaccayā honti, nissayapaccayā honti, vippayuttapaccayā honti*. On the moment of rebirth linking (*paṭisandhikkhaṇe*), the five aggregates (*pañcakkhandhā*) arise (*honti*) with *saḥajātapaccayā* (co-nascence conditions), *aññamaññapaccayā* (mutuality conditions), *nissayapaccayā* (support conditions), and *vippayuttapaccayā* (dissociation conditions). 4.2 *Paṭisandhikkhaṇe cattāro mahābhūtā saḥajātapaccayā honti, aññamaññapaccayā honti, nissayapaccayā honti*. On the moment of rebirth linking (*paṭisandhikkhaṇe*), the four great elements (*cattāro mahābhūtā*) arise (*honti*) with *saḥajātapaccayā* (co-nascence conditions), *aññamaññapaccayā* (mutuality conditions), and *nissayapaccayā* (support conditions). 4.3 *Paṭisandhikkhaṇe tayo jīvitasaṅkhārā saḥajātapaccayā honti, aññamaññapaccayā honti, nissayapaccayā honti, vippayuttapaccayā honti*. On the moment of rebirth linking (*paṭisandhikkhaṇe*), the three life biological intention (*tayo jīvitasaṅkhārā*) arise (*honti*) with *saḥajātapaccayā* (co-nascence conditions), *aññamaññapaccayā* (mutuality conditions), *nissayapaccayā* (support conditions), and *vippayuttapaccayā* (dissociation conditions). 4.4 *Paṭisandhikkhaṇe nāmaṇca rūpaṇca saḥajātapaccayā honti, aññamaññapaccayā honti, nissayapaccayā honti, vippayuttapaccayā honti*. On the moment of rebirth linking (*paṭisandhikkhaṇe*), the *nāma* and *rūpa* arise (*honti*) with *saḥajātapaccayā* (co-nascence conditions), *aññamaññapaccayā* (mutuality conditions), *nissayapaccayā* (support conditions), and *vippayuttapaccayā* (dissociation conditions). 4.5 *Paṭisandhikkhaṇe ime cuddasa dhammā saḥajātapaccayā honti, aññamaññapaccayā honti, nissayapaccayā honti, vippayuttapaccayā honti*. On the moment of rebirth linking (*paṭisandhikkhaṇe*), this (first) fourteen dhammā (*ime cuddasa dhammā*) arise (*honti*) with *saḥajātapaccayā* (co-nascence conditions), *aññamaññapaccayā* (mutuality conditions), *nissayapaccayā* (support conditions), and *vippayuttapaccayā* (dissociation conditions). 4.6 *Paṭisandhikkhaṇe cattāro khandhā arūpino saḥajātapaccayā honti, aññamaññapaccayā honti, nissayapaccayā honti, sampayuttapaccayā honti*. On the moment of rebirth linking (*paṭisandhikkhaṇe*), the four aggregates of *arūpino* (*cattāro khandhā arūpino*) arise (*honti*) with *saḥajātapaccayā* (co-nascence conditions), *aññamaññapaccayā* (mutuality conditions), *nissayapaccayā* (support conditions), and

sampayuttapaccayā (association conditions). **4.7** *Paṭisandhikkhaṇe pañcindriyāni saḥajātapaccayā honti, aññamaññapaccayā honti, nissayapaccayā honti, sampayuttapaccayā honti.* On the moment of rebirth linking (*paṭisandhikkhaṇe*), **the five faculties (*pañcindriyāni*)** arise (*honti*) with *saḥajātapaccayā* (co-nascence conditions), *aññamaññapaccayā* (mutuality conditions), and *nissayapaccayā* (support conditions). **4.8** *Paṭisandhikkhaṇe tayo hetū saḥajātapaccayā honti, aññamaññapaccayā honti, nissayapaccayā honti, sampayuttapaccayā honti.* On the moment of rebirth linking (*paṭisandhikkhaṇe*), **the three causes/conditions/reasons (*tayo hetū*)** arise (*honti*) with *saḥajātapaccayā* (co-nascence conditions), *aññamaññapaccayā* (mutuality conditions), *nissayapaccayā* (support conditions), and *sampayuttapaccayā* (association conditions). **4.9** *Paṭisandhikkhaṇe nāmaṇca viññāṇaṇca saḥajātapaccayā honti, aññamaññapaccayā honti, nissayapaccayā honti, sampayuttapaccayā honti.* On the moment of rebirth linking (*paṭisandhikkhaṇe*), **the *nāma* and *viññāṇa* (*nāmaṇca viññāṇaṇca*)** arise (*honti*) with *saḥajātapaccayā* (co-nascence conditions), *aññamaññapaccayā* (mutuality conditions), *nissayapaccayā* (support conditions), and *sampayuttapaccayā* (association conditions). **4.10** *Paṭisandhikkhaṇe ime cuddasa dhammā saḥajātapaccayā honti, aññamaññapaccayā honti, nissayapaccayā honti, sampayuttapaccayā honti.* On the moment of rebirth linking (*paṭisandhikkhaṇe*), **this (second) fourteen *dhammā* (*ime cuddasa dhammā*)** arise (*honti*) with *saḥajātapaccayā* (co-nascence conditions), *aññamaññapaccayā* (mutuality conditions), *nissayapaccayā* (support conditions), and *sampayuttapaccayā* (association conditions). **4.11** *Paṭisandhikkhaṇe ime aṭṭhavīsati dhammā saḥajātapaccayā honti, aññamaññapaccayā honti, nissayapaccayā honti, vippayuttapaccayā honti.* On the moment of rebirth linking (*paṭisandhikkhaṇe*), **this twenty-eight *dhammā* (*ime aṭṭhavīsati dhammā*)** arise (*honti*) with *saḥajātapaccayā* (co-nascence conditions), *aññamaññapaccayā* (mutuality conditions), *nissayapaccayā* (support conditions), and *vippayuttapaccayā* (dissociation conditions).]

Notes:

First Fourteen *dhammā* are [5] the five aggregates (*pañcakkhandhā*), [4] the four great elements (*cattāro mahābhūta*), [3] the three life biological intention (*tayo jīvitasāṅkhārā*), [2] the *nāma* and *rūpa*.

Second Fourteen *dhammā* are [4] the four aggregates of *arūpino* (*cattāro khandhā arūpino*), [5] the five faculties (*pañcindriyāni*), [3] the three causes/conditions/reasons (*tayo hetū*), [2] the *nāma* and *viññāṇa* (*nāmaṇca viññāṇaṇca*).

Twenty-eight *dhammā* are First Fourteen *dhammā* and Second Fourteen *dhammā*.

9.10.4 Kusala-Mūla Paṭicca Samuppāda

This is an early post; revised May 10, 2018; re-written February 6, 2021; #2 revised February 10, 2021; May 28, 2022; August 27, 2022; May 4, 2023 (#5); May 5, 2023 (#6 added)

What Is *Kusala-Mūla Paṭicca Samuppāda*?

1. ***Kusala-Mūla* version of *Paṭicca Samuppāda* (PS) describes the way to *Nibbāna*.** It is not described in even the current *Theravāda* texts, even though it is in the *Tipiṭaka*. Since the time Buddhaghosa wrote *Visuddhimagga*, all *Theravāda* texts followed his books instead of *Tipiṭaka*.

- That means the PS process for attaining *Nibbāna* has NOT been described for over 1500 years. No wonder the *Nibbāna* has been hidden for all these years.
- *Kusala-Mūla* (pronounced “moola”) PS describes the PS process for acting with *alobha*, *adosa*, and *amoha* with an understanding of the Four Noble Truths. **That goes beyond the mundane versions of *alobha*, *adosa*, and *amoha*.** We will discuss that below.
- Of course, the *Kusala-Mūla* PS process is unknown to the world without Buddha’s true teachings.

- By the way, the word “*kusala*” comes from “*ku*” (defilements)+ “*sala*” (abandon.) Thus *kusala kammā* leads to the removal/abandonment of defilements (*akusala*.)

Regular Version of *Alobha, Adosa, Amoha* Keeps One in the Rebirth Process

2. One is born in this world due to the **six root causes**.

- One is born in the *apāyā* or *dugati* (and also subjected to suffering even when born in good realms) due to bad *gati* arising MAINLY due to ***lobha, dosa, and moha***. The *Akusala-Mūla* PS operates when actions, speech, and thoughts occur with these three root causes; see, “[Akusala-Mūla Paṭicca Samuppāda](#). “
- One is born in the “good realms” or *sugati* (and also experiences mundane sense pleasures) due to “good *gati*” developed by acting with conventional or mundane ***alobha, adosa, and amoha***. For example, one can engage in “good deeds” like giving, helping out others, etc., or cultivate *jhāna*. Those are done with mundane versions of *alobha, adosa, and amoha* and can lead to rebirths in human, *Deva*, and *Brahma* realms. However, they WILL NOT lead to *Nibbāna*, i.e., stopping the rebirth process.
- It is ONLY when one is acting with ***alobha, adosa, and amoha* (and comprehension of Four Noble Truths/Tilakkhaṇa/Paṭicca Samuppāda)** that those actions lead to *Nibbāna* via “Kusala-Mūla Paṭicca Samuppāda” that e are discussing now.
- The above points are also discussed in detail in “[Six Root Causes – Loka Samudaya \(Arising of Suffering\) and Loka Nirodhaya \(Nibbāna\)](#).”

There Are Two Tiers of *Alobha, Adosa, Amoha*

3. The uniqueness in Buddha Dhamma reveals two tiers (or levels) of *alobha, adosa, and amoha*.

- All religions teach that it is good to act with *alobha, adosa, and amoha*. Of course, the Buddha advised that too.
- **However, if one is to stop future suffering in the rebirth process, one MUST see the dangers of remaining in the rebirth process.** This can be stated in three different ways of understanding: Four Noble Truths, *Paṭicca Samuppāda*, and *Tilakkhaṇa*.
- With that understanding, *alobha, adosa, and amoha* elevate to a new level. One is now engaged in “good deeds,” not seeking “good rebirths” but to be released from the rebirth process. In other words, now, one’s goal is to attain *Nibbāna*.
- Good deeds done without a deeper understanding of the Four Noble Truths are *puñña kammā*. One gets “good rebirths” with *puñña kammā*. When one starts understanding the Four Noble Truths, such actions AUTOMATICALLY become *kusala kammā* and help attain *Nibbāna*.
- This is discussed in detail in “[Kamma, Saṅkhāra, and Abhisāṅkhāra – What Is “Intention”?](#).”

Kusala-Mūla Paṭicca Samuppāda Involves *Kusala Kamma*

4. It is the *Kusala-Mūla Paṭicca Samuppāda* process that leads to *Nibbāna*. That is why this PS process starts with “*Kusala-Mūla paccayā saṅkhāra*.”

- As we know, the *Akusala-Mūla Paṭicca Samuppāda* process maintains the rebirth process. *Puñña kamma* done with mundane versions of *alobha, adosa, amoha* are ALSO included in “*avijjā paccayā saṅkhāra*” in the *Akusala-Mūla Paṭicca Samuppāda* process. See “[Kilesa – Relationship To Akusala, Kusala, And Puñña Kamma](#).”
- **It is critical to understand this distinction.** The mundane versions of *alobha, adosa, and amoha* still lead to *Akusala-Mūla* PS cycles that keep one in the rebirth process. It is ONLY AFTER one starts

comprehending the Four Noble Truths (or the working of the *Paṭicca Samuppāda* processes or *Tilakkhaṇa*) that one will start operating under the *Kusala-Mūla* PS process leading to *Nibbāna*.

- Now we can look at the steps in the *Kusala-Mūla* PS process.

Steps in the *Kusala-Mūla Paṭicca Samuppāda* Process

5. The steps in this *Kusala-Mūla* cycle are ([WebLink: suttacentral: Patikkasamuppāda Vibhaṅga](#)):

“*kusalamūla* paccayā saṅkhāro, saṅkhāra paccayā viññāṇaṃ, viññāṇa paccayā nāmarūpaṃ, nāmarūpa paccayā salāyatanaṃ, salāyatana paccayā phasso, phassa paccayā vedanā, vedanā paccayā *pasādo*, pasāda paccayā *adhimokkha*, adhimokkha paccayā bhavo, bhava paccayā jāti, jāti paccayā jarā maraṇaṃ. *Evametesāṃ dhammānaṃ samudayo hoti.*”

Here I have marked in orange-red the terms different from those in the *Akusala-Mūla* PS. Let us briefly translate the terms. **Here I am describing both *pavutti* and *upapatti* PS together.** [*pavutti* : [fr. pa+vr̥t, cp. Class. Sk. *pravṛtti*] happening, proceeding, fate, event.] **and *upapatti*** [also written as *upapatti* which means rebirth]

- With *Kusala-Mūla* as a condition, one accumulates *puññābhi saṅkhāra* WITH the comprehension of the Four Noble Truths. Those may be called *Kusala-Mūla saṅkhāra*.
- Such *Kusala-Mūla saṅkhāra* arises in the mind when doing deeds with *lokuttara alobha*, *adosa*, and *amoha*. THEREFORE, one does not wish for anything other than *Nibbāna* because one’s mind automatically rejects anything within the 31 realms.

6. In the above verse, “*dhammānaṃ samudayo hoti*” refers to four types of “special *dhammā*” that arise due to the *Kusala-Mūla PS* process.

- As we discussed in the post, “[What are Rūpa? – Dhammā are Rūpa too!](#)” *dhammā* means “to bear things in this world.” When one cultivates the Noble Path as an Ariya (Noble Person), one attains four stages *magga phala*: *Sotāpanna*, *Sakadāgāmi*, *Anāgāmi*, and *Arahant*.
- *Dhammā* referred to in the above verse are those that “bear” those four *magga phala*.

Kusala-Mūla Saṅkhāra Lead to *Kusala-Mūla Viññāṇa*

7. With *Kusala-Mūla saṅkhāra* as condition, a *Kusala-Mūla viññāṇa* arises.

- Because the *saṅkhāra* was generated with a *Kusala-Mūla* deed, *only a Kusala-Mūla viññāṇa arises: “paṭi + ichcha sama uppāda.”* The characteristic of this *Kusala-Mūla viññāṇa* is the desire (*chanda*, not *kāmacchanda*) for *Nibbāna*.
- The only expectation in one’s mind is to attain *Nibbāna* and be free of all future suffering.

Kusala-Mūla Viññāṇa Lead to Corresponding *Nāmarūpa*

8. Such *Kusala-Mūla viññāṇa* lead to corresponding “good” or “*Kusala-Mūla*” *nāmarūpa* in *pavutti Paṭicca Samuppāda* or in *upapatti Paṭicca Samuppāda*.

- Those “*Kusala-Mūla nāmarūpa*” are the “mental pictures” that arise in mind and are associated with people and deeds relevant to one’s efforts in attaining *Nibbāna*. For example, one may think about talking to a Noble friend, and he/she comes to mind. Or, one could be planning an alms-giving, etc.
- At death, the *paṭisandhi viññāṇa* is again according to the *Kusala-Mūla viññāṇa*. Thus a birth in the lower four realms is avoided for a *Sotāpanna*, and a birth in the lower 11 realms (*kāma loka*) is avoided for an *Anāgāmi*, for example.

Kusala-Mūla Nāmarūpa Lead to *Kusala-Mūla Salāyatana*

9. With such *nāmarūpa* as a condition, the corresponding *salāyatana* arises.

- They are attuned to only meritorious deeds tailored towards *Nibbāna* in *pavutti Paṭicca Samuppāda*.
- In the case of new (*Ariya*) birth, the new existence's sense faculties arise accordingly. They can never be sense faculties for a realm in the *apāyās*.

Subsequent Steps Arise in the Same Way

10. With a *salāyatana* as a condition, *phasso* (contact with that sense faculty) arises.

- Note that this is just “*phassa*” and NOT “*san phassa*” or “*samphassa*” as in “[Akusala-Mūla Paṭicca Samuppāda](#).”
- Contacts with the outside world are attuned to seeking *Nibbāna*. To learn *dhamma* and to practice *dhamma*.

11. With *phassa* as a condition, *vedanā* arises.

- Through such interactions, one enjoys contact with *dhamma*, true knowledge, and understanding.

Such Contacts Lead to *Citta Pasāda* Followed by *Adhimokkha* (Instead of *Taṇhā* and *Upādāna*)

12. With such a *vedanā* as a condition, *citta pasāda* arises.

- The “tranquility of consciousness” is the standard translation for *citta pasāda*. It is of joyous feeling, lightness of heart.

13. With increasing *citta pasāda* *adhimokkha* results.

- *Adhimokkha* is normally translated as “decision” or “resolve” where *saddhā* peaks. Here it means the mind is decisively attracted to *Nibbāna*. The mind cools down.

Ariya Bhava and *Ariya Jāti*

14. With *adhimokkha* as a condition, (*Ariya*) *bhava* arises. **Note that an *Ariya bhava* arises via ELIMINATING an *uppatti bhava*.** For example, one is “born” an *Anāgāmi* by eliminating the possibility of rebirths in the 11 realms of *kāma loka*.

- The resulting existence (or “*bhava*”) matches that state of mind: “*paṭi+ichcha sama uppāda*”; one “lives” that experience. In the above example, an *Anāgāmi* does not have the mindset to be reborn in *kāma loka*.
- If it is a rebirth at *paṭisandhi*, an appropriate “*bhava*” is selected according to the *kamma nimitta*. Here any “*apāyagāmi*” *kamma* seeds acquired in the distant past do not get a chance to come to the forefront, and thus a rebirth in the lower four realms is prevented.
- **Of course, at *Arahant*'s death, the *Kusala-Mūla* PS process stops (forever) without grasping a new *bhava*.**

15. With *bhava* as a condition, *jāti* arises.

- The appropriate *jāti* (*Sotāpanna*, *Sakadāgāmi*, *Anāgāmi*) will result in an appropriate realm.

16. With *jāti* as condition, “*jāti paccayā jarā maraṇaṃ. Evametesam dhammānaṃ samudayo hoti.*”

- Any *Ariya* is also subject to decay and death as long as he/she is in one of the 31 realms.
- But here, the connection to *dukkha* is not shown because one is destined to attain *Nibbāna*. Thus, instead of “*jāti paccayā jarā, maraṇa, soka-parideva-dukkha-domanassupāyāsā sambhavan'ti*” in the *Akusala-Mūla* PS process, here it ends with “*Evametesam dhammānaṃ samudayo hoti.*”

- Instead of future suffering, conditions for attaining *Nibbāna* result in the *Kusala-Mūla* PS process.

Difference Between *Adhimokkha* and *Upādāna*

17. In the *Akusala-Mūla* PS that feeds the rebirth process, the critical step of “*upādāna paccayā bhavo*” leads to the creation of the *kamma bhava* (energy to feed future rebirths.)

- That *upādāna* forces the mind to act with *avijjā* repeatedly and to strengthen that *kamma bhava*. That is explained in detail in “[Difference Between Tanhā and Upādāna](#).”
- In contrast, in the *Kusala-Mūla* PS, that step is replaced by “*adhimokkha paccayā bhavo*.” That *bhava* is an *Ariya bhava* (existence as a Noble Person) that makes any existing *kamma bhava* (created via *Akusala-Mūla* PS processes) ineffective.

9.10.5 Idappaccayatā Paṭicca Samuppāda

Re-written with a new title May 18, 2019; revised May 20, 2019; March 13, 2021; re-written May 10, 2021; added #16 on April 30, 2022; revised April 15, 2023

Akusala-mūla upapatti Paṭicca Samuppāda (that describes future rebirths) is the only version of *Paṭicca Samuppāda* (PS) described in even the current *Theravāda* texts, even though the other versions are in the *Tipiṭaka*. *Idappaccayatā Paṭicca Samuppāda* is a critically important one that describes *kamma* accumulation in real-time. [*upapatti* : [f.] birth; rebirth; approach.]

Idappaccayatā – At a Given Moment

1. *Idappaccayatā Paṭicca Samuppāda* is another crucial teaching that has been hidden for hundreds of years. The word “*Idappaccayatā*” comes from “*ida*” for “here” and the closest English word for “*paccayā*” is “condition.” **Thus *Idappaccayatā* implies “based on this condition at this moment.”** [*idappaccayā* : From an assignable cause, from an ascertained cause.]

- Therefore, *Idappaccayatā Paṭicca Samuppāda* describes how “*pati icca*” leads to “*sama uppāda*” moment by moment based on the conditions present at that moment; see, “[Paticca Samuppāda – “Pati+ichcha”+“Sama+uppāda”](#).”
- The additional “p” in “*idappacayatā*” comes from the combination of “*ida*” and “*paccayā*.” This is similar to “*dammacakka*” and “*pavattana*” combined to yield “*dhammacakkappavattana*” in the *Dhammacakkappavattana Sutta*.
- Another crucial point is that “The first point of ignorance, *bhikkhus*, cannot be seen. **Ignorance can arise at any time when the conditions are right**” or “*Purimā, bhikkhave, koṭi na paññāyati avijjāya: ‘ito pubbe avijjā nāhosi, atha pacchā samabhavī’ti. Evañcetaṃ, bhikkhave, vuccati, atha ca pana paññāyati: ‘idappaccayā avijjā’ti.*”
- See “[WebLink: suttacentral: Avijjā Sutta \(AN 10.61\)](#)” for details.

Idappaccayatā Versus *Upapatti Paṭicca Samuppāda*

2. As mentioned in earlier posts (see, “[Paticca Samuppāda](#)”), *Paṭicca Samuppāda* (PS) or “cause and effect” can describe various stages of life in multiple ways. At a deeper level, 16 PS cycles operate **inside a thought-moment**.

- The Buddha said that the PS is deep as a deep ocean and can apply it to any situation because everything “in this world” obeys the basic principle of cause and effect. It is no wonder that only one PS has been studied for over a thousand years while the true Dhamma remains hidden.
- In the previous post, we discussed the *upapatti* PS, which describes that latter process, i.e., how the PS cycle operates between lives; see, “[Akusala-Mūla Upapatti Paticca Samuppāda](#).”

- The other extreme of a swift PS process involved within a thought moment (*citta*) is very complex, and we do not need to examine it right now. We can learn it, but it can be “seen” only by a Buddha.
- This post will discuss the *idappaccayatā* PS cycle, which describes phenomena in real-time without getting into what happens within a *citta* (within a thought moment). This process — just like the PS cycle operates between lives — can also be easily understood by anyone.

Paṭi+icca* Leading to *Sama+uppāda

3. As mentioned in the introduction to PS, whenever we willingly grasp something, whatever results from that action has a corresponding nature. Because one got attached willingly, similar *bhava* will result: i.e., *paṭi+icca* leading to *sama+uppāda* or *Paṭicca Samuppāda* (PS). Here, “*icca*” is pronounced “ichcha.”

- In the most fundamental sense, a “greedy state of mind” will result when we attach via greed, i.e., one develops a **habit or *gati* or *bhava*** corresponding to that state of mind; a “hateful state” (*habit/gati/bhava*) results via hateful attachment; acts of greed and/or hate are always done with ignorance.
- Three examples of *upapatti bhava* for those three cases illustrate the principle: An excessively greedy person is likely to get a “*peta bhava*” and be born as a *peta* (hungry ghost); a person who is often engaged in hateful actions towards other beings is likely to develop a “hateful *bhava*” and is likely to be born in the *niraya* (hell) where there is a lot of hate due to extreme suffering; animal *bhava* has developed with both greed and hate. Since ignorance is always there, animal *bhava* are cultivated with all three “*sans*”; this is the root of the word “*tirisan* = three sans” for an animal in Sinhala.

An Example of *Idappaccayatā* PS

4. Now, let us look at the *Idappaccayatā* PS, which describes how we develop certain habits or *gati* during a given lifetime and make “*kamma bhava*.” That “*kamma bhava*” can become a “*upapatti bhava*” at the *cuti-paṭisandhi* moment of grasping new *bhava*. It is often easier to use an example to illustrate these PS cycles. Let us examine how a teenager becomes an alcoholic.

- The teenager becomes friendly with other teenagers who are into drinking. Initially, he may be reluctant to join in, but due to ignorance, he joins them and starts drinking.
- If a good friend or a family member came to know about the situation, they could have prevented the teenager from associating with such bad company, i.e., ignorance could have been dispelled by explaining to him the adverse effects of drinking but also of associating with such a group.

5. The PS cycle thus starts with “*avijjā paccayā saṅkhāra*” (of course triggered in a party setting). Due to ignorance of the adverse results, the teenager starts drinking with that group (*saṅkhāra* = “*san + khāra*” or actions of accumulating, in this case, bad *kamma*).

- The more he is involved with such drinking activities, the more he thinks about it and develops a “mindset” or *viññāṇa* for that activity. This is “*saṅkhāra paccayā viññāṇa*”; see, “[Kamma are Done with Saṅkhāra – Types of Saṅkhāra](#).”

6. When he really begins to like drinking, he starts thinking about it even while doing other things. This is “*viññāṇa paccayā nāmarūpa*.”

- In this case, *nāmarūpa* are the mental images associated with that *viññāṇa*, i.e., the names and shapes of particular alcohol bottles, the places where he usually drinks, the friends who drink with him, etc.
- He thinks about the next “event” and visualizes the scene; **all these are associated with *nāmarūpa*. Thus, here *nāmarūpa* are the mental images of “things” and “concepts” that one would like to enjoy.**

7. Now, his six senses become “involved” to provide reality to such *nāmarūpa*, to provide the desired sensory pleasures.

- In Pāli, the six *indriya* (senses) become “*āyatana*.” For lack of a single English word, I will call an “*āyatana*” an “import/export facility” and get involved in the actions associated with drinking events.
- His mind is often thinking about the next “event” (where, when, with whom, etc), and he makes necessary preparations for the “event” using all six senses (now *āyatanas*.) That happens per the *nāmarūpa* in the previous step, i.e., “*nāmarūpa paccayā saḷāyatana*,” where ***saḷāyatana* means the six *āyatana***: the eye is now not merely for seeing; it has become an assistant in the lookout for a “good drink” or a “good friend to chat with,” etc.

8. Thus, we have “*saḷāyatana paccayā phassa*,” i.e., all six *āyatana* become actively engaged in making contact with relevant sense objects. His eyes are on the lookout for a favorite drink or person to chat with, etc.

- However, “*saḷāyatana paccayā phassa*” is just the “uddesa” or short version given in the standard PS steps. It needs to be explained in detail; see “[Sutta Interpretation – Uddesa, Niddesa, Patiniddesa](#).”
- Here instead of *phassa*, it is called “*samphassa*” (= “*saṇ*” + “*phassa*”), where “*saṇ*” implies it not just contacting, but a “*saṇ*” contact; see, “[What is “Saṇ”? Meaning of Sansāra \(or Samsāra\)](#).”

9. Such “*samphassa*” lead to *vedanā*, i.e., “(*saṇ*)*phassa paccayā vedanā*.” He experiences “good (but immoral) feelings” with all those sense contacts.

- Because of such “good feelings,” he gets further attached: “*vedanā paccayā taṇhā*”; see, “[Tanhā – How We Attach via Greed, Hate, and Ignorance](#).”

10. Now comes, “*taṇhā paccayā upādāna*.” *Upādāna* means “grabbing or pulling it close,” like an octopus grabbing its prey with all its eight legs.

- In the present case, the teenager wants to relive this experience. He gets immersed in it; when he is experiencing the event, his mind is fully absorbed; he does not think and does not have the mindset to think about any adverse consequences.
- This is the critical “habit-forming” or “*bhava* forming” step.
- If this habit becomes very strong, it could lead to new *bhava* as an animal via the ***upapatti Paṭicca Samuppāda*** process; see, “[Akusala-Mūla Upapatti Paticca Samuppāda](#).”

11. So, the next inevitable step is “*upādāna paccayā bhavo*”; this particular state of getting drunk becomes increasingly ingrained in his mind. It becomes “a *bhava*” or “existence” or habit that is important to him. He very much wants to re-live that experience.

- And that is exactly what he gets: “*bhava paccayā jāti*.” This “*bhava*” or the *kamma* seed is now well established, and he can be born in that “drunken state” quite easily. All he needs is an invitation from a friend, or even a sight of a bar while traveling, for example.
- It is natural to get into that state or be “born” in that state. So, he gets drunk at every opportunity. See “[Bhava and Jāti – States of Existence and Births Therein](#)” for more details.

12. However, like everything else, any birth is subjected to decay and suffering: “*jāti paccayā jarā, maraṇa, ... dukkhakkhanda samudhaya hoti*.” This happens in many stages, as we describe below.

- But in the case of a single drinking event, that state of intoxication finally ends, possibly with a big headache and a massive hangover. That episode ends with nothing to show for it but a hangover.
- Even worse, now he is “hooked.” He has formed a bad habit, strengthening even more if he does it repeatedly. Because each time the PS runs, the *viññāṇa* for that habit gets more fuel, and the *bhava* get stronger.

Uncountable *Idappaccayatā* PS Cycles During a Lifetime

13. It is essential to realize that the above PS cycle does not run to its conclusion when the drinking “event” is over. Instead, the cycle can repeatedly occur unless it is stopped willfully or deliberately.

- And the way to do that is to learn Dhamma and develop good habits and become a “*sampajanno*”; see “[Kāyānupassanā – The Section on Habits \(Sampajanapabba\)](#).”
- However, if the teenager keeps his bad habit, he gets trapped in that *bhava*, the more *jāti* that occurs, i.e., he will be drunk more frequently. When one gets drunk, one tends to behave like an animal without any sense of decency, and the long-term consequences could be rebirth as an animal; see below.
- Furthermore, such *Idappaccayatā* PS cycles run numerous times, even during the day, whenever we act with *avijjā*.

Memories Can trigger *Idappaccayatā* PS Cycles.

14. And it is not even necessary to participate in a “drinking event” to run another PS cycle. He may be sitting at a desk trying to study and start going through the PS cycle just by recalling a past event or a scheduled future event.

- He would start with *mano saṅkhāra* and *vacī saṅkhāra* (*vitakka/vicāra* or planning), thus generating (and strengthening) the *viññāṇa* for drinking, generating *nāmarūpa* (visuals of places, friends, alcohol bottles, etc.), and thus going through the rest of the cycle: *saḷāyatana*, *samphassa*, *vedanā*, *taṇhā*, *upādāna*, *bhava*, *jāti* (“living it”), repeatedly.
- Thus numerous such PS cycles can run at any time, probably increasing their frequency as the *bhava* or the habit builds up.
- The stronger the *bhava* or habit is, it will be harder to break it. This is why meditation, together with another good habit to work on, should be undertaken to replace a bad habit. While in meditation, one can contemplate the adverse consequences of the bad habit. Developing a good habit will keep the mind away from the bad habit. See “[Habits and Goals](#)” and also “[Bhāvanā \(Meditation\)](#).”

Connection to *Upapatti* PS Cycles

15. If the teenager keeps his bad habit, that “*viññāṇa* of a drunkard” will only grow with time. If it stays strong at the *cuti-paṭisandhi* moment (at the end of his human *bhava*), it could lead to a new *upapatti bhava* via the *upapatti Paṭicca Samuppāda* process mentioned in #1 above “[Akusala-Mūla Upapatti Paṭicca Samuppāda](#).”

- Such a *viññāṇa* is likely to give rise to rebirth in the animal realm, as mentioned in #13.

16. Details on *Idappaccayatā Paṭicca Samuppāda* in a new subsection, “[Paṭicca Samuppāda During a Lifetime](#).”

Note: This post was re-written to replace an early post, “Akusala-Mūla Pavutti (or Pravurthi) Paṭicca Samuppāda.” I had not realized at that time that what the Waharaka *Thero* had described in Sinhala as “Pavutti (or Pravurthi) Paṭicca Samuppāda” is really the *Idappaccayatā Paṭicca Samuppāda* in the *Tipiṭaka*.

9.11.1 Introduction – What is Suffering?

Revised June 6, 2021; re-written June 14, 2021; revised November 8, 2022

“*Dukkha Sacca*” Means “The Truth About Suffering”

1. “*Dukkha sacca*” (the latter pronounced “sachcha”) refers not only to suffering hidden in the rebirth process but also to the elimination of it.

- Buddha never denied that there are “pleasures to be had” in this world. He pointed out that *Deva* and *Brahma* realms have enhanced sensual (*kāma*) and *jhānic* pleasures compared to the “pleasures” available in the human world.
- But the problem is that ANY given sentient living being spends much more time in the four lowest realms (*apāyās*) than in the human, *Deva*, and *Brahma* realms (in the rebirth process.) See, “[Rebirth – Connection to Suffering in the First Noble Truth.](#)”
- Therefore, there is NET suffering in the rebirth process by a HUGE margin.

Misconceptions About *Dukkha Sacca* (First Noble Truth)

2. Many people are addicted to the temporary “peace of mind” achieved by breath meditation or similar “meditation techniques.” But that deals with only “superficial suffering.” The Buddha pointed out that there is much harsher suffering in the rebirth process.

- Buddha Dhamma is all about ending that harsher and longer-term suffering AND getting to a state with ABSOLUTELY NO suffering. “*Nibbānic bliss*” or “*happiness in Nibbāna*” refers to the bliss of not having to experience even a trace of suffering.
- A crude analogy is someone who has had a migraine headache all his life and finally getting rid of it. However, it is only an analogy, because *rūpa*, *vedanā*, *saññā*, *saṅkhāra*, and *viññāṇa* are all ABSENT in *Nibbāna* (after the death of an *Arahant*.)
- The three ultimate realities of *citta*, *cetasika*, and *rūpa* that describes “this world” are absent in *Nibbāna*. So while *Nibbāna* exists, we cannot describe it in terms of our terminology.

- See #4 of the post, “[Six Root Causes – Loka Samudaya \(Arising of Suffering\) and Loka Nirodhaya \(Nibbāna\)](#).”

Nibbānic Bliss Is About Total Absence of Suffering

3. This is also explained, for example, in the “[WebLink: suttacentral: Nibbānasukha Sutta \(AN 9.34\)](#).” The verse “*Nibbānaṃ paramaṃ sukhaṃ*” DOES NOT refer to a “*sukha vedanā*” in the sense of a feeling because there are no *vedanā* in *Nibbāna*. See, “[Nibbāna “Exists,” but Not in This World](#).”

- Many people equate “*jhānic* experiences” with *Nibbāna*. *Jhāna* are the mental states of *Brahma* worlds, and thus, *jhānic* experiences belong to “this world of 31 realms.” Any sentient being, including any animal, had attained *jhāna* and had been born in *Brahma* worlds many times in their deep past!
- ***Nibbāna* is simply the total absence of ANY suffering. That is the “Nibbānic bliss.”** We cannot compare that to any “*sukha vedanā*” experienced by any person, *Deva* or *Brahma*. That is why Prince Siddhattha and many kings and wealthy people gave up those “princely lives” to seek *Nibbāna*.
- So, how bad is this suffering in the rebirth process?

Understanding “True Suffering” – It Is in the Rebirth Process

4. In the post “[Rebirth – Connection to Suffering in the First Noble Truth](#),” we discussed references in the *Tipiṭaka* that MOST rebirths are in the four lowest realms (*apāyās*.) We can only see the suffering in one of them, the animal realm.

- The Buddha has discussed, in detail, the types of suffering in the other three *apāyās*. For example, in the “[WebLink: suttacentral: Bālāpandita Sutta \(MN 129\)](#)” and “[WebLink: suttacentral: Devadūta Sutta \(MN 130\)](#)” the Buddha explains, in detail, suffering encountered in various lower realms.
- English translation of the first one: “[WebLink: suttacentral: The Foolish and the Astute \(MN 129\)](#).” That *sutta* explains that a person who engages in immoral activities (“*bālo*” or a “fool”) can expect the consequences (*kamma vipāka*) both in this life and in future existences in the *apāyās*. **The account of the experiences in the *niraya* (lowest realm) is terrifying.**
- A related *sutta* is the “[WebLink: suttacentral: Pāyāsi Sutta \(DN 23\)](#).” It is about the wrong views that there is no rebirth process, etc. See the English translation there: “[WebLink: suttacentral: With Pāyāsi \(DN 23\)](#).” For those who have doubts about the validity of the rebirth process or the existence of *apāyās*, it is a good idea to read the above *suttās*.

Luckily We Don’t Remember Our Previous “*Bhava*”

5. As we discussed in the post “[Rebirth – Connection to Suffering in the First Noble Truth](#),” we are reborn with human bodies many times during a “human *bhava*” that can last many thousands of years is why some children can recall their past HUMAN lives. Those rebirths took place during the SAME human *bhava*.

- Some *yogis* with *abhiññā* powers can see their RECENT *bhava* just before the current *bhava*. Almost all of them are likely to have had *Brahma bhava* just before the current human *bhava*. As we have discussed, it is unimaginably hard to get a human *bhava* FROM a human or lower *bhava* (ie., from the *apāyās*.) Furthermore, those who can easily cultivate *jhāna* are VERY likely to have had a *Brahma bhava* just before this human *bhava*. Therefore, such *yogis* may be able to see their previous *Brahma bhava*. But there are no accounts of anyone recalling an animal or other existences in the *apāyās*.
- **Thus, different *bhava* are isolated**, and it is difficult to “look back,” especially past existences in the lower realms.
- That is fortunate because it would give nightmares to recall such levels of suffering in the *apāyās* described in #4 above. However, we can also get an idea about the level of suffering in the *apāyās* from the following *sutta*.

Sattisata Sutta (SN 56.35) – Take That Deal!

6. In the “[WebLink: suttacentral: Sattisata Sutta \(SN 56.35\)](#),” the Buddha advised *bhikkhus* to commit all their waking time to strive for *Nibbāna*. To drive the point home, the Buddha gave an analogy. It is a short *sutta*, and I will translate it below. Good English translation at Sutta Central: “[WebLink: suttacentral: A Hundred Spears \(SN 56.35\)](#).”

“*Bhikkhus*, suppose there was a man with a remaining life span of a hundred years. Someone would say to him: ‘Come, good man, in the morning they will strike you with a hundred spears; at noon they will strike you with a hundred spears; in the evening they will strike you with a hundred spears. And you, good man, being struck day after day by three hundred spears, will live a hundred years. Then, after a hundred years have passed, you will make the breakthrough to the Four Noble Truths and *Nibbāna*. That is guaranteed if you agree to bear that suffering.’”

“It is a wise decision, *bhikkhus*, for that man to accept the offer. For what reason? Because this *samsāra* is without a discoverable beginning. You have suffered mightily by uncountable blows by spears, swords, axes, etc. (and will do so in the future too unless you attain *Nibbāna*.)

However, *bhikkhus*, I do not say that the path to *Nibbāna* is accompanied by suffering or displeasure. Instead, the path to *Nibbāna* is accompanied only by happiness and joy.

“Therefore, *bhikkhus*, you should strive to understand: ‘This is suffering. These are the causes of that suffering. The removal of those causes will lead to the cessation of suffering. This is the way to the cessation of suffering.’”

Mistranslations of Some *Suttās* and Suppression of Selected *Suttās*

7. As you all would have seen, many people ignore those *suttās*. They say those *suttās* are “later additions” or “have been distorted after the Buddha.” Then they pick and choose a few *suttās* and mistranslate them to prove their point! For example, in his first discourse, Buddha stated, “..*ayamantimā jāti, natthi dāni punabbhavo*’ti.” OR “..this is the last birth. There is no more gasping of a repeated *bhava*.” Is “[WebLink: suttacentral: Dhammacakkappavattana Sutta \(SN 56.11\)](#)” a later addition?

- I am willing to discuss ANY *sutta* in *Tipiṭaka*. But please refrain from just expressing OPINIONS or quoting other mistranslations. We are discussing Buddha’s teachings. You may disagree, and that is fine, but don’t distort his teachings. Buddha’s teachings ARE contrary to the “accepted norms” and that is exactly why we all have been trapped in this suffering-filled rebirth process for SO LONG! The verse, “***pubbe ananussutesu dhammesu cakkhum udapādi, ñāṇam udapādi, paññā udapādi, vijjā udapādi, āloko udapādi...***” (“such was the vision, knowledge, wisdom, penetrating vision, and the way to separate from the world, that arose in me regarding **these teachings not heard before...**”) appears eight times in that first discourse of the Buddha for this reason.
- The Buddha explained what kind of suffering to be expected and explained HOW such horrible suffering arises (*dukkha samudaya*) and HOW we can stop it from arising (*dukkha nirodhaya*.) Of course, the way to achieve that is the Noble Eightfold Path. To follow that Path, one MUST first understand the first 3 Noble truths.
- By the way, Buddha also explained that suffering is not caused by one’s soul (or *ātman* in Hinduism.) There is no such thing, to begin with. *Paṭicca Samuppāda* starts with “*avijjā paccayā saṅkhāra*.” That process will proceed irrespective of a specific “soul.” There is only a “*satta (satva)*” engaged in generating *saṅkhāra* due to *avijjā*. See #3 of “[Five Aggregates and Tilakkhana – Introduction](#).” **This is a deeper point that I will discuss in detail in upcoming posts.**

Dukkha Samudaya – Explained by Akusala-Mūla Paṭicca Samuppāda

8. The two main *akusala-mūla Paṭicca Samuppāda* schemes describe the mechanisms whereby suffering in this world arises (*dukkha samudaya*.)

- The “[Idappaccayatā Paticca Samuppāda](#)” describes how we accumulate *kammic* energies during our lives. Such *kammic* energies “pile-up” and lead to future existences, mainly in the *apāyās*, and that is described in “[Akusala-Mūla Upapatti Paticca Samuppāda](#).”
- As we have seen, any birth “in this world” WILL lead to suffering: Starting with “*avijjā paccaya saṅkhāra*” those cycles ALWAYS end up with “*jāti paccayā jarā, maraṇa, soka-parideva-dukkha-domanassupāyāsā sambhavan’ti*” and the “**whole mass of suffering**.”

Dukkha Nirodhaya – Explained by Kusala-Mūla Paṭicca Samuppāda

9. The “[Kusala-Mūla Paticca Samuppāda](#)” describes the process of eliminating suffering.

- “*Kusalamūla paccayā saṅkhāra*” WILL lead to births of *Ariyās* (*Sotāpanna* through *Arahant*.) But, since they are also reborn into this world, the cycle still ends with old age and death: “*jāti paccayā jarā maraṇaṇi. Evametesani dhammānaṇi samudayo hoti.*”
- But upon the death of an *Arahant*, there is a total absence of suffering. **Thus, it will lead to the end of suffering.**

Two Types of Saṅkhāra in Dukkha Samudaya and Dukkha Nirodhaya

10. Those *saṅkhārā* generated with *avijjā* (we can call them “*akusala saṅkhāra*”) will perpetuate the rebirth process and will lead to more suffering.

- On the other hand, “*kusala saṅkhāra*” generated with *paññā* (comprehension of the Noble Truths) will lead to *Arahanthood* and the stopping of the rebirth process. **That is Nibbāna, the total absence of suffering!**

Connection to the Root Causes

11. As we saw in the previous post, “[Six Root Causes – Loka Samudaya \(Arising of Suffering\) and Loka Nirodhaya \(Nibbāna\)](#)” “*akusala saṅkhāra*” arise due to *lobha*, *dosa*, *moha*, and the mundane versions of *alobha*, *adosa*, and *amoha*.

- To generate “*kusala saṅkhāra*” one must cultivate the *lokuttara* (deeper) versions of *alobha*, *adosa*, and *amoha* with comprehension of the Noble truths/*Paṭicca Samuppāda*/*Tilakkhaṇa*. Note that those three (Noble truths/*Paṭicca Samuppāda*/*Tilakkhaṇa*) are equivalent, and I may refer to just one of them in most cases.
- To complete the discussion on suffering, we need to discuss the three categories of suffering.

Three Categories of Suffering

12. The three categories of suffering are stated in the [WebLink: suttacentral: Dukkhatā Sutta \(SN 45.165\)](#): “...*Dukkha dukkhatā, saṅkhāra dukkhatā, vipariṇāma dukkhatā*—*imā kho, bhikkhave, tisso dukkhatā.*”

- It does not make sense to try to translate the names of the three categories: *Dukkha dukkhatā*, *saṅkhāra dukkhatā*, and *vipariṇāma dukkhatā*. Instead, it is better to understand the meanings of those three types of suffering. Here, *dukkhatā* means “type of *dukkha*.”
- Thus, we can say that the 3 categories of suffering are *dukkha-dukkha*, *saṅkhāra-dukkha*, and *vipariṇāma-dukkha*.

Worst Is the Dukkha-Dukkha

13. As the name implies, **the strongest suffering is the *dukkha-dukkha*** that arises DIRECTLY due to *kamma vipāka*. That category is associated with significant suffering (serious injuries, diseases like cancer, etc.) that we face DURING a lifetime. Of course, **when born in an *apāya*, most of that existence is filled with *dukkha-dukkha*.**

- Therefore, most of the suffering that we discussed above comes under *dukkha-dukkha*.
- The next post will discuss all three categories in more detail: “[Introduction -2 – The Three Categories of Suffering](#).”

9.11.2 Introduction - 2 – The Three Categories of Suffering

June 20, 2021; revised June 10, 2022; October 12, 2002 ; April 21, 2023

The three categories of suffering are *dukkha dukkhatā*, *saṅkhāra dukkhatā*, and *vipariṇāma dukkhatā*.

Three Categories of Suffering

1. In the previous post, “[Introduction – What is Suffering?](#)” we discussed what suffering means in Buddha Dhamma. Here we continue that discussion. The three categories of suffering are stated in the [WebLink: suttacentral: *Dukkhatā Sutta* \(SN 45.165\)](#): “...*Dukkha dukkhatā, saṅkhāra dukkhatā, vipariṇāma dukkhatā—imā kho, bhikkhave, tisso dukkhatā.*”

- It does not make sense to try to translate the names of the three categories: *Dukkha dukkhatā*, *saṅkhāra dukkhatā*, *vipariṇāma dukkhatā*. Instead, it is better to understand the meanings of those three types of suffering. Here, *dukkhatā* means “type of *dukkha*.”
- Thus, we can say that the three categories of suffering are ***dukkha-dukkha*, *saṅkhāra-dukkha*, and *vipariṇāma-dukkha*.**

2. The three types of suffering are associated with the characteristics of a *saṅkhata*, as pointed out in the *Tipitaka* Commentary *Peṭakopadesa*, “[5. Hāravibhaṅgapañcamabhūmi](#):”

“*Tattha tīṇi saṅkhatalakkhaṇāni tisso dukkhatā: uppādo saṅkhatalakkhaṇam saṅkhāradukkhatāya dukkhatā ca, vayo saṅkhatalakkhaṇam vipariṇāmadukkhatā ca, aññathattaṃ saṅkhatalakkhaṇam dukkhadukkhatāya dukkhatā ca, imesaṃ tiṇṇaṃ saṅkhatalakkhaṇānaṃ..*”

Translation:

“Three *saṅkhata lakkhaṇa* correspond to three types of suffering (*tisso dukkhatā*):

- (i) ***uppāda*** is a *saṅkhata lakkhaṇa* that corresponds to *saṅkhāra dukkhatā*. A *saṅkhata* arises due to (*avijja paccaya*) *saṅkhāra*. That itself takes effort (suffering). Furthermore, it will also lead to future suffering.
 - (ii) ***vayo*** is a *saṅkhata lakkhaṇa* corresponding to *vipariṇāma dukkhatā*. Any *saṅkhata* is destroyed (*vaya*), and that leads to *vipariṇāma dukkhatā*.
 - (iii) ***aññathatta*** is a *saṅkhata lakkhaṇa* corresponding to *dukkha dukkhatā*. Any *saṅkhata* undergoes unexpected changes (*aññathatta*) during existence, and that is *dukkha dukkhatā*.
- **All three types of *dukkha* WILL NOT stop until *saṅkhāra*-generation via “*avijjā paccayā saṅkhāra*” stops.**

What Is Suffering Based on?

3. What is our whole world? We sense external *rūpa* through our five physical senses (internal *rūpa*) and then think about them. Thus we can sum up our world as what we experience through our INTERNAL six senses (eyes, ears, nose, tongue, body, mind). If our six internal senses stop working or weaken, we suffer.

- Using those sensory faculties, we experience six types of *rūpa* in the external world: visuals, sounds, smells, tastes, touches, and *dhammā*. If those are not to our liking, we suffer. On the sixth type of *rūpa*, see “[What are Rūpa? – Dhammā are Rūpa too!](#)”
- Those twelve (six INTERNAL and six EXTERNAL) make up “our world.” Everything is included in those twelve—all 12 lead to suffering, not only in this life but also in future lives.
- First, let us discuss the three types of *dukkha* we experience during a lifetime.

Three Types of *Dukkha* During Lifetime

4. Any *rūpa* changes (sometimes unexpected), leading to suffering. First, let us consider whether we can keep our physical bodies (internal *rūpa*) and their associated sensory faculties to our satisfaction.

- We may be able to maintain our five physical senses to our satisfaction for many years. And this is why people do not even take the time to think about these concepts.
- We start feeling this hidden suffering when we pass middle age. For example, eyesight, hearing, and taste will get weaker. Our bodies start sagging and the brain becomes weaker too. That is *vipariṇāma-dukkha*.
- So, what do most of us do? We start looking for ways to “prop them up”: We can take temporary measures by wearing glasses and hearing aids, adding more spices/food, and doing cosmetic procedures to maintain the body’s appearance. There is absolutely nothing wrong with some of these “fixes”; for example, we need to see, so we must take precautions to protect our eyes and start wearing glasses. Ditto for hearing aids and even for adding spices to food. Some people resort to cosmetic procedures (coloring their hair, for example) to maintain self-confidence.
- These “remedies” require effort and are part of *saṅkhāra-dukkha*.

5. Note that those two types of *dukkha* can also arise due to external *rūpa*.

- For example, our houses, cars, or other “valuable things” are also *saṅkhata*, just like our physical bodies. They also undergo (both expected and unexpected) change and will cease to exist in the future. That also contributes to our *vipariṇāma-dukkha*.
- We also need to work to repair them and try to maintain them to our satisfaction. That is also part of *saṅkhāra-dukkha*.
- During both types of *saṅkhāra* generation, we will generate *kamma* that will lead to *kamma vipāka*. Those manifest as *dukkha-dukkha*. For example, if a woman gets a “facelift,” she must go to a surgeon and pay. If we need to repair a car, we must take it to a mechanic and pay him. All these activities involve *dukkha-dukkha*.

Mental Stress – Big Part of *Saṅkhāra-Dukkha*

6. The leading cause of suffering is in our MINDS. For example, a wealthy person may suffer due to losing something he owns, and a poor person may suffer due to the inability to get what he wants. Either person becomes distraught due to his/her mind activities: attachment to what one has or craving for what one desire. This is another aspect of the Pāli term *anicca*. It is primarily mental and is called “*saṅkhāra dukkha*.” It arises through the struggles we engage in, to maintain things to our satisfaction.

- For example, when we buy a lovely house, endless things need to be done to “maintain it to our satisfaction”; this is also part of *saṅkhāra dukkha*. Sometimes we don’t even realize this suffering. Think about how much work we do to prepare a nice meal; then we enjoy it in 10-15 minutes, and then we need to spend more time cleaning up. We slaved through hours to get a brief sensory pleasure.

We Engage in *Saṅkhāra* Due to *Avijjā*

7. **The suffering that we discussed so far arises from one aspect of *anicca*:** Anything in this world is subjected to decay, and destruction, nothing in this world is exempt from that. That is part of “*vipariṇāma dukkha*,” suffering that arises due to changes and decay (both expected and unexpected.)

- *Saṅkhāra-dukkha* is associated with maintaining our internal *rūpa* and acquiring and maintaining external *rūpa*. All such efforts require thinking, speaking, and bodily actions; they involve *mano*, *vacī*, and *kāya saṅkhāra*. See, “[Saṅkhāra – What It Really Means](#).”
- *Dukkha-dukkha* arises even without us realizing it, while we seek remedies for *vipariṇāma dukkha* with various activities involving *mano*, *vacī*, and *kāya saṅkhāra*. That leads to the *kamma* generation. Part of such *kammā* will bring *vipāka* into this life, primarily as physical work.
- As we will discuss, if they involve *abhisāṅkhāra*, those will lead to *kamma vipāka* in future lives.

Three Types of *Dukkha* in the Rebirth Process

8. “*Saṅkhāra*” means “*saṇ*” + “*khāra*” or our efforts to accumulate/maintain things in this world (both internal and external) to our satisfaction. Any *saṅkhata* (both internal and external) arises due to such efforts. See, “[Saṅkhāra – What It Really Means](#).”

- (Note that any action to live in this world involves *saṅkhāra*. For example, breathing is a *kāya saṅkhāra* that does not have *kammic* consequences. **Those that involve *lobha*, *dosa*, and *moha* are a particular type of *saṅkhāra*; they are *abhisāṅkhāra*.** But this distinction is not always emphasized (like in “*avijjā paccayā saṅkhāra*,” but one needs to be able to figure that out.)
- In the end, all such efforts are in vain. No matter how much effort we make, our bodies will fall apart at old age (or even earlier), and when we die, we will have to leave behind all those external “valuables” that we accumulated with much effort. That is why we say *saṅkhāra* arise due *avijjā*, i.e., “*avijjā paccayā saṅkhāra*.” **All our efforts (based on “*saṇ*” (greed, anger, and ignorance) are due to *avijjā*!**
- “*Abhisāṅkhāra*” generation is the root cause for the generation of all types of *saṅkhata*, internal and external. That takes place via *Akusala-mūla Paticca Samuppāda*.

9. In that broad sense, the three types of *dukkha* can be attributed to the three stages of a *saṅkhata*: *uppāda* (arising,) *vaya* (destruction,) and existence (*ṭhiti*.) The three stages are stated in the “[WebLink: suttacentral: Saṅkhatalakkhana Sutta \(AN 3.47\)](#).”

- The three types of *dukkhatā* correspond to the three *lakkhaṇa* of a *saṅkhata*.
 - A *saṅkhata* arises due to *Paticca Samuppāda* starting with “*avijjā paccayā saṅkhāra*.” Thus the “*uppāda lakkhaṇa*” of a *saṅkhata* is associated with *saṅkhāra dukkhatā*.
 - Any *saṅkhata* will eventually be destroyed and has the “*vaya lakkhaṇa*.” That is the *vipariṇāma dukkhatā*.
 - In between birth and death, a *saṅkhata* exists (*ṭhiti*). However, it undergoes unexpected change (*aññathā*), and that gives rise to *Dukkha dukkhatā*. That is expressed by, “*tiṭṭhassa saṅkhata lakkhaṇam, dukkha dukkhata*.”
- Note that such unexpected changes (*aññathā*) take place due to *vipāka* of *kamma* done previously with (*abhi*)*saṅkhāra* via “*avijjā paccayā saṅkhāra*.” Thus, *Dukkha dukkhatā* manifests as *kamma vipāka*.

10. The *Petakopadesa* — a Commentary in the *Tipiṭaka* — explains how the three types of *dukkhatā* correspond to the three *lakkhaṇa* of a *saṅkhata*. See “[WebLink: suttacentral: 5. Hāravibhaṅgapañcamabhūmi](#)” in the first paragraph. It is hidden!

“*Tattha tīṇi saṅkhatalakkhaṇāni tisso dukkhatā uppādo saṅkhatalakkhaṇam, saṅkhāradukkhatāya dukkhatā ca saṅkhatalakkhaṇam, vipariṇāmadukkhatāya dukkhatāti aññathattam ca saṅkhatalakkhaṇam, dukkhadukkhatāya ca dukkhatā,*”

Dukkha-Dukkha

11. The worst category of suffering in the rebirth process arises as *kamma vipāka* giving rise to rebirth in the *apāyā*. Beings in the *apāyā* encounter harsher suffering; in the *niraya* (lowest realm), that is all one feels.

- A person who made money by killing another or stealing from another may live well in this life (at least outwardly) but will be subjected to much suffering in the upcoming births. This is the worst category of **dukkha-dukkha**, which arises due to past immoral actions. Until the death of the physical body, even an *Arahant* is subjected to *dukkha-dukkha*.
- Therefore, the third category of suffering, *dukkha-dukkha*, arises from immoral acts (*pāpa kamma/akusala kamma*.) The severity of suffering depends on the severity of the violation. *Paṭicca samuppāda* (“*pati+ichcha*” leading to “*sama*”+“*uppāda*”) describes the underlying mechanism; see, “[Paṭicca Samuppāda – “Pati+ichcha” + “Sama+uppāda”](#),” where it is briefly discussed how one’s actions lead to effects that are similar “in-kind.”
- The results of our actions will not be according to our wishes. Instead, they will be according to root causes (*lobha, dosa, moha*) and prevailing conditions at any time. *Paṭicca samuppāda* is Nature’s law-enforcing mechanism.

Dukkha-Dukkha in Rebirth Process Is Delayed Results of “Bad Saṅkhāra”

12. All our actions (including speech and thoughts) are initiated by *saṅkhāra*. Thus, *dukkha-dukkha* arises from the worst forms of *saṅkhāra* (involving *lobha, dosa, and moha*.) which we call immoral actions (*pāpa kamma/akusala kamma*.) This *dukkha-dukkha* is the main form of suffering discussed in the previous post, “[Introduction – What is Suffering?](#)”

- Everything happens due to a reason (causes). Doing a good deed will lead to good results, and evil deeds will lead to bad results. This is the basis of science and also how nature works. “Every action has a reaction.” It is guaranteed, sooner or later.
- This is why rebirth is a reality of nature. Some people live lavishly with money earned by immoral deeds. They WILL suffer the consequences in future rebirths.
- It also explains why different people are born with different levels of health, wealth, beauty, etc., and why there are innumerable varieties of animals with different levels of suffering. Those are all results of evil deeds done in previous lives.

Saṅkhāra-Dukkha Gives Rise to All Dukkha

13. The “[WebLink: suttacentral: Vicayahāravibhaṅga \(Ne 5\)](#)” in the *Petakopadesa* states the following: “*Saṅkhāradukkhatāya pana loko anupādisesāya nibbānadhātuyā muccati, tasmā saṅkhāradukkhatā dukkham lokassāti katvā dukkhamassa mahabbhayanti.*”

- The meaning is “If *saṅkhāra-dukkha* can be overcome, one will get to *Nibbāna*. Therefore, *saṅkhāra-dukkha* is the one with great danger (*mahabbhaya* or *mahā + bhaya*.)”
- An average human perceives the cultivation of (*abhi*)*saṅkhāra* as “pleasure.” An extreme example is raping a woman seeking sensory gratification. That involves *vacī* (planning/thinking) and *kāya* (implementing) *abhisāṅkhāra*. It could be enjoyable at that time. However, he will pay for that brief gratification for millions of years. Unimaginable but true!

- Thus, any such “pleasure” is short-lived (*vipariṇāma dukkha*) and will bring unimaginable *dukkha-dukkha* in the future. **One must “see” the “hidden suffering in sensory pleasures” before getting to the *Sotapanna* stage.**
- Until then, humans see the cultivation of (*abhi*)*saṅkhāra* as “pleasure.”

9.11.3 Avijjā Paccayā Saṅkhārā

Revised April 26, 2019; August 29, 2019

“Avijjā paccayā saṅkhārā” (Ignorance as root cause for immoral/unfruitful actions and thoughts). That is the same as saying “avijjā nirodha” leads to “saṅkhārā nirodha.” All following terms in the *akusala-mūla paṭicca samuppāda* cycle will stop arising and **thus all suffering stop arising with the complete removal of avijjā.**

1. *Avijjā* (loosely translated as ignorance), is defined in many ways: not knowing the Four Noble Truths, not understanding the Noble Eightfold Path, not understanding the Three Characteristics of nature, not understanding *dukkha*, etc.

- All these are correct, but just reading about them is not going to help. The mind needs sees how suffering arises due to immoral and unwise actions (and thoughts).
- The *paṭicca samuppāda* cycle clarifies how the three kinds of suffering arise. One does not comprehend the true nature of the world, and think (and do) immoral/unfruitful things.

2. You may be wondering whether I was untruthful when I said this series will be in “plain English.” Especially If you have not read the first two posts. I did describe these three terms in plain English, and there is no easy way to get the same meaning across without using Pāli words.

- So, once I clarify them, I have to use these Pāli terms in order to keep a post to a reasonable length. One can always go back and read previous introductory posts to refresh memory.

3. The standard interpretation of “*avijjā paccayā saṅkhārā*” reads “ignorance leads to mental formations.” That does not get the underlying ideas across and also misleading. I believe that “ignorance as root cause and condition for immoral/unfruitful actions” is a better translation, and I will explain why.

First let us look at the difference between immoral acts and unfruitful acts.

- We saw that *dukkha dukkha* in the four lower realms is the worst form of suffering. And we saw the cause of that as the immoral acts done with the ten defilement or *dasa akusala*. Thus worst types of *saṅkhārā* are responsible for *dukkha dukkha* in the lower four realms.
- Why do we do any of such potent immoral acts that give rise to *dukkha dukkha* of the worst kinds in the lower four realms? Because to a very high degree of ignorance of the consequences of such acts. For example, if one does not believe in rebirth, then it is hard to see how such immoral acts can have consequences. After all, there are many people engaged in unethical behavior who seem to be enjoying life.
- Such high level of ignorance is called *moha* (which means totally covered, totally blind mind), and the closest English word is “delusion.”

- A murderer who PLANS and kills another human is a good example. He thinks that if he can plan it well, he can avoid “getting caught” by the justice system and then will not have to pay for his actions. There are MUCH WORSE consequences waiting for him, regardless of whether the police catch him or not. He does not know that he is likely to get killed a thousand times in return in future births.

4. Thus **immoral actions** like killing, stealing, etc are responsible for the worst outcomes, the worst kinds of future suffering; these are the worst forms of *saṅkhārā*.

- On the other side of the spectrum for *saṅkhārā* are the **unfruitful actions** that lead to lower levels of *saṅkhārā dukkha* in this very life. For example, when we get attached to things/people via strong attachments or dislikes, that can lead to mental suffering in this life.
- However, such unfruitful actions can also form bad habits that can grow into more significant problems with time. Someone acting with greed or dislikes habitually can tend to make those stronger and eventually grow into stronger forms of excess greed and hate, leading to immoral acts. We will discuss how this happens via the *paṭicca samuppāda* steps.
- Of course the severity of the consequences will be according to the severity and nature of the act: “*pati+ichcha*” leading to “*sama*” + “*uppada*”, as we will discuss in detail later. See, “[Paticca Samuppāda – “Pati + ichcha” + “Sama + uppada”](#)” for the meaning of *paṭicca samuppāda*. When one is even willing to do immoral acts to get what one wants, the consequences will also be stronger and “in-kind.” Then there are “unfruitful acts” that can lead to comparatively minor forms of suffering in the near term but can also add up to more significant effects in the long run.
- Thus one has to think beyond the five precepts to understand the origin of *saṅkhārā dukkha*. I know I am repeating some statements, but I want to make sure to get these essential ideas across.

I hope it is clear now why “immoral/unfruitful actions, speech and thoughts” is a better translation for *saṅkhārā* than “mental formations.” *Saṅkhārā* are all mental; *kāya* and *vacī saṅkhārā* are those thoughts that LEAD TO actions and speech.

5. Now let us discuss the other erroneous aspect of the translation of “*avijjā paccayā saṅkhārā*” as “ignorance leads to mental formations.” For further details, see, “[What Does “Paccaya” Mean in Paticca Samuppāda?](#).”

- Ignorance (*avijjā*) is not there all the time. Even the worst criminal does not do immoral acts or even unfruitful acts ALL THE TIME. **But when he does**, such actions are done with ignorance as a root cause.
- It applies to all of us: **The more we learn Dhamma, the more we get rid of ignorance. Then will we not think or do either immoral or unfruitful things, i.e., any type of (*abhi*)saṅkhārā.**

6. **A closely related issue to think about is what kind of control we have over *saṅkhārā*.** There are three types of *saṅkhārā*: *kāya saṅkhārā* (those that lead to physical acts), *vacī saṅkhārā* (those that lead to speech), and *mano saṅkhārā* (those that automatically arise due to our *gati*).

- If we know right from wrong, we can control MOST of our **physical actions and speech**. We may even start saying something terrible and stop ourselves in the middle of the sentence.
- Depending on the emotional state of the mind, it may be not possible to control our actions under extreme stressful situations. Even a normally calm person may get into a rage if he catches his wife engaging in sex with another man. He may even kill that man in the heat of the moment.
- We also know “good people” who were tempted to do immoral things. That is especially true if the “payout or the perceived pleasure” was big enough. That is the danger of “not being free of the four lower realms.”
- More information at: “[Saṅkhārā – What It Really Means.](#)”

7. The third category, *mano saṅkhārā*, are also hard to control by will power instantly. I think we all can think about situations where it was hard to control greedy/hateful thoughts. We may start thinking about

something, and the mind takes us all over the place. Such thoughts normally involve “what we could have,” and also fantasize about all kinds of sense pleasures. **One needs to stop such thoughts and think about their consequences willfully.**

- These can only be lessened and ultimately stopped by changing one’s habits (“*gathi*”) and cravings (“*āsavas*”). That applies to *kāya* and *vacī saṅkhāra* done on “impulse” or “temptations” discussed above.
- And that comes about by realizing the unfruitfulness of any *saṅkhāra*. That is strongly related to comprehending the Three Characteristics. We will be analyzing this in the upcoming steps of *paṭicca samuppāda*.

8. Thus the key is to change one’s bad habits over time. Then, gradually, even such *mano saṅkhāra* will STOP FROM ARISING.

- It may be hard to believe, but a significant part of this change of habits and cravings comes from comprehending the Three Characteristics of this world. One would realize that it does not MAKE SENSE to hurt others (including animals) to get sense pleasure for oneself. That makes a BIG DIFFERENCE in one’s outlook about what a “good life is.”
- Contrary to what most people believe, a life filled with sense pleasures is not a “good, peaceful, life.” An extravagant life can eventually become a “burdened life” because our body’s ability to accommodate sense pleasures goes down as we age. This realization itself leads to “cooling down” of the mind. Anyway, as we discuss further, and if one contemplates more along with these ideas, these concepts will slowly become apparent.

9. In summary, all three kinds of suffering arise due to *saṅkhāra* that range from highly immoral acts to seemingly innocent unfruitful actions. All *saṅkhāra* arise due to *avijjā*.

- That is why “*avijjā paccayā saṅkhārā*” is the first step in the *paṭicca samuppāda* cycle, which ends with “*jara, maraṇa, soka, parideva, dukkha,*” all kinds of suffering.
- At the *Arahant* stage, one has removed *avijjā* (i.e., optimized *paññā*), and thus *abhisāṅkhāra* that lead to rebirth cannot arise; that is *Saupadisesa Nibbāna*. At the death of the physical body, the *Arahant* is not reborn and thus, at that time, all *saṅkhāra* cease to arise (*Anupadisesa Nibbāna* or *Parinibbāna* or “complete *Nibbāna*”).
- **That is how “*avijjā nirodha*” leads to “*saṅkhāra nirodha*.”**

Thus we can see in a simple way how suffering arises with immoral/unfruitful actions as causes. One engages in such activities due to ignorance of the true nature of the world: *anicca, dukkha, anatta*. Here we discussed how ignorance gives rise to *saṅkhāra*. In the next post, we will discuss how *saṅkhārā* leads to *viññāṇa* (or defiled consciousness). That is the next step leading to *dukkha* (suffering).

Next, “[Saṅkhāra paccayā Viññāṇa – 1](#)”,

9.11.4 Saṅkhāra Paccayā Viññāṇa – 1

1. “*Saṅkhāra paccayā Viññāṇa*” is normally translated something like, “with mental formations as condition, consciousness arises.” But I will show that a more accurate translation is, “Immoral/unfruitful actions and thoughts as root condition for **defiled consciousness**.”

- I will just keep the word *viññāṇa* without translating as “defiled/unfruitful consciousness” (which could become cumbersome to repeat also), because the word “consciousness” cannot fully embody the meaning of *viññāṇa*. Furthermore, *vipāka viññāṇa* (those that arise outside of “*saṅkhāra paccayā viññāṇa*”) are “just consciousness”; see #4 below.

- *Viññāṇa* is a step in the *paṭicca samuppāda* that describes how suffering arises; thus *viññāṇa* is NOT neutral or innocuous as the word “consciousness” or “awareness” implies; it is **DEFILED** consciousness, contaminated with immoral mental factors such as greed and hate.
- In contrast, an *Arahant* has undefiled, pure consciousness; thus an *Arahant* experiences the world without any defilements. He/she can see, hear, etc without making any type of judgement, attachment, or repulsion to what is seen, heard, etc.

Thus we need to realize that *viññāṇa* is DIFFERENT from “knowing” or “being aware”, which is what “consciousness” implies. This is very important.

2. For example, two people with opposing political views (A and B) may encounter a politician C on the street who has views compatible with those of A. Person A will be happy to meet C and may go up to C, shake his hand and talk to him enthusiastically. On the other hand, Person B will automatically have irritable thoughts about C and is likely to avoid C. In this case, A and B generated two very different kinds of *viññāṇa* upon seeing the same person.

- On the other hand, suppose there is a fourth person, D, who also knows the politician C AND suppose D is an *Arahant*. Now, person D will recognize C as that politician but will not generate any likes or dislikes about C. That is what “consciousness” is, just recognizing who or what it is without generating any biases.

3. The other main point is that *viññāṇa* is multi-faceted. **It has embedded in it one's memories as well as one's future hopes and plans**, and those lie under the surface. This is what Sigmund Freud called the subconscious. But there is no separate “subconscious”; there is only one *citta* at a time.

- The mind does this with the help of several mental factors (*cetasika*) like memory (*manasikara*) and perception (*saññā*). We will discuss that in the future.

4. For example, when I am looking at a picture I have what is called *cakkhu viññāṇa*, i.e., “visual consciousness.” This is a *vipāka viññāṇa* and is “just consciousness.”

However, if I have been planning a trip overseas that is still in the “back of my mind”; if I have been thinking about calling an old friend about whom I just thought of recently, that is also in the “back of my mind.” Thus at a given time there may be several or even many *viññāṇa* waiting to come to the surface.

- And some of those “subconscious” *viññāṇa* may disappear, if the reason for it to be there goes away for some reason. For example, if civil war breaks out in the country that I was planning to visit, I will abandon that trip and my “*viññāṇa*” for that will go away. If I stop thinking about my old friend, that *viññāṇa* for calling him up may also go away with time. Thus if a given *viññāṇa* stops getting “its food” it will die off gradually.
- The difference between *kamma viññāṇa* (those that arise due to “*saṅkhāra paccayā viññāṇa*”) and *vipāka viññāṇa* is discussed in [“Viññāṇa – Consciousness Together With Future Expectations.”](#)

5. **Now we can see how “*saṅkhāra paccayā viññāṇa*” works.** The more I think about my old friend, the more *saṅkhāra* I am generating; thus I keep “feeding that *viññāṇa*” and that *viññāṇa* for calling him gets stronger.

- The breaking out of the civil war in that country basically deprived the “*viññāṇa* for making a trip to that country” of any food (i.e., now it is not possible to visit that country), and thus the news effectively killed that *viññāṇa*.
- As always, it is best to think about your own situations and see how “*saṅkhāra paccayā viññāṇa*” works, and also how one can have many types of *viññāṇa* at the same time, even though only one is at the forefront at any given time.

6. **There is another way that *viññāṇa* can be divided into two main categories.** One is the “base level” of *viññāṇa* for an existence or *bhava*. For example, if a deer is reborn as a human, then that lifestream will now have a “higher base level of *viññāṇa*” suitable for a human. Whereas a deer cannot sort out right from

wrong, a human can. Thus at the end of a given “*bhava*” (say as a deer), that lifestream gets new, higher “base level” of *viññāṇa*.

- The other main category of *viññāṇa* is the numerous types of *viññāṇa* that arise in a given existence that we discussed above. What we perceive through the six senses (eye, ear, nose, tongue, body, and mind) gives rise to six types of consciousness: vision, hearing, smell, taste, touch, and concepts. Based on those, we can have infinite types of *viññāṇa* as we discussed above. These types of *viññāṇa* are now in accordance with the type of existence or “*bhava*.” For example, a deer does not perceive what is seen at the same level of consciousness as a human, even if both are looking at the same thing. Sometimes there may be differences in sense faculties too: a bat cannot see but uses sonar to find its way around. Furthermore, as we discussed above, there are many types of “subconscious” *viññāṇa* as well.
- There are many new concepts introduced in these introductory posts that are critical. One may need to go back to previous posts and re-read in order to grasp these important concepts.

7. Based on those two categories, there are two main *paṭicca samuppāda* cycles that describe life “in this world of 31 realms”:

- One describes how the “base level” of *viññāṇa* changes at the end of a “*bhava*”, say when a deer is reborn as a human. Here a given lifestream can make a transition from a lower base level of *viññāṇa* to a higher (e.g., deer reborn as a human) or vice versa (e.g., human reborn as a deer). This is the “*paṭisandhi paṭicca samuppāda*” cycle.
- The other *paṭicca samuppāda* cycle describes how a given lifestream accumulates conditions for suffering during a given “*bhava*.” This is where we experience *viññāṇa* through our daily activities. This is the “*idappaccayatā paṭicca samuppāda*” cycle; see, “[Idappaccayatā Paṭicca Samuppāda](#).”

Let us discuss the *viññāṇa* associated with this latter one first.

1. *Saṅkhāra paccayā Idappaccayatā Viññāṇa*

Let us first look at how our consciousness changes basically every moment in an active day. We are being bombarded with pictures, sounds, smells, tastes, body touches, and we think about all sorts of things throughout the day. In each single case, we experience a different *viññāṇa*. This is why *viññāṇa* is very complex and multi-faceted.

1. If we take a simple example of looking at a person, there are multiple events that happens in the mind: the physical eye captures an image of the mind which is processed by the brain and sent to the mind (details of this will be discussed in the *Abhidhamma* section later). The mind instantly compares that image with previous experiences and recognizes that it is a close friend. Happy feelings may arise instantly too. If we had not seen him for a while, some old memories associated with him may also instantly pop into our mind. The sum total of all mental factors (feelings, perception, joy, etc) associated with that “seeing event” is the “eye consciousness” or “*cakkhu viññāṇa*” at that moment.

- And this is an example of a “*vipāka viññāṇa*.” We did not plan to see him, but just bumped into him.

2. But now based on this *vipāka viññāṇa*, we may decide to take some actions. We may run to meet him, give him a hug, and follow-up with even more actions. Most of these could be harmless *saṅkhāra* and our experience, consciousness, or *viññāṇa* is mostly harmless.

- However, if we instead ran into a person with whom we recently had a serious argument, that *vipāka viññāṇa* may lead to a series of “bad *saṅkhāra*” in our minds and thus lead to a totally different *viññāṇa* BASED ON those bad *saṅkhāra*. we may decide to say something bad to that person. Now we are doing *vacī saṅkhāra* that may have adverse consequences. Now our *viññāṇa* is different and we feel differently from the above case. We have an agitated state of mind, and with the slightest provocation from him, we may say or do even more harmful things.

3. When a thought arises in the mind, it has associated with it many mental factors (*cetasika*) which characterize how we feel: joy, sadness, greed, generosity, hate, kindness, etc. *Viññāṇa* encompasses all such relevant mental factors.

- In the previous example of persons A and B meeting the politician C, person A's thoughts embody happiness while person B's thoughts embody dislike.
- For a *viññāṇa* to arise, there must be some interest in the sense object. For example, we are bombarded with millions of sense inputs in a day, but we "pay attention to" only a fraction of those. Each mind has a set of "preferred items" in the background or "in the subconscious" based on the person's habits and cravings.

4. Then, the more we "feed a given *viññāṇa*" by thinking, speaking, doing things related to that, the more strong it gets. Thus we can see how "habit building" is tightly associated with *saṅkhāra*. In the same way, we can "remove a habit" by depriving that associated *viññāṇa* of its food, i.e., by stopping thinking or doing things related to it.

- And that can be done only realizing the benefits of a good habit or adverse consequences of a bad habit, which was the first step in the *paṭicca samuppāda*, "*avijjā paccayā saṅkhāra*." A bit of thought should make this clear. **Comprehending Buddha Dhamma takes time to think deeply about how all these things fit together. Just being able to recite the *paṭicca samuppāda* cycle does not bring any benefits.**

5. A simple example is "building a *viññāṇa* for getting drunk": A teenager may not like the taste of his first drink, but if he keeps doing it due to "peer pressure", he is likely to build a new *viññāṇa* for it. As he builds this *viññāṇa*, he will keep accumulating *saṅkhāra* to "feed that *viññāṇa*." He will be thinking about it, talking about it, and of course whenever has the chance he will be drinking. The more he does any of those *saṅkhāra*, that *viññāṇa* will grow. AND even when he is doing something else, that *viññāṇa* will be at close to top of the subconscious waiting for an opportunity to come up and induce him to get drunk.

- And it works the same way for any type of activity. A teenager studying for an exam, will have a *viññāṇa* for it. If he is serious about it, he will be thinking about it more, talking about it, and studying hard; all those are *saṅkhāra* too, in this case for his benefit.

The idea is to first not to do any *abhisāṅkhāra* (strong immoral *saṅkhāra*) that could lead to birth in the four lower realms. These kinds of *saṅkhāra* are the immoral acts, speech, and thoughts. We will discuss this in the next post.

9.11.5 Saṅkhāra Paccayā Viññāṇa – 2

If you are reading this without reading the earlier posts, you may be wondering whether I was being untruthful when I said this series will be in "plain English." I did describe any of the terms used here in plain English in the previous posts. There is no easy way to get the same meaning across without using such key Pāli words.

- So, once I clarify them, I have to use these Pāli terms in order to keep a post to a reasonable length, AND readable. One can always go back and read previous posts to refresh memory.

In the previous post, we discussed how *saṅkhāra* can feed and build different types of *viññāṇa* during our lifetime. The *paṭicca samuppāda* cycle which describes that process is the *Idappaccayatā Paṭicca Samuppāda* and we discussed the step "*saṅkhāra paccayā idappaccayatā viññāṇa*" for that *paṭicca samuppāda*.

- Now we will discuss how such *idappaccayatā viññāṇa* can become strong and be "carried over" to the future lives; not only that, one of such strong *viññāṇa* can even determine the next birth. That is why such strong *viññāṇa* can become "*paṭisandhi viññāṇa*" by providing the "link" to the next next life (that is what "*paṭisandhi*" means: "*sandhi*" is connection and "*pati*" is bond or making the connection).

2. Saṅkhāra paccayā Patisandhi Viññāṇa

1. When we build *idappaccayatā viññāṇa* during our lifetime as described in the previous post, such *viññāṇa* can get very strong and even get carry over to the next lives.

- In fact, some of the *viññāṇa* that we easily get “attached to” very well could be coming from previous lives.

2. For example, different people have “natural tendencies” for certain tasks (music, art, science, business, basically any type of activity). Similarly, some people are attracted to gambling, drinking, sports, etc more than others. All these are *sansāric* habits, that have been cultivated by “feeding that *viññāṇa*” over many lives.

- Unless one reduces and eventually gets rid of one’s bad habits, they can lead to bad births in the lower four realms where one can get trapped for long times. Similarly, developing good habits can lead to good births, in case one is unable to attain at least the *Sotāpanna* stage in this life.
- This is why it is very important to get rid of “bad habits” and to cultivate “good habits.” There are many posts at the site on this important topic. I cannot emphasize enough the importance of this need to change habits.

3. Following the Noble Eightfold Path is all about changing to a “good person” first; doing “*ānāpānasati bhāvanā*” does the same thing. When one does this, one **develops wisdom** to see through the Three Characteristics: *anicca*, *dukkha*, *anatta*. And that also leads to the *Sotāpanna* stage, where one is guaranteed to be free of rebirths in the lower four realms.

- By the way, many people are introduced to the wrong concept of “there is no self” (incorrect translation of the term *anatta*). Thus they get stuck, saying the term, “good person”, does not make sense (because there is no “self”); that could become a huge obstacle to any progress. While the Buddha rejected the concept of “self”, he also rejected the concept of “no-self”, because there is definitely some key personal characteristics that “flow” from one life to the next; see, “[What Reincarnates? – Concept of a Lifestream.](#)”

4. Once one is free of the four lower realms (i.e., attains the *Sotāpanna* stage of *Nibbāna*), only then one will truly realize that it is unfruitful even to wish for or work to seek rebirths in higher realms.

- But, until one attains the *Sotāpanna* stage, one MUST avoid immoral *abhisankhāra* (strong immoral actions) to avoid immoral *viññāṇa* and also engage in moral *abhisankhāra* in order to cultivate moral *viññāṇa*; this will keep one firmly on the Path and to avoid rebirth in the lower four realms until the *Sotāpanna* stage is attained.

5. If we think deeply about the suffering that we encounter in this life, *dukkha dukkha* has arisen due to whatever immoral *saṅkhāra* done in a previous life. An animal suffers more than a human, because the cause for an animal birth was a stronger immoral action done previously.

- *Dukkha dukkha* associated with higher realms (*deva*, *brahma*) is less than the *dukkha dukkha* for a human life, because the *saṅkhāra* that led to the *deva/brahma* births were merely unfruitful, they were not immoral.

6. Any birth anywhere in the 31 realms is due to a *abhisankhāra*. If it is due to a worst form of *abhisankhāra* (immoral actions) then that leads to a birth in the lowest four realms via a strong and bad *paṭisandhi viññāṇa*. Lesser *abhisankhāra* (unfruitful actions) lead to births in higher realms via “moral” *abhisankhāra viññāṇa*.

- Thus cultivating “immoral” *abhisankhāra viññāṇa* must be avoided by not engaging in immoral activities. Otherwise, “*saṅkhāra paccayā paṭisandhi viññāṇa*” could lead to “bad births”, where *dukkha dukkha* is very intense.

7. *Viparinama dukkha* associated with the current life is also mainly determined by previous action (*abhisankhāra*) that led to this life, and can be analyzed the same way as for *dukkha dukkha*.

- But the *saṅkhāra dukkha* associated with this life is due to actions (*saṅkhāra*) that we do in this life. Also, the same *saṅkhāra* that could cause future *dukkha dukkha* or *viparinama dukkha* can also give rise to *saṅkhāra dukkha* in this life as well. This is an important point to be realized; if not clear, you may want to go back and review the previous posts.
- Therefore, we CAN get rid of part of the *dukkha* (the *saṅkhāra dukkha*) in THIS LIFE by understanding Dhamma and acting and thinking accordingly. We can also stop or reduce ALL types of *dukkha* in FUTURE LIVES by this process.

If you have forgotten what these terms mean, it is a good idea to go back and refresh memory, because otherwise it will be difficult to comprehend the upcoming posts in this series as well. And these terms are critically important for grasping the message of the Buddha. *Avijjā*, *saṅkhāra*, and *viññāṇa* are key terms that must be comprehended; they do not have corresponding English words.

More on *viññāṇa* can be found at, “[3. Viññāṇa, Thoughts, and the Subconscious.](#)”

Next, [Viññāṇa paccayā Nāmarūpa](#),

9.11.6 Viññāṇa Paccayā Nāmarūpa

Revised May 19, 2019; May 13, 2021; May 19, 2021 (#10-#12); September 9, 2022

Introduction

1. *Nāmarūpa* can have different but related meanings in different contexts. *Nāmarūpa* in the standard *upapatti Paṭicca Samuppāda* is different from the “*nāmarūpa*” involved in *idappaccayā Paṭicca Samuppāda* which takes place moment-to-moment.

- *Idappaccayā* means “what happens at this moment depending on the conditions at this moment.” Thus, it describes “events in real-time” that bring *vipāka* in real-time, in addition to *vipāka* in the future. See, “[Idappaccayatā Paṭicca Samuppāda.](#)”
- The *upapatti Paṭicca Samuppāda* process describes how *viññāṇa* energies created up to and within this life lead to future births (i.e., *vipāka* in future lives via future births). Here “*upatti*” means “birth.” See, “[Akusala-Mūla Upapatti Paṭicca Samuppāda.](#)”

Nāmarūpa in *Idappaccayatā Paṭicca Samuppāda*

2. Let us first discuss *nāmarūpa* involved in *Idappaccayatā Paṭicca Samuppāda*, i.e., how a *jāti* can arise in the current life based on one's *avijjā* (ignorance) and *saṅkhāra* (thoughts, speech, and actions).

- *Jāti* is not restricted to “births as a human, a deva, an animal.” Many different *jāti* (births) arise during the current life itself; see “[WebLink: suttacentral: Jātidhammādi Sutta Dasaka \(SN 35.33\).](#)”
- We will discuss two examples below which explain how a “thief” and a “drunkard” are “born” during the current life itself.

“*Viññāṇa Paccayā Nāmarūpa*” During a Lifetime

3. “*Nāmarūpa*” involved in *Idappaccayatā Paṭicca Samuppāda* mainly refer to those “visual images” created by the person when making an “expectation” (*viññāṇa*) to achieve/maintain a certain goal.

- Here, “*nāma*” refers to whatever the “name” given to the subject involved in the *Paṭicca Samuppāda* process, and “*rūpa*” are the associated objects themselves. **Thus, the corresponding “*nāmarūpa*” are the mental images of the subjects in question.**

4. Let us take an example. When a thief plans to steal something (say a watch from a store), the process starts with the step “*saḷāyatana paccayā phasso*,” see, “[Generating Kammic Energy in the ‘Upādāna](#)

Paccayā Bhava’ Step.” That corresponds to him seeing the watch on display and realizing that he could take it without anyone seeing it.

- That is when he starts acting with *avijjā* initiating a PS cycle at “*avijjā paccayā saṅkhāra*”; he starts thinking about the plan because of his ignorance of the consequences.
- Here “*nāma*” or the name is “watch,” and “*rūpa*” is the watch itself. **But “*nāmarūpa*” is the mental image of that watch: That is formed in HIS MIND.** In addition, various other types of *nāmarūpa* related to the plan will go through his mind.
- For example, he may also make visuals of how he will be doing the stealing: “*nāmarūpa*” are the visuals he has in his mind to get the job done.
- He starts doing *vacī saṅkhāra* first: thinking to himself about how to go about stealing the watch. This is “*saṅkhāra paccayā viññāṇa*” and that gives rise to *viññāṇa* for stealing the watch.

5. The more he thinks and makes plans (i.e., makes more and more *nāmarūpa* in his mind, that future expectation for stealing that object (i.e., the *viññāṇa* for it) will get stronger.

- Here the *Paṭicca Samuppāda* process runs backward, “*nāmarūpa paccayā viññāṇa*.” This is called an “*aññamañña paṭicca samuppāda*.” [*aññamañña* : (adj.), mutual.]
- These forward and backward steps may run back and forth while he is planning the robbery, and the Buddha said that both *viññāṇa* and *nāmarūpa* get stronger due to this feedback. **They depend on each other and feed on each other.**
- The more he thinks about it, the stronger those *viññāṇa* and *nāmarūpa*.
- Ven. Sariputta provided a simile for this inter-dependence between *viññāṇa* and *nāmarūpa* saying it is like two bundles of hay leaning against each other and supporting each other without any other support.

A Second Example

6. Let us take another case of a teenager whose peers influence him to drink alcohol. Because of his ignorance about the consequences, he engages in such activities and also in planning activities: “*avijjā paccayā saṅkhāra*.”

- Here *saṅkhārā* includes not only drinking activities but also planning. Therefore, all three types of *saṅkhāra* are involved: *mano*, *vacī*, and *kāya saṅkhāra*.
- While he is participating in drinking he is doing *kāya saṅkhāra*; he will constantly talking about having such parties and those are *vacī saṅkhāra*; it is also in the subconscious and many times a day they come back to his mind as *mano saṅkhāra*. All these are included in “*saṅkhāra paccayā viññāṇa*.”

7. Most people do not realize it, but that process of “thinking and talking to oneself” (*vacī saṅkhāra*) can make a big impact on the formation of *nāmarūpa* and the cultivation of *viññāṇa*. Many people spend hours and hours doing that assuming it does not contribute to “*viññāṇa* (or *kamma*) formation”; see, “[Correct Meaning of Vacī Saṅkhāra](#).”

- In the above example, even when he is not drinking, such *mano saṅkhāra* comes to the mind automatically, and he starts consciously thinking about drinking activities: he visualizes pictures of “party scenes,” including friends, bottles of his favorite drink, any food that goes with it, etc.
- That conscious thinking is also *vacī saṅkhāra*, and those also strengthen the *viññāṇa* via “*saṅkhāra paccayā viññāṇa*.”
- Now those mental pictures that arise during that process are *nāmarūpa* that arise due to “*viññāṇa paccayā nāmarūpa*.” Therefore, *Paṭicca Samuppāda* steps do not just flow in one way. They can run forward and backward.

8. If the teenager keeps his bad habit of drinking, he gets trapped in that *bhava* (state of mind of a drunkard), the more “drunken *jāti*” will result, i.e., more frequently he will be drunk. When one gets excessively drunk, one tends to behave like an animal without any sense of decency. The long-term consequences could be rebirth as an animal.

- Suppose that “*viññāṇa* of a drunkard” stays strong to the time of death (the *cuti-paṭisandhi* moment at the end of his human *bhava*). In that case, it could lead to a new *uppatti bhava* via the *uppatti Paṭicca Samuppāda* process mentioned in #1 above. We will discuss this second type of *Paṭicca Samuppāda*
- The important point is that such a *paṭisandhi viññāṇa* is likely to give rise to rebirth in the animal realm, as mentioned above.

9. In both these examples, it is clear that those reverse steps also occur: “*nāmarūpa paccayā viññāṇa*” can happen, and does happen, together with “*viññāṇa paccayā nāmarūpa*.” The more one visualizes related *nāmarūpa*, the stronger that *viññāṇa* gets.

- As we saw above, this happens in other steps too (for example, “*saṅkhāra paccayā viññāṇa*” and “*viññāṇa paccayā saṅkhāra*”) and such is referred to as an “*aññamañña Paṭicca Samuppāda* step.” Here “*aññamañña*” means “inter-dependent.”
- This is especially true also for the “*saṅkhāra paccayā viññāṇa*.” The stronger the *viññāṇa* gets, one is more likely to engage in the same kind of acts, i.e., *saṅkhāra*, i.e., “*viññāṇa paccayā saṅkhāra*.” They feed on each other. This often happens in habit formation; see, “[9. Key to Ānāpānasati – How to Change Habits and Character \(Gati\)](#).”

Viññāṇa Paccayā Nāmarūpa at Paṭisandhi (in Upapatti PS)

10. At the end of existence (*bhava*), a given lifestream jumps from one kind of existence to another. The easiest to visualize is the case of a Brahma to a Deva transition. The “*nāma*” part changes from a *Brahma* to a *Deva*, and the “*rūpa*” part changes from 2 *pasāda rūpa* for the *Brahma* to 5 for the *Deva*.

- That transition happens in the latter part of the last *citta vūthi* of the life of *Brahma*. At that *cuti-paṭisandhi* moment, the “*Brahma nāmarūpa*” dies and a “*Deva nāmarūpa*” is created by *kammic* energy. This is discussed in a bit more detail in the post “[Cuti-Paṭisandhi – An Abhidhamma Description](#).”

11. For humans (and animals,) the situation is a bit more complex because the first type of “human *nāmarūpa*” created is a human/animal *gandhabba*.

- In the cases of a human or an animal, the second type of *nāmarūpa* forms when that *gandhabba* merges with a zygote in a womb. That *nāmarūpa* is the basis for the physical human body. So, it depends on the particular case at hand.
- Let us consider the case of a human dying and born into a deer. A *gandhabba* is involved in both lives.

Example of a Human to Deer Transition

12. In general, as soon as the *viññāṇa* for the next existence was determined at the last *citta vūthi* by the step “*saṅkhāra paccayā viññāṇa*,” the next step of “*viññāṇa paccayā nāmarūpa*” gives rise to the *nāmarūpa* for the next life.

- When human life ends, that “human *gandhabba*” will die, and at that *cuti-paṭisandhi* moment a “deer *gandhabba*” will arise.
- Thus here, “*nāma*” includes the basic level of *viññāṇa* for the new deer’s existence, which is much different from the “*nāma*” of a human. The “*rūpa*” is that of a deer and not of a human. Thus “*nāmarūpa*” makes a huge transition at the end of the “*bhava*” from human to a deer.

- Of course, now that “deer *gandhabba*” needs to be pulled into the womb of a female deer (i.e., doe) to be born a deer.

13. I have discussed previously how a “deer *gandhabba*” could be reborn many times as a deer until the *kammic* energy of the “deer *bhava*” is exhausted; see, “[Bhava and Jāti – States of Existence and Births Therein.](#)”

- In such instances, at the death of the deer, a “deer *gandhabba*” emerges from the dead body and waits for a suitable womb for the “deer mother” to become available. Here the new “*nāmarūpa*” may be somewhat different, but still, that of a deer so any change would be minor.
- Therefore, the “*viññāṇa paccayā nāmarūpa*” gives rise to a new set of “*nāmarūpa*” only at the *paṭisandhi* to a new existence.

Viññāṇa is a key concept in Buddha Dhamma. We can analyze it at various levels, and a deeper analysis is at “[Viññāṇa Aggregate.](#)”

Next, “[Nāmarūpa Paccayā Saḷāyatana](#)”,

9.11.7 Nāmarūpa Paccayā Saḷāyatana

Revised May 25, 2019; August 31, 2019; major revision May 20, 2021; September 9, 2022

“*Nāmarūpa Paccayā Saḷāyatana*” step involves different types of *nāmarūpa* and *saḷāyatana* depending on whether it is an *Idappaccayatā* or a *upapatti Paṭicca Samuppāda*.

Āyatana and Indriya

1. First, let us discuss the difference between a *āyatana* and an *indriya*.

- We have six sense faculties: eyes (*cakkhu*), ears (*sota*), nose (*ghāṇa*), tongue (*jivhā*), body (*kāya*), and the mind (*mano*). These are the *indriya*.
- Our initial sensory inputs (what we see, hear, etc.) are due to *kamma vipāka* based on this life with a solid, physical body. Unlike *Brahma*’s “energy body,” our “solid body” can be exposed to various ailments. At the moment of experience, these sensory faculties act as *indriya*. For example, when we see an attractive person on the road, that is just “seeing the event” with the *cakkhu indriya*.
- However, based on those initial sensory experiences, we may INTENTIONALLY use those *indriya* to “enjoy that *ārammaṇa*.” Then those *indriya* become *āyatana*. In the above example, if we get attached to that attractive person and keep looking at that person, then we use our eyes as *cakkhāyatana*. In the same way, *sota indriya* becomes *sotāyatana*, and so on for all six.
- They are called *saḷāyatana* since there are six of them.

2. There is no equivalent English word for *āyatana*, so we will keep using *indriya* and *āyatana* from now on.

- **By the way, *pañca indriya* (*saddhā, sati, viriya, samādhi, paññā*) are an entirely different set compared to this set of 6 *indriya*.**
- In general, “*indriya*” means a “dominant faculty.” Those that are dominant in the interactions with the external world are the six *indriya* in #1; those dominant in spiritual advancement are the five *indriya* in *pañca indriya*.

Examples of Indriya Becoming Āyatana

3. For example, I am walking on the road and see a nice house. I just happened to see it, and my eyes (*cakkhu indriya*) were working as *indriya*; they just presented a picture of that house to my mind. It is a neutral event.

- However, if I form an attachment to the house, I start looking at it for a while (with *cakkhāyatana*). I am thinking about how nice that house is and even about building one like that. At that point, I am also using my mind as a *āyatana* (*mana indriya* now becomes *manāyatana*).
- I have formed greedy thoughts about the house and now I am accumulating new *kamma* by generating *vacī saṅkhāra* (talking to myself with *vitakka/vicāra*). I use my eyes and mind as *āyatana* (*cakkhāyatana* and *manāyatana*): I keep seeing the house and thinking greedy thoughts.

Indriya Become Āyatana With Abhisāṅkhāra

4. In many cases, when we experience a sensory event through one *indriya*, we may start using some or all of the *indriya* as *āyatana*. In another example, someone offers us a piece of a tasty cake (a *kamma vipāka*). We get the cake's taste with the tongue (*jivhā*) and like it so much we may use all six *āyatanas* to accumulate more *kamma* (smell and touch it and then ask for the recipe and think about how to make it or where to buy it).

- Those “extra activities” that we do with *āyatana* COULD BE *abhisāṅkhāra* (depending on whether greed was involved.) But just eating a cake is not *abhisāṅkhāra*; see, “[Kāma Guna, Kāma, Kāma Rāga, Kāmacchanda.](#)”
- Most of the time, we use our sense faculties as *indriya*: we see, hear, etc., many things in a day but ignore most of them. But when we experience something that we have a craving for, we start using our sense faculties as *āyatana*.
- Both types of *akusala-mūla Paṭicca Samuppāda* cycles operate only when we use our sense faculties as *āyatana*.
- An *Arahant* ALWAYS uses his/her sensory faculties as an *indriya*. He/she will see, hear, etc just like us, but will not get “attached to” anything.

5. However, we DO NOT use our *indriya* as *āyatana* in most situations. For example, I may become thirsty. Then I need to think about getting a glass of water or asking someone for a glass of water. Both involve *vacī saṅkhāra*. Then I drink water that involves *kāya saṅkhāra* (moving body parts.) Those are *kammically* neutral and NOT *abhisāṅkhāra*.

- In another example, suppose a robber attacks you with a knife in an isolated place. If possible, you would want to disarm him without killing or hurting him too much in the process. If that is not possible, you may want to try to run away. All those activities involve *kāya saṅkhāra*. But they are NOT *abhisāṅkhāra* that involve greed, anger, or ignorance (*lobha, dosa, moha.*) The INTENTION (*cetanā*) there is to avoid injury to both.

Saḷāyatana Means Different Things in The Two Types of PS

6. *Saḷāyatana* has somewhat different meanings in the *idappaccayatā* and *paṭisandhi paṭicca samuppāda* cycles. That is very much like for *nāmarūpa* that we described in the previous post.

- At birth (especially in a new *bhava* or existence), we get a “new set of sense faculties” or *indriya*. For example, if a human is reborn as a *Brahma*. A *Brahma* will have only eyes, ears, and mind. There will be only three *indriya* (or *āyatana*) instead of six for human. But we keep the term “*saḷāyatana*” in the *Paṭicca Samuppāda* as a generic term.
- Thus in *Upapatti Paṭicca Samuppāda*, we are concerned with forming a brand new set of *āyatana* for a new existence (*bhava*).

- However, when we consider the *Idappaccayatā Paṭicca Samuppāda* series, we are concerned with how the six *āyatana*s for a human change from even moment to moment. In particular, the issue is whether they are being used as *āyatana* or *indriya*.

“*Nāmarūpa paccayā Saḷāyatana*” at *Paṭisandhi* (*Upapatti* PS)

7. At the end of existence (*bhava*), a given lifestream makes a “big jump” from one kind of existence to another. At that time, the base level of *viññāṇa* for the lifestream makes a jump, and this is the “*nāma*” of the *nāmarūpa*. The *nāmarūpa* for the new existence also has a different blueprint for the new physical body, the “*rūpa*” part.

- As we did in the previous post, let us consider the case of a lifestream transitioning from a human to a deer. The basic level of *viññāṇa* changes from a human to a much lower level of a deer. This new level of *viññāṇa* together with the blueprint for the deer is in the new *nāmarūpa* of the “deer *gandhabba*” that comes out of the body of the dead human, as we saw before.
- Now when this *gandhabba* descends to the womb of a female deer, that baby deer starts to grow. Six sense faculties (*indriya*) suitable for a deer grow in that womb, which may become *saḷāyatana* **at times** in the future after the birth.

8. In another example, consider a human who exhausted his *kammic* energy for the human *bhava* at death, and became a *Deva* in one of the *Deva* realms. At the *cuti-paṭisandhi* transition in the last *citta vīthi* of that human, the human *gandhabba* dies. In the next moment, a *Deva gandhabba* is born.

- All *devas* are born fully formed. There is no need for a mother’s womb. That is an *opapātika* birth.
- When that human dies, his body becomes inert like a log. At that very instant, a fully-formed *Deva* appears in the appropriate *Deva* world.
- That *Deva* will have sense faculties appropriate for a *Deva*. Those are the *indriya* for the new existence. Those *indriya* **can sometimes become** *āyatana* depending on *Deva*’s activities.

“*Nāmarūpa paccayā Saḷāyatana*” During a Lifetime (*Idappaccayatā* PS)

9. During a given lifetime of a deer, human, or a *Brahma*, that lifestream will have a basic set of *indriya* (that become *āyatana* at times) appropriate for that existence: the sense faculties for a human are different from that of a deer or a *Brahma*.

- But during that lifetime, those *āyatana* will have minor changes (compared to the drastic changes at *paṭisandhi*) depending on the activity. *Idappaccayatā Paṭicca Samuppāda* cycle describes such changes.

An Example in *Idappaccayatā* PS

10. In the previous post, we discussed the case of a thief who is planning a theft; see #4 of “*Viññāṇa Paccayā Nāmarūpa*.” His *viññāṇa* about the theft led him to generate appropriate *nāmarūpa* (the visuals in his mind of how the theft is to be carried out).

- When he plans the theft, he will use his sense faculties as *āyatana* to do the “preparatory work.” He will read about the place to be robbed, ask for relevant information, etc. Each time he does a specific act (whether thinking, seeing, hearing, etc.), the *Idappaccayatā Paṭicca Samuppāda* cycles operate.
- Now when he is about to steal, his *indriya* becomes *āyatana*. All his sense faculties will be on high alert. He watches and listens carefully for anything unexpected, and his whole body becomes tense, pumped with adrenaline.
- All his *āyatana* will be employed to carry out the task. He will be using his body, eyes, and ears as *āyatana*. The act of stealing the watch is done with *kāyāyatana* (*kāya āyatana*) and involves *kāya abhisankhāra*. It is an *abhisankhāra* because it involves greed.

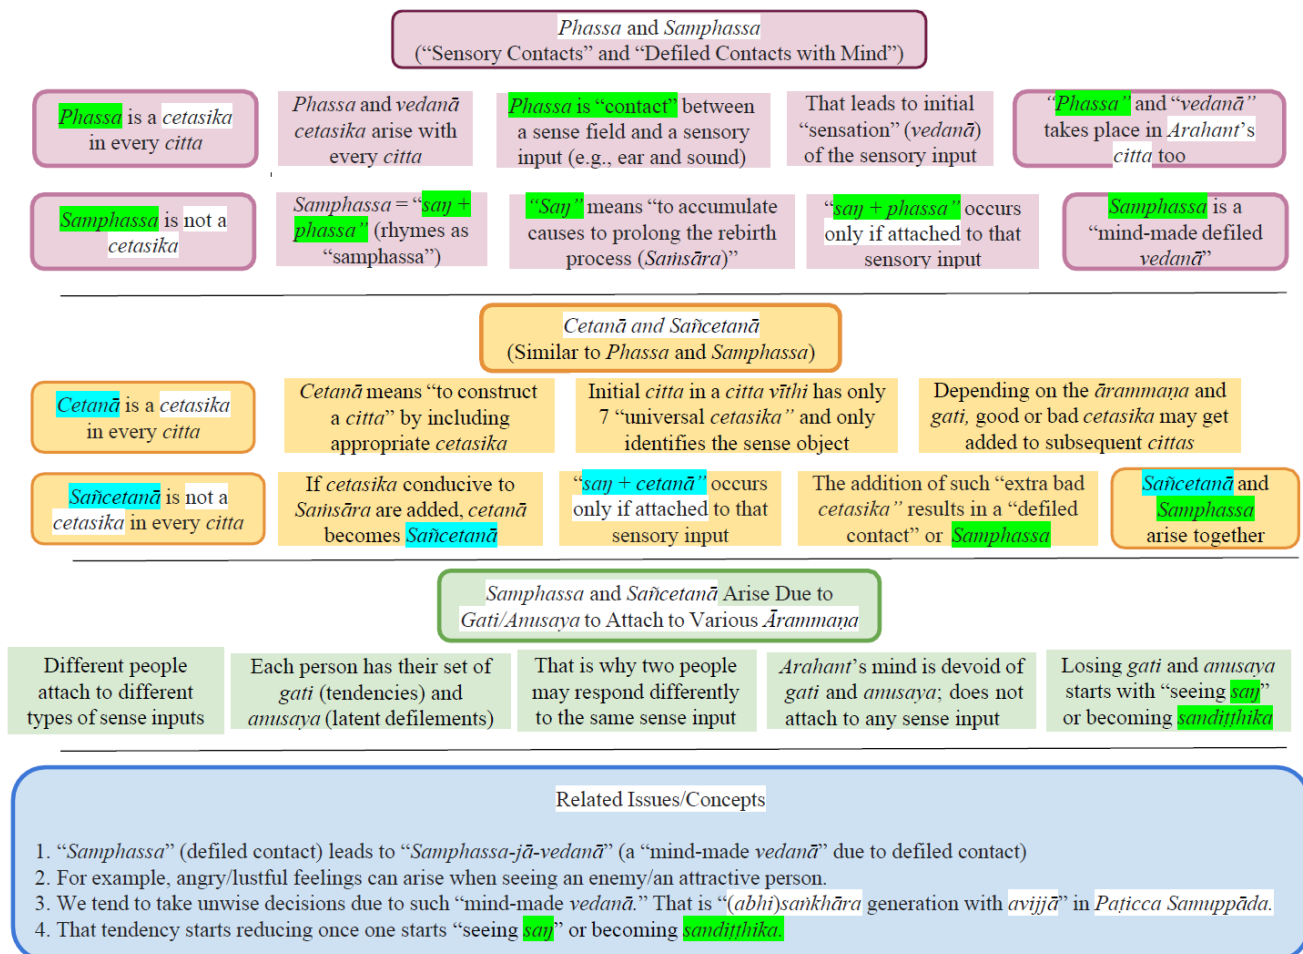

- In comparison, getting the same watch by paying for it is a *kāya saṅkhāra* where the body is used as an *indriya*. Both times he used his hand to hold the watch. It is the INTENTION (*cetanā*) that determines whether the body was used as an *āyatana* (with *kāya abhisāṅkhāra*) or an *indriya* (*kāya saṅkhāra*.)

9.11.8 Difference between Phassa and Samphassa

Revised November 6, 2018; June 2, 2019; re-written April 14, 2021; re-written May 7, 2021

“*Samphassa*” must be used for “*phassa*” in “*phassa paccayā vedanā*” in *Akusala-Mūla Paṭicca Samuppāda*.

Buddhism – In Charts 12. Phassa and Samphassa

Download/Print: “[WebLink: PDF Download 12. Phassa and Samphassa](#)”

Phassa and Samphassa – Incorrect Translations

1. No differentiation is made between “*phassa*” and “*samphassa*” in most English translations of *Paṭicca samuppāda*. **Both words are translated as “contact” in English translations without making the distinction.**

- For example, the “[WebLink: suttacentral: Paṭiccasamuppāda Sutta \(SN 12.1\)](#)” provides the *uddesa* (utterance) version in *Paṭicca samuppāda* as “*saḷāyatanapaccayā phasso*.” The *niddesa* version of that (brief description) appears in the following “[WebLink: suttacentral: Vibhaṅga Sutta \(SN 12.2\)](#)” as “*cakkhusamphasso, sotasamphasso, ghānasamphasso, jivhāsamphasso, kāyasamphasso, manosamphasso*.”
- However, no distinction is made in the translations of the above links. Both are translated as “contact.”

- As we will see below, “*samphassa*” has a very different meaning than “*phassa*” and makes the connection of how our instinctive reactions to external sense experiences arise based on our “*saṃsāric* habits” or “*gati*.”

Phassa Is in All Citta

2. When we see, hear, etc. a *citta* arises that recognize the sensory input. Seven *cetasika* (mental factors) arise with ANY *citta*, and *phassa* and *vedanā* are two. We will have no sensory experience without the *phassa* (contact) *cetasika*.

- When the mind contacts that image of the external object, a series of *citta* arises. We experience only the overall effect of millions of such *cittā* due to that contact.
- Some of the seven universal mental factors that arise with the *citta* instantaneously identify the object. These include *vedanā* and *saññā*. Both are universal *cetasika*.
- **If *samphassa* takes place, there will be an additional, mind-made *vedanā* called “*samphassa-jā-vedanā*” as discussed below.**

Samphassa – How Does It Arise?

3. An average human will form a like or a dislike for some of the sense inputs (but not for all).

- If a like or dislike is formed, then that sensory contact is “*saṇ phassa*” (“*saṇ*” + “*phassa*,” where “*saṇ*” are defilements (greed, anger, ignorance); see, “[What is “Saṇ”? Meaning of Saṇsāra \(or Saṃsāra\)](#)”). It rhymes as “*samphassa*.”
- This “combination effect” or “Pāli *sandhi*” leads to the pronunciation of many “*saṇ*” words with an “m” sound: “*saṇ*” + “*mā*” to “*sammā*.” In the same way, “*saṇ*” “*yutta*” to “*saṃyutta*,” “*saṇ*” “*bhava*” to “*sambhava*,” and “*saṇ*” “*sāra*” to “*saṃsāra*”; see, “[List of “Saṇ” Words and Other Pāli Roots](#).” In English texts, “*Saṇ*” in combined words may be written as *Saṇ/San/Saṇ/Saṇ/Saṇ/Saṇ/Saṇ/Saṇ*. [See “[What is “Saṇ”? Meaning of Saṇsāra \(or Saṃsāra\)](#)”]
- Thus, when one sees, hears, smells, tastes, touches something, whether there will be any likes or dislikes towards that sensory experience depends on that person, or more specifically, the “*gati*” (habits/character) of that person.

Examples of Samphassa

4. Let us discuss some examples to illustrate how “*samphassa*” arises. First, let us look at the connection with those people/things in the world that we have special relationships with or what we “*upādāna*,” i.e., like to either keep close or stay away from.

- Think about the worst “enemy” you have. When you even think about that person X, you generate unpleasant feelings. But X’s family will have loving thoughts about X. Here, you and X’s child (for example) would have generated very different “*samphassa*” when thinking, seeing, and hearing about X.
- When you travel by car or bus and look out the window, you may see zillion things, but those are just “seeing”; you don’t pay much attention to them. They are “*phassa*.” But now, if you happen to see a beautiful house, it piques your interest, and you may even turn back and take another good look at it and even think about how nice it would be to live in a house like that. That is “*samphassa*.”

5. A critical point is that one’s perception of what is “valuable” can lead to “*samphassa*.” Suppose someone inherits a valuable gem from his father. Every time he sees it or even thinks about it, he becomes happy. But his mind is also burdened by it since he is worried that he may lose it; he is keeping it in a safe and has put burglar alarms in the house to protect that gem.

- Suppose one day he asks a professional to evaluate the gem and finds out that it is not a gem but a fake. He may not even believe that initially, but once confirmed, he will become “detached” from it. He will no longer keep it in the safe and may even throw it away in disgust.
- Now he may be generating neutral or hateful thoughts about the SAME OBJECT he once loved. Nothing changed about the “gem”; it is still the same object as before. What has changed is his PERCEPTION of the value of that object. Whereas he generated “*samphassa*” on thinking or seeing that object before, now he may generate just “*phassa*” (neutral feelings) or “*samphassa*” with quite the opposite feelings of disgust.

Phassa/Samphassa and Cetanā/Sañcetanā

6. *Phassa* and *cetanā* are both universal *cetasika* that arise with every *citta*. A *citta vīthi* starts with an “undominated *citta*” but gets contaminated if the mind gets attached to the *ārammaṇa*. We do not experience individual *cittās* but only the cumulative effect of millions of *cittās* that arise in a second. As *cittās* get contaminated, *asobhana* (defiled) *cetasika* are incorporated by *cetanā cetasika* it turns into *sañcetanā*. That happens simultaneously with *phassa* leading to *samphassa*.

- If the “intention” does not involve *lobha*, *dosa*, or *moha* (*avijjā*), it is only a *cetanā* or “intention” to get something done. Here, *kamma* done is just an action without *kammic* consequences. For example, if one walks to the kitchen to get a glass of water, that is done with a neutral *cetanā*; the “intention” is to quench the thirst. It is NOT a *sañcetanā*. There is no “defiled contact” or “*samphassa*” either.
- However, almost all current English translations do not make that critical distinction. For example, *sañcetanā* in the “[WebLink: suttacentral: Sañcetanā Sutta \(SN 27.7\)](#)” is translated as “intention,” and *samphassa* in the “[WebLink: suttacentral: Samphassa Sutta \(SN 18.4\)](#)” is translated as “contact.” The translators do not understand the difference between *Phassa/Samphassa* and *Cetanā/Sañcetanā*.
- A *cetanā* becomes a *sañcetanā* (*sañ* + *cetanā*) — and *phassa* becomes *samphassa* — if it involves “*sañ*” or *lobha*, *dosa*, *moha* (*avijjā*.) See “[San – A Critical Pāli Root](#)” and “[Details of Kamma – Intention, Who Is Affected, Kamma Patha.](#)”

Phassa Can Turn to Samphassa in an Instant

7. Let us take another example that Waharaka Thero gave. This one clearly shows how the transition from “*phassa*” to “*samphassa*” can happen very quickly.

The following happened a long time ago in Sri Lanka. A mother had to go overseas when her son was less than a year old. She had been overseas for many years and returned to see her son. She had not even seen any pictures of the boy, who was now a teenager. When she gets home, she is told that the boy is visiting a neighbor, and she starts walking there. On the way, she bumps into a teenager; she admonishes the teenager for not paying attention and resumes walking. But then another person on the street says, “Don’t you recognize your son? Well. How can you? You have been away all this time”. Hearing that, she says, “Oh, is that my son?” and immediately runs back and hugs him.

- She saw the boy when he bumped into her and even got upset with him. But at that time, he was just a teenager to her. That “seeing” event involved “*phassa*.”
- But when someone pointed out that it was her son, her perception of the boy took a giant leap instantly. Now she looks at the same boy with a new set of “mental baggage.” Now it is not just a teenager, but her son; attachment is involved. Now when she looks at him, “*samphassa*” is involved.

8. We can also see how “*samphassa*” leads to an **intensified** *vedanā* or feelings. This is called “*samphassa-jā-vedanā*” or “*vedanā* arising due to *samphassa*.” This “**mind-made defiled *vedanā***” is different from the universal *vedanā* as we discussed in #7 above.

- She had neutral thoughts (may be even some annoyance) when the boy bumped into her and apologized. But when she learned it was her son, her feelings instantly turned to joy.
- To take it a bit further, if that teenager got hit by a car after several minutes, that joy would turn instantly to sorrow.
- These different types of “vedanā” arise based on the type and level of “attachment” to a given object, in this case, the boy.

Samphassa/Sañcetanā – Connection to Gati

9. “*Samphassa*” is intimately connected to one’s “*gati*” or habits, most of which come from our past lives, even though some may be strengthened or weakened by what we do in this life. We may even start forming new “*gati*” in this life. Note that “*gati*” is pronounced “*gathi*,” like in “**Thief**.”

- For example, a young lady looking at a dress may form a liking for it. Another person seeing his enemy will form a dislike. Upon hearing a song, a teenager may form a liking/craving for it, etc.
- This “contact with *saṇ*” (or *samphassa*) happens instantaneously. That initial *samphassa* arises automatically purely based on our “*gati*.” But since our actions based on that initial reaction take some time, we still have time to control our speech or bodily actions. Even if bad thoughts come to our minds, we can stop speech or bodily actions. That is *Kāyānupassanā* in *Satipaṭṭhāna* meditation or *Ānāpānasati*.
- Many posts on this site discuss “*gati*,” and at the fundamental level, both *Ānāpāna* and *Satipaṭṭhāna* meditations are all about removing bad “*gati*” and cultivating good “*gati*”; see, “[9. Key to Ānāpānasati – How to Change Habits and Character \(Gati\)](#)”.

An Arahant Has Phassa but Not Samphassa

10. Now, let us consider what happens when an *Arahant* sees or hears similar things (*phassa* or “contact” occurs.) He/she will see or hear the same thing as any other person.

- But an *Arahant* will not be attracted to it or repelled by it. There will be no *samphassa*. Thus, there will be no “*samphassa jā vedanā*” either.
- Put another way, an *Arahant* sees, hears, etc., without bias or *samphassa*. He/she will also generate *vedanā*, but not “*vedanā* due to *samphassa*.”
- An *Arahant* has removed all such defiled “*gati*,” closely related to cravings or “*āsava*.” An *Arahant* has removed all “*āsava*”; this is what is meant by “*āsavakkhaya*” at the *Arahanthood*. This is a technical detail that may not be clear to some; don’t worry about it if it unclear yet.
- ***Samphassa cannot be removed with willpower. It gradually fades away as one attains higher stages of magga phala*** (starting with comprehending “*saṇ*” by becoming “*Sandiṭṭhika*”; see below.)

Samphassa Leads to Samphassa-jā-Vedanā

11. Therefore, now we can see that the step “*phassa paccayā vedanā*” in *Akusala-Mūla Paṭicca Samuppāda* is the “*uddesa* version” and “*samphassa paccayā samphassa-jā-vedanā*” is the “*niddesa* version;” see “[Sutta Interpretation – Uddesa, Niddesa, Patiniddesa](#).”

- However, in most English translations, “*phassa paccayā vedanā*” in *Akusala-Mūla Paṭicca Samuppāda* is translated as “Contact is a condition for feeling” (“[WebLink: suttacentral: Paṭiccasamuppāda Sutta \(SN 12.1\)](#)”) and just below that (at the marker 3.6) “*phassa nirodha vedanā nirodho*” is translated “When contact ceases, feeling ceases.” after one attains *Arahanthood*. That INCORRECTLY implies an *Arahant* would not have feelings! However, an *Arahant* would have “*vedanā*” but NOT “*samphassa-jā-vedanā*.”

- For an *Arahant*, there is only “*phassa*” or mere contact with the external sensory input. An *Arahant* will thus “see,” “hear,” “smell,” “taste,” or “feel” the same things as any other person. But an *Arahant* will not be attached or repulsed by that sensory experience.
- I have discussed many problems with translators directly translating the “*uddesa* versions” of key verses; see “[Word-for-Word Translation of the Tipitaka](#).”
- More details on how “*samphassa*” leads to *samphassa-jā-vedanā* at: “[Vedanā \(Feelings\) Arise in Two Ways](#),” “[Vipāka Vedanā and “Samphassa jā Vedanā” in a Sensory Event](#),” and “[Dukkha Samudaya Starts With Samphassa-Jā-Vedanā](#).”

***Samphassa-jā-Vedanā* Starts to Fade Away When One Becomes “*Sandiṭṭhika*”**

12. The defiled contacts (“*samphassa*”) (and also defiled intentions or *sañcetanā*) start fading away when one becomes a *Sotāpanna Anugāmi*.

- That happens when one starts comprehending the Noble Truths/*Paṭicca Samuppāda*/*Tilakkhaṇa* or “*seeing saṇ*” or “*sandiṭṭhika*” (*saṇ diṭṭhi*.)
- All posts in the new section on “[Buddhism – In Charts](#).”

9.11.9 Phassa paccayā Vēdanā....to Tanhā

Rewritten May 25, 2021; rewritten with new title June 3, 2023

“*Phassa paccayā vedanā*” in *Akusala-Mūla Paṭicca Samuppāda* processes is really “*samphassa paccayā samphassa-jā-vedanā*.” That automatically leads to attachment or *taṇhā*.

Samphassa Is a “Defiled Contact”

1. In a previous post, we discussed the difference between “*phassa*” and “*samphassa*.” See “[Difference between Phassa and Samphassa](#).” To summarize:

- “*Phassa*” is pure mental contact. It is just seeing, hearing, smelling, tasting, touching, or just an arbitrary thought that comes to the mind without one’s own likes/dislikes. *Phassa* is a universal *cetasika* and is present in ALL *cittā*. Whether it is an average person or an *Arahant*, sensory contact is made with “*phassa*.”
- However, that sensory contact can turn into a “defiled contact” (*samphassa*) for an average person. For example, one may walk down the street and see an expensive ring on the road. That initial “seeing” is due to a *kamma vipāka*; that involves only “*phassa*.” But now, greedy thoughts arise, and he picks it up and quickly puts it in his pocket. He did that action with “*samphassa*” (“greedy contact.”)
- Thus, the *Akusala-Mūla Paṭicca samuppāda* involves “*salāyatana paccayā samphassa*,” even though it is usually written as “*salāyatana paccayā phassa*” in the “*uddesa*” or “brief” statement.
- Only an *Arahant* will always have just “*phassa*” and at no time “*samphassa*.”

2. Because of that “defiled contact,” a “mind-made *vedanā*” (*samphassa-jā-vedanā*) can arise in an average person but not in an *Arahant*.

- If that “mind-made *vedanā*” is a joyful/pleasant one, then one would instantly attach to that sensory contact with greed.
- If it is an unpleasant *vedanā*, one will attach with anger/displeasure, for example, when seeing a person disliked.

- One may also attach to a “neutral *vedanā*” if one is unsure about the nature of that sensory input; that can happen due to *avijjā* or ignorance.

Attachment to a Sensory Input (*Taṇhā*) Is Instantaneous

3. In all the above cases, attachment is instantaneous, and it is called *taṇhā*.

- *Taṇhā* means “getting attached.” The word *taṇhā* comes from “*thán*” meaning “place” + “*hā*” meaning getting fused/welded or attached (ආවේශ්ම in Sinhala). Note that “*tan*” in *taṇhā* pronounced like in “thunder.” See “[Pāli Words – Writing and Pronunciation](#).”
- What do we attach to? We attach to sensory inputs or *ārammaṇa*.
- Sensory inputs (*ārammaṇa*) come in through the six sense faculties, possibly leading attachment via *rūpa taṇhā*, *sadda taṇhā* through *dhamma taṇhā*: “[WebLink: suttacentral: Tanhā Sutta \(SN 27.8\)](#).” Of course, we don’t attach to every sensory input.

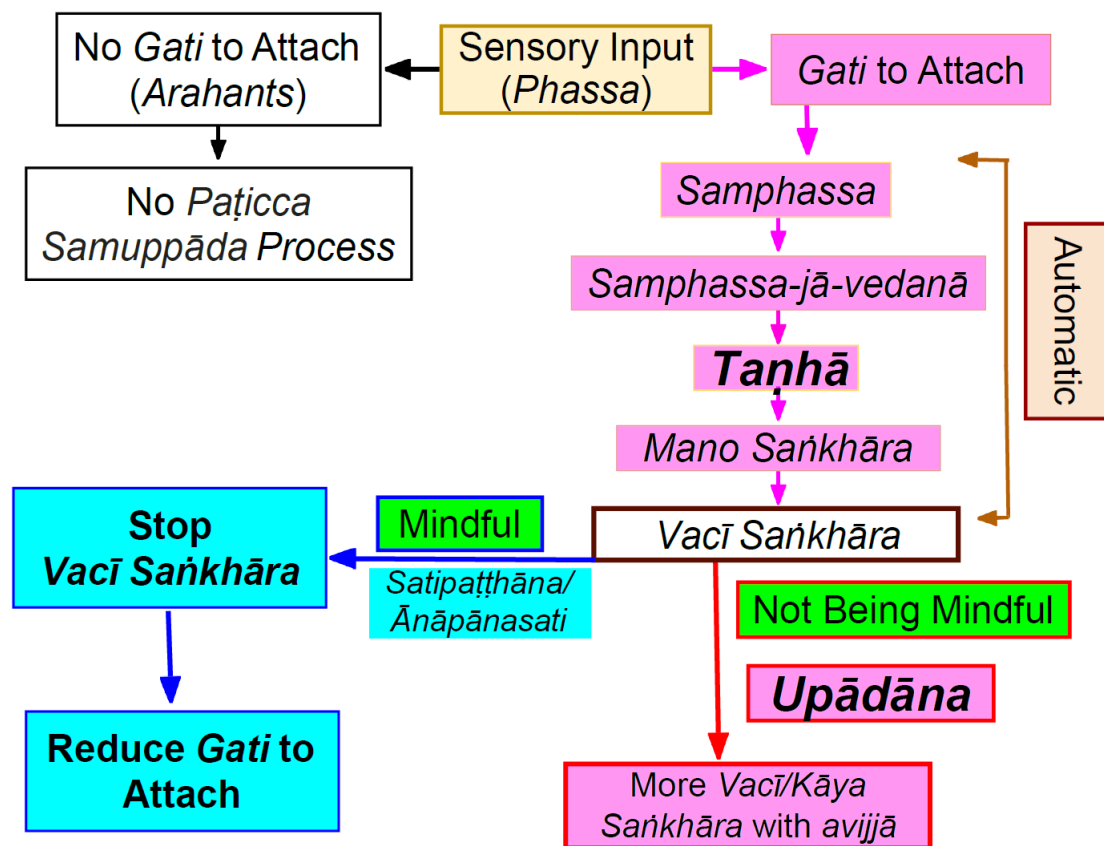

4. We attach to specific sensory inputs based on the view/perception that those can provide us happiness (*sukha*), and thus, they are fruitful (*atta*) and worthwhile pursuing. We like (*icca*) to acquire things that can make us happy and want to get rid of those things we dislike; that gives rise to a sense of “*nicca* nature” about the world.

- But the things we like are based on our *gati*. If one has a matching *gati* to attach to a type of *ārammaṇa*, the attachment happens instantaneously with exposure. **It is like a matchstick making contact with the rough surface of a matchbox; the matchstick catches fire instantly.**
- That attachment is automatic based on one’s *anusaya/gati*.
- *Taṇhā* cannot be removed directly by sheer willpower. The key to eliminating *taṇhā* is gradually reducing our *gati* to attach to certain types of *ārammaṇa*.

Reducing *Taṇhā* Can Only be Done in the *Upādāna* Stage

5. How do we gradually reduce our *gati* to attach to such *ārammaṇa*? The key to reducing such *gati* lies in the next step of *upādāna*, which starts with “*taṇhā paccayā upādāna*.”

- Once attached, “knowingly staying attached” to that *ārammaṇa* is *upādāna*. This is where we start accumulating *abhisāṅkhāra* with *mano*, *vacī*, and *kāya saṅkhāra* in that sequence. We become conscious of “being attached” in the early stage of *vacī saṅkhāra*, where we start “talking to ourselves” without speaking out. See “[Correct Meaning of Vacī Saṅkhāra](#).”
- If we get interested, we may start speaking about it; that also involves *vacī saṅkhāra*. If that interest builds up, we may take action with *kāya saṅkhāra*. In other words, we may engage in *vacī* and *kāya saṅkhāra* even for hours.
- **Unlike the instantaneous step of *taṇhā*, the mind stays in the “*upādāna*” stage for a relatively long time.**
- By being mindful, we can break that *upādāna*, which is the key to *Ānāpānasati/Satipaṭṭhāna*, as outlined in the chart below.

Tanha is Automatic

Print/Download: [“WebLink: PDF Download: Tanhā is Automatic”](#)

“Unwise Gati” Are Cultivated

6. As discussed above, it is an immoral or unwise *gati* that triggers a sequence of events in rapid succession leading to *tanhā*.

- Understanding how various types of *gati* are formed is critical to understanding *Paṭicca samuppāda*.
- **Even though *anusaya* moves from birth to birth, various types of *gati* are cultivated during a lifetime.**
- Without the presence of a “*gati* to attach,” *tanhā* cannot arise!
- However, until *anusaya* are eradicated, the possibility of developing *gati* for various sensory inputs remains. Once such a *gati* is cultivated, attachment (*tanhā*) to corresponding *ārammaṇa* is inevitable.

Removal of Gati (By Being Mindful) is the Key to the Eradication of Anusaya/Tanhā

7. Each time we attach (*tanhā*) to *ārammaṇa*, we strengthen the corresponding *gati* and associated *anusaya*. The reverse is true, too: Each time we stop attaching to an *ārammaṇa* at the upādāna stage, the corresponding *gati* and *anusaya* reduce too.

- That is why the cultivation of the Noble Path involves *Ānāpānasati/Satipaṭṭhāna*.

A Newborn Baby Has Anusaya, but Not Gati

8. A newborn baby does not have any *gati*. Of course, all types of *anusaya* are hidden in that baby’s mind; different types of *anusaya* keep changing but remain with a given lifestream.

- As the baby grows and the brain develops, various types of *gati* are acquired. The types of *gati* acquired will depend a lot on the environment.
- For example, a child growing up has no interest in drinking alcohol, taking drugs, or getting into fights. However, “*gati*” to engage in such activities can be acquired within a few months. Let us consider an example.

Cultivation of *Gati* to *Taṇhā*

9. Suppose there is a teenager who comes to associate with friends that belong to a street gang. They tell him that one needs to enjoy life and has to do “whatever it takes” to make money to enjoy life. If the parents do not have close contact with the teenager, there is no one to explain the perils of such a way of life, and he embraces this wrong vision or “*micchā diṭṭhi*.”

- Thus due to ignorance (*avijjā*), the teenager starts doing things, speaking, and thinking like those gang members: “*avijjā paccayā saṅkhāra*.”
- Then what occupies his mind most of the time are defiled thoughts (*abhisāṅkhāra*) and expectations (*kamma viññāṇa*) related to gang activities and seeking pleasures by using drugs and alcohol: “*saṅkhāra paccayā viññāṇa*.” Thus, a corresponding “defiled mindset” (*viññāṇa*) occupies his mind at those times. During gang activities, his thoughts are focused on them, and what is in his subconscious during other times is also related to such activities.
- Now the teenager has acquired a new *gati*.

10. **The cultivation of various types of *kamma viññāṇa* is directly related to the cultivation of corresponding *gati*.** As that *kamma viññāṇa* grows, the corresponding *gati* grows too.

- That, in turn, leads to “*viññāṇa paccayā nāmarūpa*“. He thinks about and visualizes various gang activities: How to sell drugs to make money and how he will enjoy the rest of the time hanging out with the gang.
- Thus all his six sense faculties become “*āyatana*“: they all are used to find ways to optimize the gang activities and to think about ways to “have fun”: “*nāmarūpa paccayā salāyatana*.” Now the *gati* has matured and is ready to be triggered instantaneously.
- Now, any sensory contact (*ārammaṇa*) related to a gang activity belongs to “*salāyatana paccayā phassa*” or, more explicitly, “*salāyatana paccayā samphassa*.” **As discussed above, that leads to *samphassa-jā-vedanā* and *taṇhā* automatically.**
- Further details in “[Difference Between *Taṇhā* and *Upādāna*](#).”

Gati Can be Broken Only at the *Upādāna* Stage

11. As further discussed in the post, “[Difference Between *Taṇhā* and *Upādāna*](#),” the “*taṇhā paccaya upādāna*” is a critical step in *Paṭicca Samuppāda*.

- *Upādāna* (“*upa*” + “*ādāna*,” where “*upa*” means “close (to mind)” and “*ādāna*” means “pull.” Here, it means to “stay on that *ārammaṇa*” by engaging in more *vacī* and *kāya saṅkhāra*.
- That, of course, will lead to further strengthening of the corresponding *kamma viññāṇa* and *gati*!

12. That vicious cycle can be broken only if the teenager understands the dangers of staying on that downward path.

- Someone must explain to him the dire consequences (*ādīnava*) of continuing such activities.
- It will take a considerable effort to “be mindful” and break such habits (*gati*.) But that is the only way.

Note: This post replaces the post “Phassa paccayā Vedanā....to **Bhava**.” Don’t forget to read the related post, “[Difference Between *Taṇhā* and *Upādāna*](#).”

9.11.10 Difference Between Taṇhā and Upādāna

October 25, 2018; revised November 4, 2019; December 5, 2019; March 30, 2021; September 8, 2022; May 27, 2023

Taṇhā happens automatically due to “bad *gati*.” We have control over “*upādāna*” because that is when we become aware of the “attachment.”

Introduction

1. The difference between *taṇhā* and *upādāna* is subtle, and it is critical to understand that difference. It is the key to understanding how to eliminate bad *gati* and cultivate good *gati*. That is the way to *Nibbāna*.

- That understanding is also critically important to get the basic idea behind the *Satipaṭṭhāna* (and *Ānāpānasati*) *Bhāvanā*.

2. *Satipaṭṭhāna* (and *Ānāpānasati*) *Bhāvanā* are about being mindful and catching new immoral/unwise thoughts that arise in one's mind. One should stop such thoughts immediately. If the thought is good (say about a Dhamma concept), one should stay on it.

- The English word “thought” is too simplified. It includes *vedanā*, *saññā*, *saṅkhāra*, and *viññāṇa*, each of which is complex; see “[Mental Aggregates](#)” and “[Viññāṇa – What It Really Means](#).”
- *Saṅkhāra* is especially crucial since *kammic* energy for future *vipāka* is created by the three types of *saṅkhāra*: *mano saṅkhāra*, *vacī saṅkhāra*, and *kāya saṅkhāra*; see, “[Saṅkhāra – What It Really Means](#).”
- Therefore, we will stay with those Pāli words.

Mano saṅkhāra Arise Automatically Due to *Gati*

3. If we get interested in a sensory input (*ārammaṇa*), *mano saṅkhāra* **automatically** arises in our minds due to sensory input, **based on our *gati***.

- **We don't experience those initial *mano saṅkhāra*, and we only experience them when it comes to the next stage called *vacī saṅkhāra* (“talking to oneself”).**
- That is an important point. Even if a single word is not spoken, *vacī saṅkhārā* accumulate if one is “thinking to oneself” about that object. If one gets more interested, one may speak out, and that is still a *vacī saṅkhāra*; see “[Correct Meaning of Vacī Saṅkhāra](#).” Both types of *vacī saṅkhāra* involve *vitakka* and *vicāra cetasika*.
- If the interest builds up, one may take bodily action. Such bodily actions are initiated by *kāya saṅkhāra*.
- All three types of *saṅkhāra* arise in mind.
- The strength of *kammic* energy created increases in the following order: *mano*, *vacī*, *kāya saṅkhāra*.

4. We get “attached” to various *ārammaṇa* AUTOMATICALLY based on our *gati*. Then *mano saṅkhāra* arises automatically according to *gati*. That will happen as long as we have *taṇhā* (either via *kāma rāga* or *paṭigha*; *avijjā* is present in both cases). We automatically get attracted; see “[Tanhā – How We Attach Via Greed, Hate, and Ignorance](#).”

- As pointed out in that post, the term “*taṇhā*” means getting attached (“*thán*” meaning “place” + “*hā*” meaning getting welded or attached (ආශ්‍රිත in Sinhala).
- That initial attachment arises AUTOMATICALLY based on our *gati*. We don't have direct control over it.

- To stop such *mano saṅkhāra* from arising, we need to change our *gati* over time.

Importance of *Vacī Saṅkhāra*

5. If the attachment is strong enough, the mind will now start thinking about the *ārammaṇa* consciously, i.e., *vacī saṅkhāra* arise, and we become aware of these *vacī saṅkhāra*.

- As soon as we become aware of this “attachment” to something, we CAN BE mindful, think about its consequences, and move away from it. Therefore, we can stop such thoughts at the *vacī saṅkhāra* stage; see “[Correct Meaning of Vacī Saṅkhāra](#).”
- However, our minds like to enjoy such *vacī saṅkhāra*. It is easy to do and is very tempting. Many people get their sexual satisfaction from just “daydreaming” about an event in the past or sexual encounters that might occur in the future.

6. In the “[WebLink: suttacentral: Na Santi Sutta \(SN 1.34\)](#),” the Buddha defined “*kāma*” to be this “daydreaming” or “generating more and more thoughts about it”: “*Na te kāmā yāni citrāni loke, Saṅkapparāgo purisassa kāmo...*”

Translated: “World’s pretty things are not *kāma*, a person creates his/her *kāma* by thinking about those pretty things (*rāga saṅkappa*)...”

- That is a critical point.
- Furthermore, we “daydream” about not just sex, but other sensory pleasures too. See, “[What is “Kāma”? It is not Just Sex.](#)”
- Even if one did not physically do anything, one could accumulate a lot of bad *kamma* merely by generating such *vacī (abhi)saṅkhāra*. See “[Correct Meaning of Vacī Saṅkhāra](#).”
- The world is full of beautiful things, tasteful foods, sweet smells, etc. Seeing, tasting, and smelling them is not NECESSARILY *kāma*. For example, the Buddha accepted delicious foods but never generated *mano/vacī saṅkhāra* about them. He had removed all *gati*.

Vacī Saṅkhāra Responsible for *Upādāna*

7. Anyone who is not yet an *Ānāgāmi* is likely to generate such defiled *mano saṅkhāra* automatically. Then that leads to generating *vacī saṅkhāra* or “*kāma saṅkappa*” at some level.

- If we “go with the flow” and go along enjoying this “daydreaming” or generating *vacī saṅkhāra*, that is what is called “*upādāna*.”
- *Upādāna* means “pulling it closer (in one’s mind)” (“*upa*” + “*ādāna*,” where “*upa*” means “close” and “*ādāna*” means “pull”). [*ādāna* : (nt.) , taking up ; grasping.]

8. Therefore, we cannot control the “*taṇhā*” or “initial attachment” step. It happens with *mano saṅkhāra* that arise automatically due to our *gati*.

- And those *gati* cannot be removed just by abstaining from experiencing such sensory events.
- First, we need to reduce our *gati* to attach to that type of sensory input. Stopping *vacī saṅkhāra* as soon as we become aware of them is the way to reduce bad *gati*. *Vacī saṅkhāra* are really “nutrients” or “food/water” for cultivating those *gati*.
- If we keep the bad habit of generating *vacī saṅkhāra*, that *gati* will only get stronger with time. It is essential to stop giving such “mental food” to those bad *gati*.

Killing Bad Habits by Stopping *Vacī Saṅkhāra*

9. The Buddha explained it this way: Humans cannot live more than seven days without food AND water. We will die.

- But if We stop taking solid food but only water, We can live for several weeks.
- However, one may be tempted to take in a little food. That will break the process and the clock re-starts.

10. That is the analogy for killing a habit. One can kill the habit (or the addiction) relatively quickly by doing the following. Stop *kāya saṅkhāra* (actual act, which is like solid food) and *vacī saṅkhāra* (thinking/talking about it, which is like water).

- But if we stop doing the activities (*kāya saṅkhāra*), but keep generating *vacī saṅkhāra*, then it may NEVER be removed entirely.
- So, the analogy is not that good. ***Vacī saṅkhāra* are almost as bad as *kāya saṅkhāra***, i.e., *vacī saṅkhāra* are like “snacks” (more than just water in that analogy).
- The more times we break that discipline, the longer it takes to break that habit or *gati*. That is why we must always be mindful of our thoughts, speech, and actions. That is the key to *Ānāpānasati* and *Satipaṭṭhāna Bhāvanā*.

Key to *Ānāpānasati*

11. For example, one can break the drug addiction in a shorter time (say a month) if he has the discipline to stop taking it and think about it.

- If he stops taking the drug but enjoys thinking about it (*vacī saṅkhāra*), it will not work. He may go on without using drugs for months and months, but he may lose the resolve and return to drugs one day.
- That happens to many people who are addicted to different things like alcohol, smoking, or even over-eating. They may temporarily stop those activities, but months later they break them. **That is because they had not stopped generating *vacī saṅkhāra* or engaging in *upādāna* for that activity.**
- That is the basis of *Ānāpānasati Bhāvanā*; see “[9. Key to Ānāpānasati – How to Change Habits and Character \(Gati\).](#)”

Paṭicca Samuppāda Process Starts With a Sensory Input

12. Most *Paṭicca Samuppāda* processes start with a sensory input making one's mind attached to an *ārammaṇa*. The following chart illustrates the processes involved.

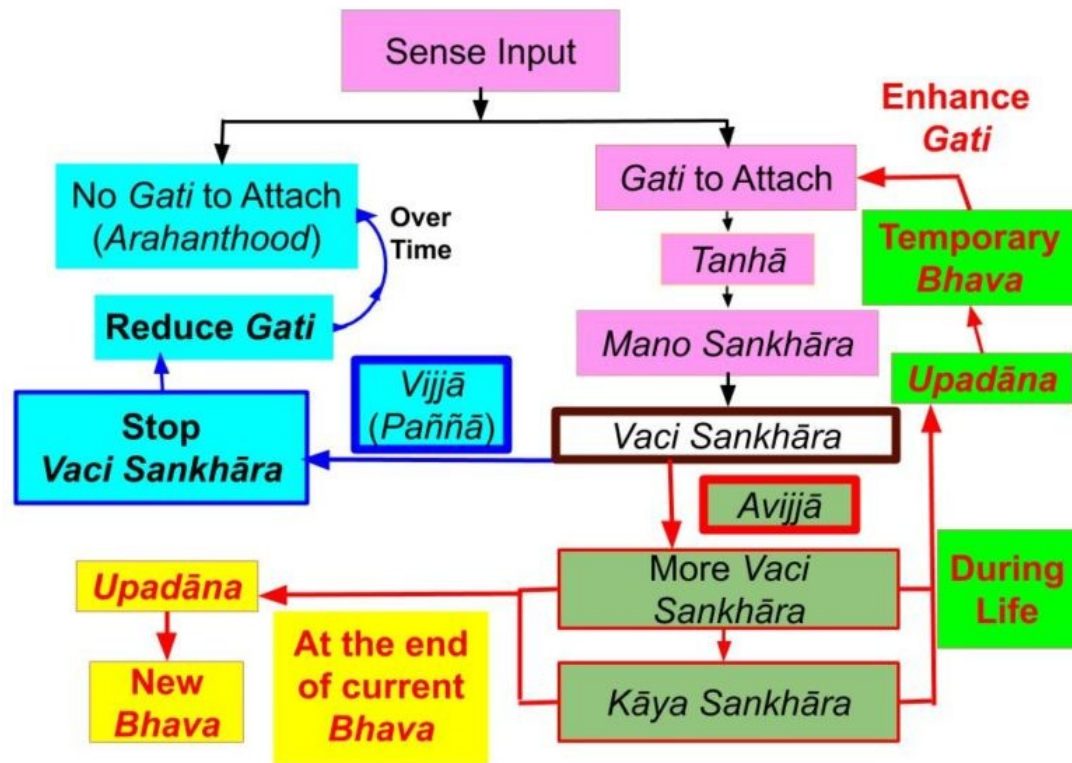

Chart of Taṇhā and Upādāna

For a pdf file for printing: “[WebLink: PDF File: Taṇhā and Upādāna.](#)”

- As we can see, the key is to stop generating *vacī saṅkhāra*. As soon as we become aware of “bad thoughts,” we must stop them. Then, over time, that “bad gati” will reduce in strength and eventually disappear.
- Therefore, by being mindful and acting with *paññā* (wisdom, which is *vijjā* or the opposite of *avijjā*), one can reduce *upādāna* and gradually get rid of bad *gati*.
- In addition to contributing to bad *gati*, *vacī saṅkhāra* make one grasp a new “bad *bhava*” at the *cuti-paṭisandhi* moment.

Basis of *Satipaṭṭhāna* and *Ānāpānasati Bhāvanā*

13. That is the basis of the *Satipaṭṭhāna* (and *Ānāpānasati*) *Bhāvanā*; see, “[7. What is Ānāpāna?](#)” and “[Mahā Satipaṭṭhāna Sutta.](#)”

- If we are mindful, we can immediately become aware of a “bad thought” at the *vacī saṅkhāra* stage. Thereby, we CAN stop the *upādāna* step, i.e., we can decide not to “pull it closer.”
- For example, if we see an attractive person, we may automatically start looking at him/her. But once we become aware, we can look away and start thinking about something else.
- In another extreme example, we may get angry with someone and may start saying something harsh. But as soon as we realize that we are going back to our “bad old habit,” we can even stop in the mid-sentence. If we realize our mistake even after saying something terrible, we NEED TO apologize for our harsh speech. That may be difficult initially, but that is the only way to eliminate such bad habits.

14. When we start controlling the CRITICAL *upādāna* step, our *gati* will slowly change. Then, with time, the first step of “*taṇhā*” will gradually disappear.

- That is the basis of *Ānāpānasati* and *Satipaṭṭhāna* meditations.

Taṇhā to Upādāna to Bad Gati

15. A bottle of poison on a table will not harm us. It can kill someone only if he/she takes it and drinks the contents.

- It is the same with *upādāna*. There could be many “pleasing things” out there in the world. But if we understand the *anicca* nature (that those things will only lead to suffering in the end), our minds will not crave them. That will stop *upādāna*.
- For example, we know that some flies attracted to light get burned. They don’t know that even if the shiny light looks attractive, it can kill them. In the same way, a fish sees only the bait. It does not see the hook.
- We don’t touch a hot stove that is glowing red because we know that it can burn us.
- But most don’t realize that sensory pleasures only lead to suffering. Of course, one must take care of the extreme sensory pleasures first. As I always say, it is a step-by-step process; see, “[Is It Necessary for a Buddhist to Eliminate Sensual Desires?](#).”

16. Gradually controlling *upādāna* is the way to reduce bad *gati*, cultivate good *gati*, and eventually get rid of *taṇhā*.

- Removal of *taṇhā* is the same as removing *anusaya*.
- To be more effective, one must also reduce *avijjā* by learning Dhamma and comprehending *Tilakkhaṇa* (*anicca, dukkha, anatta* nature).

Cultivating Good *Gati* via *Vacī Saṅkhāra*

17. Of course, it works in reverse too. We can cultivate “good *gati*” by continually thinking about related things.

- For example, if a Dhamma concept comes to mind, we should cultivate it. **Then it will become a habit to think about Dhamma concepts.**
- Nowadays, when I get up, the first thing that comes to my mind is a Dhamma concept or a problem that I had been thinking about the previous day.

Summary

18. Finally, there are two things one must do to make progress on the Path.

- One is to **reduce *avijjā* by learning Dhamma.**
- The other is to **reduce *upādāna* by controlling *vacī saṅkhāra*,** as we discussed above.
- If we do both, the progress will be much faster.

9.11.11 Upādāna Paccayā Bhava – Two Types of Bhava

June 10, 2023

The “*upādāna paccayā bhava*” step in *Paticca Samuppāda* plays a critical role when accumulating *kamma* and also at the moment of grasping a new rebirth. By being mindful, we can break that *upādāna* and avoid bad rebirths. It is also the basis of *Ānāpānasati/Satipaṭṭhāna*.

Upādāna – Critical Step

1. *Taṇhā* means “attachment to an *ārammaṇa*.” It is automatic based on one’s *anusaya/gati*. Once attached, “knowingly staying attached” to that *ārammaṇa* is *upādāna*.

- As long as one has hidden defilements (*anusaya*) and the tendency to attach to specific sensory inputs (*gati*), **attachment to a particular ārammaṇa (taṇhā) is automatic** and instantaneous. **We don't have control over that.**
- On the other hand, **upādāna means “staying attached and responding to that ārammaṇa actively.”** Within a few seconds, we become aware of that attachment. The initial attachment leads to *mano saṅkhāra* (automatic), but then we start consciously generating *vacī saṅkhāra*, which is when we become aware of the attachment. **At that point, we have control over it.**

2. If we understand the harmful consequences of “staying attached,” we can willfully stop generating *abhisāṅkhāra*, i.e., stop generating immoral thoughts and actions. **That means we can stop the upādāna process while in the middle of it.** See “[Difference Between Tanhā and Upādāna](#).”

- If we keep breaking the “*upādāna paccayā bhava*” step, that will gradually decrease *taṇhā* via the reduction of the corresponding *gati*.
- In addition, if we start comprehending the Noble Truths (*Paṭicca Samuppāda*), then we can start removing *anusaya* leading to the removal of *taṇhā*. See “[Phassa paccayā Vedanā....to Tanhā](#)” and #8 in “[Loka Sutta – Origin and Cessation of the World](#) (with chart #6).”

Taṇhā Leads to Kamma Accumulation and Grasping Rebirth

3. The “*upādāna paccayā bhava*” step plays a critical role in two cases:

Idappaccayatā PS during life: This is where “*kamma bhava*” (“*kammic* energy”) accumulation happens in the “*upādāna paccayā bhava*” step. At this step, the mind starts cultivating more *abhisāṅkhāra* with “*avijjā paccayā saṅkhāra*.” See “[Difference Between Tanhā and Upādāna](#).”

Idappaccayatā PS at the moment of grasping a birth in a new realm: This is where the mind grasps a new existence (a “*upapatti bhava*”) at the *cuti-paṭisandhi* moment. Here the step “*upādāna paccayā bhava*” happens within a *javana citta* grasping a new existence. That happens when the existing *hadaya vatthu* is dying. With the grasping of a new existence, *kammic* energy creates a new *hadaya vatthu* appropriate for the new *bhava*.

- Both involve “grasping new *bhava*.” **The first is a “temporary *bhava*” that may last only minutes to hours. The second is a new existence (*bhava*) in a different realm.**

Ārammaṇa – Initiates Tanhā and Upādāna

4. All *kamma* accumulation — as well as grasping a new existence (*bhava*) — starts with an *ārammaṇa* or a sensory input.

- If the sensory input (*ārammaṇa*) is mind-pleasing, we attach to it with *kāma rāga*. If it is repulsive, we attach to it with *paṭigha*.
- Both involve *avijjā*, and sometimes *avijjā*, by itself, can lead to attachment without *kāma rāga* or *paṭigha*. For example, one may conclude that cultivating (the *anāriya* versions of) *jhāna* or *samāpatti* can be beneficial; those are based on *rūpa rāga* and *arūpa rāga*, craving existences in *rūpa* and *arūpa* *Brahma* realms, respectively.

Kamma Accumulation – Kamma Bhava

5. *Kammic* energies generated with *abhisāṅkhāra* are “deposited” in the *viññāṇa dhātu*. They are in three main categories: *Kāma bhava*, *rūpa bhava*, and *arūpa bhava*.

- *Āneñjābhisāṅkhāra* (generated via the cultivation of *anāriya arūpāvacara samāpatti*) accumulates energies in the *arūpa bhava*.

- *Puññābhisaṅkhāra* (generated via the cultivation of *anāriya rūpāvacara jhāna* and *puñña kamma*) accumulate energies in the *rūpa bhava* and higher realms of *kāma bhava*, respectively.
- *Apuññābhisaṅkhāra* (generated via the cultivation of *apuñña kamma*) accumulates energies in the lower realms of the *kāma bhava*.
- See “[Rebirths Take Place According to Abhisāṅkhāra](#)” for details.

6. These “*kamma bhava*” are the *kamma bija* or “*dhammā*” that we have discussed in “[Rūpa, Dhammā \(Appatigha Rūpa\) and Nāmagotta \(Memories\)](#) (with chart #14)” and “[Where Are Memories Stored? – Viññāna Dhātu.](#)”

- Such *kamma bija* or “*dhammā*” automatically are sorted out into the three categories of *kāma bhava*, *rūpa bhava*, and *arūpa bhava* (and with sub-selections to specific realms) in *viññāṇa dhātu*.

7. While doing such *kamma*, one is “temporarily born” in an existence (*bhava*) corresponding to the kind of *kamma*.

- For example, during rape, one would have the mindset of an animal; during that time, one acts more like an animal than a human. Only afterward may they realize the enormity of what was done. *Kammic* energy corresponding to that action is also likely to contribute toward a future birth in the animal realm, i.e., that energy can lead to rebirth as an animal in a future life.
- On the other extreme, while cultivating a *jhāna*, one would have the mindset of a *Brahma*. Furthermore, the *kammic* energy generated will be deposited in *viññāṇa dhātu* and will definitely lead to rebirth in a *Brahma* realm at the moment of death, since it is an “*ānantarika kamma*,” see below.

Appropriate *Kamma Bhava* Becomes *Upapatti Bhava* at *Cuti-Paṭisandhi*

8. At the *cuti-paṭisandhi* moment, an appropriate *bhava* selection happens automatically per the following rules.

- i. *Kammic* energies accumulated in the *arūpa bhava* and *rūpa bhava* are due to good “*ānantarika kamma*,” i.e., cultivation of *arūpa samāpatti* and *rūpāvacara jhāna*. Thus if a person had cultivated *rūpāvacara jhāna*, he would be born in a *rūpāvacara Brahma* realm. If he had also cultivated *arupāvacara samāpatti*, he would have been born in an *arupāvacara Brahma* realm.
- ii. *Puñña kamma* (not *jhāna* or *samāpatti*) can lead to rebirths in the higher realms of *kāma loka* (the human realm and the six *Deva* realms).
- iii. *Apuñña kamma* (with *apuññābhisaṅkhāra*) accumulate *kammic* energies in the *kāma bhava* also, but they lead to rebirths in the four lowest realms. There are several *ānantarika kamma*.

9. The first category belongs to “good *ānantarika kamma*,” and they lead to rebirths in the appropriate *Brahma* realm without exception.

- In category (iii), the strongest would be cultivating a “bad *ānantarika kamma*,” leading to rebirth in an *apāya* in the following life.
- The BAD *ānantarika kamma* are five: killing one’s mother, killing one’s father, killing an *Arahant*, shedding the blood of a Buddha, and creating *Saṅgha bhēda*. These are listed in the following link in the *Tiṭṭhaka*: “[WebLink: suttacentral: Nānakathā \(KN Kv 20.6\).](#)”
- Details can be found in “[Rebirths Take Place According to Abhisāṅkhāra](#)” and “[Ānantarika Kamma – Connection to Gandhabba.](#)”
- The mind is turned to a new sensory event with an *ārammaṇa*. In contrast, it is customary to say that a “sign of the pending rebirth realm” is brought to mind with a *nimitta* close to the *cuti-paṭisandhi* moment. Let us discuss that next.

Ārammaṇa Brings a Sensory Event During Life

10. During life, our mind shifts from one *ārammaṇa* to another rapidly.

- We have discussed *ārammaṇa*. See, for example, “[Change of Mindset Due to an Ārammaṇa](#)” and “[Ārammaṇa Plays a Critical Role in a Sensory Event](#).”
- Some of such *ārammaṇa* are brought as *kamma vipāka*.

Nimitta of a New Existence in the Rebirth Process

11. Strong *kamma bija* or “*dhammā*” bring rebirth in a new existence/realm at the *cuti-paṭisandhi* moment (with a *nimitta*.)

- A *nimitta* means a “sign” of the place of rebirth or a “re-enactment of a *kamma* done, or a prominent *gati*”. For example, those about to grasp a rebirth in the *niraya* may see raging fires in the corresponding *niraya*. If it was a killing of a human, that past scene may come to his mind as a “*kamma nimitta*.” Finally, a “*gati nimitta*” is a scene of activity one habitually cultivated. For example, an alcoholic may see “getting drunk and being unable to walk.” That is a sign of an animal birth (animals walk on four legs.)

12. Some details of how *kamma bija* (*dhammā*) brings *vipāka* (during life or while grasping a new rebirth) are discussed in “[Anantara and Samanantara Paccayā](#).” In particular, when one attains the *Sotāpanna* stage, the “*samanantara*” to bring rebirth in an *apāya* will not be there. That is why Ven. Āṅgulimāla was not reborn in an *apāya* even though he killed almost a thousand people.

- In some cases, suitable conditions to bring “good *vipāka*” may be effective. In Asian countries, recordings of *paritta* (*sutta* recital) or Dhamma discourses are played. [*paritta* : [adj.] 1. small; insignificant; little; 2. **protection**; protective charm.]

Grasping a Nimitta at Cuti-Paṭisandhi Is Automatic

13. Grasping a new rebirth happens in the last *citta vūthi* of the current life. It happens extremely fast, and we don’t have any control over it. We can summarize what happens as follows.

- The strongest *kamma vipāka* (from those accumulated in *viññāṇa dhātu*) comes to mind. Suppose one committed an *ānantarika kamma* during the present life; that comes first and will be grasped without exception.
- In other cases, the strongest of all existing *kamma* waiting to bear fruit comes to mind even before the last *citta vūthi*. This process may start even a few days before the impending death. Let us consider an example to illustrate why this happens. Suppose a person has done many highly-immoral *kammās*, some even during this life. However, he has attained the *Sotāpanna* stage in this life. So, all those *kamma vipāka* potent enough to bring rebirth in an *apāya* will be automatically rejected by the mind, one by one. If a *kamma bija* that can bring rebirth in a *Deva* realm comes next, that will be grasped; in this case, a “sign” of the *Deva* realm will come to mind, called a “*kamma nimitta*.” That *kamma nimitta* may keep coming to his mind until the moment of death.

14. In the above example, suppose he did not have a strong enough *kamma bija* to bring rebirth in a *Deva* realm (the highest realm possible for a *Sotāpanna*.) Then he will be reborn as a human again. In that last case, it is a *gati nimitta* because the rebirth is according to his “*Sotāpanna gati*.” He could not be reborn in a lower realm.

- The third type of *nimitta* is a “*kamma*,” meaning a specific *kamma* will re-create the scene of the past *kamma* in the mind of the dying person. For example, if he had killed someone during an argument, that complete scene would be re-created in his mind, like in a dream. If his mindset has not changed, his mind

will go through the same actions as before (i.e., “*upādāna*” will occur); he will then grasp the corresponding rebirth in an *apāya*.

- Thus, the three types of *nimitta* are: *gati nimitta*, *kamma nimitta*, and *kamma*.

Sequence of Removal of *Upādāna*

15. The correct order is *diṭṭhi upādāna*, *kāma upādāna*, *sīlabbata upādāna*, *attavāda upādāna*.

- One enters the Noble Path by getting rid of *diṭṭhi upādāna* via comprehending the worldview of the Buddha. This can be done only via learning the correct Dhamma.
- Then one contemplates the dangers of *kāma assāda* and gets rid of *kāma upādāna* at the *Anāgāmi* stage.
- The last two are removed completely only at the *Arahant* stage.
- All types start decreasing in strength at the *Sotāpanna Anugāmi* stage.

Technical Point about the Nomenclature

16. There are four types of *upādāna* as stated in the “[WebLink: Upādāna Sutta \(SN 45.173\)](#)”: *Diṭṭhi upādāna*, *kāma upādāna*, *sīlabbata upādāna*, *attavāda upādāna*.

- However, the *Tipiṭaka* Commentary “[WebLink: suttacentral: Petakopadesa \(KN Pe 5\)](#)” names the four types of *upādāna* as: “*Kāmāsavo kāmupādānaṃ, bhavāsavo bhavupādānaṃ, diṭṭhāsavo diṭṭhupādānaṃ, avijjāsavo attavādupādānaṃ, imehi catūhi upādānehi pañcakkhandhā.*”
- The other *Tipiṭaka* Commentary “[WebLink: suttacentral: Nettipakarana \(KN Ne 36\)](#)” provides a similar description: “*Tattha kabaḷīkāre āhāre “asubhe subhan”ti vipallāso, phasse āhāre “dukkhe sukhan”ti vipallāso, viññāṇe āhāre “anicce niccan”ti vipallāso, manosañcetanāya āhāre “anattani attā”ti vipallāso. Paṭhame vipallāse ṭhito kāme upādiyati, idaṃ vuccati kāmupādānaṃ; dutiye vipallāse ṭhito anāgataṃ bhavaṃ upādiyati, idaṃ vuccati bhavupādānaṃ; tatiye vipallāse ṭhito saṃsārābhinandinīṃ diṭṭhiṃ upādiyati, idaṃ vuccati diṭṭhupādānaṃ; catutthe vipallāse ṭhito attānaṃ kappiyaṃ upādiyati, idaṃ vuccati attavādupādānaṃ.*”
- Thus, instead of the *sīlabbata upādāna*, both Commentaries have *bhava upādāna* listed. They mean the same thing. Those who cultivate *anāriya jhāna* or *anāriya samāpatti* do that because of their desire to be born in a *Brahma* realm; they follow certain moral conduct (*sīla*) with *sīlabbata upādāna* because they have the desire to be reborn with *bhava upādāna*.
- Also, *attavāda upādāna* relates directly to the First Noble Truth, i.e., all suffering arises due to the ignorant idea (*avijjā*) that this world is fruitful (*atta* nature) and can provide happiness. Thus, one removes *attavāda upādāna* completely at the *Arahant* stage, when the *anatta* nature is fully comprehended.

9.11.12 Nāmarūpa, Viññāṇa, Dhammā – Closely Related

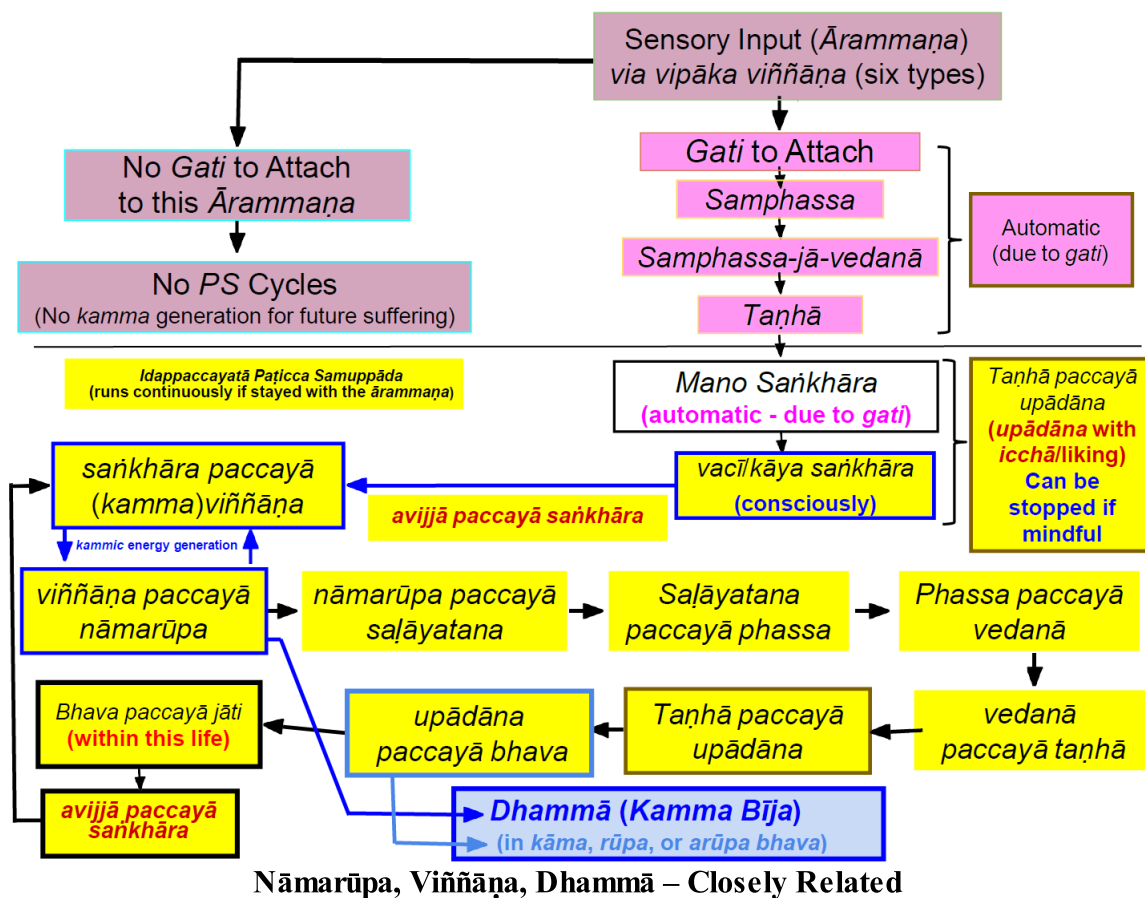

June 21, 2023

Nāmarūpa, *viññāṇa*, and *dhammā* are closely related. They create *kammic* energies that can lead to rebirth in various existences (*bhava*) based on the types of *saṅkhāra* involved.

Introduction

1. Even though *Paṭicca Samuppāda* (PS) is written as a linear sequence, it does not start at “*avijjā paccayā saṅkhāra*.” It starts when an *ārammaṇa* or a sensory input comes to mind. See “[Change of Mindset Due to an Ārammaṇa](#).”

- Furthermore, once the PS process starts, it does not proceed linearly. As the chart below shows, the “*taṇhā paccayā upādāna*” step takes it back to the “*avijjā paccayā saṅkhāra*” step. That is because one starts generating *saṅkhāra* only after getting attached to an *ārammaṇa*.

Print/Download pdf: [“WebLink: PDF Download: Nāmarūpa, Viññāṇa, Dhammā”](#)

2. Furthermore, at the “*viññāṇa paccayā nāmarūpa*” step, before proceeding to the next step, it may go back and forth between “*viññāṇa paccayā nāmarūpa*” and “*nāmarūpa paccayā viññāṇa*” steps as also shown in the chart.

- Even though the 11 steps of PS are stated in a linear sequence for convenience, one must be able to see and understand these interconnections.
- The main goal is to understand how different types of *kammic* energies (giving rise to rebirths in various realms) are created by different types of one’s own actions, i.e., *abhisāṅkhāra*.
- That helps eliminate the wrong view (*sakkāya diṭṭhi*) that there is an “unchanging self/soul/ātman.”**

Creation of *Kammic* Energies in the Mind

3. All the steps in the *Idappaccayatā Paṭicca Samuppāda* (PS) involve ONLY the mind and energies created by the mind. See “[Idappaccayatā Paṭicca Samuppāda – Bhava and Jāti Within a Lifetime.](#)”

- That is why NONE of its steps arise for a living *Arahant*. It is critical to contemplate this point.
- However, as we have discussed many times, one must not use the *uddesa* version but the *niddesa* version of PS. Otherwise, many seeming contradictions can arise leading to confusion. See “[“Elephant in the Room’ – Direct Translation of the Tipitaka.](#)”

- Thus, for example, “*saṅkhāra*” and “*viññāṇa*” refer to “*abhisāṅkhāra*” and “*kamma viññāṇa*.” Therefore, a living *Arahant* is fully conscious (has *viññāṇa*) and experiences *vedanā* and *saññā* (*saṅkhāra*.) Furthermore, an *Arahant* does not have *āyatana* but has sense faculties (*indriya*.)

Idappaccayatā and Upapatti PS

4. It is the *Idappaccayatā* PS that operates at ANY given time.

- *Kammic* energies generated in *Idappaccayatā* PS processes are “*dhammā*.” They are “*anidassana/appaṭigha rūpa*” lying below the *suddhaṭṭhaka* level, i.e., they do not belong to the 28 types of *rūpa* in the “*rūpa loka*”; see “[Nāma Loka and Rūpa Loka – Two Parts of Our World](#).”
- **It is only at the moment of grasping a new existence (*bhava*) that a set of *rūpa* belonging to the “*rūpa loka*” (i.e., above the *suddhaṭṭhaka* level arises) via the *Upapatti* PS.** That also occurs in an *Idappaccayatā* PS cycle at the moment of grasping a new existence/rebirth. Even those *rūpas* are invisible to us: the *hadaya vatthu* and a set of *pasāda rūpa*.
- **The *Upapatti* PS only describes the overall process (cumulative effect of uncountable *Idappaccayatā* PS cycles spanning even eons.)**
- That is a critical point to understand, and we can discuss it at the forum if there are any questions.

Critical Steps Where the Mind Creates *Kammic* Energy

5. Accumulation of *kammic* energy starts with the mind attaching to sensory input (*ārammaṇa*) because one has the wrong view/perception that it can bring future happiness. That initial attachment is automatic and is based on one’s *gati*: “[Change of Mindset Due to an Ārammaṇa](#).”

- Once attached, the mind starts engaging in various types of *vacī* and *kāya abhisāṅkhāra*, and of course, that is due to the ignorance (*avijjā*) of the Noble Truths/PS, i.e., “*avijjā paccayā saṅkhāra*.” See the above chart.
- Thus, now the PS cycle jumps to the “*avijjā paccayā saṅkhāra*” step. Simultaneously, a “*kamma viññāṇa*” arises in the mind, which is an expectation based on *lobha*, *dosa*, and *moha*. “*Kamma viññāṇa*” is more than consciousness (*viññāṇa*); it has *kammic* energy! Some of these “*kamma viññāṇa*” can lead to rebirth and are specifically called “*paṭisandhi viññāṇa*.”

Nāmarūpa Formation – A Critical Step

6. With a specific expectation (*kamma viññāṇa*), the mind starts combining “*nāma*” and “*rūpa*”, i.e., generating “*nāmarūpa*.” **The mind visualizes various scenarios in *javana citta*s generating *kammic* energy.** This is the origin of “future *hadaya vatthu/pasāda rūpa*,” capable of generating *cittās*! **Nothing else in the universe can produce *cittās*.** However, since created by the mind, such a set of *suddhaṭṭhaka* has a temporary/transient existence and thus has no value; it is a mirage/ghost. **Thus the name *bhūta* (ghost)** for a *manomaya kāya* is made with a set of *hadaya vatthu/pasāda rūpa*. See “[Bhūta and Yathābhūta – What Do They Really Mean](#)” and “[The Origin of Matter – Suddhaṭṭhaka](#).”

- Both “*kamma viññāṇa*” and *nāmarūpa* are directly connected to *kammic* energy/*kamma bija* that remains in *viññāṇa dhātu* to bring *vipāka* in the future. See “[Nāma Loka and Rūpa Loka – Two Parts of Our World](#)” and “[Where Are Memories Stored? – Viññāṇa Dhātu](#).”
- **Those are critical steps that one will understand at successively deeper levels as one starts comprehending PS.**
- Now the mind may go back and forth between “*viññāṇa paccayā nāmarūpa*” and “*nāmarūpa paccayā viññāṇa*” many times before proceeding to the next step of “*nāmarūpa paccayā saḷāyatana*.” This allows *nāmarūpa* to get firmly established in “*kamma viññāṇa*.” See “[WebLink: suttacentral: Nāmarūpa Sutta \(SN 12.58\)](#).”

- All steps in PS are discussed in detail at “[Paṭicca Samuppāda in Plain English](#).”
- It is a good idea to read the above links and to understand “*nāmarūpa*.”

Kamma Bhava Depends on the Ārammaṇa

7. *Kammic* energies can remain in *viññāṇa dhātu* for a long time. They are categorized into three main categories: *kāma bhava*, *rūpa bhava*, and *arūpa bhava*. That categorization can be easily seen with the type of *ārammaṇa* initiating the *kamma* accumulation.

- Any immoral deed is done with an *ārammaṇa* in *kāma loka* and thus belongs in the *kāma bhava*. Engaging in meritorious deeds may lead to rebirth in a *Deva* realm, which also is within the *kāma bhava*.
- On the other hand, one may focus on a *kasiṇa* object or breath and attain an *anāriya jhāna*. That is a *kamma* belonging to “*rūpa bhava*” since it leads to rebirth in a *rūpāvacara Brahma* realm.
- The third type is “*arūpa bhava*,” and *kammic* energies accumulating in this category lead to rebirths in an *arūpāvacara Brahma* realm. One must cultivate *arūpāvacara samāpatti* to accrue *kammic* energies in this category.
- All 31 realms belong to one of those three main categories of *bhava*.

8. Each main category has sub-categories according to the realm of possible rebirth. For example, the four realms in the *apāyās*, the human realm, and the six *Deva* realms belong to “*kāma bhava*.” The 16 *rūpāvacara Brahma* realms belong to the “*rūpa bhava*,” and the four *arūpāvacara Brahma* realms belong to the “*arūpa bhava*.”

- I have indicated the three main categories in the above chart.
- Also, note that a given *ārammaṇa* will initiate the accumulation of *kammic* energy in one of the three main *bhava*. See, for example, “[WebLink: suttacentral: Pathamabhava Sutta \(AN 3.76\)](#).”

Ārammaṇa to Abhisāṅkhāra to Kamma Bhava/Dhammā

9. Most of the *ārammaṇa* we encounter belong to *kāma bhava*. They lead to *apuññābhisāṅkhāra* (immoral deeds) or *puññābhisāṅkhāra* (moral deeds.)

- A few humans cultivate *anāriya jhāna* by focusing the mind on a *kasiṇa* object or breath. Those deeds (*kamma*) also belong to the *puññābhisāṅkhāra*. But this type of *puññābhisāṅkhāra* leads to *kammic* energies in the “*rūpa bhava*.”
- An even smaller number of humans proceed beyond that and cultivate *arūpāvacara samāpatti*. Those involve *āneñjābhisāṅkhāra*, and accumulate *kammic* energies in the “*arūpa bhava*.”
- These are discussed in detail in “[Rebirths Take Place According to Abhisāṅkhāra](#).”

10. The critical point is that *dhammās* (with *kammic* energy) are created in *Paṭicca Samuppāda* processes that start with “*avijjā paccayā (abhi)saṅkhāra*.”

- However, we start accumulating new *kamma* (via *abhisāṅkhāra*) when we get attached to an *ārammaṇa* (sensory event.) Thus, the **initiation of PS cycles is not at the “*avijjā paccayā saṅkhāra*” step but the “(sam)phassa paccayā vedanā” step.**
- Attaching to sensory input (*ārammaṇa*) with liking (*icchā*) happens first; see the chart above. Also, see “[Icchā \(Cravings\) Lead to Upādāna and to Eventual Suffering](#).”

The Meaning of “Dhammā”

11. “*Dhammā*” means “to bear.” They bear the *kammic* consequences of one’s actions and play a critical role in rebirth.

- “*Vipāka*-bearing *kammic* energy” of a *kamma* stays in *viññāṇa dhātu* (or *kamma bhava*) as “*kamma bija*” or “*dhammā*.”
- Just like a *rūpa* can bring in a sensory input via the five physical senses, *dhammā* can directly bring a sensory input (memory of a previous *kamma*) to the mind.
- While the five types of *rūpa* (*vaṇṇa*, *sadda*, *gandha*, *rasa*, *phoṭṭhabba*) belong to the “material world” made of *suddhaṭṭhaka*, “*dhammā*” are below the *suddhaṭṭhaka* stage.
- As we know, a *suddhaṭṭhaka* is the smallest unit of matter in Buddha Dhamma belonging to the 28 types of *rūpa* made with the four elements of *pathavi*, *āpo*, *tejo*, *vāyo*. In contrast, *dhammā* are “*upādāya rūpa*.”

Dhammā Are Energies Below the Suddhaṭṭhaka Stage

12. Unlike the other five types of *rūpa*, *dhammā* cannot be seen (*anidassana*) or touched/detected even with most sensitive instruments (*appaṭigha*) and is detectable only with the mind (*dhammāyatana pariyāpannam*). Again, they do not belong to the 28 types of *rūpa* in *Abhidhamma*.

- That is explained in the last verse of “[WebLink: suttacentral: Tikanikkhepa \(Abhidhamma Ds 2.3.1\)](#)” in *Dhammasaṅgaṇī* as, “*yañca rūpaṃ anidassanaṃ appaṭighaṃ dhammāyatanapariyāpannam; asaṅkhatā ca dhātu—ime dhammā anidassana appaṭighā*.”
- Also see “[Anidassana, Appatigha Rūpa Due to Anidassana Viññāṇa](#).”
- Therefore, ***dhammās* bear the fruits of *kamma*!** They can bring *vipāka* in the future.
- See “[What are Rūpa? – Dhammā are Rūpa too!](#)” for details.

13. All such *dhammā* generally appear in two forms: ***dhammā*** and ***adhammā***.

- The word *dhammā* generally refers to “**good *dhammā***.” Those that arise due to “**bad *kamma***” are “***adhammā***.”
- “[WebLink: suttacentral: Dhamma Sutta \(AN 10.182\)](#)” provides a direct explanation. “Killing, stealing, sexual misconduct, lying, divisive, harsh, or idle speech, greed, ill will, and wrong view. Those ten are ***adhammā***. **Abstaining from such actions** (and having the mindset of generating “good *javana* power”) leads to ***dhammā***.”
- However, both ***dhammā*** and ***adhammā*** belong to the *dhammā* category. It is just that ***adhammā*** “bear the fruits of bad *kamma*” and ***dhammā*** “bear the fruits of good *kamma*.”
- The word “smell” indicates all types of odors, but if someone says “it smells,” that means it is a “bad odor.” That is the accepted usage. In the same way, *dhammā* may sometimes mean the “**good type**” but generally includes both. For example, *dhammā* in “*manañca paṭicca dhamme ca uppajjati mano viññāṇam*” includes both types.

What Is Buddha Dhamma?

14. Dhamma (with the upper case “D” and short “a”) refers to Buddha’s teachings. In contrast, “*dhammā*” with lowercase “d” and long “a”) refers to *kammic* energies that can bring *vipāka* in the future.

- Furthermore, Buddha Dhamma makes accumulated *dhammā* ineffective, thus leading to *Nibbāna*. For example, Aṅgulimāla killed almost a thousand people and was heading to rebirth in an *apāya*, but he avoided that because he attained *Arahanthood*.
- The word Buddha comes from “*bhava*” + “*uddha*”; here, “*bhava*” means “existence (in the 31 realms),” and “*uddha*” means “removal” or “making ineffective.” Therefore, a Buddha figures out how to stop the rebirth process and thus end future suffering.

- Thus, “**Buddha Dhamma**” is “*bhava uddha dhamma*.” It mainly refers to the **teachings of the Buddha** that lead to *Nibbāna*, i.e., to the “stopping of future existence/rebirths.”
- Also, see “[Dhamma and Dhammā – Different but Related](#).”

“Sabbe Dhammā Anattā”

15. I have seen in discussion forums people state, “*sabbe dhammā anattā*” means Buddha Dhamma is also *anattā*!

- As we discussed above, *dhammā* is different from Buddha Dhamma.
- “*Sabbe dhammā anattā*” applies only to *dhammā* (accrued *kammic* energies) and not to Buddha Dhamma.
- Even though “good *dhammās*” lead to rebirth in human, *Deva*, and *Brahma* realms, they are ultimately useless because those existences are only temporary. At the end of such “temporary lives,” rebirth in lower realms (*apāyās*) is inevitable unless one starts on the Noble Path by attaining at least the *Sotāpanna Anugāmi* stage.

9.11.13 Bhava Paccayā Jāti....Jarā, Maraṇa,...

Revised June 16, 2019; re-written May 24, 2021; May 29, 2021; revised June 6, 2023

An existence (*bhava*) can result in this life (*kamma bhava*) or future lives (*upapatti bhava*). Both types lead to more suffering in the end. Repetition of *kamma bhava* (i.e., engaging in similar activities) adds to *kammic* energies (*kamma bīja*) that can fuel future *upapatti bhava*.

Kamma Bhava and Upapatti Bhava

1. In a previous post (“[Nāmarūpa Paccayā Salāyatana](#)”), we discussed how repeated immoral actions of a teenager could bring about a specific type of existence (*bhava*) during the current life. That is a “temporary existence” (in that example as a drunkard/alcoholic). Still, it **creates *kammic* energy that will remain as *kamma bhava***.

- We also discussed how such *kamma bhava* could get stronger with time and become strong enough to lead to a new existence at death. **This is called a *upapatti bhava***.
- Therefore, there are two types of “*bhava*”: those that can bring about “experiences” during the current life (*kamma bhava*) and those that become strong enough to power a whole new existence (*upapatti bhava*).
- This is explained in the “[WebLink: suttacentral: Pattecasamuppāda Vibhaṅga](#)”: “*Tattha katamo upādāna paccayā bhavo? Bhavo duvidhena—atthi kamma bhavo, atthi upapatti bhavo,*” i.e., “What is *upādāna paccayā bhavo*? Two types of *bhava* – *kamma bhava* and *upapatti bhava*.”
- This is why the Buddha emphasized the importance of the *Idappaccayatā Paṭicca Samuppāda*. *Avijjā* is NOT there all the time. Any unwise action done at a given time is due to *avijjā* present AT THAT TIME. See, “[WebLink: suttacentral: Avijjā Sutta \(AN 10.61\)](#)”: “*Purimā, bhikkhave, koṭi na paññāyati avijjāya: ‘ito pubbe avijjā nāhosi, atha pacchā samabhavī’ti. Evañcetaṃ, bhikkhave, vuccati, atha ca pana paññāyati: ‘idappaccayā avijjā’ti.*” Thus, ***avijjā* may arise based on the conditions at a given time**, mainly depending on the *ārammaṇa* (sensory input.)
- One’s actions (*kamma*) DURING a lifetime lead to the accumulation/growth of different types of “*kammic* energies;” strong ones will lead to rebirths. Of course, in some cases, a single immoral action (like killing a human) can lead to a bad rebirth.

Bhava as a “Seed”

2. Another way to look at the “*bhava*” concept is to treat it as a seed. As we discussed in the previous post, when we act with ignorance (and greed or hate), that helps the **growth of a *kamma* seed (*kamma bhava*.)** With more related *kamma* done, that seed can grow and bring **a new birth (*jāti*) in the future (with *upapatti bhava*.)** This concept of a *kamma* seed is easier to comprehend.

- Just like an ordinary seed **has the potential** to give rise to a plant, **a *kamma* seed (or a “*bhava*”) has the potential to bring about a “*jāti*” or a “birth,”** either during this life or in preparing a new life.
- Of course, once the *Arahanthood* is attained, an *Arahant* will not grasp another *bhava* (since there is no *upādāna*.) Thus even if there could be many *kamma* seeds, they don’t get to “germinate.” Ven. Āṅgulimāla’s account is a good example. See, [“Account of Āṅgulimāla – Many Insights to Buddha Dhamma.”](#)
- I write it as *jāti* (the conventional “*Tipiṭaka* English”), but it is pronounced “*jāthi*.” See, [“Tipiṭaka English” Convention Adopted by Early European Scholars – Part 1”](#)

An Example from the Previous Post – *Bhava* and *Jāti* During a Life

3. Let us take the example of the teenager we discussed in the previous post, [“*hassa Paccayā Vedanā...to Tanhā*.”](#) Because of the influence of his friends, the teenager starts dealing and using drugs and gradually gets drawn into the gang to become a gang member, and eventually starts doing violent acts of beating and killing people.

- When he did the first beating, his friends probably encouraged or even forced him to do it. Let us suppose he did not have a *samsāric* habit of doing that violent act. So, when he did the first act, that energized a small *kamma* seed (or a “*bhava*.”)

4. The next time he did something similar, this initial *kamma* seed made it easier for him to do the second act. Once he did that, the seed got bigger, and the next time he may not need much encouragement, and so on. The more he does it, the more easily he can get into that “*bhava*,” i.e., the stronger the *kamma* seed becomes.

This is none other than many *Idappaccayatā* PS cycles running that start with “*avijjā paccayā saṅkhāra*” (doing immoral deeds due to *avijjā*) and lead to “*upādāna paccayā bhava*,” making the corresponding *bhava* (or *kamma* seed) strong.

- This is another way of expressing “habit (*gati*; pronounced “*gathi*”) formation” that I have discussed in many other posts. The more one does actions suitable for a specific “*bhava*,” the *viññāṇa* for similar behavior grows, and it is easier for one to be “born” in a corresponding state; this is “*pati+ichcha*” leading to “*sama+uppāda*” as pointed out in the introductory post, [“*Paṭicca Samuppāda* – “*Pati+ichcha*”+” *Sama+uppāda*.”](#)
- Thus, the more the teenager acts violently, the easier it becomes for him to be “born in that state,” i.e., easier/habitual for him to do similar acts.
- In other words, repeated *saṅkhāra* leads to strengthening the corresponding mindset or *viññāṇa*, and it propagates down the *Paṭicca samuppāda* series to make “*kamma bhava*.”

5. Now let us consider when that *kamma* seed or “*kamma bhava*” gives rise to a “*jāti*” in *Idappaccayatā Paṭicca samuppāda*. One day, his drug deal is sabotaged by a rival gang member, and he gets angry. He is easily “born” in that “animal-like violent state.” He starts beating up that guy. This is a “*jāti*” or “birth” in a violent existence.

- When the beating is almost done, that “*jāti*” is almost over with; it is at the “*jarā*” (decay) stage, and when it is done, that is the end or death (“*maraṇa*”) of that “*jāti*.”
- Thus when that episode is over, that temporary “*jāti*” of “a violent existence” is over.

- The rest of it, “*soka, parideva, dukkha, domanassa*” or many forms of suffering, comes later in that life or even in future births. The *kamma* seed that helped him do that act itself got even stronger.

6. That violent action now gives rise to another *kamma* seed.

- Now, if during that confrontation with the other rival gang member, he gets beaten up, then that is due to a *kamma vipāka* of that new *kamma*.
- In either case, that “birth” or “*jāti*” (the confrontation with the rival gang member) would give him only misery at the end: “*soka, parideva, dukkha, domanassa*.”
- Many such *Idappaccayatā samuppāda* cycles can operate during even a day, and he may be “born” repeatedly in that confrontational state. Some may be minor, like getting mad at his friends, but some could be violent. He has prepared the “*bhava*,” and he can get into “*jāti*” or be “born in that *bhava*” easily.
- Just like when a seed is made, it is easy to get that seed to germinate. Once we prepare a “*bhava*,” it is easy to be born in that type of existence.

7. Now, we can see that a “*bhava*” or a “*kamma* seed” is the potentiality for a particular kind of existence or a “state of mind” during the current life itself.

- He can easily transition to that “state of mind” (or *bhava*). For example, he may have a good time with his family and be in a “normal state of mind.” Then he gets a phone call from a fellow gang member asking for his help with the gang-related activity.
- He will instantly be transitioned to the “gang mentality” and be born a gang member. Then he will engage in whatever gang activity.
- But any birth (or *jāti*) will come to an end. When that activity is over, he may come home and be part of the typical family life.
- However, that “bad *jāti*” will ALWAYS lead to “*jarā, maraṇa, soka, parideva, dukkha domanassa*.” Even if that particular was successful and left there happily, that ACTIVITY will lead to suffering in the future. He had accumulated more *kammic* energy for that “bad *bhava*.”

8. But the important thing to remember is that “*bhava paccayā jāti*” **does not mean he is guaranteed to be born in that state**. He will likely be born in that state under suitable conditions, for example, upon urged by friends.

- But if he comes to his senses and realizes the perils of such actions, he can make an effort and slowly degrade the potency of that *kamma* seed. The first thing is to stop doing those more violent acts. If the teenager has enough determination and moral support from his family, he may get into the moral path.
- If he determines to change, it will be challenging in the beginning. It is like trying to stop a moving car. If the car has a lot of speed, it takes a considerable effort to stop. It is easier to stop a slowly moving car before it gains speed. In the same way, it is easier to revert if one realizes that one is on the wrong path early.

Same Example – Future *Bhava* and *Jāti* (via *Upapatti* PS)

9. If the teenager does not change his ways but only gets involved more and more with violent activities, then that *kamma* seed (or *kamma bhava*) will grow bigger and can become strong enough to energize a whole new existence (rebirth) or “*upapatti bhava*.” Or he can even make a single huge *kamma* seed by killing someone.

- We all likely have acquired several or even many such large bad *kamma* seeds (i.e., many bad “*upapatti bhava*”) suitable to yield rebirths in the lowest four realms; we have no way of finding out.
- Of course, we are also likely to have many good *kamma* seeds (i.e., many good “*upapatti bhava*”) suitable to yield rebirths in the higher realms.

No Control Over the Next *Bhava* (in *Upapatti* PS)

10. And we do not have any control over which “*upapatti bhava*” is selected at the end of the current *bhava*. The strongest with the most “*upādāna*” associated gets to the front automatically. The Buddha gave a simile to explain how this selection of a “*upapatti bhava*” or a strong *kamma* seed happens at the *cuti-paṭisandhi* transition at death.

- Imagine a barn that keeps the cows in for the night. All the cows are anxious to get out and roam around in the morning. But when the gate opens, it is the most muscular cow that has come to the front and is out of the gate when it is opened. The weaker ones don't even try to be at the front.
- Just like that, it is the most potent “*kamma* seed” or a “*paṭisandhi bhava*” that wins at the *cuti-paṭisandhi* transition.
- Let us get back to the teenager that we discussed above. Suppose the *kamma* seed he nourished during this life as a violent person with “animal-like” behavior is the strongest one of all his accumulated *kamma* seeds. In that case, it will bring about an animal existence at the *cuti-paṭisandhi* transition.

11. A Buddha could analyze such a *upapatti Paṭicca Samuppāda* cycle in finer detail to pinpoint exactly what type of animal it would be. This is because a Buddha can see not only a person's whole history in the present life but going back to many eons; thus, he can see which *kamma* seed will bring the following existence and exactly which kind of “*gati*” are embedded in that *kamma* seed. We can only discuss the general trends, and here we have discussed only the main ideas of how these *Paṭicca samuppāda* cycles operate.

- Going back to the teenager, In this case, it is the *upapatti Paṭicca Samuppāda* cycle that operates, and “*bhava paccayā jāti*” here leads to the birth in a new existence as an animal using that *upapatti bhava*.

Many Births Within a *Upapatti Bhava* – For Humans and Animals

12. Once born in such an animal existence, that animal will grow and then start old age (“*jarā*”) and eventually die (“*maraṇa*”).

- The *kammic* energy of that *kamma* seed may not deplete in just one birth (this applies only to humans and animals.)
- Since most animals have shorter lifetimes, only a fraction of that *kammic* energy is likely to have been spent. That animal will keep going through many similar births (“*jāti*”) until the energy of that *kamma* seed is spent. It is said that many animals keep coming back to the same life many hundreds of times.

13. This is the difference between “*bhava*” and “*jāti*.” Once one gets a new existence or “*bhava*,” one could have many births (“*jāti*”) in that existence until the energy of the *kamma* seed is spent. See, “[Bhava and Jāti – States of Existence and Births Therein](#).”

- Thus we can see that the last step of “*jāti paccayā jarā, maraṇa, soka, parideva, dukkha, domanassa*” will be with “him” for a long time to come. It is not just one birth but many that will correspond to that existence as that animal.
- In general, within the human “*bhava*,” one could be reborn many times before the energy of that “good *kamma* seed” is depleted. This is why some children can recall previous recent lives. However, it is tough to get another “human *bhava*”; see, “[Rebirth – Connection to Suffering in the First Noble Truth](#).”
- However, especially in *Deva* and *Brahma* realms, there is only one birth during that existence as a *Deva* or a *Brahma*.

Kamma Seeds Removed for Those With *Magga Phala*? – No

14. Before closing this section, let us discuss another critical point. We mentioned earlier that everyone had accumulated numerous good and bad *kamma* seeds strong enough to give rise to good and bad rebirths. Then the question arises: Does a person attain the *Sotāpanna* stage (i.e., make bad rebirths in the lowest four realms void) by eliminating all those bad *kamma* seeds?

- While it is possible to reduce the potency of *kamma* seeds and maybe even eliminate some, it may not be possible to remove all. The *Ariya Mettā Bhāvanā* may remove many *kamma* seeds, as discussed in the “*Bhāvanā* (Meditation)” section, but there could be leftovers. It is said that the Buddha had 11 instances of bad *kamma vipāka*, including a back problem.
- Therefore, it is very likely that we all have many good and bad *kamma* seeds strong enough to energize many good and bad rebirths.
- What happens at the *cuti-paṭisandhi* moment involves the “*upādāna paccayā bhava*” step in the *upapatti Paṭicca Samuppāda* cycle. As we recall, this is the step responsible for energizing “*upapatti bhava*” to bring in a new existence.”
- But this same step is involved in grasping the strongest “*upapatti bhava*” at the end of the current “*bhava*.” Suppose a person dies, and that was the last possible human birth for him/her. Then at the dying moment, he/she will willingly grasp something they crave, i.e., matching the dominant “*gati*” of him/her.

15. Let us consider the case of the violent teenager again. Suppose he continued his violent acts and built up a “*upapatti bhava*” suitable for a violent animal. Then at the dying moment, he could see in his mind (like in a dream) a rival gang member trying to “steal a drug deal”; he would also see a gun close by. By his instincts, he will get angry, grab the gun, and shoot that person. This is an example of a “*gati nimitta*.”

- That is the “*upādāna paccayā bhava*” step for the new existence. He has willingly grasped the mindset of an animal, and he will be born as an animal. His next thought-moment is in that animal that comes out of the dead body of the teenager as a “*gandhabba*” with an invisible fine body.
- This is described in detail in other posts; it needs more background material in “*manomaya kāya*” to understand the technical details, which is not critical here. However, now we can understand how a new existence is grasped at the end of a “*bhava*” in the *upapatti Paṭicca Samuppāda* cycle.

16. Let us go back to how a *Sotāpanna* avoids such bad rebirths even if he/she has many bad *kamma* seeds. Suppose that *Sotāpanna* has the same kind of *kamma* seed as that teenager (it could be from a previous life) and that it is strong enough to come to the forefront of his/her mind at the dying moment.

- What happens is that a *Sotāpanna* will not grab the gun and shoot that person even if it is his/her worst enemy doing something that could make him/her mad. His/her mindset or “*gati*” has been permanently changed. Thus “*upādāna paccayā bhava*” step will not be executed for that *kamma* seed.
- In that case, now the next potent *upapatti bhava* will come to the forefront. That will also be rejected if that is also a bad one suitable for rebirth in the lowest four realms (*apāyā*.) Eventually, he/she will grasp a rebirth compatible with his/her “*gati*” at that dying moment, which for a *Sotāpanna* will never be the “*gati*” to be born in an *apāyā*.
- That process happens automatically and very quickly. We do not have conscious control over it.
- Thus one’s rebirth will be determined by how one lives (and had lived previous lives). If one lived like an animal, one would be born an animal no matter how much one wishes for a “good birth.” As discussed above, the real danger is that we do not know how we lived our previous lives.
- This is why *Paṭicca samuppāda* means “*pati + ichcha*” leading to “*sama*” + “*uppāda*” or what one grasps willingly and habitually is what one that will operate automatically at the dying moment; see, “[Paṭicca Samuppāda – “Pati+ichcha”+” Sama+uppāda.](#)”
- Also, see “[Bhava and Jāti Within a Lifetime – Example.](#)”

9.12 **Imasmim Sati Idam Hoti – What Does It Really Mean?**

August 5, 2018; revised January 26, 2019; May 2, 2019; July 4, 2022

A Zen Riddle?

1. “*Imasmim sati idam hoti, imassa uppādā idam uppajjati; imasmim asati idam na hoti, imassa nirodhā idam nirujjhatī ti.*” This is a famous phrase that appears in most *suttā* that describe *Paṭicca Samuppāda* (Dependent Origination).

- It is usually translated as, “When there is this that is, with arising of this that arises; when there is not this that is not, with the cessation of this that ceases.” *That sounds like a Zen riddle!*
- But the Buddha never made his *Dhamma* into riddles. He always presented it in the simplest possible way. Some verses have become riddles because people have incorrectly translated them; they did not understand the true meanings or the significance of key Pāli words.
- Another example is, “[Anidassana Viññāna – What It Really Means.](#)”

Sati – Mundane Meaning in the Verse

2. The keyword in the verse that we are interested is “*sati*.” All English translations that I have seen have left out this keyword!

- There are two meanings to the word “*sati*.” One is mundane, meaning “attention.”
- It is actually that mundane meaning that should be used in this verse.
- If one set the mind on an immoral task (planning a robbery, assembling a bomb to kill people, etc.) one will start doing immoral deeds with “*apuñña abhisankhāra (or apuññābhisankhāra)*” and initiate *akusala-mūla Paṭicca Samuppāda*. That will lead to rebirth in the *apāyā*.
- At the opposite end, a Noble Person above the *Sotāpanna Anugāmi* stage will try to set the mind on cultivating “*kusala-mūla sankhāra*” and initiate *kusala-mūla Paṭicca Samuppāda*. Here, they will have *Sammā Sati* (mindset focusing on *Nibbāna*). That “*sati*” is the one with deeper meaning.

Sammā Sati – Deeper Meaning of Sati

3. The deeper meaning of “*sati*” should be used in the context of *Satipaṭṭhāna bhāvanā*, for example.

- That “*sati*” is a *sobhana cetasika*, i.e., a good mental factor. The *sati cetasika* is cultivated by learning *dhamma* and eventually comprehending *Tilakkhaṇa*.
- *However, that cetasika sati does not have a counterpart in asobhana cetasika, i.e., there is no “asati” cetasika.*
- In verse, both “*sati*” and “*asati*” are mentioned. Therefore, “*sati*” in the context of the verse in question does not refer to the *sati cetasika*.

Mundane Sati – Examples

4. The word “*sati*” in “*Imasmim sati idam hoti,..*” is, however, still closely related to the mind. It just refers to keeping the mind focused on the task at hand, whether it is a “good” or “bad” task.

- Suppose a suicide bomber is assembling a bomb that he intends to use to kill many people. He must be paying careful **attention** (or “being mindful”) to what he is doing, otherwise, he will blow himself up. That is the **mundane meaning of sati** there.

- Thus, the term “mindful” can apply to the mindset of the suicide bomber while assembling the bomb. He must be mindful of his task. If he makes even a slight mistake, he may trigger the bomb right there.
- Obviously, he is not engaged in *Satipaṭṭhāna*. In fact, someone being mindful of morality/*Nibbāna* would not engage in such an act.

Attention Needed to Do Good or Bad

5. That mundane meaning of “attention” is the meaning that should be used in analyzing the verse in question here: “*Imasmim sati idaṃ hoti...*”

- **What it means in this context is “to focus the mind on something (X).”** Then that “something” leads to the **creation of “another thing (Y).”** Even though X is ALWAYS mental, Y could be mental (*nāma*) or material (*rūpa*) or a combination of the two (*nāmarūpa*).
- When the mind is set on getting something done, one makes *vacī* and *kāya saṅkhāra* accordingly, i.e., one thinks about getting it done and acts accordingly; that is the “*sati*” that is referred to in that verse.
- When the mind does not focus on something (and does not make plans in mind via *vacī saṅkhāra*, and carries out such plans), that is called “*asati*.” In that case, there is no reason that Y would arise.

Good or Bad Deeds Done With Different Types of *Saṅkhāra*

6. As we will see below, making *saṅkhāra* is just the first step in a series of steps.

- We can make the mindset to do good or bad things. Keeping the attention on “good things” will lead to good outcomes (via good *dhamma*). Keeping the attention on “bad things” will lead to bad outcomes (via bad *dhamma*).
- Therefore, both cases (good or bad attention) will lead to a corresponding (good or bad) outcome. That is what is meant by “*Imasmim sati idaṃ hoti*” or “keeping the attention on this will lead to that.”
- What *Paṭicca Samuppāda* describes the eventual outcome (“that” is a “*jāti*,” the outcome or the result): “*saṅkhāra paccayā viññāṇa*,”...ending up in “*bhava paccayā jāti*.”

7. Of course, if one does not keep the attention on something, one will not be generating (good or bad) *saṅkhāra* about it. Thus, one will not initiate *Paṭicca Samuppāda* cycles: “*saṅkhāra paccayā viññāṇa*,”...ending up in “*bhava paccayā jāti*.”

- Therefore, if there is “*asati*” or “no attention on some task,” then there will be **no reason** for there to be an **outcome**: “*Imasmim asati idaṃ na hoti*.”
- In other words, the mind will have no reason to generate new *saṅkhāra* to initiate *Paṭicca Samuppāda* processes.

8. Now we can understand half of the verse: “*Imasmim sati idaṃ hoti*, “*Imasmim asati idaṃ na hoti*.” That means “when the mind is focused on X that will give rise to Y when the mind is **not focused** on X that **will not give rise** to Y.”

- We have already figured out what is meant by “*imassa uppādā idaṃ uppajjati*” and “*imassa nirodhā idaṃ nirujjhati*.”
- This part states that what has **ultimately come to being (*uppajjati*) or the *jāti*** is due to **what first arose in mind (*uppādā*) which are *saṅkhāra***.
- Similarly, for something **not to come to being (*nirujjhati*)**, the corresponding cause **should not arise in mind (*nirodhā*)**. If there is “*asati*” or “no attention,” then nothing will be realized: “no *jāti*” (because no *saṅkhāra* is generated to trigger *Paṭicca Samuppāda* processes.)

Correct Interpretation of the Verse

9. So, now we can translate the whole verse: “when the mind is focused on this it will give rise to that, when the mind is **not focused** on this it **will not give rise** to that; **this arising in mind** (*uppādā*) will give rise to that (*uppajjati*), **this not arising in mind** (*nirodhā*) will stop that from coming to being (*nirujjhatī*).

- In straightforward terms, this describes the Buddha's key message: if one does not generate any defilements in mind, then one will not be reborn into this suffering-filled world.
- Furthermore, one **MUST** understand the *anicca/dukkha/anatta* nature of this world and set the mind on attaining Nibbāna to stop the rebirth process. That understanding will stop *apuñña abhisankhāra* from arising via “*avijjā paccayā saṅkhāra*” in *akusala-mūla Paṭicca Samuppāda*.

10. How anything and everything in this world arises with **the mind as the “creator”** is explained in the doctrine of the cause or effect of *Paṭicca Samuppāda*.

- Even though the process starts with generating *saṅkhāra* (“*avijjā paccayā saṅkhāra*”), it involves many other steps (“*saṅkhāra paccayā viññāṇa*,” etc.) before the final thing manifests.
- That is why this verse comes in many *suttā* just before introducing the *Paṭicca Samuppāda* cycle starting with “*avijjā paccayā saṅkhāra*.”

Ariyasāvaka Sutta (SN 12.49)

11. What we discussed above becomes clear in the “[WebLink: suttacentral: Ariyasāvaka Sutta \(SN 12.49\)](#).” It starts with the statement: “*Na, bhikkhave, sutavato ariyasāvakassa evaṃ hoti: ‘kim nu kho—kismiṃ sati kim hoti, kissuppādā kim uppajjati? Kismiṃ sati saṅkhārā honti, kismiṃ sati viññāṇaṃ hoti, kismiṃ sati nāmarūpaṃ hoti, kismiṃ sati saḷāyatanāṃ hoti, kismiṃ sati phasso hoti, kismiṃ sati vedanā hoti, kismiṃ sati taṇhā hoti, kismiṃ sati upādānaṃ hoti, kismiṃ sati bhavo hoti, kismiṃ sati jāti hoti, kismiṃ sati jarāmaraṇaṃ hoti’ ti?*”

Translated: “*Bhikkhus*, a noble disciple, is not confused by the question: ‘[What gives you indeed— (*kim nu kho*—)] What **in mind** becomes a cause? With the existence of what **in mind** does what come to being? What **in mind** becomes a cause for *saṅkhāra*? What **in mind** becomes a cause for *viññāṇa*? What **in mind** becomes a cause for *nāmarūpa*?... What **in mind** becomes a cause for *jarāmaraṇa*?’ ”

12. The next verse: “*Atha kho, bhikkhave, sutavato ariyasāvakassa aparappaccayā ñāṇamevettha hoti: ‘imasmiṃ sati idaṃ hoti, imassuppādā idaṃ uppajjati. Avijjāya sati saṅkhārā honti; saṅkhāresu sati viññāṇaṃ hoti; viññāṇe sati nāmarūpaṃ hoti; nāmarūpe sati saḷāyatanāṃ hoti; saḷāyatane sati phasso hoti; phasse sati vedanā hoti; vedanāya sati taṇhā hoti; taṇhāya sati upādānaṃ hoti; upādāne sati bhavo hoti; bhave sati jāti hoti; jātīya sati jarāmaraṇaṃ hoti’ ti. So evaṃ pajānāti: ‘evamayaṃ loko samudaya’ ti.*”

Translated: “*Bhikkhus*, the noble disciple knows that what arises is **dependent on what is cultivated in mind**: ‘When this exists **in mind**, that comes to be; with the arising of this **in mind**, that arises. When the mind is ignorant (*avijjāya sati*), *saṅkhāra* arise/come to be (*saṅkhārā honti*). When there are *saṅkhāra* **in mind** (*saṅkhāresu sati*), *viññāṇa* comes to be (*viññāṇaṃ hoti*). When there is *viññāṇa* **in mind** (*viññāṇe sati*), *nāmarūpa* arise/come to be (*nāmarūpaṃ honti*),When the mindset takes that of a certain existence (*bhave sati*), *jāti* comes to be (*jāti hoti*). When there is *jāti* **in mind** (*jātīya sati*), *jarāmaraṇa* comes to be (*jarāmaraṇaṃ hoti*). **He understands thus: ‘In such a way the world arises (samudaya).**’ ”

13. Next verse is: “*Na, bhikkhave, sutavato ariyasāvakassa evaṃ hoti: ‘kim nu kho—kismiṃ asati kim na hoti, kissa nirodhā kim nirujjhati? Kismiṃ asati saṅkhārā na honti, kismiṃ asati viññāṇaṃ na hoti, kismiṃ asati nāmarūpaṃ na hoti, kismiṃ asati saḷāyatanāṃ na hoti, kismiṃ asati phasso na hoti, kismiṃ asati vedanā na hoti, kismiṃ asati taṇhā na hoti, kismiṃ asati upādānaṃ na hoti, kismiṃ asati bhavo na hoti, kismiṃ asati jāti na hoti, kismiṃ asati jarāmaraṇaṃ na hoti’ ti?*”

Translated: “*Bhikkhus*, a noble disciple is not confused by the question: ‘[What gives you indeed— (*kim nu kho*—)] Absence of what **in mind** would not be a cause? With the cessation of what **in mind** what would

be stopped from arising? Absence of what **in mind** (*kisimim asati*) *saṅkhāra* would not result (*na honti*)? Absence of what **in the mind** *viññāṇa* (an expectation of a worldly thing) would not result? ..Absence of what **in the mind** *nāmarūpa* would not result?... Absence of what **in the mind** *jarāmaraṇa* would not result?’.”

14. And then: “*Atha kho, bhikkhave, sutavato ariyasāvakassa aparappaccayā ñāṇamevettha hoti: ‘imasimim asati idaṃ na hoti, imassa nirodhā idaṃ nirujjhati. Avijjāya asati saṅkhārā na honti; saṅkhāresu asati viññāṇaṃ na hoti; viññāṇe asati nāmarūpaṃ na hoti; nāmarūpe asati saḷāyatanam na hoti ... pe ... bhava na hoti ... jāti na hoti ... jātiyā asati jarāmaraṇaṃ na hoti’*ti. So *evam pajānāti: ‘evamayaṃ loko nirujjhati’*ti.

Translated: “*Bhikkhus*, the noble disciple knows that what arises is dependent on what is cultivated in mind: ‘When this does not exist **in mind**, that will not come to be; with the cessation of this **in mind**, that is stopped from arising. When there is no ignorance **in mind** (*avijjāya asati*), *saṅkhāra* do not come to be (*saṅkhārā na honti*). When *saṅkhāra* cease to exist **in mind** (*saṅkhāresu asati*), *viññāṇa* do not come to be (*viññāṇaṃ na hoti*). With the cessation of *viññāṇa* **in mind** (*viññāṇe asati*), *nāmarūpa* do not come to be (*nāmarūpaṃ na honti*),When there is *bhava* absent **in mind** (*bhave asati*), *jāti* will not come to be (*jāti na hoti*). When there is no *jāti* **in mind** (*jātiyā asati*), *jarāmaraṇa* do not come to be (*jarāmaraṇaṃ na hoti*). **He understands thus: ‘In such a way the world ceases to exist (*nirujjhati*)**, and thus the *saṃsāric* suffering ends.’ ”

15. Finally, “*Yato kho, bhikkhave, ariyasāvako evaṃ lokassa samudayaṃca atthaṅgamaṃca yathābhūtaṃ pajānāti, ayaṃ vuccati, bhikkhave, ariyasāvako diṭṭhisampanno itipi ... pe ... amatadvāraṃ āhacca tiṭṭhati itipī*’ti.

Translated: “*Bhikkhus*, a noble disciple thus understands the origin and the ending of the world. He is knowledgeable about the true nature of this world, has the correct vision, and comes to attain *Nibbāna*.”

16. That is the complete *sutta*. It provides the basic reasoning behind *Paṭicca Samuppāda*.

- It is important to realize that all the steps in *Paṭicca Samuppāda* involve the mind up to the *jāti* stage. When the *jāti* stage arrives, the process is complete. That *jāti* that came into being has to evolve naturally to its end.

9.13 **Paṭiloma Paṭicca Samuppāda – Key to Nibbāna**

March 15, 2019; revised January 10, 2021; December 23, 2022

January 10, 2021: Renamed from “Anuloma Paṭiloma Paṭicca Samuppāda – Key to Sotāpanna Stage” to “Paṭiloma Paṭicca Samuppāda – Key to Nibbāna”

Paṭiloma Paṭicca Samuppāda is the “reverse of the standard *Akusala-Mūla Paṭicca Samuppāda* process. That means it is the way to *Nibbāna*.”

Introduction

1. Just before his Enlightenment, the Buddha figured out how beings are born endlessly due to their own way of thinking. That knowledge is embedded in *Paṭicca Samuppāda*, translated as, “Dependent Origination.”

- It describes the origins of different types of living beings, according to their thought processes (*saṅkhāra*) based on the level of *avijjā* (ignorance of the fundamental nature).
- *Anuloma Paṭicca Samuppāda* describes the forward progression of events leading to eventual suffering. *Paṭiloma Paṭicca Samuppāda* describes the backward progression to see that indeed *avijjā* must be removed (by cultivating wisdom or *paññā*) to stop future suffering from arising.

Anuloma Paṭicca Samuppāda and *Paṭiloma Paṭicca Samuppāda*

2. “[WebLink: suttacentral: *Paṭhama Bodhi Sutta* \(Udāna 1.1\)](#)” and “[WebLink: suttacentral: *Dutiya Bodhi Sutta* \(Udāna 1.2\)](#)” state how the Buddha comprehended *anuloma* and *paṭiloma Paṭicca Samuppāda* during the night of the Enlightenment.

- Most people are familiar with how suffering originates with the *saṅkhāra* generation due to the ignorance of the Four Noble Truths (*avijjā*), and then go through the familiar steps: “*avijjāpaccayā saṅkhārā, saṅkhārapaccayā viññāṇam, ..and ends with “.. Evametassa kevalassa dukkhakkhandhassa samudayo hotī”ti* OR “the whole mass of suffering.”

Paṭiloma Paṭicca Samuppāda

3. It is also important to trace the steps backwards and see how future suffering can be stopped by cultivating *paññā*: “*avijjānirodhā saṅkhāranirodho, saṅkhāranirodhā viññāṇanirodho, viññāṇanirodhā nāmarūpanirodho, nāmarūpanirodhā saḷāyatanirodho, saḷāyatanirodhā phassanirodho, phassanirodhā vedanānirodho, vedanānirodhā taṇhānirodho, taṇhānirodhā upādānanirodho, upādānanirodhā bhavanirodho, bhavanirodhā jātinirodho, jātinirodhā jarāmaraṇaṃ sokaparidevadukkhadomanassupāyāsā nirujjhanti. Evametassa kevalassa dukkhakkhandhassa nirodho hotī”ti.*”

- By stopping *jāti*, it is possible to **stop suffering from arising** (at the end). Now we go backward: *Jāti* (births) stopped by stopping *bhava*, which is stopped by stopping *upādāna*, *taṇhā*, *vedanā*, *phassa*, *saḷāyatana*, *nāmarūpa*, *viññāṇa*, and *saṅkhāra*. When one gets to the first step: *saṅkhāra* cannot be stopped from arising without eliminating *avijjā* (and thus getting rid of ALL *gati*).
- If one contemplates this process, one can get some profound insights.

Nirodha Means “Stop From Arising” – Not Destruction of an Existing Entity

4. It is clear that to stop “the whole mass of suffering”, one MUST stop each of those ten factors (*jāti*, *bhava*, *upādāna*, *taṇhā*, *vedanā*, *phassa*, *saḷāyatana*, *nāmarūpa*, *viññāṇa*, and *saṅkhāra*) from arising.

- Thus one can see that *nirodha* means “stop from arising.”
- One can also see that can be done ONLY by removing *avijjā*, which is the same as cultivating *paññā*.
- The removal of *avijjā* (and cultivation of *paññā*) is done by following the Eightfold path, which has two components; see, for example, “[What is Unique in Buddha Dhamma?](#).” There are no shortcuts!

5. We concluded in #4 above that to stop future suffering from arising we must stop those ten terms from arising. This appears not to make sense with some of those terms when we try to reconcile that with the fact that an *Arahant* has stopped those from arising.

- In particular, one could object that *vedanā*, *phassa*, *viññāṇa*, and *saṅkhāra* still arise in a LIVING *Arahant*.
- As I have explained in many posts scattered throughout the website (especially in the “[Paṭicca Samuppāda](#)” section), those terms are in the “*uddesa*” version. This is explained in detail in the post, “[Sutta Interpretation – Uddesa, Niddesa, Patiniddesa.](#)”
- Let us briefly discuss a few of those terms.

Need for Detailed Explanations

6. Basically all current English translations just provide word-by-word translations of that “*uddesa* version” without any explanation. For example, the English translation of the first sutta in #1 above states, “..because of **consciousness**: mind and body, because of mind and body: the six sense spheres, because of the **six sense spheres**: contact, because of **contact**: feeling, because of **feeling**... because of **continuation**: birth, because of **birth**: old age, death, grief, lamentation, pain, sorrow, and despair all arise, and so there is an origination of this whole mass of suffering.”; see, “[WebLink: suttacentral: The First Discourse about the Awakening Tree \(UD 1.1\).](#)”

- According to the second *sutta*, all those terms (consciousness, six senses, contact, feeling) should not arise in an *Arahant*!
- Furthermore, it is not clear what is meant by “continuation” (for *bhava*), which leads to *jāti* (births), and thus “this whole mass of suffering.”

Detailed Explanations of Terms in Paṭicca Samuppāda

7. For example, the step, “*avijjā paccayā saṅkhāra*” really should be “*avijjā paccayā abhisāṅkhāra*.”

- As is explained in the post, “[Saṅkhāra – What It Really Means](#),” an *Arahant* generates *saṅkhāra*, but NOT *abhisāṅkhāra*.
- It is such *abhisāṅkhāra* that leads to future births and thus future suffering!

8. The next step is written in *suttā* as “*saṅkhāra paccayā viññāṇa*” and that is the *uddesa* version.

- It needs to be explained as “*abhisāṅkhāra paccayā viññāṇa*,” where *viññāṇa* means “defiled consciousness.”
- An *Arahant* would have “purified *viññāṇa*” and NOT “defiled *viññāṇa*.” This is explained in “[Viññāṇa Aggregate](#).”

9. Another confusing step could be “*nāmarūpa paccayā saḷāyatana*,” where “*saḷāyatana*” or “*six āyatana*” are typically translated as “six sense faculties.” Of course, a living *Arahant* has perfectly good sense faculties (*indriya*).

- Those six *indriya* (or sense faculties) become *saḷāyatana* when one acts with *avijjā* and uses them to accumulate “*saṇ*”; see, “[Nāmarūpa paccayā Saḷāyatana](#).”

10. In the next step of “*saḷāyatana paccayā phassa*,” it is really “*saḷāyatana paccayā samphassa*.” When those *indriya* are used as *āyatana*, one “makes contact with a defiled mind,” and that defiled contact is “*samphassa*” (“*saṇ*” + “*phassa*”).

- This is discussed in, “[Difference between Phassa and Samphassa](#).”
- Therefore, an *Arahant* would have only “*phassa*” and NOT “*samphassa*.”

11. Now, when those sensory inputs are evaluated with a defiled mind, one generates “mind-made *vedanā*” or “*samphassa ja vedanā*.” These are greedy, angry, and jealous, types of *vedanā* generated due to the defilements in mind.

- Such “defiled and mind-made *vedanā*” is absent in an *Arahant*. An *Arahant* will, however, generate *vedanā* due to the contacts with the six *indriya*.
- For example, if someone hits an *Arahant*, he/she will feel pain. Spoiled milk would taste bitter and a piece of cake would taste sweet, etc. But an *Arahant* would not generate angry thoughts about someone offering spoiled milk and would not generate cravings for the cake.
- This is explained in detail in the post, “[Vedanā \(Feelings\) Arise in Two Ways](#).”

12. The subsequent confusion is at the step, “*bhava paccayā jāti*,” which is translated in #5 as, “because of continuation: birth.” I am not sure what is meant by “continuation” there.

- The correct interpretation is given in “[Bhava and Jāti – States of Existence and Births Therein](#).”

Stopping *Abhisāṅkhāra* Is the Key to *Nibbāna*

13. If one can spend some time reading those posts and the links given in them, one should be able to get a good idea of how different types of *jāti* originate via *abhisāṅkhāra* (one’s thoughts).

- The Sotāpanna stage of *Nibbāna* is attained by getting rid of the wrong way of looking at one’s body (and actions) are due to an unchanging “soul.”
- However, one’s *bhava* and *jāti* arise due to one’s own *abhisāṅkhāra*. We are humans in this life because of good *abhisāṅkhāra* cultivated in a previous life.
- If we do evil (or *apuñña*) *abhisāṅkhāra* in this life, we may be born as animals or worse. If we do good (or *puñña*) *abhisāṅkhāra* in this life, we may be born as *devas*, *Brahmā*, or humans again.

No Birth Among the 31 Realms Will Stop Suffering

14. However, no birth in the 31 realms can bring a permanent state of happiness. Any *Deva* or *Brahma* existence will end, and one could be subsequently born in the *apāyā*.

- A permanent state of happiness (which means the absence of ANY suffering) is attained by stopping this never-ending rebirth process. **That is the key message of the Buddha.**
- When one truly understands that, one has the “vision” of a *Sotāpanna*, i.e., one would have gotten rid of *sakkāya diṭṭhi* (and *vicikicchā* and *sīlabbata parāmāsa* all at the same time).

Further Information

15. More details can be found in the “[Paṭicca Samuppāda](#)” section. The “[Living Dhamma](#)” section attempts to provide a systematic approach to learning and practicing Buddha Dhamma (of course, with more details in other sections).

- A systematic approach to Buddha Dhamma at “[Buddha Dhamma – A Scientific Approach](#),” which continues in “[Understanding the Terms in Paṭicca Samuppāda](#).”

Paṭṭhāna Dhamma – Connection to Cause and Effect (Hetu Phala)

What Does “Paccaya” Mean in Paticca Samuppāda? Moved out of **Paṭṭhāna Dhammā** to one level up after **How Are Paṭicca Samuppāda Cycle Initiated?**

Anantara and Samanantara Paccaya

Asevana and Annamanna Paccaya

9.14.1 Paṭṭhāna Dhammā – Connection to Cause and Effect (Hetu Phala)

October 22, 2016; revised October 25, 2016; June 15, 2018; April 11, 2021; June 28, 2022

1. *Paṭṭhāna dhammā* is also cited as *pattāna dhammā* in English.

- The word “*Paṭṭhāna*” comes from “*Paṭṭha*” + “*āna*.” I have previously mentioned that “*āna*” means “bringing in” as in “*ānāpāna*” in *Ānāpānasati Bhāvanā*. “*Paṭṭha*” in Pāli or Sinhala means the layer of a tree trunk underneath the outermost layer of bark — *consisting of phloem cells* — which carry food between roots and leaves.
- So, the word “*paṭṭhāna*” here conveys the idea that while the roots (*mūlika hetu*) are critical for the tree’s survival, “*paṭṭha*” also plays an important role in the tree’s growth. In the case of *Paṭṭhāna Dhamma*, they play an important role in describing the conditions under which *hetu* or causes can bring in effects, as we will see below.
- By the way, “*paṭṭha*” are essential for the tree’s survival, just as the roots of the tree are. One could kill a tree simply by a process called “girdling” where those phloem cells are removed; see the Wikipedia article: “[WebLink: WIKI: Girdling](#).”
- The Buddha frequently used analogies with the workings of a tree. We also need to remember that “*mūla*” is a root in Pāli or Sinhala, so “*mūlika hetu*” means “root causes.” So, the tree’s survival depends on its roots and its “*Paṭṭha*” containing those critical phloem cells.
- This is the same as saying *Paṭṭhāna Dhamma* describes CONDITIONS are as important as ROOT CAUSES, which are *lobha*, *dosa*, and, *moha* (for *akusala kamma*), and *alobha*, *adosa*, and *amoha* (for *kusala kamma*).

2. It is also to be noted that “*paṭṭhāna*” in “*Satipaṭṭhāna*” can be interpreted to mean “providing food” or “*paṭṭha*” + “*āna*” to cultivate *sati* or mindfulness.

- The word “*Paṭṭhāna Dhamma*” has not been discussed that much in English. Therefore, it is good to get started the right way. Buddhaghosa did not discuss it because he did not comprehend *Paṭicca Samuppāda*, and as a result even many people who follow even Theravāda Buddhism are not familiar with *Paṭṭhāna dhamma*. Ven. Ledi Sayadaw in Burma and Ven. Rerukane Chandawimala in Sri Lanka are clear exceptions. They have discussed *Paṭṭhāna Dhammā*; see the references below.
- However, their interpretations of *Tilakkhaṇa* (*anicca*, *dukkha*, *anatta*) are not correct.

3. In the **workings of living things (including plants) — and in mental processes in particular** — the mechanism of how causes lead to effects is much more complex compared to material phenomena involving inert objects.

- In these cases, many conditions need to be satisfied, in addition to having sufficient causes.
- In many cases, such critical conditions are not satisfied even if the causes are there, so there is normally a TIME DELAY between causes and effects, i.e., between *kamma* and *kamma vipāka*.

- This is why it is hard for people to see the validity of cause and effect (*hetu phala*) involving living things, especially the mind.
- This is what is explained in *Paṭicca Samuppāda*, with the help of *Paṭṭhāna Dhammā*. There are 24 conditions or *paccayā* discussed in the “*Paṭṭhānapakaraṇa*” in the *Abhidhamma Piṭaka*: “[WebLink: suttacentral: 1.1. Nikkhepavāra](#).” Of course, the English translation is likely to have many errors, but one can get the basic idea.
- Let us discuss some examples to understand the role of a few of such conditions or *paccayā*.

4. All necessary causes to bring about a tree are embedded in a seed. A seed is a CAUSE for the subsequent appearance of a tree. **Yet, a seed cannot germinate unless suitable conditions are present.** If one keeps a seed in a cool, dry place, it will just sit there for even thousands of years without giving rise to a tree.

- However, if one plants the seed in the ground where sunlight is available and provides water and nutrients, it will germinate and grow to be a tree.
- The root condition to bring into existence a tree is embedded in a seed. That is in the *anantara paccaya*. But suitable conditions for that seed to germinate are in fertile soil with adequate sunlight and water; this is called *samanantara paccaya*. Therefore, both *anantara* AND *samanantara paccaya* MUST be satisfied to bring a tree into existence; see “[Anantara and Samanantara Paccaya](#)” for details.
- So, AT WHAT TIME the seed will germinate will depend on when the *samanantara* condition (fertile soil) will be satisfied. *Anantara* condition (presence of a seed) is not enough.

5. Another important condition of *paccayā* comes into play for the germinated seed to grow into a tree: The *āhāra paccayā* (food condition) must be satisfied. If water, sunlight, and nutrients are not available after the seed is germinated, it cannot grow to be a tree.

- An essential type of *āhāra* is the “food for *viññāṇa*.” When one has bad thoughts about another person, that *viññāṇa* grows as long as one keeps thinking about that person and how bad he/she is. *Viññāṇa āhāra* are *mano sañcetanā*.

6. Another example of such a condition or *paccayā* is “*āsevana paccayā*.” *Āsevana* means to “associate with.”

- An important example is an association with bad friends. Whether it is a child or an adult, one's behavior will be influenced by who one associates with; see, “[The Law of Attraction, Habits, Character \(Gati\), and Cravings \(Āsavas\)](#).”
- I have discussed several such important conditions or *paccayā* in the post, “[Micchā Ditthi – Connection to Hethu Phala \(Cause and Effect\)](#).” Here is that discourse:

[WebLink: Audio Desana: Episode 6 - Micchā Ditthi Connection to Hetu Phala Cause and Effect](#)

There are 24 such conditions in *Paṭṭhāna Dhammā*. I will discuss them in detail in this subsection on “[Paṭṭhāna Dhammā](#)” in a series of posts.

- This is why mental phenomena are so complex. In many cases, several such conditions need to be satisfied for a cause (*hetu*) to lead to a corresponding effect (*phala*).

7. In the same way, the *kammic* energies created by our actions do not disappear. A given action creates a *kamma* seed with energy to bring in its fruits. It is just like a seed waiting for the right conditions to germinate and bring a tree into existence.

- Those *kamma* seeds or *kamma bīja* are out there waiting for suitable conditions to bring in their effect.
- Whether they will bring *vipāka*, AND at what strength, AND when, will depend on the conditions or *paccayā*. This is what is described by *Paṭicca Samuppāda* with the help of *Paṭṭhāna Dhammā*.

- See, “[What Does “Paccaya” Mean in Paticca Samuppāda?](#)”, “[Saṅkhāra, Kamma, Kamma Bīja, Kamma Vipāka](#)” and “[Nāmagotta, Bhava, Kamma Bīja, and Mano Loka \(Mind Plane\)](#)” for more details.

8. But there are some strong *kamma* that WILL bring in *vipāka* without exceptions. Those include *ānantariya pāpa kamma*. They are so strong that they do not require conditions to be just right. They bring *vipāka* mostly at the dying moment, i.e., death of the physical body, and will not be delayed until the *cuti-paṭisandhi* moment. Hence, the delay is only until death.

- Some people inherit wealth unexpectedly and some people die of accidents. These are also strong *kamma vipāka*, though as not strong as *ānantariya pāpa kamma*.
- But in most cases, conditions or *paccayā* play major roles, sometimes many conditions need to be satisfied for *vipāka* to bear fruit.

9. This knowledge — or rather this understanding of — how *kamma* and *kamma vipāka* work — is called *kammassakata sammā diṭṭhi*, and is a REQUIREMENT to attain **mundane sammā samādhi**. When one fully understands this, it will be easier to see that the rebirth process has a logical foundation.

- This is because one can now clearly see that most of *kamma* or one’s actions are going to have corresponding *vipāka* or results when suitable CONDITIONS appear.
- So, if one does actions suitable to be born in the *apāyā*, one COULD BE born in the *apāyā*, until one REMOVES the ability to for such CONDITIONS to appear.
- When one attains the *Sotāpanna* stage, one will never realize the conditions suitable for a birth in the *apāyā*. This requires another step BEYOND *kammassakata sammā diṭṭhi*, which is the comprehension of *Tilakkhaṇa*.
- Therefore, getting to the *Sotāpanna* stage is a two-step process: first to get to *kammassakata sammā diṭṭhi* and then the comprehension of *Tilakkhaṇa*.
- This is discussed in detail in the *desanā* in #6 above.

10. We see people doing immoral things without them being subjected to corresponding punishments, but that does not mean they are getting away with it. Those actions can bring their fruits in future lives if they are not realized in this life.

- There are two ways to overcome *kamma vipāka*. The first is: those *kamma* seeds will lose their energy with time; they can last at most 91 eons. They are like regular seeds, which lose their power over time.
- The other way is to attain all four stages of *Nibbāna*. That will remove the possibility of making conditions for ANY *kamma* seed to germinate.

11. These conditions or *paccayā* play a critical role in *Paṭicca Samuppāda*. When we say “*avijjā paccayā saṅkhāra*,” it means, “we do *saṅkhāra* with ignorance when necessary CONDITIONS are present.”

- For example, we do not do immoral acts or *apuññābhi saṅkhāra* all the time. When we are attracted to, or repulsed by something that we see (this is an example of *ārammaṇa paccaya*), we may generate craving or dislike, and then it can lead to an immoral action or *apuññābhi saṅkhāra*; see, “[What Does “Paccaya” Mean in Paticca Samuppāda?](#).”
- This is the reason why *kamma* itself is not deterministic. Just because one has *avijjā* does not mean one will necessarily do an immoral thing, generating (*apuññābhi*) *saṅkhāra*. If we cultivate *Satipaṭṭhāna*, even if we get the urge to do something immoral, we can contemplate the bad consequences and stop that action, speech, or thoughts.
- When one keeps doing *Satipaṭṭhāna* — and keeps avoiding immoral acts — one’s *gati* will change for the better, **and then even the automatic urge to do something immoral will gradually fade**. In other words, one’s *avijjā* will reduce. This is why *Satipaṭṭhāna* is so important.

9.14.2 Anantara and Samanantara Paccayā

Revised February 12, 2020; August 7, 2022

Critical Roles of Causes (*Hetu*) and Conditions (*Paccayā*)

1. An action or a deed is a *kamma*. That *kamma* was done with an intention and led to creating *kammic* energy that COULD bring *vipāka* in the future. Such *kammic* energies act as causes to bring *vipāka*. But such *vipāka* is not guaranteed.
 - There must be suitable conditions (*paccayā*) that must be there for such *vipāka* to materialize.
2. The easiest way is to consider the following example: A seed contains the necessary ingredients (causes) for bringing up a new tree. But just because a seed is there, a tree will not come into existence. If the seed is in a cool, dry place, one could keep it that way for a long time. Or one could burn or crush it, and it will never bring up a tree.
 - SUITABLE CONDITIONS must be present for causes to bring about corresponding effects. That is what *paccayā* means.
 - If a seed is planted in fertile soil and water and sunlight are provided, it will germinate and give rise to a tree.
 - When such suitable conditions are present, causes WILL bring about corresponding effects. Thus when an event takes place under the right conditions, it is called "*paccuppanna*," i.e., born ("*uppanna*") via suitable conditions ("*paccayā*."). Of course, root causes must be there, to begin with.

All *Kamma* Do Not Lead to *Vipāka*

3. That is the reason why *kamma vipāka* is not deterministic. In the post, "[What is Kamma? – Is Everything Determined by Kamma?](#)" I mentioned it, and here we will discuss it in detail.
 - When we commit a good or an evil deed, the *kammic* potential or energy associated with that deed remains as a *kamma bīja* or a *kamma* seed. We will eventually get to the question of "where it is stored," but we just need to remember that a *kamma* seed is not a physical seed but energy or potential. This concept is described in the post, "[Saṅkhāra, Kamma, Kamma Bīja, Kamma Vipāka](#)."
 - The germination of a *kamma* seed, though, has some similarities to the germination of a physical seed, for example, an apple seed. The apple seed has the potential to bring about an apple tree. Still, the seed will not germinate until suitable conditions for germination are present. The seed needs to be in the soil, and water and sunlight must be provided for germination.
 - In the same way, *kamma vipāka* (the result of a past *kamma*) can come to fruition only with the conditions for the corresponding *kamma* seed to germinate.

Anantara and Samanantara Relations

4. Let us look at the *anantara* and *samanantara* relations as discussed in the *Paṭṭhāna Dhamma* (book on "Conditional Relations" in *Abhidhamma*): [*anantara* : [adj.] next; adjoining; immediately following. *samanantara* : [adj.] immediate; nearest.]

- “*An*” means food or in this case the *kamma* seed; “*antara*” means storage, waiting to bear fruit. Thus, *anantara* (“*an*” + “*antara*”) means basically a *kamma* seed waiting to germinate. [*antara* : [nt.] difference. [adj.] inner; inter. *anto* : [ind.] inside; within; inner.]
- “*Sama*” means equal or similar. Thus *samanantara* (“*sama*” + “*anantara*”) means “matching conditions” with the *antara*.
- Therefore, for a *kamma vipāka* to materialize, both *anantara* and *samanantara* must be there.
- By the way, *ānantara* with a long “*ā*” (as in *ānantariya kamma*) means something entirely different; see, “[Ānantariya Kamma – Connection to Gandhabba](#).”

Some Analogies/Examples

5. Here is one analogy the Buddha gave. If one prepares a plot by preparing the soil, providing water, and if sunlight is also available, the *samanantara* for a seed to germinate is there. However, unless one starts with an apple seed (i.e., if *anantara* is not there), an apple tree cannot grow.

- On the other hand, if one keeps the apple seed in a cool, dry place, it will not germinate since the *samanantara* condition is not met.
- Results appear when both *anantara* and *samanantara* conditions are met. Thus, when one plants an apple seed in a suitable plot, it will germinate and become an apple tree.
- Furthermore, a mango tree will not result from an apple seed. Thus *samanantara* will give rise to a result matching the “seed” in the *anantara*.

6. More examples can be given these days that are related to modern technology. If a radio station is broadcasting a radio program, that is the *anantara*. The seed energy is available anywhere within a specific range. But one cannot listen to the program without a radio. Even if someone has a radio, one cannot listen to the broadcast unless the receiver is tuned to the correct frequency. When those conditions are met, one could hear the program.

- *Kamma vipāka* can bring results via “instant communication” when the conditions become right. All kammic potentials are in “instant contact” with us via a concept similar to that described in quantum entanglement: see, “[Quantum Entanglement – We Are All Connected](#).” **Thus all potential kamma seeds are waiting in *anantara* and can bring about instant results when the right conditions (*samanantara*) appear.**

Many Bad *Vipāka* Can be Avoided by Being Mindful

7. **By being mindful, we can avoid many past bad *kamma* seeds from coming to fruition.** We make sure that *samanantara* conditions are not present. If one goes out at night in a bad neighborhood that provides fertile ground for a past bad *kamma* seed to germinate and the *kamma vipāka* to take place.

- In the same way, we can force “good” *kamma* seeds to germinate by providing the right conditions. For example, even if we have enough merits (i.e., a good *kamma* seed) that could make us pass a test or get a job, unless we make the right conditions (i.e., prepare in advance), we may not get the results.
- But sometimes, one gets an unexpected promotion or better results than anticipated in a test if the *kamma* seeds are potent.

8. From our past innumerable lives, we have accumulated countless *kamma* seeds, both good and bad. Some of the stronger ones bear fruit no matter what we do, especially the *ānantariya kamma vipāka*.

- But in general, by being mindful (i.e., by NOT providing appropriate conditions), we can avoid many bad *kamma vipāka*. By making the right preparations (i.e., by optimizing *samanantara* conditions), we can exploit those good *kamma* seeds.

- A particularly important case is bringing up a child. The parents and teachers have considerable responsibility for providing the right conditions for that young mind to develop. In particular, association with bad friends can direct a young life in the wrong direction; in the same way, association with good friends and a nurturing environment can bring about a productive, responsible adult.

Importance of Cultivating Good *Gati* (Habits/Character)

9. One important cross-connection is matching “*gati*” with similar “*gati*” that we have discussed before; see “[Habits and Goals](#)” and “[Sansāric Habits and Āsavas](#).”

- For example, when a *gandhabba* is waiting for a suitable womb, the *anantara-samanantara paccayā* comes into play. A *gandhabba*, who in previous lives had developed a particular habit, say heavy drinking, is attracted to a womb of a woman with similar habits, possibly an alcoholic or a drug user. The concept of a *gandhabba* is in, “[Manomaya Kāya \(Gandhabba\) and the Physical Body](#),” and “[Manomaya Kāya and Out-of-Body Experience \(OBE\)](#).”
- Similarly, a *gandhabba*, who in previous lives led moral lives, is bound to be attracted to a mother’s womb in a “good” family. Like in the above case, the *samanantara* for the *gandhabba* (where it can establish itself) is an environment that matches its own “*gati*.”
- However, no matter how one is born, one can still change one’s destiny by making conditions for other good *kamma vipāka* to come to fruition and by making sure not to create conditions for bad *kamma vipāka* to come to fruition.

In other posts, we will discuss further applications of *anantara-samanantara* relations. One important discussed in “[Transfer of Merits \(Pattidana\)- How does it Happen?](#).”

Next in the series, “[Āsevana and Aññamañña Paccayā](#).”

9.14.3 Āsevana and Aññamañña Paccayā

November 20, 2016; revised July 1, 2019 (comment added at the end); March 4, 2021; September 9, 2022; March 28, 2023

Introduction

1. As mentioned in the “[Paṭṭhāna Dhamma – Connection to Cause and Effect \(Hetu Phala\)](#),” there are 24 *paccayā* or conditions that contribute to various steps in the *Paṭicca Samuppāda* (PS) cycles.

- As discussed in the post “[What Does “Paccayā” Mean in Paticca Samuppāda?](#),” and in the post mentioned above, a given step in a PS cycle **cannot proceed** until one or more conditions are satisfied. **And we have control over most of these conditions.** Therein lies *Paṭṭhāna Dhamma*’s value; **we can see how to stop *Akusala-Mūla* PS cycles from proceeding and maintain *Kusala-Mūla* PS cycles.**
- This post will discuss two of those 24 *paccayā* or conditions. They are somewhat related to each other and thus are suitable to discuss.

Āsevana Paccayā

2. *Āsevana paccayā* — which can be loosely translated as the “condition of association” — is an important condition that fuels various PS steps at different times.

- In most cases, *āsevana paccayā* has been translated as a “condition of repetition.” Even though repetition is relevant, repetition comes via close associations, so the association is primary.
- The word “*āsevana*” comes from “*ā*” and “*sevana*” or “came to the shade”; when one is staying close to a tree in the hot sun, one is “hanging around” the tree and is benefited from its cool shade.

- Of course, as we will see below, one can be influenced in the wrong direction when associating with bad friends. Therefore, *āsevana paccayā* comes into play in both *Kusala-Mūla* and *Akusala-Mūla* PS.
- When one likes the experience, one tends to keep that association. Sometimes, that eventually leads to harmful consequences, but one still tends to keep bad associations because of the ignorance of such bad outcomes.

3. An important role of *āsevana paccayā* is played in the “*viññāṇa paccayā nāmarūpa*” step in PS, whether it is *Kusala-Mūla* PS or *Akusala-Mūla* PS.

- For example, a teenager who is (unknowingly) cultivating a *viññāṇa* for drinking is heavily influenced by the association with bad friends. He likes to “hang out” with such bad friends and tends to generate a lot of *saṅkappa* or *vacī saṅkhāra* (conscious thinking about how he/she will be having a good time with those friends at parties with a lot of alcohol). The *nāmarūpa* generated in his mind are such “party scenes,” visualizing those friends and various favorite drinks.
- On the other hand, when one is on the right path, one constantly thinks about Dhamma Concepts, has Dhamma discussions with good friends, and visualizes such gatherings. Or one could be visualizing some meritorious deeds, like giving or helping out at an orphanage; these are good *nāmarūpa* generated with such a good *viññāṇa*.
- These *nāmarūpa* are different from the *nāmarūpa* that descends to a womb at the *okkanti* moment, i.e., when a *gandhabba* enters a womb. We will discuss that later. **So, *nāmarūpa* comes in two main categories.**

Āsevana Paccayā – Examples

4. *Āsevana paccayā* can play a role in different types of situations. Let us consider two such examples.

- One such situation is the teenager mentioned above, who cultivates bad *nāmarūpa* by associating with bad friends. The more he/she associates with such bad friends, the more he/she will generate bad *nāmarūpa* of party scenes with a lot of alcohol and/or drugs. Also, there will be other associated *nāmarūpa*: He/she will constantly be visualizing favorite friends, gathering places, appropriate music, etc.
- In such an environment, it is also easy to cultivate other types of “bad *nāmarūpa*” such as gambling, illicit sex, stealing (to sustain those activities), violence, and even killings.
- The teenager could cultivate such *nāmarūpa* and more over time.

5. On the other hand, when one is on either mundane or *lokuttara* Eightfold Path, one will be cultivating “good *viññāṇa*,” and one tends to visualize exactly opposite types of *nāmarūpa*.

- One could be planning a Dhamma discussion and thinking and visualizing who will be there and what topics will be discussed. One could be organizing a charity event and making arrangements.
- One could be plan to attend a meditation retreat and visualize what activities one may engage in. One could even be thinking about and trying to visualize the suffering endured by poor children in a situation one is familiar with and generating compassion-filled thoughts and *nāmarūpa*.

6. In either case, the “*nāmarūpa paccayā saḷāyatana*” step will then point one’s all six *āyatana* or *saḷāyatana* (five physical senses and the mind) towards such thoughts, visuals, and actions.

- Then those associations will become even stronger. When one gets absorbed in relevant activities, when one’s mind is occupied with such thoughts and constantly visualizes related activities, people, and objects, those *nāmarūpa* will “grow” in one’s mind. Those *nāmarūpa* will be closely associated with one’s *gati*.
- This is also discussed in the post: [“The Law of Attraction, Habits, Character \(Gati\), and Cravings \(Āsava\).”](#)

Āsevana Paccayā – In a Citta Vīthi

7. Another critical application of the *āsevana paccayā* occurs in a *citta vīthi*. When we are generating *saṅkappa* (or *sankalapanā*), we are generating an enormous number of *citta vīthi* in a short time. Each *citta vīthi* will make the next *citta vīthi* stronger (actually make the *javana citta* in the subsequent *citta vīthi* stronger) by association.

- The best example is one we have discussed several times in the “[Living Dhamma](#)” section. When we start thinking about an enemy, we start visualizing more and more bad situations that we encountered with that person; we tend to pull out all “past associations” from memory and conjure up “many possible future scenarios” in our minds.
- All these “bad *saṅkappa*” or “conscious bad thoughts” will strengthen the PS steps.
- Our minds can run wild if not controlled with *Satipaṭṭhāna* or *Ānāpāna*; see, “[Satipaṭṭhāna Sutta – Relevance to Suffering in This Life](#).”

8. Even in a given *citta vīthi*, each *javana citta* is strengthened by the previous *javana citta* via *āsevana paccayā*. This happens in the time scale of a billionth of a second and is driven by our *gati*.

- The first *javana citta* is weak. But the second *javana citta* gets fuel from the first one and is inevitably generating strength via association. One meaning of the name *javana* is “to run with.” The series of 7 *javanās* “run with the object in mind,” initially getting stronger until the fifth *javana*. Then the fuel runs out, and the sixth and seventh *javana* become weaker and weaker.
- *Kamma* generated by the first *javana citta* can only bring *vipāka* into this life. But *kamma* done by the second through the sixth *javana citta* (which get stronger by association) are potent enough to bring *kamma vipāka* in many future lives. The seventh *javana* is weak. Thus, it can bring *vipāka* only in the next life and become null if it does not bring *vipāka* in the next life.
- It is unnecessary to learn the complexities of *citta vīthi*, but it is good to have some idea.

9. The association then moves to the next *citta vīthi*. Thus the subsequent *citta vīthi* (and thus the *javana citta* in that *citta vīthi*) will be stronger. And thus, it propagates, which is why one can get “really worked up” even thinking about a hated person.

- This is why *Satipaṭṭhāna* (and being mindful of evil thoughts) is so important. The start of such a hateful mindset is AUTOMATIC (due to our *gati*), as discussed in the “[Living Dhamma](#)” section. But we can stop those initial thoughts BEFORE they get strong and become out of control if we are mindful.
- This can be compared to a seed giving rise to a mighty tree unless one destroys it when it is just a little bud. When a seed germinates and becomes visible as a little plant, that little bud can be easily broken. But if one waits and allows it to grow, it COULD grow into a strong tree that is hard to take down.

10. As we see, *Paṭṭhāna Dhamma* can go into finer details. This is why *Paṭicca Samuppāda* has been compared to an ocean. It is vast and can explain the arising of ANY *saṅkhata* (alive or inert) in this world.

- However, if we start digging deeper, that could become a waste of time since there is no ending regarding how much finer detail one wants to examine.
- Still, it is good to see the depth of Buddha Dhamma. It gives one confidence in following the Path. Unshakable faith comes from realizing that Buddha Dhamma describes our world as it is.

Aññamañña Paccayā

11. Now let us briefly discuss the *aññamañña paccayā*, usually translated as “mutuality condition.” This is not a bad translation but could also be translated as “forward and backward condition.”

- Many of the PS cycle’s steps go backward and forward. For example, the step we have discussed, “*viññāṇa paccayā nāmarūpa*,” runs backward (in the same PS cycle) too.

- Therefore, while *nāmarūpa* are generated AND get stronger by a given *viññāṇa*, the *viññāṇa* itself gets stronger by the cultivation of *nāmarūpa*, i.e., “*nāmarūpa paccayā viññāṇa*” step runs simultaneously too. This is “mutual strengthening.”
- In the example of the teenager, the cultivation of “bad” *nāmarūpa* (visuals of party scenes, bad friends, etc.) leads to the strengthening of that bad *viññāṇa* (desire to drink or take drugs), even though the bad *viññāṇa* first leads to the corresponding *nāmarūpa*.

12. The *aññamañña paccayā* — just like the *āsevana paccayā* — is highly effective in the first several steps in PS. While the “*avijjā paccayā saṅkhāra*” step initiates bad actions (or *saṅkhāra*), the continued actions in the same direction then lead to strengthening *avijjā* (or ignorance of the consequences of such actions), i.e., “*saṅkhāra paccayā avijjā*.”

- This is why it is essential to stop such conscious *saṅkhāra* (especially *saṅkappa* or the first part of *vacī saṅkhāra*) when one realizes that one is getting on the wrong track. Otherwise, one’s *avijjā* will grow, and one’s bad *gati* will only grow.
- Such immoral *saṅkhāra* — in the form of *vacī saṅkhāra* — appear to provide us with a sense of satisfaction at that time. For example, when one gets “really worked up” thinking about a bad deed done by an enemy, it gives one pleasure to say bad things about that person to others, or even retaliate directly to that person.

13. However, such actions lead to a “heat” or “*tāpa*” in us in the longer term. Long after that “initial satisfaction” of putting down that person, one will be “burning inside” for a long time, even if one does not realize that. One will be prone to frequent outbursts even with other people.

- Removal of this *tāpa* or “fire” in us is what is meant by the phrase “*ātāpi sampajano*” in the *Satipaṭṭhāna Sutta*. That will help reduce our tendency to get “worked up” at the slightest provocation, i.e., to change our *gati* in the right direction; see “[Satipaṭṭhāna Sutta – Structure](#).”
- This is the first type of suffering that many of us don’t even realize; see, “[Suffering in This Life – Role of Mental Impurities](#)” and other posts in “[Living Dhamma](#).”

14. Finally, the *aññamañña paccayā* is not operative starting at the “*saḷāyatana paccayā phassa*” step in the *Paṭicca Samuppāda*.

- We can see that “*phassa* cannot lead to *saḷāyatana*,” “*vedanā* cannot lead to *phassa*,” etc.

Āsevana and Asevana – Different meanings

July 1, 2019: Regarding #2 above, it is essential to note that *āsevana* differs from *asevana*.

- *Sevana* is association. *Āsevana* (*Ā* + *sevana*) is “came to associate with”(as discussed in #2 above).
- *Asevana* (*A* with a short A + *sevana*) is “not to associate with,” the negation; see #5 of “[Associations \(Sevana\) – A Root Cause of Wrong Views..](#)”

It is imperative to see the difference, which illustrates how Pāli words combine (*sandhi*) to produce other words with very different meanings. Thanks to Tobias Große for bringing this distinction to our attention at today’s discussion forum.

10.1 Citta – Basis of Our Experience and Actions

September 22, 2019; revised November 14, 2019; November 30, 2022

What we conventionally call a “thought” is the cumulative effect of billions of *citta*. A *citta* is the fundamental unit of cognition in Buddhism.

Introduction

1. We have been discussing the first few verses of the “[WebLink: suttacentral: Chachakka Sutta \(MN 148\)](#)” in the series on, “[Is There a “Self”?](#).” It is a good idea to take a break and look at what we have learned from a different point-of-view.

- The Buddha called himself a “*vibhajjavādi*.” That means he explained things in great detail by diving into and subdividing a given entity or concept to examine it at more fundamental levels.
- That is very much like what the scientists are doing today. They first explained the matter in terms of molecules and then atoms. Later, they found that an atom consists of a nucleus and electrons in orbitals around it. Then they probed the nucleus and discovered that more fundamental particles (with names like gluons and quarks) make up the nucleus.
- By probing deeper, physicists also came up with Quantum Mechanics. Matter and energy are “quantized” on a small scale. That means they come in “packets” or “quantā” (the singular is “quantum.”)
- More than 2500 years ago, the Buddha taught that matter and energy are quantized. The smallest “quantum” in Buddha Dhamma is a *suddhatthaka*. But that is not relevant to the present discussion.

Sensory Experience is Quantized – It comes in “Packets”

2. I am not going to discuss Quantum mechanics here. But I want to look at the “Chachakka Sutta (MN 148)” from a different point-of-view. That will break the tradition of providing boring translations of *suttā*, and I hope will also provide better insights into the material in the *sutta*. This discussion would be beneficial before we move to the next section of the *sutta*.

- As you will see below, scientists are just beginning to take mental phenomena seriously. They have made a bit of progress. But they are not even close to having a detailed analysis of mental phenomena that the Buddha did over 2500 years ago.
- Mental energy is also quantized, even though we may feel like thoughts are continuous. The smallest unit in Buddha Dhamma is a “*citta*.” A *citta* lasts less than a billionth of a second. **We cannot experience a single *citta*.** Even though it is conventionally translated as “a thought,” that is not correct.
- What we usually think of as a “thought” consists of billions of *cittā* (The plural of *citta* is *cittā*, but sometimes I tend to write that as *cittā* just because that is easier for most people.) By the way, *citta* is pronounced “chiththa.”

What is a Thought?

3. Let us first see the progress that science has made over the past 50 years. Science is still at a very early stage regarding the mind. But they have made some progress recently and we will show them to be entirely consistent with Buddha Dhamma. Those findings help explain more profound concepts in Buddha Dhamma.

- Only fifty years ago, scientists thought computers could “become conscious” by increasing processing speeds. Now there are computers that are much faster, but they do not have consciousness. We will discuss later why computers will never become conscious.
- The following is a presentation entitled, “What is a Thought?” by Henning Beck, a scientist studying brain phenomena.

[WebLink: youtube: What is a Thought? How the Brain Creates New Ideas | Henning Beck | TEDxHHL](#)

A Computer Does Not Have Perception (*Saññā*)

4. At 4:00 minutes, we see a “face” made up of fruits and vegetables. Even though it is not a natural human face, it takes us just a second to realize that it represents a face.

- But as Mr. Beck points out, a computer will never be able to recognize the representation of the human face depicted there.
- At 9:20 minutes he starts a discussion on the identification of a chair. Again, a computer has difficulty identifying “less obvious” structures that can serve as chairs.
- In both these instances, what the computer is missing is *saññā* (loosely translated to English as “perception”). Even animals can recognize objects relevant to their survival. A dog, for example, can instantly recognize its owners and any other pets living in the house. It can recognize foods that it likes, etc. See “[Saññā – What It Really Means.](#)”

Vedanā, Saññā, Joy, Sadness, etc. Cannot Arise in a Brain

5. Around 6:00 minutes, Mr. Beck starts talking about human thought. All he (and other scientists) know right now is that our thoughts rise very fast. But they do not explain how thoughts with feelings (*vedanā*), perception (*saññā*), joy, etc. can arise from a brain made of inert atoms and molecules.

- A brain is not that different from a computer because atoms and molecules are the building blocks of both. Both can process information. But a brain processes information in a very different way compared to a computer. It involves billions of neurons working as a team. Scientists are not even close to figuring out how the brain processes information.
- In the future, scientists may be able to figure out how those neurons can process information much faster than a computer with a thousand-times higher processing speeds.
- However, they will still NOT be able to figure out how a human or animal can recognize their surroundings AND generate emotions (happy, sad, etc.)
- Around 11:00 minutes, he discusses the difference between learning and understanding. That is an excellent point.

Vedanā, Saññā, Joy, Sadness, etc. Arise in the “Mental Body”

In a previous post, “[Contact Between Āyatana Leads to Vipāka Viññāna](#),” I mentioned that plants and trees have a basic form of *vedanā* and *saññā* (see #3,#4 there.) However, plants and trees CANNOT generate emotions like joy and sadness. A tree does not have a mind or a “mental body” created by kammic energy.

6. Similarly, a brain cannot generate a thought. How can feelings and emotions come from an entity made of inert atoms and molecules? The “mental body” of a living being is created by *kammic* energy.

- There has to be a LIVING BEING to generate a *citta*, the basic unit of consciousness. For a human being, the essence of that LIVING ENTITY is not the physical body, but the mental body.
- **That “mental body” is alternatively called a *manomaya kāya* or *gandhabba*.** It consists of a *hadaya vatthu* (seat of mind) and five *pasāda rūpa* located around it (for seeing, listening, smelling, tasting, and touching.) The mental body is not like the “physical body.” It is more like an “energy body” that gives life to the inert and dense physical body.
- A *manomaya kāya* may be visualized as an “energy field” within the physical body with the *hadaya vatthu* and five *pasāda rūpa* overlapping the region of the physical heart.

7. Our brains cannot identify objects. It cannot generate emotions like joy and sadness. As discussed in #4 above, animals without brains can identify things and generate feelings and emotions.

- It is the **mental body** (*manomaya kāya* or *gandhabba*) that generates emotions like joy and sadness as well as *vedanā*, *saññā*.
- More precisely, those mental phenomena arise in the *hadaya vatthu* (seat of mind) of the *gandhabba*.

8. The details are not critical, but the primary mechanism is essential to understand. A brain does not see, hear, smell, taste, or touch. The seat of the mind (*hadaya vatthu*) experiences all those. A *hadaya vatthu* can be created ONLY by *kammic* energy.

- That is why the human body is just a shell that supports the mental body (*manomaya kāya* or the *gandhabba*). At the death of the physical body, that *manomaya kāya* leaves the body instantly. When we touch a dead body, it is evident that there is no “life.”
- A living body is like a “live wire” with an electric current flowing through. One will get an “electrical shock” by touching it. But if there is no electric current, it is just a metal wire.
- In the same way, a *manomaya kāya* gives “life” to an inert physical body.

The *Manomaya Kāya* Changes from Existence to Existence

9. What happens to the *manomaya kāya* at the end of existence? To clarify, let us take the case of a *Brahma* dying and getting a human existence. That transition from a *Brahma* to a human happens at the moment of death of that *Brahma*. It is called the “*cuti-paṭisandhi*” moment (“*cuti*” means dying and “*paṭisandhi*” means getting a new existence.)

- That *Brahma* had a seat of the mind (*hadaya vatthu*) and two *pasāda rūpa* (for seeing and hearing). On the other hand, in the new existence, humans would have five *pasāda rūpa* (for seeing, listening, smelling, tasting, and touching). Furthermore, the *hadaya vatthu* of the human would be different from that of a *Brahma*.
- Therefore, the *manomaya kāya* of the new human existence differs from that of the *Brahma*.
- Suppose that at the end of that human existence, that human gets an animal existence. Then at that “*cuti-paṭisandhi*” moment, that new animal existence would have its own set of *hadaya vatthu* and five *pasāda rūpa*.

10. Those three existences are very different, even though it is the same “lifestream.” So, what can be taken as a “soul” or a “self”?

- That is why the Buddha said there is no “soul” or a “self” or a “*ātma*” going from one birth to another. In the above example, the same “lifestream” that started as a *Brahma* became a human, and then an animal. **What is the ESSENCE that defines a “soul” or a “self” or a “*ātma*”?**
- The details are in the post “[Chachakka Sutta – Six Types of Vipāka Viññāna](#).” First, let us look into the mechanism of *citta* generation.

A *Citta* Has *Vedanā*, *Saññā*, and Many Other “Built-In” Mental Factors

11. A *citta* is the fundamental unit of cognition, which we do not feel by itself. It comes in bunches of 12 or more *cittā*. Those “bunches” or series of *cittā* are *citta vīthi*. What we “feel” or “experience” is the cumulative effect of numerous such *citta vīthi*.

- Any *citta vīthi* that arises due to sensory input from one of the five physical senses has 17 *cittā*. It is a *pañcadvāra citta vīthi*.
- On the other hand, a *citta vīthi* arising directly in mind (due to *dhammā*) may have varying numbers of *cittā*, with a minimum of 12 *cittā*. That is a *manodvāra citta vīthi*.

12. What we usually call a “thought” is the cumulative effect of billions of such *citta vīthi* that arise PER SECOND.

- Each of those *cittā* has at least seven mental factors (*cetasikā*). Those universal *cetasikā* include *vedanā* and *saññā*. *Vedanā cetasika* makes one FEEL a sensory input. The *saññā cetasika* is the one that recognizes that sensory input.
- **Only a living being can generate that fundamental unit of cognition (*citta*) within a billionth of a second, with built-in seven or more *cetasikā*.**
- That is why a computer or a robot will NEVER become conscious. **Only Kammic energy can create a *manomaya kāya* with the seat of the mind (*hadaya vatthu*).**
- That is why there will NEVER be true Artificial Intelligence (AI)! There can only be sophisticated robots capable of, for example, autonomous driving.

Important Role of the Brain

13. Even though the brain cannot generate *citta*, it plays a critical role in getting the information about the sense object to the *hadaya vatthu*. More details at “[Brain – Interface between Mind and Body](#).” Let us briefly discuss the series of events following the capture of an image by our eyes.

- The retinas at the back of the eyes send the captured image to the visual cortex in the brain through the optical nerve. That part of the brain then analyzes the signal to a form the mind can understand. That information is sent to the *cakkhu pasāda rūpa* in the *manomaya kāya*. Then the *cakkhu pasāda rūpa* makes contact with *hadaya vatthu*, which vibrates 17 times due to that “impact.”
- Those 17 vibrations of the *hadaya vatthu* correspond to the generation of a *citta vīthi* with 17 *cittā*. That is the origin of a *cakkhudvāra citta vīthi*. It is not necessary to learn those details. But those interested can find details at “[Does any Object \(Rūpa\) Last only 17 Thought Moments?](#).”
- Sensory inputs coming through the other four physical senses (ears, nose, tongue, and the body) work the same way.

14. Remember that the sensory input comes to a *pasāda rūpa* in the mental body AFTER the brain processes the sensory signal. For example, when we see a tree, the image of the tree received by the eyes is processed by the brain first.

- Then the brain transmits that processed signal to the *cakkhu pasāda rūpa*, which in turn transfers it to the *hadaya vatthu*.
- It is the *hadaya vatthu* that “feels” or “experiences” that image and “sees” the tree.
- But even a sensory experience that we “feel” arises from a series of “sensory packets.” For example, when we see a tree, that image does not come in continuously. It comes in “packets” or “snapshots.”
- That is similar to how a video camera or a movie film works. We will discuss that in the post “[Vision Is a Series of “Snapshots” – Movie Analogy](#).”

10.2 Vipāka Vedanā and “Samphassa jā Vedanā” in a Sensory Event

September 29, 2019; revised November 15, 2019; August 28, 2022

We are discussing the “[Worldview of the Buddha](#).” It may be a good idea to print out the posts for referral while reading subsequent posts. It is CRITICAL to understand the material discussed so far to follow future posts.

All Our Activities Start With a Sensory Trigger

1. We know that we are alive because we are aware of the external world. We can see an object, hear a sound, smell an odor, taste food, and feel the touch of something or someone. Furthermore, we can recall past events (part of *dhammā*).

- All our sensory experiences start with a “trigger event” that comes through one of our six sense faculties. If we see, hear, smell, taste, or touch something that grabs our attention, we start thinking, speaking, and taking action on that particular sight, sound, odor, taste, and touch.
- Also, a thought about a past event or a planned event (*dhammā*) may come to our mind, and we could get started that way too.

2. We usually go through our daily chores based on what we do routinely. We get up in the morning and get ready for work (school) on a working day. Those “to do tasks” come to our minds automatically as *dhammā*.

- Such a “planned or routine day of work” could be disrupted by an unexpected event. One may get a phone call from the boss asking to go to a meeting at a different location. A child may come down with a fever, and a hospital visit may be required. Again, a sensory trigger is there.
- We may also set up an alarm to get up at a particular time. When the alarm goes off in the morning, we wake and recall having to get ready for a specific task.
- It is a good idea to think about what one goes through during the day. We can see that all activities start with “sensory triggers.”

A Sensory Trigger is an “*Ārammaṇa*”

3. Each activity starts with a “trigger,” a sensory event. **That is a “*ārammaṇa*” in Pāli.** We consciously and deliberately start looking at an object when we become interested in that object. Then it becomes a new “*ārammaṇa*.” That may prompt us to take further action.

- For example, short interaction with a person may trigger an interest in that person. Then that may lead to further contacts.
- We get exposed to many sensory inputs as we go through the day. But only specific sensory inputs catch our attention and make us think about them. A strong sensory input that gets our attention is a *ārammaṇa*.
- If X listens to the television in the background while eating, X focuses is on the meal. However, if X hears on the TV that a terrorist attack just took place in a major city, X’s attention would focus on that news story. X may stop eating and go and watch the television to get more information. That is a new *ārammaṇa*.

4. There is always an “*ārammaṇa*” to initiate an action, and **there are only six types of *ārammaṇa*** per “Chachakka Sutta (MN 148).” *Cakkhuñca paṭicca rūpe ca uppajjati cakkhaviññāṇaṃ, sotañca paṭicca sadde ca uppajjati sotaviññāṇaṃ, ghāṇañca paṭicca gandhe ca uppajjati ghānaviññāṇaṃ, jivhāñca paṭicca rase ca uppajjati jivhaviññāṇaṃ, kāyañca paṭicca phoṭṭhabbe ca uppajjati kāyaviññāṇaṃ, manañca paṭicca dhamme ca uppajjati manoviññāṇaṃ.*”

- For example, the second on the list says that “ear-consciousness (*sota viññāṇa*) happens when ears (more precisely *sota pasāda*) come to contact with a sound (*sadda*).” In the above example, X heard about a terrorist attack.
- That sensory event could then start a whole series of new actions. In the example of #3 above, X stopped eating and went to the television to watch it.
- You should think about this basic idea of how a sensory event (seeing, hearing, etc. leads to a whole set of actions during a given day. This idea was first introduced in the post, “[Contact Between Āyatana Leads to Vipāka Viññāṇa](#).”

Two Different Meanings of *Paṭicca*

5. We translated the verse, “*cakkhuṇca paṭicca rūpe ca uppajjati cakkhuvīññāṇam*” as “..*cakkhu viññāṇa* arises when a *rūpa* makes contact (*paṭicca*) with *cakkhu pasāda rūpā*.” See, #7 of “[Contact Between Āyatana Leads to Vipāka Viññāṇa](#).” That was further elaborated in the next post, “[Indriya Make Phassa and Āyatana Make Samphassa](#).”

- Some English translations state that as “dependent on the eye and forms, eye-consciousness arises.” They translate *paṭicca* as “dependent on,” presumably because *Paticca Samuppāda* is translated as “Dependent Origination.”
- But *paṭicca* is a Pāli word with somewhat different meanings depending on the context. Let us clarify that first.

6. It is fine to translate *Paticca Samuppāda* as “Dependent Origination.” That is because the steps in *Paticca Samuppāda* are CONDITIONAL statements. For example, “with *avijjā* (ignorance) as **condition**, *saṅkhāra* arise.” One could also state that the “arising of *saṅkhāra* is dependent on the presence of *avijjā*.” However, conditionality comes from the word “*paccayā*,” not from “*paṭicca*.” See, “[What Does “Paccayā” Mean in Paticca Samuppāda?](#).”

- Therefore, “*cakkhuṇca paṭicca rūpe ca uppajjati cakkhuvīññāṇam*” should not be translated as “**dependent on the eye and forms, eye-consciousness arises.**” **It is more than just dependence.** It is “coming together” or “coming to contact” of *cakkhu* and *rūpa* that gives rise to *cakkhu viññāṇa*. **“Paṭicca” happens with only those events that grab our attention.**
- **There is also a deeper meaning of *paṭicca* in *Paṭicca Samuppāda*,** where it combine the two words “*pati*” + “*icca*.” When one attaches willingly to moral (or immoral) deeds, one ends up with corresponding “births” (“*sama*” + “*uppada*.”) See, “[Paticca Samuppāda – “Pati+ichcha” + “Sama+uppāda](#).” That is why I do not translate *Paticca Samuppāda* as “Dependent Origination.” There is more than “just dependence” in *Paṭicca Samuppāda*.
- However, in verse “*cakkhuṇca paṭicca rūpe ca uppajjati cakkhuvīññāṇam*,” *paṭicca* means “coming together” or “contact.” Here there is no “intention.” It is *cakkhu* and *rūpa* making contact. That is very clear in SN 12.53 and SN 12.54, in verse, “*telaṇca paṭicca vaṭṭiṇca paṭicca telappadīpo jhāyeyya*.” OR, “an oil lamp (*telappadīpo*) burns while the wick (*vaṭṭiṇca*) is together with oil (*telaṇca*).” If one does not add oil to the lamp, the wick will burn out quickly. There is no involvement of the mind there. Thus, the “*pati*” + “*icca*” etymology does not apply here.

Where Does *Paṭicca* Happen?

7. It is essential to remember that “*cakkhu*” (or *cakkhāyatana*) is not physical eyes (the Pāli word for the physical eye is “*nayana*”). “*Cakkhu*” is the *cakkhu pasāda rūpa* that lies close to the *hadaya vatthu* (seat of the mind), and *hadaya vatthu* **overlaps the physical heart**. That is far away from the brain.

- This *cakkhu pasāda rūpa* is the “internal *āyatana*.” **It is commonly referred to as “*cakkhu*.”**

- The brain processes an image the eyes receive and then sends it to the “*cakkhu*.” We discussed in the post, “[Contact Between Āyatana Leads to Vipāka Viññāṇa](#),”
- Furthermore, the “*rūpa*” is the image of the external object (external *āyatana*). To be precise, it is a “*vanna rūpa*” (or “*rūpa rūpa*”) in this case.
- When that *rūpa* makes contact with the *cakkhu*, the *cakkhu* in turn “hits” the *hadaya vatthu* (seat of the mind) and transfers that *rūpa* to the mind, that is the event, “*Cakkhuṇca paṭicca rūpe ca uppajjati cakkhuvīññāṇam*.”
- That contact gives rise to the *cakkhuvīññāṇa in mind*. Therefore, that sensory experience arises in the mind close to the physical heart. It does not occur in the brain (or at the eyes)! You may want to refresh memory by reading #12 of the post, “[Buddhist Worldview – Introduction](#).”

8. The example discussed in #3 involves an *ārammaṇa* coming through as a sound (*sadda rūpa*). Here the “sound *rūpa*” received by the *sota pasāda rūpa* (shortened to just “*sota*”) is the “*sadda*” in “*sotaṇca paṭicca sadde ca uppajjati sotaviññāṇam*.”

- Any external sensory input is a form of energy. That is why they are all *rūpa*. There is some confusion because most times, a “*rūpa rūpa*” or a “*vanna rūpa*” is just written as a “*rūpa*.”
- A sound is a *sadda rūpa*. You can figure out the other three: *rasa rūpa*, *gandha rūpa*, and *phoṭṭhabba rūpa*.
- A thought coming directly to the mind is a “*dhammā*” or a “*dhamma rūpa*.” There is no separate “*pasāda rūpa*” for *dhammā*, which directly contacts the *hadaya vatthu*.

Vipāka Vedanā Arise With That Initial Vipāka Viññāṇa

9. Let us consider “hearing a sound.” That is “*sotaṇca paṭicca sadde ca uppajjati sotaviññāṇam*.” This *sotaviññāṇa* is a *vipāka viññāṇa*, as we discussed in “[Contact Between Āyatana Leads to Vipāka Viññāṇa](#).”

- As we have discussed, *vedanā* and *saññā* arise with each *citta*. Therefore, there are a *vedanā* and *saññā* associated with that *sota viññāṇa* (which is a *citta*.) In other words, we know that we heard the sound (*vedanā*), and we recognize what the sound is (*saññā*). The *vedanā* that arises with that *vipāka viññāṇa* is a *vipāka vedanā*.
- At this stage, the mind receives the sensory event. All *vedanā* associated with that initial sensory event is a neutral (*upekkhā*) *vedanā*. However, some *somanassa* or *domanassa vedanā* arise due to *kāma guṇa* (even in an *Arahant*.). The next post, “[Kāma Guna – Origin of Attachment \(Tanhā\)](#),” will discuss this issue. However, no *dukkha/sukha vedanā* arise in this step of, “*sotaṇca paṭicca sadde ca uppajjati sotaviññāṇam*.” That also holds for other sensory faculties, except for the physical touch (*kāya*.)
- Therefore, the only exception is “*kāyaṇca paṭicca phoṭṭhabbe ca uppajjati kāyaviññāṇam*.” The sensory contact through the physical body can generate a *dukkha vedanā* due to an injury. It can lead to a *sukha vedanā* due to a body massage.
- We will discuss *sukha*, *dukkha*, *somanassa*, *domanassa*, and *upekkhā vedanā* below.

The Second Type of Vedanā is “Samphassa jā Vedanā”

10. In the post, “[Indriya Make Phassa and Āyatana Make Samphassa](#),” we looked further into the “Chachakka Sutta (MN 148): “*Cakkhuṇca paṭicca rūpe ca uppajjati cakkhu viññāṇam, tiṇṇaṁ saṅgati phasso, phassa paccayā vedanā*.” Those we discussed the second type of *vedanā* due to “*phassa paccayā vedanā*.” There we discussed how the second type of *vedanā* arises due to “*samphassa*.” It is a good idea to review that post.

- That second type of *vedanā* is due to “contact with defilements in mind” or “*saṇ*” or “*anusaya*.” And that depends on each person, i.e., how strong a *taṇhā* is generated via greed, anger, or ignorance. **Therefore, this “*samphassa-jā-vedanā*” is mind-made.**
- An *Arahant* would experience the first type of *vedanā*, the *vipāka vedanā*. The second type of *vedanā* would NOT arise in an *Arahant* because he/she does not have a defiled mind.
- Now we can categorize *vedanā* using a different scheme. That will show that *dukkha/sukha vedanā* arises ONLY due to the physical body. Other types of sensory contacts lead to unpleasant/pleasant *vedanā* (*domanassa/somanassa*) in the MIND.

Two Types of *Vedanā* (*Kāyika* and *Cetasika*)

11. As we saw above, ALL *vedanā* belong to those two types discussed above: *vipāka vedanā* and *samphassa-jā-vedanā*. However, there are other ways to categorize *vedanā*. The Buddha has taught us how to examine a given entity or a concept in many different ways. Once one understands them, it is easy to see which analysis is appropriate for a given situation.

- The Buddha categorized *vedanā* up to 108 types. However, we do not need to discuss all of them. We will consider only those that are relevant to common situations.
- First, ALL *vedanā* belong to two categories of *kāyika vedanā* (those felt on the body) and *cetasika vedanā* (those arising in the mind.) Of course, all of the *vipāka vedanā* and *samphassa-jā-vedanā* are in these two new categories. It is just a different way to look at them.
- Those *vedanā* felt in the physical body (*kāya*) are ***kāyika vedanā***. All other *vedanā* are ***cetasika vedanā***; they arise in mind.

Three Types of *Kāyika Vedanā*

12. Then the *kāyika vedanā* can be three types: ***dukkha vedanā***, ***sukha vedanā***, ***adukkhamasukha vedanā***.

- We can see that ***dukkha vedanā*** due to injuries, body aches, etc. are *kāyika vedanā*. Those *vedanā* are felt AT A LOCATION in the body. We feel a finger cut at the finger. Similarly, a back massage gives a ***sukha vedanā*** on the back.
- We remember that *vedanā* means “becoming aware of.” So, those *vedanā* due to bodily contacts that do not generate *dukkha* or *sukha* (i.e., neutral) are “*adukkhamasukha*” (neither painful nor pleasant), and that rhymes with “*adukkhamasukha*.”

Three Types of *Cetasika Vedanā*

13. Those *cetasika vedanā* similarly belong to three major types: *domanassa vedanā*, *somanassa vedanā*, and *upekkhā vedanā*.

- The word “*domanassa*” comes from “*do + manasa*” or “a depressed mind.” Similarly, “*somanassa*” comes from “*so + manasa*” or “a pleasant mind.” Of course, *upekkhā vedanā* is neither *domanassa* nor *somanassa*. It is neutral, and we feel that sensory input.
- Note that while the *adukkhamasukha vedanā* is associated with body touches, *upekkhā vedanā* is associated with all other sensory inputs.

Relationship to *Vipāka Vedanā* and “*Samphassa-jā-Vedanā*”

14. Now, these *cetasika vedanā* can be either *vipāka vedanā* or “*samphassa-jā-vedanā*.”

- As we have discussed, *samphassa-jā-vedanā* depends on the person’s mindset (more precisely, on one’s *anusaya* or *gati*.) Three people looking at the same person X may generate different types of

samphassa-jā-vedanā. A friend of X will generate a *samphassa-jā-vedanā* that is of *somanassa* type. An enemy of X will generate a *samphassa-jā-vedanā* that is of *domanassa* type. A third person who does not know X may only feel a *samphassa-jā-vedanā* of *upekkhā* type.

- Since there are six types of *samphassa-jā-vedanā*, we can see that there could be 18 types of *vedanā* associated with them. Each one could be *domanassa*, *somanassa*, or *upekkhā*.
- In the “[WebLink: suttacentral: Atthasata Sutta \(SN 36.22\)](#),” the Buddha has discussed 108 types of *vedanā*. But for many situations, the above types of *vedanā* are sufficient for our discussions.

10.3 Kāma Guṇa – Origin of Attachment (Taṇhā)

October 6, 2019; revised October 9, 2022

Kāma guṇa are associated with pleasurable things in this world. It is because of *kāma guṇa* that we tend to attach (*taṇhā*) to worldly things via either greed or anger (based on ignorance.) Based on *kāma guṇa* we AUTOMATICALLY generate *sāmisā vedanā*. *Sāmisā vedanā*, in turn, COULD lead to *taṇhā* (attachment to worldly things.)

Summary of the Previous Post

1. In the previous post, we first categorized *vedanā* into two types: *vipāka vedanā* and *samphassa-jā-vedanā*.

- Then, later in the post, we categorized *vedanā* differently. Those *vedanā* felt in the physical body (*kāya*) are ***kāyika vedanā***. All other *vedanā* types arise in mind, and they are ***cetasika vedanā***. Of course, *vipāka vedanā* can be *kāyika vedanā* or *cetasika vedanā*. However, *samphassa-jā-vedanā* are all *cetasika vedanā*.
- Then ***kāyika vedanā*** can be three types: ***dukkha vedanā***, ***sukha vedanā***, ***adukkhamasukha*** (***adukkhamasukha*** or neither *dukkha* nor *sukha*) ***vedanā***.
- One may need to review that post: “[Vipāka Vedanā and “Samphassa jā Vedanā” in a Sensory Event.](#)”

A Few Observations Based on the Previous Post

2. Now I need to add a few more comments. First, those ***kāyika vedanā*** are all *vipāka vedanā*. Those are the ones that contribute to physical suffering (injuries, sicknesses, etc.) and bodily comforts (like in a body massage.) Therefore, *dukkha vedanā*, *sukha vedanā*, and *adukkhamasukha vedanā* are all *vipāka vedanā*, and they arise only with “bodily contacts” (*kāyaṇca paṭicca phoṭṭhabbe ca uppajjati kāyaviññāṇam*.)

- All other types of *vipāka vedanā* come through the eyes ears, nose, tongue, and mind. Unlike *vipāka vedanā* that come through the physical body, they are NOT *kāyika vedanā*.
- Those are, **at that moment**, all *upekkhā vedanā*. We see, hear, smell, taste, or *dhammā* come to mind. They are, “*Cakkhuṇca paṭicca rūpe ca uppajjati cakkhuviññāṇam, sotaṇca paṭicca sadde ca uppajjati sotaviññāṇam, ghāṇaṇca paṭicca gandhe ca uppajjati ghānaviññāṇam, jivhāṇca paṭicca rase ca uppajjati jivhāviññāṇam, and manaṇca paṭicca dhamme ca uppajjati manoviññāṇam.*” Note that “*kāyaṇca paṭicca phoṭṭhabbe ca uppajjati kāyaviññāṇam*” does NOT appear here.
- Then, *samphassa-jā-vedanā* arise following those initial *vipāka vedanā*. For example, following hearing a sound (*sotaṇca paṭicca sadde ca uppajjati sotaviññāṇam*), two more steps take place before *samphassa-jā-vedanā* arise. They are in the “Chachakka Sutta (MN 148): “*sotaṇca paṭicca sadde ca uppajjati sotaviññāṇam, tiṇṇaṃ saṅgati phasso, phassa paccayā vedanā.*” As we discussed In the previous post, ***phassa paccayā vedanā*** is *samphassa-jā-vedanā*. Those are *vedanā* that arise due to greed, anger, and ignorance.
- In this post, we will discuss that last step in detail. Why do humans get attached to some sensory inputs via greed and to others via aversion (dislike)?

What Are *Kāma Guṇa*?

3. The Buddha said that this world is filled with eye-pleasing sights, ear-pleasing sounds, etc. for all five physical senses. Each existence in the *kāma loka* has its own set of “attractive and enticing sensory objects.” **The Buddha called them *kāmaguṇa* or “sensual qualities.”** As we know, *kāma* means sensual.

“*Guṇa*” means “qualities” or “characteristics.” Even though *kāmaguṇa* is one word in the *Tipiṭaka*, I like to write it as two words, “*kāma guṇa*” since that helps remember the meaning.

- For example, humans like certain types of food. Each animal species has its own “favorite foods.” Lions and tigers like to eat meat. Cows don’t eat meat, and they eat grass. Pigs like to eat all sorts of rotten food.
- Humans enjoy certain sights, sounds, tastes, smells, and bodily contacts. As long as one has a human body, it is impossible to avoid generating a *sukha vedanā* due to such sensory contacts. Even *Arahants* feel those.

***Kāma Guṇa* Are Enticing Objects, Sounds, Tastes, Odors, and Bodily Contacts**

4. Such *sukha vedanā* arise immediately AFTER the initial *vipāka vedanā*. As we discussed in the previous post, all *vipāka vedanā* due to sensory contacts other than bodily contacts are *upekkhā vedanā*. They are neutral.

- However, immediately following that initial contact, *kāma guṇa* comes into play. Many *suttā* discuss *kāma guṇa*, and they all have the following clarification of what it is. The “[WebLink: suttacentral: Nibbānasukha Sutta \(AN 9.34\)](#),” states, “*Pañcime, bhikkhave, kāmaguṇā. Katame pañca? Cakkhaviññeyyā rūpā iṭṭhā kantā manāpā piyarūpā kāmūpasamhitā rajanīyā, sotaviññeyyā saddā, ghānaviññeyyā gandhā, jivhāviññeyyā rasā, kāyaviññeyyā phoṭṭhabbā, iṭṭhā kantā manāpā piyarūpā kāmūpasamhitā rajanīyā. Ime kho, bhikkhave, pañca kāmaguṇā.*”
- **Translated:** “There are these five sensual qualities (*kāmaguṇa*). Which five? There are forms (*rūpā*) experienced with eyes that are agreeable, pleasing, charming, endearing, enticing, and leading to desire. There are sounds (*sadda*) that are agreeable, pleasing, charming, endearing, enticing, and leading to desire (and similarly for the other three senses.)

***Vedanā* Due to *Kāma Guṇa* Are Not “*samphassa-jā-vedanā*”**

5. However, this *somanassa vedanā* that arises due to *kāma guṇa* are NOT the “*samphassa-jā-vedanā*.” *Somanassa vedanā* due to *kāma guṇa* arises in an *Arahant*, as well as in an average human.

- Let us clarify with some examples. Sugar or honey has a “*kāma guṇa*” of sweetness. That holds for everyone, from an average person to an *Arahant*. A beautiful woman will be seen as such by anyone from an ordinary person to an *Arahant*.
- However, “*tiṇṇaṃ saṅgati phasso, phassa paccayā vedanā*” in #2 above does not occur in an *Arahant*. Even though an *Arahant* will experience *somanassa vedanā* due to *kāma guṇa*, **an *Arahant* would NOT get attached to that “pleasant/sensual feeling.”**
- Therefore, even though an *Arahant* would feel the tastiness of honey, he/she would not generate any craving for more. An *Arahant* has comprehended that desire for ANY worldly pleasures (sights, sounds, smells, tastes, and body touches) will only lead to future suffering. But it is essential to realize that one CANNOT and SHOULD NOT suppress such desires with sheer willpower. **That understanding comes after the *Sotāpanna* stage.**

Vedanā* Due to *Kāma Guṇa* Are *Sāmisā Vedanā

6. There is a unique name for those “automatically-arising” *vedanā* due to *kāma guṇa*. They are ***sāmisā vedanā***.

- The word *sāmisā* has origins in the keyword “*āmisā*,” which means “associated with the sensual world” or “*kāma loka*.” Thus, *sāmisā sukha vedanā* mean a “pleasant feeling” that arises due to the nature of the *kāma loka*. [*āmisā* :[nt.] food; flesh; bait; gain. (adj.) material.]

- An *Arahant*, as well as an average human, will experience similar “*sāmisa vedanā*.” Any sensory event of *kāma loka* is a *sāmisa vedanā*. We will briefly discuss the types of *sāmisa vedanā* below.
- We remember that the original *viññāṇa* (*cakkhu, sota, ghāṇa, jivhā, kāya*) resulted due to a *vipāka*. *Vipāka vedanā* associated with those are *upekkhā vedanā*. (The only exception was *kāya viññāṇa*, which could give rise to *dukkha, sukha*, or *adukkhamasukha vedanā*.)
- Immediately following those *vipāka vedanā*, *kāma guṇa* comes into play, and *sāmisa vedanā* arises automatically.
- It is only after the generation of *sāmisa vedanā* that “*tiṇṇam saṅgati phasso, phassa paccayā vedanā*” comes into play.

Kāma Rāga Is Getting Attached to Sāmisa Vedanā

7. The human world is full of enticing sights, sounds, tastes, odors, and bodily comforts. Those are not *kāma*. They are *kāma guṇa*. Getting attached to them and cultivating *kāma saṅkappa* (or *vacī saṅkhāra* or *vitakka/vicāra*) is *kāma* (and *kāma rāga*).

- The “[WebLink: suttacentral: Nibbedhika Sutta \(AN 6.63\)](#)” states, “*Saṅkappa rāgo purisassa kāmo, Nete kāmā yāni citrāni loke...*”

Translated: “A person’s *kāma* is getting attached and thinking about (*saṅkappa rāga*) those pleasing things in this world (*citrāni loke*). Those beautiful things in the world are not *kāma*.”

- I highly recommend the post “[Kāma Guna, Kāma, Kāma Rāga, Kāmacchanda](#).” It has more information that will help understand the concepts better.

Difference Between Samphassa-jā-Vedanā and Sāmisa Vedanā

8. Now we can see the difference between *samphassa-jā-vedanā* and *sāmisa vedanā*.

- First, *sāmisa vedanā* are common to ALL HUMANS, including *Arahants*. They are the sweetness of sugar or pleasing odors like perfumes.
- On the other hand, *samphassa-jā-vedanā* are highly PERSONAL. They do not arise in *Arahants*. **For others, how strongly they arise depends on one’s gati AND the specific ārammaṇa.**
- We also need to understand that *samphassa-jā-vedanā* arises BECAUSE OF *sāmisa vedanā*. One gets attached to sensory inputs because they are enticing. As long as one does not see the “hidden suffering” in those enticing sights, sounds, etc., one is bound to generate a craving for them.
- Getting attached to *ārammaṇa* is “*taṇhā*.” One can get attached via greed, anger, or ignorance. Let us discuss that briefly since it is crucial.

Taṇhā – Getting Attached via Greed, Anger, or Ignorance

9. Just like “pleasing and enticing things” in the *kāma loka*, there are also “unpleasant things.” For example, rotten food tastes terrible, and we do not like loud or high-pitched noises. Humans generate *sāmisa dukkha vedanā* when exposed to such sensory inputs or *ārammaṇa*.

- Nonetheless, we get “attached” to them also. We complain about lousy-tasting foods or harsh noises and may take action to avoid them.
- That is why “*taṇhā*” means “getting attached to *ārammaṇa* via either greed or anger.” We also get attached to *ārammaṇa* due to ignorance, not knowing their true nature. See “[Taṇhā – How We Attach Via Greed, Hate, and Ignorance](#).”
- We get attached via greed and ignorance DUE TO *sāmisa sukha vedanā* and *sāmisa upekkhā vedanā*. It is essential to realize that while everyone feels *sāmisa vedanā*, not everyone attaches via *sāmisa vedanā* the same way.

Samphassa-jā-Vedanā* Depend on One's *Gatī* And The Specific *Ārammaṇa

10. We have already discussed how *samphassa-jā-vedanā* arise due to one's character/habits (*gatī*) and specific *ārammaṇa*. See, "[Vipāka Vedanā and "Samphassa jā Vedanā" in a Sensory Event.](#)"

- An *Arahant* does not have any *gatī* left (other than those without *kammic* consequences), and thus would not generate *taṇhā* and, therefore, would not generate *samphassa-jā-vedanā*.
- All others attach to *ārammaṇa* in different ways and at different levels. Whether one attaches to *ārammaṇa* depends on that particular *ārammaṇa* AND one's *gatī*. For example, teenagers are likely to *gatī* to attach to loud music, whereas older adults may dislike such music. In each category of food, odors, sex, etc., some people attach more than others.
- It is essential to avoid "bad *ārammaṇa*." If one associates with those who drink excessively or are engaged in drug use, it is hard to avoid getting involved with such activities.
- In the same way, it is easier to cultivate good habits (*gatī*) by associating with those who already have good *gatī*. Then one will mostly be exposed to "good *ārammaṇa*."

Summary

11. So far, we have discussed the progression of events when a sensory input comes in per "[WebLink: suttacentral: Chachakka Sutta \(MN 148\).](#)" For example, when an external object is the *ārammaṇa*, the series of events start with, "*Cakkhuṇca paṭicca rūpe ca uppajjati cakkhuvīññāṇam.*" At that initial stage, it is just a *vipāka viññāṇa*. See, "[Contact Between Āyatana Leads to Vipāka Viññāṇa.](#)" Then in the subsequent posts, we have been discussing the progression, "*Cakkhuṇca paṭicca rūpe ca uppajjati cakkhu viññāṇam, tiṇṇam saṅgati phasso, phassa paccayā vedanā.*" Now we can summarize those steps as follows.

- First, a *ārammaṇa* (in this case, a visual object) catches one's attention with a *vipāka viññāṇa*. In this case, it is a *cakkhuvīññāṇa*.
- Immediately, the *kāma guṇa* comes into play, and one experiences a *sāmisā sukha vedanā* if it is a mind-pleasing object. That happens whether one is an average human or an *Arahant*.
- Then the next part of the above verse, "*tiṇṇam saṅgati phasso, phassa paccayā vedanā*" happens in mind (within a fraction of a second.) One's "*san gatī*" come into play. If one has the *gatī* to be attracted to such type of objects, then one would automatically attach. If it was an object that one truly dislikes, one would generate *sāmisā dukkha vedanā* and would still attach with dislike or anger.
- Now, another average human MAY NOT get attached either way. That is because that particular *ārammaṇa* may not be his/her "type," i.e., he/she may not have an interest in it. On the other hand, an *Arahant* WILL NOT get attached (via like, dislike, or ignorance) to ANY *ārammaṇa*.

Next Post

12. It took us a few posts to cover that, but I think it is essential to get these basic ideas clarified. It may not take long to go through the rest of the *sutta*.

- Another essential point from the discussion is that sensory events are discrete. They do not come in continuously. The mind handles ONE *ārammaṇa* at a time. However, since the mind is very fast, it APPEARS that we are seeing, hearing, smelling, tasting, and feeling the body touches simultaneously.
- The following post discusses this critical point: "[Vision Is a Series of "Snapshots" – Movie Analogy.](#)"

10.4 Vision Is a Series of “Snapshots” – Movie Analogy

October 13, 2019; revised November 15, 2019; April 4, 2022; January 13, 2023; May 16, 2023

It is essential to understand that the mind can capture only one sensory input at a time. This helps one understand that no “person” is involved in *Paṭicca Samuppāda* in an ULTIMATE SENSE.

Vision – How Do We See an Object?

1. Vision or “seeing” appears to us as continuous. We see people moving around, vehicles moving, animals running around, etc. However, in reality, “seeing” happens due to a series of “snapshots” our physical eyes take. Please bear with me as I set the stage with the following Pāli terms. Knowing these Pāli terms in detail is unnecessary; try to get the basic idea. If you have not read the post, “[Seeing Is a Series of ‘Snapshots,’](#)” it could be helpful to read that first.

- A key idea behind Buddha Dhamma is that we experience only one *citta* (loosely translated as a thought) at a time and that *citta* focuses on ONE *ārammaṇa*. In other words, while the mind registers a visual event, it cannot hear, smell, taste, or feel a touch. The keyword *ārammaṇa* was introduced in the post, “[Vipāka Vedanā and “Samphassa jā Vedanā” in a Sensory Event.](#)”
- “Seeing” does not happen continuously since the mind can process only one *cakkhudvāra citta vīthi* (with 17 *cittā*) at a time.. The mind processes that *cakkhudvāra citta vīthi* with three more *manodvāra citta vīthi*. At the end of those *citta vīthi*, the mind has captured a “snapshot” of the object and recognized it. Those four *citta vīthi* define one “snapshot” of a moving object.
- Our “seeing of a moving external object” involves many “snapshots” within seconds. Our perception of a moving object results from many such “snapshots.” We do not see the individual “snapshots.”

Movie Analogy – Series of Snapshots

2. We can simplify and understand the above process using an analogy. What I stated above is — in principle — what happens when we watch a movie.

- **To make a movie, a video camera captures many static pictures (snapshots) of a scene.** Then those snapshots are projected to a screen at a specific rate. If the playback speed is too slow, we can see individual pictures, but above a certain “projection rate,” it looks like natural motion. Here is a video that illustrates this well:

[WebLink: youtube: Animation basics: The optical illusion of motion - TED-Ed](#)

- A movie projector projects static pictures to the screen at a rate of about 30 frames a second, and we see the movie as a continuous progression of events. If the projection rate is low, we can see it frame by frame or as individual “snapshots.” We do not perceive those static pictures when projected at 30 frames a second, instead, we perceive a continuous progression without any gaps.
- More details in the post, “[Citta and Cetasika – How Viññāna \(Consciousness\) Arises.](#)”
- **That is why the Buddha said that the mind (or *viññāna*) is a magician.** We perceive a streamlined world, even though the reality is that our sensory faculties detect only a series of “snapshots,” **It is the mind that conceals the reality and gives us a perception of a continuous progression of events.**
- It is critical to understand this point. It helps get rid of *sakkāya diṭṭhi*; see “[Chachakka Sutta – Six Types of Vipāka Viññāna.](#)”

Mind and the Brain – Two Different Entities

3. In an early post on this series, I pointed out that *cakkhāyatana* is *cakkhu pasāda rūpa*, not the physical eyes. See #12 of “[Buddhist Worldview – Introduction.](#)”

- That *cakkhu pasāda rūpa* (or simply *cakkhu*) is part of the *gandhabba*, our “mental body.” The *gandhabba* has the seat of the mind (*hadaya vatthu*) surrounded by the five *pasāda rūpa* corresponding to vision, hearing, taste, smell, and touch.
- When our physical eyes capture an image of an external object, that image goes to the visual cortex in the brain. The signal is processed there and then transmitted to the *cakkhu pasāda rūpa*, making contact with the *hadaya vatthu*. That contact (*phassa*) leads to the arising of *cakkhu viññāṇa* at the *hadaya vatthu*. More details in “[Brain – Interface between Mind and Body](#).”
- By the way, that is the step, “*cakkhuñca paṭicca rūpe ca uppajjati cakkhuvīññāṇam*” discussed in #7 in the post, “[Contact Between Āyatana Leads to Vipāka Viññāṇa](#).”

4. Therefore, the brain works like a computer. It converts the image from the eyes to a form “processable” by *hadaya vatthu* (seat of the mind.) Therefore, vision involves a somewhat complex process.

- Similar processes take place for the other four sensory events. For example, when the physical ears capture a sound, that signal goes to the auditory cortex in the brain for processing. That signal then goes to the *sota pasāda rūpa*, which makes contact with *hadaya vatthu* to transfer. That gives rise to *sota viññāṇa* via, “*sotañca paṭicca sadde ca uppajjati sotaviññāṇam*.”

Reviewing the Whole Series Could Be Helpful

5. It may need some effort to understand this sequence of events. But it is necessary to comprehend the overall process before we get to the next post.

- It is good to print all the posts in the “[Worldview of the Buddha](#)” subsection and review them carefully.
- It is unnecessary to understand the DETAILS of #6 and #7 below. But it is good to get the general ideas involved. I am providing this information to illustrate the following. New findings in science are not only compatible with Buddha Dhamma but also help explain critical concepts in Buddha Dhamma.

The Brain Processes Visual Signals at About 30 Frames per Second

6. A recent study has reported that the minimum time to recognize a static picture is about 13 milliseconds ([Ref. 1](#)). That means we should be able to see such snapshots projected at 77 frames per second at the highest rate. However, that is probably “pushing it” and uncomfortable for the brain to handle. That is why movies use a projection rate of about 30 frames per second, as mentioned in #2 above.

- Interestingly, the time for neural information to reach the brain takes about 15 to 30 milliseconds (References 49, 50 in [Ref. 2](#)). Therefore, a projection rate of 30 to 50 frames is compatible with that measurement too.
- A millisecond is a thousandth of a second.
- Also, note that the eyes do not capture an image “in one shot.” It takes many frames taken via automatic “saccadic movements of the eyes.” See the Wikipedia article “[WebLink: wikipedia.org: Saccade](http://wikipedia.org:Saccade).”

The same Analysis Holds For the Other Four Physical Senses

7. A similar set of rules are valid for hearing as well. Another recent study ([Ref. 2](#)) found that sounds could be recognized at rates up to 30 sounds per second. That corresponds to a “sound packet” of about 33 milliseconds that can be detected and recognized.

- However, people speak at a much slower rate of 150 words per minute. That is about two words per second, much less than 30 possible words per second that would be possible according to the above study. So, there is no problem with hearing what other people speak, even if someone talks faster than the average rate.

- Currently, no studies are available from science for the other three sensory events (taste, smell, and body touches). But the same process holds for those as well.

Aside – Cognition (*Saññā*) Requires More Than Detection

The following points (#8, #9) are “asides.” It is not necessary information, but it could help those familiar with *Abhidhamma*.

8. We must remember that “experiencing a sensory input” is much more complex than just receiving that sensory input. For example, the mind needs to see an object or hear a sound, recognize what it is, and generate a *vedanā*.

- For example, upon hearing the sound “apple,” the mind needs to know what an “apple” is. Someone who does not speak English would not know what is meant by the word “apple.” But those who speak English AND have had an experience eating apples would have MEMORIES of those. Therefore, the mind must compare the received sensory with memories to recognize it!
- The mind does that very fast with the help of the *manasikāra cetasika*. As you may know, *manasikāra* is one of the seven universal *cetasika* that arises with each *citta*. Thus, the mind can recognize a sensory input instantaneously, as soon as it receives a “data packet.”
- More details in “[Citta and Cetasika – How Viññāna \(Consciousness\) Arises.](#)”

Aside – Process In Abhidhamma Language

9. Actual “seeing” or vision takes place at *hadaya vatthu*. Same for the other four types of sensory events. For example, consider a “packet of data” sent from the physical eye to the brain. The brain processes that information and transmits it to the *cakkhu pasāda*. As you may remember, the five *pasāda rūpā* (*cakkhu*, *sota*, *ghāna*, *jivhā*, *kāya*) surround the *hadaya vatthu*. Now the *cakkhu pasāda* makes contact with the *hadaya vatthu* by hitting it. That causes the *hadaya vatthu* to vibrate 17 times, like a gong struck by an iron rod vibrating for a certain fixed number of times.

- The 17 vibrations of the *hadaya vatthu* correspond to the 17 *cittā* in a *citta vīthi*. Such a *citta vīthi* is a *pañcadvāra citta vīthi* because one of the five physical senses or *pañcadvāra* (“*pañca*” or five + “*dvāra*” or “door”) initiates it.
- Imagine a blade clamped at one edge and hit on the un-clamped side. The blade will vibrate. It vibrates a certain FIXED number of times. For a given material, that is a fixed number.
- The same happens when a *pasāda rūpa* strikes the *hadaya vatthu*. The *hadaya vatthu* vibrates 17 times, with each vibration leading to the arising of a *citta*. **That is the origin of a *citta vīthi* with 17 *cittā*.** Those 17 vibrations are a form of energy called a *hadaya rūpa*.

10. The misconception that any *rūpa* has a lifetime of 17 thought moments arose because of not understanding the difference between a *rūpa* (the image of an external object) and a *hadaya rūpa* (which is just the 17 vibrations of the *hadaya vatthu*).

- In other words, this information packet is received and processed by the *hadaya vatthu* within the 17 *cittā*. The information is complete by the fourth *citta* (fourth vibration of the *hadaya vatthu*), and then the rest of the *citta* in that *citta vīthi* deal with this information. Three more *citta vīthi* run by the *hadaya vatthu* itself completes the process. The additional *citta vīthi*, initiated by the mind, are *manodvāra citta vīthi*. Here, *manodvāra* means the “mind-door.”
- Details of #9 and #10 at “[Does any Object \(Rūpa\) Last only 17 Thought Moments?.](#)”

The mind is Fast, and the Brain is Slow

11. Thus, we can see a vast **difference** in time between the two processes involved. The physical body acquiring data takes time of the order of 10 milliseconds. The mind processes that information within a billionth of a second (using one *pañcadvāra citta vīthi* and three *manodvāra citta vīthi*.)

- Even if the five senses keep sending data continuously, the mind is “just sitting there” most of the time. Let us examine this in more detail: Suppose the brain keeps sending data from the eye non-stop. Since each “packet” takes, say ten milliseconds, then in a second, there will be 100 “data packets” of vision coming in. If the brain is going at full speed, it can send at most 500 (=100×5) “data packets” from all five physical senses in a second. **Then the mind will spend less than a millionth of a second processing all that data.** Thus, if we add actual “active times of the mind” for a movie that lasts two hours, it is probably less than a second.
- In other words, the brain spends a lot of energy processing the data streams during a two-hour movie. But the “seat of the mind” or the *hadaya vatthu* absorbs that information at an unimaginable speed. That is why we might only get a headache watching too many movies.

12. During those “gaps,” the *hadaya vatthu* also interacts (both ways) with the *mana indriya* in the brain. In particular, it gives instructions to the brain (via *mana indriya*) on how to control the physical body in response to sensory inputs.

- Thus, for the most part, the mind (or, more precisely, the *hadaya vatthu*) is sitting there idly. That “idle state” of the mind is the “*bhavaṅga*” state.
- **A key point here is that the mind spends only a VERY SHORT TIME experiencing the SENSORY INPUTS. There is no “self” watching a movie.** The mind gives the illusion that a “self” is watching the movie. Details are in the next post, “[Chachakka Sutta – Six Types of Vipāka Viññāna](#).”
- The above is a very brief discussion. Of course, there are more details, but one can hopefully get the basic idea. Please ask questions if something is not clear. It is critical to understand this post.

Summary

13. The critical point embedded in the [WebLink: suttacentral: Chachakka Sutta \(MN 148\)](#) is **that there is no “self” experiencing the external world**. It is just a series of events, and the mind MAKES IT APPEAR that a “person” is watching a movie. We discussed the initial steps in sensory events addressed by that *sutta*.

- The key message in the *sutta* is that the mind DOES NOT experience the external world CONTINUOUSLY. Instead, the mind is active only for brief periods when receiving inputs from the five *pasāda rūpa*. As mentioned above, the brain is “on” much longer than the mind. **Once the brain processes information packets, the mind absorbs that information within a “blink of an eye.”**
- On the other hand, the brain has a heavy workload while watching a movie. It has to process audio and video inputs rapidly for the movie’s duration. One could get a headache if one watches two movies at a stretch. But even during that time, the mind is mainly in the *bhavaṅga* state. There is no “self” watching the movie. It is just a series of events taking place. **The mind is “putting all those “events” together and giving the appearance of a continuous progression of events.** Thus, one perceives “I am watching a movie” and NOT “watching a series of static pictures.”
- Details are in the next post, “[Chachakka Sutta – Six Types of Vipāka Viññāna](#).”
- **Later, we will discuss why it is also incorrect to say that there is “no-self.”** As long as *Paṭicca Samuppāda* is not understood, there is a “self” or a “person” going through the rebirth process and experiencing much suffering!

10.5 Do I Have “A Mind” That Is Fixed and “Mine”?

August 30, 2018; revised October 3, 2022; November 28, 2022

You may first read the post, [“Amazingly Fast Time Evolution of a Thought \(Citta\)”](#) to have the proper background.

1. Let us systematically see what happens when we “see” a tree for example. Please don’t just read through, but stop and think about each point. This post condenses much information (as for most posts, but especially this one).

- Light reflected off the tree falls on our eyes and forms an image of that tree on the retina in the back of the eye. As you can imagine, that image is tiny. But we “see” its numerous leaves, individual flowers, and fruits in great detail. How is that possible?
- Anyway, that image is transmitted to the brain through a chemical signal. How does the brain “see” the tree?
- Jeff Hawkins has thought a lot about this issue, is actively engaged in artificial intelligence. His book, “On Intelligence” discusses current scientific knowledge on vision and other sensory inputs.

2. Starting on p. 55 of his book, Hawkins discusses how the image that falls on the back of the eye is transmitted to the brain: “Visual information from the outside world is sent to your brain via a million fibers in your optic nerve...”

- “You can visualize these inputs as a bundle of electrical wires or a bundle of optical fibers...” and “The inputs to the brain are like those fibers, but they are called axons, and they carry neural signals called ‘action potentials’ or ‘spikes,’ which are partly chemical and partly electrical...”
- As discussed, not only visual signals but all sense inputs (sounds, taste, smell, and body touch) to the brain are the same type. You hear a sound, see the light, and feel pressure, **but inside your brain, there isn’t any fundamental difference between these different types of neural signals.** An action potential is an action potential.
- **Scientists have not figured out how the brain distinguishes those different types of signals.** Moreover, they have no idea how the mind “sees the light” or an image of that tree.

3. To quote more from that book: “There is no light inside your head. It is dark in there. There is no sound entering your brain either; it is quiet inside. The brain is the only part of your body that has no senses itself. A surgeon could stick a finger into your brain, and you would not feel it. All the information that enters your mind comes in as spatial and temporal patterns on the axons.”

- **So, it is a mystery how the mind senses those chemical and electrical signals coming to the brain as vision, sound, taste, smell, and body touch.**
- Scientists are trying to solve this puzzle by looking for answers in the brain. They have come to the end of the line here.
- Now let us see how the Buddha described these processes.

4. **Actual “seeing” (and hearing, smelling, etc) goes on at the *hadaya vatthu* located in the *gandhabbā* or the mental body.** The *gandhabbā* is like a fine mesh overlapping the physical body, with the *hadaya vatthu* located close to the physical heart. That is what gives life to the physical body.

- At the death of the physical body, that fine *gandhabbā* is pulled off the physical body like a ghost. It is so fine that we cannot see it. But we all know that a body can be alive one moment and become inert (like a piece of wood) at death a moment later.
- Of course, when the *gandhabbā* comes out **temporarily (as in the case of those who can do astral travel or in the case of out-of-body experiences)**, it is still “attached” to the physical body and keeps

the physical body alive. In “astral travel” terminology, the mental body is attached to the physical body via an invisible “silver cord.”

- Such cases are discussed in “[Manomaya Kāya and Out-of-Body Experience \(OBE\)](#).”

5. Another critical point is that in the subtle body of the *gandhabbā*, there are five “*pasāda rūpa*” located around the *hadaya vatthu*: *cakkhu*, *sota*, *ghāṇa*, *jivhā*, and *kāya*, that correspond to seeing, hearing, smelling, tasting, and touch. **Here is the “missing part” of the puzzle that scientists will never be able to solve just by dealing with the brain:**

- The brain is like a very sophisticated computer that analyzes those chemical and electrical signals discussed in #2 and #3.
- **Those chemical and electrical signals (which come in packets of about 10 millisecond duration per scientist) are converted to electromagnetic (EM) waves and are transmitted through the air to the *pasāda rūpa* located around the *hadaya vatthu*.**
- **This is what the Buddha taught 2000 years ago, and until scientists make this connection, they will not be able to proceed too far from where they are now.**

6. The Buddha did not explain it in terms of EM waves. These waves are called “*kiraṇa*” in Pāli or Sinhala.

- This is explained in the post “[Citta and Cetasika – How Viññāṇa \(Consciousness\) Arises](#)” and other posts in the following subsection: “[Citta and Cetasika](#).”
- It takes a real effort to understand the details. But it will be worthwhile for those who are serious about learning *Abhidhamma*. Otherwise, try to get the basic idea.

7. As an example, let us consider seeing a tree. A continuous series of “data packets” (chemical and electrical signals per #3, #4 above) that come to the brain from the eyes are processed by the brain and converted to EM waves (*kiraṇa*).

- Those waves then travel to the *cakkhu pasāda* situated close to the *hadaya vatthu*. These waves from the brain to the heart area of the body travel in the air much faster than those chemical/electrical signals traveling from the eyes to the brain via axons.

8. When an EM wave (*kiraṇa*) packet arrives at the *cakkhu pasāda*, it hits the *hadaya vatthu* and “transfers” that visual information about the tree to the mind. **The mind is born momentarily during this transition for the duration of that signal.**

- This is what is meant by “*cakkhuñca paṭicca rūpeca uppajjati cakkhu viññāṇam*.” Here *cakkhu* is the *cakkhu pasāda rūpa* (**not the physical eye**), and *rūpa* (in “*rūpeca*”) **is the signal from the brain that carries the visual signal about the tree (not the actual tree!)**. [*uppajjati* : [u + pad + ya] to be born; **arises**.]
- See “[Chachakka Sutta – Six Types of Vipāka Viññāṇa](#).”

9. This is CRITICALLY important to realize. What is meant by a “*rūpa*” is NOT the same as what our visual object is. We DO NOT see a man, a woman, or a tree. What comes to the mind is a “*rūpa* signal” that is generated by the brain. That signal has all the INFORMATION about that visual object.

- **The reception of the visual signal (*rūpa*) by the *cakkhu pasāda* (*cakkhu*) happens at the very moment that the *cakkhu pasāda* transfers that signal to the *hadaya vatthu* by “hitting it.” And at that very moment, *cakkhu viññāṇa* arises: “*cakkhuñca paṭicca rūpe ca uppajjati cakkhuviññāṇam*.”**

10. These are critical points to understand, even if all the details are not comprehended by modern science yet. Visual consciousness arises **briefly** when that information about the visual object is transferred to the mind.

- However, within that split second, not only the object (the tree in this case) is recognized, but also *vedanā*, *saññā* (recognition), and other mental factors also arise.

- For example, if we have seen that tree in the past, the *manasikāra cetasika* can feed that information too, so that we will know the name of the tree instantly; see “[Amazingly Fast Time Evolution of a Thought \(Citta\)](#).”

11. In another example, let us consider what happens when we tap a glass with a spoon. Of course, we will hear the tapping sound.

- Where did that sound come from? Was it in the glass? No. Was the sound in the spoon? No.
- The sound was emitted as a result of the spoon hitting the glass. If the spoon did not hit a glass, there would not be a tapping sound.
- In the same way, unless a “*rūpa*” or an image taken in by the eyes came to *cakkhu pasāda* and made it hit the *hadaya vatthu*, there would not be a “seeing event” or a *cakkhu viññāṇa*.

12. **So, there is no “entity” called an ever-present mind.** The mind arises when we receive sensory inputs via the five physical senses, as described above.

- What we loosely call the “mind” is the *viññāṇakkhandha* that arises in a billionth of a second after going through a fast process of *citta*, *mano*, *mānasam*, ...: See “[Amazingly Fast Time Evolution of a Thought \(Citta\)](#).”
- We can not only hear the tapping sound, but we can also see the glass and the spoon simultaneously. But those two events do not happen “at exactly the same time.” They just appear to be simultaneous.
- What comes to the mind is a series of sense inputs (via all five physical senses) in rapid succession. We perceive it all to happen at the same time.

13. How this is possible is explained in the post, “[Citta and Cetasika – How Viññāṇa \(Consciousness\) Arises](#)” and other posts in the following sub section: “[Citta and Cetasika](#).”

- As explained there, the process is similar to how a motion picture works. When making a movie, the producers take many static pictures (with a video camera) and then play them back at a fast enough speed. If the playback speed is too slow, we can see individual pictures, but above a specific “projection rate,” it looks like actual motion. Here is a video that illustrates this well:

[WebLink: youtube: Animation basics: The optical illusion of motion - TED-Ed](#)

14. When we see the outside world, what happens is very similar to the above. At the end of the video it is stated that the “movie” we see is an illusion. **As the Buddha explained, that holds for real life as well.** When we see someone coming toward us, a series of “static pictures” or *citta* is projected at a very fast rate in our minds, giving us the illusion of a “movie like experience.”

- The mind is very fast. The Buddha said that nothing in this world is faster than the mind. That is why we feel that all types of sense inputs come to “one’s mind” simultaneously. **In reality, they are discrete snapshots, just like movie frames!**
- But just like we see a continuous movie (a large number of individual picture frames), **we feel like we have a continuous mind.**

15. Now to the second issue about the mind. Why do we experience the outside world our way, and have our feelings and perceptions about a given sense input (love or anger when seeing the same person, for example)? That is why we feel like “I have **my own mind**.”

- The key is to realize that our response to the external sense inputs is unique because we have our “own way” of perceiving and evaluating those sensory inputs based on the set of *gati* we have.

16. As we discussed in the previous post, “[Amazingly Fast Time Evolution of a Thought \(Citta\)](#),” **our feelings and initial responses, reflect our personality or *gati*.**

- There we also discussed why the type of sensory input also plays an important role. So, our INITIAL response to an external sensory input depends on BOTH one’s *gati* AND the type of sensory input.

- That was an important post, so it may be beneficial to review it again. In this series of posts, I will try to highlight some critical features of Buddha Dhamma that will help get rid of *sakkāya diṭṭhi*. That is the key to the *Sotāpanna* stage.

17. Our “state of mind” depends on our *gati* and the sensory inputs we receive. Furthermore, we don’t have “a fixed mind”; it can change rapidly.

- If you think back, I am sure you can remember times when you felt like your mind was filled with greed; other times with love, yet another time with anger, etc.
- As one progresses on the Path, these extreme swings of “one’s mind” will become less, which is the key to *nirāmisā sukha*, eventually leading to *Nibbāna*.
- Each of us does not have a fixed mind. That means we don’t generate “our own” *saññā*, *vedanā*, *saṅkhāra*, *viññāṇa*. In other words, we do not have our *saññākkhandha*, *vedanākkhandha*, *saṅkhārakkhandha*, and *viññāṇakkhandha*.
- Moreover, it is not fruitful to take any of them as “mine.” That perception is part of *Sakkāya diṭṭhi*.

18. *Sakkāya diṭṭhi* can be stated as the following wrong assumptions. “I am my body”, “I am my *vedanā*,” “I am my *saññā*,” “I am my *saṅkhāra*,” and “I am my *viññāṇa*.” The last four can be lumped together as “I am my mind.” But a better way to remove *Sakkāya diṭṭhi* is to realize that: “All those entities are not worthwhile to be taken as mine.”

- We tend to think automatically that “I have my own body,” “I have my own mind,” and “it is fruitful to be taken them as mine.”
- Let us first analyze the mind and see whether that statement is true. In the next post, we will address “I have my own body” and “it is fruitful to be taken as mine.”
- The Buddha analyzed **how the mind arises** step-by-step, by breaking down the process. That is why he called himself a “*Vibhajjavādī*”; see, “[WebLink: suttacentral: Subha Sutta \(MN 99\)](#)”: “*Vibhajjavādo kho ahamettha, māṇava; nāhamettha ekamsavādo..*” or “Young man, I am a *Vibhajjavādī* (one who analyzes from many aspects by dividing a given process to parts), I do not hold a fixed view based on just one aspect.”

In the next post, we will discuss why it is not fruitful to take one’s body as “one’s own.” But it is essential to know that the perception of “me” goes away only at the Arahant stage; see, “[Sakkāya Diṭṭhi is Personality \(Me\) View?](#).”

10.6 Chachakka Sutta – Six Types of Vipāka Viññāṇa

October 19, 2019; revised #12 on September 28, 2020; April 3, 2021; Title revised December 30, 2021; August 29, 2022

[**Old Title** : Chachakka Sutta – No “Self” in Initial Sensory Experience]

Cha chakka – Six Sets of Sixes

1. We have finished discussing the six steps in the *Chachakka Sutta*. See “[Worldview of the Buddha](#).” Let us briefly summarize the “six sets of sixes” (*Cha chakka*.)

- The *sutta* first lists the “six sets” or “six collections.” “*Cha ajjhakkāni āyatanāni veditabbāni, cha bāhirāni āyatanāni veditabbāni, cha viññāṇakāyā veditabbā, cha phassakāyā veditabbā, cha vedanākāyā veditabbā, cha taṇhākāyā veditabbā.*”

That means: “One needs to understand the following “six sets of sixes”: Six **internal āyatana**, six **external āyatana**, six classes of (**vipāka**) **viññāṇa**, six classes of **phassa**, six classes of **vedanā**, six classes of **taṇhā**. Let us briefly state what they are. I have explained them in detail in the preceding posts.

- Six internal āyatana are: “*Cakkhāyatanaṃ, sotāyatanaṃ, ghāṇāyatanaṃ, jivhāyatanaṃ, kāyāyatanaṃ, manāyatanaṃ.*”
- Six external āyatana are: “*Rūpāyatanaṃ, saddāyatanaṃ, gandhāyatanaṃ, rasāyatanaṃ, phoṭṭhabbāyatanaṃ, dhammāyatanaṃ.*”
- Six classes of (*vipāka*) *viññāṇa* are: “*cakkhuvīññāṇa, sotavīññāṇa, ghānavīññāṇa, jivhāvīññāṇa, kāyavīññāṇa, manovīññāṇa.*”
- The six classes of *phassa*: “*Cakkhuṇca paṭicca rūpe ca uppajjati cakkhuvīññāṇaṃ, tiṇṇaṃ saṅgati phasso*” and similarly for the other five (**i.e., they are six types of “san phassa”**),
- Six classes of *vedanā*: “*phassa paccayā vedanā*” arising from each of the preceding six types of “*san phassa*.”
- Six classes of *taṇhā*: “*vedanā paccayā taṇhā*” due to the preceding six types of *vedanā*.
- It could be a good idea to print out the Pāli version of the *sutta* so that you can track which section of the *sutta* a verse under discussion is.

Chachakka Sutta Describes Initial Sensory Experiences Based on a New Ārammaṇa

2. About the first fourth of the “[WebLink: suttacentral: Chachakka Sutta \(MN 148\)](#)” discusses the following steps: “*Cakkhuṇca paṭicca rūpe ca uppajjati cakkhuvīññāṇaṃ, tiṇṇaṃ saṅgati phasso, phassa paccayā vedanā, vedanā paccayā taṇhā.*” (**repeated for all six sense faculties.**)

The *sutta* describes the automatic and instantaneous response to a new ārammaṇa. In several posts, we discussed in detail all those steps. Very briefly, those steps are (just focusing on the *cakkhu viññāṇa*):

- With the coming together (contact) between *cakkhu* (or *cakkhu pasāda rūpa*) and a *rūpa* (which is a “snapshot” of that external *rūpa*), *cakkhu viññāṇa* arises. ***Cakkhu* is NOT the physical eyes; “seeing” happens only when a *rūpa* makes contact with *cakkhu pasāda*.** Please review previous posts as needed.
- If that *rūpa* has a *kāma guṇa*, one may get interested in it (if one has the corresponding “*saṅ gati*”). The next step takes place ONLY IF one has such matching *gati* for that *rūpa* or that *ārammaṇa*.
- If one has matching “*saṅ gati*,” then a corresponding “*samphassa-jā-vedanā*” arises AUTOMATICALLY. See, “[Vipāka Vedanā and “Samphassa jā Vedanā” in a Sensory Event.](#)”

- The next step, “*vedanā paccayā taṇhā*,” happens if that “*samphassa-jā-vedanā*” is strong enough to take further action. We discussed that last step in, “[Kāma Guna – Origin of Attachment \(Tanhā\)](#).”

A Ārammaṇa triggers sensory Experiences

3. Therefore, the *sutta* describes the events that occur when a new *ārammaṇa* comes to mind via one of the six internal sense bases (internal *āyatana*).

- **It is essential to see that ALL these activities happen AUTOMATICALLY and INSTANTANEOUSLY. They do not require CONSCIOUS thinking. There is no INTENTION involved.**
- That is a critical point to understand. You might say, “I can use any sensory faculties (internal *āyatana*) anytime I want to.” That is true. But think about any event, and you can ALWAYS trace it back to a *ārammaṇa* that comes to mind on its own.
- For example, you may see and hear many things when walking down a crowded street. But one sight or sound could stop you and start doing something else. You may see an eye-catching item in a store window, stop to look at it, and then go inside to buy it. That was triggered via, “*cakkhuṇca paṭicca rūpe ca uppajjati cakkhuvīññāṇam*.” **The *sutta* describes what happens ONLY at the MOMENT that you saw the item.** Once you get “attached to it,” you start generating *vacī saṅkhāra* (consciously thinking about the item) and *kāya saṅkhāra* (go inside the store). That is the “*kamma* generation” stage. We will discuss that in later posts.
- Even in the middle of a discussion, one may get a new idea, and then everyone may start talking about that new idea he/she presented. The conversation changes to a new topic with the new *ārammaṇa*. That happened with a *dhammā* (an idea) that came to the mind via “*manaṇca paṭicca dhamme ca uppajjati manovīññāṇam*.”

Chachakka Sutta Describes Only Kamma Vipāka

4. All the steps in #2 above happen within a fraction of a second. There is no conscious thinking involved. **They are all *kamma vipāka*.**

- Of course, that process describes only those events immediately following the INITIAL sensory contact. One can deliberately experience that sensory contact again and again after the initial experience. For example, one may keep looking at an interesting sight or keep listening to a pleasing sound. **That is when one accumulates a new *kamma* (if done with greed, anger, or ignorance).** We will discuss those steps in future posts involving *Paticca Samuppāda*.
- **Results of past *kamma* automatically lead to *kamma vipāka*. Based on them, we create a new *kamma*. That is how the rebirth process continues.**

Sensory Inputs – One “Packet” At a Time

5. As I discussed in detail in the previous post, all our sensory inputs are first processed by the brain in “packets.” The brain can process those six types of data in parallel (at the same time). Each “packet” is about one-hundredth of a second (10 milliseconds) in duration. Those processed signals arrive at the seat of the mind (*hadaya vatthu*) located on the mental body (*manomaya kāya* or *gandhabba*). The mind, in turn, analyzes only ONE packet of information at a time. See the previous post, “[Vision Is a Series of “Snapshots” – Movie Analogy.](#)”

- For example, while the mind is processing a “sight” or *rūpa rūpa*, it CAN NOT process a “sound” or a “*sadda rūpa*.” After analyzing that “snapshot” of sight the mind switches to another sensory input. **Of course, our eyes and ears do not “die” moment-to-moment. It is just that “*cakkhu*,” for example, is ALIVE (or ACTIVE) only while the mind is processing input from the physical eyes.**

- Therefore, ONLY ONE internal *āyatana* is “ALIVE” at a given moment. Our “*cakkhu*” comes alive while the mind receives a “snapshot” of an external *rūpa*. The “*sota*” is alive (or active) only during a brief moment of receiving a “bit of sound” like just a word. **They come to the mind in “packets,” not as a continuous stream. But it SEEMS that we experience them all simultaneously since the mind processes all inputs very quickly.**
- The following example may help to get the basic idea. We have seen those signposts where a message runs one letter at a time, but at a fast rate. Only one letter is on display at a given moment. But within a fraction of a second, that letter turns off, the next letter turns on, and so on. Since it happens fast, we can read the message.
- The mind is swift. It can — not only put together such a stream of incoming signals — but also separate the six sensory inputs. In the previous post (see #8 there), I briefly mentioned that the mind does this with the help of the *manasikāra cetasika*.
- More details in [“Citta and Cetasika – How Viññāna \(Consciousness\) Arises.”](#)

If *Cakkhu* Is “*Attā*,” It Must Be Alive (or Operational) All The Time

Now let us discuss the next verse in the *sutta*. It helps understand what is meant by the critical Pāli words *attā* and *sakkāya diṭṭhi*.

6. We have the perception that there is a “self” that sees, hears, tastes, smells, touches, and recalls *dhammā* all simultaneously.

- However, we do not experience all six sensory inputs simultaneously. Even with just one sensory input, the mind receives only a brief “snapshot” of it at a time. See, [“Vision Is a Series of “Snapshots” – Movie Analogy.”](#)
- In other words, our six internal *āyatana* of *cakkhu*, *sota*, *ghāṇa*, *jivhā*, *kāya*, and *mano* arise ONLY if a corresponding *ārammaṇa* appears. As I have emphasized, our physical eyes, ears, nose, tongue, and body are not our internal *āyatana*. See, [“Buddhist Worldview – Introduction.”](#)
- Therefore, “one’s self” is not in ANY of those 36 entities. **All those come to existence momentarily and pass away. That happens from time-to-time only when a *ārammaṇa* is registered.**
- **That is a critical conclusion that is related to “*anattā*.” It will also become clear that *anattā* differs from *anatta* (without the long “*ā*”).** Let us discuss *anattā* in detail now.

A “Self” Is Not Involved in The Preceding Processes

7. After going through the steps in #2 above, the next part of the *sutta* starts with the verse, “‘*Cakkhu attā’ti yo vadeyya taṃ na upapajjati. Cakkhussa uppādopi vayopi paññāyati. Yassa kho pana uppādopi vayopi paññāyati, ‘attā me uppajjati ca veti cā’ti iccassa evamāgatam hoti. Tasmā taṃ na upapajjati: ‘cakkhu attā’ti yo vadeyya. Iti cakkhu anattā.*’”

Loosely translated: “If anyone says, ‘The *cakkhu* is self,’ (or “seeing” is mine or “it is I who sees”) that is not tenable. **An arising and disappearing of *cakkhu* (not the physical eye) is evident.** If *cakkhu* is ‘self,’ that would imply: ‘my self arises and disappears’ OR ‘I come into being momentarily and disappear.’ **That is why it cannot be argued that ‘The eye is self.’** Thus *cakkhu* is ‘not-self’ or ‘*anattā*.’ (“*na attā*” for “not *attā*” rhymes as “*anattā*,” just as “*na āgāmi*” rhymes as “*Anāgāmi*.”)

- That verse is then repeated for the other five entities related to *cakkhu*, i.e., *rūpa*, *cakkhu viññāṇa*, *cakkhu samphassa*, *cakkhu samphassa-jā-vedanā*, *taṇhā* (due to *cakkhu samphassa-jā-vedanā*.) The last verse in that series is, “*Iti cakkhu anattā, rūpā anattā, cakkhuvīññāṇam anattā, cakkhusamphasso anattā, vedanā anattā, taṇhā anattā.*”

- Then that is repeated for the six entities associated with *sota*, *ghāna*, *jivhā*, *kāya*, and *mano* (6 x 6). The last verse is, “*Iti mano anattā, dhammā anattā, manoviññāṇaṃ anattā, manosamphasso anattā, vedanā anattā, taṇhā anattā.*” At this point, we are about halfway through the text in the *sutta*.
- Therefore, “self” can be found in any of those.
- Now let us discuss two other *suttā* briefly to make those points clear.

Bāhiya Sutta – “Diṭṭhe Diṭṭhamattaṃ Bhavissati”

8. In the “[WebLink: suttacentral: Bāhiya Sutta \(Udāna 1.10\)](#),” the Buddha tells Bāhiya, “*Tasmātiha te, bāhiya, evaṃ sikkhitabbaṃ: ‘diṭṭhe diṭṭhamattaṃ bhavissati, sute sutamattaṃ bhavissati, mute mutamattaṃ bhavissati, viññāte viññātamattaṃ bhavissati’*ti.

Translated: “Bāhiya, you should train yourself the following way. At any moment, what you see (*diṭṭhe*) is just a snapshot (*diṭṭhamattaṃ* is literally, “trace of a sight.”) What you hear (*sute*) is a brief sound (*sutamattaṃ*.) What you experience with taste, smell, and touch (*mute*) is a trace of that (*mutamattaṃ*.) Your *viññāṇa* (*viññāte*) is a trace of *viññāṇa* (*viññātamattaṃ*.)

Then the Buddha further explains, “*Yato kho te, bāhiya, diṭṭhe diṭṭhamattaṃ bhavissati, sute sutamattaṃ bhavissati, mute mutamattaṃ bhavissati, viññāte viññātamattaṃ bhavissati, tato tvaṃ, bāhiya, na tena; yato tvaṃ, bāhiya, na tena tato tvaṃ, bāhiya, na tattha; yato tvaṃ, bāhiya, na tattha, tato tvaṃ, bāhiya, nevidha na huraṃ na ubhayamantarena. Esevanto dukkhassā*” ti.

Translated: “*Since what you see (diṭṭhe) is just a snapshot* (and similarly for others), Bāhiya, *there is no “you” (involved) there*; because of that, Bāhiya, you should not get attached (*na tattha*); if you do that, Bāhiya, “*you*” *are not in this existence (nevidha) or another existence (na huraṃ) or in between those two (na ubhayam antarena.)*” That (understanding) is the end of suffering (*Esevanto dukkhassā*” ti.)

My comments:

- **That means it is incorrect to say there is a “self” experiencing those traces of sensory events. Those are just results (*vipāka*) of past *kamma*, i.e., causes bring corresponding results.** We will explain this further with the *Mālukiyaputta Sutta* below.
- **However, the above description may give the impression that everything is deterministic. That is not so, and that will become clear when we address what happens following the initial “vipāka stage.”**
- Many people incorrectly translate “*mattaṃ*” to English as “only.” For example, most current translators translate “*diṭṭhe diṭṭhamattaṃ*” as “seeing is only seeing.”
- *Diṭṭhamatta* means “a snapshot” (literally a “trace of seeing.”). For example, *appamatta* means “insignificant.” “*appa*” means “little” and “*matta*” means “a trace.” *Matta* is “*mātra*” in Sanskrit and “මත්ර” in Sinhala. As we discussed in the previous post, the mind (or the *viññāṇa*) gives us the illusion of a continuous sensory experience implying an “experiencer.” That is why the Buddha said that *viññāṇa* is a magician. See #2 of, “[Vision Is a Series of “Snapshots” – Movie Analogy.](#)”

Mālukiyaputta Sutta – Same Verse In More Details

9. Those above verses in #8 are also in the “[WebLink: suttacentral: Mālukiyaputta Sutta \(SN 35.95\)](#),” where the Buddha tells *bhikkhu* Mālukiyaputta, “*Ettha ca te, mālukiyaputta, diṭṭhasutamutaviññātabbesu dhammesu diṭṭhe diṭṭhamattaṃ bhavissati, sute sutamattaṃ bhavissati, mute mutamattaṃ bhavissati, viññāte viññātamattaṃ bhavissati. Yato kho te, mālukiyaputta, diṭṭhasutamutaviññātabbesu dhammesu diṭṭhe diṭṭhamattaṃ bhavissati, sute sutamattaṃ bhavissati, mute mutamattaṃ bhavissati, viññāte viññātamattaṃ bhavissati; tato tvaṃ, mālukiyaputta, na tena. Yato tvaṃ, mālukiyaputta, na tena; tato tvaṃ, mālukiyaputta, na tattha. Yato tvaṃ, mālukiyaputta,*

na tattha; tato tvaṃ, mālukyaputta, nevidha, na huraṃ, na ubhayamantarena. Esevanto dukkhassā”ti.

- That is very similar to *Bāhiya Sutta* above. However, now *bhikkhu* Mālukiya-putta recounts what he understood. That is very informative.

***Mālukiya-putta Sutta* – What Happens If One Gets Attached**

10. *Bhikkhu* Mālukiya-putta then says that he understood what the Buddha meant by the above verse. He explains his understanding:

*‘Rūpaṃ disvā sati muṭṭhā,
Piyaṃ nimittaṃ manasi karoto;
Sārattacitto vedeti,
Taṇca ajjhosa tiṭṭhati.*

*Tassa vaḍḍhanti vedanā,
anekā rūpasambhavā;
Abhijjhā ca vihesā ca,
cittamassūpahaññati;
Evaṃ ācīnato dukkhaṃ,
ārā nibbāna vuccati.’*

Translation:

“When one sees a form (*rūpa*) without mindfulness (i.e., without knowing that it is just a trace of “seeing”), one gets attached to that (*nimitta* or *ārammaṇa*),
One experiences it with an infatuated mind (with greed)
And **remains** bound to it.

“Many feelings flourish within,
Originating from the mind thinking about many related *rūpa* (*anekā rūpasambhavā*);
Greed and anger as well
By which one’s mind becomes disturbed;
For one who accumulates suffering thus
Nibbāna is far away.

***Mālukiya-putta Sutta* – What Happens If One Does Not Get Attached**

11. *Bhikkhu* Mālukiya-putta then says the following about how one needs to train oneself to attain *Nibbāna*:

*‘Na so rajjati rūpesu,
rūpaṃ disvā paṭissato;
Virattacitto vedeti,
taṇca nājjhosa tiṭṭhati.*

*Yathāssa passato rūpaṃ,
sevato cāpi vedanāṃ;
Khīyati nopacīyati,
evaṃ so caratī sato;
Evaṃ apacīnato dukkhaṃ,
santike nibbāna vuccati.’*

Translation:

“When one sees a form with mindfulness (with proper understanding)
One is not inflamed by lust for forms;
One experiences it with a dispassionate mind

And does not hold on to it tightly.

“For one acting mindfully in such a way
Without attaching to the form,
Even while one experiencing those feelings;
Suffering is exhausted, not built up
For one not piling up suffering thus,
Nibbāna is near.

Next Post

12. From what *bhikkhu* Mālukiya-putta stated above, we can see that it is not correct to say that it is “no-self,” either. After the “*vipāka* stage” that comes with a new *ārammaṇa* is over, it is possible to “take control” of the sensory experience. **That is possible ONLY IF one comprehends that *anattā* nature is involved in the *vipāka* stage.** Without that understanding, one would have *sakkāya diṭṭhi* as the *sutta* points out next.

- **Aside from those who are anxious to see why it is not correct to say that it is “no-self,” either:** At the end of the *vipāka* stage (at the step, “*vedanā paccayā taṇhā*”), a new phase of the sensory experience starts. That is the “*kamma* accumulation” stage. That new phase could last a long time if the mind is firmly attached to that *ārammaṇa*. One may think about more ways of enjoying that *ārammaṇa*, speak about it, and do things to pursue that *ārammaṇa*. **All those are *saṅkhāra*, and they lead to *kamma viññāṇa* via, “*saṅkhāra paccayā viññāṇa*.”**
- However, *Chachakka sutta* starts at the *vipāka* stage (with a sensory experience) and shows how one starts accumulating *kamma* ONLY IF one has *saṅgati* (if one has the corresponding “*saṅ gati*”). See #2 above. That decision to “get attached” is made at the *votthapana* stage of a *citta vithi*. See, #15 of [“Avyākata Paticca Samuppāda for Vipāka Viññāṇa.”](#)
- That is what *bhikkhu* Mālukiya-putta explained in #10 and #11 above. We will discuss that in detail after finishing the discussion on the *Chachakka Sutta*.
- Details of that “*kamma* accumulation” process will depend on whether one would still have *sakkāya diṭṭhi*. That means one does not realize that there is no “self” or “*attā*” involved in that initial sensory experience due to *kamma vipāka*.
- That is the next verse in the *Chachakka Sutta*, which we will discuss in the next post.

10.7 Sakkāya Diṭṭhi in Terms of Attā or “Self” or “Ātma”

October 26, 2019; revised November 1, 2019; October 9, 2022

Summary of *Chachakka Sutta* Up to This Point

1. The *Chachakka Sutta* (MN 148) describes in detail what happens when a new *ārammaṇa* (thought object) comes to the mind. The mind may “attach” (*taṇhā*) to that *ārammaṇa* via greed, anger, or ignorance. Let us briefly summarize those steps. All relevant posts are at, “[Origin of Life](#).”

- First, depending on the specific internal *āyatana* involved, one of six *vipāka viññāṇa* arises. Those are *cakkhu*, *sota*, *ghāṇa*, *jivhā*, *kāya*, or *mano viññāṇa*. Such a *viññāṇa* does not create *kammic* energy. It is just “seeing,” “hearing,” “smelling,” “tasting,” “touching,” or “recalling a memory or an idea.”
- Then the mind “makes contact” with “*san gati*.” If one has *gati* to attach to that *ārammaṇa* via greed, anger, or ignorance, then the mind GENERATES corresponding *somanassa*, *domanassa*, or *upekkhā vedanā*. They are *samphassa-jā-vedanā* or mind-made *vedanā*.
- The mind “attaches” to that *ārammaṇa* if such a “mind-made” *vedanā* arises. One can attach (*taṇhā*) via greed, hate, or ignorance.
- The keyword *ārammaṇa* was introduced in the post, “[Vipāka Vedanā and “Samphassa jā Vedanā” in a Sensory Event](#).”

The Unique Situation For an *Arahant*

2. Only the first step happens in an *Arahant*. There is no attachment to any *ārammaṇa*. Only the experience of *kāma guna* (such as the sweetness of sugar or the bitterness of lemon) is there. See, “[Kāma Guna – Origin of Attachment \(Tanhā\)](#).”

- However, an *Arahant* would also feel *kāyika* (bodily) *vedanā* due to injuries, sicknesses, etc. Those are *dukkha*, *sukha*, or *adukkhamasukha vedanā*. Note that an *Arahant* does not experience *somanassa/domanassa vedanā* (*Samphassa-jā-vedanā*) based on those *kāyika* (bodily) *vedanā*.
- Anyone other than an *Arahant* MIGHT attach to a particular *ārammaṇa*. Whether or not that attachment happens depends on the “*san gati*.” It is not that everyone attaches to every *ārammaṇa*.

Deeper Aspects of the *Chachakka Sutta*

3. We also discussed the “deeper aspects” involved in those steps.

- Only one of the six types of *viññāṇa* arises in mind at any moment due to a specific *ārammaṇa*. When we see, do not hear, smell, taste, touch, or think AT THAT BRIEF MOMENT. That is because only one *citta vīthi* focused on one sensory input can be present at any moment. Put another way, **only one *pasāda rūpa* can contact the *hadaya vatthu* (seat of the mind) at a given time**. The mind analyzes that sensory contact with four *citta vīthi* JUST FOCUSED ON that particular sensory input.
- For example, when the mind analyzes a “packet of sound,” it focuses on that sound. The mind DOES NOT and CANNOT see, taste, smell, etc. during that brief time. Thus sensory inputs are analyzed in “packets.” Each “packet” is only one of six possible types (sight, sound, taste, smell, touch, or recall of *dhammā*.)
- We analyzed that in terms of recent findings from modern science. The mind takes “snapshots” of each sensory input separated by about a hundredth of a second (10 milliseconds.) Since that happens very fast, we “feel like” we are “seeing continuously.” That is an illusion created by the mind, just like we perceive a set of snapshots as a continuous movie. See, “[Vision Is a Series of “Snapshots” – Movie Analogy](#).”

- Not only that, but we feel that we are seeing, hearing, tasting, smelling, touching, and thinking simultaneously. But the reality is that the mind receives only one “snapshot” at a time. The mind has the astounding capability to combine “data packets” from the “six doors” without mixing them up!

What is *Ghāna Saññā*?

4. The fast mind gives the illusion that there is a “person” or a “self” or an “*attā*” experiencing those sensory events. That incorrect perception is “*ghāna saññā*” or a “perception of solidity.”

- I had not used the term “*ghāna saññā*” previously. It is a word that describes the illusion that the mind creates by taking a series of “snapshots” and linking them together to provide a “continuous sensory experience.”
- As we discussed, that happens when we watch a movie too. The illusion of continuous motion results in the projection of a series of “static pictures.” See, “[Vision Is a Series of “Snapshots” – Movie Analogy.](#)”

5. **Any sensory event is just a brief “snapshot.” It lasts a brief moment and goes to the past. That is the critical point to understand.** Bāhiya understood that point instantly and attained *Arahanthood*. But he had cultivated the path almost to the end and needed a “little push” to get there. We discussed that in the previous post, “[Chachakka Sutta – Six Types of Vipāka Viññāna.](#)”

- The mind has the astounding capability to recall preceding “snapshots,” and to put it all together to present a “continuous sensory experience.” That is why the Buddha called *viññāṇa* a magician.

6. We also have a “*ghāna saññā*” about our physical body. We perceive our bodies as solid, but as I have explained in a previous post, our bodies are “mostly empty.” That is because those atoms and molecules which make up our bodies are mostly empty. see, #7 – #10 of the post, “[Mystical Phenomena in Buddhism?](#)”

- I keep summarizing the discussion since there is a lot of material embedded in those verses. Now, let us discuss the next verse in the *sutta*.

Next Verse in the *Chachakka Sutta – Sakkāya Samudaya*

We have discussed up to the verse which ends with, “*Iti mano anattā, dhammā anattā, manoviññāṇam anattā, manosamphasso anattā, vedanā anattā, taṇhā anattā.*” Now we are getting to the critical conclusion reached from those earlier verses.

7. The next verse in the *sutta* starts with, “*Ayaṃ kho pana, bhikkhave, sakkāyasamudayagāminī paṭipadā—cakkhuṃ ‘etaṃ mama, esohamasmi, eso me attā’ti samanupassati; rūpe ‘etaṃ mama, esohamasmi, eso me attā’ti samanupassati; ...*”

- *Sakkāya* here refers to *sakkāya diṭṭhi*. *Samudaya* (“*saṇ*” + “*udaya*”) means “arising (due to) *saṇ*.” *Gāmini* means “path.” *Patipada* means an “action plan” or simply one’s behavior. Thus, *sakkāyasamudayagāminī paṭipadā* means, “the behavior that leads to the arising of *sakkāya diṭṭhi*.”
- Then it says, *sakkāya diṭṭhi* arises because one believes that “*cakkhu* is mine, *cakkhu* is what I am, *cakkhu* is my “self.”
- The *sutta* then repeats that for all other five entities associated with “seeing.” They are *rūpa*, *cakkhu viññāṇa*, *cakkhu samphassa*, *cakkhu samphassa-jā-vedanā*, and *taṇhā* (that results from *cakkhu samphassa-jā-vedanā*.)
- Then it is repeated for the other five internal *āyatana*: *sota*, *ghāna*, *jivhā*, *kāya*, *mano*.

Re-cap on the Initial Sensory Experience Due to *Kamma Vipāka*

8. All our discussions on the first half of the *sutta* led to the CRITICAL conclusion in the above verse. In simple terms, “there is no EXPERIENCER” experiencing those initial sensory inputs. As we remember, those INITIAL sensory inputs come in as *kamma vipāka*.

- Let me emphasize this point. Any sensory experience starts without direct initiation by the “experiencer.” For example, one FIRST sees an object via “*cakkhuñca paṭicca rūpe ca uppajjati cakkhuviññāṇam*.” But that does not happen by chance. It is ALWAYS a *kamma vipāka*.
- **A *kamma vipāka* experienced through the physical body (*kāya*) can be comforting (*sukha*), painful (*dukkha*), or neutral (*adukkhamasukha*).** For example, one gets to lie on a comfortable bed due to a good *kamma* done in the past. A bad *kamma* done in the past leads to an injury. Both happen via “*kāyañca paṭicca phoṭṭhabbe ca uppajjati kāyaviññāṇam*.”

9. **All other INITIAL sensory EXPERIENCES START with *adukkhamasukha vedanā*.** We see, hear, smell, taste, or a thought comes to the mind. The last one is, “*manañca paṭicca dhamme ca uppajjati manoviññāṇam*.” All those generate *adukkhamasukha vedanā* (neutral feeling).

- **However, based on all six initial sensory contacts, we may instantly generate *somanassa* or *domanassa vedanā* due to *kāma guṇa*.** For example, it is natural for a human (including *Arahants*) to experience an appealing taste when tasting sugar or seeing an attractive person.
- Based on those are “mind-made” feelings or “*samphassa-jā-vedanā*.” They are different from *dukkha/sukha vedanā* associated with sensory contacts with the body (*kāya*.)
- Now, based on such ***somanassa* or *domanassa vedanā* due to *kāma guṇa***, an average human MAY generate ***samphassa-jā-vedanā***. That will happen IF the mind “get stuck” (*taṇhā*) on that sensory input. Of course, an *Arahant* WILL NOT generate those ***samphassa-jā-vedanā***.
- That was discussed in, “[Kāma Guṇa – Origin of Attachment \(Taṇhā\)](#).”

Taṇhā* Leads to *Upādāna* via *Paṭicca Samuppāda

10. That is a critical step in *Paṭicca Samuppāda*, not discussed in the *Chachakka Sutta*. That *sutta* explains only the *KAMMA VIPĀKA* stage. That step of “*taṇhā paccayā upādāna*” starts the “new *kamma* GENERATION” process.

- I hope you can see that ALL of our *kamma* generation activities start when a new *ārammaṇa* comes to mind. That starts with the “*salāyatana paccayā phasso*” step in the *Paṭicca Samuppāda* cycle. It is the “*taṇhā paccayā upādāna*” step that starts a new *Paṭicca Samuppāda* cycle with “*avijjā paccayā saṅkhāra*.”
- That is a CRITICAL point. I will take the time to explain this “*taṇhā paccayā upādāna*” step. That way, one can get insights into how *Paṭicca Samuppāda* operates. Then one can begin to get an idea of the importance of understanding key concepts of Buddha Dhamma.

A New *Paṭicca Samuppāda* Process Starts Only if One Starts Acting with *Avijjā*

11. Next, The *Chachakka Sutta* states the REASONS why a given person may START to going through the *kamma* generation stage starting with *avijjā*. See, “[Chachakka Sutta – Six Types of Vipāka Viññāna](#).”

- **One would pursue a given *ārammaṇa* (the sight, sound, etc.) ONLY IF one perceives that it is worthwhile or beneficial to him or her.** That perception comes from the wrong view that those sensory experiences are one’s own. As we discussed, that wrong view is *sakkāya diṭṭhi*.
- One with *sakkāya diṭṭhi* does not realize that those experiences are just results of causes from the past. That they are *kamma vipāka*. Then one tries to get control of the situation by either trying to maintain a

“good experience” or avoid a “bad experience.” **Therefore, it is POSSIBLE for ANYONE with *sakkāya diṭṭhi* to go through the “*taṇhā paccayā upādāna*” step.**

- However, a *Sotāpanna* (who has removed *sakkāya diṭṭhi*) may still do immoral deeds. A *Sotāpanna* would NOT do *apāyagāmī* deeds. But he/she may still do less-strong immoral deeds. That is because a *Sotāpanna* still has wrong perceptions (*viparīta saññā*.) **At the *Arahant* stage, one would have removed both wrong views and perceptions.** I will explain this in a future post after concluding the discussion on the *Chachakka Sutta*.

12. **However, not everyone with *sakkāya diṭṭhi* will go through the “*taṇhā paccayā upādāna*” step.** Different people “attach” to different types of *ārammaṇa*.

- For example, if a beautiful woman starts working at a workplace, everyone will see her as beautiful. But only a few will get “attached” and start thinking about asking her for a date. There could even be a person who may “fall in love head over heels” at first sight of her.
- That is why we cannot say there is “no-self” either. Until one attains *Arahanthood*, there will be a “dynamic self” who gets attached to some things in this world. I say a “dynamic self” because there is no “fixed self” in the sense of a soul or a “*ātma*.” See “[What Reincarnates? – Concept of a Lifestream.](#)”

Attachment (*Taṇhā*) Can Happen Due to Greed, Anger, or Ignorance

13. In the above example, we discussed getting attached to the sight of a beautiful woman. But as we have discussed, one can “attach” to a *ārammaṇa* via anger or ignorance.

- Seeing an enemy, one will instantly generate anger in mind via the steps in the *Chachakka Sutta*. Here, the *samphassa-jā-vedanā* generated is a *domanassa vedanā*. It is a stressful *vedanā*. But still one “attaches” to that *ārammaṇa*, and will start making bad *vacī saṅkhāra* (i.e., conscious thoughts of anger) in mind.
- On the other hand, the *samphassa-jā-vedanā* generated in the example discussed in #12 above (upon seeing a beautiful woman) is a *somanassa vedanā*. That person is “attached” via greed.
- In some situations, there could be confusion on how to respond to a *ārammaṇa* and still get “stuck.” That is due to *avijjā*.

Taṇhā Leads to *Upādāna* Depending on One's Level of *Avijjā*

14. Having one or more of the following views leads to *sakkāya diṭṭhi*.

- The physical body (*kāya*) is mine, it is what I am, and it is my “self.” Furthermore, all associated bodily functions are mine; they are what I am and my “self.” Those are: seeing or *cakkhu*, hearing or *sota*, tasting or *jivhā*, smelling or *ghāna*, touching or *kāya*, and thinking or *mana*. See #6 above.
- Then one also tends to associate some external *rūpa* the same way. Those are *rūpa rūpa* (or *vaṇṇa rūpa* or simply *rūpa*), *sadda rūpa*, *gandha rūpa*, *rasa rūpa*, *phoṭṭhabba rūpa*, and *dharmma rūpa* or *dharmā*. For example, “this is my house; my song; this is my cake; my favorite scent; my comfy bed; these are my thoughts.”
- One may also perceive that all of one's mental aspects (*cakkhu viññāṇa*, *cakkhu samphassa*, *cakkhu samphassa-jā-vedanā*, and *taṇhā*) are all one's “self.” Of course, the same with other mental aspects associated with other sense faculties. There are 36 (6 X 6) such entities that the *sutta* lists. See, “[Chachakka Sutta – Six Types of Vipāka Viññāṇa.](#)”

Pañcupādānakkhandhā as *Sakkāya Diṭṭhi*

15. Those 36 entities are also known as “*pañcupādānakkhandhā*.” Here, *Pañcupādānakkhandhā* comes from “*pañca*” + “*upādāna*” + “*khandha*” or the five aggregates, to which one gets attached. See “[Chachakka Sutta – Six Types of Vipāka Viññāna](#).”

- If you carefully look at those 36 entities, they include *rūpakkkhandha*, *vedanākkhandha*, *saññākkhandha*, *saṅkhārakkhandha*, and the *viññānakkhandha*. However, one does not consider all of those to be “mine.” For example, out of all the houses in this world, one may claim to own one or a few homes. Out of all humans, one may have a set of people that one considers “mine.” For example, my parents, wife, children, friends, etc.
- Therefore, only a tiny fraction of the *pañcakkhandha* one has “attachments to.” Those attachments can vary from very strong (my body is the strongest) to decreasing levels for friends, neighbors, etc.
- Thus, *pañcupādānakkhandhā* is a small fraction of the *pañcakkhandha*.
- The “[WebLink: suttacentral: Sakkāyapañhā Sutta \(SN 38.15\)](#)” DEFINES *sakkāya* as *pañcupādānakkhandhā*: “‘*Sakkāyo, sakkāyo*’ti, *āvuso sārīputta, vuccati. Katamo nu kho, āvuso, sakkāyo*’ti? “*Pañcime, āvuso, upādānakkhandhā sakkāyo* vutto *bhagavatā, seyyathidaṃ—rūpupādānakkhandho, vedanupādānakkhandho, saññupādānakkhandho, saṅkhārupādānakkhandho, viññānupādānakkhandho. Ime kho, āvuso, pañcupādānakkhandhā sakkāyo vutto bhagavatā*”ti.

Other Ways of Describing *Sakkāya Dīṭṭhi*

16. It is possible to describe *sakkāya dīṭṭhi* in somewhat different ways. However, all of those are inter-consistent. The following posts discuss some of those. Please let me know if you find any inconsistencies (lal@puredhamma.net) or we can discuss it at the discussion forum.

- [Sakkāya Dīṭṭhi is Personality \(Me\) View?](#)
- [Sakkāya Dīṭṭhi and Tilakkhana](#)
- [Sakkāya Dīṭṭhi – Getting Rid of Deeper Wrong Views](#)

Wrong Views of *Nicca* and *Sukha* Lead to the Wrong View of *Attā*

17. **One gets attached to things one perceives to be *nicca* and *sukha*.** *Nicca* (pronounced “nichcha”) means we believe we can keep them in the way we want or like. *Sukha* means we think we will be happy by getting “ownership” of them.

- Then one takes “ownership” of them. One considers those to be “one’s own” or “*attā*.” That attachment can vary from very strong to less intense. One’s own body and mental qualities (*vedanā*, *saññā*, *saṅkhāra*, *viññāṇa* regarding one’s own body) give the strongest sense of *attā*.
- Then comes one’s spouse, children, house, cars, etc., relatives and friends, etc.
- Therefore, the hardest thing to remove is the sense of *attā* about one’s body.
- IT CANNOT be removed by willpower. It comes only from understanding this world’s *anicca*, *dukkha*, and *anatta* nature. What we discussed up to now plays a significant role in that understanding. There is no “experiencer.” A sensory input comes in as a result (*kāma vipāka*) of a previous cause (*kamma*.)

10.8 An Apparent “Self” Is Involved in Kamma Generation

November 2, 2019; revised November 6, 2019; September 10, 2022; October 14, 2022 (#18); February 3, 2023

Introduction

1. Here, we will discuss why someone with *sakkāya diṭṭhi* believes in a “self” (knowingly or unknowingly) and **accumulates *kamma* with that wrong view.**

- In previous posts in this series, we discussed why there is no “Experiencer.” Thus, there is no need for the existence of a “self” to describe an INITIAL sensory experience.
- However, anyone with *sakkāya diṭṭhi* has the wrong view of a “self” experiencing sensory inputs. Based on that mistaken view, steps are taken to maintain a “good experience” or to stop a “bad experience.” Therefore, we could say there is a wrong view of a “Doer” as long as there is *sakkāya diṭṭhi*. **That is why it is incorrect to say that there is “no-self” either.**
- That does not mean we do not need to take action to prevent bad outcomes. The key idea is to realize the unfruitfulness of doing immoral deeds (including conscious thoughts and speech) in response to sensory inputs.
- The *Chachakka Sutta* (MN 148) describes in detail what happens when a new *ārammaṇa* (thought object) comes to the mind. **The mind may “attach” (*taṇhā*) automatically** to that *ārammaṇa* via greed, anger, or ignorance. Let us briefly summarize those steps. It is critical to follow these steps. All relevant posts are at “[Worldview of the Buddha](#).” The main subsection is “[Origin of Life](#).”

Posts on the Background Material

2. In earlier posts, we discussed that INITIAL sensory experiences DO NOT require a “self.” However, they do not happen arbitrarily or randomly either. Those sensory experiences have causes (or reasons); they are *kamma vipāka*.

- Some *kamma vipāka* bring in suffering, such as injuries, sickness, etc., while other *vipāka* results in pleasurable experiences, such as good food, comfortable living, etc. Those are ALL experienced via the physical body (*kāya*.) They are NOT illusions. There is real suffering (and some pleasures too.)
- All other INITIAL sensory experiences do not DIRECTLY lead to pain or pleasure. Seeing, hearing, smelling, tasting, and recalling memories are “neutral” sensory experiences at that moment.

3. However, based on those sensory inputs, *somanassa* or *domanassa vedanā* arise automatically in mind. Those are “mind-generated” *vedanā* based on “*kāma guṇa*.” All humans (including *Arahants*) experience the sweetness of sugar or bitterness of some medicines. These are not “*samphassa-jā-vedanā*.” However, for others, “*samphassa-jā-vedanā*” arise due to such *somanassa* or *domanassa vedanā*. See “[Kāma Guṇa – Origin of Attachment \(Taṇhā\)](#).”

- Thus, based on *somanassa* or *domanassa vedanā* due to “*kāma guṇa*,” a given person may attach (*taṇhā*) to that particular sensory event (*ārammaṇa*) and generate *samphassa-jā-vedanā*. Only an *Arahant* is guaranteed not to attach.
- That is the summary of about a fourth of the Pāli text in the *Chachakka Sutta* (MN 148). That completes the six sets of six.

No “Self” Involved in the Initial Sensory Experiences

4. As we have discussed, the next verse in the *sutta* is, “*Cakkhu attā’ti yo vadeyya taṃ na upapajjati. Cakkhussa uppādopi vayoṇi paññāyati. Yassa kho pana uppādopi vayoṇi paññāyati, ‘attā me*

uppajjati ca veti cā'ti iccassa evamāgataṃ hoti. Tasmā taṃ na upapajjati: 'cakkhu attā'ti yo vadeyya. Iti cakkhu anattā.'

Loosely translated: “If anyone says, ‘*cakkhu* is self,’ (or “seeing” is mine or “it is I who sees”) that is not tenable. **An arising and ceasing of *cakkhu* (not the physical eye) is evident.** If *cakkhu* is ‘self,’ that would imply the following: ‘my self arises and ceases’ OR ‘I come into being momentarily and cease to exist.’ **That is why one cannot argue that ‘*cakkhu* is self.’** Thus *cakkhu* is ‘not-self’ or ‘*anattā*.’ (“*na attā*” for “not *attā*” rhymes as “*anattā*,” just as “*na āgāmi*” rhymes as “*Anāgāmi*.”)

- Then the next fourth of the Pāli text in the *Chachakka Sutta* (MN 148) states that the above conclusion holds for all 36 entities (“six sets of sixes”) involved in the initial sensory experience. Six **internal āyatana**, six **external āyatana**, six classes of (***vipāka***) *viññāṇa*, six classes of ***phassa***, six classes of ***vedanā***, six classes of ***tanhā***.
- See, “[Chachakka Sutta – Six Types of Vipāka Viññāṇa](#)” for details on that.
- Then we discussed the following verse in the *sutta* starting with, “*Ayaṃ kho pana, bhikkhave, sakkāyasamudayagāminī paṭipadā..*”

Attā Translated as “Self” Is Not Correct

5. The Pāli word “*attā*” does not mean “self,” even though I used that translation above. That translation is quite common these days. **We will go with that until we finish discussing *Paṭicca Samuppāda* because it does help to get the idea of *sakkāya diṭṭhi* across below.** If I try to discuss the real meaning of *attā* right now, that could lead to confusion.

That is why the Buddha refused to answer Vacchagotta’s question about whether or not there is an “*attā*.” See “[WebLink: suttacentral: Ānanda Sutta \(SN 44.10\).](#)”

- Vacchagotta comes to the Buddha asked “*kiṃ nu kho, bho gotama, atthattā ti?*” OR “Master Gotama, is it correct to say that there is an “*attā*”?”
- **Note that “*atthattā*” is “*atthi attā*” where “*atthi*” means “exists.” Vacchagotta meant in this case “*attā*” to be “self.”** Thus, Vacchagotta meant: “Is it correct to say that a “*self*” exists?”
- The Buddha remained silent, and Vacchagotta asked the question in the negative form. The second time, he asked: “*Kim pana, bho gotama, natthattā ti?*” or, “Master Gotama, is it **not** correct to say that there is a “self”?”. The Buddha refused to answer his question, so Vacchagotta got up and left.
- **Note that “*natthattā*” is made up of three words: “*na atthi attā*,” which negates “*atthattā*.”** Just as these days, many people are confused about the Pāli word “*attā*” and the Sanskrit word “*ātma*.” The latter meaning is closer to a “soul”
- I will discuss this *sutta* when I will discuss “*attā*” in detail, after discussing *Paṭicca Samuppāda*. By the way, Vacchagotta understood the concept later on and became an *Arahant* too.

The Origin of the Wrong View of *Sakkāya Diṭṭhi* – *Sakkāya Samudaya*

6. The *sutta* then states that the wrong view of *sakkāya diṭṭhi* arises BECAUSE one does not realize the above facts. Without knowing those facts, one tends to BELIEVE that a “self” is experiencing those first sensory events.

- Then, if it were a “good experience,” one would try to maintain that pleasant experience and also plan to experience it again in the future. In the case of a “bad experience,” one would do the opposite to avoid such “bad experiences.”
- The more one engages in either activity, the wrong VIEW of a “self” (*sakkāya diṭṭhi*) grows.

7. That explanation is in a short verse starting with, “*Ayaṃ kho pana, bhikkhave, sakkāyasamudayagāminī paṭipadā—cakkhuṃ ‘etaṃ mama, esohamasmi, eso me attā’ti samanupassati; rūpe ‘etaṃ mama, esohamasmi, eso me attā’ti samanupassati; ...*”

- We discussed this verse in detail in the last post, “[Sakkāya Diṭṭhi in Terms of Attā or “Self” or “Ātma.”](#)”
- So far I have summarized the discussion up to now. Now, we can discuss the next verse of the *sutta*.

Next Verse in the *Chachakka Sutta* – *Sakkāya Nirodhaya*

The verse in #7 above explains how *sakkāya diṭṭhi* ARISES. The new verse below explains HOW *sakkāya diṭṭhi* WILL STOP FROM ARISING.

8. The next verse in the *Chachakka Sutta* (MN 148) starts with, “*Ayaṃ kho pana, bhikkhave, sakkāyanirodhagāminī paṭipadā—cakkhuṃ ‘netam mama, nesohamasmi, na meso attā’ti samanupassati. Rūpe ‘netam mama, nesohamasmi, na meso attā’ti samanupassati...’*”

The word *Nirodha* comes from “*nir*”+“*udaya*,” where “*nir*” means to stop and “*udaya*” means “arise.” Thus *nirodha* means to prevent something from arising.

- *Gāmini* means “path.” *Paṭipadā* means an “action plan” or one’s behavior. Thus, *sakkāyanirodhagāminī paṭipadā* means, “the behavior that leads to STOPPING the arising of *sakkāya diṭṭhi*.”
 - **Then it says, that will happen when one “SEES” that “*cakkhu* is NOT mine, *cakkhu* is NOT what I am, *cakkhu* is NOT my “self.”** Here, “*netam*” means “*na*” + “*etaṃ*” or “it is not.”
 - That is because, in reality, there is no “self” or a “soul” or a “*ātma*” that is associated with a living being. The sensory experiences arise due to past causes. Yet, we cannot explain the response of an average human to those sensory experiences without the assumption of a “self.” The response of an average human to such sensory inputs can only be explained by taking into account his/her mindset of believing in a “self.”
 - (Once we discuss *Paṭicca Samuppāda*, it will become clear why future suffering arises BECAUSE of that wrong view of *sakkāya diṭṭhi*. **That is how *sakkāya diṭṭhi* can be removed. Only then can we also understand the real meaning of *atta/attā* (and *anatta/anattā*.)** I do not want to get into that issue right now because that will confuse many people.)
9. The *sutta* repeats that for all other five entities associated with “seeing.” They are *rūpa*, *cakkhu viññāṇa*, *cakkhu samphassa*, *cakkhu samphassa-jā-vedanā*, and *taṇhā* (that results from *cakkhu samphassa-jā-vedanā*.)
- Then it is repeated for the other five internal *āyatana*: *sota*, *ghāṇa*, *jivhā*, *kāya*, and *mano*. Please go through those verses.
 - **However, it may NOT be easy to “see” that no “self” is involved in sensory experiences.** We have had the wrong view of *sakkāya diṭṭhi* virtually forever! That is why we are in this never-ending rebirth process.
 - **To remove that strong *diṭṭhi*, we need to see the “true nature,” i.e., we need to cultivate “*yathābhūta ñāṇa*.”** A big part is realizing that there is no “experiencer,” as we have discussed in detail using the movie analogy. There are only causes and results. But, of course, the feelings are real; any suffering is real. But those results are according to the causes AND conditions at the time of bringing the results. That is *Paṭicca Samuppāda*. See, “[Vision Is a Series of “Snapshots” – Movie Analogy.](#)”
 - We will focus on that in detail in upcoming posts. However, this *sutta* briefly states the primary process.

Sakkāya Nirodhaya Starts With *Vedanā*

10. The key to arriving at that UNDERSTANDING is stated in the following verse of the *sutta*, starting with, “*Cakkhuñca, bhikkhave, paṭicca rūpe ca uppajjati cakkhuvīññāṇaṃ, tiṇṇaṃ saṅgati phasso, phassapaccayā uppajjati vedayitāṃ sukhāṃ vā dukkhāṃ vā adukkhamasukkhāṃ vā.*”

Translated: “*Bhikkhus*, dependent on the eye and forms, eye-consciousness arises; then the mind makes contact with “*saṅ gati*”; that contact with “*saṅ gati*” leads to the arising of “mind-made” feelings felt as pleasant or painful or neither-painful-nor-pleasant.”

- Regardless of the sense faculty, those “mind-made” *vedanā* or “*samphassa-jā-vedanā*” CAN ARISE based on *kāma guṇa* AND one’s *gati*.
- We discussed this part of the verse already in the posts, “[Indriya Make Phassa and Āyatana Make Samphassa](#),” “[Vipāka Vedanā and “Samphassa jā Vedanā” in a Sensory Event](#),” and “[Kāma Guṇa – Origin of Attachment \(Tanhā\)](#).”

Getting Attached to *Vedanā* Leads to the Growth of *Anusaya*

11. Then the subsequent verses introduce a critical word, *anusaya*. Based on *sukha vedanā*, *dukkha vedanā*, and *adukkhamasukha vedanā*, three corresponding types of *anusaya* result: *rāgānusaya*, *paṭighānusaya*, and *avijjānusaya*.

- Let us start with the verse that explains the origins of *rāgānusaya*: “*So sukhāya vedanāya phuṭṭho samāno abhinandati abhivadati ajjhosāya tiṭṭhati. Tassa rāgānusayo anuseti.*”
- **Translated:** “When one experiences a *sukha vedanā*, if one delights in it, welcomes it, and thinks and speaks highly of it, gets absorbed in it, then the underlying tendency for *rāga* (*rāgānusaya*) gets stronger (i.e., *rāgānusaya* will grow).”
- Here, *rāgānusaya* comes from “*rāga*” + “*anusaya*.” Now we need to get an idea about the meaning of *anusaya* first.

What is *Anusaya*?

12. *Anusaya* is usually translated as “**latent tendencies**.” That does give the basic idea. Such “latent tendencies are in our *gati*. *Anusaya* and “*gati*” are closely related. See, “[The Law of Attraction, Habits, Character \(Gati\), and Cravings \(Asavas\)](#)” and “[Āsava, Anusaya, and Gati \(Gathi\)](#).”

- Everyone has a set of *gati* (habits/character qualities). Each person has his/her own set of things/activities that she likes and dislikes. Some of these are not moral or immoral.
- But we also have moral (ethical) *gati* and corrupt (bad) *gati*. Here moral/immoral have a wide range, and we will discuss that later. But those deeds have *kammic* consequences. Those are the *gati* that are relevant.

13. **By the way, notice that now we are talking about a “person” or a “self” who has *sakkāya diṭṭhi* (and *gati* and *anusaya*)!** That is why it is incorrect to say that there is “no-self” either.

- When we keep doing what we are used to, that habit will only GROW. That also means *anusaya* will grow and that growth due to the activity is “*anuseti*.”
- *Arahants* do not have moral/immoral *gati* but *kammically* neutral *gati* (habits). Such practices include doing things in specific ways.

Rāga Anusaya Grows by Getting Attached to Mind-Made *Sukha Vedanā* or *Somanassa Vedanā*

14. What the *sutta* states in verse #10 are the following. When a “pleasing *ārammaṇa*” comes to the mind, it may delight in that *ārammaṇa*. If so, it will welcome that *ārammaṇa* and “get absorbed in it.” That means the person would think highly about it, speak highly about it, and act on it to sustain that *ārammaṇa*.

- For example, if X sees an object that X likes, X will keep looking at it and start thinking about how good it is. X may tell another how good it is. Even later on, X may plan to experience that sight again. Those activities involve *vacī* and *kāya saṅkhāra*.
- That is how the *Paṭicca Samuppāda* starts with “*avijjā paccayā saṅkhāra*” and “*saṅkhāra paccayā viññāṇa*.”
- Here, *avijjā* is the ignorance of believing that there is a “self” experiencing that sensory input.

Those *Viññāṇa* Are *Kamma Viññāṇa*

15. We remember that there could be six types of *viññāṇa* in the INITIAL sensory event that takes place due to *kamma vipāka*. Those are *cakkhu*, *sota*, *ghāṇa*, *jivhā*, *kāya*, or *mano viññāṇa*. They are ALL *vipāka viññāṇa*, which makes one aware of the sensory input.

- However, *viññāṇa* in “*saṅkhāra paccayā viññāṇa*” generates *kamma viññāṇa*. Such *saṅkhāra* are specifically *abhisāṅkhāra*. Such *kamma viññāṇa* can ONLY be *mano viññāṇa*, i.e., they involve only the mind. They have embedded energy because that person has decided to take further steps to enjoy that sensory experience again and again.
- In the *Abhidhamma* language, *saṅkhāra* have *javana* power. They create *kammic* energy for that *kamma viññāṇa*.
- In other words, that “person” has to spend time and effort to enjoy that sensory experience again. He has now created a “*kamma bija*” or expects a specific outcome.

16. For example, if a person X saw and “attached” to an expensive item in a store, X would talk about it with the spouse and make plans to come up with the money to pay for it. Until X buys that item, that “*viññāṇa*” will be there. The critical point here is that X already HAD a *rāga anusaya* for it, and by engaging in those follow-up activities, X “added” more energy to that. That addition is “*anuseti*.”

- Different people have different types of *anusaya*. That is why not everyone attaches to a given *ārammaṇa*. Furthermore, each person’s levels of *anusaya* CAN change with time. That *anusaya* can be REMOVED too, which is the way to *Nibbāna*.
- As you can imagine, the other two types of *anusaya* will “build up” the same way. With a “bad” *ārammaṇa*, *dosa* or anger arises, and *paṭighānusaya* (*paṭigha anusaya*) strengthens.
- Finally, the *avijjānusaya* (*avijjā anusaya*) builds up when acting with *avijjā*. We will discuss more of that in the next post.

Difference Between *Diṭṭhi Vipallāsa* and *Saññā Vipallāsa*

I do not want to leave this post without clarifying the following point.

17. In the discussion forum at puredhamma.net, a legitimate question was asked: “Since a *Sotāpanna* has removed *sakkāya diṭṭhi*, why is that a *Sotāpanna* would still value sensory pleasures, and may even commit some immoral deeds?”

- As we know, a *Sotāpanna* is incapable of doing ONLY “*apāyagāmi*” deeds that could lead to rebirths in the *apāyā* (plural of *apāya*.)
- There is a difference between “SEEING” (*diṭṭhi*) the real nature of this world and having corresponding PERCEPTIONS (*saññā*) about that real nature. It is essential to understand what is meant by *saññā*; see “[Saññā – What It Really Means](#).”

- The Pāli word “*vipallāsa*” means “confusions” or “distortions.” Wrong views lead to *diṭṭhi vipallāsa* and wrong perceptions lead to *saññā vipallāsa*. More details at “[Vipallāsa \(Diṭṭhi, Saññā, Citta\) Affect Saṅkhāra.](#)”
- With that terminology, a *Sotāpanna* has removed *diṭṭhi vipallāsa* but still has *saññā vipallāsa*.

18. In other words, the wrong views about a “self” (*sakkāya diṭṭhi*) go away at the *Sotāpanna* stage. But the perception of a “self” (*asmi māna*) goes away in stages and disappears only at the *Arahant* stage.

- *Saññā vipallāsa* goes away at the *Anāgāmi* stage, and *citta vipallāsa* (together with *asmi māna*) is removed at the *Arahant* stage. See “[Vipallāsa \(Diṭṭhi, Saññā, Citta\) Affect Saṅkhāra.](#)”
- **That is also why we CAN NOT say that “there is no-self.”** Until the attainment of *Arahanthood*, there is a perception of a “self.”
- **The critical point is that It is wrong to approach the analysis of sensory experiences based on a “self” or “no-self.” Instead, we can explain everything regarding causes and effects or *Paṭicca Samuppāda*.**
- Then it will also become clear that the Pāli word “*attā*” does not really mean a “self” or a “soul” or a “*ātma*.”

10.9.1 Taṇhā – The Origin of Suffering

November 9, 2019

Taṇhā Is Attachment, Not Craving

1. *Taṇhā* is a badly misunderstood Pāli word. The common translation is “craving,” and that is wrong. The craving usually is associated with a pleasurable *ārammaṇa*.

- *Taṇhā* means attachment to ANY *ārammaṇa*. It could be something that one likes OR dislikes OR even neutral (it may be just curiosity.)
- We may attach to a beautiful object or a person to varying degrees. It could just mean pausing to take a “second look” at something. It could be a much stronger attachment like “falling in love at first sight” with a person.
- But we also stop and take a second look at a person who just got run over by a car and died. That is not a pleasant sight, but we still got “attached” to that sight. We may think about it for a little while and then forget about it. But seeing one’s worse enemy on the street will lead to a stronger “attachment.” One may generate repulsive thoughts and may even say something harsh to that person.
- The point is that *taṇhā* leads to further “mind action” or “conscious thoughts” about a *ārammaṇa*. We discussed that in, “[Kāma Guna – Origin of Attachment \(Taṇhā\)](#).”

Taṇhā – The Origin of Suffering

2. *Taṇhā* is also the origin of future suffering. The Buddha defined the “origin of suffering” or “*dukkha samudaya*” as follows in his first discourse, “[WebLink: suttacentral: Dhammacakkappavattana Sutta \(SN 56.11\)](#)”: “*Idaṁ kho pana, bhikkhave, dukkhasamudayaṁ ariyasaccaṁ—yāyaṁ taṇhā ponobbhavikā nandirāgasahagatā tatrataṭṭhābhiniṇṇā, seyyathidaṁ—kāma taṇhā, bhava taṇhā, vibhava taṇhā.*”

- **Translated:** “*Bhikkhus*, what is the **Noble Truth of the origin of suffering**—It is attachments (*taṇhā*) based on seeking delight (*nandirāga*) in various things here and there, which leads to rebirth—that is, attachments to sensual pleasures (*kāma taṇhā*), to the existence (*bhava taṇhā*), and the view of a single life (*vibhava taṇhā*.)
- The three types of *taṇhā* discussed at “[Kāma Taṇhā, Bhava Taṇhā, Vibhava Taṇhā](#).”

3. Interestingly, in the “Cūḷavedalla Sutta (MN 44), the same verse describes the origin of *sakkāya diṭṭhi*: “***sakkāyasamudayo*** *sakkāyasamudayo’ti, ayye, vuccati. Katamo nu kho, ayye, sakkāyasamudayo*

vutto bhagavatā” ti? “Yāyaṃ, āvuso visākhā, **taṇhā** ponobbhavikā nandīrāgasahagatā tatratatrābhinandinī, seyyathidaṃ—**kāma taṇhā bhava taṇhā vibhava taṇhā**; ayaṃ kho, āvuso visākhā, sakkāyasamudayo vutto bhagavatā” ti.

- That is not surprising since all immoral actions originate with the wrong view that worldly pleasures need to be pursued at any cost.
- If one does strong immoral deeds (*pāpa kamma*), one will be eligible for suffering in the *apāyā*. Even the desire to enjoy sensory pleasures will bind one to the *kāma loka*. The desire for *jhānic* pleasures leads to getting trapped in *rūpa* and *arūpa loka*. But there is no long-term happiness anywhere in any realm.
- That is because regardless of where the next birth is, one is not free from the *apāyā* in the long run. The possibility of rebirth in the *apāyā* will be there until one attains the *Sotāpanna* stage by removing *sakkāya diṭṭhi*. All possible suffering ends when one fully comprehends *dukkha samudaya* at the *Arahant* stage. We will discuss that in detail in the future.

The Meaning of *Taṇhā* (*Pada Nirutti*)

4. Many Pāli words have their meanings in the word itself. Uncovering the meaning of a word that way is “*pada nirutti*.” For example, “*sakkāya*” comes from “*sath*” + “*kāya*” or taking an aggregate of things or a collection (*kāya*) to be beneficial (*sath*.) That is why *sakkāya diṭṭhi* originates when one considers that the five aggregates to be one’s own and thus beneficial. [**nirutti** : (f.) [Sk. nirukti, nis+vac] one of the Vedāṅgas (see *chāṅga*), explanation of words, grammatical analysis, etymological interpretation; pronunciation, dialect, way of speaking, expression.]

- *Taṇhā* means getting “fused” or firmly attached. The word *taṇhā* comes from two words. “*Thāna*” (pronounced like “thatch”) means “place” (තැන in Sinhala) and “*hā*” meaning getting fused/welded or attached (හානි in Sinhala). Note that “*tan*” in *taṇhā* pronounced like in “thunder” and “*hā*” is pronounced like in “harm.”
- That is consistent with the meaning derived from the *Chachakka Sutta*. See “[Kāma Guna – Origin of Attachment \(Tanhā\)](#).”

Three Types of *Taṇhā*

5. The verses in #2 and #3 refer to three types of *taṇhā*. They are *kāma taṇhā*, *bhava taṇhā*, *vibhava taṇhā*.

- Each category represents the origin of a particular way attachment can happen. As we can imagine, *kāma taṇhā* originates due to our inherent *kāma guṇa*. There are sights, sounds, smells, tastes, touches, and *dhammā* that we like to experience. If access to such things is blocked, we again get attached, but this time with anger.
- *Bhava taṇhā* arises in those who believe in rebirth. They would like to be born as a human, *deva*, or a *Brahma* based on their *gati*.
- Those who do not believe in rebirth have *vibhava taṇhā*.
- Let us discuss them briefly.

Kāma Taṇhā

6. In *kāma loka*, all five physical sense faculties are present. Getting attached to anything via the five sense faculties is *kāma taṇhā*.

- Furthermore, attachment arising from the desire to enjoy taste, smell, and body touch can happen only in *kāma loka*. Those three require a “solid body” as we can imagine.

- In the *rūpa lokas*, living beings do not have “solid bodies.” Yet, they can see and hear without having physical eyes or ears.
- Therefore, in *rūpa lokas*, *taṇhā* arise only due to sights and sounds. Thus an *Anāgāmi*, who will be born in a *rūpa loka* has some *rūpa taṇhā* and *sadda taṇhā* because he/she may like to see a Buddha statue or listen to a discourse.
- In *arūpa lokas*, there is only the mind. Therefore, an attachment can be only to *dhammā*.

Bhava Taṇhā

7. **Bhava taṇhā** arises from attachment to “any existence.” Thus *bhava taṇhā* is present in *kāma loka*, *rūpa loka*, and *arūpa loka*, i.e., all 31 realms.

- Even in the *kāma loka*, there may be people who do not enjoy the “*kāma*” or sense pleasures; but they still want to live a quiet, peaceful life. They mostly have *bhava taṇhā*. They may like to be in a secluded place, cultivating *jhāna*; that is their desired “*bhava*.” If they develop *jhānā*, they will be born in *rūpa loka* or *arūpa loka* due to their new “*gati*.”
- There are other subtle forms of “*bhava*” too. Some like to become famous, earn a title, to get a high-profile job or a responsibility, etc. These attachments are not associated with sensual pleasures. They are also due to *bhava taṇhā*.

Vibhava Taṇhā

8. **Vibhava taṇhā** arises from the wrong view of materialism (*uccheda diṭṭhi* in the time of the Buddha; *uccheda* pronounced “*uchcheda*”). One believes that life ends at death. Here the mind is assumed to a byproduct of the body (brain). And thus, when the body dies, that is the end of the story.

- Therefore one believes that one needs to enjoy all possible pleasures of this life before dying. Such a person would typically have *kāma taṇhā* as well as *vibhava taṇhā*.
- It is easy to have *vibhava taṇhā* in modern society. That is especially true if one has not heard about the Buddha's message about a more complex world with 31 realms and a rebirth process. Our human sensory faculties cannot access such “hidden” aspects of this world. One believes only what one can see.

Taṇhā Does Not Directly Lead to Rebirth

As we have seen in previous posts, for an average human, SOME *ārammaṇa* WILL automatically generate *taṇhā* within a split second. Only in an *Arahant*, *taṇhā* would NOT arise for ANY *ārammaṇa*. That is a crucial message of the *Chachakka Sutta* (MN 148.)

9. However, *Taṇhā* does not directly lead to rebirth (new existence). *Paṭicca Samuppāda* does not say, “*Taṇhā paccayā bhavo*.” Instead, it is, “*Taṇhā paccayā upādāna*,” followed by “*upādāna paccayā bhavo*.”

- To make a new existence (*bhava*), the mind needs to “pull that *ārammaṇa* close” and start generating conscious thoughts about it. That happens because one either likes it or dislikes it. That is the “*Taṇhā paccayā upādāna*” step.
- That “*Taṇhā paccayā upādāna*” step is a bit involved. When the mind attaches to a *ārammaṇa*, it starts “examining” that *ārammaṇa*. That “examination” involves *vitakka/vicāra* or *vacī saṅkhāra*.
- That is when one STARTS acting with *avijjā* and generate *saṅkhāra* (and thereby *kamma viññāṇa* via “*saṅkhāra paccayā viññāṇa*.”) That is the start of a new *Paṭicca Samuppāda* cycle.
- More details in follow-up posts at, “[Paṭicca Samuppāda – Not ‘Self’ or ‘No-Self’](#).” A simpler explanation of *Paṭicca Samuppāda* in the section, “[Paṭicca Samuppāda](#).”

All relevant posts are at, “[Origin of Life](#).”

10.9.2 Paṭicca Samuppāda – A ‘Self’ Exists Due to Avijjā

November 16, 2019; November 17, 2019

Introduction

1. The “[WebLink: suttacentral: Chachakka Sutta \(MN 148\)](#)” discusses six parameters associated with each of six entities. The six parameters are internal *āyatana*, external *āyatana*, *viññāṇa*, *phassa*, *vedanā*, *taṇhā*. They are associated with each of the six types of internal *āyatana* we have: *cakkhu*, *sota*, *ghāṇa*, *jivhā*, *kāya*, and *mano*. Thus, there are thirty-six entities discussed.

- The focus of attention is *ārammaṇa*. For example, a woman walking in a shopping mall stops and looks at a dress in a shop window. A dress in the window has caught her attention. That dress is *ārammaṇa*.
- We MAY get attached (*taṇhā*) to a *ārammaṇa* coming through any of the six senses. That “**getting attached or getting stuck**” (*taṇhā*) to that *ārammaṇa* happens, **for example with *cakkhu***, via the following process. “***Cakkhuṅca paṭicca rūpe ca uppajjati cakkhuvīññāṇaṃ, tiṇṇaṃ saṅgati phasso, phassa paccayā vedanā, vedanā paccayā taṇhā.***”
- We discussed that process in detail in the earlier posts of the sub-section “[Worldview of the Buddha](#).”

Taṇhā (Getting Stuck to a Ārammaṇa) Happens Instantaneously

2. An “eye-catching object” is a *rūpa ārammaṇa* or *rūpārammaṇa* (a new word). With a *rūpārammaṇa*, a *cakkhu viññāṇa* (sensation of seeing) arises via “***cakkhuṅca paṭicca rūpe ca uppajjati cakkhuvīññāṇaṃ.***” (In the same way, *saddārammaṇa*, *ghāṇārammaṇa*, *jivhārammaṇa*, *kāyārammaṇa*, *dhammārammaṇa* give rise to *sotaviññāṇa*, *ghanaviññāṇa*, *jivhāviññāṇa*, *kāyaviññāṇa*, and *manoviññāṇa*.)

- Within a split-second of that, **the mind COULD be stuck (*taṇhā*)** in that *ārammaṇa*.
- If that *ārammaṇa* is mind-pleasing, the mind MAY attach (“getting stuck” could be a better way to say it) via greed. If it is repulsive, “getting stuck” MAY occur via anger. Even if it is a neutral *ārammaṇa*, “getting stuck” can happen with ignorance.
- I know I keep repeating same things. But repetition is KEY to retention.
- Even though we focused on the *Chachakka Sutta*, the above sequence of events is in many *suttā*. Some of the prominent *suttā* are MN 18, SN 12.43 through SN 12.45, and several *suttā* in SN 35. **It is critical to understand that this process happens automatically within a split-second.**

Taṇhā Arises Due to Sakkāya Diṭṭhi (Diṭṭhi Vipallāsa) AND Asmi Māna (Saññā Vipallāsa)

3. The sequence of events in #1, #2 does not require a “self.” That sequence happens in an instant without any CONSCIOUS thinking.

- IF an attachment or “getting stuck” (*taṇhā*) results, that is because one has “*gati*” to attach to such a *ārammaṇa*. That is there because one has wrong views of a “self” (*sakkāya diṭṭhi* or *diṭṭhi vipallāsa*) AND also the wrong perception (*saññā vipallāsa*) of a “self.”
- The wrong view of a “self” goes away at the *Sotāpanna* stage, and the incorrect perception of a “self” (*saññā vipallāsa*) goes away entirely only at the *Arahant* stage.
- With the removal of *sakkāya diṭṭhi*, the tendency to do “*apāyagāmi* deeds” will stop. However, until the *Arahant* stage, one will still have *saññā vipallāsa*, and thus *asmi māna*, and will be capable of doing less severe immoral deeds (*akusala kamma*).
- That was discussed together with the terms *diṭṭhi vipallāsa* and *saññā vipallāsa* in the post, “[An Apparent ‘Self’ Is Involved in Kamma Generation](#).” It may be a good idea to re-read that post and also

the post, "[Vision Is a Series of "Snapshots" – Movie Analogy](#)." There is no self" in ultimate reality, but one will have a sense or perception of a "self" until attaining the *Arahant* stage.

Taṇhā – The Origin of Suffering

4. The previous post ("[Taṇhā – The Origin of Suffering](#)") I pointed out **TWO** critical facts:

- **FIRST**, *taṇhā* (attachment or "getting stuck" to various *ārammaṇa*) is the **ORIGIN** of suffering. That is the First Noble Truth on suffering. That *taṇhā* could be due to a pleasing OR unpleasant *ārammaṇa*.
- However, *taṇhā* by itself, **CANNOT AUTOMATICALLY** lead to suffering. If that were the case, no one would be able to attain *Nibbāna*. That is because, as we have discussed, *taṇhā* happens within a fraction of a second of capturing the *ārammaṇa*.
- Therefore, the **SECOND** critical fact is the following. **Unless one pulls that *ārammaṇa* in and starts thinking about it (*vitakka/vicāra*)**, one **WILL NOT** accumulate *abhisankhāra* (and thus *kamma viññāna*.) That would be done with *avijjā* (with the wrong perception of a 'self.') [*vitakka/vicāra* is of *akusala* type while *savitakka/savicāra* is of *kusala* type]
- That second process takes place starting with the "*taṇhā paccayā upādāna*" step in *Paṭicca Samuppāda*. We will discuss this below.

There is a "Self" Doing *Kamma* With Wrong Views and Wrong Perceptions

5. That is why it is not correct to say that there is "no-self." For anyone who has not yet attained the *Arahant* stage, the perception of a "self" is there. See, "[An Apparent "Self" Is Involved in Kamma Generation](#)."

- As we discussed, *taṇhā* (getting attached to or "getting stuck" with a *ārammaṇa*) **NEVER** arises in an *Arahant* based on ANY *ārammaṇa*. That is automatic. It is not that he/she consciously avoids *taṇhā* at that moment. The key is that an *Arahant* has removed ALL "*gati*" leading to any attachment (*taṇhā*).
- **The key to understanding *Paṭicca Samuppāda* is to comprehend how *gati* can be removed (and thereby *taṇhā* stopped).** We will be discussing this in the next few posts.

Dukkha Nirodha (Stopping of Future Suffering) is Cessation of *Taṇhā*

6. The Buddha defined the "stopping or the cessation of suffering" or "*dukkha nirodhaya*" (Third Noble Truth) as follows in his first discourse, "[WebLink: suttacentral: Dhammacakkappavattana Sutta \(SN 56.11\)](#)": "*Idaṃ kho pana, bhikkhave, dukkhanirodham ariyasaccam—yo tassāyeva taṇhāya asesavirāgaṇirodho cāgo paṭinissaggo mutti anālayo.*" [*asesa* :[adj.] entire; all. *cāgo* : abandoning, forsaking; resigning, sacrificing, giving away; self-sacrifice, liberality. *paṭinissaggo* : forsaking, getting rid of. *mutti* :[f.] release; freedom.]

Translated: "*Bhikkhus*, what is the Noble Truth of the cessation of suffering—**it is the complete cessation of *taṇhā***, the giving up and relinquishing of it, freedom from it by losing all desires (also called "*āsava*") for things in this world (*anālayo*).

- The word *anālaya* comes from *na* + *ālaya* or "not desiring." As we have discussed, one attaches (*taṇhā*) to a *ārammaṇa* via greed only because one craves for and desires things with *kāma guṇa*. If one is blocked from getting that then one may "attach" with anger. Therefore, craving or desire is at the root of *taṇhā*. *Dosa* (or *patigha*) is the "second manifestation of *lobha* or greed. See, "[Kāma Guṇa – Origin of Attachment \(Taṇhā\)](#)." [*ālaya* :[m.] 1. abode; roosting place; 2. **desire; attachment**; 3. pretence.]
- That is why *Nibbāna* is also "*āsavakkhaya*" or "*āsava*" + "*khaya*" or "removal of "*āsava*."

- I try to introduce these key Pāli words gradually and as needed.

***Paṭicca Samuppāda* – Both “Self” and “No-Self” Are Incorrect Approaches**

7. It is not beneficial to start with the concept of either a “self” or “no-self.” But we HAVE TO use terms like “our thoughts,” “he spoke,” and “she did that,” etc. That is because those things ARE DONE by an average human with the perception of a “self.” **Besides, we CANNOT communicate with each other without using such terminology.** Even the Buddha said things like, “I will go there” or “I was born in such an existence in the past.”

- But we need to “see” and understand the following. **Causes (old *kamma*) and conditions (*paccayā*) lead to results (*kamma vipāka*).** Then, based on such *vipāka*, **we take actions** that create new *kamma*, which, in turn, will bring more *vipāka*. That is how the rebirth process continues!
- **The wrong view (*sakkāya diṭṭhi*) and wrong perception (*asmi māna*) of a “self” leads to such activities.** *Paṭicca Samuppāda* explains that process.
- As long as one has those wrong views and perceptions of a “self,” one will have certain *gati* (character.) Based on those *gati*, causes (*kamma*) for future results (*vipāka*) accumulated. When those *vipāka* bring results, more *kamma* generated. So, there is no end to this cyclic process. That is why there is no end to that cycle of *kamma* and *vipāka*!
- Those *gati* will diminish as one starts comprehending the true nature of this world. With that comprehension, wrong views and perceptions will lessen and eventually go away. That is the way to *Nibbāna*. It starts with *Sammā Diṭṭhi* (removal of *sakkāya diṭṭhi*), seeing the true nature of this world. Of course, one must first get rid of the ten types of *micchā diṭṭhi* to get to mundane *Sammā Diṭṭhi*. See, [“Buddha Dhamma – In a Chart.”](#)

The sequence of Events In #1 Above Are in *Paṭicca Samuppāda*

8. The Pāli verse in #1 above from the *Chachakka Sutta* is “*cakkhuñca paṭicca rūpe ca uppajjati cakkhuviññāṇaṃ, tiṇṇaṃ saṅgati phasso, phassa paccayā vedanā, vedanā paccayā taṇhā.*” The steps stated in that verse are the same as “*salāyatana paccayā phasso, phassa paccayā vedanā, vedanā paccayā taṇhā*” in *Paṭicca Samuppāda*.

- The steps “*cakkhuñca paṭicca rūpe ca uppajjati cakkhuviññāṇaṃ, tiṇṇaṃ saṅgati phasso*” in the *Chachakka Sutta* merely describe in more detail what happens with the “*salāyatana paccayā phasso*” step in *Paṭicca Samuppāda*. Of course, “*salāyatana*” refers to all six sensory inputs, and *cakkhu* in “*cakkhuñca paṭicca rūpe ca uppajjati cakkhuviññāṇaṃ, tiṇṇaṃ saṅgati phasso*” refers to one of those six.
- ***Paṭicca Samuppāda* cycle usually does not start with “*avijjā paccayā saṅkhārā.*”** There must be a REASON to begin acting with *avijjā*. The reason is “getting attached to sensory input,” i.e., *taṇhā*. And that happens because we have certain “*gati*” that have been built-up over past lives due to the ignorance of the Four Noble Truths, i.e., due to *avijjā*!
- Initial “attachment” (*taṇhā*) ALWAYS happens with the steps discussed in the *Chachakka Sutta* and embedded in the above verse. Any of the six sensory inputs can trigger it, and the sixth one is *mano*: “*mānañca paṭicca dhamme ca uppajjati manoviññāṇaṃ, tiṇṇaṃ saṅgati phasso, phassa paccayā vedanā, vedanā paccayā taṇhā.*”
- **Therefore, it is essential to realize that in real life, *Paṭicca Samuppāda* does NOT start with “*avijjā paccayā saṅkhārā.*” It begins with “*salāyatana paccayā phasso*” and proceeds to “*phassa paccayā vedanā, vedanā paccayā taṇhā.*”**
- It is only at that stage that a given “person” may start acting with *avijjā* and thus start the complicated step, “*taṇhā paccayā upādāna.*”

Based on Attachment (*Taṇhā*), One Starts Acting With *Avijjā*

9. Let us discuss that critical step, “*taṇhā paccayā upādāna*.”

- *Taṇhā* means attaching or “getting stuck” with a particular *ārammaṇa*. It is not correct to say that *taṇhā* is “craving.” When one sees an enemy, one does not generate *taṇhā* via craving. Instead, the mind gets “stuck” in that *ārammaṇa* of an enemy with anger or dislike.
- If it is a “good *ārammaṇa*,” the mind will try to enjoy it more. If it is distasteful, then it will try to stop that. Either way, mind MAY generate (*abhi*) *saṅkhāra* with *kammic* consequences.
- For example, a person with a tendency (*gati*) to engage in stealing may try to steal an “eye-catching item” from a store. Stealing is a bad *kamma*, and thus he/she will accumulate “bad *kamma*” that could bring “bad *vipāka*” in the future.

What Does *Upādāna* Mean?

10. *Upādāna* means “pulling the *ārammaṇa* closer (in one’s mind)” (“*upa*” + “*ādāna*,” where “*upa*” means “close” and “*ādāna*” means “pull”).

- Once getting attached (*taṇhā*) to a *ārammaṇa*, we do not let it go. The mind “pulls that *ārammaṇa* in.” First, we start consciously thinking about it and may talk about it. Both those involve *vacī saṅkhāra* (*vitakka/vicāra*).
- If we get “worked up,” we may take bodily actions. We may hug a person we like or hit a person we don’t like. *Kāya saṅkhāra* in mind LEAD TO such physical actions. The brain helps carry out actions according to those intentions that arise in mind. See, “[Brain – Interface between Mind and Body](#).”
- By the way, *mano* (or *citta*) *saṅkhāra* automatically comes to our minds. They involve *vedanā/saññā*. They do not involve conscious thinking (*vitakka/vicāra*).
- It is with the “*taṇhā paccayā upādāna*” step that we start doing “*avijjā paccayā saṅkhāra*” and start a new *Paṭicca Samuppāda* cycle.
- We will discuss *saṅkhāra* in detail in the next post.

10.9.3 Kamma, Saṅkhāra, and Abhisāṅkhāra – What Is “Intention”?

November 23, 2019; revised July 8, 2022; August 27, 2022

Saṅkhāra Create Causes for Future Suffering

1. *Paṭicca Samuppāda* (PS) describes how future suffering arises due to *saṅkhāra* done with *avijjā*. Intention plays a big role, and it depends on one level of *avijjā*.

- The PS cycle starts with “*avijjā paccayā saṅkhārā*” and ends with “*jāti paccayā jarā, maraṇa, soka-parideva-dukkha-domanassupāyāsā sambhavan’ti*.” And then it says, “*Evametassa kevalassa dukkhakkhandhassa samudayo hoti*.” or “that is how this whole mass of suffering arises.”
- Therefore, the PS cycle generally addresses ALL TYPES of future suffering. That includes bad *kamma vipāka* DURING a given life and stronger *kamma vipāka* that lead to future REBIRTHS. In particular, rebirths in the four lowest realms (*apāyā*) lead to the worst kinds of suffering.
- All these FACTS appear in a long list of short *suttā* (plural of *sutta*) in the *Aṅguttara Nikāya* (10), starting with the “[WebLink: suttacentral: Sādhū Sutta \(AN 10.134\)](#)” and ending at AN 236 (over one hundred *suttā*!)
- I have translated several of them to English at, “[Aṅguttara Nikāya – Suttā on Key Concepts](#).”

Suffering (and Pleasures) Arise Due to *Kamma Vipāka*

2. According to those *suttā*, suffering (*dukkha*) arises due to the *vipāka* (results) of *akusala kamma* or *apuñña kamma* (simply translated as immoral deeds.)

- In the same way, pleasures (*sukha*) result from *kusala kamma/puñña kamma* (simply translated as moral deeds.)
- **There is a big difference between *kusala kamma* and *puñña kamma*.** See, “[Kilesa – Relationship to Akusala, Kusala, and Puñña Kamma](#).”
- **Until then, we may use *kusala/puñña* and also *akusala/apuñña* without much distinction.** So, at this point, we are just assuming that *kusala/puñña kamma* are “good” and *akusala/apuñña kamma* are “bad.”
- Even though we loosely translate *kusala/akusala kamma* as *moral/immoral deeds*, *kammā* are done via **bodily actions, speech, or thoughts.**

Dasa Akusala – Seeds for Future Suffering

3. At a fundamental level, the Buddha identified three categories of *akusala kamma*. Those done with **bodily actions** (*kāya kamma*) are killing, stealing, sexual misconduct. There are four types of *kamma* done with **speech** (*vacī kamma*.) They are lying, slandering, harsh speech, and gossiping. Finally, three types done with **thoughts** (*mano* or *citta kamma*) are excess greed, excess anger, and wrong views.

- Those ten types of *akusala kamma* (***dasa akusala***) in Pāli are: *Pāṇātipāto, adinnādānaṃ, kāmesumicchācāro, musāvādo, piṣuṇā vācā, pharusā vācā, samphappalāpo, abhijjhā, byāpādo, micchā diṭṭhi*.
- Those are the ten types of *akusala kamma* separated into three categories.

All Types of *Kamma* Originate In the Mind

4. When we look at the ten types of *akusala kamma*, we can see why *kamma* DOES NOT mean JUST bodily actions. The way of THINKING and SPEAKING, contribute to the accumulation of *kamma* which can bring *vipāka* in the future.

- It is critically important to understand this point. Some people speak very nice words and even appear to be engaged in “good deeds” but have very bad intentions/mindsets. For example, someone may pretend to speak nicely but could be thinking bad thoughts to him/herself about the person they are talking to. See, “[Correct Meaning of Vacī Saṅkhāra](#).”
- Going through the motions of good actions/speech DOES NOT count for GENERATING good *kammic* energy.

The Buddha clarified this point very clearly. In the [WebLink: suttacentral: Nibbedhika Sutta \(AN 6.63\)](#): “***Cetanāhaṃ (cetanā ahaṃ)***, bhikkhave, kammaṃ vadāmi. ***Cetayitvā*** kammaṃ karoti—***kāyena vācāya manasā***.”

That means: “**Intention, I tell you**, is *kamma*. One does *kamma* **with intention (in mind)**—via **body, speech, and thoughts.**

- Therefore, *kammic* ENERGY for ALL ten types of *kamma* are GENERATED in mind. **Stated another way: MIND creates *kammic* energy associated with all ten types of *kamma*.**
- I cannot emphasize enough the importance of understanding this CRITICAL point.

Intentions are in *Saṅkhāra*

5. It is *cetanā* in *javana citta* that PREPARES *kamma viññāṇa* or *kamma bīja* using various types of *cetasika*. Such *kamma viññāṇa* or *kamma bīja* are PART OF *dhammā*.

- Some *dhammā* are just memories. see “[Dhammā, Kamma, Saṅkhāra, Mind – Critical Connections.](#)”

6. What we discussed in #4 above can be stated in Buddha's terminology. **The mind generates three types of *saṅkhāra*: *mano*, *vacī*, and *kāya saṅkhāra*. All three types of *saṅkhāra* arise in mind.**

- How do those intentions end up as speech and bodily actions?
- It is the brain that “carries out” bodily movements and speech INTENDED in *kāya saṅkhāra* and *vacī saṅkhāra*. The brain gets the body parts to move with the help of the muscles and the nervous system. Speech, similarly, is generated via the movement of the tongue and the muscles in the mouth area.
- Therefore, *kāya saṅkhāra* LEAD to *kāya kamma* (killing, stealing, sexual misconduct.) *Vacī saṅkhāra* LEAD to *vacī kamma* (lying, slandering, harsh speech, and gossiping.) *Mano* (or *citta*) *saṅkhāra* LEAD to *mano* (or *citta*) *kamma* (excess greed, excess anger, and wrong views.)

Mind/Physical Body to Pilot/Airplane Analogy

7. The seat of the mind (*hadaya vatthu*) is where thoughts arise. The *hadaya vatthu* is part of the *manomaya kāya*, mental body, or the *gandhabba*. The *hadaya vatthu* is in constant contact with the brain.

- In other words, the MIND decides what to do, and the brain carries out those commands. An analogy is how an airplane flies. The pilot decides on where to go, and the onboard computer carries out those commands.
- More details are in “[Brain – Interface between Mind and Body.](#)”
- Modern scientific evidence on the importance of the *hadaya vatthu* is only at an early stage. The following quote is from “[WebLink: heartmath.org: Exploring the Role of the Heart in Human Performance.](#)” “The heart is the most powerful source of electromagnetic energy in the human body, producing the largest rhythmic electromagnetic field of any of the body's organs. The heart's electrical field is about 60 times greater in amplitude than the electrical activity generated by the brain.”
- However, *hadaya vatthu* is NOT the heart. It is in the mental body (*gandhabba*) but close to the physical heart.

Not All *Saṅkhāra* Will Have *Kammic* Consequences

8. Even though *Paṭicca Samuppāda* just states, “*avijjā paccayā saṅkhārā*,” not all *saṅkhāra* will have *kammic* consequences. Stated differently: We do not act with *avijjā* all the time.

- For example, ANY bodily movement involves *kāya saṅkhāra*. If one's mind decides to stand up, the brain gets that done by moving leg muscles. That does not have any *kammic* energy to bring future *vipāka*. Therefore, not all bodily actions have *kammic* consequences.
- ***Saṅkhāra* with *kammic* consequences are “strong *saṅkhāra*” or “*abhisāṅkhāra*.”** Let us discuss that in detail first.

Good or Bad *Cetasika* Responsible for “Intention” – *Cetanā* Is in Every *Citta*

9. If you swing your arm, that is a *kāya kammā* because that action involves moving a body part. That action was initiated by *kāya saṅkhāra* generated in mind. But that does not have *kammic* consequences (except for the movement of the arm.)

- Now, if you swung your arm to get hold of a cup, that is also a *kammically* neutral action (*kammā*) or just a *saṅkhāra*. You did not do either a moral or immoral act. The intention was to grab a cup, which

did not involve any *sobhana* or *asobhana cetasika*. **That action is a *kiriya*** (*kriyā* in Sanskrit or කිරියා in Sinhala).

- On the other hand, if you swung your arm to hit someone, it was done with anger. So, the *dosa cetasika* (an *asobhana cetasika*) was in your thoughts. Thus, it was an *apuññābhisaṅkhāra* (*apuñña abhisaṅkhāra*). That *apuññābhisaṅkhāra* in the mind led to an *akusala/apuñña kammā* or an immoral deed.
- If you put your arms together to pay respects to the Buddha, it is a *puññābhisaṅkhāra* (*puñña abhisaṅkhāra*.) The *saddhā cetasika* (a *sobhana cetasika*) is in the mind. We can also call it a *kusala/puñña kammā* or a moral deed.
- Therefore, “**good or bad**” *cetasika* (mental factors) are the ones that bring **intention** to thoughts. The *cetanā cetasika* is in ALL thoughts. **The *cetanā cetasika* just incorporates the other relevant “good or bad” *cetasika* to a given thought to convey the “intention.”**

Assāsa Passāsa (Breathing) Is Kāya Saṅkhāra

10. The very basic *kāya saṅkhāra* are involved in breathing. It is also the most IMPORTANT *kāya saṅkhāra* since we cannot live without breathing.

- Any type of *saṅkhāra* involves *cetanā* and thus *saṅkhāra* involves *citta vīthi*. It does not seem like we breathe intentionally. That is because no *javana citta* are present in such *citta vīthi* associated with breathing. They are *parittārammaṇa citta vīthi*. That means they are “weak.”
- Of course, breathing has no *kammic* consequences. It is a “bodily action,” but a critically important one.

Apuññābhi saṅkhāra, Puññābhi saṅkhāra, and Āneñjābhisaṅkhāra

11. We introduced two new words above that are relevant in generating *kammic* energy: *apuññābhisaṅkhāra* and *puññābhisaṅkhāra*. Here, *apuññābhi saṅkhāra* lead to *akusala* (or *apuñña* or immoral) *kamma*. Good, moral deeds, speech, or thoughts with *kammic* energy involve *puññābhisaṅkhāra*.

- There is a third type of *abhisaṅkhāra*: *āneñjābhisaṅkhāra* (*āneñja abhisaṅkhāra*). These types of *saṅkhāra* are in the minds of those who cultivate *arūpāvacara jhāna*, the highest four *jhāna*.
- *Apuññābhisaṅkhāra* lead to rebirth in the *apāyā*. These, of course, lead to *akusala kamma*.
- *Puññābhisaṅkhāra* leads to rebirth in the human, *deva*, and *rūpāvacara Brahma* realms. *Puñña kamma* is done with such *puññābhisaṅkhāra*. Note that cultivating *rūpāvacara jhāna* is a *puñña kamma*.
- *Āneñjābhisaṅkhāra* leads to rebirths in the *arūpāvacara Brahma* realms.

Saṅkhāra in Paṭicca Samuppāda Are Abhisaṅkhāra

12. Even though the first step in *Paṭicca Samuppāda* is simply, “*avijjā paccayā saṅkhārā*,” it refers to *abhisaṅkhārā*.

WebLink: [suttacentral: Pattecasamuppāda Vibhaṅga](#), explains the term “*avijjā paccayā saṅkhārā*” in *akusala-mūla Paṭicca Samuppāda* (that leads to suffering) as follows: “*Tattha katame avijjā paccayā saṅkhārā? Puññābhisaṅkhāro, apuññābhisaṅkhāro, āneñjābhisaṅkhāro, kāyasāṅkhāro, vacīsāṅkhāro, cittasāṅkhāro.*”

Translated: “What is *avijjā paccayā saṅkhārā*? *Puññābhisaṅkhāra, apuññābhisaṅkhāra, āneñjābhisaṅkhāra, kāyasāṅkhāra, vacīsāṅkhāra, cittasāṅkhāra.*” (here, *citta saṅkhāra* is the same as *mano saṅkhāra*).

- Those are all ***abhisāṅkhāra***, even though the verse is simplified as “*avijjā paccayā saṅkhārā*.”
- Two categories of *saṅkhāra* are mentioned there. One category refers to types of *kamma* accrued (*Puññābhisaṅkhāra*, *apuññābhisaṅkhāra*, *āneñjābhisaṅkhāra*.)
- The other category points out the three modes: body, speech, or mind (*kāya saṅkhāra*, *vacī saṅkhāra*, *citta saṅkhāra*, or *mano saṅkhāra*).
- This is clarified in several *suttā* as well. for example, [WebLink: suttacentral: Saṅgīti Sutta \(DN 33\)](#): “*Tayo saṅkhārā—puññābhisaṅkhāro, apuññābhisaṅkhāro, āneñjābhisaṅkhāro*.”

13. Therefore, the word *saṅkhāra* can have different meanings in different contexts. That is why *saṅkhāra* SHOULD NOT be translated as just “mental formations.”

- I hope you can see that translating *saṅkhāra* as just “mental formations” does not provide much insight. Once one understands the basic concepts discussed above, it will be easier to see the real meaning of different types of *saṅkhāra*.
- We will discuss *kāya*, *vacī*, and *mano saṅkhāra* in detail in the next post. Then the critical connection of *vitakka/vicāra* with *vacī saṅkhāra* will become clear.
- Also, see “[Complexity of the Mind – Viññāṇa and Saṅkhāra](#)” and “[Kamma are Done with Saṅkhāra – Types of Saṅkhāra](#).”

10.9.4 Vacī Saṅkhāra – Saṅkappa (Conscious Thoughts) and Vācā (Speech)

November 30, 2019; December 1, 2019 (new #14 also added); July 17, 2021; September 10, 2022 (esp. #11)

Introduction

1. *Vacī Saṅkhāra* is looking into a *ārammaṇa* deeper (*vitakka*), and, in detail (*vicāra*). We introduced that in a previous post but will discuss it in more detail here.

- *Vācā* is, of course, speech. *Saṅkappa* has been translated as “thoughts or intention.” Here, we will see that *saṅkappa* means “thoughts with intention.” We will also discuss how *vacī saṅkhāra* relates to both *vācā* and *saṅkappa*.
- The first four steps in the Noble Eightfold Path are *Sammā Diṭṭhi*, *Sammā Saṅkappa*, *Sammā Vācā*, and *Sammā Kammanā*. One’s thoughts depend on one’s views, and one’s speech and actions depend on how one thinks. This is why *Sammā Diṭṭhi* comes first and why “having correct views” about the nature of this world is at the forefront.

2. There are various types of *saṅkhāra*. In the previous post, we discussed categorizing *saṅkhāra* in two different ways.

- Three types depending on whether they lead to bodily actions, speech, or thoughts: *kāyasāṅkhāra*, *vacīsāṅkhāra*, and *cittasāṅkhāra*.
- There are three more types according to future *vipāka*: *Puññābhisaṅkhāra*, *apuññābhisaṅkhāra*, *āneñjābhisaṅkhāra*. These are discussed at #14 below.
- Let us first review the first category briefly and then focus on *vacī saṅkhāra*. I explained *kāya* and *citta* (or *mano*) *saṅkhāra* in recent posts.

Three Types of *Saṅkhāra* Responsible for Actions, Speech, and Thoughts

3. There are succinct statements in the [WebLink: suttacentral: Cūlavedalla Sutta \(MN 44\)](#) on the types of *saṅkhāra* generated in mind:

“*Tayome, āvuso visākha, saṅkhārā—kāyasaṅkhāro, vacīsaṅkhāro, cittasaṅkhāro*”*ti.*

– There are three types of *saṅkhāra* – *kāya saṅkhāra*, *vacī saṅkhāra*, *citta saṅkhāra*.

“*Katamo panāyye, kāyasaṅkhāro, katamo vacīsaṅkhāro, katamo cittasaṅkhāro*”*ti?*

– What are *kāya saṅkhāra*, What are *vacī saṅkhāra*, What are *citta saṅkhāra* (or *mano saṅkhāra*)?

“*Assāsapassāsā kho, āvuso visākha, kāyasaṅkhāro, vitakkavicārā vacīsaṅkhāro, saññā ca vedanā ca cittasaṅkhāro*”*ti.*

– *Assāsa passāsā* are *kāya saṅkhāra*, ***vitakka vicāra* are *vacī saṅkhāra***, *saññā* and *vedanā* constitute *citta saṅkhāra*.

“*Kasmā panāyye, assāsapassāsā kāyasaṅkhāro, kasmā vitakkavicārā vacīsaṅkhāro, kasmā saññā ca vedanā ca cittasaṅkhāro*”*ti?*

– Why are the three types of *saṅkhāra* categorized in that way?

“*Assāsapassāsā kho, āvuso visākha, kāyikā ete dhammā kāyappaṭibaddhā, tasmā assāsapassāsā kāyasaṅkhāro. Pubbe kho, āvuso visākha, vitakketvā vicāretvā pacchā vācam bhindati, tasmā vitakkavicārā vacīsaṅkhāro. Saññā ca vedanā ca cetasikā ete dhammā cittappaṭibaddhā, tasmā saññā ca vedanā ca cittasaṅkhāro*”*ti.*

– *Assāsa passāsā* (breathing in and out) is associated with the body (movements). Thus, *assāsa passāsā* is *kāya saṅkhāra*.

– ***Vitakka/vicāra* arise before speech “breaks out.” Therefore, *vitakka/vicāra* are *vacī saṅkhāra*.**

– *Saññā* and *vedanā* are associated with any *citta*. Thus, *saññā/vedanā* are *citta saṅkhāra*.

No Kammic Consequences for Citta (Mano) Saṅkhāra

4. *Citta (mano) saṅkhāra* does not have strong *kammic* consequences that can result in rebirth. As mentioned above in #3, they encompass *vedanā* and *saññā*, which are in ALL *citta*. Therefore, even *vipāka citta* have *citta (mano) saṅkhāra*.

- As we discussed in the post, “[Amazingly Fast Time Evolution of a Thought \(Citta\)](#),” any thought goes through nine stages within a billionth of a second. The early stages are *citta* and *mano*. Those two stages already have *vedanā* and *saññā*.
- Bad (*asobhana*) or good (*sobhana*) mental factors (*cetasika*) are incorporated into thought **only in the latter stages of that nine-step process. Furthermore, such *cetasika* involve in those latter stages ONLY IF there is an attachment (*taṇhā*) and one is consciously thinking about a *ārammaṇa*.**
- The six steps described in the *Chachakka Sutta* happen within a split second. There is no time to “think” and thus there cannot be any *vacī* or *kāya saṅkhāra*. See #6 below.

Vacī or kāya saṅkhāra Can Lead to Abhisāṅkhāra

5. *Vacī* or *kāya saṅkhāra* MAY ALSO lead to actions that do not have *kammic* consequences. Such “harmless” *vacī* or *kāya saṅkhāra* cannot become *abhisāṅkhāra* that can bring future *vipāka*, including rebirths.

- Breathing or walking to the kitchen to get a glass of water involves such “harmless” *kāya saṅkhāra*. Thinking about what needs to be done at work tomorrow or talking to the spouse about dinner plans involves such *vacī saṅkhāra*.
- Other *kāya* and *vacī saṅkhāra* lead to actions and speech that have *kammic* consequences. Those lead to *abhisāṅkhāra*. Such *abhisāṅkhāra* “prepare or give rise to” ***saṅkhata***. Thus, *saṅkhata* are entities

that are “prepared” via *saṅkhāra* or “arise” due to *saṅkhāra*. *Paṭicca Samuppāda* describes that process and we will get to it.

No *Vacī* or *Kāya Saṅkhāra* Involved in Initial Sensory Experience

6. Some thoughts that have gone through the nine stages do not involve conscious thinking. Thus, no *vacī* or *kāya saṅkhāra* are possible in such thoughts. Those are the *vipāka citta* described in the *Chachakka Sutta* (MN 148.)

- As discussed in the recent posts, the six steps in the *Chachakka Sutta* take place due to *kamma vipāka*. During that *vipāka* stage, first, one of the six types of *viññāṇa* experienced. They all are *vipāka viññāṇa*. They are *cakkhu*, *sota*, *ghāna*, *jivhā*, *kāya*, and *mano viññāṇa*. The last step is “*vedanā paccayā taṇhā*.”
- In all those six steps, one does not get to think. They happen automatically. It is important to realize that one consciously generates *vacī* or *kāya saṅkhāra* with *sobhana* or *asobhana cetasika*. Only *mano saṅkhāra* (without *kammic* consequences) is generated in those six steps.

Paṭicca Samuppāda Starts With “*Salāyatana Paccayā Phassa*”

7. As we discussed in previous posts, the *Paṭicca Samuppāda* cycle starts not with “*avijjā paccayā saṅkhāra*,” but with “*salāyatana paccayā phassa*.” This is why we spent a lot of time discussing the *Chachakka Sutta* (MN 148.) It may be a good idea to review those posts.

- There has to be a *ārammaṇa* strong enough to generate interest. For example, seeing an attractive/repulsive figure, tasting something tasty/bitter, hearing a soothing/loud noise, etc.

8. Such *vipāka viññāṇa* come about via, “*cakkhuñca paṭicca rūpe ca uppajjati cakkhuviññāṇaṃ*” through “*mānañca paṭicca dhamme ca uppajjati manoviññāṇaṃ*” per *Chachakka Sutta*. We discussed in a previous post that those steps are equivalent to “*salāyatana paccayā phasso*, *phassa paccayā vedanā*, *vedanā paccayā taṇhā*” steps in *Paṭicca Samuppāda*. See, “[Paṭicca Samuppāda – A “Self” Exists Due to Avijjā](#).”

- In other words, during the *vipāka* stage, “*avijjā paccayā saṅkhāra*” followed by “*saṅkhāra paccayā viññāṇa*” DOES NOT take place, as we can see.
- After getting to “*vedanā paccayā taṇhā*” with the initial sensory event on a new *ārammaṇa*, the next step in the *Paṭicca Samuppāda* cycle starts. The next step is “*taṇhā paccayā upādāna*.” That is when *kamma viññāṇa* arises because we start acting with *avijjā*.
- Let us see how *vacī* and *kāya saṅkhāra* arise once one gets attached and gets “stuck” in a *ārammaṇa* (*taṇhā*.) That is the beginning of a complex process involved in the “*taṇhā paccayā upādāna*” step.

Vitakka/Vicāra Initiate *Abhisāṅkhāra*

9. When one is “stuck” with a particular *ārammaṇa*, one starts CONSCIOUSLY thinking about it. That involves *vitakka* and *vicāra* mental factors (*cetasika*.) That means one starts “looking into that *ārammaṇa* deeper (*vitakka*), and, in detail (*vicāra*).”

- We can get an idea with the following example. Suppose we go to a showroom to buy a car. If we get interested in a certain car, we scrutinize it. We ask questions from the salesman and get more information about that car. In the same way, when we get interested in any *ārammaṇa*, we start thinking about different aspects of it.
- In particular, when we like a given *ārammaṇa* (that car could be one), we start imagining how nice it would be to have it parked on the driveway and how the neighbors may be impressed by it. We often start “daydreaming” about how we will enjoy it. Those are all *vacī saṅkhāra* with *vitakka* and *vicāra*.

- Of course, we may also start talking about how good it is. Speaking out also involves *vitakka/vicāra*.
- If any of those thoughts involve “bad” (*asobhana*) *cetasika* (like greed), then such conscious thoughts become *vacī abhisāṅkhāra*.

10. If we get interested in a *ārammaṇa*, we may take action too. We may go to other showrooms to look at similar models and compare prices. We may search the internet for other car dealers in the area, etc.

- Such actions involve moving body parts. As we will see below, *kāya saṅkhāra* lead to those actions.
- If those thoughts involve “bad” (*asobhana*) *cetasika*, then such *kāya saṅkhāra* becomes *kāya abhisāṅkhāra*.
- More information at, “[Vitakka, Vicāra, Savitakka, Savicāra, and Avitakka, Avicāra.](#)” I recommend reading that post to get further details and *Tipiṭaka* references.

Saṅkappa Means Thinking and Thus Vacī Saṅkhāra

11. *Mahācattārīsaka Sutta* (MN 117): “*Katamo ca, bhikkhave, sammāsaṅkappo ariyo anāsavo lokuttaro maggaṅgo? Yo kho, bhikkhave, ariyacittassa anāsavacittassa ariyamaggasamaṅgino ariyamaggaṃ bhāwayato takko vitakko saṅkappo appanā (fixing of thought on an object) byappanā cetaso abhiniropanā (application) vacīsaṅkhāro—ayaṃ, bhikkhave, sammāsaṅkappo ariyo anāsavo lokuttaro maggaṅgo.*”

Translated: “What, *bhikkhus*, is *sammā saṅkappa* that is noble, blameless, supramundane, a factor of the noble path? The thinking, re-thinking, Noble thoughts devoid of *āsava* — in one whose mind is noble, whose mind is devoid of *āsava* (*anāsavo*), who is on the noble path. That is *sammā saṅkappa* that is noble and a factor of the path.

- Thus, it is obvious that *Sammā Saṅkappa* means generating thoughts focused on making progress on the Path.
- They are “Noble *vacī saṅkhāra*” with the comprehension of *anicca*, *dukkha*, *anatta* and thus focused on *Nibbāna*.
- **By the way, such *saṅkhāra* arise in the “*Kusala-Mūla Paṭicca Samuppāda*” starting with “*kusala-mūla paccayā saṅkhāra*.”** Note the difference from the *Akusala-Mūla Paṭicca Samuppāda* that starts with “*avijjā paccayā saṅkhāra*.” We will discuss the *Kusala-Mūla Paṭicca Samuppāda* in the future in this series. It is discussed in the *Paṭicca Samuppāda* section, “[Kusala-Mūla Paṭicca Samuppāda](#).”

Not All Saṅkhārā Are Due to Avijjā (and Taṇhā)

12. Now we can see how one starts doing *saṅkhāra due to avijjā* only IF one is attached via *taṇhā*. That is the beginning of a *Paṭicca Samuppāda* cycle: “*avijjā paccayā saṅkhārā*.”

- However, not all *saṅkhāra* create *kamma viññāṇa* that can bring good or bad *kamma vipāka*. For example, one may get thirsty (due to a *ārammaṇa*, too) and decide to go to the kitchen to get a glass of water. Walking to the kitchen involves *kāya saṅkhāra* (to get the body to move.) But that intention is neither good nor bad. It is *kammically* neutral. It was not due to *avijjā*.
- All bodily activities, including breathing, are done with *kāya saṅkhāra*. But “*avijjā paccayā saṅkhārā*” comes into play ONLY IF bad or defiled intentions are in mind. There is no *avijjā* or *taṇhā* involved in breathing or the activities mentioned above (thus they DO NOT lead to *abhisāṅkhāra*).

Apuñña Abhisāṅkhārā Done with Avijjā (and Taṇhā)

13. Now, let us consider the actions of a thief. A person is waiting to see a doctor and sees someone has dropped a wallet. The moment he sees the wallet, his mind attaches to it (*taṇhā*). Then he thinks there could

be some money in the wallet and an easy way to get some “free money.” Those conscious thoughts are *vacī saṅkhāra*. Then he picks it up and puts it in his pocket. That last step involves *kāya saṅkhāra*.

- Here he did bodily actions with *kāya saṅkhāra*. He did that because he did not realize the future bad consequences of stealing. Thus “*avijjā paccayā saṅkhārā*” generated bad thoughts of picking up the wallet AND putting it in his pocket.
- While he was doing that he had “bad *saṅkhāra*” (with bad *cetanā*) in his mind. The *cetanā* (intention) was to steal. Such bad *saṅkhāra* are *apuñña abhisāṅkhāra*. Both *vacī* and *kāya saṅkhāra*, in this example, were *apuñña abhisāṅkhāra*.

Puñña Abhisāṅkhārā Also Done with Avijjā (and Taṇhā)

14. In the previous post, “[Kamma, Saṅkhāra, and Abhisāṅkhārā](#)” (under #12) I pointed out briefly that ***puññābhisāṅkhārā* and *āneñjābhisāṅkhārā*** are also done with *avijjā*.

[WebLink: suttacentral: Paticcasamuppāda Vibhaṅga](#), explains the term “*avijjā paccayā saṅkhārā*” in *akusala-mula Paticca Samuppāda* (that leads to suffering) as follows: “*Tattha katame avijjā paccayā saṅkhārā? Puññābhisāṅkhāro, apuññābhisāṅkhāro, āneñjābhisāṅkhāro, kāyasāṅkhāro, vacīsāṅkhāro, cittasāṅkhāro.*”

Translated: “What is *avijjā paccayā saṅkhārā*? ***Puññābhisāṅkhārā***, *apuññābhisāṅkhārā*, ***āneñjābhisāṅkhārā***, *kāyasāṅkhārā*, *vacīsāṅkhārā*, *cittasāṅkhārā*.” (here, *citta saṅkhārā* is the same as *mano saṅkhārā*). It is quite clear that *apuññābhisāṅkhārā* are due to *avijjā*. But why are the other two are said to be done due to *avijjā*?

- ***Puññābhisāṅkhārā*** are, of course, Moral and good deeds AND also the cultivation of *rūpāvacara jhāna*.
- ***Āneñjābhisāṅkhārā*** involve cultivating *arūpāvacara samāpatti*.
- When a person who has not comprehended *anicca*, *dukkha*, or *anatta* engages in those two types of “good *saṅkhārā*,” they are still done with *avijjā*! **That is because one has not yet grasped the dangers in remaining in the rebirth process.**
- To get the basic idea, let us briefly consider the following example.

15. Now let us consider the same scenario of #13 above with another average human. But this person has good, moral *gati*. He is always trying to do moral things and tries to abstain from doing immoral things.

- This person will pick up the wallet and take it to the receptionist. The person who dropped the wallet may come back looking for it. It is possible that the wallet had not only his driver's license but possibly credit cards and money. So, our good samaritan saved a lot of stress and work for the wallet owner.
- That is an example of a *puñña abhisāṅkhārā*. But if it is an *abhisāṅkhārā*, done via “*avijjā paccayā saṅkhārā*.” Is that not a contradiction since he did a “good deed”?
- To answer that question we need to understand the difference between the mundane eightfold path and the Noble Eightfold Path.

Two Eightfold Paths – Mundane Eightfold Path and the Noble Eightfold Path

16. **The Buddha said that there are two eightfold paths (*Mahācattārīsaka Sutta*, MN 117).** One is the mundane path, where one does good deeds without the comprehension of the “real nature of this world (*yathābhūta ñāṇa*).” **One gets to the mundane path by first getting rid of the ten types of *micchā diṭṭhi*.** I have discussed the two paths in the post, “[What is Unique in Buddha Dhamma?](#)”

- **Once one gets rid of the ten types of *micchā diṭṭhi*, another critical step involves getting to the Noble Eightfold Path.** One must learn the “real nature of this world” or the *anicca*, *dukkha*, and

anatta nature from a Noble person who learned that from a Noble person. That lineage goes back all the way to the Buddha. See, “[Four Conditions for Attaining Sotāpanna Magga/Phala](#).”

- Only a Buddha can discover the *anicca*, *dukkha*, and *anatta* nature by himself. All others need to learn that from a Noble person (*Ariyā*.) That is why most people are only exposed to the mundane eightfold path.
- We will discuss the *anicca*, *dukkha*, and *anatta* nature in upcoming posts once we finish going through the steps in *Paṭicca Samuppāda*. Of course, it has been discussed in the sub-section, “[Anicca, Dukkha, Anatta](#).” The current “[Origin of Life](#)” series attempts to get there systematically.

10.9.5 Taṇhā Paccayā Upādāna – Critical Step in Paṭicca Samuppāda

December 7, 2019; revised December 10, 2019; October 14, 2020; October 9, 2022

“*Taṇhā paccayā upādāna*” is a critical step in *Paṭicca Samuppāda* (PS). That is where we can take CONTROL of the PS process.

We Do Have Control Over Our Destiny

1. We started this series by discussing the *Chachakka Sutta*. That *sutta* describes the initial events that trigger the PS process. As we saw, “*saḷāyatana paccayā phassa*” step is where a new PS cycle gets started. See “[Buddhist Worldview – Introduction](#).”

- A mind does not arbitrarily start generating *saṅkhāra* (corrupt or immoral thoughts) due to *avijjā*. That is why I say that a PS cycle does not begin with “*avijjā paccayā saṅkhāra*.” See the previous post, “[Vacī Saṅkhāra – Saṅkappa \(Conscious Thoughts\) and Vācā \(Speech\)](#).”
- Our focus is on the types of *abhisāṅkhāra* that can bring “bad *kamma vipāka*” in the future. Therefore, we are discussing the “*akusala-mūla* PS.”

Paṭicca Samuppāda Initiated by “*Saḷāyatana Paccayā Phassa*”

2. First, there must be a reason for a mind to generate *abhisāṅkhāra* (evil or immoral thoughts.) The Buddha pointed out that there are three primary reasons: *lobha* (greed), *dosa* (hate or anger), and *moha* (not knowing about *kamma/vipāka* and rebirth at the base level and not realizing the *anicca*, *dukkha*, *anatta* nature at a deeper level.)

- One MUST be tempted by greed or anger to do such bad *kamma*. That happens ONLY IF there is a STRONG sensory input coming through one of the six senses. For example, one generates angry thoughts if one sees an enemy. One may think about stealing only if one sees a valuable item and generates greed.
- That is why “*saḷāyatana paccayā phassa*” is the step that INITIATES *kamma* generation via the PS cycle. *Saḷāyatana* means the six internal *āyatana* or the six sense faculties (eyes, ears, nose, tongue, body, and mind.)

3. The “*saḷāyatana paccayā phassa*” combines two steps. For seeing, “*Cakkhuṇṇa paṭicca rūpe ca uppajjati cakkhu viññāṇaṁ, tiṇṇaṁ saṅgati phasso*.” Here, “*saṅgati phasso*” is “*saṅ gati phasso*” or “making contact with **corresponding *gati*** to accumulate “*saṅ*.”

Then the mind quickly goes through the “(sam)*phassa paccayā vedanā*” and “*vedanā paccayā taṇhā*” steps to end up with “*taṇhā*” or “attachment to that *ārammaṇa*” in a split-second! We CANNOT stop those steps. They are automatic. **They can take place as long as we have “*gati* to attach to that type of *ārammaṇa*.”**

- We discussed that at length in several posts in discussing the *Chachakka Sutta*. See, “[Is There a ‘Self’?](#)”

- **Removing *taṇhā* involves controlling the next step in PS: “*taṇhā paccayā upādāna*.”** That is what we will focus on now.

Difference Between *Moha* and *Avijjā*

4. Once one gets “attached” to a *ārammaṇa*, one is CAPABLE of doing *akusala kamma* (immoral deeds.) Some people are unaware that immoral acts (bad *kamma*) can lead to unpleasant *vipāka* in the future. Some bad *kamma* can lead to suffering-filled rebirths in *apāyā*. **That is the base level of *moha*, where one is morally blind. Someone with *moha* could do such immoral deeds without any remorse.** See, [“Lobha, Dosa, Moha versus Rāga, Paṭigha, Avijjā.”](#)

- ***Moha* is reduced to the *avijjā* level when one gets rid of the ten types of *micchā diṭṭhi*.** Even at the lower level of *avijjā*, one is still CAPABLE of doing such “*apāyagāmi* actions” **if the sensory input is strong enough.** One could live a “moral life” most of the time but take a large bribe or engage in sexual misconduct if the *ārammaṇa* is strong enough. For example, one may not have taken a bribe for most of their life but be tempted “if the price is high enough.”
- Even after one attains the *Sotāpanna* stage, one may still do some *akusala kamma*, but one’s mind WILL NOT allow doing any “*apāyagāmi* deeds.”
- We are now focusing on understanding how an average “moral person” accumulates bad *kamma*, starting at the “*saḷāyatana paccayā phassa*” step in *Akusala-Mūla* PS. A “moral person” has removed the ten types of *micchā diṭṭhi* but has not yet comprehended *Tilakkhaṇa* (*anicca*, *dukkha*, and *anatta*.)

A “Moral Person” May Be Tempted to Do *Apāyagāmī* Deeds

5. Such a “moral person” has reduced *moha* to the *avijjā* level, but still is capable of doing “*apāyagāmī*” deeds. Even though they mainly act morally, they have “hidden defilements” (*anusaya*.) Those *anusaya* can come to the surface (as *āsava*.) if triggered by a tempting sensory input. That is what we discussed in #3.

- ***Anusaya* means “sleeping defilements.” They can be “awakened” by a robust sensory input (*ārammaṇa*) and brought up to the mind as “*āsava*.”** See, [“*Āsava, Anusaya, and Gati \(Gathi\)*.”](#)
- *Anusaya* is like gunpowder in a matchstick. Striking that match on a rough surface will produce light. In the same way, when a defiled mind (with *avijjā*) comes into contact (*phassa*, or more accurately *samphassa*) with a strong *ārammaṇa* (say an attractive person), that could make greed or desire (*āsava*) come to the mind.
- **Having such an *anusaya* is the same as having “bad *gati*.”** As one reduces *anusaya* (following the Eightfold Path), one’s undesirable *gati* will also decrease. As we will see, gradually decreasing *upādāna* by being mindful is the key.

Taṇhā Is There As Long as One Has Bad *Gati* and *Āsava*

6. The critical point in the *Chachakka Sutta* is the following. One MAY get attached (*taṇhā*) to a given *ārammaṇa* as long as one has “defiled *gati*” or the seven types of *anusaya*: *diṭṭhānusaya* (wrong views), *vicikicchānusaya* (tendency to do the unwise), *kāmarāga anusaya* (temptation for sense pleasures), *paṭigha anusaya* (temptation for hatred), *bhavarāga anusaya* (craving for existence), *māna anusaya* (sense of “me”), and *avijjā anusaya* (ignorance); see, for example, [“WebLink: *suttacentral: Duttiya Anusaya Sutta* \(AN 7.12\).”](#)

- They all have greed, anger, and ignorance (of the Four Noble Truths) as their origins. See [“*Conditions for the Four Stages of Nibbāna*.”](#)

- Within a split-second of that *ārammaṇa* coming to the mind, the mind gets attached (*taṇhā*.) Then, if one acts unwisely (*ayoniso manasikāra*), one will go through the “*taṇhā paccayā upādāna*” step in PS and **will start accumulate NEW *kamma* via “*avijjā paccayā saṅkhāra*.”**
- Therefore, the key to *Nibbāna* is to stop the tendency to move automatically from *taṇhā* to *upādāna*. We will see that this is equivalent to removing *gati*, *anusaya* (and thereby *āsava* or cravings.)

Connection to the Eightfold Path, *Satipaṭṭhāna*, *Ānāpānasati*

7. The key to getting to *Nibbāna* is to understand what happens in the “*taṇhā paccayā upādāna*” step. That is the first step after the last step, “*vedanā paccayā taṇhā*” discussed in the *Cha Chakka Sutta*.

- **As we saw above, as long as one has “defiled *gati*” or *āsava*, one WILL have *taṇhā*. The way to reduce and eventually remove *taṇhā* is to reduce and eliminate one’s bad *gati*.**
- We cannot remove *taṇhā* by sheer willpower. But we can control the “*taṇhā paccayā upādāna*” step by stopping *vacī saṅkhāra* as they start arising. That is because we start “talking to ourselves” only when we get to the *upādāna*” stage. See “[Difference Between Tanhā and Upādāna](#).”
- Thus, as soon as we become aware that the mind has turned to a “defiled state,” we need to change from that “wrong or immoral path” (*micchā diṭṭhi*, *micchā saṅkappa*, *micchā vācā*, *micchā kammaṃta*, *micchā ajīva*, *micchā vāyāma*, *micchā sati*, and *micchā samādhi*) to the “moral path” and **specifically to the Noble Path** (*sammā diṭṭhi*, *sammā saṅkappa*, *sammā vācā*, *sammā kammaṃta*, *sammā ajīva*, *sammā vāyāma*, *sammā sati*, and *sammā samādhi*.)

8. Being mindful of such “bad *ārammaṇa*” is *Satipaṭṭhāna* = “*sati*” + “*paṭṭhāna*” (to establish) or “being mindful.”

- Forcefully getting rid any of *micchā diṭṭhi*, *micchā saṅkappa*, *micchā vācā*, *micchā kammaṃta*, *micchā ajīva*, *micchā vāyāma*, *micchā sati*, and *micchā samādhi* is the “*āpāna*” (dispell) part of *Ānāpānasati*.
- Forcefully strengthening relevant factors of *sammā diṭṭhi*, *sammā saṅkappa*, *sammā vācā*, *sammā kammaṃta*, *sammā ajīva*, *sammā vāyāma*, *sammā sati*, and *sammā samādhi* is the “*āna*” (take in) part of *Ānāpānasati*.
- Now we can see that *Ānāpānasati* is to focus the mind (*sati*) on “*āna*” and “*āpāna*” or “*ānāpāna*.”

Vacī Saṅkhāra Responsible for *Upādāna*

9. When one gets “attached” or “gets stuck” in a *ārammaṇa* due to *taṇhā*, the FIRST THING that happens is that DEFILED thoughts arise in one’s mind AUTOMATICALLY. Those are *mano* (or *citta*) *saṅkhāra*.

- For example, if one sees a beautiful person, one may generate lustful thoughts automatically. If one sees one’s arch-enemy, one may create angry thoughts, etc. Such defiled arise due to “hidden defilements” (*anusaya*) or “bad *gati*.”
- However, within moments, we become aware of such thoughts. Many of us continue to generate similar defiled thoughts CONSCIOUSLY at that stage. As soon as we become aware of such thoughts, they are now *vacī saṅkhāra*.

10. We start analyzing that *ārammaṇa* in various ways (*vitakka/vicāra*.) We may also start speaking about it. Both types are *vacī saṅkhāra*. We have discussed that in detail in several posts. See “[Vacī Saṅkhāra – Saṅkappa \(Conscious Thoughts\) and Vācā \(Speech\)](#),” “[Difference Between Tanhā and Upādāna](#)” and “[Vitakka, Vicāra, Savitakka, Savicāra, and Avitakka, Avicāra](#).”

- **With *vitakka/vicāra* (*vacī saṅkhāra*), our interest in that *ārammaṇa* will get stronger.** Then we may take physical actions involving *kāya saṅkhāra*.

- By the way, ***vacī saṅkhāra*** (talking to oneself without speaking) is the same as *saṅkappa*. ***Vacī saṅkhāra*** also leads to speech (*vācā*) as we discussed before.
- Of course, *kāya saṅkhāra* leads to bodily actions.

11. The following is the time sequence:

- *Mano (citta) saṅkhāra* arise first (and automatically) and do not involve conscious thinking. They DO NOT have strong *kammic* consequences.
- We start accumulating new *kamma* by generating *vacī* and *kāya saṅkhāra*. *Vacī saṅkhāra* lead to *micchā saṅkappa* and *micchā vācā*. *Kāya saṅkhāra* leads to *micchā kammanta*.

Avijjā* Is the Ignorance of Bad Consequences of *Taṇhā/Upādāna

12. What we discussed above in #7 through #11 are all associated with the “*taṇhā paccayā upādāna*” step in PS. When the mind automatically “attaches to a *ārammaṇa*” (*taṇhā*), it starts generating *saṅkhāra* via “*avijjā paccayā (abhi)saṅkhāra*.” **That is how new PS processes start accumulating new *kamma*.**

- If one does not realize the harmful consequences of getting attached via greed, anger, or ignorance, that means one is acting with *avijjā* AT THAT TIME.
- It is critical to note that any “given person” does not always act with *avijjā*. **Whether one will start thinking and acting with *avijjā* depends on the nature of the *ārammaṇa* (whether it matches his/her *gati*) and how strong the *ārammaṇa* is.**
- If one does get “attached” or “get stuck” with a *ārammaṇa*, then one will start “pulling it closer.” One wants to think and speak about the *ārammaṇa* and take action.
- ***Upādāna* means “pulling it closer (in one’s mind)”** (“*upa*” + “*ādāna*,” where “*upa*” means “close” and “*ādāna*” means “pull”).

13. **That is how the “*taṇhā paccayā upādāna*” step starts a new PS cycle with “*avijjā paccayā saṅkhāra*.”**

- One will start generating *vacī saṅkhāra* without speaking first. **Those are *micchā saṅkappa*.** For example, upon seeing an enemy (Y), person X may generate evil thoughts about Y.
- If emotions become stronger, X may speak out. In the above example, X may say something harsh to Y. **Those are *micchā vācā*.**
- If Y responds in kind and the situation escalates, X may hit that person. That is a ***micchā kammanta***. That action was initiated by *kāya saṅkhāra*.
- All such *vacī* and *kāya saṅkhāra* arise via “*avijjā paccayā saṅkhāra*.”

***Paṭicca Samuppāda* May Not Proceed Linearly**

14. Now we can see how complicated the “*taṇhā paccayā upādāna*” step is. It went back to the “*avijjā paccayā saṅkhāra*” step to initiate a new PS cycle.

- Now, those *vacī saṅkhārā* and *kāya saṅkhārā* lead to *kamma viññāṇa*, via “*saṅkhāra paccayā viññāṇa*” (and the rest of the PS cycle ending in “the whole mass of suffering.”) **That whole process may repeatedly run as long as one remains engaged with that *ārammaṇa*.**
- Such *kamma viññāṇa* are focused on hurting that person in the example of #13. That *viññāṇa*, in turn, leads to more *vacī* and *kāya saṅkhāra* via “*viññāṇa paccayā saṅkhāra*.” Note that this is the reverse of “*saṅkhāra paccayā viññāṇa*.”
- Therefore, PS steps do not necessarily go just one way. They can go backward. They can jump to different places in the cycle. As we saw, it jumped from the “*taṇhā paccayā upādāna*” step to the “*avijjā paccayā saṅkhāra*” step.

- However, one can figure out such complexities when one understands the basic concepts.

Connection to *Ānāpānasati* and *Satipaṭṭhāna*

15. That is also why it is CRITICAL to stop the *vacī saṅkhāra* that arise immediately following the *mano saṅkhāra*. In that initial stage, speech has not “broken out yet.” We just become aware that we are generating lustful/hateful thoughts.

- We MUST stop *vacī saṅkhāra* as they start arising. Then they will not lead to “bad speech” (via more *vacī saṅkhāra*) or “bad actions” (via *kāya saṅkhāra*.) This is discussed in the “[WebLink: suttacentral: Vitakkasanthāna Sutta \(MN 20\)](#).”
- That is the key to doing the correct *Ānāpānasati bhāvanā* and *Satipaṭṭhāna bhāvanā*! See “[6. Ānāpānasati Bhāvanā \(Introduction\)](#).”
- We will discuss that and more steps in PS in the upcoming posts.

10.9.6 Moha/Avijjā and Vipāka Viññāṇa/Kamma Viññāṇa

December 14, 2019; revised December 15, 2019; revised November 26, 2022

Summary of Discussion Up To Now

1. In the subsection “[Worldview of the Buddha](#),” we discuss how the Buddha explained the sensory experience. More importantly, the Buddha taught how a “living being” generates *kammic* energies for future existences (*bhava*) based on “attachment” (*taṇhā*) to a given sensory experience. As we have discussed, “attachment” can happen due to greed, hate, or an unwise mindset.

- First, we discussed how a sensory event starts when a *ārammaṇa* (sight, sound, smell, taste, touch, *dhammā*) comes to the mind when one of the six senses (internal *āyatana*) comes into contact with an external *āyatana*. Becoming aware of sensory input is one of the six types of *vipāka viññāṇa*: “*cakkhu viññāṇa, sota viññāṇa, ghāṇa viññāṇa, jivhā viññāṇa, kāya viññāṇa, mano viññāṇa*.” [*Indriya* (sense faculty) and *āyatana* (defiled sense faculty) have totally different meanings. For example, eyes are *indriya* when we just happen to see things, but they BECOME *āyatana* when they are used for pleasure, i.e., to deliberately look at sensual things to enjoy them.]
- Those six types of *viññāṇa* are *vipāka viññāṇa*. They DO NOT generate *kammic* energy. They are “experiences.”
- As we will see, *kamma viññāṇa* can only be *mano viññāṇa*. Thus, some *mano viññāṇa* are *vipāka viññāṇa* and others are *kamma viññāṇa*.

2. Then, one MAY “attach to” or “get stuck in” that sensory experience INSTANTLY. That means generating *taṇhā*. Then the “*taṇhā paccayā upādāna*” step automatically follows. That is a step in the middle of the *Paṭicca Samuppāda* (PS) cycle.

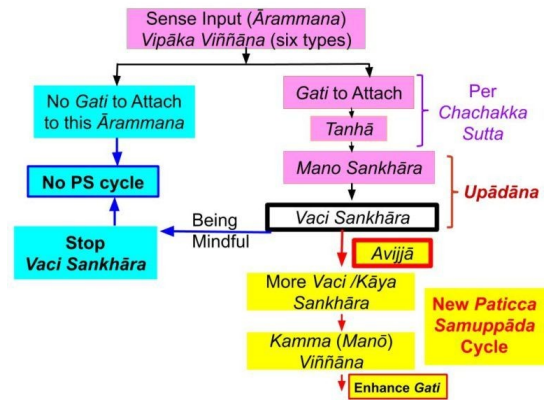

- One will attach (*taṇhā*) only if one has “defiled *gati*.” That means one likes or dislikes that sensory experience (which could be connected with ignorance too.) If one attaches, then one will start thinking and speaking (with *vacī saṅkhāra*) and even may take actions (with *kāya saṅkhāra*) with a DEFILED MIND. That means those *saṅkhāra* arise via, “*avijjā paccayā saṅkhāra*.” That is part of “*upādāna*” or “pulling that *ārammaṇa* close.”
- Therefore, what we summarized here in #2 is how the “*taṇhā paccayā upādāna*” step in PS initiates a new PS process that starts at “*avijjā paccayā saṅkhāra*.” That is how the PS cycle begins in real life, beginning with a *ārammaṇa* (as detailed in the *Chachakka Sutta* (MN 148).

Summary in Charts

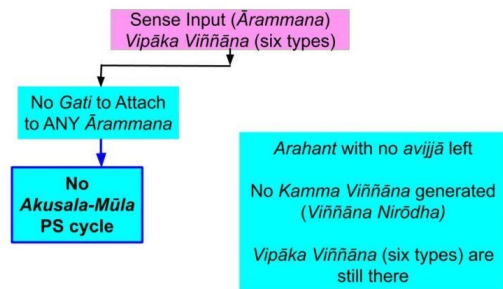

3. Since it is CRITICAL to understand what we discussed above, I have made the charts below to help us with the discussion.

Response to a ārammaṇa with Moha

Response to a ārammaṇa with Avijjā

Response to a ārammaṇa by an Arahant

One can download the charts for easy reading/printing: “[WebLink: PDF_file: Response to a ārammana with Moha](#),” “[WebLink: PDF_file: Response to a ārammana with Avijjā](#),” and “[WebLink: PDF_file: Response to a ārammana by an Arahant](#).”

- *Paṭicca Samuppāda* referred to in ALL the above charts is the “*Akusala-Mūla Paṭicca Samuppāda*.” That PS process leads to future suffering.
- **Therefore, saṅkhārā that do not arise in an Arahant are ONLY “bad or immoral saṅkhāra,” i.e., abhisāṅkhāra.** An Arahant will still generate *mano*, *vacī*, and *kāya saṅkhāra* to think, speak, and take action. He/she will be engaged in “*puñña kiriyā*” or “moral deeds.” Such “moral deeds” are NOT “*puñña abhisāṅkhāra*” because one does them with complete comprehension of the *anicca* nature. We will discuss this critical point later.

Difference Between *Moha* and *Avijjā*

4. Let us start with the chart on the left. That chart is for an extreme case of a “totally morally-blind” person. That mind is covered with defilements (*moha*.) Just like an animal, such a person would go along with any temptation that comes to the mind. His/her “bad *gati*” will only get stronger.

- The chart in the middle applies to a wide range of humans with *avijjā*. *Avijjā* is a lower form of *moha*. When one removes the ten types of *micchā diṭṭhi*, *moha* reduces to the *avijjā* level. Any human who knows right from wrong is an average human. It also includes those who are *Ariyā* (*Sotāpanna Anugāmi* and above) but have not yet attained *Arahanthood*.
- Of course, any *Ariya* (Noble Person) is INCAPABLE of doing *apāyagāmi* deeds. An *Anāgāmi* is INCAPABLE of craving for sensual pleasures, etc. Therefore, as one moves to the higher stages of *Nibbāna*, one will “attach to” less and less *ārammaṇa* (sensory inputs.)

- But any average human — no matter how “moral” by conventional standards — is CAPABLE of doing even an *apāyagāmi* deed. The *ārammaṇa* must be strong enough to be tempted.
- An *Arahant* has a totally-purified mind and has no “bad *gati*” left. Therefore, he/she WILL NOT initiate an “*Akusala-Mūla Paṭicca Samuppāda*” cycle under ANY circumstance. That is indicated in the third chart.

Difference Between *Vipāka Viññāṇa* and *Kamma Viññāṇa*

5. Above charts also help us clarify the difference between *vipāka viññāṇa* and *kamma viññāṇa*. Any sensory EXPERIENCE is a *vipāka viññāṇa*. *Vipāka viññāṇa* can come in through any of the six sense faculties, as shown at the top of the charts. Every living being, including an *Arahant*, experiences *vipāka viññāṇa*. In other words, ANY sentient being can see, hear, etc.

- If one attaches (*taṇhā*) to a *ārammaṇa*, then that initiates the step “*taṇhā paccayā upādāna*” step in PS. That means one starts “pulling that *ārammaṇa* close (*upādāna*).” First, one starts thinking about it with *vacī saṅkhāra*. One does that with the sense of a “me” involved in the sensory experience. **As we have discussed, there is no need for a “me” or a “self” to experience a sensory input.** See “[Chachakka Sutta – Six Types of Vipāka Viññāṇa](#).”
- Therefore, at the beginning of that “*taṇhā paccayā upādāna*” step, one starts generating *saṅkhāra* about that *ārammaṇa* with the “*avijjā paccayā saṅkhāra*” step in PS. That is when a PS cycle begins at the “beginning” and then runs through the end.
- The next step in PS after the “*avijjā paccayā saṅkhāra*” step is “*saṅkhāra paccayā viññāṇa*.” **That *viññāṇa* is a *kamma viññāṇa*.** Since it arises ONLY in mind, that is a *mano viññāṇa*. This *kamma viññāṇa* appears at the bottom of the FIRST TWO charts. **An *Arahant* does not generate *kamma viññāṇa*.** Therefore, *kamma viññāṇa* is absent in the third chart.

Kamma Viññāṇa Generated with the View (*diṭṭhi*) and Perception (*saññā*) of “Me” or a “Self”

6. From the last bullet of #5, it is clear that one’s mind will NOT go through the *Akusala-Mūla* PS at ANY TIME only if one is an *Arahant*.

- That is because it is ONLY an *Arahant* who would have “seen” the futility of attaching to ANY sensory input (*ārammaṇa*.) **There is no sense of a “me” or a “self” in an *Arahant*.**
- That is a point that we will discuss in detail in upcoming posts. But it is good to know about that point ahead of time. It is CRITICAL to understand the material presented so far to “keep up” with the upcoming posts when we discuss *sakkāya diṭṭhi*.
- As we can see, ANYONE below the *Arahant* stage WILL attach to at least a few sensory inputs. That is because anyone below the *Arahant* will have at least a trace of *avijjā anusaya* left.
- It is impossible for an average human even to comprehend that. That is why the Buddha emphasized that it is incorrect to say that a “self” does not exist. **The point is that for ANYONE below the *Arahant* stage of *Nibbāna*, a “self” with “*gati*” exists!**
- However, anyone above the *Sotāpanna Anugāmi* can “see” that it is unfruitful to take anything in this world to be “mine,” and it can lead to future suffering. That “seeing” is “with wisdom” and is *lokuttara* (or *lokottara* in Sinhala) *Sammā Diṭṭhi*. A fish biting the tasty bait on a hook does not “see” that it will suffer so much. Like that, an average human cannot “see” the suffering hidden in sensual pleasures. We will discuss details in future posts.
- One becomes a *Sotāpanna Anugāmi* when one comprehends *Tilakkhaṇa* (*anicca, dukkha, anatta*) at least to some extent. Even after that, the *saññā* (perception) of a “me” will be there. That perception will reduce with higher stages of *magga phala* and disappear at the *Arahant* stage.

Starting with a “Self” or “No-Self” is not the correct approach

7. As we summarized in #5 above (and discussed in the post mentioned there), attachment to a *ārammaṇa* happens instantly. That requires no conscious thinking and thus is NOT possible to stop. As long as one has “bad *gati*,” one MAY attach to some sensory inputs (*ārammaṇa*.)

- The way to eliminate *taṇhā* is to reduce and finally remove one's “bad *gati*.” Luckily, humans have the ABILITY to do that by understanding the PS process.
- Indeed, there is a “self” in the PS process. However, that is not an unchanging “self” like a “soul” or a “*ātma*.” I call it a “dynamic self,” see “[What Reincarnates? – Concept of a Lifestream](#).” That “self” disappears when one attains the *Arahant* stage!

8. **Therefore, until one becomes an *Arahant*, a sense of “self” will decide how to respond to sensory input based on some attachment to “this world.”** As shown in the middle chart above, anyone can stop any “bad *vacī saṅkhāra*” that arises when tempted by a given sensory input. If that fails, one can stop *kāya saṅkhāra*, which lead to physical actions. **Simply put, one should stop immoral conscious thoughts, speech, or deeds as soon as one becomes aware of them.**

- When one becomes a *Sotāpanna Anugāmi* by comprehending *Tilakkhaṇa* to some extent, one's “*apāyagāmi gati*” will disappear.
- Until then, one can practice *Ānāpānasati* or *Satipaṭṭhāna Bhāvanā* to stop some temptations. One does not need to have formal meditation sessions. It is utterly useless to have formal meditation sessions and not to act with mindfulness when one goes through daily activities. That is when one generates most of the defiled thoughts and actions.
- Formal meditations become more relevant after getting to the *Sotāpanna* stage. That is why “*bhāvanāya pahātabbā*” comes last in the *Sabbāsava Sutta* (MN 2). There, “*dassanena pahātabbā*” of “removal via correct vision” is first on that list. That is the “correct vision” required to be a *Sotāpanna*. One must first understand what to meditate on!

Kamma Viññāṇa Have Future Expectations

9. What is the real difference between a *vipāka viññāṇa* and a *kamma viññāṇa*?

- ***Vipāka viññāṇa* provides the sensory experience.** One sees with *cakkhu viññāṇa*, hears with *sota viññāṇa*, tastes with *jivhā viññāṇa*, smells with *ghāna viññāṇa*, feels touch with *kāya viññāṇa*, and thoughts coming to the mind with *mano viññāṇa*.
- ***Kamma viññāṇa* arise via “*avijjā paccayā saṅkhāra*.”** For example, when one gets attached to a *ārammaṇa* via greed or hate, for example, one has an EXPECTATION. If one likes the *ārammaṇa*, one wants more of it. If one dislikes it, one wants it to go away. Either way, there is an expectation.
- Thus when one consciously thinks (*vacī saṅkhāra*) and takes actions (*kāya saṅkhāra*), there are “expectations” embedded in such *saṅkhāra*. Those *saṅkhārā* lead to *kamma viññāṇa* via “*saṅkhāra paccayā viññāṇa*.”

10. **Those “expectations” in *kamma viññāṇa* are energies generated by the mind in *javana citta*. They stay “out there in the world” as *dhammā*.** Those are part of the *dhammā* in “*manaṇca paṭicca dhamme ca uppajjati mano viññāṇaṃ*.”

- Therefore, just like the other five types of *rūpa* are “out there in the world,” *dhammā* are “out there,” too. They can be detected by the *mana indriya*, just like a sound detected by the *sota indriya*. That is how our future expectations periodically come back to our minds, i.e., how we remember our plans for the future. **Sigmund Freud called that the “subconscious.”** Of course, he had no idea about the actual mechanism.

- *Dhammā* are *rūpa* too. But they are just energies that are below *suddhaṭṭhaka*. They are “*anidassanaṃ appaṭighaṃ dhammāyatanapariyāpannaṃ*.” They “cannot be seen or touched.” See, “[What are Rūpa? – Dhammā are Rūpa too!](#)”
- The other five types of *rūpa* sensed via the five physical sense faculties are above the *suddhaṭṭhaka* level. Modern science is only aware of those five types.
- We will discuss *dhammā* in detail in the next post.

All posts on the new series at, “[Origin of Life](#).”

10.9.7 Icchā (Cravings) Lead to Upādāna and to Eventual Suffering

December 21, 2019; re-written October 14, 2022 (#4 revised later)

Upādāna Is a Key Concept That Has Been Hidden

1. The Buddha declared that his Dhamma or teachings on suffering “had not been known to the world” before him. In his first discourse, [WebLink: suttacentral: Dhammacakkappavattana Sutta \(SN 56.11\)](#), he “defined” *dukkha* or suffering.

Idaṃ kho pana, bhikkhave, dukkhaṃ ariyasaccaṃ:

jātipi dukkhā, jarāpi dukkhā, byādhipi dukkho, maraṇampi dukkhāṃ, appiyehi sampayogo dukkho, piyehi vippayogo dukkho, yampicchaṃ (yam pi icchā) na labhati tampi dukkhāṃ—saṅkhittena pañcupādānakkhandhā (pañca upādāna khandhā) dukkhā. [saṅkhittena means through overthrown by defilements]

Translated: *Bhikkhus*, What is the Noble Truth of Suffering?

“Birth is suffering; getting old is suffering; getting sick is suffering; death is suffering. Having to associate with things one does not like is suffering and having to separate from those one likes is suffering. **If one does not get what one wants/craves (*icchā*), that is suffering** – in brief, the origin of suffering is the “**pulling close**” (*upādāna*) of the five aggregates of *rūpa*, *vedanā*, *saññā*, *saṅkhāra*, *viññāṇa* (*pañcupādānakkhandha*). [*iccha* :[adj.] (in cpds.), wishing; longing; desirous of.]

- Everyone knows that “Birth is suffering, getting old is suffering, getting sick is suffering, dying is suffering. Having to associate with things that one does not like is suffering. Having to separate from those things one likes is suffering.” That part is known to the world.
- It may be a bit harder to understand birth as suffering, but ANY birth ends with decay and death at the end, so it is not that difficult to “see.”

The “Hard-To See” Suffering That Is Hidden

2. What is “previously unheard” is that **craving (*icchā*)** for sensory attractions leads to suffering in the future. When one craves something, one will start thinking and speaking (*vacī saṅkhāra*), and doing things (with *kāya saṅkhāra*) to “get possession” of it. That “pulling close” of “mind-pleasing things” is “*upādāna*” (“*upa*” + “*ādāna*” as we discussed before.) [*Upādāna* means “pulling it closer (in one’s mind)” (“*upa*” + “*ādāna*,” where “*upa*” means “close” and “*ādāna*” means “pull”). [*ādāna* : (nt.), taking up; grasping.]]

- Since we do not “see” that hidden suffering, we tend to do immoral deeds to possess such “mind-pleasing things.” That means generating (*mano*, *vacī*, and *kāya*) *saṅkhāra* due to our *avijjā* (ignorance of the core teachings of the Buddha, including the *Paṭicca Samuppāda* process.)
- The harsh consequences of such immoral deeds (*kamma vipāka*) may not be seen immediately, or even in this life. That is why it is hard to “see” this hidden suffering.

- That is contrary to our daily experiences. We do everything to live a luxurious life with a beautiful house, an attractive spouse, a nice car, etc. We do not see “any bad consequences” of our efforts to pursue those “mind-pleasing things.”

A Fish Does Not “See” the Hidden Suffering in a Delicious Bait

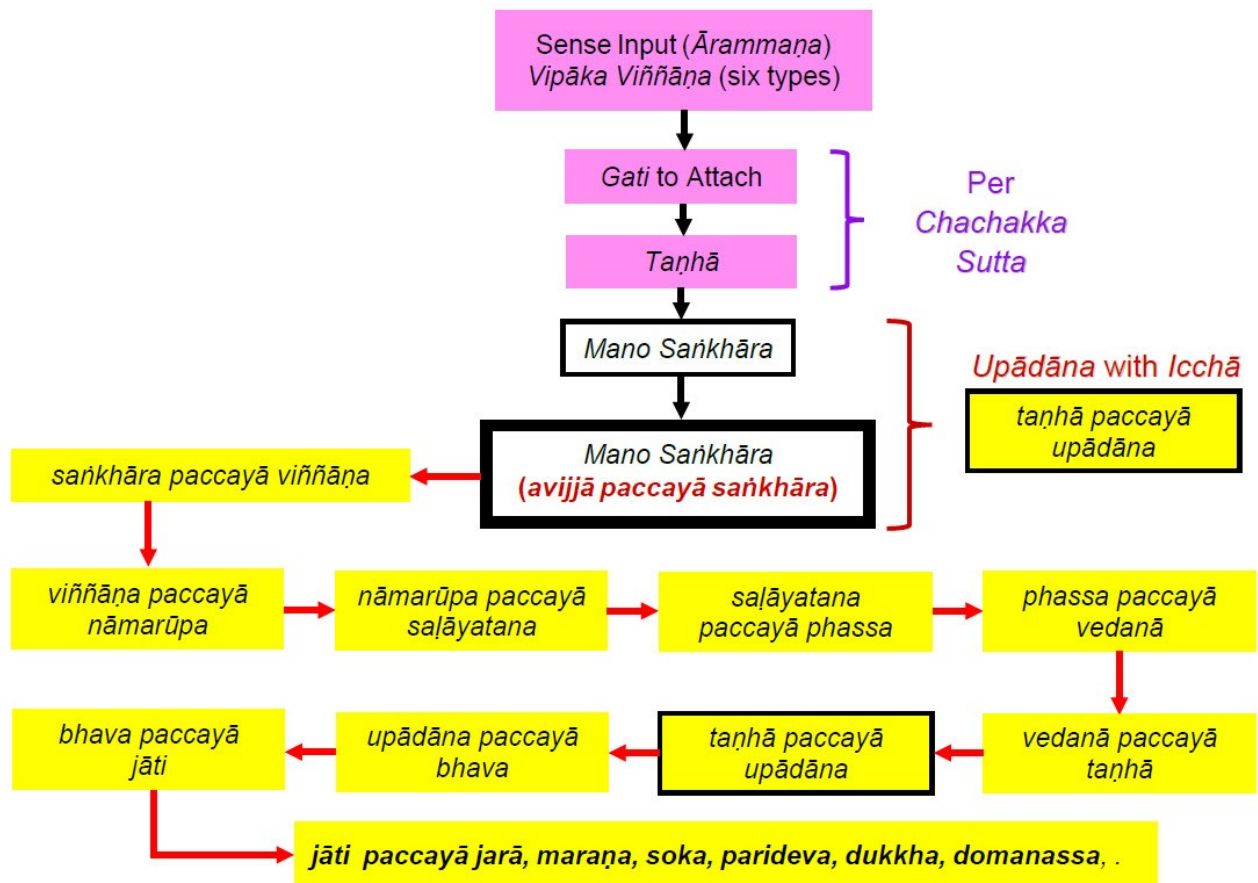

3. As we will discuss, we are no different than a fish biting into a tasty bait, say, a worm. That fish does not see the hook hidden in the “delicious worm.” It will be subjected to much suffering once it bites the worm, and the hook attaches to its mouth.

- The difficulty in our case is that our deeds to get those sensory pleasures may not show their CONSEQUENCES in this life. It is useless to follow Buddha Dhamma if one does not believe in rebirth or *kamma/vipāka*.
- All we tend to crave (*icchā*) are PARTS OF the five aggregates (*pañcakkhandha*). That small part is *pañcupādānakkhandha*. We like certain types of *rūpa* (people and things), certain types of *vedanā* (feelings), etc.
- That is why it is critical to understand how “pulling close” (*upādāna*) of sensory inputs (*ārammaṇa*) leads to future suffering. The *akusala-mūla Paṭicca Samuppāda* (PS) ends up in “*jarā, maraṇa, soka, parideva, dukkha, domanassa,..*” or the “whole mass of suffering.”

Craving (*icchā*) Starts the *Paṭicca Samuppāda* Process That Leads to Suffering

4. In the previous two posts, we discussed how an external sensory input (*ārammaṇa*) triggers the “*taṇhā paccayā upādāna*” step in the PS. See, “[Taṇhā Paccayā Upādāna – Critical Step in Paṭicca Samuppāda](#)” and “[Moha/Avijjā and Vipāka Viññāna/Kamma Viññāna](#).”

- Continuing that discussion, let us look at how that future suffering arises. The following chart summarizes what we discussed. It shows all the steps in the PS process, starting with “*avijjā paccayā saṅkhāra*” to the end, “*jarā, maraṇa, soka, parideva, dukkha, domanassa,..*” or the “whole mass of suffering.”
- However, the initiation of PS cycles is not at the “*avijjā paccayā saṅkhāra*” step but the “*(sam)phassa paccayā vedanā*” step. **Attaching to a sensory input (*ārammaṇa*) with liking (*icchā*) happens first.** See #3 of “[Chachakka Sutta – Six Types of Vipāka Viññāna](#).”

Open pdf for viewing or printing: “[WebLink: PDF-file: Icchā to Upādāna to Suffering.](#)”

Idappaccayatā Paṭicca Samuppāda Example

5. *Idappaccayatā Paṭicca Samuppāda* explains phenomena occurring in real-time as they happen. That is easier to interpret compared to *upapatti Paṭicca Samuppāda*, which describes events leading to future lives, especially in rebirths. [*idaṃ* :[(Nom. and Acc. sing. of ima) nt.] this thing. *paccayatā* :[f.] causation. *idappaccayatā* : (*idaṃ* + *paccayatā*) [f.] having its foundation on this, i.e., causally connected.]

- Let us revisit a simple example that we discussed in #13 of the recent post, “[Vacī Saṅkhāra – Saṅkappa \(Conscious Thoughts\) and Vācā \(Speech\).](#)”

A person is in the waiting room to see a doctor and sees that someone has dropped a wallet. The moment he sees the wallet, his mind attaches to it (*taṇhā*). Then he thinks there could be some money in the wallet and that it is an easy way to get some “free money.” That happens within moments of him seeing the wallet.

- “Seeing the wallet” is a *cakkhu viññāṇa* that resulted via, “*Cakkhuñca paṭicca rūpe ca uppajjati cakkhu viññāṇam.*” Within a split-second, he attaches to it (*taṇhā*) as we discussed in the posts on *Chachakka Sutta* (MN 148.)
- Then he starts thinking about how much money can be in that wallet, and how to pick it up without being noticed. Those are *vacī saṅkhāra* that arise due to his ignorance (*avijjā*) about their harmful consequences. Thus, his mind has generated “*upādāna*” for the wallet because he has a craving (*icchā*) for money.
- Thus, his mind starts the step, “*taṇhā paccayā upādāna*” in *Paṭicca Samuppāda* (PS.)

Initiation of a new Paṭicca Samuppāda Process

6. Therefore, the “*taṇhā paccayā upādāna*” step now leads to the start of a brand new PS process with “*avijjā paccayā saṅkhāra*” (see the chart above.) We discussed that in the previous post, “[Moha/Avijjā and Vipāka Viññāna/Kamma Viññāna](#).”

- Those conscious thoughts about the wallet are *vacī saṅkhāra*. Now those *saṅkhāra* lead to a NEW *kamma viññāna*. That *viññāna* has the expectation of picking up the wallet and keeping it for himself. That is a *mano viññāna* that arises in his mind and is different from the *cakkhu viññāna* of “seeing the wallet.”
- Now, that ***kamma*** *viññāna* leads to “*nāmarūpa* formation” in his mind. He runs various scenarios in his mind (*vitakka/vicāra*), both regarding picking up the wallet without being noticed and what he can do with the money in the wallet. That is “*viññāna paccayā nāmarūpa*.”
- That immediately leads to the involvement of several internal *āyatana*. For example, he may look around to see whether anyone is watching. He may stand up and see whether the receptionist can see the area where he is sitting, etc. That is “*nāmarūpa paccayā salāyatana*.”
- That, in turn, leads to “*salāyatana paccayā (sam)phassa*.” His mind’s defilements (or “*saṇ*” or *anusaya*) affect all his thoughts and activities. That generates mind-made *vedanā* or “*(sam)phassa paccayā (samphassa-jā-)vedanā*” followed by more PS cycles. Those are the steps described in the *Chachakka Sutta*.
- We need to remember that words like “*phassa*” and “*vedanā*” in the abbreviated PS must be interpreted as “*samphassa*” and “*samphassa-jā-vedanā*.” See the previous posts in this series: “[Worldview of the Buddha](#).”

Strengthened *Upādāna* Leads to a Temporary *Bhava*

7. His mind is now back to the “*taṇhā paccayā upādāna*” step in the PS process, and it reinforces that *upādāna*. The above steps may be repeated many times in his mind as he sits there and contemplates various aspects. Those, by the way, are *vitakka/vicāra*.

- With the strengthening of the *upādāna*, now his mindset changes to that of a thief’s existence (*bhava*). That is “*upādāna paccayā bhava*.” Then immediately, he is “born” (*jāti*) a thief. That is “*bhava paccayā jāti*,” By the way, in *upapatti Paṭicca Samuppāda*, *jāti* can happen much later. The “*bhava*” remains energized as *dhammā*; see below.
- Now that “thief” goes and picks up the wallet and puts it in his pocket. Now, “stealing of the wallet” is accomplished. That is the “*maraṇa*” or “death” of that particular *jāti* as a thief.
- However, there is more to it than just *maraṇa*. “*Jarā, maraṇa, soka, parideva, dukkha, domanassa*,...” will also follow.
- Even though he got what he wanted, his mind is very agitated. Even though no one else was in the waiting room, he wondered whether the receptionist somehow saw his act. Also, now a new thought comes to his mind as to whether there is a video camera in the room. That “mental stress” is part of *domanassa*.

The Process Is Over, but the Consequences Will Prevail

8. It is possible that there was a video camera in the room. If so, he could be charged with theft a few days later. Those are part of the “mass of suffering” due to the immoral act of stealing.

- But the critical point is the following. Even if he did not get caught, he would be paying for his immoral action in the future. The *kammic* energy of that immoral deed will follow him, waiting for an opportunity to bring a corresponding “bad *vipāka*” at some point.
- *Kammic* energy is in *dhammā* (with a long “a” at the end, not as in Buddha Dhamma.) Let us address that in brief.

Dhammā* Are Energies Created by Mind – With *Kamma Viññāṇa

9. *Dhammā* are the underlying energies (or “*kamma* seeds” or “*kamma bīja*”) created by the mind.

- A seed has the POTENTIAL to give rise to a tree under proper conditions like good soil, water, and sunlight. In the same way, *dhammā* (a *kamma bīja*) has the POTENTIAL to give rise to things (both living and inert) in this world.
- That is how such *dhammā* (or *kamma* seeds) can bring *vipāka* in the future.
- Just like an ordinary seed needs soil, water, and sunlight to germinate and bring about a tree, *dhammā* needs proper conditions to bring about corresponding *vipāka*. That is also why *kamma* is not deterministic. For example, Aṅgulimāla killed 999 people. That kammic energy was there even after Ven. Aṅgulimāla attained *Arahantship*. However, with that *Arahantship*, his mind became pure, and any conditions to bring about the *vipāka* of such bad *kamma* could not materialize. See, “[Account of Aṅgulimāla – Many Insights to Buddha Dhamma](#).”
- The role of *dhammā* is discussed in “[Dhammā, Kamma, Saṅkhāra, Mind – Critical Connections](#).”

***Ichhā* (Cravings) Lead to *Upādāna* and to Eventual Suffering**

10. What we discussed above is the key message embedded in the First Noble Truth of *Dukkha Sacca* (pronounced “sachcha.”)

- It is craving (*icchā*) for “mind-pleasing sensory attractions in the world” that lead to *taṇhā* and *upādāna* and eventual suffering.
- **Based on *icchā*, we get “stuck in attractive sensory inputs” (*taṇhā*), and try to keep that *ārammaṇa* as close as possible in mind (*upādāna*.)** We do that in our minds by generating unwise thoughts (*vacī saṅkhāra*), which leads to unwise speech (more *vacī saṅkhāra*) and immoral actions (based on *kāya saṅkhāra*). That is the start of an *akusala-mūla* PS process, “*avijjā paccayā saṅkhāra*.”
- That process, of course, inevitably leads to the last step in the PS process, “*jarā, maraṇa, soka, parideva, dukkha, domanassa,..*” or the “whole mass of suffering.”

11. The “[WebLink: suttacentral: *Ichhā Sutta* \(SN 1.69\)](#)” summarizes the importance of the *icchā*. One time, a *deva* came to the Buddha and asked:

“ <i>Kenassu bajjhatī loko,</i>	“By what is the world bound?
<i>kissa vinayāya muccatī;</i>	By the removal of what one is freed?
<i>Kissassu vippahānena,</i>	What is it that one must abandon
<i>sabbam chindatī bandhanan”ti.</i>	To cut off all bondage?”

[*bajjhati* :[pass. of bandhati] is bound or captivated; is caught.

vinaya :[m.] discipline; the code of monastic discipline; removal.

muccatī :[muc + ya] becomes free; to be saved or released.

vippahāna : (nt.) [vi+pahāna] leaving, abandoning, giving up.

chindatī :[chid + ṛ + a] cuts; severs; destroys.

bandhana :[nt.] bound; fetter; attachment; imprisonment; binding; bondage; something to bind with.]

The Buddha replied:

“ <i>Ichhāya bajjhatī loko,</i>	“By cravings , one is bound to the world;
<i>icchāvinayāya muccatī;</i>	By the removal of desire one is freed
<i>Ichhāya vippahānena,</i>	Craving is what one must give up
<i>sabbam chindatī bandhanan”ti.</i>	To cut off all bondage.”

- But, of course, the craving for “mind-pleasing things” cannot be removed by just willpower. One must understand the harmful consequences of such cravings. That understanding comes through moral living AND learning true and correct Buddha Dhamma.
- That is why *Sammā Diṭṭhi* comes first in the Noble Eightfold Path. The other steps in the Path will follow once one comprehends the teachings. But a badly corrupt mind cannot grasp those teachings, which is why moral living is a prerequisite.

12. The following posts discuss more examples that may help solidify the understanding: “[How Do Sense Faculties Become Internal Āyatana?](#)” and “[Key Steps of Kammic Energy Accumulation.](#)”

- The *Idappaccayatā Paṭicca Samuppāda* is discussed in detail in “[Paṭicca Samuppāda During a Lifetime.](#)”

10.9.8 Dhammā, Kamma, Saṅkhārā, Mind – Critical Connections

December 28, 2019; revised February 17, 2022

Introduction

- From the previous posts on *Paṭicca Samuppāda* in this series, we can make the following conclusions:
 - The MIND generates different types of *saṅkhārā*. They are involved in all thoughts (*mano* and *vacī saṅkhārā*), speech (*vacī saṅkhārā*), and bodily actions (*kāya saṅkhārā*).
 - Therefore, *saṅkhārā* (generated with *avijjā*) are responsible for all ten types of *akusala kamma*. Of those ten, three with the mind, four with speech, and three with the body.
 - Such *kamma* create energies (or *kamma bīja*) released to the world as “*dhammā*.” We will discuss some details here. This word *dhammā* is different from *dhamma* (teachings) in Buddha Dhamma.
 - Please review those previous posts as needed: “[Paṭicca Samuppāda – Not ‘Self’ or ‘No-Self’](#)”

Manopubbangamā Dhammā – Mind Is the Precursor of All

- The first *Dhammapada* verse is “[Manopubbangamā Dhammā.](#)” There are, in fact, two verses that go together. Those two verses have the following meanings:
 - All things and phenomena have the mind as their forerunner. They all are mind-made. **If one speaks or acts with an evil mind (i.e., engages in *dasa akusala*), then suffering (*dukha*) will follow just as the wheels of a cart follow the footsteps of the ox that is pulling the wagon.**
 - All things and phenomena have the mind as their forerunner. They all are mind-made. **If one speaks or acts with a purified mind (i.e., engages in *dasa kusala* and *puñña kamma*), happiness (*sukha*) follows one like one’s own shadow.**

Dhammā Are Energies Created by Mind – With *Mano Viññāṇa* (*Kamma Viññāṇa*)

- As I briefly stated in a previous post, *dhammā* are the underlying energies (or “*kamma seeds*” or “*kamma bīja*”) created by the mind.** See, “[Moha/Avijjā and Vipāka Viññāṇa/Kamma Viññāṇa.](#)”
 - A seed has the POTENTIAL to give rise to a tree under proper conditions like good soil, water, and sunlight. In the same way, *dhammā* (a *kamma bīja*) has the POTENTIAL to give rise to things (both living and inert) in this world.
 - *Paṭicca Samuppāda* describes the complex process of a *dhammā* (a *kamma bīja*) giving rise to future lives. It also explains the arising of the external world that sustains life. We will address just the first part for now.

- The “seeds” here — *dhammā* (a *kamma bīja*) — are “created and fed” by “*kamma viññāṇa*.”
- Only the mind can generate *kamma viññāṇa*. Such *kamma viññāṇa* arise via, “*saṅkhārā paccayā viññāṇa*” in *Paṭicca Samuppāda*. **Since that happens ONLY in mind, *kamma viññāṇa* are ALWAYS *mano viññāṇa***. A *kamma viññāṇa* has ENERGY. Such *kamma viññāṇa* encompass our future hopes and expectations.
- All the other five types of *viññāṇa* (*cakkhu viññāṇa*, *sota viññāṇa*, *ghāṇa viññāṇa*, *jivhā viññāṇa*, *kāya viññāṇa*) are ALWAYS *vipāka viññāṇa*. *Mano viññāṇa* could be EITHER *vipāka* or *kamma viññāṇa*. To recall how *vipāka viññāṇa* arise, see, “[Chachakka Sutta – Six Types of Vipāka Viññāṇa](#).”
- *Vipāka vedanā* that we experience arise with *vipāka viññāṇa*. See, “[Vipāka Vedanā and “Samphassa jā Vedanā” in a Sensory Event](#).”

An Example Of a “Mild” *Kamma Viññāṇa*

4. Let us consider an example of how a *kamma viññāṇa* arises and how it could grow with *saṅkhārā*.

- Suppose X needs to buy a car. He saw a car in a showroom and “fell in love with it.” **Here the impactful *ārammaṇa* was that moment of seeing his “dream car.”** A *kamma bīja* was born at that time with that expectation via “*saṅkhārā paccayā viññāṇa*.”
- He goes home and thinks about how to finance the purchase. He talks to his friends about how beautiful the car is, etc. All those are *vacī saṅkhārā* based on that vehicle. Then he may go back to the showroom to look at it again and even to get a better price for the car. Those would involve *kāya saṅkhārā*.
- Every time he thinks, speaks and acts on issues relating to that car, he is “feeding that *viññāṇa*” for buying the vehicle. That happens with “*saṅkhārā paccayā viññāṇa*,” and makes that *viññāṇa* stronger. We could also say that the *kamma bīja* or *dhamma* associated with that *viññāṇa* would grow.
- The stronger that *viññāṇa* becomes, the more often will it “come back” to his mind (as a *dhammā*) via “*manāṇa paṭicca dhamme ca uppajjati manoviññāṇam*.” **That is what Sigmund Freud called “the subconscious.”** Of course, Freud had no idea of the working of the subconscious via *kamma viññāṇa*.
- Now, one day, X buys the car. At that time, the *kamma viññāṇa* (*kamma bīja*) for that expectation will go away. Even if he did not buy the vehicle, that *kamma viññāṇa* (*kamma bīja*) would have died if he lost his job unexpectedly and realized that he could not afford the car. In either case, it would no longer be in his “subconscious.”

An Example Of a “Strong” *Kamma Viññāṇa* Associated with a *Pāpa Kamma*

5. In the above example, we considered a relatively “mild” *kamma*. Even though some greed was involved, that *kamma* (buying a car) was not a *pāpa kamma*. A *pāpa kamma* is a strong *akusala kamma* that could make one eligible for rebirth in the *apāyā*. Let us consider an example.

- Suppose X now wants to kill another human out of anger. The moment that he decides on that, his *vacī saṅkhārā* creates a new *kamma bīja* (and a *kamma viññāṇa*) on deciding to kill. His mind is “stuck with the idea of killing that person.” That is *taṇhā*. The conventional translation of *taṇhā* as “craving” is not quite right.
- From that moment, any time that X is thinking about how to carry out the killing, that *kamma bīja* (*kamma viññāṇa*) will grow. It happens via “*saṅkhārā paccayā viññāṇa*,” where *saṅkhārā* are *vacī saṅkhārā* involved in his planning. This is “*upādāna*” (“*upa*” + “*ādāna*” or “keeping it close in mind.” He often thinks about how to kill that person. He dwells on it.

- Then, one day, X decides to shoot that person. Then he may go and buy a gun. That involves *kāya saṅkhāra*, and those will also contribute to the growth of that *viññāṇa* (*kamma bīja*.)
- Then X shoots and kills that person. That is the strongest *kamma* and it is a *kāya kamma* done with *kāya saṅkhāra*. But all those *vacī* and *kāya saṅkhāra* involved were *abhisāṅkhāra*.
- **However, unlike in the previous case in #4 above, that *kamma viññāṇa* (*kamma bīja*) does not go away.** That is because it is an *akusala kamma*. Even though the expectation accomplished that *kamma viññāṇa* will instead be “established in the *kamma bhava*.” It will “follow him” **just as the wheels of a wagon follow the footsteps of the ox** in #2 above. That *kamma viññāṇa* will be “with him” for billions of years waiting for an opportunity to bring its results (*vipāka*.)

Abhidhamma Explanation

6. **The following information is relevant but not essential.** I include it for those who are familiar with *Abhidhamma*. It is a good idea to read it in any case, to get the basic idea. A mind creates ENERGY when it focuses on an *ārammaṇa* and attaches to that *ārammaṇa*. Then a particular strong *citta vīthi* (*atimahantarammana* or *mahantarammana*) runs in the mind.

- Towards the end of such a *citta vīthi*, seven especially powerful *citta* (*javana citta*) arise. Those *javana citta* generate and release *kammic* ENERGY to the world. Those ENERGIES are *dhammā* or *kamma bīja*.
- Such ENERGIES generate in the steps, “*avijjā paccayā saṅkhārā, saṅkhārā paccayā viññāṇa, viññāṇa paccayā nāmarūpa*” in *Paṭicca Samuppāda*. That, of course, takes place during *citta vīthi*.
- These *kammic* energies generated in *javana citta* lie below the *suddhaṭṭhaka* level. A *suddhaṭṭhaka* is the smallest unit of matter in Buddha Dhamma. See, “[The Origin of Matter – Suddhaṭṭhaka](#).” [*suddha* : [pp. of *sujjhatī*] become clean or pure. *aṭṭhaka* :[nt.] a group of eight.]
- That is a very brief explanation. One could read about *citta vīthi* in *Bhikkhu Bodhi's* book, “Comprehensive Manual of Abhidhamma.” As I said, it is not necessary to fully understand that process. But that could fill “some gaps in the picture.”

Dhammā Are Rūpa Too!

Dhammā are also *rūpā* in Buddha Dhamma. As we have discussed, *dhammā* are pure energy that lies below “tangible matter” above the *suddhaṭṭhaka* stage.

7. Those energies released to the “*nāma loka*” or “immaterial world” stay there as *dhammā*. Therefore, *dhammā* are “out there” in the world, just like other types of *rūpā*. **Our world consists of *rūpa loka* and *nāma loka*.** While *rūpā* are in the *rūpa loka*, *dhammā* belong to the *nāma loka*.

- Another name for *kamma viññāṇa* or *dhammā* is *kamma bīja*. In Buddha Dhamma, such energies also come under the category of “*rūpa*.” More on that below.
- **While scientists can detect any of the other five kinds of *rūpa* with their instruments, they cannot detect *dhammā*.** Only the *mana indriya* in the brain can detect *dhammā* and pass them over to the *hadaya vatthu* (seat of the mind.)
- The world that we can “see” or “interact with” consists of the following. There are solid objects (people, animals, trees, houses, etc.) that we “see” with our eyes. They are “*rūpa rūpa*” or simply “*rūpa*.” There are sounds that we hear (*sadda rūpa*.) Things that we smell are odors (*gandha rūpa*.) We taste the essence (*rasa rūpa*) in the food we eat. And we touch solid objects (*phoṭṭhabba rūpa*.)
- On the other hand, “*nāma loka*” has records (*namagotta*) of all the “mental aspects” like *vedanā*, *saññā*, *saṅkhāra*, *viññāṇa*. It also keeps records of *kammic* energies that we produce, which are *dhammā*.

- *Dhammā* are in a different category compared to other types of “tangible *rūpa*.” It may be a good idea to read the post “[Our Two Worlds: Material and Immaterial](#).”

8. Long before Einstein made the connection between matter and energy via his famous $E = mc^2$ equation, the Buddha treated both matter and energy as “*rūpa*.”

- With advances in physics, now it is well-established that matter and energy are indistinguishable. For example, now scientists accept that light consists of particles (photons.)
- We can directly see some of those “*rūpā*,” i.e., *rūpa rūpa*. We also know how other types of *rūpa* arise.. For example, “*sadda rūpa*” are sound energy. Still, scientists know that sound propagates through the air via “pressure waves.” We are familiar with the five types of “*rūpa*” that we sense with our five physical senses (eyes, ears, nose, tongue, body.)
- Scientists cannot detect *dhammā* because they have tiny energies. They think memories are “stored in the brain.” That is not compatible with the ability of some children to recall past lives. Of course, the Buddha could recall past lives as far back as he wished (without seeing a “beginning.”) See, “[Origin of Life – There is No Traceable Origin](#).”

Dhammā Are Anidassana Rūpa

9. **The following information is relevant but not essential.** It is a good idea to read it in any case, to get the basic idea. The Buddha stated that “*dhammā cannot be seen or made contact with* (other than by the *mana indriya*.) *Dhammā* are “*Vedanākkhandho ... pe ... viññāṇakkhandho, yañca rūpaṃ anidassanaṃ appaṭighaṃ dhammāyatana pariyāpannaṃ..*”

- That verse is in “[WebLink: suttacentral: 2.3.2. Dukanikkhepa](#)” of the Dhammasaṅgaṇī under the subsection 2.3.2.2.3. Sanidassanaduka.
- The critical point to remember is that *dhammā* include our memories (which are just records without energy) AND *viññāṇa* (which include *kamma viññāṇa* with *kammic* power.)

10. There is a lot to grasp here, but the main points are the following.

1. *Dhammā* (used generally in plural) **include** *kamma viññāṇa* or *kamma bīja*.
 2. *Dhammā* **also include** memories from the past, including those from past lives. It is just that one may not be able to recall past lives until one attains *jhāna* and cultivates “*pubbenivāsānussati ñāṇa*.”
 3. Those *dhammā* (including memories or “*nāma gotta*”) are “out there” too, just like the other five types of *rūpā* are “out there.” But an average human is unaware of *dhammā*. It takes a Buddha (with a perfectly purified mind) to uncover such details about the world.
- That is why I stated that *dhammā* are in the “unseen world” or “immaterial world.” Details at “[Our Two Worlds: Material and Immaterial](#).”

Dhammā Behave Differently Compared to “Normal Rūpa”

11. *Rūpa* or “matter” behaves very differently below the *suddhatṭhaka* level. Again, we do not need to get into details, but it is essential to make that connection. For those interested, details at “[The Origin of Matter – Suddhatṭhaka](#).”

- As discussed, those “gross or dense *rūpā*” that we detect with the five senses are the only *rūpā* that modern science can detect.
- However, scientists ran into problems when they started studying “matter” at very low density (like electrons and photons). “Matter” at the sub-atomic level behaves very differently, and those investigations led to the discovery of quantum mechanics. For example, electrons and photons do not obey the same laws as large particles like stones or tennis balls.

- Even though scientists have made progress with quantum mechanics, they still cannot explain some phenomena at the sub-atomic level. One key issue is that such “quantum particles” like electrons and photons seem to be interacting instantaneously across long distances. This phenomenon is known as “quantum entanglement.” See [“Quantum Entanglement – We Are All Connected.”](#)

12. Those *dhammā* are *kamma bīja* lie below the *suddhaṭṭhaka* level. They interact with the *mana indriya* instantaneously.

- All other types of *rūpā* detectable with the five physical senses are above the *suddhaṭṭhaka* level. However, some sub-atomic particles (closer to the *suddhaṭṭhaka* level) like electrons display the ability to interact instantaneously among themselves, just like *dhammā*. See, [“Quantum Entanglement – We Are All Connected.”](#) This effect mystified quantum physicists to this date.
- However, the Buddha explained all that 2500 years ago. I have tried to explain to the physics community over the past few years. They do not see that connection yet. But at some point, they will have to. For those who have a physics background, [“Quantum Mechanics and Dhamma.”](#)

Those *Dhammā* Could Bring *Vipāka* via *Vipāka Viññāṇa*

13. Under proper conditions (*paccayā* in *Paṭicca Samuppāda*), *kamma viññāṇa* (or *dhammā*) COULD bring corresponding results (*vipāka*) and the associated *viññāṇa* are ***vipāka viññāṇa***. That happens via all SIX sense faculties. As we discussed in previous posts, “*cakkhuñca paṭicca rūpe ca uppajjati cakkhu viññāṇam*” through “*mānañca paṭicca dhamme ca uppajjati mano viññāṇam*.” All those are ***vipāka viññāṇa***.

- In other words, ***vipāka viññāṇa*** materialize via all six sense inputs (eyes, ears, tongue, nose, body, and mind.) We discussed that in several earlier posts on the *Chachakka Sutta* (MN 148.)
- As we discussed in #2, #3 above, ONLY *mano viññāṇa* can also be ***kamma viññāṇa***. Such ***kamma viññāṇa*** arise via “*avijjā paccayā saṅkhāra, saṅkhāra paccayā viññāṇa*.”

Summary

14. The MIND generates *saṅkhārā* with INTENTIONS to do, speak, or think. Such *kāya*, *vacī*, and *mano saṅkhārā* lead to *kamma* done with actions, speech, and thoughts.

- The strong *saṅkhārā* or *abhisāṅkhārā* generates *kammic* energy. Such energies can be called *dhammā*, *kamma bīja*, or *kamma viññāṇa*. They can bring *vipāka* during a lifetime or bring future rebirths.

15. We have covered a lot of material in this post. It is impossible to go into details (if we do, we will not get to finish the discussion on *Paṭicca Samuppāda* for a long time!)

- It is not necessary to try to learn *Abhidhamma* in a rush. However, it is a good idea to try to understand the basic concepts.

10.9.9 Paṭicca Samuppāda – From Mind to Matter

January 11, 2020

Where is the “Mind-to-Matter” Step in *Paṭicca Samuppāda*?

1. *Akusala-mūla Paṭicca Samuppāda* starts with “*avijjā paccayā saṅkhāra*” and ends with “*bhava paccayā jāti, jāti paccayā jarā, maraṇa,..*”

- The first step involves generating defiled thoughts (*mano*, *vacī*, and *kāya saṅkhāra*) due to *avijjā* (not being aware of the Four Noble Truths.) In the end, that leads to births of physical bodies (*jāti*) that will then undergo old age and death.

- How do thoughts lead to the births of human beings and other living beings?

Javana Citta Create Energy!

2. I laid the foundation for this post in a recent post, "[Dhammā, Kamma, Saṅkhāra, Mind – Critical Connections](#)." Please review that as needed.

- The critical point is that our thoughts (specifically *javana citta*) CREATE energy! That may be hard to believe.
- Even a few hundred years ago, many people thought that the Buddha taught some other things that were "hard to believe." For example, Buddha taught that there are an uncountable number of planetary systems like our Solar system in the universe. However, before Galileo invented the telescope, people believed that Earth was at the center of the universe! See the "[WebLink: en.wikipedia.org: Geocentric model](http://en.wikipedia.org:Geocentric_model)."
- Even after reading the previous post mentioned above, many of you may not have caught on to the fact that the mind creates energy. And that is what leads to the "arising of physical bodies" in future existences (rebirths.) You may want to read that post after reading this one, and things will become more clear.

Thoughts Create "Seeds" That Can Give Rise to Physical Bodies

3. In that previous post, we discussed that such minute amounts of energies created by our thoughts are PART OF *dhammā* (with a long "a" at the end.)

- Of course, such minute amounts of energy cannot DIRECTLY create massive/dense bodies like ours.
- When a living being grasps a new existence (*bhava*), only a "mental body" or "*manomaya kāya*" for the new life appears. It is a "mental body" since it is mostly mental with only a trace of matter. **Very little kammic energy is enough to create that "mental body."**
- This "mental body" or "*manomaya kāya*" is the same as a *gandhabba* or a "*paṭisandhi viññāṇa*." **One creates one's future via one's *saṅkhāra* (i.e. that is the way one THINKS). *Paṭicca Samuppāda* describes that process.**
- That is why it is CRITICAL to understand the previous three posts: "[Dhammā, Kamma, Saṅkhāra, Mind – Critical Connections](#)," "[Buddhist Explanations of Conception, Abortion, and Contraception](#)," and "[Cloning and Gandhabba](#)."

4. The word "*kāya*" in Buddha Dhamma means a "collection." Thus, this "body" that is created by *kammic* energy consists mostly of the four "mental aggregates." **It has only a trace of matter (much smaller than an atom in modern science.)**

- However, it has all five aggregates of *rūpa*, *vedanā*, *saññā*, *saṅkhāra*, and *viññāṇa*. **Of course, the "*rūpa kāya*" is unbelievable small, but the "four mental aggregates are the same as those experienced by a living person with a physical body.**
- That "mental body" or "*manomaya kāya*" is the same as *gandhabba*! However, after the initial formation, *gandhabba* can "solidify" somewhat by "taking in scents or aroma." Hence the name "*gandhabba*" ("*gandha*" + "*abba*" or "taking in scents.")
- For details on *gandhabba*, see, "[Mental Body – Gandhabba](#)."

It is Kamma Viññāṇa That Sets Up Energy for a New Existence (Bhava)

5. There are no "*rūpa*" in PS steps up to "*viññāṇa*." As we have discussed, a *kamma viññāṇa* that arises via "*saṅkhāra paccayā viññāṇa*" is a type of "*rūpa*" because it has "energy." As Einstein showed with his famous equation, $E = mc^2$, energy is also a manifestation of matter. Again, see "[Dhammā, Kamma, Saṅkhāra, Mind – Critical Connections](#)."

- **Then at the next step, there is “*nāmarūpa*.” That is where a conventional “*rūpa*” becomes “live.”** That is precisely what happens when a “*paṭisandhi viññāṇa* descends to a womb” and makes an inert zygote become alive! That occurs at the “*viññāṇa paccayā nāmarūpa*” step in *Upapatti* PS.
- The post “[Buddhist Explanations of Conception, Abortion, and Contraception](#)” explains how a “*paṭisandhi viññāṇa*” leads to the creation of a “new human body.”
- Sexual intercourse only creates the “material basis” for a new life. An egg (from the mother) combines with sperm (from the father) to form a single cell, a zygote. **That zygote is inert (a *rūpa*),** just like the egg and the sperm. An existing “**mental body**” or a ***gandhabba* (*nāma* with energy)** needs to merge with that zygote to form the ***nāmarūpa* or the fetus (with mind and body).**
- Sexual intercourse is not necessary to form the zygote or the “material base” for a new “physical body.” A zygote can be created in a laboratory, but still requires eggs from the mother; see, “[Cloning and Gandhabba](#).”

“*Nāmarūpa Paccayā Saḷāyatana*” in *Upapatti Paṭicca Samuppāda*

6. That “live person” or the fetus will grow for nine months to complete the formation of all six sensory faculties. That is the “*nāmarūpa paccayā saḷāyatana*” step in *upapatti* PS. As we know, “*saḷāyatana*” represents the “six sensory faculties” of a living being with a “body and mind.”

- Therefore, the transition starts with the step “*saṅkhāra paccayā viññāṇa*,” Then, it goes through the “*viññāṇa paccayā nāmarūpa*” step, before finalizing the formation of a “human with six sensory faculties” at the “*nāmarūpa paccayā saḷāyatana*” step.
- However, it is essential to understand that a “*paṭisandhi viññāṇa*” leading to a rebirth must have been cultivated previously. Such a *viññāṇa* “builds up” over MANY “[Idappaccayatā Paṭicca Samuppāda](#)” cycles that take place DURING a life or even over many lives.

Example of an Alcoholic Making an “Animal *Bhava*”

7. Let us consider an example to illustrate how one cultivates a *paṭisandhi viññāṇa* suitable for an animal over time. Let us consider an alcoholic/drug addict. I am not talking about a person who takes an occasional drink. Instead, this person has an addiction to alcohol or drugs.

- As we have discussed in recent posts on the *Chachakka Sutta* (MN 148), one starts thinking about a certain *ārammaṇa* (in this case, drinking) when thought about that *ārammaṇa* comes to mind as a *vipāka viññāṇa*. In this particular case, it could be seeing an alcohol bottle, hearing about an upcoming party, or just habitually remembering that “it is time to have a drink.”
- As explained in those posts, one’s mind quickly gets to “*taṇhā*” (or “getting stuck” in that *ārammaṇa*.) Thus, a PS process would start at the “*taṇhā paccayā upādāna*” step. See, “[Icchā \(Cravings\) Lead to Upādāna and to Eventual Suffering](#).”
- That is when one starts THINKING about that *ārammaṇa* that came to the mind. That is the “*avijjā paccayā saṅkhāra*” step of a new PS cycle.

Nāmarūpa in “*Idappaccayatā Paṭicca Samuppāda*” Are Just “Visuals”

8. Suppose the alcoholic/drug addict in our example is sitting at his desk at work. Due to his habit, an upcoming party may come to his mind via “*manañca paṭicca dhamme ca uppajjati manoviññāṇaṃ*.”

- Of course, he will be instantly “stuck in that *ārammaṇa*,” and the “*taṇhā paccayā upādāna*” step in PS gets him started on “*avijjā paccayā saṅkhāra*.” Thus, he starts thinking about the experience that he is going to have in the upcoming party. Those are *vacī saṅkhāra*.

- That leads to the arising of a *viññāṇa* (anticipation or the expectation of the possible enjoyments) via “*saṅkhāra paccayā viññāṇa*.” **The *javana citta* in his thoughts start creating energy for that *viññāṇa*.**
- That involves visualizing “party scenes” at the upcoming party and also his past experiences in similar situations. He will imagine the friends who will be there, what kind of alcohol, food, and other types of entertainment will be there. **These are all “*nāmarūpa*” or visuals that arise in his mind.** These *nāmarūpa* are very much like what we experience in a dream, just visuals.

Some of those *Viññāṇa* and *Nāmarūpa* Cultivated Could be Compatible with Animal Mindsets

9. Some of those *viññāṇa* and *nāmarūpa* cultivated by the alcoholic/drug addict in our example could be compatible with those of animals. That is a critical point.

- During some of these parties, alcohol or drug usage could get to extreme levels. Some people may pass out and could be unable to walk. They will be dragging themselves on the floor like animals.
- Some may be engaging in sexual misconduct. Such bodily actions are more potent than such cultivating *vacī saṅkhāra*. However, in most cases, it is the cultivation of *vacī saṅkhāra* (thinking about such activities with *vitakka/vicāra*) that lead to bodily actions.
- Both kinds of *saṅkhāra* lead to the growth of *paṭisandhi viññāṇa* suitable to bring about an animal birth in the future (in an *Upapatti* PS process.)

Nāmarūpa In “*Viññāṇa Paccayā Nāmarūpa*” Are Two Kinds

10. It is critical to note that the “*nāmarūpa*” discussed in #8 are different from those in #5.

- The *nāmarūpa* in #8 helps build that *viññāṇa* via the backward step, “*nāmarūpa paccayā viññāṇa*.” When the alcoholic is making those “visualizations,” he is cultivating that *viññāṇa*. Thus, each is helping grow the other. That often happens in “[Idappaccayatā Paticca Samuppāda](#)” cycles.
- For example, Ven. Sariputta in the “[WebLink: suttacentral: Nalakalāpī Sutta \(SN 12.67\)](#)”: “*Seyyathāpi, āvuso, dve naḷakalāpiyo aññamaññaṃ nissāya tiṭṭheyyuṃ. Evameva kho, āvuso, nāmarūpa paccayā viññāṇaṃ; viññāṇa paccayā nāmarūpaṃ;..*” OR “Just as two sheaves of reeds might stand leaning against each other, so too, with *nāmarūpa* as condition, *viññāṇa* comes to be. With *viññāṇa* as condition, *nāmarūpa* comes to be..”
- **On the other hand, the “*viññāṇa paccayā nāmarūpa*” step happens only once in *upapatti* PS cycles.** That involves a special “*paṭisandhi viññāṇa*” (*gandhabba*.) When that *paṭisandhi viññāṇa* (or *gandhabba*) descends to the womb, it merges with the zygote and creates a new “*nāmarūpa*” or a “live fetus.” See, #5 above and the posts referred to there, “[Buddhist Explanations of Conception, Abortion, and Contraception](#)” and “[Cloning and Gandhabba](#).”

It Is Important to Review Related/Past Posts Often

11. Another thing to remember is that even a given PS cycle does not proceed in just one direction. All those steps, as with many others in PS, go backward too. For example, “*viññāṇa paccayā nāmarūpa*” and “*nāmarūpa paccayā viññāṇa*” steps may go back and forth strengthening each other in many cases (see #8, #9 above.)

- I have explained this in several previous posts in this series: “[Paticca Samuppāda – Not ‘Self’ or ‘No-Self’](#)” A vital case discussed in “[Tanhā Paccayā Upādāna – Critical Step in Paticca Samuppāda](#).”
- There is a lot to grasp in this post. Please make sure to read the related posts mentioned above, so that these concepts are well-understood.

- It is critical to have a good idea about these concepts to see how one makes one's future rebirths. Furthermore, the type of rebirth CORRESPONDS to the kind of *abhi(saṅkhāra)* cultivated with “*avijjā paccayā saṅkhāra*.”
- That is how “mind to matter” transitions take place. **And this is why the Buddha said that the mind is at the forefront.**
- All relevant posts at, “[Origin of Life](#).”

XI Dhamma and Philosophy

 - [““The Life of the Buddha” by Bhikkhu Ñānamoli”](#)

11.1 Dhamma and Philosophy – Introduction

1. One may ask the question: “What does Buddhism have to do with philosophy?”

The Merriam-Webster online dictionary defines philosophy as:

- the study of ideas about knowledge, truth, the nature and meaning of life, etc.
- a particular set of ideas about knowledge, truth, the nature and meaning of life, etc.
- a set of ideas about how to do something or how to live

Other dictionaries and books define philosophy in a similar manner.

2. The origin of the word “philosophy” comes from the Greek words “phila” (meaning love) and “sophia” (meaning wisdom). Thus philosophy is “love of wisdom”. It is said that Pythagoras (570 BCE) coined the term, and that is basically the time the Western philosophers started looking for “natural explanations” instead of accepting that a Creator needed to be invoked to explain phenomena that we see around us.

- This method of “acquiring knowledge” was supposed to be based on reason, argument, and observation. **But as we discuss at this website, any knowledge gained by that method is necessarily limited, because we have senses faculties that are very limited, and whatever deductions we make with unpurified minds are faulty and incomplete;** see, “[Dhamma and Science](#)” section for an introduction. Science actually branched off from philosophy, first as “natural philosophy”.
- Therefore, Buddha Dhamma has a lot to say about philosophy, even though there is no such thing as “Buddhist philosophy”; there is only “Buddha Dhamma” which describes the nature. The Buddha did not speculate on anything like philosophers. He said he experienced everything that he taught. One time a *Brahmin* asked the Buddha whether he believed *devas* and hell beings exist. The Buddha said he KNOWS they exist and could see those beings.
- Buddha Dhamma can sort out the philosophical arguments that have gone back to the Buddha’s time (in the Western world); philosophical views have evolved over the intervening time, but Buddha Dhamma has not. Ironically, “the pure form of Dhamma” had been left out of the discussion mainly because “Mahāyāna forefathers” like Nagarjuna, Asanga, and Vasabandhu made up a “Buddhist philosophy”.

3. **Since Buddha Dhamma is a complete set of nature laws only for its faithful followers, it is logical to present it as a philosophy to those who are not familiar with it or who have not seen enough evidence to believe that claim.** In presenting Buddha Dhamma as a philosophy the second definition is a more valid one, because these are not evolving ideas; rather, they were laid down 2500 years ago, and have been documented in the *Tipiṭaka*, the Pāli Canon.

- It is a set of ideas about knowledge and truth not only about human existence, but ALL that exists in the seen and unseen parts of “this world”, which also encompasses not only the Solar system, but an infinite number of such planetary systems.
- This may sound as an arrogant claim, but it is not. One could scan different sections of this site and see that there is a complete theory about the whole existence; it may take another year or more to get even the “basics” of the Dhamma published. As of mid-2015, I have not yet been able to present even a fraction of the Abhidhamma material.

4. My basic incentive for creating this section is to make a request to the philosophy community: It is time to take a close look at Buddha’s world view, and see how it compares with existing philosophical arguments on various topics. No one has done a serious study on the worldview of the Buddha.

- It has been difficult to make a true assessment of what the “real Buddha Dhamma” is, because there are so many different versions out there.

- I hope to make a logical presentation to convince the philosophy community. Please make any comments/requests, and I will try to address any serious request.

5. Perhaps as important, I want anyone reading the site to appreciate the significance of what the Buddha told us 2500 years ago. Compared to the pure Dhamma, all philosophical theories are at very early stages. Any interested reader can learn about the current philosophical arguments (and those going back to the early Greek philosophers) and then compare with Buddha Dhamma presented at this site.

6. Within the framework of the Buddha Dhamma all standard philosophical questions have been answered.

- These include, “the relation between the brain and mind”, “the nature of death”, “whether we have free will”, etc. Thomas Nagel’s short book listed below gives an introduction to some of such topics.
- Most existing literature on Buddhist philosophy says some of these questions are in the category of “questions that the Buddha refused to answer”, which itself is an incorrect statement; see, [“Misconceptions on the Topics the Buddha ‘Refused to Answer’](#). The Buddha refused to answer questions posed by a person who was not capable of comprehending the answers. But he has given the answers in other places.
- We will discuss how Buddha Dhamma provides answers to these philosophical questions one by one, as sufficient background material is added to site.

REFERENCES

For those who are interested on the subject, here are some references (both for philosophy in general and also on “Buddhist philosophy”; not in any particular order). Among those on “Buddhist philosophy”, I have not read a single book that provides a true description of the Buddha’s world view.

For those who are not familiar with the subject, I would recommend the first two introductory books on philosophy:

“What does it all mean?” by Thomas Nagel (1987) – Excellent introductory book and only 100 pages.

“The Making of a Philosopher”, by Colin McGill (2003) – Another excellent introductory book.

“Buddhist Philosophy – Essential Readings”, ed. by William Edelglass and Jay L. Garfield (2009).

“Mahāyāna Buddhism: The Doctrinal Foundations”, by Paul Williams (2009)

“Buddhism as Philosophy”, by Mark Siderits (2007).

“Buddhist Philosophy – A Historical Analysis”, by David J. Kalupahana (1976).

“Causality: The Central Philosophy of Buddhism”, by David J. Kalupahana (1975).

“A History of Buddhist Philosophy”, by David J. Kalupahana (1992).

“Nagarjuna – The Philosophy of the Middle way”, by David J. Kalupahana (1986).

“Causality and Chance in Modern Physics”, by David Bohm (1957).

“Conversations on Consciousness”, by Susan Blackmore (2006) – input from a number of philosophers.

“Mind – A Brief Introduction”, by John R. Searle (2004).

“The Character of Consciousness”, by David J. Chalmers (2010).

“Consciousness Explained”, by D. C. Dennett (1991).

“The Quest for Consciousness: A Neuroscientific Approach”, by C. Koch (2004).

“Rocks of Ages: Science and Religion” by Stephen Jay Gould (2002).

“The Self and Its Brain”, by Karl R. Popper and John C. Eccles (1977).

Next, “[Philosophy of the Mind](#)”,

11.2 Philosophy of the Mind

1. One nice thing about Buddha Dhamma is that there are no separate theories for the mind, meaning of existence, the physical world, or ANYTHING in this world. Thus I can refer to the section on “[Buddha Dhamma](#)” when I talk about the mind, the same way I refer to that section when I discuss “[Dhamma and Science](#).”

2. There seems to be three basic problems that the philosophers are trying to tackle regarding the mind (there are many others, but let us start with these):

- How does the mental experience arise in a physical body? Most scientists and philosophers say that it originates in the brain, but they have not been able to make the connection. This is the “mind-body problem”.
- How can non-physical mental states of consciousness cause something in the physical world? For example, how can your intention ever cause a movement of your hand? This is the “problem of mental causation”. Yet, the case for “physicalism” — that everything in this world is matter-based — is made with this as a premise.
- Finally, how your thoughts refer to something that is happening (or happened) in a distant city? This is called the “problem of intentionality”. If you are thousand miles away from home, you can take “tour” of the home, room by room, in your mind.

3. The philosophers are divided into two camps in addressing the above problems:

- One camp says the “physical” and “mental” are two distinct realms. They do not think “mental” can arise from ‘physical’; This camp is mostly religious and attribute the “mental” to the concept of a “soul”. They are “dualists”.
- The other camp is ‘materialistic’: they say the ‘mental’ arises from “physical”. In the worst case, some materialists deny even the existence of a mental reality, even though I cannot quite understand what that means. Because they are obviously thinking about these concepts, which is “mental”.

4. Let us look at the current status of these two camps:

- Following the extreme dualism of Rene Descartes, there have been many dualists, including Stephen Jay Gould whose “non-overlapping magisteria” in the late 1990’s put matter and mind into non-overlapping disciplines: matter can be handled by science and morality and mind can be left to religion. However, these days only dualists left seem to be those who hold a dualist view for religious reasons, i.e., a soul.
- These days most philosophers are materialists. With the amazing progress of science and technology, it is hard for most people to believe anything that is not “confirmed” by science. And they think science, based on a purely materialistic approach, should be able to explain everything about ‘this world’. They believe that it is only a matter of time before brain activity will be able to explain the workings of the mind; see the reference list in “[Dhamma and Philosophy – Introduction](#).”
- The inadequacy of the materialist approach is detailed in a comprehensive manner by Thomas Nagel in his recent book, “Mind and Cosmos” (2012); it is an easy read with no fluff and only 128 pages. I was impressed by how close he came to advocating a “mind first” approach, just like in Buddha Dhamma (apparently he does not know anything about Buddha Dhamma and does not even mention it).

5. Mind is the ultimate cause of everything in this world. The Buddha said, “*mano pubbangama dhamma, mano setta manomaya...*”. “Mind precedes all dhamma, all dhamma are mind made...”. But Buddha’s is not a dualist world view. Mind and matter are intimately connected.

- This is in sharp contrast to both the “dualistic” and “materialistic” views.
- Most people translate the above Pāli verse as, “mind precedes all mental phenomena.....” So, we need to examine what “dhamma” means here.

- Dhamma explains how anything and everything in this world comes about “dhamma” means “to bear” or “to explain” or “how anything “comes about”. Nothing happens without (multiple) causes.
- In the *Sabba Sutta*, the Buddha clearly defines what “*sabba*” or “all” that in “in this world”: It is everything that can be experienced via the five physical senses and the mind. Specifically, eye and visible objects, ear and sound, nose and smells, tongue and tastes, body and touch, and the mind and concepts (these are the six internal and corresponding six external “*ayatana*s”), this is “the all”.
- Is there anything that is not included within those 12 *ayatana*s? There is nothing else in the whole world that is not included in those 12 *ayatana*s. Six of those are “internal”; eye, ear, nose, tongue, body, and mind, and the other six are external, they exist “out there”.
- Therefore, it is NOT correct to say that “dhamma” in the above verse includes only mental phenomena, as many translators of the *suttā* have done. This is why I keep saying that we need to check consistency all the time. If one thing is not defined properly, then that error propagates and lead to contradictions.
- This “all” can also be expressed as the 31 realms of existence; of those 31 realms, normal humans experience only two realms (human and animal); see, “[The Grand Unified Theory of Dhamma](#)”. But it is possible to experience other realms via developing mental power, i.e., *jhānā*: see, “[Power of the Human Mind – Introduction](#)” and the follow-up posts. Thus, the Buddha’s world view is much more expansive than the ones that are subjected to current scientific and philosophical investigations.

6. According to Buddha Dhamma, the ultimate realities in this world are just 28 types of *rūpa* (matter), *citta*, and 52 types of *cetasika*. Then different combinations of the *cetasika* in *citta* gives rise to 89 (121) types of *citta*.

- Of course *citta* and *cetasika* constitute the mind, and 28 types of *rūpa* constitute matter.
- Another way to state the same thing is in terms of the 6 *dhatu*s: *pathavi*, *āpo*, *tejo*, *vāyo*, *akasa* (space), and *viññāṇa*. The 28 types of *rūpa* mentioned above (including *akasa dhātu*) are derived from the *sātara mahā bhūta*: *pathavi*, *āpo*, *tejo*, *vāyo*. *Viññāṇa* constitutes of *citta* and *cetasika*.
- All inert things and plants in this world (31 realms) are made of *rūpa*. All sentient beings “are made of” *rūpa* and have *viññāṇa* (*citta* and *cetasika*), i.e., a mind.
- As I will explain in a separate post, *rūpa* are ultimately caused by the mind; see, “[The Origin of Matter – Suddhatthaka](#).” But *rūpa* are inherently unstable (this is basically the root cause for suffering in the material world), and there is a fundamental law in physics which states the fact that matter is unstable and the universe itself “runs down”; see, “[Second Law of Thermodynamics is Part of Anicca!](#).”
- When the mind is released from the material body, one attains *Nibbāna*, i.e., one is never reborn “in this world”. It is the material body that is subject to decay and death, and lead to suffering.

7. The reason that I started this website is that it is not possible to provide a reasonable explanation of the Buddha’s world view in an essay or even in several essays. At the website, I can make references to related posts. I hope it would be a rewarding experience for anyone who is willing to allocate some time to read AND contemplate.

- Another reason to start the website is that I want to have it all out in the open, so anyone can challenge any inconsistency. I want to find the truth myself, and the only way to do that is to get as many as possible to look at the emerging picture and make corrections to any errors anyone can find.
- Therefore, I would appreciate any comments pointing to any errors or inconsistencies anywhere on the site, in addition to suggestions for relevant topics to discuss.
- There is more to follow. This is an introduction.
- How “physical” arises from “mental” in the most fundamental sense is really complex and we may not get to that for a while. First we will concentrate on how physical bodies of the living beings arise *with causes from* the “mental”. I will be building up the Abhidhamma section and then will refer frequently to that section as we proceed.

8. It is time to make a paradigm change: Consciousness is not only ontologically fundamental, it takes precedence over matter. Mind can create matter. Right now we have evidence that the mind can change the brain; see, "[Truine Brain – How the Mind Rewires the Brain via Meditation/Habits.](#)" **If the brain creates the mind, how can the mind alter the brain?**

9. Here are a couple of papers on the subject related to the "mind body problem" for those who are interested (click on them to open):

[WebLink: All machine and no ghost- McGinn-2012](#)

Next, "[Buddha Dhamma: Non-Perceivability and Self-Consistency](#)",

11.3 Is Buddha Dhamma (Buddhism) a Religion?

October 21, 2015; revised November 8, 2015; rewritten December 7, 2022

Buddhism (Buddha Dhamma) is a self-consistent worldview. That worldview explains the origin of suffering in this world and the way to be liberated from suffering. In that sense, it can be called a religion too.

Buddha Dhamma – A Self-Consistent Worldview and a Religion

1. It is best to learn (or even scrutinize) Buddha Dhamma with a mindset pretty much the same as when trying to learn about a new concept, say in mathematics or science. Some key assumptions (axioms) are involved, which cannot be proven but do make sense, especially if one takes time to contemplate. That is the approach followed in mathematics and science as well.

- That worldview has embedded in it the root causes and conditions for suffering to arise and the way to stop that suffering. In that sense, it is a religion, too, even though without the concept of a Creator.
- That is contrary to conventional religions, which are rooted in a “Creator God” based entirely on faith.
- The foundation of Buddha Dhamma, *Paṭicca Samuppāda*, describes the entirety of this world (including mental phenomena).
- However, if one needs to treat Buddha Dhamma (teachings of the Buddha) as a worldview, then learning *Abhidhamma* would be required. Finer details are in *Abhidhamma*.

What Is a Religion?

2. Merriam-Webster defines “religion” as:

- The belief in a Creator God or a group of Gods
- An organized system of beliefs, ceremonies, and rules used to worship a god or a group of gods
- An interest, a belief, or an activity that is very important to a person or group

The Oxford dictionary has the following definitions:

- The belief in and worship of a superhuman controlling power, especially a personal God or gods
- A particular system of faith and worship
- A pursuit or interest to which someone ascribes supreme importance

Buddhism Is an “Atheistic Religion”

3. Thus, the word “religion” invokes the idea of a Creator God in most people’s minds. Even though this is correct for most major religions of the world, it is not correct for Buddha Dhamma.

- The foundation of Buddha Dhamma is that the world has existed “forever” (no First Cause, and thus it was not created). Planetary systems like our Solar system (*cakkavāla*) come and go, but there have always been living beings. See “[Buddhism and Evolution – Aggañña Sutta \(DN 27\)](#).”
- It may appear inconsistent with the current “Big Bang Theory,” which says our universe started some 14 billion years ago in a “Big Bang”. Religions embraced the idea of the Big Bang when it was first proposed since it had connotations of creation. However, the inflationary theory that describes the Big Bang (proposed in the 1990s) says there could be multiple parallel universes. Thus, the hope for a unique “event of creation” fizzled. The point is that modern science has no clear picture of how the universe behaves.
- Of course, the “Big Bang Theory” is a theory; it is not yet proven. Some scientists do not believe everything “popped up” suddenly in a Big Bang. They believe that universes are cyclic, i.e., transform and

evolve; see, for example, “Endless Universe – Beyond the Big Bang” by P. J. Steinhardt and N. Turok (2007).

4. Buddha Dhamma does not count as a religion if one takes the first two definitions from either Merriam-Webster or Oxford dictionary. Yet, it can be included in the category of #3 above.

- **One could say that the prominent religions are theistic**, i.e., based on the belief in a Creator.
- Buddha Dhamma can be categorized as an **atheistic religion** because there is no assumption of a Creator, yet it can lead to the end of suffering.
- It must be noted that in Buddha Dhamma, there are beings called “*Devā*” (sometimes translated as “gods”) in other realms; they cannot affect our lives in a significant way, much less than creating universes.

Buddha Dhamma Is the Grand Unified Theory Sought by Science

5. However, I prefer to label Buddha Dhamma as the “ultimate science.” It encompasses all of nature’s laws, not only about material phenomena but also about the mind. It is the Grand Unified Theory that scientists strive to discover, but they only focus on the material aspects. See “[The Grand Unified Theory of Dhamma](#).”

- Scientists are beginning to realize the importance of the mind. Many scientists are attempting to connect quantum theory and the mind. This will NOT work because any “matter-based theory” cannot explain the mind. Mind is the forerunner: “[Manopubbangamā Dhammā](#).”
- The mind takes precedence over matter; see the “[Abhidhamma](#)” section. Those who can spend time and learn Abhidhamma will realize no scientist can ever come close to a Buddha.
- The presence of innumerable planetary systems in our universe was known to the Buddha and is described in the *Tipiṭaka* even though science discovered that only within the past two hundred years; see “[Dhamma and Science](#).”

Current Debates Between Philosophers and Theologians

6. When I listen to current debates between those who believe in a Creator and those who don’t (atheists), I think the following summarizes the key ideas from each group:

- Atheists correctly point out that there is no evidence supporting the idea of a Creator God. Our ancestors could not fathom the workings of our complex world and envisioned a Creator who was supposed to have created humans and a suitable habitat for them. But many “mysteries” of our world have been resolved with the advancement of science, and these findings contradict key ideas in prominent religions.
- Those on the other side insist that the idea of a “totally physical world” goes against our experiences and innate feelings that cannot be denied. That there must be something in addition to a physical body, i.e., a “conscious experience” cannot be attributed to atoms and molecules in our bodies. Furthermore, they point out that science has not been able to explain even the working of a single living cell.
- I have discussed that in detail at the beginning of the “[Origin of Life](#)” section.

Buddha Dhamma Has the Explanatory Power and Is Self-Consistent

7. Buddha Dhamma addresses both of those critical points. First, on the side of the atheists, there is no need for a Creator. Natural processes can account for not only what happens on Earth but an uncountable number of habitable planetary systems in a vast universe.

- On the other hand, science can account for only how the material world evolves. As the theologians argue, there is something other than inert matter in this world, and that is consciousness. Consciousness cannot be derived from inert matter.

- However, consciousness was not imparted by a Creator either. Furthermore, contrary to what most theologians believe, animals are also conscious (even though their ability to make decisions is much lower than humans).
- Introductions are at [“Buddha Dhamma: Non-Perceivability and Self-Consistency”](#) and [“Gödel’s Incompleteness Theorem.”](#)
- This is why one could say Buddha Dhamma is an “atheistic religion.” It describes the way to liberation (from suffering) without the concept of a “Creator God.”

8. Some people tell me that Buddha Dhamma is not that different from other religions because certain “assumptions” need to be believed “on faith,” for example, that there is a rebirth process.

- However, the axiom of a rebirth process is not to be taken as a belief, like in the case of the Ten Commandments. It is up to oneself to examine and accept or reject that concept. Even a Buddha cannot make anyone be “forced to believe” in anything. See [“Evidence for Rebirth.”](#)
- Thus, there is a difference in what is meant by “faith” in Buddha Dhamma compared to that in theistic religions. In any theistic religion, one has to accept the idea of a Creator without question; it is THE basis of any prominent theistic religion.
- Furthermore, mathematics and sciences have built-in assumptions too. New theories must be developed if new findings contradict a given assumption. Buddha Dhamma (represented by the Tipiṭaka) has not changed over the past 2500 years.
- Buddha Dhamma describes the nature of this world; [The Grand Unified Theory of Dhamma](#) has some fundamental axioms, like geometry or the theory of relativity. These “assumptions” can be verified to be correct if one takes the time to examine the evidence.

9. Buddha Dhamma has the explanatory power to explain anything in this world, ranging from the existence of innumerable planetary systems (which was only accepted within the past few hundred years by science) to how morality comes about without a Creator; see, [“Dhamma and Science”](#) and [“Origin of Morality \(and Immorality\) in Buddhism.”](#)

- It took us the workings of many brilliant scientists, from Galileo to Newton to Einstein, to realize the vastness of this universe, which the Buddha described 2500 years ago.
- But the even more astounding fact is that the Buddha described in detail how consciousness arises in a living being, in addition to describing the material world. Science is still under the “wrong view” that consciousness can arise in the brain out of inert matter.
- See the [“Origin of Life”](#) and [“Abhidhamma”](#) sections for details.

Main Points Against Both Materialism and “Creator-Based” Religions

10. There are many videos on YouTube explaining the shortcomings of modern science (based on a materialistic world) and “Creator-based” religions. Both sides are correct about the shortcomings of the other side. I will highlight only one key obstacle to be overcome by each side.

- The critical issue with “Creator-based religions” is why a Creator would let the man he created suffer. He could have created a suffering-free world. See [“Wrong View of Creationism \(and Eternal Future Life\) – Part 2.”](#)
- On the other hand, modern science cannot explain how human life begins or prove that consciousness originates in the brain. See [“Views on Life – Wrong View of Materialism.”](#)

Arguments Against a Creator (Prominent Religions)

11. For those who would like to look into arguments on why theistic religions do not make sense, below is a compilation of arguments by Sam Harris, a prominent atheist.

[WebLink: youtube: Sam Harris: Best Arguments against Religion #1](#)

First segment (up to 2 minutes): Buddha Dhamma is incompatible with any other religion.

Second segment (up to 5 minutes): Buddha Dhamma agrees with Mr. Harris' points.

Third segment (up to 10 minutes): Buddha Dhamma agrees with Mr. Harris' points. Some assumptions of prominent religions have no basis. However, science does not explain everything either.

Final Segment: Yes. God's will has nothing to do with the suffering present in this world.

- I will skip the other videos in the series, which do not have anything contradictory to Buddha Dhamma.
- In the third video, at one point, he mentions Buddhism by name, lumped with other religions. That is because he has not been exposed to the correct version of Buddhism. Just because Mr. Harris has practiced "breath meditation" does not make him knowledgeable on Buddha Dhamma. As I have explained, *Ānāpānasati* meditation in Buddhism is not "breath meditation." See "[Is Ānāpānasati Breath Meditation?](#)"

Arguments Against Materialism

12. Modern science can explain many phenomena involving inert matter. But it cannot explain mental phenomena, including the origin of consciousness. The following video provides critical arguments against "materialism" because it cannot explain the origins of the human body's complex biology (the video starts at 30 minutes, where this point is discussed.) Dr. Stephen Meyer believes in a "Creator God," but his arguments against materialism are valid. (Some scientists have moved to the "creation" camp simply because they cannot explain such phenomena any other way; they are unaware of the correct version of Buddhism.)

[WebLink: youtube: James Tour: The Mystery of the Origin of Life](#)

- Modern science cannot also explain when or how sentient life begins in a zygote; see, "[Buddhist Explanations of Conception, Abortion, and Contraception](#)." This is why I am saying that science is incomplete; it does not know about the "*gandhabba* state" of a human. By the way, a "*gandhabba*" is not a soul; see, "[Ghost in the Machine – Synonym for the Manomaya Kāya?](#)".
- Regarding the mind, science is still at the same stage as it was 400 years ago regarding the material world. Before Galileo discovered the existence of planets, stars were believed to be embedded in a celestial sphere around the Earth; see "[Dhamma and Science – Introduction](#)."

Buddha Dhamma can explain all the aspects being debated by both sides. It can fully explain the material world and mental phenomena, including consciousness. See "[Origin of Life](#)."

11.4 The Infinity Problem in Buddhism

July 15, 2017; Revised February 5, 2018; Re-written March 23, 2021; revised August 13, 2022; August 14, 2022; re-written September 24, 2022

The infinity problem in Buddhism is the following. “Each of us” has been in the rebirth process for an infinite time. Thus, “each of us” has been exposed to Buddha Dhamma countless times, i.e., made infinite attempts to attain *Nibbāna*. How is it possible that all of “us” have not attained *Nibbāna*?

Introduction – “Infinite Monkey Problem”

1. The question is based on the following statement in several *suttā* in *Anamatagga Samyutta* starting with the “[WebLink: suttacentral: Tinakattha Sutta \(SN 15.1\)](#)”: “There is no discernible beginning to the rebirth process.” In other words, we have had an infinite time to attain *Nibbāna* (because an infinite number of Buddhas must have been born too.) So, why have we all not attained *Nibbāna* yet?”

- This issue has been discussed in discussion forums without a conclusion. See “[WebLink: dhammalwheel.com: The problem of infinity in Buddhism](#)” at Dhamma Wheel and “[WebLink: suttacentral: The infinity problem in Buddhism](#)” at the Sutta Central forum in 2017.
- This question seems to have its origin in the “[WebLink: wikipedia.org: Infinite Monkey Theorem](#),” which states that a monkey hitting keys at random on a typewriter keyboard for an infinite amount of time will almost surely type any given text, such as the complete works of William Shakespeare.
- By the way, this infinite monkey theorem is another evidence of how unimaginably large infinity is: “[Infinity – How Big Is It?](#).”

Detailed Analysis of the Infinite Monkey Theorem

2. First, the monkey theorem is based on a monkey typing on a keyboard and generating random letters. It is assumed that the same monkey will keep typing on the keyboard non-stop for an infinite time.

For example, the probability that the monkey will come up with the word “banana” would be **less than 1 in 15 billion, but not zero**. Thus it is a theoretically **possible** outcome, even though improbable.

- But the enormity comes to view when you realize that you have to get a WHOLE TEXT correctly without making too many errors at a stretch (in one continuous period.) For example, to get TWO words correctly, like “yellow banana,” has a probability that is the multiplication of the probabilities of getting each word right. The probability that a monkey gets those two words correctly is less than 1 in a billion-billion (1 in 10^{18}). That is extremely small.

3. The above Wikipedia article says: “..the probability that **monkeys filling the entire observable universe** would type a single complete work, such as Shakespeare’s *Hamlet*, is **so tiny that the chance of it occurring during a period hundreds of thousands of orders of magnitude longer than the age of the universe** is *extremely* low (but technically not zero).”

- That is because scientists estimate the age of our current universe to be only about 14 billion years. Infinity cannot be assigned a number. Any large number you can think about CAN NOT BE the largest number because you can just add 1 to that number to make it bigger. There is no ending! Thus, given an infinite time, it is theoretically possible that a monkey could type out the complete works of William Shakespeare.
- However, as we see below, the rebirth process involving a “lifestream” can not be compared to the **same monkey** typing on a keyboard for an eternity.

Two Relevant Issues

4. We will discuss **TWO aspects of this issue**.

- **First**, we will show that the infinite monkey theorem's MECHANISM does not apply to the rebirth process. The rebirth process DOES NOT involve a “person/soul/ātman” traveling the *Samsāra* (like a single monkey typing for an infinite time.) Nothing like a soul “moves” from this life to the next. Even the next moment in life arises based on causes and conditions based on the present moment, i.e., via the *Paṭicca Samuppāda* process.
- **Second**, we will show that even if an infinite number of living beings has attained *Nibbāna*, there will still be an infinite number left!

First Issue

There Is No “Person” Traveling the Rebirth Process

5. During the rebirth process, various forms of life manifest. Even though we live human lives now, we have lived in most of the 31 realms described by the Buddha. **We have been born a Deva, a Brahma, an animal, a hell-being, etc. countless times!**

- The concept of a “lifestream” moving from life in one realm to another (rather than a soul incarnating or appearing in different forms) is what the Buddha described. See “[What Reincarnates? – Concept of a Lifestream.](#)”
- **No “unchanging/permanent essence” like a soul moves from one life to the next.** If that were the case, stopping the rebirth process and attaining *Nibbāna* would be impossible! How can a permanent entity cease to exist?
- What is taken to the next life is *anusaya/gati/saṃyojana*. None of those is permanent. Each one can change even momentarily!
- Furthermore, all those entities are associated with suffering. Elimination of *anusaya/gati/saṃyojana* is the end of suffering, not the end of an entity like a soul or an *ātman*. See “[Yamaka Sutta \(SN 22.85\) – Arahantship Is Not Annihilation but End of Suffering.](#)”

6. When one understands that by comprehending “[Paṭicca Samuppāda, Tilakkhana, Four Noble Truths,](#)” one becomes a *Sotāpanna* by removing significant parts of *anusaya/gati/saṃyojana*. **That is getting rid of the wrong view of a “soul/ātman” or “sakkāya diṭṭhi.”** See “[Sakkāya Diṭṭhi and Tilakkhana.](#)”

- As that *Sotāpanna* progresses on the Noble Eightfold Path, more of the *anusaya/gati/saṃyojana* are removed. See “[Kilesa – Relationship to Akusala, Kusala, and Puñña Kamma](#)” and “[Anusaya, Gati, Bhava – Connection to Manomaya Kāya \(Gandhabba\).](#)”
- With the attainment of the *Arahant* stage, ALL *anusaya/gati/saṃyojana* will be lost from the mind. At the death of the *Arahant*, there is nothing left that can initiate another birth, and thus, the rebirth process stops.

Path to *Nibbāna* Is Not a Mechanical Process

7. Therefore, reaching *Nibbāna* CANNOT be considered a mechanical process and, thus, CANNOT be compared to a monkey hitting arbitrary keys on a keyboard to generate Shakespeare's *Hamlet*.

- We can consider a monkey typing a single letter to a living-being hearing the correct Buddha Dhamma. Therefore, we can call that a “single-shot” at *Nibbāna*, corresponding to a single keystroke by a monkey.
- However, a mathematician could still say that there will be an infinite number of such “single-shots” by a living being over an INFINITE time.

8. But the key issue is that it is NOT **the same person** who heard the correct Buddha Dhamma infinite times!

- Therefore, the problem is with the question itself. The infinity problem in Buddhism is phrased as follows: “**Each of us**” has been in the rebirth process for an infinite time. How is it possible that all of us have not attained *Nibbāna*?
- That question assumes that a **fixed person/soul/ātman** is repeatedly reborn! *Paṭicca Samuppāda* explains that there is no such permanent entity being reborn. See “[What Reincarnates? – Concept of a Lifestream.](#)”
- We went through the above discussion to show that the two processes cannot be equated. Now, we address the SECOND issue mentioned in #4 above.

Second Issue

Infinite Number May Have Attained *Nibbāna*

9. It is indeed possible that an infinite number of living beings HAVE ATTAINED *Nibbāna* in the past.

- Not only that, **an infinite number of living beings may have attained *Buddhahood* in the past.** Of course, attaining the *Buddhahood* is infinitely more difficult than attaining *Arahanthood*.
- Therefore, the infinite set of living beings who have attained *Nibbāna* is “much larger” than the infinite set of living beings who have attained *Buddhahood*.
- **The key to this puzzle is to realize that “many levels of infinity” exist.** It has been revealed by mathematicians within the past hundred years, thanks to the pioneering work of the mathematician George Cantor. See “[WebLink: storyofmathematics.com: George Cantor – The Man Who Founded Set Theory.](#)” The following video provides good insights too.

[WebLink: youtube: Cantor's Infinity Paradox | Set Theory](#)

A Nice Visualization of Infinity Within Infinity – The Infinite Hotel Paradox

10. The following video explains why there can be “smaller infinities” types within infinity. In particular, the set of positive integers is a “smaller infinity.” Those who have attained *Nibbāna* fall under that category. Regardless of how many have attained *Nibbāna*, more could attain *Nibbāna*.

- The following video discusses an infinite number of buses filled with an infinite number of guests arriving at an infinite hotel. It is shown that the infinite hotel can accommodate all of them and more!

[WebLink: youtube: The Infinite Hotel Paradox - Jeff Dekofsky](#)

- I have set the video to stop around 2:10 minutes. It is enough to see that the hotel can accommodate an infinite number of guests at any time. During the presence of a *Buddha Sāsana*, only a finite number of living beings (humans, *Devas*, and *Brahmas*) attain *Nibbāna*.
- The rest of the video is more mathematical and shows that even an infinite number of buses with an infinite number of passengers in each bus can be accommodated! You can watch the whole video by clicking “watch on Youtube.”

Other Related Issues

11. Of course, several other questions now arise: Where do all these infinite numbers of living beings live? Do they all live in our Solar system? It will take many more future posts to explain these fully, but we can summarize them as follows.

- Brief answers to those questions are as follows: According to the Buddha, an uncountable number of planetary systems are populated with living beings. While an uncountable number of living beings live in our Solar system, there are an uncountable number of such planetary systems (*cakkavāla*) in the world.

Each cluster of 10,000 such *cakkavāla* can have a Buddha appearing periodically. Thus, there could have been an infinite number of Buddhās.

- Such details are in suttas in the *Tipiṭaka*, mostly in the *Dīgha Nikāya*. I briefly discussed one *sutta*: “[Buddhism and Evolution – Aggañña Sutta \(DN 27\)](#).”

Summary/Additional Resource

12. Infinity is a very complex concept. There are many levels of infinity. Infinity minus infinity can still be infinity.

- Therefore, even as there have been an infinite number of Buddhā and an even higher infinity of those who attained *Arahanthood*, there are still an infinite number of living beings (including us) who have not yet attained *Nibbāna*.
- Even more importantly, there is no contradiction per the “infinite monkey theorem” because the premise/assumption of that theorem does not hold for the rebirth process.
- **Thus, there is no contradiction in either case.**

11.5 Free Will in Buddhism – Connection to Saṅkhāra

November 3, 2018; revised July 6, 2019; June 11, 2022; November 20, 2022

Free will is at the core of Buddhism (Buddha Dhamma). Without free will, attaining *Nibbāna* is not possible. Connection to *vacī* and *kāya saṅkhāra* discussed.

Introduction

1. Free will is at the core of Buddhism (Buddha Dhamma). If one does not have free will, one cannot not attain *Nibbāna*.

- In a mundane sense, the applicability of free will should be obvious. Free will determines (within certain limits) whether one will become a successful businessman or a master thief.
- When I said “within limits”, we can only compare situations for two people born with comparable capabilities. For example, one born with an “*ahetuka* birth” (born with brain defects) will never be able to achieve much success.
- However, a person born with a “normal level of intelligence” (*tihetuka* or *dvihetuka* births) can make decisions that can lead to a wide variety of possible outcomes in the future. For example, one could become a great scientist or a ruthless dictator. Both require a “sharp mind”.

2. In the following video by Sam Harris, we can see where modern philosophers get stuck on the issue of free will.

[WebLink: youtube: Sam Harris on the Illusion of Free Will](#)

- He agrees that things happen due to causes, but he cannot figure out the causes of many things. He says, “you don’t pick your parents; you don’t pick your body...”. **But we do, in a way. That is explained with *paṭicca samuppāda* in Buddha Dhamma.** We even choose our rebirths too; see “[Upapatti Paticca Samuppāda \(How We Create Our Own Rebirths\)](#).”
- As long as he does not believe in rebirth, Sam Harris will never be able to understand those “missing causes”. The rebirth picture provides those “missing causes”. **Laws of *kamma* (causes and effects) operate over many rebirths. One cannot analyze the current life in isolation.**
- **Furthermore, we need to include animals and beings in the other 29 realms to explain the laws of *kamma* fully.**
- Nature treats every living being fairly, according to what they have done in the past.
- One is born into a given existence (human, animal, *Deva*, etc), a given family (good, bad), under different conditions (healthy, handicapped, poor, etc), and so on based on one’s *gati*. **One’s *gati* are based on the types of *saṅkhāra* that one cultivates (basically how one thinks, speaks, and acts).**

Background Material in Buddha Dhamma

3. **Continuing with the critical points in #2:** Another key point is that “*kammic* energy” that leads to future *vipāka* (results) is generated in one’s *javana citta*. Don’t be put off by that word. *Javana citta* are thoughts that arise in one’s mind when generating conscious thoughts about speaking/doing **moral or immoral deeds**.

- *Vacī* and *kāya saṅkhāra* become *abhisāṅkhāra* (strong *saṅkhāra*) that can lead to future *vipāka*, **ONLY IF** those actions or speech are either **moral (good *vipāka*) or immoral (bad *vipāka*)**.
- That is the difference between *saṅkhāra* and *abhisāṅkhāra*; see, “[Saṅkhāra – What It Really Means](#).”

4. *Vacī saṅkhāra* are responsible for our speech (either out loud or just to ourselves). When we do something (walk, play, etc) we move our bodies with *kāya saṅkhāra* that arise in our mind (basically in the *gandhabba*). We have control over both of

those.

- On the other hand, when thoughts arise automatically due to sensory input, those are *mano saṅkhāra*.
- That is the difference between *mano saṅkhāra* (which arises without our DIRECT control) and *vacī saṅkhāra/kāya saṅkhāra* (which we have control over).
- Whether just *saṅkhāra* or *abhisāṅkhāra*, this distinction holds. For example, we can stop saying anything at any time. We can stop raising our hand anytime we want to, whether it is to say “Hi” to someone (*saṅkhāra*) or to hit someone (*abhisāṅkhāra*).

5. As we have discussed before, the word “*saṅkhāra*” comes from “*saṇ*” + “*khāra*” or actions that involve “*saṇ*”; see, “[What is “Saṇ”? Meaning of Sansāra \(or Saṇsāra\).](#)”

- “*Saṇ*” is responsible for getting things done to live the current life (even everyday activities).
- However, if they involve **moral/immoral actions** that can bring results (*vipāka*) in future lives, then those arise due to “**strong *saṇ*” or “*abhi saṇ*” and thus become “*abhisāṅkhāra*.”**
- ***Kammā* are actions (done with *saṅkhāra* that arise in mind).** Most are neutral *kamma*: They do not bring significant *vipāka*.
- Such moral or immoral **strong *kamma*** — done with ***abhisāṅkhāra*** — are the ones that lead to ***kamma vipāka in the future*** (either in this life or in future lives).

Key Idea: *Vacī/kāya Saṅkhāra* are Willful

6. Let us look at some examples now.

- Thinking about going to the bathroom is a *vacī saṅkhāra* (*kammically* neutral). One gets the body to move to the bathroom using *kāya saṅkhāra*.
- Thinking about killing a human being involves *abhisāṅkhāra* with high *kammic* consequences or *vacī abhisāṅkhāra*; doing the actual killing is done with *kāya abhisāṅkhāra*. Those can lead to rebirth in the *apāyā* because both are based on immoral or *apuñña abhisāṅkhāra* (or *apuññābhisāṅkhāra*).
- On the other hand, *puñña abhisāṅkhāra* (or *puññābhisāṅkhāra*) (thoughts responsible for good speech and actions) have good *kammic* consequences and can lead to “good births” (human, *Deva*, or *Brahma*). Even more importantly, they are essential for making progress on the Path.

7. I keep repeating these because it is imperative to understand these fundamental ideas.

- All *saṅkhāra* arise in the mental body (*gandhabba*).
- Then the brain helps to put those into action/speech (i.e., moving body parts).
- Most of those actions/speeches are *kammically* neutral.
- Good *kammā* that will have good *vipāka* in the future is done with *abhisāṅkhāra* that have ***sobhana cetasika* (compassion, non-greed, etc)**. Bad *kammā* that will have bad *vipāka* in the future is done with *abhisāṅkhāra* that have ***asobhana cetasika* (anger, greed, etc.)**; see, “[Living Dhamma – Fundamentals.](#)”
- ***Saṅkhāra* is the generic word used in the *suttā*, even if it could be *abhisāṅkhāra*. One needs to be able to see which ones are *abhisāṅkhāra* based on the actual situation.**

8. *Mano saṅkhāra* are those that automatically arise in the mind due to a sensory input, based on one’s *gati*.

- We don't experience those initial *mano saṅkhāra*, and we only experience them when it comes to the next stage called *vacī saṅkhāra* ("talking to oneself").
- This is an important point. Even if one does not say a word when "thinking to oneself" that is called *vacī saṅkhāra*. If one gets interested, one may speak out, which is still a *vacī saṅkhāra*.
- If one's interest builds up, one may even take bodily action. Those bodily actions are done with *kāya saṅkhāra* that arise in mind.
- I strongly urge everyone to re-read the posts: "[Difference Between Tanhā and Upādāna](#)" and "[Correct Meaning of Vacī Saṅkhāra](#)."
- The strength of *kammic* energy created increases in the following order: *mano*, *vacī*, *kāya saṅkhāra*.

Mano Saṅkhāra Arise Based on Our Gati

9. As we discussed many times, we get "attached" to something AUTOMATICALLY based on our *gati* and arise as *mano saṅkhāra*. It is essential to understand the concept of "*gati*" (character/habits); see, "[The Law of Attraction, Habits, Character \(Gati\), and Cravings \(Āsava\)](#)."

- If the attachment is strong enough, the mind will now start thinking about it consciously, i.e., *vacī saṅkhāra* arise and we become aware of these *vacī saṅkhāra*.
- Now, we can be mindful, think about the consequences of such thoughts, and move away from them as soon as we become aware of this "attachment" to something. Therefore, we can stop such thoughts at the *vacī saṅkhāra* stage; see, "[Correct Meaning of Vacī Saṅkhāra](#)."
- However, our minds like to enjoy such *vacī saṅkhāra*. It is easy to do and is very tempting. Many people get their sexual satisfaction from just "daydreaming" about either an event in the past or sexual encounters that they would like to have in the future.
- To change *mano saṅkhāra*, we need to change our *gati*; see, "[Difference Between Tanhā and Upādāna](#)."

10. Please read #9 again. That is the key to understanding "free will".

- We have total control over *vacī saṅkhāra* and *kāya saṅkhāra*.
- The reason is that there is a "time delay" between the mind (in the *gandhabba*) deciding to speak or make a bodily movement and the time takes for the brain to carry out those commands and to move parts of the physical body; see, "[Brain – Interface between Mind and Body](#)."
- However, animals do not have this "safety barrier". Lower animals do not have a neocortex. Even in monkeys, the neocortex is only partially developed. Thus, their *mano saṅkhāra* automatically continue as *vacī* and *kāya saṅkhāra*. Also, see, "[True Brain: How the Mind Rewires the Brain via Meditation/Habits](#)."
- Those are the reasons why humans have free will and animals do not.

Key Concepts in Satipaṭṭhāna and Ānāpāna

11. Therefore, the concept of free will becomes clear if one can understand the concepts of *mano*, *vacī* and *kāya saṅkhāra*.

- To have a firm grasp of *Satipaṭṭhāna* and *Ānāpāna* meditations, it is essential to understand what is meant by "mindfulness" and how *vacī* and *kāya saṅkhāra* are different from *mano saṅkhāra*.
- The bottom line is this: **Once we become aware of an action we are about to take, we have the freedom to choose to either go ahead with it or stop it.**
- We should stop any wrong actions we are about to do and continue with any good ones. That is the basis of *Satipaṭṭhāna* and *Ānāpāna* meditations.

- We must cultivate the habit of “catching one’s response early enough”. “Being mindful” is just that; see, “[6. Ānāpānasati Bhāvanā \(Introduction\)](#)” and “[Mahā Satipatthāna Sutta](#).”

12. If one can understand the post, “[Difference Between Tanhā and Upādāna](#),” one can not only see that free will is “built-in” for humans, but one will also be able to see how one can purify one’s mind and make progress on the Noble Path.

- As explained in that post — and the reference posts mentioned there — only *mano saṅkhāra* arise without our control.
- We have total control over *vacī* and *kāya saṅkhāra*, at least when one gets better at practicing *Satipaṭṭhāna/Ānāpāna*.
- This is also why humans differ from animals: Humans can think for themselves and make rational decisions.

Libet Experiments on Free Will

13. Scientists misinterpret the experiments on the famous “Libet experiments” simply because they believe that the mind resides in the brain. Therefore, they wrongly conclude that the “brain activity starts” before one makes a decision; see, “[Neuroscience says there is no Free Will? – That is a Misinterpretation!](#).”

- Libet’s experiment is straightforward: A person was asked to move his/her finger whenever at his/her will, and scientists monitored that person’s brain activity. They concluded that the brain started the “finger moving” process before the person decided to move the finger!
- If the brain started the decision-making process, that would confirm that humans do not have free will. But then the question arises what triggered that brain activity? Of course, scientists or philosophers do not have an answer to that question. **If human decisions were random, this world would be chaotic.**
- However, the explanation is simple with the concept of a mental body (*gandhabba*) controlling the physical body with the help of the brain.
- As explained in the above post, the decision made by the *gandhabba* started brain activity. Scientists did not correctly monitor the time the person decided because their “model” was incorrect.

14. *Gandhabba* or the “mental body” or the “*manomaya kāya*,” is a critical concept that has been neglected in the current Theravāda texts. This concept is ironically somewhat similar to the “ghost in the machine” concept; see, “[Ghost in the Machine – Synonym for the Manomaya Kāya?](#).”

- There are several subsections on the website that discuss this concept: “[Mental Body – Gandhabba](#),” “[Gandhabba \(Manomaya Kāya\)](#),” and “[The Grand Unified Theory of Dhamma](#).”

11.6.1 “Why Does the World Exist?” by Jim Holt

Revised October 1, 2021

1. I started writing this post while reading the popular book “Why Does the World Exist? – An Existential Detective Story” by Jim Holt (2012). It is a good book with many thought-provoking questions. Here I would like to point out that most of those questions have answers in Buddha Dhamma.

- On p. 269, equating the *Nibbānic* bliss to the annihilation of a person, he asks, “...But how can you enjoy something if you do not exist?”. To address this question, I initially started the post with the title, “Does Nibbāna Mean Annihilation of a “Person”?”. Still, I started addressing other issues in the book and eventually changed the title to be the same as the book title.
- Even many Buddhists are terrified of the idea of *Nibbāna*, thinking that it means destruction. That is why even many *Bhikkhus* like to give “blessings” to the effect, “May you attain *Nibbāna* at the end of much pleasures in the heavenly worlds”. That illustrates a total lack of understanding of the profound message of the Buddha.

2. The problem is in the question itself. If a person is to be annihilated, a “person” needs to exist in the first place. Now this is a very deep issue that needs some knowledge of Buddha Dhamma to understand. As the Buddha said in his first sermon, his Dhamma is, “*pubbe ananussutesu dhammesu.....*” or “a concept that has not been known to the world before...”

- To annihilate, something “concrete” must exist. The Brahmins of the day of the Buddha believed there is a permanent “*āthma*” associated with a person (a “soul” in the present day.). It is very difficult for all of us to get rid of the perception of “me” or “myself”. **In fact, that perception is totally removed only at the Arahant stage of Nibbāna; it keeps decreasing as one advances on the Path.**
- Thus as long as one “belongs to this world of 31 realms”, one always thinks in terms of “me” and “the external world”. This is why the Buddha rejected the concept of “no-self” even though most people incorrectly translate *anatta* as “no-self”; see, “[The Grand Unified Theory of Dhamma](#).”
- On the other hand, the Buddha said that it is also incorrect to say there is “self”. This is because any “person” changes even moment-to-moment; see, “[What Reincarnates? – Concept of a Lifestream](#).”
- In rejecting both “self” and “no-self” extremes, the Buddha said, “this changing being” or “a lifestream” changes moment-to-moment due to changes in the causes that support that lifestream. This is not something that I can explain in one essay and is explained via many posts at the site, including the important section on *Paṭicca Samuppāda*.
- In the book there is a separate chapter on, “The Self – Do I Really Exist?”. I will discuss that chapter below, and point out a few more related facts.

3. The book’s main theme is “why is there something rather than nothing?” or “how did the world get started?”. It summarizes most of the arguments that have accumulated over thousands of years, and of course, come to the inevitable question on “the nature of the Creator God who would not need a cause for being there”.

- However, regarding the two questions on existence as expressed above, the Buddha's answer is the simplest: The world has existed forever and it is not possible to pinpoint a specific first cause. The proof is very simple: Suppose there is a first cause; then what caused that? QED.
- Thus in the scientific basis of cause and effect, the absence of a first cause is built in.
- On p. 82 of the book, Jim Holt did point out, “*..Scientific thinkers, by and large, have not shared such qualms about eternity. Neither Galileo nor Newton nor Einstein had any problem conceiving of a universe that was infinite in time. Indeed, Einstein added to his field equations a fudge factor – the infamous “cosmological constant” – to ensure that they would yield a universe that was static and eternal.*”
- And a few philosophers have discussed the problem with “first cause” arguments, as Jim Holt noted. Talking about the late philosopher John Mackie on p. 206, “*..Obviously, as Mackie observed, no explanation in terms of a “first cause” could answer the ultimate question of existence, for such an explanation would merely raise the further question of why that first cause -whether it be God, an unstable chunk of false vacuum, or some still more exotic entity- itself existed.*”

4. If one accepts that the world has existed forever, then many other questions discussed in the book do not even arise. Thus 100% of the questions discussed are answered if we start off with the premise that the world has existed forever AND the root causes (greed, hate, and ignorance) for the existence of the world given by the Buddha.

- For example, on p. 7, Leibniz's Principle of Sufficient Reason is discussed: For every truth, there must be a reason why it is so and not otherwise; and for every thing, there must be a reason for that thing's existence. This is basically “cause and effect”. The Buddha said that the world exists because of greed, hate, and ignorance; and those causes have no beginning.
- This is related to the issue of the mind taking precedence over matter, and I am slowly building evidence for that in the website. There are some introductory posts in the “Abhidhamma” and “Dhamma and Philosophy” sections.
- On p. 188, Jim Holt discusses the fact that all science says about the “stuff that makes up our world” is that mass is equivalent to energy, “*....but it gives us no idea of what energy really is...*”. This is exactly what is explained in Abhidhamma, and I will get to it eventually. He goes on to say, “*...As Bertrand Russell noted in his 1927 book, The Analysis of Matter, when it comes to the intrinsic nature of the entities making up the world, science is silent.*”
- He also briefly discuss another big issue in philosophy on p. 192: “*The conclusion of the philosophersthat there is more to consciousness than the mere processing of information. If this is true, then science, insofar as it describes the world as a play of information states, would seem to leave out a part of reality: the subjective, irreducibly qualitative part.*”. Actually, as we will see, Buddha's answer solves both this and the issue above in one fell swoop.
- A world without a beginning also gives an answer to the question of “why do I exist” (p. 18). We all have “existed” forever; there is no beginning so the question has no meaning. Another frequently asked question is, “what is the meaning of life?”. There is no meaning to life: The bottom line is that we all suffer in this existence ON THE AVERAGE, IN THE LONG TERM while we meander aimlessly among the 31 realms of existence; see, “[Evidence for Rebirth.](#)”

5. Now the only critical question is how do we know that the Buddha's world view is correct? The answer is that it can explain the complex world around us; it has the “explanatory power”. Also see, “[Vagaries of Life and the Way to Seek Good Births](#)” and “[Good Explanations – Key to Weeding out Bad Versions of Dhamma](#),” among many other posts.

- Furthermore, one can EXPERIENCE the truth of Buddha's teachings and the results for oneself. I have described part of my experience in following the Path in, “[11. Magga Phala via Cultivation of Saptha Bojjanga.](#)” Do not be discouraged by the title of the post.

6. Now let me briefly discuss the late chapter on, “The Self – Do I Really Exist?”. Here Jim Holt comes across the answer himself (p. 256): Talking about Descartes’ famous phrase, “I think, therefore I exist”, he says, “... *..Did Descartes here infer more than he was entitled to? As many commentators have pointed out (beginning with Georg Lichtenberg in the eighteenth century), the “I” in his ultimate premise is not quite legitimate. All Descartes could assert with certainty was “there are thoughts”. He never proved that thoughts require a thinker.....*” (bold face mine).

7. This is exactly what the Buddha said. There are thoughts, but no REAL thinker; there is the PERCEPTION of a thinker in “one’s mind” until one’s mind is purified to the level of an *Arahant* and it becomes clear that there is no “thinker”. However, the irony is that until that wisdom is gained, “one’s suffering” is real. The suffering is there simply because one thinks there is a real thinker!

- But one cannot honestly say, “there is no-self” as most people try to do unless one is an *Arahant*; one is just trying to fool oneself in saying that. When something bad happens to “anything that belongs to oneself” one INEVITABLY feels the pain associated with it; see, “[Anatta and Dukkha – True Meanings.](#)”
- When the mind is purified (i.e., is absent of greed, hate, and ignorance) perception of “self” goes away at the *Arahant* stage, then the suffering associated with “one’s stuff” is not there anymore. When one comprehends the concept of *anicca* to some extent, this will become clear to some extent. In other words, *Nibbānic* bliss or *nirāmisā sukha* increases as one advances on the Path, with the mind being purified at each step; see, “[Three Kinds of Happiness – What is Nirāmisā Sukha?](#),” and “[Nirāmisā Sukha.](#)”
- Thus we cannot forcibly get rid of the sense of “I”. Only through the true understanding of the Three Characteristics of this world, *anicca, dukkha, anatta*, that one can slowly start getting rid of that sense of “I” or “self”. Until then there is neither a “self” nor “no-self”, but just a stream of thoughts; see, “[What Reincarnates? – Concept of a Lifestream.](#)” Only at the death of an *Arahant* that stream of thoughts is ended and the mind becomes free of any attachment to the material world of the 31 realms; see, “[Nibbāna – Is it Difficult to Understand?](#),” and “[What are Rūpa? Relation to Nibbāna.](#)”

11.6.2 “Waking Up” by Sam Harris

Revised August 28, 2022; January 31, 2023

Sam Harris, “Waking Up: A Guide to Spirituality Without Religion” (2014).

1. I am quite encouraged by the fact that many people are beginning to see through something contrary to basic human instincts: That it is possible to find a different and more permanent form of happiness that is not related to material things.

- Right at the start of the book, when he talks about his first “meditation retreat” at the age of 16 under harsh conditions in the wilderness, the author says he was puzzled by the positive reaction of the older people in the group, “...*How could someone’s happiness increase when all the material sources of pleasure and distraction had been removed?*” (p.2).
- But now, with many years of experience in meditation and studies on human nature as a neuroscientist, he can understand it: “...*Unlike many atheists, I have spent much of my life seeking experiences of the kind that gave rise to world’s religions. Despite the painful results of my first few days alone in the mountains of Colorado, I later studied with a wide range of monks, lamas, yogis, and other contemplatives, some of whom had lived for decades in seclusion doing nothing but meditating. In the process, I spent two years on silent retreat myself (in increments of one week to three months), practicing various techniques of meditation for twelve to eighteen hours a day*” (pp. 13-14).

2. Harris, like many others, has found that something about human life cannot be explained away just in terms of the workings of the material world. But he cannot pinpoint the source of that “something extra.”

- As Harris explains, modern science has obliterated the concept of a “divine influence” as has been put forth by various religions. So I was interested to see his conclusion on the “source of this extra something.”

3. On p.8, he makes a very valid statement: *“Spirituality must be distinguished from religion – because of people of every faith, and of none, have had the same sorts of spiritual experiences....Nothing that a Christian, a Muslim, and a Hindu can experience – self-transcending love, ecstasy, bliss, inner light – constitutes evidence in support of their traditional beliefs, because their beliefs are logically incompatible with one another. A deeper principle must be at work”*. (my highlighting).

- This is precisely what I have been trying to emphasize on this website.
- In the very following paragraph, he says what he found that more profound principle to be: *“That principle is the subject of this book: The feeling that we call “I” is an illusion”* (p. 9). This is probably the “no-self” theory that is erroneously presented as Buddha’s concept of “*anatta*”; see, [“Anicca, Dukkha, Anatta – Wrong Interpretations.”](#)
- However, on that same page, he also summarizes most of my conclusions about religions in general, including “Buddhism,” as it is practiced by most in both Theravāda and Mahāyāna sects.

4. I will quote the relevant sentences from pp. 9-10: *“I am often asked what will replace religion. The answer, I believe, is nothing and everything. Nothing need replace its ludicrous and divisive doctrines....But what about love, compassion, moral goodness, and self-transcendence? Many people will imagine that religion is the true repository of their virtues. To change this we must talk about the full range of human experience in a way that is as free as the best science already is”*.

- And through the rest of the book, he goes through that process. I agree with most, except that while “Buddhism” may be a religion, Buddha Dhamma is certainly not (if religion is defined as providing salvation via following set rituals or having blind faith in an entity or a supreme being).

5. The key to Mr. Harris’s not understanding Buddha Dhamma becomes apparent on p. 28: *“We can also grant that Eastern wisdom has not produced societies or political institutions that are any better than their Western counterparts. In fact, one could argue that India has survived as the world’s largest democracy only because of institutions that were built under British rule. Nor has the East led the world in scientific discovery. Nevertheless, there is something to the notion of uniquely Eastern wisdom, and most of it has been concentrated in or derived from the tradition of Buddhism”*.

- The problem is that Mr. Harris has not been exposed to Buddha Dhamma, the “non-religious” original teachings.
- The focus of Buddha Dhamma, as delivered by the Buddha, was not on enhancing mundane life and on building a better society. It was focused on the fact that it is a “waste of time” to try to build large cities, develop technology, and in general, to spend too much time on “making things better for this life” because this life is only a brief stop-over in a much longer journey.

6. If one understood the primary message of the Buddha, one would see that this life is too short to be “wasted” on such things. This is due to three critical foundational aspects of Buddha Dhamma:

- Even though wrought with some suffering, human life is the best in all of the 31 realms of this world for attaining Nibbāna. It takes an effort to understand the Buddha’s broader worldview; see [“Origin of Life”](#) and [“The Grand Unified Theory of Dhamma.”](#)
- In the process of rebirth, we spend only a tiny amount of time in this life of about 100 years; see [“Evidence for Rebirth.”](#)
- And immersing in mundane sense pleasures becomes only a hindrance to attaining the “true and permanent happiness” of Nibbāna; see [“Three Kinds of Happiness – What is Nirāmisa Sukha”](#) and [“Nirāmisa Sukha?”](#).

- Of course, the Mahāyāna version of “Buddhism,” or even the Theravāda version, has veered away from this crucial message of the Buddha.

7. Yet, I must hasten to point out two additional points:

- The Buddha stated that not everyone could comprehend this key message. Thus, he did provide advice for those who did not wish to pursue *Nibbāna* and asked for advice on how to live a moral and fulfilling family life while enjoying sensual pleasures. In Chapter IV of Bhikkhu Bodhi's popular book, *“In the Buddha's Words”* (2005), such advice from different *sutta* has been extracted into one place; this book also has other categories separated like good rebirths, mind, etc.
- The Buddha never tried to change or influence the political systems that were in place, even though he praised the democratic system that was in place in the tiny autonomous region of *Vajji*, which was a republic similar to the one we have now in the United States. Other than openly criticizing the caste system, he stayed away from politics.

8. I am impressed that Mr. Harris has been able to catch at least a glimmer of the uniqueness in Buddha Dhamma even though he has not been exposed to the correct teachings of the Buddha: *“Buddhism in particular possesses a literature on the nature of the mind that has no peer in Western religion or Western science. Some of these teachings are cluttered with metaphysical assumptions that should provoke our doubts, but many aren't. And when engaged as a set of hypotheses by which to investigate the mind and deepen one's ethical life, Buddhism can be an entirely rational enterprise”* (p. 29).

- The author is highly impressed with the Buddhist “*vipassanā*” meditation. However, what he describes is just breath meditation or “*Samatha* meditation”; see, [“Bhāvanā \(Meditation\)”](#).

9. And he has the concept of Enlightenment (*Nibbāna*) all wrong (this says a lot about the Mahāyāna “Buddhism” that he has been exposed to): *“...the state of “full enlightenment” – is generally described as “omniscient.” Just what this means is open to a fair bit of caviling. But however narrowly defined, the claim is absurd”* (p. 43).

- To understand the concept of *Nibbāna*, one must understand the worldview of the Buddha as described in the posts mentioned above. Then, one needs to read other posts on this site describing *Nibbāna* (just search with the keyword *Nibbāna* at the box on the top right on Keyword Search).

10. Interestingly, there is no mention of purifying the mind of defilements, which is key to true Buddhist meditation; see [“The Importance of Purifying the Mind.”](#)

- I do not blame the author, of course, but it is sad to see how far “Buddhism” has veered off from the original message of the Buddha.
- It is these three root causes of greed, hate, and ignorance (and the counterparts of non-greed, non-hate, and wisdom) that clarify the basis of morality that he has puzzled over in two other books, *“The Moral Landscape”* (2011) and *“Free Will”* (2012).
- As Mr. Harris correctly points out in *“The Moral Landscape,”* “*there is no such thing as Christian or Muslim morality.*” There is no “Buddhist morality” either. Morality is universal and comes out naturally based on benevolence, compassion, and wisdom having precedence over greed, hate, and ignorance; see [“Origin of Morality \(and Immorality\) in Buddhism.”](#)

11. Chapter 2 is on consciousness. The author has a good introduction, and his thinking about consciousness may be expressed here: *“I am sympathetic with those who, like the philosopher Colin McGinn and the psychologist Steven Pinker, have suggested that perhaps the emergence of consciousness is simply incomprehensible in human terms”* (p. 57).

- The Buddha has fully explained consciousness. Consciousness is NOT an emergent property, it is a fundamental entity. I have several introductory posts on consciousness on the site; see [“What is Consciousness?”](#) and follow-up posts.

- I hope those who are interested will read the comprehensive description of the mind provided by the Buddha in the *Abhidhamma* section of this site, which may not be ready for a comprehensive analysis for several more months. But there are a few introductory posts there.

12. The rest of the book is about the author's experience of trying different meditation types. It is too bad that he was not exposed to real Buddhist meditation. On the other hand, even in countries where *Theravāda* Buddhism is practiced, breath meditation is widely taught.

- Overall, I am impressed that even with the minimum exposure Mr. Harris had to Buddha Dhamma, he has been able to see that "there is something hidden there." I am glad to say that the Buddha did teach a much deeper doctrine, and I am sure he and many others in the West will be enthusiastic about finding the actual message of the Buddha.
- The author knows that as an atheist, he was treading into unknown territory in talking about spiritual experiences: "...*many of my fellow atheists consider all talk of spirituality to be a sign of mental illness, conscious imposture, or self-deception. This is a problem, because millions of people have had experiences for which spiritual and mystical seem the only terms available*" (p.11).
- However, once one understands the correct message of the Buddha, one can see that there is nothing in his doctrine that goes against the beliefs and convictions of most atheists; Buddha Dhamma describes Nature's laws at a fundamental level.
- The only difference between science and Buddha Dhamma is that science assumes that mental phenomena can be derived from material phenomena. In Buddha Dhamma, the mind is at the forefront; see "[Philosophy of the Mind](#)."

13. I encourage those interested to read the book because the author has not only contemplated the subjects of morality, questions on existence, world religions, etc. but has also tried to experience different meditation techniques. I only wish he had been exposed to the true teachings of the Buddha so that he could perhaps make more assertive statements about the value of the Buddha Dhamma in addition to finding much more benefits for himself.

11.6.3 "The Language of God" by Francis Collins

Revised August 9, 2019; August 28, 2022

This is a top-rated book (published in 2007), as apparent from many reviews on Amazon. The author is a respected scientist and director of the National Institutes of Health (NIH). This post is based on a review I posted on the Amazon site in 2012.

- I have read numerous books to find solid arguments for believing in a Creator. The author has put together the best case he could also use previous ideas of C. S. Lewis and others. The main points in the book can be summarized as follows (not in the order presented in the book):
1. God is responsible for the "Big Bang," i.e., the creation of the universe, and for creating the just right physical parameters (fine-tuning) that enabled human life on planet Earth.
 2. The "Intelligent Design" theory needs to be abandoned since it may damage the case for the existence of God.
 3. Darwin's theory of evolution does account for leading to the appearance of a "human-like" creature, even though the theory explains the evolution of more complex animals.
 - Whether this creature further evolved by itself to be human or whether at some point, God directly instilled a conscience in this creature, he leaves it open.
 - Either way, God is responsible for the existence of morality in humans. He prefers to call "BioLogos" the theory of "Theistic Evolution."

4. The existence of “Moral Law” (the ability to differentiate right from wrong) is the fundamental basis for his belief in God.
5. The issue of “pain and suffering” was problematic for C. S. Lewis, and the present author also encountered difficulties in addressing it.

My comments are as follows:

1. Proponents of the Big Bang theory say that Big Bang was not just one event, but such events are supposed to be frequent. Thus there is no need to invoke a higher power.
 - Stephen Hawking, whose book “A Brief History of Time” that the author quoted to make a case for God’s role, has since come out with a new book, “The Grand Design” (2010). In that book, he clearly states that the need for a Creator God is no longer there based on new evidence.
 - Also, in the inflationary theory, Big Bangs occur all the time, and there is no need to invoke a fine-tuning of physical parameters; see “The Beginning of Infinity” by David Deutsch.
2. Actually “Intelligent Design” is a somewhat better theory than the hypothesis of a God because the proponents of that theory have put forth some formidable arguments for it.
 - Of course, I do not subscribe to that theory (which some say is making a case for a Creator God without admitting it). However, Collins does not make a better case for the Creator God hypothesis.
 - The problem with the “Intelligent Design” theory is that, of course, the question arises as to how that designer came into being! Many people say it is the same as the God hypothesis.
 - If anyone is interested in learning about the “Intelligent Design” theory, a good book is “Signature in the Cell” by Stephen Meyer (2009).
3. The question is, “In this sequence did God instill moral values in the evolving creature?”. Is there a clear-cut transition from a robotic animal to a human with moral values?
 - The “uniqueness of a human,” according to the author, is the ability to know right from wrong. Humans indeed have this quality stronger than animals. Some animals also have at least a glimpse of this quality. If you have a pet, especially a dog, you know that it has feelings and even its mind to do things, i.e., it is not like a robot.
 - While people sometimes sacrifice their own lives to save others, people like Hitler and Pol Pot have committed unmentionable atrocities. And that was with planning (not just on impulse).
 - In Buddha Dhamma, both moral and immoral choices are in the “human psyche”; based on many complex factors (*sansāric* habits or “*gati*,” family, friends, associates, etc.), people choose to be moral or immoral at different times depending on the situation. Of course, greed, hate, and ignorance play a significant role; see, “[Living Dhamma](#).”
4. Now on the existence of “moral law”: From #3 above, it is clear that even though morality is in the human psyche, it does not have a “binding effect” on humans. Humans are, in general, more “moral” than animals. But within the broader world described by the Buddha Dhamma, other sentient beings (*Devas* and *Brahmā*) are more “moral” than humans.
 - If the man is to be judged by just one life, why is everyone not given the same chance (including “same morality”)? People are born poor, rich, healthy, unhealthy, etc., and some die even before getting a chance to prove their worthiness.
 - These apparent “vagaries of life” are a strong argument for the case that this life is only one of many. Furthermore, the diversity that we observe is due to the effects of past actions (*kamma vipāka*); see “[Vagaries of Life and the Way to seek “Good Rebirths](#).”
 - The basis of morality (as well as immorality) comes naturally in Buddha Dhamma. See “[Origin of Morality \(and Immorality\) in Buddhism](#).”

5. Of course, according to Buddha Dhamma, the issue of “pain and suffering” — not only in this life but in the cycle of rebirths — is the fundamental problem of existence.

- **Again, the “pain and suffering” issue is unexplainable by any approach based on just one life.** Like modern science, Buddha Dhamma has a foundation in “causes and effects.” Suffering and happiness arise due to past causes, and since most of these effects (e.g., disability at birth, poverty) are even apparent at birth, “past” means past lives.

11.6.4 “Spark” by John Ratey

Early post of 2014; revised August 28, 2019

1. There is a good book, “Spark: The Revolutionary New Science of Exercise and the Brain” by John J. Ratey (2013). It discusses new findings on the effects of regular exercise on the brain as well as the body. (Most of the books I review are likely to be available at public libraries).

2. The book discusses how exercise can keep the brain working at higher efficiency and lower stress and anxiety. Also, regular exercise can rid of addictions, and even Attention Deficit Hyperactivity Disorder, ADHD. It also talks about women’s hormonal changes and aging too.

3. The key is to engage in a moderate exercise program up to 6 days a week. And to ratchet it up to high-intensity once-in-a-while, even for a minute at a time. For example, if you jog, try to run fast for 30 seconds to 1 min once-in-a-while. That is called “interval running.”

- The maximum heart rate for a person is 220-AGE.
- low-intensity exercise: 55%-65% of max rate
- moderate: 65%-75%
- high intensity: 75%-90%

4. There are “wristwatch type” heart rate monitors available. But you basically “know” when you are at low intensity (walking), moderate (jogging/slow running), and high (dashing to catch a bus or running a 100-meter race).

- Should not do high intensity unless you have been active for a while.
- In the anaerobic range (high intensity), the brain releases human growth hormones (HGH). **That is a natural way to “get high.”**
- Even low-intensity workouts release many other beneficial chemicals. But in high-intensity workouts, they all get a boost. All these are good for the sustenance/growth of neurons so that your memory can be improved.
- But should not do high-intensity regularly unless one is in great shape.
- He also mentions yoga as an enjoyable activity. Any exercise, i.e., just walking, is better than none.
- He discusses how children in a school district in PA are avoiding obesity and health problems and getting good grades because the schools have good exercise programs.
- I find that the best time to meditate is after a good workout and a shower. The body and the mind are refreshed and alert.

5. We are born with a body and a mind that are results of specific *kamma vipāka* in the past. But we are not bound by either; we can improve both. That does not mean we should try to “beautify” the body; we should make it healthy. The physical body is a “temporary shell” that will be with us for about 100 years, and if we do not take care of it, that will lead to much discomfort.

- We can make conditions conducive to get “good *kamma* seeds” and to prevent “bad *kamma* seeds” from bearing fruits; see, “[Anantara and Samanantara Paccaya](#).” Do not be discouraged by those Pāli words. The post is easy to understand.

6. Exercise and meditate! That is key to a long healthy life as well for “cooling down” in the sense of getting some long-lasting peace-of-mind or attaining one of the four stages of *Nibbāna*.

- As we get old, it is imperative to keep both body and mind in good condition. It is hard to concentrate, let alone meditate, with an aching body or a defiled mind.
- Walking a mile or two a day can keep one reasonably healthy. For the mind, solving word puzzles or reading a book is better than watching television.

11.6.5 “The Life of the Buddha” by Bhikkhu Ñāṇamoli

October 13, 2018; revised November 15, 2020

“The Life of the Buddha” Is a Good Resource

1. “[The Life of the Buddha](#)” by Bhikkhu Ñāṇamoli is good to read and even to keep as a reference (page numbers quoted are for the 2001 First BPS Pariyatti edition). It is a good book for two reasons:

- A chronological record of the Buddha’s life (after the Buddhahood),
- Detailed accounts of events that are not in the *suttā* (taken from the *Vinaya Piṭaka*).

Need to Consult All Three *Piṭaka*

2. The Buddha said that if there is any doubt or a concept that is not clear, one should check with *Sutta*, *Vinaya*, and *Abhidhamma*. These basically refer to the *Tipiṭaka* (three baskets) of *Sutta Piṭaka*, *Vinaya Piṭaka*, and *Abhidhamma Piṭaka*.

- Most people refer to the *Sutta Piṭaka* and forget about the other two. *Abhidhamma Piṭaka* is a bit hard to understand, and without a firm grasp of basics it is harder.
- Most people think that the *Vinaya Piṭaka* is just for the *bhikkhus* and *bhikkhunis*. But there are sections in the *Vinaya Piṭaka* that have details that are not in the *suttā*. Furthermore, those sections in the *Vinaya Piṭaka* are easy to understand, as we see below.

An Example

3. I will provide the following as an example of what is in this book that is not available in any *sutta*. It describes how the five ascetics attained the *Sotāpanna* stage over several days with the delivery of the *Dhammacakkappavattana Sutta*.

Here is a direct quote from p. 45 of the book (starting from the point where the Buddha had just finished the first delivery of the *Dhammacakkappavattana Sutta*):

“Then *Aññata Koṇḍañña*, who had seen and reached and found and penetrated the *Dhamma*, whose uncertainties were left behind, whose doubts had vanished, who had gained perfect confidence and became independent of others in the Teacher’s Dispensation (**My Comment:** i.e., became a *Sotāpanna*), said to the Blessed One: “Blessed One, I wish to go forth under the Blessed One and to receive the full admission?”

“Come, *bhikkhu*,” the Blessed One said, “The *Dhamma* is well proclaimed. Live the holy life for the complete ending of suffering.” And that was his full admission.

Then the Blessed One taught and instructed the rest of the *bhikkhus* with a talk on the *Dhamma*. As he did so, there arose in the venerable Vappa and the venerable Bhaddiya, the spotless, immaculate vision of the

Dhamma (**My Comment:** i.e., became *Sotāpannas*). All that is subjected to arising is subjected to cessation. They, too, asked for and received the full admission.

These, having seen *dhamma*, attained *dhamma*, knowing *dhamma* ... having attained without another's help to full confidence in the teacher's instruction, spoke thus to the Blessed One: "May we, Blessed One, receive the going forth in the Blessed One's presence, may we receive ordination?"

Then living on the food they brought to him, the Blessed One taught and instructed the rest of the *bhikkhus* with a talk on the *Dhamma*. All six lived on the food brought back by the three of them. Then there arose in the venerable Mahānāma and the venerable Assaji the spotless, immaculate vision of the *Dhamma* (**My Comment:** i.e., became *Sotāpannas*), and they too asked for and received the full admission".

Important Deductions

4. We can learn several important facts from the above account.

- Only Ven. Koṇḍañña attained the *Sotāpanna* stage in the first round in the first night of the delivery of the *sutta*. It actually took several days for all five ascetics to attain the *Sotāpanna* stage.
- Buddha actually did not just recite the *sutta* as it appears in the *Tipiṭaka*. That recital would have been finished within 15 minutes!
- So, we can see that what is in the *Tipiṭaka* are HIGHLY CONDENSED summaries of those discourses and possibly many discussions.

Many *Suttā* Provide Only Concise Summaries

5. What we see as the *Dhammacakkappavattana Sutta* today is a highly condensed version of the material that was taught by the Buddha over several days, as is clear from #3 above.

- It appears that the Buddha himself summarized the material in each *sutta* in a short concise way to a limited number of verses that were suitable for oral transmission (easy to remember). **A *sutta* is supposed to be explained in detail;** see, "[Sutta Interpretation – Uddesa, Niddesa, Paṭiniddesa.](#)"
- We must remember that all the *suttā* in the *Tipiṭaka* were transmitted down several generations over about 500 years before it was written down. It was not even remotely possible to include all that was discussed over those several days!

Word-by-Word Translation is a Terrible Practice

6. What happens these days is that even highly condensed *suttā* are translated word-by-word into English. This is a terrible practice. It is no different from just reciting a *sutta*!

- One can finish reading a *sutta* in 15 minutes, and ONE would not understand any of the deep concepts embedded in the *sutta*.
- **Then how could one understand the *sutta* by just reading a word-by-word translation of a *sutta*?**

7. In fact, this could be why many people to believe that one can attain *Nibbāna* by just reciting a *sutta* or a set of verses. This practice is sometimes called "*mantra* chanting." But there is no basis for that belief.

- *Nibbāna* can be attained ONLY by cleansing one's mind.
- The MENTAL stress arises ONLY due to *lobha*, *dosa*, *moha* in one's mind.
- As one cleanses one's mind, the mental stress will decrease. This decrease is gradual in the beginning. It will have significant drops at the *Sotāpanna Anugāmi* stage and then more drops at *Sotāpanna*, *Sakadāgāmi*, *Anāgāmi* stages.

- An *Arahant* does not have any mental stress. He/she may have physical suffering, but that also will end at death. No more physical or mental suffering!

There is Value in Chanting Suttā

8. Of course, there is a value in even chanting a *sutta*. They have been formulated in a format to “calm down the mind,” even if one did not understand the meaning; see, “[Buddhist Chanting](#).”

- It would be much better if one understood the basic message of the *sutta*.
- One could get to the *Sotāpanna* stage ONLY BY fully understanding the concepts discussed in a major *sutta* like the *Dhammacakkavattana Sutta*.

But Some verses Need Detailed Explanations

9. A related key point is that upon attaining the *Buddhahood*, the Buddha wondered whether the humans will ever be able to understand the deep *Dhamma* he had just uncovered.

- This is stated on p. 37 of this book. The Buddha was really doubtful whether humans will comprehend his *Dhamma*, and *Brahma Sahampati* made an invitation to the Buddha, saying that many beings in the world can understand Buddha Dhamma. He would know because he had become an *Anāgāmi* by listening to Dhamma by a previous Buddha.
- So, the point is that if one thinks one can make progress on the Path by just chanting *suttā* or even learning the word-by-word translations, one would be very much mistaken.
- **In some cases, it can take a book to really do justice in explaining a single verse in some of the deep *suttā*!**
- However, some long *suttā*, especially in the *Dīgha Nikāya*, can be translated word-by-word for the most part, since there may not be any deep concepts discussed there.

Other Good Aspects of the Book

10. Another good aspect of the book is that it provides the background for delivering of some major *suttā* or verses.

- For example, there is a detailed account (pp. 55-60) of how the Buddha had to perform even a few miracles to convince Uruvela Kassapa, his two brother, and 1000 of their followers before they agreed to listen to the *Aditta Pariyaya Sutta* or the Fire Sermon.
- So, we can see that it was not easy in those early days for the Buddha to even convince some of the ascetics who had their own beliefs of what *Nibbāna* was about.

11. The subsequent chapters provide a good chronological account of what happened until the *Parinibbāna*. One can get a sense of which major *suttā* were delivered at around what time.

- There are accounts on the two chief disciples, and short accounts of other important personalities such as Anāthpīṇḍika, Aṅgulimāla, Visākha, etc. Chapter 7 describes the formation of the order of *bhikkhunis*.
- Several encounters with the *Māra Devaputta* are scattered throughout the book.
- One paragraph on p. 109 is on how the Buddha visited the *Tāvātimsa deva* realm and delivered *Abhidhamma*. A summary was conveyed to Ven. Sariputta, who expanded it with the help of his students, to the form that we have today.
- There is a chapter on Devadatta, which describes events that are not found in *suttā*, how he attained (*anāriya*) *jhānā* and *iddhi* (super-normal powers) powers, how he appeared on the lap of Prince Ajatasattu as a baby using his *iddhi* powers.

- It provides a good account of Devadatta's efforts to take the life of the Buddha, and how he lost all those super-normal powers and *jhānā* at the end.

12. There is a relatively long chapter on "The Doctrine", including the Four Noble Truths and the Noble Eightfold Path.

- Then, there is another relatively long chapter on the final year of the Buddha's life, including *Parinibbāna*.
- The final chapter is on the First Buddhist Council (*Sangāyanā*) that took place 3 months after the *Parinibbāna* of the Buddha.

XII Bhāvanā (Meditation)

The numbered posts are to be read in that order. Even for those who are practicing Buddhists, I recommend starting at the Introduction (#1), and going down the list of topics at least the first time.

- It would be a good idea to read the posts in the following subsection at some point, in order to get an idea about the reasoning behind this approach: [“Essential Buddhism.”](#)

12.1 1. Introduction to Buddhist Meditation

Revised September 7, 2019; March 16, 2021; June 20, 2022

The top 10 posts in this section describe the fundamentals of Buddhist meditation. The rest of the posts in this section discuss meditation subjects. They clarify unresolved questions and help gain *samādhi*. The first 11 posts should be followed in that order, at least initially.

Rāgakkhayo Nibbānan, Dosakkhayo Nibbānan, Mohakkhayo Nibbānan

1. Buddhist meditation is based on gradually reducing greed, and anger/hate, developing wisdom by getting rid of wrong views, and following the Noble Eightfold Path.

- We can get an idea of what “Buddhist Meditation” is by looking at the Path described by the Buddha to achieve various stages of *Nibbāna*. *Nibbāna* is not an esoteric concept many people believe. That is why I like the synonyms “*niveema*” or “cooling down.” *Nibbāna* can be EXPERIENCED even in the early stages.

2. The Buddha defined *Nibbāna* as “*Rāgakkhayo Nibbānan, Dosakkhayo Nibbānan, Mohakkhayo Nibbānan*.” ***Nibbāna is the removal of greed, anger, and ignorance from one's mind.*** That gives the essence of how this “cooling down” results. [[SN 38.1 A Question About Extinguishment - Nibbānapaṇhāsutta](#) “Friend, the ending of greed, hate, and delusion is called extinguishment.” “*Yo kho, āvuso, rāgakkhayo dosakkhayo mohakkhayo—idaṃ vuccati nibbānan*”ti.]

- The more one gets rid of greed, hate, and ignorance, the more one experiences *Nibbāna* or “*niveema*” or “cooling down.”
- One does not, and one cannot, get rid of greed, hate, and ignorance in a few days. It is a gradual process. One can experience the “cooling down” to the extent one can purify the mind. **And there will be ups and downs, especially in the early days. Thus ONE MUST HAVE THE RESOLVE to stay on the Path.**
- **Some people stay with breath meditation for “stress reduction” and avoid anything to do with *Nibbāna*.** They equate *Nibbāna* with extinction, but there is no need to worry; **one has that mindset means that one is nowhere close to *Nibbāna*.** I am not saying this in a derogatory way, but just as a fact. Until one experiences some “cooling down” and gets some idea about *anicca*, *dukkha*, and *anatta*, it is tough to get an idea of what *Nibbāna* is.

3. Meditation provides ways to achieve this “cooling down” for any person. There are three types of people who are interested in meditation:

- Many people want to practice some basic meditation that the Buddha advocated for achieving some “inner peace.”
- Some are convinced about the rebirth process but are mainly concerned about getting a “good birth” in the next life.
- **This site's main goal is to provide enough material for one to attain the first stage of *Nibbāna*, the *Sotāpanna* stage.** After that, one does not need outside help to complete the rest of the journey. However, many people are either not ready to take that task yet. They have doubts about the existence of 31 realms, the process of rebirth, or *Nibbāna*.

Nibbāna Is Cooling Down

4. In several posts, I have tried to explain what this “cooling down” is. You may want to read them. They vary from a basic description to more in-depth details. They all deal with reducing greed, hate, and ignorance from our minds.

- The words greed and hate are clear, but many do not understand what is meant by ignorance. The post, “[What is Avijjā \(Ignorance\)?](#)” gives a bit deeper description. But since it is essential, I want to say a few words here about ignorance.
- The “traditional method” for achieving some “cooling down” or “calming sensation” is to do “breath meditation” or “*kaṣiṇa* meditation.” **As I questioned in several posts, how can greed, hate, or ignorance be removed via concentrating on one’s breath or some *kaṣiṇa* object? Such meditation techniques DO NOT remove ignorance and only SUPPRESS greed and hatred.**

5. We need to start gradually reducing greed and hate from our minds; this is called “*sīla*” (pronounced “seela”) or moral living. Then one’s mind becomes clear, and one starts feeling the *nirāmisā sukha*. Then it will become easier to grasp Dhamma concepts and get rid of *avijjā*.

- Buddha Dhamma is for the wise; it is not to be followed by blind faith but with understanding. One needs to learn and “see” Dhamma first. A sustained “Cooling down” cannot be attained via following a set procedure like watching the breath.
- One could go a long way (up to the *Sotāpanna* stage) just by learning Dhamma and comprehending the key concepts. When one grasps the key concepts, it dawns on one that it does not make sense to be too greedy. Or hate someone with a level of hatred that makes one’s heart “heat up” to uncomfortable degrees.
- Thus through a better understanding of Dhamma (i.e., removing ignorance), one automatically “cools down.” **Removing ignorance via learning Dhamma leads automatically to reducing greed and hate.**

Correct World View is Critical

6. That is why “*Sammā Diṭṭhi*” or “Correct Vision” comes first in the Noble Eightfold Path. **Actually “*sammā*” means “*saṃ*” + “*mā*” or “removing defilements”; but for brevity, we will use the word “correct.” But keep in mind that “*sammā diṭṭhi*” means “removing defilements through correct vision.”** I cannot emphasize enough the importance of learning Dhamma. That is the first BIG step. Without understanding the message of the Buddha, how can one follow his Path?

- When one starts to understand the key Dhamma concepts, one regularly thinks about such ideas and how they should be kept in mind while going through daily chores. That is “*sammā saṅkappa*” or “correct concepts.” That automatically leads to “*sammā vācā*” (correct speech), “*sammā kammanā*” (correct action), and *sammā ājīva* (correct livelihood).
- When those five steps, one becomes attuned to correct mindfulness (“*sammā sati*”). Yes. There is “incorrect mindfulness” (“*micchā sati*,” pronounced “michchā sathi”) too, like when a master thief plans a robbery. One needs to be “engaged” or focused on accomplishing any task, either good or bad.

7. With cultivated “*sammā sati*,” one will be able to “see” the consequences of any action very quickly. Then one can decide whether to go ahead with it (since only good can come out of that action) or to abandon it (because it is not beneficial for oneself or to others).

- When one sees the benefits of these steps (i.e., “cooling down”), one will be motivated to work harder on all these steps, i.e., one cultivates “*sammā vāyāma*” (correct effort).
- The culmination is “*sammā samādhi*” (correct calm state of mind). Yes. There is a “*micchā samādhi*” too. When that master thief is planning a big robbery, he gets into a kind of *samādhi* also. He feels a sense of calm too, but that will have terrible consequences down the road.
- The latter three develop at the same time. One could get into “*sammā samādhi*” just via “*sammā diṭṭhi*.” When one listens attentively to a Dhamma talk or gets absorbed in reading about a key Dhamma concept, one could get into “*samādhi*.” A *jhānic* state is a deeper *samādhi* state.

Reading About Concepts Is Not Enough

8. That is why I recommend everyone to read these posts during quiet time. **One will absorb more, and just by contemplating the material while reading, one could quickly get into *samādhi*.** That is what meditation is all about. “Absorbing the good” will automatically force the “bad” out, and one gets into *samādhi* automatically; we will talk about this “*ānāpāna*” process in the following posts.

- It may get to the point where one can sit down and get into a *jhāna* within a minute or two. But not all can get into *jhāna*, and that is not necessary either. Any *jhāna* attained will be *anāriya jhāna*, until one attains the *Anāgāmi* stage. What is necessary is to get to *samādhi* or “calmed mind.”
- I hope you will experience the LONG TERM benefits from the procedures we discuss in this post and the follow-up posts. Initially, it will be a bit slow. But if one sticks with it for a few months, one should see a change in oneself that is not merely temporary relief. For some, it will be faster.

9. In this life, we feel two kinds of suffering: bodily pains and aches and various diseases and mental distress (disappointments to depression).

- Bodily ailments take time to recover. But even those can be reduced by careful planning and being mindful too. If one engages in physical activity (ranging from walking to rigorous exercise) and be cognizant of what one eats, many such ailments will reduce over time.
- Mental suffering could have direct causes in greed, hate, and ignorance. While some are due to past *kamma*, most can be avoided or reduced by being mindful of what one thinks, speaks, and does. Any thought, speech, or bodily action arising from a greedy, hateful, or ignorant view will cause mental anguish sooner or later.
- The easiest way to determine whether any action is inappropriate is to contemplate the consequences. An action rooted in greed, hate, or ignorance can harm oneself or another being.

Buddhist meditation Is The Noble Eightfold Path

10. Thus, Buddhist meditation is basically to cultivate the Noble Eightfold Path.

- **By preventing killing, stealing, verbal abuse, etc., what we are effectively doing is to “put out existing fires” in our minds and prevent such “future fires” from starting. That is “*niveema*” or “cooling down” or *Nibbāna*.**
- **We should also do things conducive to a calm mindset — associating with like-minded people, actively engaging in moral behavior that makes the heart joyful, etc.**
- **The most important thing is to learn Dhamma to “see” how all this will permanently liberate one’s mind. Then the change will become “permanent”.**

11. **When perfected, one will be doing meditation all day long while doing daily chores. That is what is stated as “*āsevitāya, bhāvitāya, bahuleekathāya*.” That means, “associate and use what is good, and do that as much as possible.”**

[See, [AN 8.1 Mettāsutta](#) *āsevitāya bhāvitāya bahulikatāya*

“Friends, the emancipation of heart's (*cetovimutti*) by loving-kindness (Metta) expected eight good results: **associated, developed, and practiced frequently, made a habit of, made a basis of (practised thoroughly), has been implemented, acquainted with, and thoroughly undertaken.**

“*Mettāya, bhikkhave, cetovimuttiyā āsevitāya bhāvitāya bahulikatāya yānikatāya vatthukatāya anuṭṭhitāya paricitāya susamāraddhāya aṭṭhānisamsā pāṭikaṅkhā.*

cetovimutti: [f.] emancipation of heart.

āsevitā : [pp. of *āsevatī*] associated; practised; frequented.

bhāvitā : [pp. of *bhāveti*] increased; cultivated; developed.

bahulikata : [pp. of *bahulīkaroti*] took up seriously; increased. (adj.), practised frequently.

yānīkata : [adj.] made a habit of; mastered.

vatthukata : [adj.] made a basis of; practised thoroughly.

anuṭṭhita :a. [anuṭṭhahati's pp.] has been implemented, has been affected, has been experienced (to).

paricita : [pp. of paricināti] practised; attended; acquainted with; accumulated; accustomed.

susamāradha : [pp.] thoroughly undertaken.

ānisaṃsa :[m.] profit; merit; good result.

pāṭikaṅkha :[adj.] to be desire or expected.]

- In a formal meditation session, one does the same. It is best to read a post or two on a given Dhamma concept before (or during) the meditation session and then contemplate those ideas. It is important to compare those concepts with one's life experiences. Then things will become clear with time. For example, why it is unfruitful to "live life lavishly, especially if that involves hurting oneself or others."
- You will be surprised that this process itself will get you to *samādhi*, and even *jhānā* in the long term. But we will discuss some other variations too.
- As I have mentioned in several posts, one could even get to the *Sotāpanna* stage just by comprehending the key Dhamma concepts to some extent.

Mind Is At The Forefront

12. Buddha Dhamma is all about the mind; Anything we say or do also starts with a thought. The Buddha said, "*manopubbaṅgamā dhammā...*", "the mind takes precedence over everything else..".

- It should be clear from the above discussion that Buddha's meditation techniques are compatible with Nature's laws. Regardless of whether one has a religious background or is an atheist, one can follow those guidelines.
- One becomes a "*Bhauddhayā*" or a "Buddhist" in his/her mind. If one understands some basic Dhamma concepts and lives by them, then one is automatically a Buddhist. When one gets started on the Path with a firm determination, Dhamma will guide one to be on the right path. ("*Dhammo have rakkhati dhammacāriṇ.*")
- The foremost goal is to live a moral life without causing harm to oneself or others and to seek some "peace of mind" from the hectic modern life. That is our starting point.

13. I also recommend listening to the following discourse for anyone seriously considering Buddhist meditation (You may need to adjust the volume control on your computer):

"The Hidden Suffering that We All Can Understand"

[WebLink: The Hidden Suffering that We All Can Understand](#)

That is in the post "[Starting on the Path Even without Belief in Rebirth](#)" in the "[Living Dhamma Overview](#)" subsection of the "[Living Dhamma](#)" section.

Next, "[2. The Basics in Meditation](#)",

12.2 **2. The Basics in Meditation**

Revised August 17, 2019; March 16, 2021; June 29, 2022

We discuss EIGHT elements of a firm foundation for Buddhist meditation. These are EIGHT steps to be followed at all times, not just during formal meditation.

The top 10 posts in this section describe the fundamentals of Buddhist meditation. The rest of the posts in this section discuss meditation subjects. They clarify unresolved questions and help gain *samādhi*. The first 11 posts should be followed in that order, at least initially.

1. Those who are doing breath meditation or “watching the stomach rise and fall” know that it is relatively easy for some to calm the mind compared to others. Some cannot even keep a calm mind for more than a few minutes; distractions start “popping up.”

- This “popping up” is due to the five hindrances (*pañca nīvaraṇa*) that I have described in “[Key to Calming the Mind – The Five Hindrances](#).” These are the “residues” or “gunk” that we have deep inside our minds that start bubbling up to the surface when we sit down to meditate.

2. Let us take the simile of water well contaminated with all the rotten stuff fallen into it over many years; our minds have accumulated gunk over repeated births, not just in this life. When we are engaged in stressful day-to-day activities, those activities stir up the “gunk,” and the mind gets clouded. It is like taking a long pole and stirring the well water; the “gunk” at the bottom comes up.

- The two “primary rotten things” we have are the first two on the list of the five hindrances: *kāmacchanda* (excessive greed) and *vyāpāda* (deep hate). Even though the word *vyāpāda* is commonly used, the correct Pāli word is *byāpāda*.
- *Vicikicchā* is the uncertainty about how to properly respond to external stimuli (sensory inputs.) The natural tendency is to attach to mind-pleasing stimuli and do whatever it takes to enjoy them. One does these because of the ignorance of *anicca*, *dukkha*, and *anatta*. *Vicikicchā* is sort of like a “favorite list” from the main ingredients of excessive greed and deep hate, the first two hindrances. ***Kaṅkhā vicikicchā* is a worse form of *vicikicchā* manifested as having doubts about the Buddha’s teachings (because they discourage such attachments.)**
- *Thina middha* or inability to concentrate on *Dhamma* concepts; one feels lethargic when reading/listening to *Dhamma*. That is because one does not understand the basic concepts of Buddha Dhamma. An “unsettled” or “excited” mind (*uddhacca-kukkucca*) is also personal and arises when one feels “superior” or “inferior” compared to others.
- The five hindrances are discussed in “[Key to Calming the Mind – The Five Hindrances](#).”

3. When we engage in day-to-day activities, we see, hear, smell, taste, touch, and also think about all sorts of things. If such things cause *kāmacchanda* or *vyāpāda* to arise, then some combination of five hindrances can burden our minds. All these are “external stirrers” that make our minds look like whirlpools. All these gang up to get the mind to stress out and “heat up.” That is the tension that we feel on a busy day. We need to “cool down”; we need “*niveema*.”

- One way to “cool down” is to turn off those external stirrers temporarily. Some people do this in a “breath meditation” session: One goes to a quiet place and closes their eyes; this will turn off mainly the five physical senses (i.e., we do not see, hear, smell, taste, or touch). That helps to calm the mind of some people, especially if they have practiced it.
- But it is not possible to turn off the sixth one, the mind itself. The mind likes to move around and not to be focused. Many people try to fix their minds on one object, say the breath or the rising of the stomach. That provides only a temporary solution. See, “[8. The Basic Formal Ānāpānasati Meditation](#).”
- Some people try to “turn off the mind” or try to stop thoughts from arising. That is DANGEROUS. We need to PURIFY the mind, not turn it off. The Buddha had a perfectly pure but very active mind. When one follows the Path, one’s mind will become sharper, not inactive.

The “Big Eight” to Avoid

4. However, if our minds have too much gunk (defilements), then they can disturb/stress our minds even without the aid of “a stirrer.” It is like an abandoned old well. It has dirty water, and one needs to REMOVE the existing dirty water first.

- Similarly, if one is engaged in immoral behavior, then the mind is like a well that has dirty and turbulent water. That is due to the **BIG EIGHT defilements**: killing, stealing, sexual misconduct, lying, gossiping, slandering, harsh speech, and constantly thinking about “mind-made” or “planned” sensual or immoral activities.
- Good examples of the last one: “making up sexual activities” or “how to retaliate to an enemy.” it is VERY important to stay from silently engaging in generating angry/lustful thoughts. Many people tend to do that because they think “I am not hurting anyone.” But that is not true. You are hurting yourself! A deeper analysis of this issue in [“Correct Meaning of Vacī Saṅkhāra.”](#)

5. **The mind calms down (or gets to *samādhi*) when one lives a moral life (*sīla*.)** Stopping the BIG EIGHT is the start of a moral life (*sīla*.) With that calmed mind (*samādhi*), one can comprehend deeper aspects of Buddha Dhamma and cultivate wisdom (*paññā*.) That is the initial order: *sīla*, *samādhi*, *paññā*. See, [“Sīla, Samādhi, Paññā to Paññā, Sīla, Samādhi.”](#)

- However, one must take a gradual approach: [“Is It Necessary for a Buddhist to Eliminate Sensual Desires?”](#).
- Just focusing the mind on one object, like the breath, **cannot remove** those defilements. It can only **suppress them temporarily**. That is the fundamental problem with “breath meditation.”

6. **Thus, it would be hard to achieve calmness even with breath meditation if one is actively engaged in the BIG EIGHT.**

- What we discussed above is a simple version of *Kāyānupassanā*, the first step in *Satipaṭṭhāna*; see, [“Satipaṭṭhāna – Introduction.”](#)
- If one is habitually engaged in one or more of those eight activities, the first thing to do is try to get rid of them. First, start with the worst habit and proceed gradually until all are bad habits removed. It is like emptying the well of the dirty water.
- That is a BIG STEP. It may take a little while, depending on how much “gunk” is there. But one thing is not to rush out and try to do much. That could be stressful too. The best thing to do is abstain from one or two big ones and experience the “cooling down” that results from it.
- Vain talk is a habit that should be gotten rid of early. It does not do any good for oneself or others. One will inevitably say something inappropriate (possibly slandering and lying too, which are also in the BIG EIGHT) when one gets carried away during the vain talk. Getting rid of it will help with being able to calm the mind quickly.
- The mind needs to see the benefits of doing something before it gets on board. That is why, initially, it may take a firm determination to stick with the plan.
- **It is important NOT to get used to “breath meditation.”** If you are used to it, I urge you to gradually stop and try the procedures described here at least for a couple of months. We want LONG TERM results. Many people get addicted to “breath meditation” to get temporary relief. **THAT IS A MISTAKE.**

7. Getting rid of bad old habits and installing new good habits is a KEY in the meditation practice; we will talk about habits (“*gati*,” which become “*āsavas*” over time) in more detail in the next section. Here are some basic ideas that would be helpful:

- To form a new habit takes some effort initially. I tried it out by making a new habit of peeling oranges with my left hand (I am right-handed). Initially, it was hard, and the main problem was that I kept forgetting to use my left hand. I had to set the alarm to remind myself first. But after a few days, I started

remembering, and after a week or two, the new habit was working. Now I automatically do it, and now it is a bit strange to try to peel oranges with the right hand!

- When we make a new habit, a set of neurons in the brain start to wire together for that task; the more we do it, the stronger the neural connections become. That is what happens when we learn to ride a bike, drive a car, or zillions of other things that we do without even thinking about it; see, “[True Brain: How the Mind Rewires the Brain via Meditation/Habits](#)” and “[How Habits are Formed and Broken – A Scientific View](#).”
- In breaking a habit, one needs to do the reverse. When one starts to smoke less and less, the neural connections for that task will become weaker. After a while, it will become more natural NOT TO smoke. The brain will stop giving that signal. So it is critical to have the determination to hold off the urge in the beginning. Try to replace that activity with something else at that time. One can remove any bad habit that way. It is the same principle.

8. The primary formal meditation technique is in the next section. Those who need time to get rid of the BIG EIGHT can also monitor the progress by doing such formal meditation sessions. It is essential to realize that all defilements (bad habits) are removed only at the *Arahant* stage. So, there is no point in getting discouraged if it takes time to stop bad habits; **the key is to make progress and not go backward.**

- Sometimes when one starts on the *Ariya Bhāvanā*, things may look worse before getting better. It is like trying to cool a hot iron by sprinkling water on it when all that smoke comes out and may appear to be getting worse. But one needs to be persistent. One needs to keep in mind that uncountable beings have attained “cooling down” by having faith in the Buddha.

Next, “[3. The Second Level – Key to Purify the Mind](#)”,

12.3 3. The Second Level – Key to Purify the Mind

The top 10 posts in this section describe the fundamentals of Buddhist meditation. The rest of the posts in this section discuss meditation subjects. They clarify unresolved questions and help gain *samādhi*. The first 11 posts should be followed in that order, at least initially.

1. Let us go back to the example of the abandoned well. Now we have done a decent job of cleaning the dirty water that had been there for a long time, i.e., we have reduced at least some of the main immoral acts, the BIG EIGHT.

- Now we need to make sure that things do not fall into the well while we try to make the water even more cleaner; if there is no barrier around it, when it rains mud water can fall into the well. As with the well, we need to make sure that we keep those BIG EIGHT out of our minds as much as possible. **This is ‘sīla’ (pronounced “seela”) or moral living.**

2. In order to make sure that we will not drift back to the old ways, we need to cultivate moral mindfulness (“*sati*”): we need to be on the “lookout” for any temptations to break the BIG EIGHT. But there is a catch that most people do not comprehend: bad habits and cravings or “*gati/āsavas*” that we have are not only from this life, but possibly from previous lives as well.

3. Again, we can use the old water well as an example: When we drained the water out of the well, the well starts filling up with water from underground fresh water oozing through cracks (from underground aquifers) which is pure.

- However, if there is a rotten stuff at the bottom of the well that had been there for a long time, then that pure water gets contaminated. Our bad habits (*gathi/āsavas*) are like the dirt at the bottom of the well.

4. The water in the above well will now look relatively more clear if it is undisturbed, i.e., when we let the water to settle down. **This is effectively what we do in breath meditation or any such *samatha* meditation.** When someone is abstaining from the BIG EIGHT, it is relatively easy to calm the mind by going to a quiet place, closing the eyes, and then focusing one object, say the breath.

- Such meditations are *anāriya* meditations; they provide only temporary relief. One could also get into *anāriya jhānā* this way, with lots of practice, especially if one could live a secluded life. Ancient *yogis* who lived moral lives and stayed away from other humans in forests could attain higher *jhānā*.
- What happens here is that the five hindrances are kept SUPPRESSED. It is like the rotten stuff kept undisturbed at the bottom of the well.
- If one takes a long pole and stir the well, those contaminants start coming up.

5. In the same way, when someone comes out of the quiet place, one gets “disturbed” with external sense stimuli (i.e., when a particularly strong sense object is presented). For someone with a lot of lust, it could be a picture of an attractive person. If someone has a lot of hate towards another, then hateful thoughts can come to the surface just by someone mentioning that person’s name.

- This “bubbling up of bad stuff to the surface” is called “*anusaya*.” To stop such *anusaya*, those *gathi/āsava* need to be removed (gradually).
- These terms are explained in, “[Gathi \(Gati\), Anusaya, and Āsava.](#)”
- This is why people who have a very calm and peaceful experience at a meditation resort come back to regular hectic life and see that experience fade away gradually. That is because it WAS a temporary solution. **What we have in mind here is a more permanent solution. But this approach takes a bit more time.**

6. So, how do we really clean the well? It is not enough to let the gunk to sink back to the bottom; we need to remove the gunk that has accumulated at the bottom of the well. There could even be toxic things down there. Thus it takes an effort to remove all those. Once those are removed, there is nothing down there that

can contaminate the fresh water coming out. When the well fills up we only need to make sure that things do not fall back in to contaminate the well.

- Similarly, what we need to do with our minds is to remove the bad habits (*gathi/āsavas*) that have been accumulated over countless past lives and reinforced in this life. If we have hate in our minds, that hate can triggered easily. This is why some people are prone to “flare-ups” than others. If we have extreme greed, we can be tempted easily to act immorally for sense satisfaction through any of the six senses.
- Even though the main ones are greed and hate, there are uncountable number of combinations (when included with ignorance). That is why we see uncountable number of habits/personalities/tendencies in different people. **No two persons are alike, even identical twins.**

7. Looking at the five hindrances, the main culprits are of course, greed, hate, and *vicikicchā* (the particular set of things one has a liking for, which can be things liked or disliked). The other two help bring out these: the “lazy mind” will not take any effort to suppress bad thoughts; the “dispersed mind” is too dispersed to be focused, to think clearly. All these are intimately connected to the habits (*gati/āsavas*).

- By the way, if one can remove all the *gathi/āsavas*, that is when one attains *Nibbāna*. The Buddha realized the “*āsavakkhaya nana*” just before attaining the Buddhahood. *Āsavakkhaya* is “*āsava*+”*khaya*” or removing the temptations; “*khaya*” is the getting rid of “*saṇ*”; see, “[What is “Saṇ”? – Meaning of Sansāra \(or Samsāra\).](#)”
- Here we are trying to remove some easily removable less potent habits, and at least try to reduce the big ones. The good news is that we can EXPERIENCE the relief or “cooling down” or “*niveema*” each time we either remove a small bad habit or lessen the severity of bigger ones. We don’t have to remove ALL bad habits/cravings in order to experience the “cooling down”.

8. After making a commitment to abstain from the BIG EIGHT as much as possible, we need to sort out our bad habits.

- Make a list with little things on the top and more serious things towards the bottom. We all have greed and hate; those are the “big ones”; what we need to do here is try to remove easily identifiable smaller bad habits; for example, explosive temper, stinginess, seeking too much sense pleasures (i.e., being addicted to alcohol, drugs, even excess eating).
- It is important to get rid of the ones at the top (the easy ones), and that will provide incentive to continue. If one tries to tackle the big ones straight away, one might get discouraged and give up the whole effort.

9. Of course, focusing on the BIG EIGHT is very important. If one is engaging in killing animals for pleasure (eg., fishing), then that needs to be stopped if one is serious about meditation. If one is making a living by stealing from others, that needs to be stopped. If one is engaged in sexual activities with other married people, that needs to be stopped, etc.

- Those are common sense things too. If one looks at one’s actions and see that it can cause harm for oneself AND/OR others, then one needs to seriously start thinking ways to initially reduce and eventually to stop such actions.

10. There are several posts on habits and *gati/āsavas*; you may want to find and read them. And contemplate on those ideas. An English discourse on this topic is given in the post, “[How Are Gati and Kilesa Incorporated into Thoughts?](#).”

- As I emphasized at the beginning, one has to make an effort; even the Buddha could only show the way. We need to examine what he suggested, think through to make sure they make sense. Then the mind gets on-board, especially when it starts seeing the benefits, even small benefits.
- The key is to get started; when one accomplishes even a small goal that provides the fuel to go further.

11. One could and should use the “four bases of mental power (*sātara iddhipāda*)” in accomplishing these goals. Tackle one goal at a time. As you accomplish more and more goals, the *iddhipāda* (*chanda, citta*,

virīya, *vīmaṃsā*) will grow as well. These are the critical factors that the *yogis* used to cultivate mundane (*anāriya*) *jhānā* and gain extraordinary mental powers too.

- *Chanda* is the desire to achieve the goal. *Citta* is the determination one makes and the *virīya* is the effort that one puts in to get it done. *Vīmaṃsā* is careful examination of the benefits of breaking the habit and the possible repercussions of keeping the habit. As the four *iddhipāda* grow (with accomplishment of more and more goals), the *vīmaṃsā* faculty grows in particular; this is a facet of wisdom (*paññā*).

12. In trying to remove any bad habit, it is essential to look at the negative repercussions or bad consequences (called *ādeenava* or *ādīnava*) from that activity. Let us take the bad habit of getting into a rage as an example:

- Think about the unpleasant feeling of getting “heated up” in a moment of rage. Of course, at the moment of rage one may actually enjoy it: In extreme cases, this is why there are people dead with 30-40 stab wounds, when all it takes to kill a person a couple of stabs; such is the danger of getting into a rage. One feels bad about it only later, and then it is too late.
- Even worse are the *samsāric* consequences: If rage becomes a dominant characteristic of one’s personality, it is possible that this is what will be grasped at the moment of death and a birth of a “similar kind” could result, i.e., birth in a burning hell (this is the principle of *Paṭicca Samuppāda*: “*pati+ichcha*” leading to “*sama+uppada*”).

13. Let us take a few examples to see how some bad habits can be tackled:

- Many people have bad temper (which could develop into hate) which is a result of *vyāpāda*. Yes. This is a *samsāric* habit, and unlike many other habits, this one is hard to control when triggered. This is one that needs to be dealt with when the anger is absent. The best is do the *Mettā Bhāvanā*. We will use the *Ariya Mettā Bhāvanā* later. For now, one could close the eyes at a quiet time, and sincerely say, “May all beings be free of suffering, free of ailments, free of anger, and be happy”. If you have a particular person that you are not in good terms, repeat with his/her name. We cannot remove the anger in the mind of that person. We can only remove the anger within ourselves. Do this a couple of times a day and if you do it sincerely it will give results (for YOU to have a peace of mind).
- If you are a person with cravings for sense pleasures (I do not mean necessities), your mind is likely to be frequently seeking such things. Try to cut down on such activities, and also try to do more giving. Donate to charities, give a few dollars to a homeless person. All these will make you feel better; this is called *pīti* (“*preethi*” in Sinhala or joy).
- Also, when you simplify your life, the burden on your mind will be less, and you will get a different kind of joy than that from sense pleasures; this is “*niveema*” or “cool down,” or *nirāmisā sukha*; see, “[Nirāmisā Sukha](#).”
- Alcohol or cigarette addiction is another example. Instead of trying to stop such a habit “cold turkey,” it is better to cut down gradually. But one MUST have the discipline (the importance of cultivating the *iddhipāda* comes here) to stick to the plan, and not go back. It also helps to find a replacement activity at that time (taking a less potent drink or chewing a gum, etc). One of the four *iddhipāda* that is essential here is *citta* or determination.

14. Now we are at a point where I can introduce the real *ānāpānasati bhāvanā* that was described by the Buddha.

Next, “[4. What do all these Different Meditation Techniques Mean?](#)”,

12.4 **4. What do all these Different Meditation Techniques Mean?**

Revised April 11, 2020; September 4, 2022

The top 10 posts in this section describe the fundamentals of Buddhist meditation. The rest of the posts in this section discuss meditation subjects. They clarify unresolved questions and help to gain *samādhi*. The first 11 posts should be followed in that order, at least initially.

1. Buddha Dhamma is focused on purifying the mind of greed, hatred, and ignorance. As the mind is purified, it gains *nirāmisa sukha* which can be experienced at various levels from the beginning. If one can “stick to” this program for a couple of months, one can look back and see the change in oneself. One should have a more peaceful, calm mind that has “cooled down”.

- A mind is impure because it attaches to “things in this world” with the misconception that things in this world (31 realms) can be maintained to one’s satisfaction, i.e., with the perception of *nicca*. Thus the prevailing mindset is that happiness (*sukha*) should be attained by employing any means. And once attained it can be maintained and thus one is in total control of one’s affairs (*atta*).
- These three misconceptions of *nicca*, *sukha*, and *atta* are the three culprits that keep us bound to “this world” of 31 realms, i.e., the endless rebirth process or *samsāra*. The Buddha showed that the actual reality of “this world” is described by the three characteristics of *anicca*, *dukkha*, and *anatta*: No matter how hard we try, we cannot maintain things to our satisfaction in the long term (*anicca*). Thus we get distraught (*dukkha*), and thus we are not in control and become helpless when born in bad realms like the animal realm (*anatta*).
- More details in the first discourse at, [“Tilakkhana – English Discourses.”](#)

2. I am NOT saying that one should not work hard to get a good education and job. That MUST be done. It is impossible to have peace of mind if one is hungry and homeless. But we also need to be aware of the FACT that all mundane achievements are temporary. Even if we get to live this life without a major catastrophe, we have to leave all behind when we die.

- One acts with greed, hate, and ignorance and makes the mind impure because of the wrong perceptions of *nicca*, *sukha*, and *atta*. Then one is capable of immoral acts to get some temporary satisfaction because the bad consequences of such actions may not be clear. However, when one truly understands the reality (i.e., *anicca*, *dukkha*, *anatta*), such immoral actions become unlikely.
- For that stage to be reached, one has to train one’s mind to “take in the good” and “reject the bad”. For that, a change in one’s habits (with *Ānāpānasati* meditation) is necessary.

The following is a logical sequence for meditation:

3. First, one must sort out what is good and bad and the consequences of good and bad actions. This is why the vision, *Sammā Diṭṭhi*, comes first in the Noble Eightfold Path. To get to *Sammā Diṭṭhi*, one needs to “sort out the good from the bad.”

- *Vipassanā* (*vi+passa* means “to see clearly” and discard. Here, where “*vi*” means “special” and “*passa*” is to “see.” *Vidassana* (*vi+dassana* means sort out by clear vision, whereas “*dassana*” means the vision) means the same thing. Understanding Buddha Dhamma and acquiring the vision are needed to sort out the “good” from the “bad”.
- I cannot emphasize enough the importance of *vipassanā* (*vidassana*) or insight meditation. **Without the “correct” vision, one could strive for the whole life and not get anywhere:** one has to understand the true nature of this world (*anicca*, *dukkha*, *anatta*), the Four Noble Truths, and the Noble Eightfold Path. It is not memorization, but understanding that counts.

4. A huge amount of defilements are removed from one’s mind with this insight meditation. The key is to understand the “*anicca* nature of this world”. It is the first type of meditation that is needed. One can attain the *Sotāpanna* stage without doing any other types of meditation discussed below.

The Buddha once took a bit of soil to a fingertip and told the *bhikkhus* that, “if the amount of defilements a *Sotāpanna* needs to get rid of is comparable to this amount of soil, then a normal human being has to get rid of an equivalent to the soil in the whole Earth”.

- That is not a misprint or an exaggeration. A *Sotāpanna* is bound to attain *Nibbāna* within a maximum of seven “*bhava*.” A normal human being could be trapped in the rebirth process for trillions of years to come. We have been through the rebirth process for countless trillions; see “[Infinity -How Big is It?](#)”.
- Many say, “I do like my life. Why would I not want to be reborn?”. **The problem is, that future rebirths may not be in the human realm.** We have no idea what we have done in our past lives. Thus even if we live a perfectly moral life, there are no guarantees that we will get a good rebirth. This is why understanding *kamma*, rebirth, etc via insight meditation is important.

5. How does one do insight meditation? Listening to discourses and reading Dhamma concepts are the two main forms of getting the correct information. Then one could contemplate those concepts in sitting meditation. **But reading up on Dhamma concepts during a quiet time is meditation; also see, “[How to Cultivate the Anicca Sañña](#)”** and the follow-up post.

- Once some understanding is reached via *vipassana* (*vidassana*) *bhāvanā* or insight meditation, one can start the next two key steps. *Mettā bhāvanā* and various forms of *anupassanā bhāvanā*.
- Once one understands the true status of affairs in the wider world of 31 realms, one can really comprehend the amount of suffering that has been hidden. With that understanding, one can engage in the *Ariya mettā bhāvanā*, an excellent way to pay back our old debts to other beings. **This is the second way to purify our minds too.**
- I hope I have conveyed the idea that the bulk of work can be done with just insight meditation, contemplating “*anicca, dukkha, anatta*.” However, doing the other two types of *bhāvanā*, i.e., *mettā bhāvanā* and *ānāpānasati*, can be helpful for insight meditation too.

6. The last and third way to purify the mind is via *anupassana*. *Anupassana* means “discard according to the principles learned” (“*anu*” means according to, and “*passana*” means to “see.” Another meaning of “*anu*” is defilements, which is “to be able to see one’s defilements”). *Anupassanā* can take various forms.

- *Ānāpānasati bhāvanā* is the foundation. Once “*ana*” and “*pana*” are sorted out by *vipassana* (*vidassana*), one needs to engage in *Ānāpānasati* all the time. This means one needs to be mindful of what one is about to do and ensure it is the “right thing to do”.
- When one starts understanding *anicca, dukkha*, and *anatta*, one can start doing the *aniccānupassanā*, *dukkhānupassanā*, and *anattānupassanā*, and four more related “*anupassanā*”. I will elaborate on this later.
- *Satipaṭṭhāna bhāvanā* (with *kāyānupassanā*, *vedanānupassanā*, *cittānupassanā*, and *dhammānupassanā*) includes all the *bhāvanā* techniques that we have discussed so far. It is THE ultimate encompassing everything needed to attain stress relief. It can take one to *Arahanthood*. *Ānāpānasati* (not breath meditation) is essentially the same as *Satipaṭṭhāna*, and that is the first step to attaining the *Sotāpanna* stage. See “[Elephant in the Room 3 – Ānāpānasati](#).”

7. Thus one could make things simpler by just doing insight meditation, *Ānāpānasati*, and the *mettā bhāvanā*. That is all one needs to do to have a “better state of mind” or even to become a *Sotāpanna*.

8. The problem with meditation techniques taught even in *Theravāda* schools these days is the following. They are either breath meditation or chantings. How can one remove defilements by watching the breath? Even though it can calm the mind, there are no long-term benefits. Watching the breath CANNOT reduce defilements from the mind.

- Another popular technique is just to contemplate impermanence. They keep repeating, “my body is impermanent; it is subjected to decay and death.” Has anyone achieved any progress doing that for even

twenty, or thirty years? A Buddha does not need to tell us that. All people, belonging to any religion, know impermanence is a fact of life!

- Yet another popular “chanting” is to contemplate the “foulness of the body”. That is not what the Buddha meant by the “*patikula manasikāra bhāvanā*.” Again, everyone knows that our bodies are subject to decay and death; see “[Mahā Satipatṭhāna Sutta](#).”

Next, “[5. Ariya Mettā Bhāvanā \(Loving Kindness Meditation\)](#)”,

12.5 5. Ariya Mettā Bhāvanā (Loving Kindness Meditation)

Revised February 11, 2020

The top 10 posts in this section describe the fundamentals of Buddhist meditation. The rest of the posts in this section are on possible meditation subjects. They can be used to clarify unresolved questions, and to get to *samādhi*. The first 11 posts should be followed in that order, at least initially.

Introduction

1. We all have acquired innumerable “bad *kamma vipāka*” in this cycle of rebirths (*samsāra*) that has no beginning. There is a very simple recipe for stopping many of such “bad *kamma vipāka*” from coming to fruition by “wearing out” and ultimately removing the “*kamma seeds*” (*kamma bīja*) associated with them.

- We acquire a bad “*kamma seed*” when we do something wrong to a living being, and we become indebted to that being. Just like we can become “debt-free” by paying off debts, we can pay off that debt. The problem is that we have become indebted to innumerable beings in previous rebirths. In the *Mettāsaṃhagata Sutta* (SN46.54) and other *suttā*, the Buddha has explained how much of this debt can be paid off by doing the *Ariya metta bhāvanā* and also by transferring merits to “all beings” when we do a good deed; see, “[Transfer of Merits \(Pattidana\) – How Does it Happen?](#).”
- Here we focus on the *Ariya Mettā Bhāvanā*. First some background material to clarify what this means. Also see, “[Karaniya Mettā Sutta – Mettā Bhāvanā](#).”

Mundane Mettā Bhāvanā

2. The standard or mundane *Mettā bhāvanā* (loving kindness meditation) goes something like, “May myself and all beings be free of suffering, healthy, happy, and be free of all suffering”, or some similar (longer) passages.

- Any type of such meditation is of course good. It makes your own mind calm down, and makes you think about the (mundane) welfare of the other beings.

Ariya Mettā Bhāvanā

3. However, the *Ariya Mettā Bhāvanā* has a much more deeper meaning. It is done with at least some idea of the complexity of “this world” with 31 realms and the status of the beings in those realms. In order to cultivate true compassion and loving-kindness one NEEDS TO FEEL the possible suffering in all those realms; see, “[The Grand Unified Theory of Dhamma](#)”:

- The beings in the lowest four realms (*apāyā*) undergo unimaginable suffering, both physical and mental.
- In the lowest five realms (the *apāyā* and the human realm), beings have physical bodies that are subject to sicknesses, body aches, and getting old before dying.
- The sixth through eleventh realms are that of the *devas*. They have spontaneous births with fully formed (but less dense) bodies that are not subjected to sickness, aches and pains. There are no visible signs of old age until close to death. But they also have all five physical senses just like the lower five realms. But their physical bodies are much more dense, “[Body Types in 31 Realms – Important of Manomaya Kāya](#).”
- The higher 20 realms that include *rūpa loka* and *arūpa loka* have even less dense bodies than the *devas*, and do not have the physical sense faculties for taste, smell, and body touch. Thus any suffering they have is all mental, and not as intense as in the lower realms.

The Difference With the *Sotāpanna* stage

4. Therefore, no living being is free of FUTURE suffering in any of the 31 realms, because unless the *Sotāpanna* stage of *Nibbāna* has been attained, even the beings in the highest realm can end up even in the *apāyā* (lowest four realms) in future rebirths.

- And the only way to attain the *Sotāpanna* stage of *Nibbāna* is by comprehending the Three Characteristics of this world of 31 realms: *anicca*, *dukkha*, *anatta*.
- The first level of understanding of *anicca*, *dukkha*, *anatta* leads to the *Sotāpanna* stage; when one attains the *Sotāpanna* stage, one becomes free from the *apāyā* FOREVER. This happens via the inability of the mind of a *Sotāpanna* to generate certain *cittā* with “*apāyagāmī*” kammic power; see, “[Akusala Citta – How a Sotāpanna avoids Apayagami Citta](#)” and “[Conditions for the Four Stages of Nibbāna](#)”.

Higher Stages of *Magga Phala*

5. When the next stage of *Nibbāna* (*Sakadāgāmī* stage) is attained, one becomes free of births in the lower five realms where suffering due to physical ailments and diseases are possible. Thus one PERMANENTLY becomes “healthy” by attaining the *Sakadāgāmī* stage.

- At the *Anāgāmī* stage, one removes more *akusala citta* (and other fulfill other conditions; see, “[Conditions for the Four Stages of Nibbāna](#)”), and will never be born again in *kāma loka* including the *deva* realm. Thus one becomes PERMANENTLY free of any physical suffering.
- Then at the *Arahant* stage, all defilements are removed from the mind, and one will never be reborn in any of the 31 realms. The mind truly becomes free and one attains permanent *nirāmisa sukha*; see, “[Three Kinds of Happiness – What is nirāmisa sukha?](#)” and other posts on *nirāmisa sukha*.
- As you can see, the *Ariya Mettā Bhāvanā* is similar in structure to the conventional one, but the words have deeper meanings. For example, by saying “be healthy” now it is meant to be healthy forever. That means not to be born ever with a body that is subject to diseases and old age.

Elements of the *Ariya Mettā Bhāvanā*

6. Now we can see how the *Ariya Mettā Bhāvanā* is formulated:

- “May myself and all living beings attain the *Sotāpanna* stage and be free from suffering in the *apāyā* forever”
 “May myself and all living beings attain the *Sakadāgāmī* stage and be healthy forever”.
 “May myself and all living beings attain the *Anāgāmī* stage and be content (attain peaceful happiness) forever”.
 “May myself and all living beings attain the *Arahant* stage and be free from all suffering and attain the full *Nibbānic* bliss”.
- All four *Brahma Vihāra* (*mettā*, *karuṇā*, *muditā*, *upekkhā*) cultivate with this *bhāvanā*.
- Off course, the *Bhāvanā* becomes increasingly effective as one starts to comprehend *Tilakkhaṇa* better.

Just Chanting Is Not Enough

7. What matters is not the particular set of word used, but what is felt in one's heart. In order to do that one needs to truly comprehend that there is REAL SUFFERING in this world, not only at the human or animal realms but in many other realms.

- The impact of the *Mettā Bhāvanā* increases gradually with an increased understanding of *anicca*, *dukkha*, *anatta*, because then one realizes the dangers and suffering that all living beings face in future lives.

- The potential of the *Mettā Bhāvanā* is enormous. The Buddha said one could attain the *Anāgāmi* stage by correctly doing the *Mettā Bhāvanā*. But that entails understanding *anicca*, *dukkha*, *anatta*, i.e., attaining the *Sotāpanna* stage or at least embark on the path to *Sotāpanna* stage.
- However, even before attaining the *Sotāpanna* stage, one could reap many benefits by doing this correct *Ariya Mettā Bhāvanā*; see, “[Kamma, Debt, and Meditation](#).”

Essential of Meditation

8. It is best to do *Ariya Mettā Bhāvanā* and *Vipassanā Bhāvanā* (meditation on *anicca*, *dukkha*, *anatta* and other dhamma concepts) **in a sitting meditation session every day**; see, “[4. What do all these Different Meditation Techniques Mean?](#).”

- Initially, 10-15 minutes would be good for formal meditation. That time will automatically increase as the *nirāmisā sukha* sets in one starts seeing the benefits. Later on, one could stay in meditation for hours.
- Of course, *Ānāpānasati* needs to be practiced the whole day. *Ānāpānasati* means being aware of what is “taken in” (*āna*) and what is “discarded” (*āpāna*.) See, “[7. What is Ānāpāna?](#)” and other related posts in the meditation section.
- Listening to discourses and reading about Dhamma are also forms of meditation. That should be done during quiet times so the key concepts can be absorbed.

Results Will Grow With Better Understanding

9. The *Ariya Mettā Bhāvanā* is one of the most POTENT tools that we have. It is a simple concept, but the main difficulty is with the “*Ariya*” part. One needs to comprehend *anicca*, *dukkha*, *anatta* for the *bhāvanā* to be fully effective.

- Still, even the mundane version stated in #2 above is a good start. As one follows the Path and understands the concepts better (not the book knowledge), the *javana* power in one’s thoughts become strong, and the *bhāvanā* becomes stronger and more effective.
- In the *Abhidhamma* language, the most potent *kusala citta* is the “*somanassa sahaḡata ñāṇa sampayutta asaṅkhārika citta*,” i.e., the “thought that arises with joy and wisdom automatically”. This thought also gets stronger with increasing wisdom and gets stronger as one gets to *Sotāpanna magga*, *Sotāpanna phala*, etc and optimum only at the *Arahant* stage.
- Yet even when one is following the mundane eightfold path, this *citta* is there, at a lower strength. One needs to be cultivate it. See, “[Buddha Dhamma – In a Chart](#),” and “[What is Unique in Buddha Dhamma](#).”

Next, “[6. Ānāpānasati Bhāvanā \(Introduction\)](#)”,

12.6 6. Ānāpānasati Bhāvanā (Introduction)

Revised July 22, 2020

The top 10 posts in this section describe the fundamentals of Buddhist meditation. The rest of the posts in this section discuss meditation subjects. They clarify unresolved questions and help gain *samādhi*. The first 11 posts should be followed in that order, at least initially.

1. I hope that several key points are clear from the discussion in the post, "[3. The Second Level – Key to Purify the Mind](#)":

- Bad habits (*gati/āsava*) are associated with one more immoral or unworthy acts, speech, or thoughts. We need to discard those.
- To counter the bad habits, one needs to cultivate good habits. For this, we need to improve moral behavior by engaging in ethical activities that bring joy to the heart.
- AND we need to do this all the time; we cannot let bad habits come back, which means we need to be on the lookout for any lapses in our practice. And we need to be on the lookout for opportunities to do moral acts that are beneficial for oneself and others.

2. In a general sense the Pāli word *ānāpāna*, "*āna*" includes anything that needs to "taken in" for the betterment of life, and "*āpāna*" the opposite. For example, we should eat only foods that are good for the body and stay away from or discard bad foods.

- Nowadays, "*āna*" is taken to be "breathe in" and "*āpāna*" is assumed to be "breathe out." Now, "*sati*" means mindfulness, and thus, the word "*ānāpānasati*" interpreted as "mindfully breathing in and mindfully breathing out." That is the mundane (or "*padaparama*") interpretation of "*ānāpāna*."
- Buddha meant something deeper that would help cleanse the mind.

3. The Buddha described *bhāvanā* as follows: "*āsevitāya, bhāvitāya, bahuleekathāya,...*" or "keep close association, use often, and use all the time (what is good).....". **When one is making an effort to form a new habit, one should be thinking about it and doing things to support that whenever possible. Trying to do it in a formal meditation session will not be enough.**

- We discussed the current scientific explanation of how repeated acts help form habits by strengthening a set of neural connections in the brain. See, "[Truine Brain: How the Mind Rewires the Brain via Meditation/Habits](#)." The same thing works to break bad habits by NOT doing it whenever that comes to the mind. Then existing neural connections will get weaker.
- **What is to contemplate: To be mindful to "take in good things (*kusala* or moral things), and to "discard bad things (*akusala* or immoral things)." That is the real meaning of *ānāpānasati bhāvanā*.**

4. Now, with all the discussion we have had up to this point, how can just a process of "breathing in" and "breathing out" mindfully GET RID OF either the bad habits (*gati/āsāvā*) or the five hindrances?

- Of course, that is not possible.
- But it CAN do one thing, as we mentioned before. If we sit in a quiet place with the eyes closed (i.e., turn off the five physical senses in effect), AND fix the mind on the breath, we can get the five hindrances to settle down and not come up (assuming that we are staying away from committing the BIG EIGHT immoral acts).
- However, this calming down or getting to *Samatha* is a TEMPORARY solution. The moment we come back to the real world with all its distractions and temptations, those habits take over.

5. The breath meditation needs to be used appropriately, with the understanding that it can provide only temporary relief. This breath meditation is the same meditation that was used by the Hindu *yogis* to attain mundane (*Anāriya*) *jhānā* even before the Buddha.

- Since the time Buddhaghosa's Visuddhimagga was accepted as the basis of Theravāda Dhamma (in the fifth century CE), this "literal interpretation" of the *ānāpānasati* has been used.
- The real *ānāpānasati bhāvanā* is not described in the *Visuddhimagga* and is not described in any Mahāyāna or even Theravāda texts today. One needs to go directly to the *Tipiṭaka* to find it; it is described in many *suttā*, for example, the *Assāsa sutta*. I could not find an English translation of this *sutta*. Another one *Arittha Sutta*, and the translation published at the Access to insight site is not complete, even though it does contain Buddha's admonition to Ven. Arittha that in and out-breathing is only one version of *Ānāpānasati* (in the *sutta* it says it is NOT the *Ariya* or Noble version) : [WebLink: ACCESSTOINSIGHT: Arittha Sutta: To Arittha](#)
- [Arittha Sutta: To Arittha \(On Mindfulness of Breathing\)](#)

6. Thus there are two interpretations of the *Ānāpānasati Bhāvanā*. One is the conventional "breathing" version and the other is the real version recommended by the Buddha, which has a wider interpretation, including breathing to a minor extent.

- The correct meaning is in many *suttā*. Of course, the main *sutta* is "[WebLink: suttacentral: Ānāpānasati Sutta \(MN 118\)](#)." The *Ānāpānasati sutta* is the condensed version of the Buddha's discourses on *Ānāpānasati Bhāvanā*. As with most main *suttā*, the discourse was condensed into the form for easy transmission. Other *suttā*, mostly by Ven. Sariputta, have explained the terms like "āna" and "āpana" in detail (like the *Assāsa Sutta*).
- I have discussed the *sutta* at a bit deeper level in "[7. What is Ānāpāna?](#)" and "[8. The Basic Formal Ānāpānasati Meditation](#)."
- See, "[Is Ānāpānasati Breath Meditation?](#)," where I provide a detailed discussion based on the *Tipiṭaka*.
- Furthermore, Sinhala commentaries (*Atthakathā*) were also written to explain the main *suttā*. Unfortunately, these *atthakathā* were burned down shortly after Buddhaghosa wrote his *Visuddhimagga* and other books. However, three important ones (*Paṭisambhidā Magga Pakarana*, *Pitakopadesa*, and *Netthipakarana*) have survived because they had been included in the *Tipiṭaka*. What I describe here is from those books in the *Tipiṭaka*.
- Buddhaghosa was a Hindu before converting to be a Buddhist later on; see, "The Life and Work of Buddhaghosa" by B. C. Law (1927). Some say he became a Buddhist in order to introduce Hindu concepts to Buddha Dhamma. Either that or he just used whatever he understood to be the *Ānāpānasati* without any malicious intentions. Either way, the correct interpretation had been hidden for all these years; see, "[Buddhaghosa's Visuddhimagga – A Focused Analysis](#)."

7. The key message of the Buddha was that we need to remove the greed, hate, and ignorance that we all have in our minds, and by doing that we can experience the *nirāmisā sukha* that is of better quality and of permanent nature. Let us now discuss the basic meditation technique that will start us on the correct path to achieve lasting happiness.

- More evidence from the *Tipiṭaka*: "[Is Ānāpānasati Breath Meditation?](#)"

Next, "[7. What is Ānāpāna?](#)",

12.6.1 Arittha Sutta - To Arittha (On Mindfulness of Breathing)

SN 54.6

PTS: [S v 314](#)

CDB ii 1768

Arittha Sutta: To Arittha
(On Mindfulness of Breathing)
translated from the Pāli by
Thanissaro Bhikkhu

[© 2006](#)

At Savatthi. There the Blessed One said, "Monks, do you develop mindfulness of in-&-out breathing?"

When this was said, Ven. Arittha replied to the Blessed One, "I develop mindfulness of in-&-out breathing, lord."

"But how do you develop mindfulness of in-&-out breathing, Arittha?"

"Having abandoned sensual desire for past sensual pleasures, lord, having done away with sensual desire for future sensual pleasures, and having thoroughly subdued perceptions of irritation with regard to internal & external events, I breathe in mindfully and breathe out mindfully."^[1]

"There is that mindfulness of in-&-out breathing, Arittha. I don't say that there isn't. But as to how mindfulness of in-&-out breathing is brought in detail to its culmination, listen and pay close attention. I will speak."

"As you say, lord," Ven. Arittha responded to the Blessed One.

The Blessed One said, "And how, Arittha, is mindfulness of in-&-out breathing brought in detail to its culmination? There is the case where a monk, having gone to the wilderness, to the shade of a tree, or to an empty building, sits down folding his legs crosswise, holding his body erect, and setting mindfulness to the fore.^[2] Always mindful, he breathes in; mindful he breathes out.

"[1] Breathing in long, he discerns, 'I am breathing in long'; or breathing out long, he discerns, 'I am breathing out long.' [2] Or breathing in short, he discerns, 'I am breathing in short'; or breathing out short, he discerns, 'I am breathing out short.' [3] He trains himself, 'I will breathe in sensitive to the entire body.'^[3] He trains himself, 'I will breathe out sensitive to the entire body.' [4] He trains himself, 'I will breathe in calming bodily fabrication.'^[4] He trains himself, 'I will breathe out calming bodily fabrication.'

"[5] He trains himself, 'I will breathe in sensitive to rapture.' He trains himself, 'I will breathe out sensitive to rapture.' [6] He trains himself, 'I will breathe in sensitive to pleasure.' He trains himself, 'I will breathe out sensitive to pleasure.' [7] He trains himself, 'I will breathe in sensitive to mental fabrication.'^[5] He trains himself, 'I will breathe out sensitive to mental fabrication.' [8] He trains himself, 'I will breathe in calming mental fabrication.' He trains himself, 'I will breathe out calming mental fabrication.'

"[9] He trains himself, 'I will breathe in sensitive to the mind.' He trains himself, 'I will breathe out sensitive to the mind.' [10] He trains himself, 'I will breathe in satisfying the mind.' He trains himself, 'I will breathe out satisfying the mind.' [11] He trains himself, 'I will breathe in steadying the mind.' He trains himself, 'I will breathe out steadying the mind.' [12] He trains himself, 'I will breathe in releasing the mind.' He trains himself, 'I will breathe out releasing the mind.'^[6]

"[13] He trains himself, 'I will breathe in focusing on inconstancy.' He trains himself, 'I will breathe out focusing on inconstancy.' [14] He trains himself, 'I will breathe in focusing on dispassion.'^[7] He trains himself, 'I will breathe out focusing on dispassion.' [15] He trains himself, 'I will breathe in focusing on cessation.' He trains himself, 'I will breathe out focusing on cessation.' [16] He trains himself, 'I will breathe in focusing on relinquishment.' He trains himself, 'I will breathe out focusing on relinquishment.'

"This, Arittha, is how mindfulness of in-&-out breathing is brought in detail to its culmination."

Notes

¹. The Commentary reads this statement as indicating that Arittha has attained the third level of Awakening, non-return, but it is also possible to interpret the statement on a more mundane level: Arittha is simply practicing mindfulness in the present moment, having temporarily subdued desire for past and future sensual pleasures, and having temporarily subdued any thought of irritation with regard to the present.

2. To the fore (*parimukham*): The Abhidhamma takes an etymological approach to this term, defining it as around (*pari-*) the mouth (*mukham*). In the Vinaya, however, it is used in a context (Cv.V.27.4) where it undoubtedly means the front of the chest. There is also the possibility that the term could be used idiomatically as "to the front," which is how I have translated it here.
3. The commentaries insist that "body" here means the breath, but this is unlikely in this context, for the next step — without further explanation — refers to the breath as "bodily fabrication." If the Buddha were using two different terms to refer to the breath in such close proximity, he would have been careful to signal that he was redefining his terms (as he does below, when explaining that the first four steps in breath meditation correspond to the practice of focusing on the body in and of itself as a frame of reference). The step of breathing in and out sensitive to the entire body relates to the many similes in the *suttā* depicting *jhāna* as a state of whole-body awareness (see [MN 119](#)).
4. "In-&-out breaths are bodily; these are things tied up with the body. That's why in-&-out breaths are bodily fabrications." — [MN 44](#).
5. "Perceptions & feelings are mental; these are things tied up with the mind. That's why perceptions & feelings are mental fabrications." — [MN 44](#).
6. [AN 9.34](#) shows how the mind, step by step, is temporarily released from burdensome mental states of greater and greater refinement as it advances through the stages of *jhāna*.
7. Lit., "fading."
- See also: [MN 118](#); [SN 54.8](#).

12.7 7. What is Ānāpāna?

Revised April 2, 2017 (#4); September 2, 2019; July 23, 2020; June 6, 2022; October 11, 2002

The top 10 posts in this section describe the fundamentals of Buddhist meditation. The rest of the posts in this section discuss meditation subjects. They clarify unresolved questions and help gain *samādhi*. The first 11 posts should be followed in that order, at least initially.

1. The “[WebLink: suttacentral: Ānāpānasati Sutta, \(MN 118\)](#)” has the following verse:

“*Ānāpānassati, bhikkhave, bhāvitā bahulikatā mahapphalā hoti mahānisamsā. Ānāpānassati, bhikkhave, bhāvitā bahulikatā cattāro satipaṭṭhāne paripūreti. Cattāro satipaṭṭhānā bhāvitā bahulikatā satta bojjhaṅge paripūrenti. Satta bojjhaṅgā bhāvitā bahulikatā vijjāvimuttiṃ paripūrenti.*”

That means: “*Ānāpānasati, Bhikkhus, when practiced frequently bears many fruits and leads to many benefits. Ānāpānasati, Bhikkhus, when cultivated and pursued, brings the four Satipaṭṭhānā to their completion. The four Satipaṭṭhānā, when cultivated and pursued, bring the seven Bojjhaṅgā to their completion. The seven Bojjhaṅgā, when cultivated and pursued, bring vijjā (opposite of avijjā) and vimutti (or Nibbāna) to their completion.*”

- Now, if *ānāpāna* means “breathing in and breathing out”, how can that lead to the completion of the four *satipaṭṭhānās*, the seven *bojjhaṅgas*, removal of *avijjā*, and the attainment of *Nibbāna*? Can anyone seriously think that is possible?
- Instead, *ānāpāna* MEANS cultivating *Satipaṭṭhāna*, *Satta Bojjhaṅga*, etc., by “taking in morals” and “expelling immoral” as we discuss below.

2. *Satipaṭṭhāna Bhāvanā* is a more detailed version of the *Ānāpānasati Bhāvanā*. Thus it is essential to learn the correct version of the *Ānāpānasati*. If one does *Ānāpānasati* correctly, it can be easily turned into *Satipaṭṭhāna Bhāvanā*.

- Section 4 on “Dhammānupassanā” describes how the cultivation of the four types of *Satipaṭṭhāna* leads to the removal of the five hindrances and fulfillment of the seven *Bojjhaṅga* to their completion. See, “[WebLink: suttacentral: Satipaṭṭhāna Sutta \(MN 10\)](#).” That confirms the statements in the *Ānāpānasati Sutta* mentioned above.

3. First, let us figure out exactly what the Buddha meant by “āna” and “āpāna” in “āna+āpāna+sati” which rhymes as *ānāpānasati*; of course “sati” is mindfulness.

- “Āna” is taking in; In Sinhala, “*ānayānaya*” is “import”. “*āpāna*” is discarding; In Sinhala, “*apānayānaya*” is “export”. Thus “āna”+“āpāna” or *ānāpāna* is “taking in/discarding” or import/export.
- “Assa” is the same as “āna”, and “passa” is the same as “āpāna”. In Sri Lanka, parents tell their child to clean his/her room by saying, “*kāmaraya (room) assa passa (or aspas) karāganna*” (කමරය අස්සා කරගන්න)
- When cleaning the room, the child needs to get rid of the clutter (*passa*) but also can take in (*assa*) something like a flower vase to make the room look more pleasant, or to take in a chair that can be useful.

4. During the time of the Buddha itself, auxiliary *suttā* as well as commentaries (“*Atthakatha*”) were written to explain the keywords/phrases in the main *suttā* that were abbreviated for easy transmission; see, “[Preservation of Dhamma](#).”

There are two crucial *suttā*, “[WebLink: suttacentral: Assāsappatta Sutta \(SN 38.5\)](#)” and the “[WebLink: suttacentral: Paramassāsappatta Sutta \(SN 38.6\)](#)” that describe how one should “take in” *kusala* thoughts and “discard” *akusala* thoughts; that is “āna” + “āpāna” (*ānāpāna*) or “*assa/passa*”, for cleaning up (the

mind). The English translation there is hopeless, but one can get the idea by looking at the Pāli version. You don't need to be an expert on Pāli to see that.

- In the *Mahasaccaka Sutta*, “*assa/passa*” was also used to indicate “in and out breathing” when the Buddha was describing to Saccaka how he engaged in the “breath meditation” per instructions by Ājāra Kālāma and Uddaka Rāmaputta while he was searching for the truth as Bodhisatta.
- But the following verses of that *sutta* describe how he gave up on that technique and moved onto the correct path.
- So, we must ensure a given phrase is used in the proper context, depending on the situation.
- For example, there are several conventional and deeper meanings to the keywords “*atta*” and “*anatta*,” and one needs to be able to figure out which meaning to use for a given case; see, “[Attā Hi Attano Nātho](#),” “[Anatta – the Opposite of Which Atta?](#),” and links in those posts.

5. When one knows what *kusala/akusala kamma* are, the first thing to do is to prevent from doing *akusala kamma* and to make an effort to do *kusala kamma* by engaging in meritorious actions (*puñña kriya*); see, “[Ten Immoral Actions \(Dasa Akusala\)](#),” and “[Punna Kamma – Dāna, Sīla, Bhāvanā](#).”

- Thus when one leads a moral life, one automatically engages in the primary form of *Ānāpānasati*.
- AND, one cannot do a proper formal *Ānāpānasati* meditation and get to even *samādhi*, let alone a *jhāna* unless one leads a moral life. The five hindrances are too strong to be suppressed; see, “[Key to Calming the Mind – Five Hindrances](#).”

6. **Formal *Ānāpānasati Bhāvanā*** can be done in a formal sitting or walking meditation session while engaging in the basic version (taking in what is good/discarding what is evil) all the time.

- There is no need to do *Samatha Bhāvanā* separately. If one does a formal *Ānāpānasati* session with the eyes closed in a quiet place, one will automatically get into *samādhi*. **Let good thoughts grow, and discard evil thoughts. Very simple.**
- Another thing to do in a formal meditation session is to **contemplate a particular dhamma concept like *anicca*, *dukkha*, or *anatta*. That means focusing on “āna”.**
- When one gets to *samādhi*, the mind goes on “auto-pilot”; you will feel that your mind is taking charge and you need to exert less effort to keep the focus.

7. When one does the basic version while engaged in other activities, one is only mindful of what one is engaged in, i.e., the task at hand. That task presumably does not involve any of the BIG EIGHT we discussed previously; see “[The Basics in Meditation](#).” It could be a technical task or a daily chore like washing dishes or driving. **Be mindful of just the task (washing, driving, etc).** Here one will NOT get into *samādhi*, so there is no danger of injuring oneself; Many people get into accidents while driving because they are not being mindful of driving.

- However, if one does not have a specific task (say, when riding a bus or waiting at the doctor's office), one could be engaged in *Ānāpānasati Bhāvanā*. When our minds are not focused on something (like in the cases mentioned above,) all sorts of ideas bubble up. As we discussed in “[The Basics in Meditation](#).” These are due to deeply-ingrained habits or *āsavā* that we have acquired not only in this life but also from previous lives.

8. The more we keep reviving or re-living this habit (i.e., doing *āna/apāna* or *assa/passa*), we strengthen that good habit (*gati*).

- We have come all this way in the cycle of rebirths that are mostly filled with suffering because of our bad habits (*gati*) that have been percolated into a very dense state of deep-seated cravings (*āsavā*). It may take some time to develop this “*āna/pāna*” but you will see results in a few weeks to a few months.

9. In the *ānāpānapabba* of the *Satipaṭṭhāna sutta*, it says, “..so *sato vā assa sati*, *sato vā passa sati*. *Dīghaṃ vā assasanto dīghaṃ assasāmī ti pajānāti*, *dīghaṃ vā passasanto dīghaṃ passasāmī ti*

pajānāti,” Here it DOES NOT mean “take long breaths in, expel long breaths out”; instead, it means, “get rid of **long-established (deeply-rooted)** bad habits, and cultivate the **long-established** good habits”.

- Similarly, the next sentence (“*..rassam vā assasanto...*”) is not about short breaths, but about those good habits that you started to work on recently, and those bad habits that started to creep into your mind recently (if there are any).
- One cannot purify one’s mind by breathing in/out, even though it can get one’s mind to calm down (*Samatha*). The correct way of doing it is doing both *Samatha* and *Vipassanā* together.

10. When we think a bit more about this, we realize that what needs to be discarded are *micchā diṭṭhi* (wrong views), *micchā saṅkappa* (wrong thoughts or ideas), *micchā vācā* (incorrect, harmful speech), *micchā kammanta* (incorrect/harmful actions), *micchā ājīva* (incorrect/harmful way of living), *micchā vāyāma* (tendency to strive on immoral activities), *micchā sati* (tendency to focus on immoral activities); when one does all that *micchā samādhi* (tendency to get absorbed in immoral ideas/actions) is the result.

- In the same way, what we need to “take in” are *sammā diṭṭhi*, *sammā saṅkappa*, *sammā vācā*, *sammā kammanta*, *sammā ājīva*, *sammā vāyāma*, *sammā sati*, and when one keeps doing that one automatically gets to *sammā samādhi*.
- Put in another way, *Ānāpānasati* is nothing but “taking in” the Noble Eightfold Path and “discarding” the opposite.

11. The longer one “takes in” or “lives” the Noble Eightfold Path and “rejects” the opposite, the easier it becomes to get to *samādhi* in a formal meditation session. As *samādhi* grows little by little, one day, one will automatically get into the first *Ariya jhāna*. However, one more thing is needed before getting to the *Ariya jhānā*, an understanding of *anicca*, *dukkha*, and *anatta*. See “[Is Ānāpānasati Breath Meditation?](#)”

- Keep practicing “*ānāpāna*” as much as possible throughout the day. With time, you will feel the “cooling down” or “*nivāna*” or “a taste of *Nibbāna*.”
- Buddha Dhamma is NOT about following rituals. It is all about cleansing one’s mind, which takes effort and concentration. Initially, it could be challenging, but as one gains *samādhi* bit by bit, one gets motivated. In a few months, one can look back at one’s life and see that it has changed for the better.
- Even though one can start with discarding immoral deeds and cultivating or taking in morals, one needs to know the real meanings of “*saṇ*,” *anicca*, and *anatta* to do the *Ānāpānasati Bhāvanā* in a deeper sense: (i) One needs to comprehend which “*saṇ*” or defilements to be discarded; see, “[Saṇ](#).” (ii) One needs to know the deeper meanings of *Tilakkhaṇa*; see, “[Anicca, Dukkha, Anatta](#).”

Santi, bhikkhave, bhikkhū imasmiṃ bhikkhusaṅghe ānāpānassatibhāvanānuyogamanuyuttā viharanti. Ānāpānassati, bhikkhave, bhāvitā bahulikatā mahapphalā hoti mahānisaṃsā. Ānāpānassati, bhikkhave, bhāvitā bahulikatā cattāro satipaṭṭhāne paripūreti. Cattāro satipaṭṭhānā bhāvitā bahulikatā satta bojjhaṅge paripūrenti. Satta bojjhaṅgā bhāvitā bahulikatā vijjāvimuttiṃ paripūrenti.

Kathaṃ bhāvitā ca, bhikkhave, ānāpānassati kathaṃ bahulikatā mahapphalā hoti mahānisaṃsā? Idha, bhikkhave, bhikkhu araṇṇagato vā rukkhamaṇḍalagato vā suññāgāragato vā nisīdati pallaṅkaṃ ābhujitvā ujuraṃ kāyaṃ paṇidhāya parimukhaṃ satiraṃ upaṭṭhapetvā. So satova assasati satova passasati.

Dīgham vā assasanto 'dīgham assasāmi'ti pajānāti, dīgham vā passasanto 'dīgham passasāmi'ti pajānāti; rassam vā assasanto 'rassam assasāmi'ti pajānāti, rassam vā passasanto 'rassam passasāmi'ti pajānāti; 'sabbakāyapaṭisaṁvedī assasissāmi'ti sikkhati, 'sabbakāyapaṭisaṁvedī passasissāmi'ti sikkhati; 'passambhayaṁ kāyasaṅkhāraṁ assasissāmi'ti sikkhati, 'passambhayaṁ kāyasaṅkhāraṁ passasissāmi'ti sikkhati. (1)

'Pīṭapaṭisaṁvedī assasissāmi'ti sikkhati, 'pīṭapaṭisaṁvedī passasissāmi'ti sikkhati; 'sukhapaṭisaṁvedī assasissāmi'ti sikkhati, 'sukhapaṭisaṁvedī passasissāmi'ti sikkhati; 'cittasaṅkhārapaṭisaṁvedī assasissāmi'ti sikkhati, 'cittasaṅkhārapaṭisaṁvedī passasissāmi'ti sikkhati; 'passambhayaṁ cittasaṅkhāraṁ assasissāmi'ti sikkhati, 'passambhayaṁ cittasaṅkhāraṁ passasissāmi'ti sikkhati. (2)

'Cittapaṭisaṁvedī assasissāmi'ti sikkhati, 'cittapaṭisaṁvedī passasissāmi'ti sikkhati; 'abhippamodayaṁ cittaṁ assasissāmi'ti sikkhati, 'abhippamodayaṁ cittaṁ passasissāmi'ti sikkhati; 'samādahāṁ cittaṁ assasissāmi'ti sikkhati, 'samādahāṁ cittaṁ passasissāmi'ti sikkhati; 'vimocayaṁ cittaṁ assasissāmi'ti sikkhati, 'vimocayaṁ cittaṁ passasissāmi'ti sikkhati. (3)

'Aniccānupassī assasissāmi'ti sikkhati, 'aniccānupassī passasissāmi'ti sikkhati; 'virāgānupassī assasissāmi'ti sikkhati, 'virāgānupassī passasissāmi'ti sikkhati; 'nirodhānupassī assasissāmi'ti sikkhati, 'nirodhānupassī passasissāmi'ti sikkhati; 'paṭinissaggānupassī assasissāmi'ti sikkhati, 'paṭinissaggānupassī passasissāmi'ti sikkhati.

Evam bhāvitā kho, bhikkhave, ānāpānassati evaṁ bahulīkatā mahapphalā hoti mahānisaṁsā. (4)

Kathaṁ bhāvitā ca, bhikkhave, ānāpānassati kathaṁ bahulīkatā cattāro satipaṭṭhāne paripūreti? Yasmiṁ samaye, bhikkhave, bhikkhu dīgham vā assasanto 'dīgham assasāmi'ti pajānāti, dīgham vā passasanto 'dīgham passasāmi'ti pajānāti; rassam vā assasanto 'rassam assasāmi'ti pajānāti, rassam vā passasanto 'rassam passasāmi'ti pajānāti; 'sabbakāyapaṭisaṁvedī assasissāmi'ti sikkhati, 'sabbakāyapaṭisaṁvedī passasissāmi'ti sikkhati; 'passambhayaṁ kāyasaṅkhāraṁ assasissāmi'ti sikkhati, 'passambhayaṁ kāyasaṅkhāraṁ passasissāmi'ti sikkhati; kāye kāyānupassī, bhikkhave, tasmīṁ samaye bhikkhu viharati ātāpī sampajāno satimā vineyya loke abhijjhādomanassaṁ. Kāyesu kāyāññatarāhaṁ, bhikkhave, evaṁ vadāmi yadidaṁ—assāsapassāsā. Tasmātiha, bhikkhave, kāye kāyānupassī tasmīṁ samaye bhikkhu viharati ātāpī sampajāno satimā vineyya loke abhijjhādomanassaṁ. (1)

Yasmiṁ samaye, bhikkhave, bhikkhu 'pīṭapaṭisaṁvedī assasissāmi'ti sikkhati, 'pīṭapaṭisaṁvedī passasissāmi'ti sikkhati; 'sukhapaṭisaṁvedī assasissāmi'ti sikkhati, 'sukhapaṭisaṁvedī passasissāmi'ti sikkhati; 'cittasaṅkhārapaṭisaṁvedī assasissāmi'ti sikkhati, 'cittasaṅkhārapaṭisaṁvedī passasissāmi'ti sikkhati; 'passambhayaṁ cittasaṅkhāraṁ assasissāmi'ti sikkhati, 'passambhayaṁ cittasaṅkhāraṁ passasissāmi'ti sikkhati; vedanāsu vedanānupassī, bhikkhave, tasmīṁ samaye bhikkhu viharati ātāpī sampajāno satimā vineyya loke abhijjhādomanassaṁ. Vedanāsu vedanāññatarāhaṁ, bhikkhave, evaṁ vadāmi yadidaṁ—assāsapassāsānaṁ sādhuṁ manasikāraṁ. Tasmātiha, bhikkhave, vedanāsu vedanānupassī tasmīṁ samaye bhikkhu viharati ātāpī sampajāno satimā vineyya loke abhijjhādomanassaṁ. (2)

Yasmiṁ samaye, bhikkhave, bhikkhu 'cittapaṭisaṁvedī assasissāmi'ti sikkhati, 'cittapaṭisaṁvedī passasissāmi'ti sikkhati; 'abhippamodayaṁ cittaṁ assasissāmi'ti sikkhati, 'abhippamodayaṁ cittaṁ passasissāmi'ti sikkhati; 'samādahāṁ cittaṁ assasissāmi'ti sikkhati, 'samādahāṁ cittaṁ passasissāmi'ti sikkhati; 'vimocayaṁ cittaṁ assasissāmi'ti sikkhati, 'vimocayaṁ cittaṁ passasissāmi'ti sikkhati; citte cittānupassī, bhikkhave, tasmīṁ samaye bhikkhu viharati ātāpī sampajāno satimā vineyya loke abhijjhādomanassaṁ. Nāhaṁ, bhikkhave, muṭṭhassatissa asampajānassa ānāpānassatiṁ vadāmi. Tasmātiha, bhikkhave, citte cittānupassī tasmīṁ samaye bhikkhu viharati ātāpī sampajāno satimā vineyya loke abhijjhādomanassaṁ. (3)

Yasmiṁ samaye, bhikkhave, bhikkhu 'aniccānupassī assasissāmi'ti sikkhati, 'aniccānupassī passasissāmi'ti sikkhati; 'virāgānupassī assasissāmi'ti sikkhati, 'virāgānupassī passasissāmi'ti sikkhati; 'nirodhānupassī assasissāmi'ti sikkhati, 'nirodhānupassī passasissāmi'ti sikkhati; 'paṭinissaggānupassī assasissāmi'ti sikkhati, 'paṭinissaggānupassī passasissāmi'ti sikkhati; dhammesu dhammānupassī, bhikkhave, tasmīṁ samaye

bhikkhu viharati ātāpī sampajāno satimā vineyya loke abhijjhādomanassari. So yaṃ taṃ abhijjhādomanassānaṃ pahānaṃ taṃ paññāya disvā sādhucaṃ ajjhupekkhitā hoti. Tasmātiha, bhikkhave, dhammesu dhammānupassī tasmīṃ samaye bhikkhu viharati ātāpī sampajāno satimā vineyya loke abhijjhādomanassari. (4)

Evam bhāvitā kho, bhikkhave, ānāpānassati evaṃ bahulikātā cattāro satipaṭṭhāne paripūreti.

Kathaṃ bhāvitā ca, bhikkhave, cattāro satipaṭṭhānā kathaṃ bahulikātā satta bojjhaṅge paripūrenti? Yasmiṃ samaye, bhikkhave, bhikkhu kāye kāyānupassī viharati ātāpī sampajāno satimā vineyya loke abhijjhādomanassari, upaṭṭhitāssa tasmīṃ samaye sati hoti asamuṭṭhā. Yasmiṃ samaye, bhikkhave, bhikkhuno upaṭṭhitā sati hoti asamuṭṭhā, satisambojjhaṅgo tasmīṃ samaye bhikkhuno āraddho hoti. Satisambojjhaṅgaṃ tasmīṃ samaye bhikkhu bhāveti, satisambojjhaṅgo tasmīṃ samaye bhikkhuno bhāvanāpāripūriṃ gacchati. (1)

So tathāsato viharanto taṃ dhammaṃ paññāya pavacinati pavicayati parivīmaṃsaṃ āpajjati. Yasmiṃ samaye, bhikkhave, bhikkhu tathāsato viharanto taṃ dhammaṃ paññāya pavacinati pavicayati parivīmaṃsaṃ āpajjati, dhammavicayasambojjhaṅgo tasmīṃ samaye bhikkhuno āraddho hoti, dhammavicayasambojjhaṅgaṃ tasmīṃ samaye bhikkhu bhāveti, dhammavicayasambojjhaṅgo tasmīṃ samaye bhikkhuno bhāvanāpāripūriṃ gacchati. (2)

Tassa taṃ dhammaṃ paññāya pavcinato pavicayato parivīmaṃsaṃ āpajjato āraddhaṃ hoti vīriyaṃ asallīnaṃ. Yasmiṃ samaye, bhikkhave, bhikkhuno taṃ dhammaṃ paññāya pavcinato pavicayato parivīmaṃsaṃ āpajjato āraddhaṃ hoti vīriyaṃ asallīnaṃ, vīriyasambojjhaṅgo tasmīṃ samaye bhikkhuno āraddho hoti, vīriyasambojjhaṅgaṃ tasmīṃ samaye bhikkhu bhāveti, vīriyasambojjhaṅgo tasmīṃ samaye bhikkhuno bhāvanāpāripūriṃ gacchati. (3)

Āraddhavīriyassa uppajjati pīti nirāmisā. Yasmiṃ samaye, bhikkhave, bhikkhuno āraddhavīriyassa uppajjati pīti nirāmisā, pītisambojjhaṅgo tasmīṃ samaye bhikkhuno āraddho hoti, pītisambojjhaṅgaṃ tasmīṃ samaye bhikkhu bhāveti, pītisambojjhaṅgo tasmīṃ samaye bhikkhuno bhāvanāpāripūriṃ gacchati. (4)

Pītiṃanassa kāyopi passambhati, cittampi passambhati. Yasmiṃ samaye, bhikkhave, bhikkhuno pītiṃanassa kāyopi passambhati, cittampi passambhati, passaddhisambojjhaṅgo tasmīṃ samaye bhikkhuno āraddho hoti, passaddhisambojjhaṅgaṃ tasmīṃ samaye bhikkhu bhāveti, passaddhisambojjhaṅgo tasmīṃ samaye bhikkhuno bhāvanāpāripūriṃ gacchati. (5)

Passaddhakāyassa sukhino cittaṃ samādhīyati. Yasmiṃ samaye, bhikkhave, bhikkhuno passaddhakāyassa sukhino cittaṃ samādhīyati, samādhisambojjhaṅgo tasmīṃ samaye bhikkhuno āraddho hoti, samādhisambojjhaṅgaṃ tasmīṃ samaye bhikkhu bhāveti, samādhisambojjhaṅgo tasmīṃ samaye bhikkhuno bhāvanāpāripūriṃ gacchati. (6)

So tathāsamāhitaṃ cittaṃ sādhucaṃ ajjhupekkhitā hoti. Yasmiṃ samaye, bhikkhave, bhikkhu tathāsamāhitaṃ cittaṃ sādhucaṃ ajjhupekkhitā hoti, upekkhāsambojjhaṅgo tasmīṃ samaye bhikkhuno āraddho hoti, upekkhāsambojjhaṅgaṃ tasmīṃ samaye bhikkhu bhāveti, upekkhāsambojjhaṅgo tasmīṃ samaye bhikkhuno bhāvanāpāripūriṃ gacchati. (7)

Yasmiṃ samaye, bhikkhave, bhikkhu vedanāsu ... pe ... citte ... dhammesu dhammānupassī viharati ātāpī sampajāno satimā vineyya loke abhijjhādomanassari, upaṭṭhitāssa tasmīṃ samaye sati hoti asamuṭṭhā. Yasmiṃ samaye, bhikkhave, bhikkhuno upaṭṭhitā sati hoti asamuṭṭhā, satisambojjhaṅgo tasmīṃ samaye bhikkhuno āraddho hoti, satisambojjhaṅgaṃ tasmīṃ samaye bhikkhu bhāveti, satisambojjhaṅgo tasmīṃ samaye bhikkhuno bhāvanāpāripūriṃ gacchati. (1)

So tathāsato viharanto taṃ dhammaṃ paññāya pavacinati pavicayati parivīmaṃsaṃ āpajjati. Yasmiṃ samaye, bhikkhave, bhikkhu tathāsato viharanto taṃ dhammaṃ paññāya pavacinati pavicayati parivīmaṃsaṃ āpajjati, dhammavicayasambojjhaṅgo tasmīṃ samaye bhikkhuno āraddho hoti, dhammavicayasambojjhaṅgaṃ tasmīṃ samaye bhikkhu bhāveti, dhammavicayasambojjhaṅgo tasmīṃ samaye bhikkhuno bhāvanāpāripūriṃ gacchati. (2)

Tassa taṃ dhammaṃ paññāya pavicinato pavicayato parivīmaṃsaṃ āpajjato āraddhaṃ hoti vīriyaṃ asallīnaṃ. Yasmiṃ samaye, bhikkhave, bhikkhuno taṃ dhammaṃ paññāya pavicinato pavicayato parivīmaṃsaṃ āpajjato āraddhaṃ hoti vīriyaṃ asallīnaṃ, vīriyasambojjhaṅgo tasmiṃ samaye bhikkhuno āraddho hoti, vīriyasambojjhaṅgaṃ tasmiṃ samaye bhikkhu bhāveti, vīriyasambojjhaṅgo tasmiṃ samaye bhikkhuno bhāvanāpāripūriṃ gacchati. (3)

Āraddhavīriyassa uppajjati pīti nirāmisā. Yasmiṃ samaye, bhikkhave, bhikkhuno āraddhavīriyassa uppajjati pīti nirāmisā, pītisambojjhaṅgo tasmiṃ samaye bhikkhuno āraddho hoti, pītisambojjhaṅgaṃ tasmiṃ samaye bhikkhu bhāveti, pītisambojjhaṅgo tasmiṃ samaye bhikkhuno bhāvanāpāripūriṃ gacchati. (4)

Pīṭimaṇassa kāyopi passambhati, cittampi passambhati. Yasmiṃ samaye, bhikkhave, bhikkhuno pīṭimaṇassa kāyopi passambhati, cittampi passambhati, passaddhisambojjhaṅgo tasmiṃ samaye bhikkhuno āraddho hoti, passaddhisambojjhaṅgaṃ tasmiṃ samaye bhikkhu bhāveti, passaddhisambojjhaṅgo tasmiṃ samaye bhikkhuno bhāvanāpāripūriṃ gacchati. (5)

Passaddhakāyassa sukhino cittaṃ samādhīyati. Yasmiṃ samaye, bhikkhave, bhikkhuno passaddhakāyassa sukhino cittaṃ samādhīyati, samādhisambojjhaṅgo tasmiṃ samaye bhikkhuno āraddho hoti, samādhisambojjhaṅgaṃ tasmiṃ samaye bhikkhu bhāveti, samādhisambojjhaṅgo tasmiṃ samaye bhikkhuno bhāvanāpāripūriṃ gacchati. (6)

So tathāsamāhitaṃ cittaṃ sādhuṃ ajjhupekkhitā hoti. Yasmiṃ samaye, bhikkhave, bhikkhu tathāsamāhitaṃ cittaṃ sādhuṃ ajjhupekkhitā hoti, upekkhāsambojjhaṅgo tasmiṃ samaye bhikkhuno āraddho hoti, upekkhāsambojjhaṅgaṃ tasmiṃ samaye bhikkhu bhāveti, upekkhāsambojjhaṅgo tasmiṃ samaye bhikkhuno bhāvanāpāripūriṃ gacchati. Evaṃ bhāvitā kho, bhikkhave, cattāro satipaṭṭhānā evaṃ bahulīkatā satta sambojjhaṅge paripūrenti. (7)

Kathaṃ bhāvitā ca, bhikkhave, satta bojjhaṅgā kathaṃ bahulīkatā vijjāvimuttiṃ paripūrenti? Idha, bhikkhave, bhikkhu satisambojjhaṅgaṃ bhāveti vivekanissitaṃ virāganissitaṃ nirodhanissitaṃ vossaggapariṇāmaṃ. Dhammavicayasambojjhaṅgaṃ bhāveti ... pe ... vīriyasambojjhaṅgaṃ bhāveti ... pītisambojjhaṅgaṃ bhāveti ... passaddhisambojjhaṅgaṃ bhāveti ... samādhisambojjhaṅgaṃ bhāveti ... upekkhāsambojjhaṅgaṃ bhāveti vivekanissitaṃ virāganissitaṃ nirodhanissitaṃ vossaggapariṇāmaṃ. Evaṃ bhāvitā kho, bhikkhave, satta bojjhaṅgā evaṃ bahulīkatā vijjāvimuttiṃ paripūrentī'ti.

Idamavoca bhagavā. Attamaṇā te bhikkhū bhagavato bhāsitaṃ abhinandunti.

Ānāpānassatisuttaṃ niṭṭhitaṃ aṭṭhamāraṃ.

12.8 Is Ānāpānasati Breath Meditation?

June 2, 2017; revised September 2, 2017; April 25, 2020; August 20, 2022

Introduction

1. If you Google “Ānāpānasati”, almost all websites that come up identify it as “Buddhist breath meditation” or “mindfulness of breathing”. But *Tipiṭaka suttā* lead to the conclusion that breath meditation is not Buddhist *Ānāpānasati Bhāvanā*.

- Breath meditation was practiced by *yogis* even at the time of the Buddha. **So, breath meditation predates Buddha’s *Ānāpāna Bhāvanā*.** Buddha rejected it because it does not lead to *Nibbāna* or PERMANENT relief from suffering.
- There are many *suttā* in the *Tipiṭaka* that clearly state that *Nibbāna* can be attained with the *Ānāpāna Bhāvanā*. It automatically fulfills *Satipaṭṭhāna*, *Satta Bojjhaṅga*, and all 37 Factors of Enlightenment. **Therefore, *Ānāpānasati* is infinitely deeper than just focusing on one’s breath.**
- I will provide evidence for those two statements below. First, let us see what can be accomplished with Buddhist *Ānāpānasati bhāvanā*.

Ānāpānassati by Itself Is Sufficient to Attain *Nibbāna*

2. According to the [WebLink: suttacentral: *Ānāpānassati Sutta* \(MN 118\)](#): “..*Ānāpānassati, bhikkhave, bhāvitā bahulīkatā cattāro satipaṭṭhāne paripūreti. Cattāro satipaṭṭhānā bhāvitā bahulīkatā satta bojjhaṅge paripūrenti. Satta bojjhaṅgā bhāvitā bahulīkatā vijjāvimuttiṃ paripūrenti.*”

- Translated, “..*Ānāpānassati*, when used (*bhāvitā*) and used frequently (*bahulīkatā*), completes (*paripūreti*) four types of *Satipaṭṭhāna*. *Cattāro satipaṭṭhāna*, when used and used frequently, completes *Satta Bojjhaṅga*. *Satta Bojjhaṅga* when used and used frequently, completes the full release (*Nibbāna* or *Arahanthood*)”.
- The same statement was made in the [WebLink: suttacentral: *Ānanda Sutta* \(SN 54.13\)](#). Most of the *suttā* in [WebLink: suttacentral: *Ānāpāna Saṃyutta* \(SN 54\)](#) have that phrase or the phrase: “..*Ānāpānassati, bhikkhave, bhāvitā bahulīkatā mahapphalā hoti mahānisaṃsā.*” Here, “*mahapphalā*” (“*mahā*” + “*phala*”) means the four Noble stages: *Sotāpanna*, *Sakadāgāmi*, *Anāgāmi*, *Arahant*.
- Therefore, it is clear that *ānāpānassati*, **by itself**, can lead to all the way to the *Arahanthood*. Thus, one does not need to do “**separate *vipassanā* (insight) meditation after getting to *Samatha* with *Ānāpānassati***” as some suggest.

Can *Nibbāna* be Attained With Breath Meditation?

3. The key question is: “Can breath-meditation, by itself, lead to *Arahanthood*?” That is the critical question that needs to be contemplated by those who equate *Ānāpānassati* to breathing meditation.

- *Nibbāna* is the removal of greed, hate, and ignorance: “*rāgakkhayo dosakkhayo mohakkhayo idaṃ vuccati nibbānanti.*” This verse is in many *suttā*, for example, in [WebLink: suttacentral: *Nibbāna pañhā Sutta* \(SN 38.1\)](#).
- If *Ānāpānassati* means breath meditation, how could keeping the mind on one’s breath **by itself** REMOVE *rāga*, *dosa*, and *moha* from one’s mind?

4. The conventional (and erroneous) teaching in many texts today is that one needs to get to *samādhi* with *Ānāpānassati* and then one needs to do *Vipassanā* or insight meditation to attain *magga phala*.

- However, from the above-discussed *suttā*, it is quite clear that *Ānāpānassati* by itself can lead to even *Arahanthood*!
- Of course, this erroneous interpretation — that breath meditation is Buddhist *Ānāpāna bhāvanā* — is not something that current practitioners came up with. It can be traced back to Buddhaghosa's *Visuddhimagga*, see "[Buddhaghosa's Visuddhimagga – A Focused Analysis](#)."

The *Ariṭṭha Sutta*

5. The incorrect version of *Ānāpānassati* was there even before the Buddha. In the [WebLink: suttacentral: Ariṭṭha Sutta \(SN 54.06\)](#), the Buddha, upon finding out that *Bhikkhu Ariṭṭha* was practicing the incorrect breath meditation as *Ānāpānassati*, told him the following. “..*Atthesā, ariṭṭha, ānāpānassati, nesā natthi'ti vadāmi. Api ca, ariṭṭha, yathā ānāpānassati vitthārena paripuṇṇā hoti taṃ suṇāhi, sādhukaṃ manasi karohi; bhāsissāmi'ti*.”

- Translated, “..**There is that *ānāpānassati*, Ariṭṭha**. I don't say that there isn't. But I will describe the real (*yathā*) *ānāpānassati*, listen and pay close attention. I will speak.”
- Furthermore, breath meditation was used by *yogis* at that time even to attain higher *jhāna*. However, those *anāriya jhāna* are attained by just SUPPRESSING defilements (*kilesa*) and will not lead to ANY *maggā phala*. Those who cultivate such *anāriya jhāna* will also have their next birth in *Brahma* realms, but after that they can be reborn even in the *apāyā*.

Assāsa/Passāsa And Āna/Āpāna

6. The main reason for the incorrect interpretation of *Ānāpānassati* as breath meditation is that in many *suttā* it is described as *assāsa/passāsa*, which conventionally means taking in/putting out of something, and particularly breathing in/breathing out.

- *Āna/āpāna* (which rhymes as *ānāpāna*) in general means taking in/putting out something. It can be breath or anything else.
- However, in the *suttā* on *Ānāpānassati*, *assāsa/passāsa* or *āna/āpāna* specifically mean taking in *kusala*/getting rid of *akusala*, or, equivalently, taking in the Noble Eightfold Path/discarding the *micchā* eightfold path.
- That should be clear to anyone who knows that *Nibbāna* is attained via getting rid of *dasa akusala*.

Evidence from the *Tipiṭaka*

7. The [WebLink: suttacentral: Assāsappatta Sutta \(SN38.5\)](#), it specifically says what needs to be “taken in” (*assāsa*):

- “*Katamo panāvuso maggo katamā paṭipadā etassa assāsassa sacchikiriyāyāti* (what needs to be “taken in”). *Ayameva kho, āvuso, ariyo aṭṭhaṅgiko maggo etassa assāsassa sacchikiriyāya* (it is the Noble Eightfold Path that needs to be “taken in”). *Seyyathīdam* (namely): *sammādiṭṭhi sammāsaṅkappo sammāvācā sammākammanto sammāājīvo sammāvāyāmo sammāsati sammāsamādhi*”. [*paṭipadā* : [f.] line of conduct; mode of progress. *sacchikiriyā* : [f.] realisation; experiencing.]
- [WebLink: suttacentral: Parama assāsa Sutta \(AN38.6\)](#) has the same statement, emphasizing the term “*parama*” or “superior.”
- Therefore, there should not be any confusion about what *assāsa* means.

8. A detailed description of how the cultivation of correct *Ānāpānassati* leads to *Ariya jhānā* as well as *maggā phala* is described in the [WebLink: suttacentral: Paḍipopama sutta \(SN 54.8\)](#), also called the *Dīpa Sutta*.

- “*So satova assāsati, satova passāsati*” means “He maintains his mind on *dhamma* that should be taken in (*kusala* or moral) and those that should be gotten rid of (*akusala* or immoral)”.
- “*paṭinissaggānupassī assasissāmī’ti sikkhati, ‘paṭinissaggānupassī passasissāmī’ti sikkhati*” means, “one cultivates discipline (*sikkhati*) by removing bonds that bind one to the rebirth process (*patinissaganupassī*) by taking in morals (*assasissāmī*) and getting rid of immoral (*passasissāmī*)”.

Meaning Embedded in *Ānāpāna*

9. As is the case with many Pāli words, the meaning of the word *Ānāpāna* is embedded in the word itself. The two words “*āna*” and “*āpāna*” combine to rhyme as *ānāpāna*. When “*sati*” is added for being mindful of that, it becomes *ānāpānassati*.

- “*Āna*” is taking in; In Sinhala, “*ānanaya*” is “import”. “*Āpāna*” is discarding; In Sinhala, “*apānanaya*” is “export”. Thus “*āna*” + “*āpāna*” or *ānāpāna* is “taking in/discarding” or import/export.
- “*Assa*” is the same as “*āna*”, and “*passa*” is the same as “*āpāna*”. In Sri Lanka, parents tell their child to clean his/her room by saying, “*kāmaraya* (room) *assa passa* (or *aspas*) *karāganna*” (“කමරය අස්ස පාස්ස කරගන්න”)
- When cleaning the room, the child needs to get rid of the clutter (*passa*) but also can take in (*assa*) something like a flower vase to make the room look more pleasant or to take in a chair that can be useful.
- So, one does not throw away everything or take in everything. One needs to be selective in taking in “good things” and throwing away “bad things.” That is where mindfulness comes in. That cannot be done with breath.

Breath Meditation Can be Harmful

10. Most people are reluctant to give up the wrong “breath meditation” practice simply because they are attached to a “state of well-being” that can be reached with it. But that relief is only temporary.

- It is even possible to attain *anāriya jhānā* with breath meditation. Yet, those *jhānā* are also temporary because the defilements are only SUPPRESSED. On the other hand, the *Ariya jhānā* attained via correct *Ānāpānasati Bhāvanā* are permanent. That is because even to attain the first Ariya jhāna, one MUST have first removed *kāma rāga*, not merely suppressed it. See “[Samādhi, Jhāna, Magga Phala – Introduction](#)” and “[Mundane versus Supramundane Jhāna](#).”
- It must also be mentioned that breath meditation can be used to calm down one’s mind. But one should not expect to make much progress towards *Nibbāna* using it. **If one gets “addicted” to it (as I have seen many people do), it could be a serious distraction to the Noble Path.** See “[Breath Meditation Is Addictive and Harmful in the Long Run](#).”

Ānāpānasati Bhāvanā Is Not Only a Formal Meditation

11. As I have emphasized in the “[Bhāvanā \(Meditation\)](#)” section and the subsection “[Mahā Satipatthāna Sutta](#),” one should not restrict either *Ānāpānasati* or *Satipatthāna bhāvanā* to formal sessions conducted sitting down at an isolated place.

- When the Buddha said, “*..Ānāpānassati, bhikkhave, bhāvitā bahulīkatā..*” in #2 above, he meant doing it as much as possible, anywhere possible. That means basically all the time! One just needs to be mindful of one’s actions, speech, and thoughts, stopping bad ones and cultivating good ones.
- This is the fundamental approach to practice, see the “[Living Dhamma](#)” section for a step-by-step process that can be used by even those who do not believe in the basic tenets of Buddha Dhamma, like rebirth or *kamma*.

- In particular, see, “[Ānāpānasati Eliminates Mental Stress Permanently](#)” and “[Ānāpāna and Satipatthāna – Fundamentals](#).”

Mistranslated Verses

12. Some people believe that *Ānāpānasati* or *Satipatthāna bhāvanā* should be done in formal sessions. That belief has origins in the verse, “*Idha, bhikkhave, bhikkhu aranna gato vā rukkhamūla gato vā sunnāgāra gato vā nisidati pallankaṃ ābhujitvā, ujum kāyaṃ paṇidhāya, parimukhaṃ satim upaṭṭhapetvā*”, that appears in multiple *suttā* explaining both *Ānāpānasati* and *Satipatthāna bhāvanā*.

- **In most English translations** this verse is written as, “There is the case where a monk, having gone to the wilderness, to the foot of a tree, or an empty building, sits down folding his legs crosswise, holding his body erect, and setting mindfulness to the fore.”
- But there is a deeper meaning to this verse. For example, in the word “*rukkhamūla*,” “*rukkha*” is “tree” and “*mūla*” is the “root”; even though the top of a tree sways back and forth with the wind, the tree trunk close to the root is very stable. Thus “*rukkhamūla gato vā*” means getting to a stable mindset. The conventional interpretation says, “having gone to the foot of a tree”.
- The **deeper meaning** of that complete verse is discussed in detail in “[Prerequisites for the Satipatthāna Bhāvanā](#).” Then the verse can be stated something like, “get into a calm and stable mindset that is devoid of greed, hate, and ignorance; keep a modest attitude without any sense of superiority; be forthright and honest, and keep the mind on the main object of cooling down the mind.” That can be done anywhere, a formal session is not needed, even though that could be helpful.
- One could also use conventional meaning for formal sessions. But the deeper meaning is much more important even in formal sessions.

Only Three Commentaries Can be Trusted

13. If anyone has any evidence to the contrary **from the *Tipiṭaka***, please comment on the “[Discussion Forum](#).” I will be happy to address any such issues.

- Only three commentaries ([Patisambhidāmagga](#), [Petakopadesa](#), and [Nettipakaraṇa \[Netti\]](#)) can be trusted. Those are in the *Tipiṭaka*. All other later commentaries have many inconsistencies and outright misinterpretations; see, for example, “[Buddhaghosa's Visuddhimagga – A Focused Analysis](#).”

12.9 8. The Basic Formal Ānāpānasati Meditation

Revised June 17, 2022

The top 10 posts in this section describe the fundamentals of Buddhist meditation. The rest of the posts in this section discuss meditation subjects. They clarify unresolved questions and help gain *samādhi*. The first 11 posts should be followed in that order, at least initially.

1. As we discussed in the previous posts of this series, it is important to live a moral life without engaging in the BIG EIGHT in order to achieve the full benefits of meditation. One could start even while making progress on the BIG EIGHT, and these formal sessions will help with those as well.

2. Now let us talk about how to do the correct *Ānāpānasati* meditation as taught by the Buddha; see, “[7. What is Ānāpāna?](#).”

- First pick out a quiet time slot that you can allocate without having to worry about other tasks. Initially, 10-15 minutes a day would be fine and you can extend the time to several hours when the benefits of proper meditation become clear and you start feeling the *nirāmisā sukha*.

3. Pick out a room away from external disturbances as much as possible. A room that can be darkened and the door can be closed would be ideal. Sit in a comfortable chair with an armrest, and this becomes important when one starts getting into *samādhi*, because the body could become less rigid and tends to slide off (however, some people tend to “freeze” just like in *samādhi* statues in the beginning).

- Anyway, do not make the chair too comfortable because you may fall asleep. With practice this sleepiness will automatically go away, when the mind starts liking the meditation sessions, i.e., when one of the *pañcanīvaraṇa*, *thina-middha*, is automatically removed. One comes out of *samādhi* energized.

4. Sit in the chair with the hands-on lap and eyes closed. What we will be trying to do is to ward off any thoughts of lust, cravings, etc. (*kāmacchanda*), any thoughts of hate (*vyāpāda*) in particular, and also any stray thoughts such as on kids or other pending tasks. We want to experience the “cooling down” due to the absence of *kāmacchanda* and *vyāpāda*, and also to focus the mind on a Dhamma concept. For those who are starting out, it may be good to do the following first:

- In order to keep the mind from running away, keep saying in your mind, “May all beings be happy and healthy”. Or, you could think about some act of generosity that you did recently. But all of a sudden you may drift to a thought of some type of sensual pleasure (involving any of the senses). Deliberately get rid of that thought and focus the mind back on the original task.
- If a hateful thought (towards someone or something) comes to mind, forcefully stop that thought as well. Here you should deliberately think good thoughts about that person. It is important to remember that even the vilest person has friends/family that love that person. Sincerely say, “May X be happy and healthy”. Even if you have good reasons to despise that person, it is important to realize that our task is to remove the hateful feelings that WE have. When we do that, in the future we will not generate strong hateful feelings even if someone does something that may appear to be against us.
- Thinking about the serenity of a Buddha statue helps in the case of both *kāmacchanda* and *vyāpāda* (and any stray thought).

5. Once one gets some practice sitting in one place with a focused mind for a little while, one should start meditating or contemplating on Dhamma concepts. **It may be a good idea to start with the introductory posts (posts above this post).**

- After that, one could read one of the posts from the “Key Dhamma Concepts” on the top menu just before the meditation session and then contemplate those concepts; for example, one could think about examples on “*anicca*”: We cannot maintain anything to our satisfaction over the long term. If you are old enough you have many examples on your own. If you are young, you can still maintain your body, hair, teeth, etc to your liking but when you get to middle age, you will see that it is an impossible task. The

easiest is to think about your parents/grand parents and see how their bodies have changed, how they are unable to keep their bodies the way they would like.

- For this purpose, I have also added new posts on how one can look at the world through Buddha Dhamma in this section. The posts that I have added after the “[Myths about Meditation](#)” are good ones to read before the session and then to meditate on those ideas; for example, “[A Simple Way to Enhance Merits \(Kusala\) and Avoid Demerits \(Akusala\)](#).” The other three posts below that one may be a bit advanced for some; if so, browse around and find ones that are suitable. Eventually, the key concepts in the “[Key Dhamma Concepts](#)” section need to be grasped. I encourage everyone to read the posts in the “[Moral Living and Fundamentals](#)” section first.
- You could actually read any post from any area of the site and use that as a “focal point” on the meditation session later on. Not all sections are relevant to everyone. **Different people can get to samādhi focusing on different topics. The only posts that is absolutely necessary are the ones on *anicca*, *dukkha*, and *anatta*. But if they are hard to grasp, one should probably start at the “Moral Living” section. It is a matter of getting used to new concepts. In meditation, one will automatically “drift to *samādhi*” when the concepts become clear; the mind becomes awake and clear.**

6. Inevitably, your mind will try to wander off during the session. **Stopping lustful and hateful thoughts is the main task of this formal meditation session. If any distracting thought comes to the mind, DO NOT let it “run wild”; this is what is called “being mindful”. Keep a sharp eye on such stray thoughts and put a stop soon as they surface.**

- The other three hindrances (*thina-middha*, *uddhacca-kukkucca*, and *vicikicchā*) will automatically come down. You will be surprised how refreshed you feel after a “good meditation session”.
- Initially, it may be hard, but if you are persistent you should be able to see the results within a week to a month depending on the situation with the BIG EIGHT. Those will also gradually diminish too.
- Once one gets the mind to calm down some, one could start focusing on the good/bad habits that one has, in addition to “taking in” Dhamma concepts.

7. In the *Anapanapabba* of the *Satipaṭṭhāna sutta*, it says, “*..so sato va assa sati, sato va passa sati. Digham va assasanto digham assasami ti pajanati, digham va passasanto digham passasami ti pajanati,*” Here it DOES NOT mean “take long breaths in, expel long breaths out”; rather it means, “get rid of old bad habits, and cultivate the old good habits.”

- Similarly, the very next sentence (“*..rassam va assasanto...*”) is not about short breaths, but about those good habits that you started to work on recently, and those bad habits that started to creep in to your mind recently (if there is any).
- This is why understanding how habits are formed and become āsavā is important; there are several posts on this subject.
- There is no way that one can purify one’s mind by breathing in/out, even though it can get one’s mind to calm down (*samatha*). The correct way of doing it does both *Samatha* and *Vipassana* together.
- In the above verse, ***sati* is a very important term; it is not mere concentration, but contemplation with an understanding of *anicca*, *dukkha*, and *anatta*** (actually any form of meditation cannot be done effectively without at least some understanding of *anicca*, *dukkha*, *anatta*).

8. The key to success is to do this as often as possible. You do not need to be in a quiet place either, even though it helps especially initially. As you make progress, try to do it while riding the subway or a bus (but not while driving!), while waiting at the doctor’s office, during a lunch break, etc.

9. When one starts on *Ariya Bhāvanā*, sometimes things may look worse before getting better. It is like trying to cool a hot iron by sprinkling water on it when all that smoke comes out and may appear to be

getting worse. But one needs to be persistent. One needs to keep in mind that uncountable beings have attained “cooling down” by having faith in the Buddha.

- Understanding key Dhamma concepts is key to any type of meditation. Whenever you have time, try to read on different topics. Things will start “falling into place” at some point if it hasn’t yet. From that point on, one will start feeling the joy of Dhamma and will be seeking to clarify things with enthusiasm. It is a good addition to have!

Next, “[Key to Ānāpānasati – How to Change Character and Habits \(Gati\)](#)”,

12.10 Possible Effects in Meditation – Kundalini Awakening

June 25, 2016; revised July 19, 2016; August 9, 2021

In the post, “[Can Buddhist Meditation be Dangerous?](#)” in the Section “[Myths or Realities](#),” I discussed some possible effects of meditation, both in conventional and in true Buddhist meditations. Here I will focus on Buddhist meditation and explain the physical and mental changes that one may experience. However, this does not mean everyone will experience these; these symptoms cannot be generalized, and some may not even feel them.

1. It is possible that one may encounter some soothing physical sensations first and then even some discomforts when one starts seriously cleansing one's mind. I did not want to discuss this topic until I had enough background material to explain the origins of such effects.

- Some people may feel such first experiences to be not bad at all and even get attached to them. I believe that what is known in Hinduism as “*kundalini* awakening” manifests this effect. Those are supposed to be encountered in *anāriya* meditation techniques, where one stops the cleansing process at this stage. It is the **goal** of most of those non-Buddhist meditators.
- In genuine Buddhist meditation also one may experience certain such effects. However, they will not be painful.
- **Before reading this post, it is advisable first to read the introductory post, “[Can Buddhist Meditation be Dangerous?](#),”** because certain body sensations encountered in the early stages of meditation are discussed in that post.

2. Fully understanding the current post requires some background material on the concept of *gandhabba*; Click to hear pronunciation:

[WebLink: Listen to “Gandhabba” pronunciation](#)

The inert physical body is made alive by the *gandhabba* (or “*manomaya kāya*”) that comes out of the physical body in the case of “out-of-body experiences”; see, “[Manomaya Kāya and Out-of-Body Experience \(OBE\)](#).”

- There are many posts at the site that explain various aspects of the *gandhabba*; see the sections “[Gandhabba \(Manomaya Kāya\)](#),” “[The Grand Unified Theory of Dhamma](#),” and “[Udayavaya Ñāna](#).”
- While it is not necessary to learn about the *gandhabba* to attain *Nibbāna*, if one needs to understand the mechanisms underlying these “meditation experiences,” it is the bridge between mind and the physical body. **In any case, it is good to know about these possible effects (more of which are discussed below), so that if one gets to experience them, one would not be perplexed.**

3. The *gandhabba* has an “energy body,” an invisible blueprint of the physical body. And that fine body is the one that controls the heavy physical body according to the commands from the mind, which is also located in the *gandhabba* (at the *hadaya vatthu*).

- **The best way to visualize this is to imagine the *gandhabba* is a fine mesh that overlaps the physical body. It can move any part of the physical body, and is able to move any part that it wishes to move. For example, when the *gandhabba* moves its fine arm, the physical arm moves with it.**
- This is how we control our physical bodies. Of course, there are more details with the brain acting out as an intermediary; see, “[Brain – Interface between Mind and Body](#).”
- For example, most of the energy to move the heavy body parts comes from the our food. Gandhabba sends the “

4. The nervous system of the physical body overlaps the fine nervous system of the *gandhabba* and tries to maintain that overlap all the time. If one sits down cross-legged, for example, the nervous system of the physical body may shift from that of the *gandhabba*. Then the physical nervous system will try to adjust for that shift, pulling the attached muscles with it.

- That is why it could become uncomfortable, especially for those not used to sitting cross-legged (when one gets used to it, the physical system will learn to adjust quickly).
- Therefore, this effect does not indicate progress in the meditation program. Significant effects are discussed below.

5. Our thoughts (i.e., the *cittaja kaya*) can influence the fine body (*utuja kaya*) of the *gandhabba*. In fact, the *utuja kāya* arises out of *suddhaṭṭhaka* produced by the *cittaja kaya* and the *kammaja kaya*.

- **Thus the fine body of the *gandhabba* can be affected by two methods: by the *kammaja kaya* (i.e. by *kamma vipāka*) AND by the *cittaja kaya* or according to how we think.**
- **The first effect** can bring about aches and pains in the physical body due to *kamma vipāka* (by shifting the *gandhabba*'s body to out-of-balance in a short time, so we can feel the shift). **These are mostly experienced as we get old (e.g., chronic back pains) and are, of course, not due to meditation.** Some of these may get better with meditation.

6. **In addition to the shifts caused by *kamma vipāka*, we can change the equilibrium position of the *gandhabba*'s fine nervous system with consistent thoughts over long periods of time.** For example, if we think hateful thoughts a lot, the nervous system of the *gandhabba* may twist in a certain way; if we think mostly greedy thoughts, it may shift differently.

- Thus, as we think defiled thoughts and act on them regularly, it leads to gradual twisting nerve bundles [meridians being repaired for easy access by the *gandhabba*] in the *gandhabba*, and physical muscles also get twisted accordingly. Since it is a gradual process compared to the first effect, we do not normally feel it (until we get old).
- However, when we start cleansing our minds the fine body of the *gandhabba* tries to come back to its equilibrium position. **During a good meditation session, this can happen fairly quickly, and that is when one starts feeling such nerve [meridian] (and muscle) movements.** We are basically trying to “undo” those twists in nerve bundles that occurred over years and years.
- This is why this effect is much less in young children. Their nerves have not yet being shifted too much.

7. **Thus, the second effect has its origins in our thoughts.** Normally such effects occur above the waist, along the spine, neck, and in the head. This is related to the fact that nerve bundles [meridians] propagate through the spine and also there are cranial nerves in the brain. Thus “*Kundalini* awakening” is an example of this category.

- This effect is experienced by different meditators somewhat differently. But the dominant feature is the “pressure waves” that arise above the waist and are normally located around the spine, neck, throat, and head. These have been attributed to energy centers or “*chakras*” in *Kundalini* awakening; see, [“WebLink: wiki: Kundalini.”](#)
- That is why they say that the *kundalini* energy is “uncoiled” (or “awakened”) during meditation. But this is nothing more than the out-of-balance nervous systems coming back to the equilibrium position. In *anāriya* meditations, there is not much further cleansing is possible. To proceed further, one needs to comprehend the *anicca* nature of this world.

8. In Buddhist or *Ariya* meditations, one should start contemplating the *anicca* nature when one starts any body sensations. **Body sensations indicate that the mind is beginning to affect the body and has made progressed in the cleansing process.** Of course, those Hindu yogis who got to this stage had prevented from immoral acts and suppressed such thoughts, and thus had gained a tranquility of mind at least temporarily.

- But if one does not permanently cleanse one's mind, with the comprehension of the true nature of this world (*anicca, dukkha, anatta*), such corrections are temporary. They can go right back to the twisted positions. Thus one may experience such effects to varying degrees.

9. When one starts comprehending the *anicca* nature, this “unwinding process” can accelerate (and the body sensations too). This is when one may even start feeling significant discomfort or even mild pain.

- If the body is really “out-of-alignment,” the realignment process can lead to different types of sensations; some may be mild, but some could be even a bit painful.

10. Many people experience sweating, which is definitely part of the “cleansing process.” Our defiled thoughts lead to the generation of “impurities” in various body sites. The pure *citta* generated in meditation can burn them, and the body will get rid of the waste via sweat. Thus sweating is also possible during a good meditation session (in the early stages of progress; of course, all these go away eventually).

- Another related symptom is becoming thirsty during a good session; the mouth can get dry. It is good to keep a glass of water close by if that is the case.
- By the way, one can move around even while in a *jhāna*. In fact, when one cultivates the *jhāna*, one can open eyes and not be bothered by it. I can confirm that. In fact, those who have *abhiññā* powers are said to be able to do regular work while using *abhiññā* powers.
- For example, a famous story in the *Tipiṭaka* describes how Ven. Chullapanthaka had created a thousand copies of himself with *abhiññā* powers and how they were all sweeping the temple premises.

11. Here is another experience that I have heard people described according to my teacher *Thero*’s recorded *desanās*:

- “Something propagated from the neck area to the top of the head and stayed there during the session. This happened during subsequent sessions too”. Such a “propagation” is probably more like a “pressure wave”. This is another “*kundalini* type” effect.
- When these “pressure waves” are strong, it may be a bit painful too. But be rest assured that those effects will gradually go away as one continues when the nervous system comes back to equilibrium. However, if such sensations persist outside the meditation session, it may be a good idea to go for a medical examination since it could be due to a medical condition.

12. There is actually a way to reduce these sensations to some extent. This was suggested by my teacher *Thero* in a *desanā* that I listened to. Even if one meditates with the eyes closed (as most people should do in the early stages), the eye balls inside eyelids are in constant motion; they move around a lot.

- One should try to focus the eyes on the nose area. This is done sort of by one’s mind, but the eyeballs keep steady, pointing towards nose. In my case, it stopped most of the sensations in the head. Eventually, of course, these sensations go away, once one attains “equilibrium.” Then one can proceed even with the eyes open but still focused towards the nose/mouth area.
- Now I do not have any of those “pressure waves” that experienced in the throat area and recently those in the head area also went away. Some of these effects had been there for the past year and a half.
- Getting to the first *Ariya jhāna* means one has reached the *Anāgāmi* stage, where one loses desire for all sense pleasures (i.e, transcend *kāma loka*). See #9 of “[Power of the Human Mind – Ariya Jhānā](#).”

13. Our thoughts or our “*cittaja kaya*” are the most important of the four types of “*kaya*” that we have. For a discussion of those four types of bodies, see, “[Āhāra \(Food\) in Udayavaya Nāna](#),” in the Section: [Udayavaya Nāna](#).

- As discussed there, our physical bodies (*karaja kaya*) that we value so much are there only for about 100 years, while our human *bhava* or human existence can last many hundreds of years. The other three types of bodies of *kaya* that we have are *kammaja kaya*, *cittaja kaya*, and *utuja kaya*. All three of these prevail through the whole human *bhava* (of course, they undergo constant change); they make a “big transition” when a new *bhava* is grasped at the *cuti-paṭisandhi* moment).

- And it is this *cittaja kaya* (or basically our thought stream) that is the most important. If we use the *cittaja kaya* wisely, we can make progress in our mundane lives as well as in pursuing *Nibbāna*. We will discuss this in detail in the last post on the [Udayavaya Ñāna](#) in an upcoming post.

14. The key point here is that if one starts feeling these body sensations, one has cleansed the mind to the point of being able to comprehend *anicca*, *dukkha*, *anatta* (or any other Dhamma concept) with more ease; see, “[Buddha Dhamma – In a Chart](#),” and the post discussed there.

- At this stage (i.e., when feeling thirst, sweating, body sensations, etc.), one is likely to be somewhere around “[9. Key to Ānāpānasati – How to Change Habits and Character \(Gati\)](#)” in the meditation section.
- Of course it is also possible that one could have already comprehended *anicca*, *dukkha*, *anatta* and has attained the *Sotāpanna* stage without any such symptoms. Each person needs to decide that for themselves; see, “[How Does One Know whether the Sotāpanna Stage is Reached?](#).” **The fundamental guide is whether one has removed those “*apāyagāmī gati*” via cleansing the mind.** The physical body may or may not give those clues that we discussed above.
- For attaining *magga phala*, *jhānā* are not necessary. Furthermore, *Ariya jhānā* cannot be attained without attaining at least the *Sotāpanna* stage first; see, “[11. Magga Phala and Ariya Jhānā via Cultivation of Saptha Bojjanga](#).”
- **Mental (and associated physical) phenomena are highly personal. Thus above discussed symptoms may or may not be experienced by a particular person.**

12.11 9. Key to Ānāpānasati – How to Change Habits and Character (Gati)

The top 10 posts in this section describe the fundamentals of Buddhist meditation. The rest of the posts in this section are on possible meditation subjects. They can clarify unresolved questions, and lead to *samādhi*. But one must contemplate on them.

Meditation is all about purifying one's mind. We all have individualized cravings and habits that we have acquired in our past lives that continue during this life unless we act to change or stop them. We need to cultivate good habits and stop bad ones. The only way to do this is to be mindful of our actions and stop bad actions as they start as thoughts in our minds. **Most bad thoughts arise due to bad habits; they just “pop up”.**

- [Introduction to Character or Personality \(Gati\)](#)
- [A Broad View of the “Person” Trying to be a “Better Person”](#)
- [How Character \(Gati\) Leads to Bhava and Jāti](#)
- [How Habits are Formed and Broken – A Scientific View](#)

12.11.1 Introduction to Character or Personality (Gati)

1. Here is a good place to see why the Buddha rejected both the concept of a “self” AND a “no-self” (or “soul” AND “no-soul”). We first need to realize that the task of purifying the mind is very personal; only you know about your mind and only you can purify it. The perception of a “no-self” is a bad starting point to do this cleansing.

- We can easily see that “a person” changes over time, both physically and mentally (see the next post). Thus it is easy to see that a concept of a “soul” or “self” does not hold water.
- However, each of us is DIFFERENT, and UNIQUE; no two are the same even at a fixed time. Even though each person changes, the change itself is unique to “that person” and CAN BE initiated by that person. What makes one person different from another is his/her character (*gati*).
- For those people who say, “there is no-self” or “there is no real me”, I ask: “Then is it OK if someone hits you with a stick or hurt you badly in some way?”. Obviously, that is not fine. Just by denying something that is as real as suffering itself, will not make the problem go away. Just being philosophical is not going to make the problem disappear.
- This is why the Buddha rejected both extremes of “self” and “no-self”.

2. Actually as one increasingly realizes the fruitlessness of struggling to seek sense pleasures, the feeling of “self” starts to decrease. An *Arahant* is the closest to a “self-less person”; but even an *Arahant* has some unique character qualities: nothing to do with greed, hate, and delusion, but more like kammically neutral habits.

- For example, there is this story about a very young *Arahant*. One day a man came to take this *bhikkhu* to his house for a “dāna”, which consists of a lunch followed by a gift (usually things that are needed for a *bhikkhu* like a robe, a towel, etc). On the way, they ran into some puddles on the ground and the young *bhikkhu* jumped over one. The man thought, “Oh, this *bhikkhu* is not even disciplined let alone having any *magga phala*; maybe I should not give him the gift”. They came across a few more puddles and the *bhikkhu* went around them. So, the man asked, “Why did you jump over only that one?”. The *bhikkhu* told him, “If I jumped over anymore puddles, I would probably lose my lunch too”. It turned out that the *bhikkhu* was an *Arahant* with *abhiññā* powers and read the man's mind! Also it is said that the *bhikkhu* was born a monkey for many lives in the recent past, and he still had that *sansāric* “monkey habit” of jumping over things.

3. Habits are formed via repeated use. The Buddha said, “*yā yan taṇhā pono bhavitha.....*” or “*bhava* or habits are formed by *taṇhā* for various things, activities. Remember that *Taṇhā* means “getting attached to something via greed, hate, of ignorance”; see, “[Tanhā – How we Attach via Greed, Hate, and Ignorance.](#)”

4. What we are concerned about is only getting rid of immoral habits and cultivating moral habits. This will make oneself a “better person” long before one even thinks about attaining Nibbāna. This can be done with simple process called “*āna-apāna*” or “taking in good habits” and “discarding bad habits”.

- The Buddha said, “*bhāve thabbanha bhavithan, pahee thabbanha paheenan*” or “keep doing what is good, get rid of those that are not good”. The meaning is a bit deeper than that because “*bhāve*” there refers to making “*bhava*”. The more one does something, it becomes one’s “*bhava*”. And the less one willfully stops doing, that “*bhava*” tends to go away. This is what the neurologists are re-discovering today; see, “[How Habits are Formed and Broken – A Scientific View.](#)”

5. The bad habits need to be stopped each time it surfaces, right there. The Buddha said, “*ette san uppajjamana uppajati, paheeyamana paheeyathi*” or “each time a “*saṇ*” (a bad habit) resurfaces, it needs to be recognized and stopped right then.”

- Therefore, one must do this not only in sitting meditation sessions, but as much as possible, whenever possible.
- This is what the Buddha also meant by “*asevitaya, bhavithaya, bahuleekathaya,*” or “associate, use, and do as much as possible whenever possible” everything that helps with *Ānāpānasati*. These are described in the post, “[Habits, Goals, and Character \(Gati\)](#)”.

6. I cannot emphasize enough the importance of understanding what is truly involved in *ānāpānasati*. The recent findings on the workings of the brain really helps clarify and highlight some key points that the Buddha emphasized. I think it will help anyone understand the process much better. But first we will take a brief look at how these character qualities are inherited.

Next, “[A Broad View of the “Person” Trying to be a “Better Person”](#)”,

12.11.2 A Broad View of the “Person” Trying to be a “Better Person”

Revised November 28, 2018

1. Let us see how and why we act with greed, hate, and ignorance. Stated simply, all we do during a day does not happen by chance.

- **Our actions are based on our “character” (more correctly *gati*) AND “our way of thinking about this world based on our views about the world”;** “*gati*” is pronounced as “*gati*”.
- For example, if one does not believe in a rebirth process, or the law of *kamma* (that each action has consequences), then it may be easier to seek enjoyment at the expense of other beings.

2. What our character or world view today is due to a complex combination of many things, but the main factors are: (i) *sansāric* habits (also called *gati* and *āsavas*), (ii) biological parents who provide parts of the physical body (this is also related to *kamma vipāka*), (iii) the environment that one grew up AND the current environment (i.e., physical environment and people one associates with).

- Even though the complexity of a “person” cannot be reduced to simple things, those are major ones. As the Buddha pointed out in the *Sabbasava sutta* (see, “[Habits, Goals, and Character \(Gati\)](#)”), the main things that CAN BE changed NOW are “physical environment and people one associates with” which is a part of (iii) above. If we are talking about a child, then (iii) applies in its entirety.
- Once these “external influences” are taken care of, next is to purify the mind by “taking in” good things and “discarding” bad things or “*ānāpāna*”; see, “[7. What is Ānāpāna?](#)”

3. When we are conceived in the mother's womb, a "blueprint" of the new life is in the form of a *manomaya kāya* (which is made of undetectably fine matter) descends to the womb and combines with the zygote formed by the combination of an egg from the mother and the sperm from the father.

- This *manomaya kāya* is the same as *gandhabba* or *paṭisandhi viññāṇa*.

4. The *manomaya kāya* comes with three *rūpa kalapas* called the *kaya dasaka* (blueprint for the physical body), *bhava dasaka* (whether male or female), and *vatthu dasaka* (mind element, which has the "gati" in it) that were determined by the *kamma vipāka* that led to the birth; we will discuss these later in the Abhidhamma section.

- Thus the physical body of the new life is now going to be affected by not only the *kaya dasaka*, but also the genetic material in the egg and the sperm (DNA of the parents). As the fetus grows, it will also be affected by the food intake by the mother as well as her mental state, home environment, etc. After the birth until death, the physical body (as well as the mind) will be affected by many other factors including the diet and the environment.
- This is discussed in detail at: "[Buddhist Explanations of Conception, Abortion, and Contraception](#)."

5. Thus there is no "unchanging self" either mentally or physically; everything is in constant flux. But one cannot say "there is no-self" either because the character qualities (*gati* and *āsava*) that comes in with the *manomaya kāya* will keep "evolving"; even though they change, there is a continuation of a particular lifestream.

- Each person or animal that born is unique with a complex set of mental and physical parameters that evolve moment-to-moment like a flowing river; see, "[What Reincarnates? Concept of a Lifestream](#)".
- We will discuss some of these factors in various sections, but the key point I wanted to get across is the fact that each person has a unique set of character qualities (*gati* and *āsava*) that have evolved over uncountable number of lives in the past. And those are the key to one's destiny. **One has the power to change those.**

6. What makes one person different from another is this set of "*gati* and *āsava*", which can be loosely translated as, "character qualities and deep-seated cravings". Some people are calm and quiet while others are rough and boisterous; some like music while other like to watch things or engage in physical activities; the possibilities are endless and there are innumerable combinations of them. That is why each person is different.

- Hidden in these apparently harmless "habits" and "cravings" are the defilements or the tendencies to engage in certain types of activities that are harmful to oneself or the others.
- The key is to focus on the glaring character flaws first: if one engaged in activities such as fishing or hunting, that means willfully taking the life of other beings for one's pleasure. Does that makes sense within the wider world view of any given being repeatedly born in any of the 31 realms? Within that broader view, we can see that any animal, how small or insignificant, has an attachment to its life; and we could have had that very life in the past.
- Take another example of a transaction between two people. The goal should be to make a decent profit for oneself making sure one covers the cost and make enough profit to "stay in business and provide for the family", but not to make the transaction too burdensome on the other party. As we discussed in the post, "[Kamma, Debt, and Meditation](#)", one could get into deep debt to other people and beings by exploiting them in many different ways.

7. The easiest way to deal with this is to look at each action mindfully and decide whether that act is "fair" to everyone involved. Of course one could check to see any of the ten defilements (*dasa akusala*) are committed by that action; see, "[Ten Immoral Actions \(Dasa Akusala\)](#)."

- As I keep saying, one needs to focus on the more extreme violations first. There is no point in worrying about inadvertently killing some insects while gardening if one is engaged in lying and deceit or killing

animals for pleasure. It is good to get an idea of the severity of different acts; see, “[How to Evaluate Weights of Different Kamma](#)”.

8. This is why it is important to learn Dhamma as much as possible, while engaging in meditation. The Path becomes clear as one learns the subtleties in key Dhamma concepts.

- I am amazed how much I learn each and every day; it is like a picture becoming clearer by the day. You start to see the even smallest detail, and instead of becoming distraught you get a sense of clarity and peacefulness by cleansing the mind. You realize that no one is perfect until the *Arahanthood* and the key is to make progress, no matter where you are. Each step in the right direction makes you feel better.

Next, “[How Habits are Formed and Broken – A Scientific View](#)”,

12.11.3 How Character (Gati) Leads to Bhava and Jāti

Revised August 9, 2021; February 15, 2023

Jāti (births) depend on *gati* (habits/character.) Therefore, it is critical to cultivating “good *gati*.”

1. A unique knowledge that the Buddha gained during the Enlightenment was the *āsavakkhaya ñāṇa*. This is the key to stopping the suffering FROM ARISING via getting rid of the deep-seated cravings (*āsava*) that we all have. *Āsavakkhaya ñāṇa* (“*āsava*” + “*khaya*,” where “*khaya*” is the opposite of “*saṃ*”; see, “[What is “Saṃ”?](#)”) is the knowledge on how to remove those cravings (*āsava*).

2. Throughout the site, I keep emphasizing the importance of understanding (not memorizing) the meanings of the key Pāli words like *gati*, *anusaya*, *āsava*, *bhava*, *jāti*, *saṃsāra*, and *dukkha*; they are intimately inter-connected in many ways including *Paṭicca Samuppāda*. The way to stop future suffering (*dukkha*) from arising and reaching Nibbāna is to break the perpetual cycle that leads to a new *jāti* (birth) at each death.

- Our problems do not go away at death (committing suicide is a bad idea); they merely get started in a new phase with a new body, which could be worse than what we have now; see, “[What Reincarnates? – Concept of a Lifestream](#).”
- The connections among *bhava* and *jāti* on one side and *āsava*, *anusaya*, and *gati* on the other side are intimate, and need to be understood well; see, “[Saṃsāric Habits, Character \(Gati\), and Cravings \(Āsava\)](#),” before reading the rest of this post.

3. This understanding is needed even if one is not seriously thinking about Nibbāna. In general, the real key to suffering is embedded in these intricate relationships.

- *Bhava* and *jāti* also happen during this very life; *jāti* could mean the birth of a new desire; see, “[Idappaccayatā Paṭicca Samuppāda](#)” and “[Bhava and Jāti – States of Existence and Births Therein](#).”
- It may be confusing for a new person to this site, but have patience and read the inter-connected posts. I have links everywhere to pertinent posts/material. Once you understand the underlying connections, it will clarify everything, like a fog being lifted.
- I have set up links to open them in new windows so that you can go back and forth between posts quickly and try to “fill-in-the-gaps.”

4. A perpetual cycle that is ever-present in the sansāric cycle of rebirths is described in the following verse:

“*uppado pavattam, pavatta nimittam*

nimitta paṭisandhi, paṭisandhi gati”

- “*Uppada*” means arising. When *āsava* (cravings) arise due to the triggering of *anusaya* (hidden temptations,) we need to stop that temptation and break the cycle at “*pavattam*” (which means keeping it or going with it).

- If we go along with the temptation (“*pavatta*”), then it becomes a *nimitta* (literally a “sign”). A *nimitta* is a characteristic that is associated with that particular act. For example, for an alcoholic, a picture of an alcohol bottle or a bar (or where one normally drinks), or even seeing a friend with whom one drinks often, can be a *nimitta*; when any of such a “symbol” comes to the mind, it reminds of the drinking act and gets one in the “mood.”

5. Most times, the *paṭisandhi* (linking the next rebirth) takes place via a *nimitta*; this is what is meant by “*nimitta paṭisandhi*” above. At the dying moment, what comes to the mind is likely to be something that one often does, which could become the link to the next life.

- A drug addict, if lucky to be born human again, will be attracted to a mother who is a drug addict.
- For a person with a lot of hate, what comes to the mind at the dying moment could be a picture of an arch enemy; then the kammic power shows him a gun or a knife and he will be likely to attack the person with that weapon (in a dream-like state); the next moment he will be in an *apāya* (hell), which is the “matching place.”

6. The worst thing is that the old habits continue and even strengthen in this new life; this is why “*paṭisandhi gati*” is meant above. Suppose a drug addict born to an addicted mother is adopted by another family and raised in a drug-free environment. Still, if that child becomes exposed to drugs later in life, he could be tempted to use drugs because of his *sansāric* habit.

- This is the danger in the rebirth process or *samsāra*; one keeps going down the slippery slope unless one changes one’s habits with effort. And reversing that trend can be done only in human life.
- Sentient beings in most realms do not act willfully but according to their *sansāric* habits. We can see only the animal realm. Animals do things mechanically (**almost like robots, but not entirely only because they have FEELINGS**). Only the beings in higher realms have genuine free will, which is optimum for humans.
- You can see that many animals have unique characteristics: such characteristics and habits are associated with that particular existence (*bhava*). For example, some birds have been building the same type of nests from beginningless time through countless world cycles; **but they cannot make it any better**. Migrating birds know exactly where to fly. Newborn turtles head to the sea right after the eggs are hatched; see the video:

[WebLink: YOUTUBE: New Born, Baby Sea Turtles Race to the Ocean!](#)

7. However, humans can change their destiny. They have free will and the ability to develop “new ideas.” We keep building new things, discovering new things, and making progress.

- We must remember that we can also purify our minds and become free of this unending and suffering-laden rebirth process. If we ever get birth in one of the lower realms, we will be stuck there for a long time.
- The way to purify our minds is to get rid of bad habits. Excessive greed (this includes addictions to anything, including food, money, property, alcohol, drugs, etc.) and anger are the first two things one needs to work on.
- This does not mean one has to give away one’s wealth; just don’t be too attached to them. One has “earned” that wealth from previous good deeds, so one does not need to feel bad about it. But those things last only about 100 years, and who knows what we will inherit in the next life.

8. And the key to being permanently free of the *apāyā* is to get rid of those bad character qualities (*gati*) that can give us birth in those four realms.

- We can avoid the *niraya* (hell) by getting rid of hate; we can stay away from *peta* (hungry ghost) worlds by getting rid of greed; we can make sure not to get a birth in the *asura* realm by not getting “free rides,” and making our living honestly (“*a*”+“*sūra*” means “not able” or those who depend on others).

- An animal's birth results from *gati* that have all three roots of greed, hate, and ignorance. The animal realm is called “*thirisan*” in Pāli or Sinhala: “*thiri*” is three and “*saṇ*” is greed, hate, and ignorance. Thus animal birth is caused by *gati* that have all three immoral roots.
- In the same way, we can make it possible to be born a deva by being generous to others; we can make it possible to become a *Brahma* by cultivating *mettā*, *karuṇā*, *mudī tā*, *upekkhā*; and we can optimize chances for a human birth by cultivating wisdom as well.

9. But no matter how well we live this life, we do not know what kind of “*kammic* baggage” we carry from previous lives. Thus the only way to avoid the four lower realms (*apāyā*) with CERTAINTY is to attain the *Sotāpanna* stage of *Nibbāna*. And we can do this by comprehending *anicca*, *dukkha*, and *anatta*, the true nature of this world.

- When one truly comprehends *anicca*, *dukkha*, and *anatta*, one's mind automatically rejects actions bound to maintain and cultivate bad *gati*, and encourages actions that will cultivate good *gati*. If this is done to the level of getting rid of the four greedy citta with wrong vision and the citta with *vicikicchā*, then one becomes PERMANENTLY free of the *apāyā*; see, “[Akusala Citta – How a Sotāpanna Avoids Apāyagāmi Citta.](#)”

10. Finally, another exciting video from the animal world shows how ants build sophisticated cities. But unlike humans, the ability to do that does not come from ingenious minds; ants have been doing the same for eternity. It is a “characteristic” that is naturally associated with the “ant *bhava*.” Each ant “knows” what to do, like the baby turtles who race to the sea just after being hatched. It is the same with how birds know where to fly in their long migrations.

- There is so much that the Buddha explained to the world, but the world is still unaware of it.

[WebLink: YOUTUBE: Giant Ant Hill Excavated](#)

11. More details on the importance of *gati* in the rebirth process are discussed in “[Paṭisandhi Citta – How the Next Life is Determined According to Gati.](#)”

12.12 Karaniya Metta Sutta – Metta Bhāvanā

October 7, 2018; revised September 6, 2019; revised #5 on February 11, 2021

Karaniya Metta Sutta is one of the popular *suttā* in Buddhist countries. However, like many *suttā*, it has not been appropriately translated in most current English translations.

1. First of all, the actual name of the *sutta* is *Karaniyamattha Sutta*. It comes from “*karaniyama*” meaning “essential to do” (කලයුතුමා (kalayutuma means “requires”) in Sinhala) and “*attha*” meaning “oneself.” That means this *sutta* summarizes what one must do (to make progress on the Path). But this is not a significant error since Metta *bhāvanā* is there too.

- Those “requirements” are in the first three verses.
- The actual “Metta *bhāvanā*” part is in verses 4 through 8.
- Verse 9 says that one should do this *bhāvanā* in all four postures. This *bhāvanā* is the “*Brahma Vihāra*” or “living like a *Brahma*” or “living with the mindset of a *Brahma*.”
- Verse 10: When one fulfills the “requirements” at the basic level, one will get to the *Sotāpanna* stage. With the cultivation of Metta *bhāvanā*, one will get to be an *Anāgāmi* (not born in a womb again).

	Pali	English
1	<i>Karaṇīyamattha kusalena, Yantam santam padam abhisamecca; Sakko ujū ca suhujū ca, Sūvaco cassa mudu anatimānī</i>	What <i>kusala</i> should be done by one who is seeking cooling down (by seeing the unfruitful nature of this world) : moral, upright and disciplined, with pleasing manners and humble .
2	<i>Santussako ca subharo ca, Appakicco ca sallaukavutti; Santindriyo ca nipako ca, Appagabbho kulesuananugiddho</i>	Always happy, bearing only good (<i>gati</i>), with few mundane duties and simple life , with senses calmed and a cooled mind, with few burdens (possessions), and treating everyone the same (regardless of race, color, etc.).
3	<i>Na ca khuddamsamācare kiñci, Yena viññū pare upavadeyyum; Sukhino va khemino hontu, Sabbe sattā bhavantu sukhittatā</i>	Not engaging in harmful/lowly actions (and this thought that one always holds), may all beings attain Nibbāna (and get to the ultimate happiness) .
4	<i>Ye keci pāṇabhūtatti, Tasā vā thāvarā vā anavasesā; Dīghā vā ye mahantā vā, Majjhimā rassakāṇukathulā</i>	Whoever there may be with a breath of life , trapped by greed for so long in <i>saṃsāra</i> , may they be free of fear and greed without exception.
5	<i>Diṭṭhā vā ye va adiṭṭhā, Ye ca dūre vasanti avidūre; Bhūtā vā sambhavesī vā, Sabbe sattā bhavantu sukhittatā</i>	Those who are seen or unseen, those dwelling far or near, those born as well as those seeking birth (<i>gandhabbā</i>), may all beings attain Nibbāna .
6	<i>Na paroparam nikubbetha, Nātimaññetha katthacinam kañci; Byārosanā paṭighasañña, Nāññamaññassa dukkhamiccheyya</i>	May no one deceive another, treat everyone like close relatives. May they not wish each other harm, and by seeing the unfruitful nature of this world, may they be free of suffering .
7	<i>Mātā yathā niyaṃputtam āyusā ekaputtamanurakkhe; Evampi sabbabhūtesu, Mānasambhāva ye aparimāṇam</i>	Just as a mother would protect her only child with her life, may this protection affect all beings on an equal footing .

	Pali	English
8	<i>Mettañca sabbalokasmim, Mānasambhāva ye aparimāṇaṃ; Uddhaṃ adho ca tiriyañca, Asambādhaṃ averam asapattaṃ</i>	May all cultivate <i>mettā</i> towards all beings on an equal footing , those who live above, below, or across. May all be unhindered and without enmity.
9	<i>Titṭhaṃ caraṃ nisinno vā, Sayāno vā yāvatassa vighatamiddho; Etaṃ satim adhiṭṭheyya, Brahmametaṃ Vihāraṃ idhamāhu</i>	Whether standing, walking, sitting or lying down, may all sustain this <i>mettā</i> mindset (what the Buddha called Brahma Vihāra).
10	<i>Diṭṭhiñca anupaggaṃma, Sīlavā dassanena sampanno; Kāmesu vinaya gedhaṃ, Na hi jātugabbaseyyam punaretī”ti</i>	Being moral based on right vision (a Sotāpanna) , and by removing <i>kāma rāga</i> with effort one will never again be in a womb (Sakadāgāmi or higher) .

Note: The pdf file of the *sutta* itself can be downloaded here: “[WebLink: PDF File: Karaniya Metta Sutta.](#)”

2. Deeper explanations are in some words like “*abhisamecca*” (“*abhi*” + “*saṇ*” + “*avecca*”), and “*dukkhamiceyya*” (“*dukkham*” + “*aveceyya*”).

- *Avecca* is the keyword in both cases, and I discussed the deep connection to “*icca*” and thus *Tilakkhaṇa* in the post, “[Sotapatti Anga – The Four Qualities of a Sotāpanna](#)” (starting at #9 in the post).
- If anyone needs more explanations of other words, we can discuss it at the discussion forum, but we will look at one more next.

3. Another keyword is “*mānasambhāva*,” which comes from “*mānasā*” and “*bhava*,” meaning one’s mind (ideally) does not contaminate beyond the “*mānasā*” stage.

- When thoughts (*citta*) arise, they get contaminated within a fraction of a second due to one’s *gati*. That is discussed in the post, “[Amazingly Fast Time Evolution of a Thought \(Citta\)](#).”
- Therefore, the goal is to improve one’s *gati*, so that one’s *citta* will not contaminate beyond the “*mānasā*” stage (reached the *Arahant* stage). **One should strive to approach that mindset right now, at least while meditating.**
- As one gets closer to that stage, one will have true *mettā* AUTOMATICALLY for increasingly more and more living beings. At *Arahanthood*, one will have boundless *mettā* to all: “*mānasambhāva ye aparimāṇaṃ*.”

4. The first three verses in the *sutta* state how one gets to the *Sotāpanna* stage by getting to the *Ariyakanta sīla* (unbreakable moral conduct). That is when one will have *aveccappasāda* (unbreakable faith in the Buddha, Dhamma, Saṅgha). That is discussed in detail in the post, “[Sotapatti Anga – The Four Qualities of a Sotāpanna](#).”

- Then by cultivating *mettā*, one can gradually get rid of *kāma rāga* and get to the *Sakadāgāmi* and *Anāgāmi* stages.
- However, this is an excellent *sutta* to listen to and to recite even before getting to the *Sotāpanna* stage. It is better **to recite Pāli verses with an understanding of the meaning of those verses. The sound itself is beneficial, especially when pronounced correctly, as done by the Thero in the recording below.**
- It is also good to play the recording in the background while doing other things or during meditation. In Asian countries, this is common practice to play this *sutta* in the mornings, while everyone is getting ready to go to school or work.

5. A recital of the *sutta* by Waharaka Thero is below:

[WebLink: Karaniya Metta Sutta in mp3](#)

Note: In the recital, the *sutta* ends around 4:45. The Thero starts reciting the following verse:

*“Nakkhatta-yakkha-bhūtānaṃ
Pāpaggahā nivāraṇā
Parittassāmbhāvena
Hantu mayhaṃ upaddave”*

It is a verse from “*Mahā Jayamaṅgala Gāthā*” where merits are offered to other beings. See, p. 42 of the following booklet, which is a useful guide:

[“WebLink: buddhistelibrary.org: Vandanā: The Album of Pāli Devotional Chanting & Hymns”](#)

12.13 10. Attaining the Sotāpanna Stage via Removing Diṭṭhāsava

The top 10 posts in this section describe the fundamentals of Buddhist meditation. The rest of the posts in this section discuss meditation subjects. They clarify unresolved questions and gain *samādhi*. The first 11 posts should be followed in that order, at least initially.

July 30, 2015: I have re-written the two posts #10 and #11 (previously titled, “10. Magga Phala and Ariya Jhānā via Cultivation of Satta Bojjhaṅga” and “11. How to Select and “Grow” Meditation Procedures for Magga Phala”) that were written some time back with different titles. Over the past two months, I have clarified some subtle issues in my experience and technical details. **Revised August 5, 2017; September 19, 2018 (updated links).**

- First, the order of things: *samādhi*, *magga phala*, and then *Ariya jhānā* in that order; see, [“Possible Outcomes of Meditation – Samādhi, Jhāna, Magga Phala.”](#)
- Thus *jhānā* (*Ariya* or *anāriya*) are not necessary to attain the *Sotāpanna* stage; see the posts in the [“Sotāpanna Stage of Nibbāna”](#) section for details on this and many other aspects.

1. First, it would be challenging to get to even a state of *samādhi* if one is not keeping up the “conventional” five precepts: abstaining from killing, stealing, sexual misconduct, lying, and using drugs or getting intoxicated. Those things make the mind restless, and hard for the mind to focus attention (the five hindrances “cover the mind”). Just strictly obeying the five precepts may not be effective if one’s mind is full of jealousy, extreme greed, hate, etc.; see [“The Five Precepts – What the Buddha Meant by Them.”](#)

- Just like one cannot see the bottom of a well if it is highly contaminated, the mind (and the body) will not “feel anything” even in a formal meditation session if the mind is “highly contaminated.” And there is no point in trying to take out the “small defilements” (such as abstaining from taking a glass of wine) if one is engaged in immoral activities.
- With the “big defilements” removed, one starts seeing a little bit further down the well; similarly, one’s mind will become lighter, with less stress, even when not in a formal meditation session. Sitting down in a quiet place makes it easier to get to some state of “*samādhi*,” or tranquility.
- The Buddha said that “*kusala sīla*” leads to the tranquility of the body and mind, leading to *samādhi*. The “*kusala sīla*” accomplished via gaining *Sammā Diṭṭhi* (to some extent) is all that is needed to attain the *upacāra samādhi* needed for the *Sotāpanna magga/phala*. All three *saṃyojana* removed at the *Sotāpanna* stage (*sakkāya diṭṭhi*, *vicikicchā*, *śīlabbata parāmāsa*) are associated with the wrong vision or *diṭṭhi*.

2. Many believe one needs to “get to *samādhi*” using a separate meditation technique such as conventional breath meditation. Even though one could do that, it would be a waste of time. One can get to *samādhi* by listening or reading attentively to CORRECT dhamma.

- There is not even a single reference in the *Tiṭṭaka* where the Buddha asked anyone to do a “*Samatha Bhāvanā*” first and then to “*vipassana bhāvanā*.” When one comprehends Dhamma, one’s mind gets calm, and through that *Samatha* state, one can get to *magga phala*.
- After attaining the *Sotāpanna* stage, one can get to *Ariya jhānā* by focusing on that “state of cooling down” that one has already achieved to some extent, to get to *jhānā*.
- One needs formal meditation techniques to attain **higher** *magga phala*, i.e., above the *Sotāpanna* stage; the reason will become clear shortly. However, it is fine to do formal meditation even to attain the *Sotāpanna* stage. In the following, I will describe what I went through.

3. To get to *samādhi*, contemplating Dhamma concepts will make it easier and faster. Also, one can stay in “meditation” for a longer time. Different names used are insight meditation (*vipassana*), many forms of “*anupassanā*,” and cultivating the “*dhamma vicaya*” *sambojjhaṅga*. Concomitantly, one must do the correct version of “*Ānāpānasati*” at all times.

- In principle, working towards the *Sotāpanna* stage does not require formal meditation techniques even though meditation can help; countless people attained the *Sotāpanna* or even higher stages of *Nibbāna* just by listening to a Dhamma discourse.
- It is quite essential to understand this point. Many people have one or more misconceptions about reaching the *Sotāpanna* stage. (i) Giving up all worldly possessions, (ii) Becoming a *bhikkhu* or living in seclusion, and (iii) One needs many meditation techniques.
- To clarify this issue, let us examine what is involved in attaining the *Sotāpanna* stage.

4. Removal of cravings for worldly pleasures or *āsavas* (*āsavakkhaya*) leads to *Nibbāna*; see, “[Āsava, Anusaya \(Temptation\), and Gati \(Gathi\)](#).”

- Out of the four *āsavās* that we have, only one goes away at the *Sotāpanna* stage: **dittasava or the craving for wrong worldviews**. In the *Sabbasava Sutta*, this is referred to as removal by clear vision (“*dassanena pahātabbā*,” where *dassanena* is vision and *pahātabba* is removal).
- The other three *āsavas* of *kāmāsava* (craving for sense pleasures), *bhavāsava* (desire to live somewhere in the 31 realms of this world), and *avijjāsava* (ignorance of *anicca*, *dukkha*, and *anatta*) go away at the higher stages of *Nibbāna*; see the above post.

5. The critical point is that one does “*apāyagāmi apuññābhisaṅkhāra*” (or strong immoral deeds that make one eligible to be born in the lower four realms) only when one has wrong worldviews. Contrary to most people’s beliefs, one does not need to lose the craving for sense pleasures to attain the *Sotāpanna* stage. *Kāma āsava* is reduced in stages in the *Sotāpanna* and *Sakadāgāmī* stages and is removed only at the *Anāgāmī* stage.

- That is why learning dhamma concepts and getting rid of “*diṭṭhi*” or “wrong views” is key in attaining the *Sotāpanna* stage, as I emphasized in several posts; if you enter “*diṭṭhi*” in the Search box on the top right, you will see many relevant posts.
- We all have many *diṭṭhi*. These can be removed only by learning the world’s true nature, i.e., by learning Dhamma.
- One meaning of *Sotāpanna* (“*sota*” + “*paññā*”) is “one who has cultivated wisdom by listening to Dhamma”; in the days of the Buddha, that was how one learned Dhamma, by listening.

6. Even before meeting my teacher *Theros*, I had been thinking about dhamma concepts for 3-4 years and trying to get a consistent picture in my mind. Even at that time, I could focus my mind and quickly get to *samādhi*.

- When I “got stuck” trying to figure out what a particular concept means concerning others, I would look through books and listen to *desanās* (discourses) on the internet. At this stage, I realized that most of the explanations did not make sense and were not consistent with other key concepts.
- For example, I struggled to explain the rebirth stories to many children. If “being born human” is so difficult as explained in many *suttā* (see, “[Rebirth – Connection to Suffering in the First Noble Truth](#)”), then how can all those children remember their recent past lives? Furthermore, there were “gaps” from the time they died in their previous life to the time they were born in this life.
- Once I met my teacher *Thero*, I clarified that issue along with numerous others: Birth is different from “human *bhava*”; see, “[Bhava and Jāti – States of Existence and Births Therein](#).” Also, when one dies and has energy left in the “human *bhava*,” one becomes a *gandhabba* and has to wait until a suitable womb becomes available; see “[Mental Body – Gandhabba](#).”
- Thus rebirth in the human realm does not happen instantaneously. One could be in the *gandhabba* state for years before being directed to a suitable womb. And one can be born in the human realm many times before the *kammic* energy for that “human *bhava*” is exhausted.

7. However, I could get to *samādhi* even before resolving many of these issues. I was making steady progress with the concepts that I could quickly grasp. I would sit at the desk, contemplate, and feel my body lighter and my mind calm. It was much better than just wasting time doing “breath meditation.”

- If I sat in a quiet place and meditated (contemplating a Dhamma concept), my mind would “latch on to it,” and I could get to an *anāriya jhānic* experience. That started a year before I learned the true meanings of “*anicca, dukkha, and anatta*.”
- It started with “tingling sensations inside my brain”; I could feel things happening there. And then I could feel “needle pricks” all over the body, and my body would start “freezing,” mostly the upper body. These “symptoms” are not common to all.
- Learning Dhamma is a critical part of “*kusala sīla*,” especially for the *Sotāpanna* stage. *Kusala sīla* automatically leads to *samādhi*, as discussed in the “[Na Cetanākaraṇīya Sutta](#).”

8. After I heard the “true meanings of *anicca, dukkha, anatta*,” I made progress very quickly. Looking back now, I may have attained the *Sotāpanna* stage while listening to that first *desana*. However, it took me some time to realize and convince myself. One needs to look back at the progress one has made and see that one is now incapable of committing immoral deeds that would make one eligible for rebirth in the *apāyā*.

- I was overjoyed with comprehending the “foundation of Buddha Dhamma.” It does not make sense to struggle to seek more worldly pleasures and possessions. That is guaranteed to be a failure in the long run. One spends one’s whole life making money to enjoy such “pleasures,” and before one realizes it, one has come to old age. I would call or e-mail my friends and tell them they needed to listen to *desanas* by those *Theros*.
- It took me a little while to realize that most of them could not figure out what I was excited about. Now, looking back, I realize that their minds were not ready. They were too busy making “more money.” It was a revelation for me, who had been seriously struggling for a few years. But most people who just spent a bit of their time reading critical concepts do not “connect.” **Reading Dhamma should not be done the same way as reading a newspaper or a novel; one needs to be engaged.**
- After getting the true meaning of “*anicca, dukkha, anatta*,” I spent the next few months scouring the internet for the *desanas* of those *Theros*. After five months, I traveled to Sri Lanka and brought back more material to listen to. It was so fulfilling and exciting; I was learning at a very rapid pace. At that time I didn’t even think about *jhānā*, but I could feel “*jhānic* effects,” i.e., my *samādhi* was getting intense, even though I was not trying to cultivate them.
- **September 19, 2018 update:** I have been listening to only those *desanas* by Waharaka Thero for the past few years. They are available only in the Sinhala language at “[සදනම්දර්ශන](#)”; also see: “[Parinibbāna of Waharaka Thero](#).”

9. Even though I had an inkling about reaching the *Sotāpanna* stage soon after listening to that *desanā*, I developed the *jhānā* some months later. However, **those turned out not to be *Ariya jhānā* though, since they can be attained only by an *Anāgāmi***; see, “[11. Magga Phala and Ariya Jhānā via Cultivation of Satta Bojjhaṅga](#).”

- These and other aspects of *Ariya* and *anāriya jhāna* are discussed in the section: “[Samādhi, Jhāna \(Dhyāna\), Magga Phala](#).”
- Once I finished investigating and “filling the gaps,” the *jhānā* came almost automatically. The meditation experience I described in #7 became much stronger; I could close my eyes and “feel the change in the head and the body” within minutes (and, nowadays, within seconds).

10. The above is what I mean when I say, “feel the results of meditation.” **One can feel it in the body as well as in mind.** Let us first discuss the reasons for the “body effect” and the “mind effect.”

- We have a very complex nervous system that the brain uses to control various body parts and communicate with the five physical senses. A “duplicate nervous system” is associated with the

manomaya kāya, and as we grow up, those two systems get somewhat displaced. The displacement becomes more prominent when we start enhancing all types of bad habits; they go “out of sync.”

- When we start learning Dhamma and avoid the most egregious acts, the two nervous systems try to get to the ideal overlap positions, and one could feel that. That becomes noticeable during meditation. Some people may feel aches and pains, sweating, etc. That is why I had said in other posts that things MAY look worse before getting better. In a way, such “body signals” are a good sign; it means the body is starting to respond.

11. Now to the “mind effect.” Many people tell me that they cannot keep their minds focused on even their breath for too long. That is a *samsāric* habit; the mind does not like staying in one place. It wants to “know” about everything happening in the vicinity and randomly think about past events or plans.

- The only way to remove this “bad habit” is to start thinking about Dhamma concepts slowly. And that cannot be forced either. Unless and until the mind sees the benefits of learning Dhamma, it can be a “chore” to some people. But once one gets some traction, one starts enjoying the “taste of Dhamma,” and it is easy to stay focused.
- The key here is that when one learns Dhamma, “*diṭṭhāsava*” (or craving for wrong worldviews) starts to dissolve, initially slowly, but picks up speed as one starts grasping concepts.
- The two critical components of *pīṇca nīvaraṇa* (*kāmacchanda* and *vyāpāda*) reduce as *diṭṭhāsava* reduced. That, in turn, lead to the reduction of the other three of the *pañca nīvaraṇa*. This process goes all the way to the *Sotāpanna* stage.

12. Of course, I did not realize until after meeting my teacher *Thero* (online) that what I had been doing all along was a crude version of the *Satta Bojjhaṅga Bhāvanā*. The crucial part of that is *dhamma vicaya* (contemplating Dhamma concepts). [*vicaya* :[m.] investigation.]

- That is how one cultivates the “*anicca saññā*” which is the key to removing defilements permanently. See “[What is the only Akusala Removed by a Sotāpanna?](#)” and “[How to Cultivate the Anicca Saññā](#).”
- The formal *Satta Bojjhaṅga bhāvanā* is discussed in the next post, “[11. Magga Phala and Ariya Jhānā via Cultivation of Satta Bojjhaṅga](#).”
- It is also important to realize that even an *Arahant* will not lose the sense of taste; one increasingly will lose CRAVINGS for them; see, “[Kāma Guna, Kāma, Kāma Rāga, Kāmacchanda](#).”

13. **November 11, 2016:** I get many questions on this topic, i.e., how to verify one is progressing towards the *Sotāpanna* stage. The new section, “[Living Dhamma](#),” provides a systematic way to achieve that goal and provides guidelines on checking one’s progress.

- **January 23, 2020:** The new “[Origin of Life](#)” section attempts to start “at the beginning” and get to more in-depth concepts of *anicca*, *dukkha*, and *anatta*. The deeper I get into the fundamental concepts, I realize there is much more! **However, basic comprehension becomes more natural too.** I may need to go back and revise many of the old posts. So, I would encourage everyone to read the new series with a deeper understanding.

12.14 11. Magga Phala via Cultivation of Satta Bojjhaṅga

The top 10 posts in this section describe the fundamentals of Buddhist meditation. The rest of the posts in this section discuss meditation subjects. They clarify unresolved questions, and help gain *samādhi*. The first 11 posts should be followed in that order, at least initially.

Revised August 5, 2017; September 19, 2018; revised April 24, 2020; May 15, 2023

Introduction

1. There are many ways to get to *magga phala*. What I have followed is *Bojjhaṅga Bhāvanā* and *metta Bhāvanā*. As explained in the previous post, I first did a crude version of the *Bojjhaṅga Bhāvanā* for a few years without even realizing that it was effectively a *Bojjhaṅga Bhāvanā*.

- Now I practice *Bojjhaṅga Bhāvanā/Ariya Mettā Bhāvanā* in sitting meditation and *ānāpānasati* (and *satipaṭṭhāna*) during other times, i.e., suppressing any thoughts/speech/actions that should be discarded and cultivating the opposite. Nowadays, It has become a habit and the moment something inappropriate comes to my mind, I become aware of it. As I keep saying, cultivating good habits (*gati*) is the key to progress.

Ānāpānasati Bhāvanā Comes First

2. *Ānāpānasati* (and *Satipaṭṭhāna*) helps one to get rid of bad habits/cultivate good habits, and thus change one's *gati* and *āsavā*; see, “[9. Key to Ānāpānasati – How to Change Habits and Character \(Gati\)](#),” and “[Is Ānāpānasati Breath Meditation?](#).”

- *Bojjhaṅga Bhāvanā* helps the mind to get to *samādhi* while also cultivating the *Bojjhaṅga dhamma*. *Satta Bojjhaṅga* (Seven Factors of Enlightenment) are listed in the “[37 Factors of Enlightenment](#)”; a brief description is given below.
- The other part of my sitting meditation is *Ariya Mettā Bhāvanā*; see “[5. Ariya Mettā Bhāvanā \(Loving Kindness Meditation\)](#).” This routine works well for me.
- Of course, there are many paths to *Nibbāna* (and to the *Sotāpanna* stage), and this is the one I took (almost inadvertently). **Still, it is critical to realize that attaining the *Sotāpanna* stage ONLY REQUIRES removing wrong world views or *diṭṭhi*, i.e., getting rid of *ditthāsava*.** But this may not be an easy step, because one needs to realize the *anicca* nature of this world.

What Are *Bojjhaṅga*?

3. The word *Bojjhaṅga* comes from “*Bodhi*” + “*aṅga*.”) Of course, “*Bodhi*” means “*bhava uddha*” or “Enlightenment” and “*aṅga*” means “part.”

- Thus, the seven factors in the *Satta Bojjhaṅga* are seven factors (*satta* means seven) conducive to attaining *Nibbāna*.

4. The key here is that during the *Bojjhaṅga Bhāvanā*, one only does “*āna*” or “taking in good things”; see, “[7. What is Ānāpāna?](#).” However, “*pāna*” or “removing the bad” happens automatically via wisdom gained, i.e., via enhanced vision or *sammā diṭṭhi*. One's mind is automatically focused on thinking about a Dhamma concept, and once one gets some traction, the mind will get “latched on to it”.

- In the early days, when I started contemplating a Dhamma concept I automatically got to *samādhi* (not *jhāna*), i.e., the mind became concentrated on that and the body and the mind both became lighter. I also experimented with breath meditation) at that time.
- This habit of contemplating dhamma concepts naturally got established as cultivating *dhamma vicaya* in *Satta Bojjhaṅga Bhāvanā* once I met my teacher *Thero*.

The necessity to Comprehend *Tilakkhaṇa*

5. I was able to make real progress only after learning the true meanings of *anicca*, *dukkha*, and *anatta*; see, “[10. Attaining the Sotāpanna Stage via Removing Ditthāsava](#).”

- Waharaka Thero has explained how to cultivate the seven *Bojjhaṅga dhamma* systematically. That involves establishing *sati* (moral mindfulness) based on those correct interpretations of *anicca*, *dukkha*, and *anatta*. See “[Anicca, Dukkha, Anatta](#),” and the follow-up posts.
- Of course, one must remove the ten types of *micchā diṭṭhi* before comprehending *Tilakkhaṇa*. See, “[Micchā Diṭṭhi, Gandhabba, and Sotāpanna Stage](#).”

The Seven *Bojjhaṅga*

6. The seven *Bojjhaṅga Dhamma* are *sati* (mindfulness), *dhamma vicaya* (investigation of *dhamma* concepts; pronounced “dhamma vichaya”), *virīya* (effort), *pīti* (joy), *passaddhi* (tranquility), *samādhi* (one-pointedness), and *upekkhā* (equanimity). I will post it later, but I have discussed most of these terms in other posts.

- It is essential to clarify what *sati* is. Many think *sati* is “concentration” or just “paying attention”. It is much more than that. It is “paying attention” WITH a frame of mind based on understanding *anicca*, *dukkha*, and *anatta*: One has contemplated the “big picture” of the Buddha with 31 realms and a rebirth process that has led to much suffering in the long run.
- Even though one may enjoy life now, one knows that it will be of negligible duration compared to the *saṃsāric* (or *saṃsāric*) time scale. This is the theme of this website, and there are many posts that one can read.

Sati Comes First

7. During the whole time of the *Bojjhaṅga Bhāvanā*, *sati* must be there; that frame of mind must be there. *Dhamma vicaya* is a critical evaluation of a given *dhamma* concept. One can choose a topic or two for a session and then contemplate it. **One could do this not only in a formal way, but also just while reading a web post or a book on the subject.** Each individual is different, so one must determine which is more suitable.

- One can compare the concept with one’s own life experience, and others that one can see. For example, when contemplating on *anicca*, there are several video clips on various posts giving visuals on the inability of anyone to maintain anything, including one’s own body, to one’s satisfaction in the long run. Also, one can contemplate the rebirth process and see whether it makes sense, one can contemplate different applications of *Paṭicca samuppāda*, etc.
- When one comprehends a given concept, that leads to the cultivation of the *pīti* (pronounced “peethi” or “preethi” in Sinhala) *sabbojjhaṅga*. This is part of *nirāmisa sukha* that I have talked about; one starts feeling happiness or a “lightness” making the mind serene. I am sure some of you have experienced this while reading posts. This gives one confidence that one is on the right path, and thus one will be motivated to make more effort, i.e., it cultivates the *virīya sabbojjhaṅga*.

First Phase – Learning and Contemplation

8. Thus *dhamma vicaya*, *pīti*, and *virīya sabbojjhaṅga* are cultivated together (of course *sati* must be there too). At some point, though, the mind and especially the body (head) may get tired. If one is making a lot of progress, one may start to experience some pressures in the head or body (not headaches, but just pressure.) Some feel like “ants crawling in the head”; the brain and the body (including the nervous system) are adjusting and there is nothing terrible about this.

- When this happens one is making progress; the body feels the effective meditation. Our minds and bodies have been contaminated too, and the nervous systems have been distorted with respect to that in the *manomaya kāya*. Some of the “pressures” one feels are due to the “twisting back” of the nervous system to the proper place. **These effects may be minimal for some people; this is what I experienced.**
- And this burning of defilements leads to a buildup of contaminants in the body that need to be expelled and cleansed, via proper breathing (this is not “*ānāpāna*”). We should not focus on the breath like in the mundane “breath meditation”. We are just getting rid of certain “*utuja rūpa*” accumulating in the body due to greed, hate, and ignorance.
- At this point one should stop the contemplation process and start breathing in and out to cleanse the body; sometimes the body automatically gets rid of those things via a long out-breath. This will lead to *passaddhi* (tranquility) of both the body and the mind, and one gets to *samādhi* gradually. One needs to think about the lightness of the body and the mind (*passaddhi*) and the *nirāmisā sukha* (from *samādhi*) results. One also should think about *upekkhā* (equanimity) too.
- When the body and the mind calm down enough and when one feels relaxed, one should go back to cultivating the previous three *sambojjhaṅga*, i.e., start on the contemplation process of *dhmma vicaya*.

Second Phase – Relaxation

9. Thus one should go back and forth between the two routines with three *sambojjhaṅga* each. The *sati sambojjhaṅga* must be there all the time. This is called the two-step cultivation of *Bojjhaṅga dhamma*.

- The Buddha compared this process to the washing of dirty cloth by hand. One needs to apply soap and wring the cloth to release the contaminants. But then, one must soak it in clean water and remove the released dirt. After that, if the cloth is still dirty, one applies soap again, and then again wash it. This process must be repeated until all the dirt is gone and the cloth becomes clean. And one needs to do it with mindfulness: if there is a stubborn stain left in one place, one may need to use a different chemical to get rid of that spot (i.e., use the appropriate *Bhāvanā*: *asubha Bhāvanā* to get rid of sense cravings, *Mettā Bhāvanā* to get rid of hateful thoughts, *dhmma* concepts to get rid of *micchā diṭṭhi*, etc) and wash in clean water again. Thus one needs to be mindful (*sati*) during the whole process.
- In the same way, one goes back and forth between the two routines with *sati*. The time takes to get to *magga phala* depends on the individual. *Ariya jhānās* can be attained only after getting to the *Anāgāmi* stage; see, “

Continuing With *Ānāpānasati Bhāvanā*

10. The *Bojjhaṅga Bhāvanā* is formal meditation. As we have seen, one must sit comfortably in a quiet place and contemplate.

- However, *Bojjhaṅga Bhāvanā* cannot be done in isolation. One needs to do the *Ānāpānasati Bhāvanā* at all times to get rid of bad habits and cultivate good habits, and live a moral life.
- Once one gains some traction and sees some benefits, one will become motivated.

Alternating Between the Two Phases

11. Initially one should focus on *anicca*, *dukkha*, or *anatta* as the *dhmma vicaya* subject. Then once some understanding is gained, one’s mind attains a certain level of cleanliness. After that, like using different chemicals to get rid of coffee or tar stains, one needs to choose different topics (or even meditation techniques) to broaden the understanding/remove a particular obstacle. Buddha Dhamma is all about cleansing the mind via wisdom and understanding this world’s true nature.

- Also, it helps to do the *Mettā Bhāvanā* as a part of the daily routine. The Buddha stated that If appropriately done (i.e., with an understanding of *anicca*, *dukkha*, *anatta*), the *Mettā Bhāvanā* can lead to the *Anāgāmi* stage; see, “[5. Ariya Mettā Bhāvanā \(Loving Kindness Meditation\)](#).”
- If one has too many cravings, one could use the “*asubha anussati*”; if one tends to procrastinate, one could cultivate the “*maranānussati*”. We will talk about these in the future.
- But first, it is essential to focus on *anicca*, *dukkha*, and *anatta*. At the same time, it may be a good idea to get some idea of the “big picture”, i.e., the rebirth process, the 31 realms, etc and then some idea about *kamma*, *saṅkhāra*, *Paṭicca samuppāda*, etc. All these are pieces of a puzzle; even though it may look daunting at the beginning when the big pieces are in place, one starts to get a better idea of where small pieces may fit in. *Anicca*, *dukkha*, and *anatta* are the most significant pieces.
- Thus contemplating *anicca*, *dukkha*, and *anatta* is a crucial topic for *dhamma vicaya*. I still do it every day, at least for a short time. **One starts “seeing the *anicca* nature” (i.e., gets to *Sammā Dīṭṭhi* on the Noble Path) at the *Sotāpanna* stage, but fully perceives the *anicca* nature of this world (i.e., removes *saññā vipallāsa*) only at the *Arahant* stage.** See “[Vipallāsa \(Dīṭṭhi, Saññā, Citta\) Affect Saṅkhāra](#).”

Attainment of the *Phala* Moment

12. The *Sotāpanna* stage (*magga/phala*) is attained in two consecutive *citta*. However, it is not noticeable at that time. One realizes that with time, mainly by realizing that one’s outlook on life has changed. In particular, the tendency to socialize is likely to be reduced, but there may be exceptions; one realizes how important it is to spend the little remaining time in this life on making spiritual progress and enhancing the “cooling down”.

- In trying to attain the first *Ariya jhāna*, one could start with the *Satta Bojjhaṅga Bhāvanā* with the frame of mind of the unfruitfulness of anything in this world in the long run (*anicca*, *dukkha*, *anatta*). All mundane thought objects (based on greed and hate) are suspended from the mind. Then one can think about the peacefulness of *Nibbāna* (the partial effect one experiences upon attaining the *Sotāpanna* stage), i.e., the change in one’s state of mind.
- I use the phrase, “*etaṃ santaṃ etaṃ paṇītaṃ yadidaṃ sabbasaṅkhārasamatho sabbūpadhipaṭinissaggo taṇhākkhaya virāgo nirodho nibbānaṃ*” in the “[WebLink: suttacentral: Mahāmālukya Sutta \(MN 64\)](#).” I emphasize that I have not yet attained the first *Ariya jhāna* yet, as of August 5, 2017. It is not possible to attain the first *Ariya jhāna* until one completely removes *kāma rāga*, as I have realized recently; see, “[Dasa Saṃyojana – Bonds in Rebirth Process](#).” Whatever *jhāna* that I had must be *anāriya jhāna*.
- Here is a recording of the Pāli verse by the Venerable *Thero* (you need to set the volume control on your computer):
[WebLink: Listen to verse on Ethan santhang ethan panithang](#)
- One could say in English, “It is peaceful, it is serene, the expelling of all *saṅkhāra*, breaking of bonds, removing greed and hate; *Nibbāna*”, OR “This is peaceful, this is excellent, that is achieved by calming all *saṅkhāra*, breaking all bonds leading to rebirth, *ceasing of all attachments, stopping of the saṃsāric journey, cessation of all causes*, which is *Nibbāna*”.
- What matters is not the actual words, but the understanding one has in one’s mind. **It is best to recite the Pāli verse and recall the meaning while chanting.**

Attainment of *Jhāna* Is a Possibility

13. One could attain *anāriya jhāna* before or after the *Sotāpanna* stage. However, even the first *Ariya jhāna* is possible by removing *kāma rāga anusaya* at the *Anāgāmi* stage.

- *Jhāna* are mental states corresponding to *rūpāvacara Brahma* realms, which are realms in this world. They can be attained by SUPPRESSING or REMOVING *kāma rāga*, corresponding to *anāriya* and *Ariya jhāna*. Either way, one will get to a similar *jhānic* state. However, subtle differences exist due to *anusaya* being present in *anāriya jhāna*. See #8, #10, etc. in “[Tapussa Sutta \(AN 9.41\)– Akuppā Cētōvimutti](#).”
- Since even to get to the first *Ariya jhāna* by REMOVING *kāma rāga*, one would have to be an *Anāgāmi* to attain the first *Ariya jhāna*. **That is easy to verify for oneself, since one would lose the craving for any sensory pleasures, including sex.**
- These and other aspects of *Ariya* and *anāriya jhāna* are discussed in the section: “[Samādhi, Jhāna \(Dhyāna\), Magga Phala](#).”
- It is also important to realize that even an *Arahant* will not lose the sense of taste; one increasingly will lose CRAVINGS for them; see, “[Kāma Guna, Kāma, Kāma Rāga, Kāmacchanda](#).”

14. **November 11, 2016:** I get many questions on this topic, i.e., how to verify one is progressing towards the *Sotāpanna* stage. The new section, “[Living Dhamma](#),” provides a systematic way to achieve that goal and provides guidelines on checking one’s progress.

- **April 24, 2020:** I recently finished a long discussion at a deeper level in the new “[Origin of Life](#)” section. This is a bit more advanced section.
- These are just different ways of trying to understand the Buddha Dhamma. It is a vast subject.

12.15 12. Key Factors to be Considered when “Meditating” for the Sotapanna Stage

November 13, 2015; revised August 28, 2022

1. **First**, one needs to understand what is meant by the *Sotāpanna* stage of *Nibbāna*. Many people start meditating without an idea of the goal: It is fine to do breath meditation if one only needs to calm down. Others are doing things needed to attain the *Arahant* stage, which will not work either because one needs to understand the concept of *anicca* first, i.e., learning the key concepts comes first (*dassanena pahātabba*).

- If one's goal is to attain the *Sotāpanna* stage, then one should first read the posts in the “[Sotāpanna Stage of Nibbāna](#)” section to get an idea of what is meant by a *Sotāpanna* and what is involved in getting there.
- There are many misconceptions about the *Sotāpanna* stage, and those posts could clarify them. I spent a lot of time doing unnecessary things, so I just wanted to make it easier for those who are just starting or doing the wrong things to get there. Of course, one should decide whether what I say is consistent with Buddha Dhamma.

2. I must also point out that many have been “brainwashed” to think that the *Sotāpanna* stage is impossible to achieve now. It is disheartening to see even some “*mahā Theros*” in Sri Lanka have given up striving for even the *Sotāpanna* stage (presumably because they had used the wrong concepts for many years and could not make any progress). But the Buddha clearly stated that his *Buddha Sāsana* will be there for 5000 years, and we are only halfway through. There will be numerous *Arahants* also in the near future.

- Many have attained the *Sotāpanna* stage and beyond within the past few years, and that number is growing. Pure Buddha Dhamma that had been hidden is out and is beginning to spread. Many who have reaped the benefits are trying their best to get the message out. Most of those efforts are in Sri Lanka or the Sinhala language at this early stage.
- Even though it may not be possible for some (those with *dvihetuka* births) to attain the *Sotāpanna* stage in this lifetime, an all-out effort will help at least in their future lives. Those who can make it (with *tihetuka* births) simply have done more in past lives. **By the way, if you come across any unknown Pāli words, just enter that word in the Search box, and there will be relevant posts listed.**
- In any case, any efforts will have tangible outcomes in this life itself.
- The Buddha clearly stated that there are no language, race, cultural, caste barriers in attaining *magga phala*, or the four stages of *Nibbāna*. The critical thing is that one needs to follow the original, pure Dhamma of the Buddha and comprehend his message.
- The key message of the Buddha is that nothing in this material world (31 realms) can be maintained to our satisfaction in the long run (*anicca* nature.) Thus through uncountable rebirths, we mainly encounter suffering. Some of us may not be experiencing suffering in this life right now, but that does not mean it will be the same in future lives (or even at old age in this life).

3. **Secondly**, having a road map is NECESSARY to reach an unknown destination. Starting to meditate without an idea of what to meditate on, like just getting in the car and driving without a map showing where the destination is.

- Again, the posts in the “[Sotāpanna Stage of Nibbāna](#)” section will be useful.
- The “map” to reveal *Nibbāna* is the comprehension of the key concepts like *anicca*. **When one reaches the *Sotāpanna* stage, it is like finding the correct map.** Then only one can start driving (i.e., *kammaṭṭhāna* or “meditation recitals”) to reach the final destination. **Reciting things without understanding is fruitless.**
- Please contemplate this aspect; I cannot emphasize it enough. Finding the map is the hardest and most important part.

- I have started a new section where a step-by-step process is described to follow; see “[Living Dhamma](#).” It can also help one figure out where one is on the Path and clarify many fundamental issues.

4. **Third point** — related to the second point — is that we need to examine what “*bhāvanā*” (meditation) means when striving for the *Sotāpanna* stage. **It is NOT a formal meditation technique (reciting a given *kammaṭṭhāna*) that is mainly needed here.**

- However, the Buddha said that even listening to discourse is *bhāvanā*. One could attain the *Sotāpanna* stage just by listening to a discourse. When listening attentively, one’s mind gets focused on it, comes to *samādhi*, and can get to *magga phala* via *upacāra samādhi*.
- What is needed to get to the *Sotāpanna* stage is the contemplation of the key Dhamma concepts, in particular *anicca*, *dukkha*, and *anatta*, but also to try to get an understanding of the Buddha’s world view, with 31 realms of existence, beginningless rebirth process, infinite number of planetary systems (*cakkavāla*), *Paṭicca Samuppāda*, etc. This is how to “find the correct map” mentioned in #3 above.
- As explained in those posts in the “[Sotāpanna Stage of Nibbāna](#)” section, this meditation (*bhāvanā*) involves mainly the contemplation (*citta*) and examination of dhamma concepts (*dhamma vicaya* and *vīmaṃsā*). The four bases of mental power (*chanda*, *citta*, *virīya*, *vīmaṃsā*) are very helpful to be cultivated; see “[The Four Bases of Mental Power \(Cattāro Iddhipāda\)](#).”
- In the above, “*chanda*” is the liking to attain *Nibbāna* cultivated by learning and forming a desire to learn more Dhamma. I can assure you there is no other pleasure like the “pleasure of knowing the truth, the pleasure of discovering true Dhamma.”
- Formal meditation techniques are needed mainly after the *Sotāpanna* stage, as described in the subsection **Key Points from the *Sabbāsava Sutta*** under the post, “[The Sotāpanna Stage](#).”

5. **Fourth** is to have a clear idea of the priority items to get done regarding *sīla* (moral behavior). In one of the early meditation posts, I pointed out that one needs to sort out the “big problems” to take care of before tackling smaller problems. If a vessel leaks due to multiple holes, one needs to seal the big leaks first. Spending precious time trying to plug smaller holes when the water is pouring out through the big holes is a waste of time.

- In the following, I will address the fact that many people have misconceptions about the relative weights of *kamma*. Please bear with me and read carefully, because some of these ideas go against established and common wrong views. I have discussed some in “[How to Evaluate Weights of Different Kamma](#).”

6. For example, many people are afraid of even accidentally killing a mosquito but do not have any problem making plans to hurt another human or spread rumors about another.

- Then others think taking an occasional alcoholic beverage is immoral but spend hours thinking about other sense pleasures. **By the way, it is not the sensory pleasures that is the problem, it is constantly thinking about them; this is a subtle but important point;** see, “[Assāda, Ādinava, Nissaraṇa – Introduction](#).”
- Of course, killing any living being should be avoided, and it is best to avoid drinking alcohol (especially if one tends to get drunk; the problem with drinking is that it makes the mind more exposed to the *pañca nīvaraṇa*; one’s ability to think is diminished when drunk).
- My point is that hurting another human will have much more potent *kamma vipāka* than killing many mosquito or taking an occasional drink.

7. We can get some ideas on these issues by looking at the *Vinaya* rules for the *bhikkhus*. These are the rules of conduct for the *bhikkhus*. There are 227 rules for fully ordained monks (*bhikkhus*) and 311 for nuns (*bhikkhunīs*).

- These rules are called *patimokkha* (“*pati*” is getting bonded and “*mokkha*” or “*moksha*” in Sanskrit is “*Nibbāna*”) because they help stay out of trouble and stay on the path to *Nibbāna* for the *bhikkhus*. Remember that in the *Satipaṭṭhāna sutta*, “*mukha*” in “*mukha nimitta*” also means *Nibbāna*.

These rules are categorized according to their importance (or the severity of consequences for breaking them). The top four belong to the class called “*pārājika*,” meaning a *bhikkhu* who breaks any one of the four has been “defeated” and thus needs to leave the monastic order. [*pārājika* : [adj.] one who has committed the gravest transgression of the rules for bhikkhus.]

1. **Sexual intercourse:** any voluntary sexual interaction between a *bhikkhu* and a living being, except for mouth-to-mouth kissing, which falls under the *Saṅghādisesa* (next level below the *pārājika* level). [*saṅghādisesa* : [unexplained as regards etym. ; Geiger, P. Gr. § 383, after S. Lévi, = *saṅgh’ātisesa*; but *atisesa* does not occur in Pāli] requiring suspension from the Order; a class of offences which can be decided only by a formal *saṅgha-kamma*.]
2. **Stealing:** the robbery of anything worth more than 1/24 troy ounce of gold (as determined by local law).
3. Intentionally bringing about the **death of a human being**, even if it is still an embryo — whether by killing the person, arranging for an assassin to kill the person, inciting the person to die, or describing the advantages of death.
4. **Deliberately lying to another person that one has attained a superior state**, such as claiming to be an *arahant* when one knows one is not, or claiming to have attained one of the *jhānā* when one knows one has not.

8. The next level is the *Saṅghādisesa*. The thirteen *Saṅghādisesa* rules require an initial and subsequent meeting of the *saṅgha* (communal meetings). If the monk breaks any rule here, he has to undergo a period of probation or discipline, after which, if he shows himself to be repentant, he may be reinstated by a *saṅgha* of not less than twenty monks.

- Like the *pārājikas*, the *Saṅghādisesa* can only come about through the monk’s intention and cannot be accidentally invoked. However, if the *bhikkhu* does not go through this to absolve him/herself, then the consequences will be even harsher. These thirteen rules are not relevant to our discussion here, but you can read them at: [WebLink: WIKI: Patimokkha](#)
- Two more layers, *aniyata*, and *Nissaggiya pacittiya*, pertain to *bhikkhus* and are again irrelevant to our discussion. They are even less potent and can be overcome by confessing to another *bhikkhu* and deciding not to repeat.

9. The last set of rules is the “weakest,” i.e., with the least consequences compared to all others. They are the 92 “*pacittiya*” rules, which are minor violations and can be overcome by confessing to another *bhikkhu* and deciding not to repeat them. The ones relevant to our discussion are:

- 10. *Should any bhikkhu dig soil or have it dug, it must be confessed (to avoid killing small animals/insects).*
- 51. *The drinking of alcohol or fermented liquor is to be confessed.*

10. Many people think “life is a life,” but that is not so. Here digging soil is not allowed for *bhikkhus* because many lifeforms (insects, worms) are killed in that process. But this act is listed under the last section of the *Vinaya* rules (with the least consequences).

- We know that killing an *Arahant* or one’s parents is an “*ānantariya kamma*,” a very potent *kamma* that will send one to the *apāyā* in the next birth.
- And as we saw in #7 above, killing or giving the advice to kill even a fetus is a *kamma* that makes a *bhikkhu* lose his/her ordination. Killing small insects (inadvertently) by digging soil is a much less potent *kamma*, as listed in #9 above.
- Human life is precious because only a human can strive and attain *magga phala*, AND it is very difficult to get a “human *bhava*.” But even among humans, there is great variation: an *Arahant* or one’s parents are ranked way higher. The importance of parents is related to the fact that it is extremely hard for a *gandhabba* to find a suitable womb. I will discuss this in detail later.

- We also see that drinking alcohol is a minor offense, even for a *bhikkhu*, as listed in #9 above. *Bhikkhus* do not drink alcohol anyway, but this rule came about because of a particular incident at the time of Buddha.

11. It can also be deduced that stealing is a misdeed with harsh consequences since it is included as a “*pārājika*” for the *bhikkhus*.

- We must realize that stealing has many subtle forms, in addition to “taking something that belongs to another without permission.” In society, not doing one’s part is also a form of stealing. One is benefiting from others’ work without contributing to it.
- We also become indebted automatically to our parents, teachers, friends, etc. Even though they may not expect a “payback,” we must “respond in kind” whenever an opportunity arises.
- More can be found in the post, [“Kamma, Debt, and Meditation.”](#)

12. Finally, I would like to point out that it is difficult to quantify the weight of a given *kamma* generically. For example, “killing an animal” is a very generic statement, and such an act has a broad range of *kamma vipāka*.

- When you slap a mosquito that bit you while reading a book almost without realizing it, it has very little *kammic* power. On the other hand, when one aims a gun at a deer and fires to kill it, that will have much more *kammic* power.
- One way to easily figure out the difference between those two acts is to think in terms of “*javana* power” of a *citta*. This goes together with the “intention” and “how bad one wants to get it done.” In the above example, you can almost visualize the difference in the mindsets of killing a mosquito versus deer. For more details, see [“Javana of a Citta – The Root of Mental Power”](#) and [“Details of Kamma – Intention, Who Is Affected, Kamma Patha.”](#)
- Hitting a person to cause minor pain is done with less *javana* in the *citta*. But hitting a person with an iron rod intending to kill has much more *javana* power, as you can imagine.

13. These are things one needs to contemplate to truly understand the Buddha Dhamma; that is the real *vipassana* or insight meditation. Getting to the *Sotāpanna* stage requires learning about such basic things on one’s own by thinking about real life.

- Buddha Dhamma is not a “set of rules and rituals” to blindly follow. That is exactly why many people have not been able to make any progress and have even given up.
- When one starts thinking critically and attentively, one develops the four types of (*cattāro*) *iddhipāda* discussed in #4 above. Once one gets traction by understanding a few basic things, Dhamma will be the guiding force to generate *chanda* (desire) to investigate more and to find more. It is boring and fruitless to blindly follow precepts and rituals that will not get one anywhere.

14. **November 11, 2016:** I get many questions on this topic, i.e., how to verify one is progressing towards the *Sotāpanna* stage. The new section, [“Living Dhamma,”](#) provides a systematic way to achieve that goal and guidelines for checking one’s progress.

12.16 13. Kammattana (Recitations) for the Sotāpanna Stage

December 5, 2015

1. There are two ways to look at the effectiveness of recitations. First, one could gain some benefit when LISTENING TO recitations (such as recorded chanting of *suttā*), even without understanding what is said in the *suttā*. However, that benefit will increase if one understood the content.

- The effectiveness of recitations in MEDITATION SESSIONS is somewhat similar. There are many people who have been practicing various types of recitations (*kammaṭṭhāna*) for 10, 20, 30, or more years without significant results (i.e., *magga phala*), even though they are likely to feel some calming effect.
- Reciting phrases (in any language) can be quite beneficial if the meanings of those phrases are understood in either of the above cases. Recitation in Pāli can be a bit more effective, since Pāli words tend to condense a lot of meaning. If one starts off with at least some understanding, recitation on a regular basis will help understand the concept at a deeper level.
- For example, the concept of *anicca* is understood gradually — with a glimpse of it grasped on the way to the *Sotāpanna* stage, getting a firm foothold at the *Sotāpanna* stage, strengthening at the *Sakadāgāmi* and *Anāgāmi* stages — and is fully comprehended at the *Arahant* stage.
- A systematic procedure to get to *sammā samādhi* to be able to comprehend *anicca*, *dukkha*, *anatta*, is described in the “[Living Dhamma](#)” section. It can also help one figure out where one is in the Path, and to clarify many fundamental issues. **It is not possible to comprehend *Tilakkhaṇa* until one's mind is purified to some extent. Then one's mind can easily grasp concepts rather than just memorizing them.**

2. A mundane example is learning the multiplication table. Some get it easier than others. But with practice anyone can master it. All one needs is to spend some time reciting and memorizing the table, even though only memorization may not be helpful in the final objective, i.e., solving a bit more complex problems.

- We know that this “learning process” can be speeded up by using what one learned in solving some problems. Rather than just memorizing the multiplication table, if one applied it to solve some multiplication problems, the learning time can be drastically reduced and also it is easier to keep in the memory for longer time.
- This is what the Buddha meant by “*bhavanaya bahuleekathaya.....*” *Bhāvanā* (or meditation) is **what one uses frequently; one needs to be thinking about it and examine it in many different situations as much as possible**. Then the concept starts to “sink in”. Formal recitations can be part of this process. [*bahulīkata*: [pp. of bahulīkaroti] took up seriously; increased. (adj.), practiced frequently.]
- Reciting a phrase repeatedly while contemplating on it (*kammaṭṭhāna*) is an excellent way to retain and comprehend a given concept, **once the concept is at least vaguely understood**.

3. Another important benefit of a good recitation session is in subsiding the five hindrances (*pañcanīvaraṇa*) that makes the mind agitated and not receptive; see, “[Key to Calming the Mind – The Five Hindrances](#).” When one is focusing on Dhamma — even by just reciting verses — those greedy, hateful, and irrelevant thoughts are at least temporarily subsided and the mind will not be lethargic or agitated.

- In this respect, just listening to *Pāli suttā* could be beneficial too. In many Buddhist countries, many people start off the day with chanting of *suttā* (*pirith*) in the background. When I was little, I used to wake up to the chanting of *pirith* on the radio (my mother used to do turn it on the first thing in the morning).
- If the *suttā* are recited the right way, just listening to them can make the mind calm. I have posted audio files of several *suttā* by my teacher *Thero* including a 75 minute session in the post: “[Sutta Chanting \(with Pāli Text\)](#).”

4. Yet another critical benefit is to make the conditions conducive to attract previous “good *kamma*,” and make the mind “tune into” receiving such merits. Each of us has done innumerable good and bad *kamma* in our previous lives, and they are waiting for “right conditions” to bring their results (*vipāka*).

- For example, there may be a good TV (or radio) program being broadcast. But if the television (or the radio) is not “tuned in” to the right station, one would not be able to watch (or listen to) the program.
- “Making the conditions right” can bring about both good and bad *kamma vipāka* too. If one associates with bad friends, that is making conditions for bad *kamma vipāka* to bring fruits. On the other hand associating with good friends and listening/reading Dhamma can make one’s life better. This is discussed in detail in the posts, “[Anantara and Samanantara Paccaya](#)” and “[Transfer of Merits \(Pattidana\) – How Does it Happen?](#).”
- I have mentioned in many posts that the effectiveness of absorbing material at this website can be much improved by reading them at a quiet time. In the same way, a meditation session can be made more effective by calming the mind by doing some well-planned recitations. That itself can be a meditation session. What I do is, in the middle of recitations contemplate about relevant Dhamma concepts or my own daily experiences, i.e., do insight meditation in the middle of the recitation itself.

5. One should tailor the recitation session to match one’s own personality and needs. For example, if one has a temper, one should spend more time doing *metta bhāvanā*; if one has excessive greed (for sense pleasures) one could spend more time doing *asubha bhāvanā* (unfruitful nature of things), which is basically to contemplate on the fact that ANY object that is providing sense pleasure is going to decay and destruct at the end.

6. I have thought a lot about how to present a “*kammaṭṭhāna* program”. But it is difficult to decide what *kammaṭṭhāna* to discuss because each individual is different, and has own preferences and needs. I may still do that in pieces in the future, and I have discussed basic features of some in other posts.

- Here, I think it is better to just provide an audio of recitation session that I go through each day. This is just to give an example of how it can be done, and I know that it helps me in calming my mind and making it more receptive and alert.
- This is somewhat modified compared to what I actually do, because I do some parts in Sinhala which most of you will not understand, and I have also tailored this for those who are seeking the *Sotāpanna* stage of *Nibbāna*.

7. It is best to do these recitations in a quiet room, sitting comfortably — but not too comfortably — so that one would not fall asleep initially. Once one gets used to it, one will never fall asleep. Also, it may be better to actually say the words initially to avoid the mind to wander around; one could just recite in the mind later on.

October 13, 2016: I have removed the audio file temporarily until I make a better one. After I started the “[Living Dhamma](#)” section, I realized a way to present material in a better way.

But I leave the pdf of the text file:

[WebLink: PDF File: Kammattana Example](#)

Notes:

1. I am assuming that anyone who is interested in these *kammaṭṭhāna* (i.e., those who have the desire to strive for the *Sotāpanna* stage) have already read the relevant key posts at [Sotāpanna Stage of Nibbāna](#). Now, let us discuss different sections of the [WebLink: PDF File: Kammattana Example](#).

- Also, the Search button on the top right is very useful for finding relevant posts for any given keyword or a phrase that is not clear.

2. In reciting precepts, instead of the “*Pānātipātā Veramani Sikkāhāpadam Samādiyāmi*”, which says “I promise not take another life of a living being”, it is more truthful to say, “I promise not to take another life with any liking for it” (*Pānātipātā pativirato hoti*), unless one is dedicating a day to strictly observe the precepts.

- For example, if one needs to apply a medication to a wound, that will kill many microscopic living beings; yet, one has to do that in order to heal the wound; **thus in day-to-day life, we may have to take actions like that we would not like to; this is what is meant by “pativirato hoti”, i.e., one would not do it unless necessary.** But if one is observing precepts, one could avoid applying the medication on that day.
- Same for the other four precepts.

3. Note the break in between “*itipi so bhagava...*”. Many people recite it as “*itipiso bhagava...*”, which has a very different and inappropriate meaning.

- I really need to discuss the meanings of these three phrases, and hope to get it done in the “Buddhist Chanting” section in the future.

4. The phrase, “*Natti me sanaran annan Buddhho me saranan varan*” means, “I have no other refuge than that of the Buddha”.

- “*etena sacca vajjena sotti me hotu sabbada*” means something to the effect of “may the truth in my refuge in Buddha, Dhamma, Saṅgha lead to my well being and success in **my** efforts”.
- “*etena sacca vajjena sotti te hotu sabbada*” means something to the effect of “may this truth lead to the well being and success in **others’** efforts”.

5. The next phrase (in Sinhala, I am unable to come up with a suitable English or Pāli phrase) means, “I will be truthful to myself, see things as they are, be pure in mind, and endeavor to generate only pure thoughts (*prabhasvara* or *pabasara citta*). I plan to write separate posts discussing some of these *kammaṭṭhāna*. Even a single phrase is so condensed that one could write many posts on each.

- For example, “*avanka*” comes from “*vanka*” or “bent” or “not straightforward”. If someone is not truthful, then that is “*vanka*”; “*avanka*” is the opposite of “*vanka*.”

6. The next three phrases are also very important. I recite it every day. The phrase, “*Kayena vaca cittena pamadena maya katan, accayam khama me Bhante bhuripanna Tathagata*”, means: “If I have done any wrong inadvertently (or due to ignorance) by thoughts, speech, or mind to the Buddha, may I be forgiven for that”.

- And then the same phrase directed to Dhamma and Saṅgha. For example, I always worry about inadvertently explaining some concept in a way which may not be quite right. Also, when dealing with people, we don’t know whether we inadvertently hurt their feelings or do something that they see as inappropriate (and it is possible that such a person may be a Noble person).

7. The next set of phrases are for cultivating *anicca saññā* and related other factors. The phrase, “*Aniccamupassi viharati, nicca saññā pajahati*” means “I will live my life cultivating the *anicca saññā* and reject that things in this world can be kept to my satisfaction (i.e., reject the *nicca saññā*)”. Similar meaning can be deduced for the following three phrases.

- In the phrase, “*Nibbidamupassi viharati, abhinandana pajahati*”, *nibbida* means “stay away from valuing sense pleasures” and *viharati* means “live accordingly”. *Abhinandana* means “valuing sense pleasures”, and *pajahati* means “avoid”.
- “*Nirodhanupassi viharati, samudayan pajahati*”, means stop the wheeling process and reject generating more “*saṇ*” (“*saṇ*” + “*udaya*” combines to give “*samudaya*”); see, “[What is ‘San’?](#)”.
- “*Patinissagganupassi viharati, sambhavan pajahati*” means “I will endeavor to break all bonds to this world, and stop making new *bhava*.”

- The last three recitals in this section with “*Anissitoca viharati, na ca kinci loke upadiyati*” confirm one’s conviction that “it is unfruitful to stay in this world of 31 realms, there is nothing in this world that worth craving for (*upādāna*)”.

8. The set of three phrases that come next also help cultivate *anicca saññā*, and one could review or do insight meditation on *anicca, dukkha, anatta* right after that.

9. The next section is on *metta bhāvanā*. I normally recite this in Sinhala, but these English phrases give almost the same meaning. This is also discussed in the post, “[5. Ariya Metta Bhāvanā \(Loving Kindness Meditation\)](#).”

- The relevance to different types of *akusala citta* is discussed in the post, “[Akusala Citta – How a Sotāpanna Avoids Apayagami Citta](#).” The 12 types of *akusala citta* are discussed in, “[Akusala Citta and Akusala Vipāka Citta](#).”

10. The next phrase is the standard phrase to use when cultivating *jhāna*: see, “[11. Magga Phala and Ariya Jhānā via Cultivation of Saptha Bojjanga](#).” Even though it is supposed to be fully effective only after attaining the *Sotāpanna* stage, it can be used by anyone who has been exposed to the true meanings of *anicca, dukkha, anatta*, and is pursuing the *Sotāpanna* stage.

- One could get into at least some kind of *samādhi* by this time, and do some insight meditation here. Actually, at any of the above *kammaṭṭhāna* sections, one could do insight meditation related to that section. I normally do this and my sessions sometimes last for much longer times.

11. In the subsequent sections, we start giving merits to all living beings. The phrase, “*Idam me nati nan hotu Sukhita hontu natayo*”, means “May all my relatives (which does include all living beings in the through *samsāra*) attain peace and happiness due to these merits”.

- The next phrase, “*Idam vo nati nan hotu Sukhita hontu natayo*”, can have multiple meanings. If one is doing a group session, it could mean “relatives of others in the group”. If one is by oneself, it could mean “distant relatives”, who may even be in worlds far away from the Earth.
- Thus when one recites both phrases, it does include all living beings.

12. The next section gives merits to *devas* (which include *brahmā* as well), *bhūta*, and *preta*, and then to all beings (*sabbe satta*). It is another way of giving merits as in #11.

- Then the next phrase in English is straightforward. I specifically included this so that anyone can use this with full understanding. If one had (even inadvertently) done a bad deed to someone that day, one could be thinking about that person and ask for forgiveness. This is a very effective way to calm the mind and reduce tensions, and I hope to write a post on this. If done sincerely, one should be able to see the effects in real life. You may notice that the tensions with that person automatically reduced.
- What happens is that those strong *javana citta* that you generate can produce *cittaja rūpa* that can affect that person even over long distances. It is again related to what we discussed in #4 of the main section (above the current “Notes” section).

13. Then we end the session with the phrase “*Idam me puññan āsavakkhaya vahan hotu, sabba dukkha nirujjati*” that is recited three times. It means, “May the merits that I have acquired help remove my *āsava* (cravings), and lead to the end of all suffering”.

- It is to be noted here that “*asavakkhaya vahan hotu*” is really, “*asavakkhaya aham hotu*” or “may (these merits) be *hetu* for cleansing of my *asava*.” It just rhymes as, “*asavakkhaya vahan hotu*”.

14. Of course the above is an example of what one could do. One could use all the *kammaṭṭhāna* (and add more), or use only the ones that one likes. I don’t use them all in a given session, but do use some of them all the time. I just start the session with the first few and select phrases as I proceed. Sometimes, I get into insight meditation (contemplating relevant ideas, connecting with other concepts, etc) following a given phrase and just do that for the whole session.

15. **November 11, 2016:** I get many questions on this topic, i.e., how to verify one is making progress towards the *Sotāpanna* stage. The new section, “[Living Dhamma](#),” provides a systematic way to achieve that goal, in addition to providing guidelines on how to check one's progress.

12.17 New Approach to Meditation

This section has been moved to, “[Living Dhamma](#).” Please check there for the follow-up posts.

12.18 **Anussati and Anupassanā – Being Mindful and Removing Defilements**

April 16, 2018; revised August 10, 2022

Anussati and Anupassanā

1. *Anussati* and *anupassanā* are two Pāli words that have related but different meanings. It helps to understand the difference because many people today incorrectly use various types of *anussati* as *kammaṭṭhāna* (meditation subjects). [*anussati* : [f.] recollection; memory; mindfulness. *anupassanā* : [f.] 1. consideration; 2. realisation.]

- If one understands *Ānāpāna* and *Satipaṭṭhāna*, they are other ways of saying the same thing. They are all different angles of looking at the goal (*Nibbāna*) and how to get there, i.e., how to cultivate the Path.
- It is ALWAYS good to remember that *Nibbāna* is attained via getting rid of greed, hate, and ignorance (*lobha*, *dosa*, and *moha*) from one's mind. The only thing to remember is that without comprehending *Tilakkhaṇa*, that process cannot be completed. Everything else is just more details on how to get there.
- “*Anu*” can have two different meanings. One is “according to” or “via this process.” The other is “food” for bad *viññāṇa*, which are essential “*keles*” or “*kilesa*” or “defilements.” But here, it is the first meaning that is mainly relevant.

[*kilesa* : ‘defilements’, are mind-defiling, unwholesome qualities. Vis. M. XXII, 49, 65: **There are 10 defilements**, thus called because they are themselves defiled, and because they defile the mental factors associated with them. They are: (1) greed (*lobha*), (2) hate (*dosa*), (3) delusion (*moha*), (4) conceit (*māna*), (5) speculative views (*diṭṭhi*), (6) skeptical doubt (*vicikicchā*), (7) mental torpor (*thīna*), (8) restlessness (*uddhacca*); (9) shamelessness (*ahirika*), (10) lack of moral dread (fearlessness) or unconscientiousness (*anottappa*). For 1-3, s. *mūla*; 4, s. *māna*; 5, s. *diṭṭhi*; 6-8, s. *nīvaraṇa*; 9 and 10, s. *ahirika* - *anottappa*.]

[*upakkilesa* : ‘impurities’, corruptions, imperfections (a frequent rendering by ‘defilements’ is better reserved for *kilesa*, q. v.). A list of **16 moral ‘impurities of the mind’** (*cittassa upakkilesa*) is mentioned and explained in M. 7 & 8 (WHEEL. 61/62): 1. covetousness and unrighteous greed (*abhijjhā-visamalobha*), 2. ill will (*byāpāda*), 3. anger (*kodha*), 4. hostility (*upanāha*), 5. denigration (*makkha*), 6. domineering (*palāsa*), 7. envy (*issā*), 8. stinginess (*macchariya*), 9. hypocrisy (*māyā*), 10. fraud (*sāṭheyya*), 11. obstinacy (*thambha*), 12. presumption (*sārambha*), 13. conceit (*māna*), 14. arrogance (*atimāna*), 15. vanity (*mada*), 16. negligence (*pamāda*).]

- Now we can see the origins of those two words (*pada nirutti*).

Buddhānussati, Mettānussati, Asubhānussati, Maranānussati

2. **First, let us discuss *anussati***, which comes from “*anu*” + “*sati*.” Of course, *sati* is a mindset (with the *Tilakkhaṇa* in the background); therefore, *anussati* means **the mindset focused on attaining *Nibbāna***.

- There are several types of *anussati*, but four are lumped together as “*caturārakkhā*” or “**Four Protections**” that one should try to keep with oneself all the time, which will help one to stay out of trouble.
- This is expressed in the following verse (I have not found the source in the *Tiṭṭaka*):

“*Buddhānussati metta ca, asubham maranānussati; iti ima caturārakkhā, Bhikkhu bhaveyya silava*”

Translated: “*Buddhānussati, mettānussati, asubhānussati, maranānussati*; these are the **Four Protections** for a *Bhikkhu* cultivating *sīla* (moral behavior).”

- These are four things that one should ALWAYS keep in mind to protect one's mind from getting defiled.

3. We already know that “*Buddha*” comes from “*bhava*” + “*uddha*,” or uprooting *bhava*, i.e., stopping the rebirth process to stop future suffering. So, *Buddhānussati* means keeping that key message in mind.

- *Asubha* means “unfruitful” and even “harmful.” Getting attached to sense pleasures is harmful in the long run, just like a fish biting on a tasty worm on a hook will be subjected to suffering. So, *asubhānussati* means always to be mindful of the bad consequences of material things that are appealing at the first sight.
- *Mettānussati* is to keep in mind always that all living beings are in the same boat, suffering in the long run, and thus to have compassionate thoughts about all of them. Of course, that can be implemented at various levels depending on one’s progress (mundane *mettā* to *Ariya mettā*).
- Especially when one becomes aware of the true meanings of *Tilakkhaṇa*, one realizes not only the fruitlessness of seeking happiness in this world, but one becomes AFRAID of possible future suffering. When that realization comes, one will make an accelerated effort to cultivate the Path because death can come at any time.

4. Therefore, these four types of *anussati* are the four types of “mindfulness” that one should always keep in mind. Not only when meditating but even more important when interacting with society.

- These Four Protections, with practice, will help enormously in maintaining *Satipaṭṭhāna* or *Ānāpāna* while interacting with others.
- For example, suppose someone says something nasty. Instead of getting mad and retaliating, one should immediately recall that one’s goal is “*bhava uddha*,” which requires seeing the *asubha* nature and cultivating *mettā*. That one may not have much time left to get this done (*maranānussati*).

5. As is the case in many cases, those Four Protections have mundane meanings too. These could also be helpful. Following are the mundane meanings.

- *Buddhānussati* is to contemplate the nine supreme qualities of the Buddha. This is, of course, a good thing to do.
- *Asubhānussati* as contemplating the “foulness for the body.” That is a misinterpretation. One could do *asubha bhāvana* to contemplate the real nature of the body. A given male or female body can be enticing when the body is young, but they will both degrade with time.
- *Mettānussati* is to keep repeating, “May all beings be happy and healthy.” Again, not a bad thing to do.
- *Maranānussati* as reciting “*jīvitam aniyataṃ, maraṇaṃ niyataṃ*” or “this life is impermanent, death is a certainty.” While the statement is true, recitation alone cannot do much to remove defilements and purify the mind.

Aniccānupassanā, Dukkhānupassanā, Anattānupassanā, Asubhānupassanā

6. **Now let us discuss *anupassanā*.** In contrast to *anussati*, *anupassanā* is more relevant to formal meditation.

- “*Passa*” means to “get rid of,” as we mentioned while interpreting “*assa passa*” in discussing *ānāpāna bhāvanā*.; see #3 of “[7. What is Ānāpāna?](#).”
- Therefore, *anupassanā* means getting rid of defilements according to the prefix used in front.
- While there are four types of *anupassanā*, three are associated directly with *Tilakkhaṇa*: *aniccānupassanā*, *dukkhānupassanā*, *anattānupassanā*, and fourth is *asubhānupassanā*. [See; [WebLink: suttacentral: Patisambhidāmagga Paññāvagga 3.9. Vipassanākathā](#) for *aniccānupassanā*, *dukkhānupassanā*, *anattānupassanā* and [WebLink: suttacentral: Itivuttaka 85 Asubhānupassīsutta](#) for *asubhānupassanā*]

- Normal humans take this world to be of *nicca*, *sukha*, *atta*, and *subha* nature. The key to *Nibbāna* is to realize the true nature: *anicca*, *dukkha*, *anatta*, and *asubha*.

7. Thus, *aniccānupassanā* means getting rid of defilements by contemplating on *anicca* nature.

- Similarly, *dukkhānupassanā* and *anattānupassanā* mean getting rid of defilements by contemplating *dukkha* and *anatta* nature.
- We have not discussed *asubhānupassanā* up to this point. This becomes more important for a *Sotāpanna* to get to the *Sakadāgāmi/Anāgāmi* stages by contemplating the bad consequences of sense pleasures that appear so enticing.

8. Therefore, for one trying to get to the *Sotāpanna* stage, the first three *anupassanā* are more important. However, *asubhānupassanā* cannot hurt (and even could be beneficial) because that helps calm the mind.

- We need to remember that the *tāpa* (or burning or “excited-ness of the mind”) comes from *kāmacchanda* and *vyāpāda*: greed and hate. Both arise due to excess greed or “blindness due to excess desire for sense pleasures”; see, “[The Cooling Down Process \(Nibbāna\) – How Root Causes are Removed](#)” and “[Kāma Guna, Kāma, Kāma Rāga, Kāmacchanda](#)”.
- For anyone interested in meditation, such basics need to be understood: “[Living Dhamma – Fundamentals](#).” I can see from the discussion forum that many people worry too much about “deep concepts” without a proper understanding of fundamentals.

Understanding *Dhamma*: A Step-by-Step Process

9. We also need to keep in mind that one cannot just start doing formal meditations on these *anupassanā*. It is a step-by-step process. One needs to understand *Tilakkhaṇa* (*anicca*, *dukkha*, *anatta*): “[Anicca, Dukkha, Anatta](#).”

- Even before that, one needs to get rid of the ten types of *micchā diṭṭhi* by cultivating the mundane eightfold path: “[Buddha Dhamma – In a Chart](#).”

The reason for that was discussed in the recent post, “[Buddha Dhamma for an Inquiring Mind – Part I](#).” **If one has either of the following two views, then it is NOT possible to comprehend *Tilakkhaṇa*:**

- The next life is going to be forever, in heaven or hell.
- This life is all one has. When one dies, it is over. No rebirth or hell or heaven.

10. There are many reasons why those two views will block the path to *Nibbāna*. Following are a few key reasons:

- Neither of the above views can accommodate the laws of *kamma*: That one’s actions WILL have consequences, which are much more complex than just leading to hell or heaven (and then getting stuck there forever).
- It is impossible to have a consistent picture (world view) without getting rid of wrong views like there is no rebirth process or the *gandhabba* concept is wrong; see, “[Micchā Diṭṭhi, Gandhabba, and Sotāpanna Stage](#).”
- If one has the above views, one cannot comprehend the *dukkha* nature. The fact that most future suffering is in the *apāyās* and that one needs to stay away from *dasa akusala* done with powerful and immoral *javana citta* that “power-up” such births in the *apāyā*.

Conclusions

11. I know that I keep repeating some things. But I can see many people skip essentials because they desire to get there quickly. I admire their enthusiasm but do not want people to have false hopes. On the other hand, “just learning concepts” is not enough either, so one MUST put all this to practice, i.e., stay away from

dasa akusala (and keep in mind that *micchā diṭṭhi* is the worst of them; see the post mentioned in #10 above).

- The bottom line is, if one can truly see the *anicca* nature, one will have the *anicca saññā* and will avoid *dasa akusala* with a high degree of fear of the *apāyā*: “*dukkham bhayattena*.”
- Thus one will automatically have *Buddhānussati*, the desire to reach *Nibbāna*.
- Furthermore, it will sink into the mind that those enticing things in the world are, in fact, of *asubha* nature (*asubhānussati*). One will also realize that all living beings are in the same boat and thus will have *mettānussati*.

12. Finally, one will also have *maranānussati* established in one’s mind: that one needs to make haste and cultivate the path before death comes, the timing of which is unknown.

- If one reads the [WebLink: dhammatalks.net: Maranasati Sutta \(AN 6.19\)](http://dhammatalks.net/Maranasati-Sutta-(AN-6.19)), it is clear that the Buddha advised *bhikkhus* to be keenly aware that death can come at any time and thus to CULTIVATE THE PATH without delay and that *maranānussati* was not a specific *kammaṭṭhāna*. [*kammaṭṭhāna* : lit. ‘working-ground’ (i.e. for meditation), is the term in the Com. for ‘subjects of meditation’; s.bhāvanā.]
- Another English translation of the *sutta* is: “[WebLink: suttacentral: Mindfulness of Death](http://suttacentral.net/Mindfulness-of-Death).”

Discussion of this post at “[WebLink: Anussati and Anupassanā – Being Mindful and Removing Defilements](#).”

12.19 **Myths about Meditation**

Early post; revised September 11, 2018; December 17, 2019; March 10, 2021

***Nibbāna* Is Not Possible With Rituals**

1. Once I attended a meditation retreat. Everyone was sitting down on the floor with crossed legs, but after a while, many people “could not endure the pain” and were stretching their legs out or were fidgeting. It was apparent (to me) that many people could not think about anything else but their pain due to the uncomfortable posture. That went on for two days. Other than those who were long-time meditators and were comfortable with the lotus position, I do not believe the others enjoyed the retreat that much.

- Such nonsensical “rituals” are part of the set of wrong views that one needs to remove before attaining the *Sotāpanna* stage. This particular practice is a “*sīlabbata parāmāsa*” or “engaging in rituals.”
- Such practices do not make sense. Sitting in the lotus position is not a requirement for meditation. Meditation is contemplation. That can be done in any posture, sitting, standing, walking, or lying down.

We Need to Know What to Meditate On!

2. It is helpful to think about the goal of meditation. The ultimate goal is to remove greed, hate, and ignorance from our minds and attain *Nibbāna*. One needs to understand the fundamental concepts of Buddha Dhamma first.

- But even for those who are just interested in achieving some “cooling down” from everyday stresses, it is the same fundamental idea at work. We need to keep greedy, hateful, and ignorant thoughts from arising in our minds. The more we do that, the more relaxed our minds will become.
- Many people automatically associate “breath meditation” with “Buddhist meditation” and spend years on it, and end up discouraged; see a person account, “[WebLink: PDF-file: Meditation-Experience-of-Paññobhāsa-Bhikkhu.](#)”
- The correct *Ānāpānasati Bhāvanā* is NOT breath mediation; see the posts at, “[Bhāvanā \(Meditation\).](#)”
- Purification of the mind is the way to achieve temporary relief to the mind. In the long run, it helps attain even the *Arahantship*. There is no one else monitoring one’s progress. It is one’s mind that is keeping tabs on one’s progress.
- When one does a “formal meditation,” one should sit in a comfortable position. It could be the lotus position for those who have practiced it. One could be in the lotus position for several hours when one gets good at it. It is just sitting in a chair for most people, one that is not too comfortable that one may fall asleep!

Bad Idea to Remove ALL Thoughts

3. Getting rid of evil thoughts can be and should be done ALL THE TIME. The Buddha said, “*bhāvanāya bahuleekathāya*.” That means “meditate as much as possible, whenever possible.” And it is done in all possible postures: sitting, standing, walking, and lying down.

- Ven. Ānanda is the only known person to attain *Arahanthood* while not in any of those four postures. He was making an all-out effort to become an *Arahant* before the first *Dhamma Sangāyanā* (Buddhist Council.) Only *Arahants* were able to attend. But since Ven. Ānanda was the only one who had memorized the whole of the Sutta Piṭaka; he needed to attend the *Sangāyanā*. The night before the *Sangāyanā*, he had been exhausted by the effort. But he was still thinking about a Dhamma concept while getting into the bed. He sat down on the bed and raised his legs to lie down. Before his head touched the pillow, that particular point came clear to him, and the “*Arahant phala citta*” was realized.

- Another story from the *Tipiṭaka* relevant to #1 above is about a minister of King of Kosala, named Santati. He attained *Arahanthood* while listening to a single verse by the Buddha: “[WebLink: tipitaka.net: Dhammapada Verse 142](http://WebLink:tipitaka.net:Dhammapada Verse 142).”

Removing ALL Thoughts Lead to Births in the *Asaññā* Realm

4. I have seen many meditation programs that describe *Nibbāna* as removing perception or *saññā* from the mind.

- Many people wrongly advise that one needs to remove ALL THOUGHTS from one’s mind to attain *Nibbāna*. One time a *Deva* expressed the same idea to the Buddha: “Isn’t *Nibbāna* attained via removing all thoughts?”. The Buddha replied, “No. *Nibbāna* is realized by removing greedy, hateful, and ignorant thoughts.” That account is in the “[WebLink: suttacentral: Manonīvarana Sutta \(SN 1.24\)](http://WebLink:suttacentral:Manonīvarana Sutta (SN 1.24)).”
- Some others say that when a thought comes to the mind (about a loved one, a place, or anything material), to say “that does not exist” and forget it. Just because the Buddha said everything changes rapidly, he did not mean phenomena did not exist. Things do not exist for eternity either, because they are continually changing. That is the same argument that we discussed in “[What Reincarnates? – Concept of a Life-stream](http://WebLink:What Reincarnates? – Concept of a Life-stream)”: the Buddha rejected both “self” and “no-self.” *Paṭicca Samuppāda* explains all phenomena. They arise due to causes and would not occur if such reasons are absent.
- If one cultivates *asaññā* meditation (by removing all thought that come to the mind), may be born in the realm of *asaññā Arahmā*. In that realm, no thoughts arise in mind. One would stay there for a very long time, only to come back to the human plane and start the rebirth process all over.
- **All the above meditation techniques are dangerous.** As one develops them, one may become forgetful; *saññā* or perception is a critical mental factor associated with recognizing external objects. If one starts losing memory, that will be a sign that one is on the wrong path.

Nibbāna is the Removal of Greed, Anger, and Ignorance

5. An *Arahant* has not removed the capacity to generate thoughts OR perceptions. **An *Arahant* has removed greed, hate, and ignorance (about the Four Noble Truths).** Thoughts arise in him/her with *saññā*, i.e., he/she can identify people or things. They can experience the whole world just like any other human: they can see, hear, taste, smell, touch, or think about any place.

- The only difference is that an *Arahant* will not generate any greedy, hateful, or ignorant thoughts about anything.
- The concept of *Nibbāna* is straightforward: “*ragakkhaya Nibbanam, dosakkhaya Nibbanam, mohakkhaya Nibbanam*”. [Extinction of greed (or desire), hatred (or aversion, anger), ignorance (or delusion) gives rise to *Nibbāna*.]

Nibbāna Is Approached With the Removal of Greedy, Angry, and Unwise Thoughts

6. And one CAN experience the “cooling down” as one makes progress on removing greed, hate, and ignorance, even before the *Sotāpanna* stage. Instead of becoming forgetful, one’s mind will become more sharp and alert. One will be able to remember things BETTER, not less. One will become happier, not gloomy or depressed. **It is hard for ordinary people to fathom how much stress is associated with a mind contaminated with greed, hate, and ignorance.**

- The constant stress in an average human mind arises due to greed, anger, and ignorance. That is why people seek sense pleasure, basically to get some relief. But the problem is that any such relief is temporary. Furthermore, many people do immoral things to get such pleasures. So it can make things much worse. Not only does one not get permanent relief, but one will have to pay for the bad kamma that were accumulated by such immoral acts (lying, stealing, sexual misconduct, etc.).

- That is why one can feel the relief right away when one starts living a “clean, simple life.” That should be the “base” for beginning meditation. It is impossible to make any progress, no matter how much time one allocated to “meditation”, if one is engaged in immoral behavior. One needs to start reducing the BIG EIGHT.
- What the Buddha prescribed was simple yet profound. As one clears the mind of the five hindrances (*pañcanīvaraṇa*) via living a clean life AND start doing the proper *Ānāpānasati Bhāvanā*, the progress will accelerate with time because one's mind start being able to see more clearly. One will be able to quickly grasp the real meaning of *anicca*, *dukkha*, *anatta*.

Do All Things “Appear, Destruct in a Moment, and Re-Appear”?

7. Another series of “*desanā*” that I listened to described how an advanced meditator could actually “see” the “formation/breakup” of the material world. That person says that one could see the “impermanence” described in the “[The Grand Unified Theory of Dhamma](#)” post. He explained how he got so afraid when the “world disappeared” momentarily before re-formation!

- A *citta* never arises as a single unit. It appears in a *citta vīthi* (series of *cittā*) which generally have 17 *citta* if the *citta vīthi* occur due to an external sense input coming through one of the five physical sense inputs (eyes, ears, nose, tongue, and body). And that there are many billions of thought moments per second. **However, only a Buddha can actually “see” such a fast time scale.**
- The Buddha described to Ven. Sāriputta such minute details in summary form, and it took Ven. Sāriputta, and his immediate followers, hundreds of years to finalize a detailed description of mental/physical phenomena based on such information provided by the Buddha. They were able to complete the *Abhidhamma Piṭaka* only by the third *Dhamma Sangāyanā*.
- Even in many textbooks on *Abhidhamma*, sometimes it is stated that “.. *rūpa* is very short-lived – it endures only for 17 conscious moments. What arises is almost instantly gone”. That is wrong! That is the lifetime of a “*hadaya rūpa*.” A *hadaya rūpa* is generated in the *hadaya vatthu* by a sense event through one of the five physical senses. The lifetime of a *hadaya rūpa* is the time taken to experience that external sense event, i.e., 17 thought moments. (During that short time, the mind grasps an impression of the external *rūpa*); see, “[Does any Object \(Rūpa\) Last only 17 Thought Moments?](#).”

Fake Teachings Are Not Restricted to *Mahāyāna*

8. The problems with *Mahāyāna* teachings have become apparent due to the advances made in science and technology. See, “[Key Problems with Mahāyāna Teachings](#)” and “[Saddharma Pundarika Sutra \(Lotus Sutra\) – A Focused Analysis](#).”

- However, some of the “fake teachings” that I mention in this post originated in *Theravāda* countries, particularly in Sri Lanka. That is why it is critically important to learn pure *Dhamma* before or, at least, during meditation.
- How can one follow the path of the Buddha without knowing the actual path? “*Bhāvanāya pahātabbā*” (or removal of defilements via meditation) comes AFTER “*dassanena pahātabbā*” (or eradication of defilements due to wrong views via understanding the true Dhamma.) That is also why *Sammā Diṭṭhi* is first and *Sammā Samādhi* is last in the Noble Eightfold Path.
- I highly encourage everyone to read as many posts as possible to learn about Dhamma. Regardless of one's familiarity with Buddha Dhamma, one should read those posts in the “[Moral Living and Fundamentals](#)” section at least once because they provide the foundation. I know from experience the following. It is hard to comprehend the related advanced material if one does not get the basics right.

“Feeling Better” Does Not Necessarily Indicate That One Is on the Correct Path

9. In “weeding out” the wrong approaches, a key point to understand is that there are many ways to “feel better.” A drug user can instantly get into a “relaxed state of mind” by taking a drug. We don’t do that because (i) we know it is a temporary solution, AND (ii) it has terrible consequences.

- Getting “addicted to” *anāriya* (non-Buddhist) meditations like breath or *kasīna* meditation is only somewhat better. Many get addicted to them because they do not seem to have any adverse consequences in this life. Even though that may be true, they do have harmful implications for the long term because one is wasting one’s precious time in this human life on something that does not help in avoiding rebirth in the *apāyā*.
- Just because one starts feeling better using a particular technique does not mean it is THE solution. That is why one needs to look at the UNDERLYING BASIS of that approach. I have come across several groups where they are convinced of their “technique” because they “feel better” with what they do. As we just discussed, a “good experience” does not rule out a “better experience” with the correct approach.
- **The only way to make a sound judgement of “any theory” or “approach” is to critically examine it and see whether it can explain the realities that we see around us.** Can it explain why people are born different? Similarly, why some live relatively better than others, why do only some people get horrible diseases, why do animals experience pain but still cannot do anything about it (i.e., why they have limited minds)? Only pure Buddha Dhamma can explain all these and more.

Formal and Informal Meditations

10. Finally, once one looks at the evidence and decides on the Path, meditation can be “formal” or “informal.” To engage in formal meditation, one allocates a time and place, and it could be any of the following:

- Conventional sitting or walking meditation session. But this is not the only formal way to meditate.
- Listening to a Dhamma discourse delivered by an *Ariya* (one who has grasped *anicca*, *dukkha*, *anatta*) is an excellent formal meditation session.
- Reading (and contemplating) on a Dhamma concept, say *anicca*, is also formal meditation. If one reads/listens when the mind is calm, one will grasp more.

11. Informal meditation is possible at any time, anywhere.

- Merely thinking about a Dhamma concept or trying to clarify a Dhamma concept is meditation. That can happen at any time. While lying in bed trying to fall asleep, waiting at the doctor’s office, riding a bus or subway, etc. Instead of daydreaming or generating greedy, hateful, or useless thoughts, one could spend that time contemplating Dhamma.

Suppression or Removal of Five Hindrances Lead to *Samādhi*

12. In all these cases, one can experience a calming effect due to the five hindrances’ suppression. That can lead to even deeper *Samādhi* if one’s mind becomes focused on the Dhamma concept. One could develop a habit of doing informal meditations. **But avoid doing that while driving or even when concentrating on a task at work! That WILL have terrible consequences. One needs to use wisdom (being mindful of consequences) while cultivating understanding.**

- Five hindrances discussed at [“Key to Calming the Mind – The Five Hindrances.”](#)

Next, [“Is Suffering the Same as the First Noble Truth on Suffering?”](#),

12.20 A Simple Way to Enhance Merits (Kusala) and Avoid Demerits (Akusala)

Revised February 28, 2019; revised May 17, 2019; August 22, 2022

1. This is an important post that should be read carefully. Grasping the basic concept here can prevent many akusala kamma (unmeritorious deeds) and boost the power of a *kusala/puñña kamma* (meritorious deeds). In addition, it shows the consistency and universality of Buddha Dhamma.
2. The potency of a kamma (good or bad) depends on two key factors. First we need to clarify some basic ideas.
 - Any action or speech originates as a “thought”. As described in the Abhidhamma section, a citta is of duration much less than a BILLIONTH of a second. Such fast thoughts do not even register in our minds. Once in a while a burst of citta on a given object gets latched on and stays long enough to register in our minds. Then we consciously think about it and make a decision.
 - For example, when I walked to the kitchen to make tea this afternoon, it started as what seemed to be thought of as “having a tea.” In reality, that “thought” itself was due to billions of citta going through my mind; the initial “vague idea of having a tea” very quickly got built up by numerous follow-up citta until I had to get up and walk to the kitchen.
3. Most such “initial thoughts” just do not cascade into strong enough thoughts to make us physically move or even speak out. If the “impulse of the thought” (or “*javana*”) is not strong enough, we just disregard it.
 - If you think about it, you will realize that thousands, millions of stray thoughts pass our minds each day. When we ride a bus just staring out of the window, we see zillion things go by and each thing seen is a thought. We do not remember most of it afterward.
 - On the other hand, powerful sense inputs prompt us to instantaneous action or speech. Sometimes, we just stay on that stream of thoughts: some people laugh out loud just thinking about a happy event. Other times, if thoughts of a hated person come to mind, one’s face gets dark, and muscles get tightened.
 - A mother hearing her child cry out is lifted out of her seat instantaneously: She hears the cry in a series of “*citta vīthi*” of “thought streams” coming through the ear door. Subsequently, millions of “mind-door” *citta vīthi* run within a fraction of a second, identifying that it is a crying sound and it is coming from her child. Subsequently, millions more *citta vīthi* start running, trying to analyze what could be the problem, and then more *citta vīthi* will prompt her to get out of the seat and move towards the source of that sound. All this happens within a fraction of a second, without her being consciously aware.
4. Not all thoughts on the same subject have the same *kammic* power.
 - If some insects get killed while someone is walking on the ground or while cleaning the house, that will have no *kammic* consequences; because the intention associated with those actions was not to kill any living being.
 - As we will see below, **several key things contribute to the *kammic* power: the intention, what kind of knowledge is behind that intention, and whether one does the act enthusiastically are all key factors.**
5. Now let us take an example to see how these different factors contribute to the strength of a kamma. Suppose a person who does not know that stealing is a bad thing to do and that it will have bad consequences steals something from a shop. Since **he does it with the wrong vision (ten types of *micchā dīṭṭhi*), he does not feel remorse for it.** Thus the *kammic* strength is very high; see “[Micchā Dīṭṭhi, Gandhabba, and Sotāpanna Stage.](#)”
 - But if he does it on the urging or prompting of another, then it will have less strong *kammic* consequences since he did not think about doing it on his own, and thus the “*javana*” or the “impulse power” of the citta is less strong.
 - Now, if he comes up with the idea of stealing by himself AND enjoys doing it, that is the worst.

6. So, now we can see different levels of *kammic* strengths associated with the SAME ACT of stealing:

- 01 If done with wrong vision, with pleasure, and without prompting, it will have the highest strength (of course, this will be the highest BAD strength).
- 02 If done with wrong vision, with pleasure, and with prompting, it will have the next lower strength.
- 05 If done with the wrong vision, with a neutral feeling, and without prompting, it will have the next lower strength.
- 06 If done with the wrong vision, with a neutral feeling, and with prompting, it will have the next lower strength.
- 01 *Somanassasahagatāṃ diṭṭhigatasampayuttāṃ asaṅkhārikāṃ ekāṃ.*
- 02 *Somanassasahagatāṃ diṭṭhigatasampayuttāṃ sasaṅkhārikāṃ ekāṃ.*
- 05 *Upekkhāsahagatāṃ diṭṭhigatasampayuttāṃ asaṅkhārikāṃ ekāṃ.*
- 06 *Upekkhāsahagatāṃ diṭṭhigatasampayuttāṃ sasaṅkhārikāṃ ekāṃ.*

Now in the next four cases, the same act was **done by a person who did know that it was a bad act** and it will have bad consequences and would do it with at least some hesitation, and thus the “*javana*” or the “impulse of the thought” would be less, and consequently, the *kammic* power will be less. So, now we have the last four cases:

- 03 If done WITHOUT wrong vision, with pleasure, and without prompting, it will have the highest (GOOD) strength.
- 04 If done WITHOUT wrong vision, with pleasure, and with prompting, it will have the next highest strength.
- 07 If done WITHOUT wrong vision, with a neutral feeling, and without prompting, it will have the next highest strength.
- 08 If done WITHOUT wrong vision, with a neutral feeling, and with prompting, it will have the least strength.
- 03 *Somanassasahagatāṃ diṭṭhigatavippayuttāṃ asaṅkhārikāṃ ekāṃ.*
- 04 *Somanassasahagatāṃ diṭṭhigatavippayuttāṃ sasaṅkhārikāṃ ekāṃ.*
- 07 *Upekkhāsahagatāṃ diṭṭhigatavippayuttāṃ asaṅkhārikāṃ ekāṃ.*
- 08 *Upekkhāsahagatāṃ diṭṭhigatavippayuttāṃ sasaṅkhārikāṃ ekāṃ.*

7. Thus, it is clear that just having an understanding of Dhamma (that it is unfruitful to gain anything at the expense of other beings) will automatically make the *kammic* power less potent; but this “knowledge” is not the “book knowledge”; it is not effective if one has read about it, but the mind has not grasped it. Wisdom and “book knowledge” are two different things.

- If you think about it deeply, it should become clear that it is the comprehension of *anicca*, *dukkha*, and *anatta* that leads to true knowledge (*paññā*) and helps get rid of *avijjā* (ignorance). It involves understanding the true nature of this world and that one’s actions are bound to have consequences.
- It works in the other way too. Good actions will lead to good results.

8. Thus, the same reasoning is true for meritorious acts (*puñña/kusala kamma*). There are eight levels, depending on whether one does a meritorious act with/without knowledge, with joy/with a neutral feeling, and without/with prompting, just like in the case of the greed-based *akusala citta*. Let us take the case of someone donating to build a shelter for homeless people.

- This *kusala kamma* (meritorious deed) done with knowledge, joy, and without prompting has the highest merit.
- And THE SAME *puñña kamma* done WITHOUT knowledge, with a neutral feeling, and with prompting has the LEAST effectiveness.
- Thus the same deed done without comprehension of *Tilakkhaṇa* is a *puñña kamma*. The same deed done with comprehension of *Tilakkhaṇa* is a *kusala kamma*.
- The intermediate six are just analogous to the ones for the greed-based *akusala kamma*.

9. Let us examine how these categories play out in the real world for the above mentioned meritorious act of building a shelter for the homeless:

- If someone understands the value of giving, does it out of the kindness felt for those homeless people, does it without wishing for anything in return, and will be doing it with knowledge. And thus, it will be done without prompting and with natural joy in the heart, realizing that one is making a difference in many people's lives. This is the highest merit.
- If a person did the same deed, but initially it took some prompting from others or even him/herself, it was not spontaneous and thus will have somewhat less “*javana*” in the thought process.
- Those two scenarios without joy would have even less “*javana*” in the thought process. Here one may write a check and may not think much about it afterward. But in the above two cases, the person may stay engaged with the act of building the shelter and gains joyful feeling every time he/she thinks about it.
- Now, those four cases can be repeated for a person who does not understand the true impact of that action. The *kammic* power will be reduced accordingly. Thus a person who does not have an understanding of *kammic* consequences, the true nature of this world (i.e., that we all may go through such hard times or worse in other lives, etc.), just writes a check out of necessity, may be even to get some votes (i.e., prompting by oneself after seeing the benefits for one's political career) will have the least benefits.
- Thus understanding Dhamma (true nature of the world) leads to spontaneous meritorious actions done with a joyful heart; this leads to *saddhā* (true faith), *citta pasāda* (joy), and *adhimokkha* (resolve) to get the maximum impact of the impulse *kammic* power (*javana*). *Adhimokkha* (resolve) is a key factor in the *kusala-mūla paṭicca samuppāda*, see, “[Kusala-Mūla Paticca Samuppāda](#).”

Notes:

1. This post clarifies the types of different *citta* given in *Abhidhamma*. See “[Akusala Citta and Akusala Vipāka Citta](#)” and #4 of “[Conditions for the Four Stages of Nibbāna](#).”
2. There are two *akusala kamma* rooted in hate and two rooted in ignorance. The ways to sort those are different. I will write another post on them.
3. The above description is a simpler version of a post that I did recently: “[Javana of a Citta – The Root of Mental Power](#).” It may be a good idea to read that too.

12.21 Pañca Indriya and Pañca Bala – Five Faculties and Five Powers

Revised July 18, 2021; July 21, 2021

1. These are included in the 37 factors of Enlightenment; see, “[37 Factors of Enlightenment](#)”.
2. “*Indriya*” means leader. When cultivated an indriya becomes more powerful or “*Bala*”.
 - The five mental faculties (***Pañca Indriya***) are *saddhā* (faith), *virīya* (effort), *sati* (mindfulness), *samādhi* (concentration), and *paññā* (wisdom), and there are five corresponding powers (***Pañca Bala***).
 - Those two sets of five factors each are very important in following the Noble Eightfold Path.
 - The eye, ear, nose, tongue, and body are the five physical faculties (*indriya*). They are a different type of “*indriya*.” They are leaders in providing access to seeing, hearing, smelling, tasting, and touching. The ***Pañca Indriya*** are the “mental” leaders helping with comprehending **Dhamma**.
3. Let us first discuss the five faculties.
 - ***Saddhā*** is foremost; without faith (*saddhā*), one does not have the conviction to follow the Path. However, faith has to be based on wisdom (*paññā*), i.e., one’s faith is built upon seeing the truth of Buddha Dhamma, at least partially.
 - *Saddhā* comes from “*sath*” or truth and “*dhā*” meaning “*dhāranaya*” or “grasp”. Thus one will have *saddhā* when one grasps the true nature of this world (*tilakkhana*) at least to some extent.
 - Blind faith is actually a hindrance to progress since one will be following the wrong path. Furthermore, blind faith will not last long, since it is on a shaky foundation. *Saddhā* of a *Sotāpanna* is unshakeable, and will never be lost or even reduced.

Thus we can see the *saddhā* and *paññā* need to progress together.

4. When *saddhā* and *paññā* are developed to a certain extent (before the *Sotāpanna* stage), one realizes the fruitlessness and the dangers of the *sansāric* journey. Thus one is motivated to make an effort (*virīya*).

Furthermore, one realizes that one needs to be mindful in one’s actions, and thus **sati** (mindfulness) starts to build. One realizes that one has to act with *yoniso manasikara*.

At the same time, one realizes that when the mind is not calm, one can make bad decisions; thus one starts working on calming the mind and to attain a level of concentration (***samādhi***). Concentration is not really a good translation for *samādhi*; one does not need to force concentration; rather *samādhi* comes about when one takes precautions to not to get into “bad situations”; see, “[What is Samādhi? – Three Kinds of Mindfulness](#)”.

5. Different people have the five faculties developed to different degrees (developed in this life AND also carried from previous lives), and normally one could stand out. The Buddha has shown the following way to identify the predominance of different faculties in a person.

- If someone has a relatively more developed *saddhā*, that person is likely to be peaceful and helpful to others with a kind heart. He/she will have no trouble in following the first precept of not harming any other being.
- Then there are people who can easily bear hardships and are very determined; they have a developed *virīya* (effort) *indriya*. They can easily keep the second precept (not taking what is not given), and be satisfied with what one earns by one’s hard work.
- Those who do not pursue sense fulfillment aggressively have less *kāmachanda* and are not likely to have any problems with the third precept. They are likely to have a developed mindfulness (*sati*) faculty.
- When the *samādhi* *indriya* is strong, that person is likely to be quiet and does not like to engage in idle chatter; thus keeping the fourth precept on right speech will be easy for them.

- Someone with *paññā* (wisdom) will be able to comprehend *anicca*, *dukkha*, *anatta* easily and thus to realize the fruitlessness and the dangers of the *sansāric* journey. Such a person will be able to keep the hardest fifth precept on controlling the mind; see, “[The Five Precepts – What the Buddha Meant by Them](#)”.
6. Once one identifies the strong faculty, one should try to exploit that to move forward; the other faculties always pitch in to help, so they will grow too. It is important to cultivate all five faculties until they become powers (*Bala*), but one needs to exploit the predominant one.
- If someone tells a child, “this is not your actual Mom; she is somewhere else”, the child will not only refuse to believe that but will run to the mother and give a hug just to show how confident he is. In the same way, *saddhā* based on *paññā* can only make one’s resolve be strengthened by obstacles.
 - For example, when one does not have *saddhā*, one can be influenced to change the course by an outside influence. But if *saddhā*, built on *paññā*, is strong no matter how strong the influence is one’s faith will not be shaken.
 - The Buddha gave a simile to understand how *indriya* can become *Bala* to overcome difficulties: When a river runs into an obstacle like a large boulder, it splits and goes around it, and merge together after the obstacle. But the *indriya* needs to be strong enough to do that.
 - When *indriya* (faculties) are strengthened, they become *Bala* (powers).
7. When the faculties are being cultivated, it is important to try to balance them, while utilizing the predominant faculty’s power.
- Some people have *paññā* and may say, “it is useless to take precepts or chant “*Tisarana*” or chant/listen to *suttā*; it is better to learn Dhamma”. But those activities do help in getting the mind to be receptive to Dhamma; see, “[Buddhist Chanting](#).”
 - On the other hand, just reciting those verses is not enough. In order to recite them with understanding, one needs to learn Dhamma and cultivate *paññā*.
 - Normally, *saddhā* and *paññā* go together and need to be balanced. Similarly, *virīya* (effort) and *samādhi* (concentration) need to be balanced. For example, when doing formal meditation, too much of an effort can be a drawback for *samādhi*. As the Buddha told Sona the musician, the strings on a violin need to be just right, not too tight, and not too loose.
 - *Sati* (mindfulness) must be leading and must always be there.
 - *Sati* can be compared to the steering wheel of a car; *saddhā* and *paññā* can be compared to one set of wheels, and *virīya* and *samādhi* can be compared to the other set of wheels. The wheels must be in balance and the steering wheel must be kept at the correct position all the time for the car to go forward. If the wheels are not balanced, the car will just go in circles; if the steering wheel is not managed, the car will go off the road.
8. These five (*saddhā*, *virīya*, *sati*, *samādhi*, *paññā*) are *cetasika* (mental factors). They help define one’s character (*gati*) for the better, and these five are important ones to “take in” or “āna” in *ānāpāna sati*.
9. The five faculties exercise control in their respective domains: *saddhā* in the domain of *adhimokkha* (decision or resolve), *virīya* in *paggaha* (exertion), *sati* in *upatthāna* (awareness), *samādhi* in *avikkhepa* (non-distraction), and *paññā* in *dassana* (view or vision). When they become *Bala* (powers), they become unshakable by their opposites – indecision, laziness, negligence, agitation, and delusion or ignorance.
- It is important to realize the value of *citta pasāda* (joy) and *adhimokkha* (resolve) that results from *saddhā* based on true understanding: *adhimokkha* is an intermediate step in *Kusala-mūla paṭicca samuppāda* on the way to Nibbāna, see, “[Kusala-Mūla Paṭicca Samuppāda](#).”

- Also, *citta pasada* and *adhimokkha* that arise in doing meritorious acts with joy in the heart are key to optimizing the merits; see, “[A Simple Way to Enhance Merits \(Kusala\) and Avoid Demerits \(Akusala\)](#),” and “[Javana of a Citta – The Root of Mental Power](#).”

10. The five *indriya* become five *Bala* and are well balanced only for an *Arahant*. We can reap many benefits even before reaching that ultimate goal by cultivating them, making sure to try to keep them balanced.

- Even for an *Arahant*, there are some leftover “imperfections” even though they are not defilements; these are some “hard-to-get-rid-of” quirks in personal behavior. For example, there is this story about a very young *Arahant* who had the habit of jumping over puddles instead of going around them; he had been born a monkey for many lives in the recent past and had carried that habit over to this life.
- Only a *Sammā Sambuddha* (like Buddha Gotama) is perfect in every respect. This is why he is called “*Tathāgata*” (“*tatha*” for “what should be” or the “real nature”; pronounced “*thathāgatha*”).

12.22 Possible Outcomes of Meditation – Samādhi, Jhāna, Magga Phala

Revised May 30, 2018; February 10, 2020

Introduction

1. As we discuss in the “Bhāvanā (Meditation)” section, meditation is of two types.
 - One is done at all times, being “morally mindful.” Then the other type is the formal meditation where one contemplates on a given “procedure” while sitting down or walking.
 - In Buddhist meditation, the first is more important than the second.
2. Then there are three possible outcomes of meditation: *Samādhi*, *jhāna*, and *magga phala*.
 - One gets to *samādhi* by focusing the mind on one thing. Frequently a mind jumps incessantly from one thing to another. A sound pulls the mind one way, a sight another way, smell, etc., and the mind itself likes to jump around.
 - When one is thinking about a greedy or angry thought, the “scatteredness” of the mind is intensified.
 - Regardless of the cause, this makes the mind tired.

What is *Samādhi*?

3. *Samādhi* (“*sama*”+“*adhi*” where “*sama*” means “equilibrium” and “*adhi*” means “dominance”) means turning the mind towards an equilibrium state away from distractions (especially greedy, angry, or foolish thoughts.)
 - The opposite of the Pāli word “*sama*” is “*visama*.” When either the body or the mind gets “away from equilibrium,” that is “*visama*” and we become uncomfortable. [*sama* :[adj.] even; equal; level; similar. (m.), calmness; tranquillity. *visama* : [adj.] uneven; unequal; disharmonious.]
 - A good analogy is the following. We become restless if our environment becomes too hot. Then we try to find a way to cool ourselves. We get very uncomfortable if we are in a “too cold” environment also. Then we try to be warm by turning on a heater or wrapping ourselves with blankets.
 - However, if the room temperature is moderate and away from both those extremes, then we feel comfortable. We feel contented.
 - A similar effect takes place when the mind stops going to the extremes. A greedy or angry mind is in a “*visama*” state and is away from *samādhi*.
 - However, if the focus is a *dhmma* concept, then the mind moves toward “equilibrium.”

Getting to *Samādhi*

4. Unless one has experienced *Samādhi*, or especially *jhāna*, one may not even realize that one’s mind is always under stress. Of course, when a deadline approaches and the mind goes to overdrive, we notice that. One can truly appreciate this only after experiencing the tranquility of a focused mind. The mind gets “sensitized” as one gets to *Samādhi*.
 - Most people do not realize how “inherently stressed” our minds are. We get used to things and do not feel even hardships. Only when we get to a “better state,” we feel the difference, and then it is hard to go back to the “lower state”.
 - For example, one who has lived a life of poverty has gotten used to it. However, if one is able to upgrade the lifestyle to a higher level, then one can FEEL the difference and now it will be very tough to go back. One becomes “sensitized”. We will encounter this word “sensitized” in many cases when we discuss the *Satipaṭṭhāna sutta*.

5. There are three kinds of *Samādhi* when categorized according to morality, i.e., what the focus is on. There is *micchā Samādhi* and two types of *Sammā Samādhi*, one mundane (for living a better life) and one supermundane (focusing on *Nibbāna*).

- A suicide bomber who is assembling a bomb must focus on his task. Otherwise, he will blow himself up. He gets into a *micchā samādhi*.
- Most people meditate to get some “peace of mind”, to get some relief from the pressures of hectic life by focusing on the breath. That is a form of *samādhi*. When one focuses on a neutral object, like breath, one gets to such a “neutral kind of *samādhi*”.
- The best kind of *samādhi* is attained when one focuses on a *dhamma* concept, which takes the mind off *pañcanīvaraṇa*. See, “[Key to Calming the Mind – The Five Hindrances.](#)”
- There is a post on different types of *samādhi*: “[What is Samādhi? – Three Kinds of Mindfulness.](#)”

Jhāna* Is a Deeper Level of *Samādhi

6. *Jhāna* is a deeper level of *samādhi*, where the mind really gets absorbed in the object (*ārammaṇa*). Then the tranquility is optimized, and there are eight levels of *jhānā*. The first four are the ones experienced by beings in the 16 realms of the *rūpa loka*, and the last four in the 4 realms of the *arūpa loka*.

- *Jhānā* CANNOT be attained via *micchā samādhi*.
- The *jhānā* attained via *Sammā Samādhi* are two types, corresponding to *Ariya jhānā* and *anāriya jhānā*; see, “[Power of the Human Mind – Anariya or Mundane Jhānā](#)” and “[Power of the Human Mind – Ariya Jhānā.](#)”
- Even though one can get to *anāriya jhānā* by just focusing on the breath, it does require one to live a moral life. One who is not at least following the conventional five precepts will not be able to cultivate them; see, “[Jhānic Experience in Detail – Sāmaññaphala Sutta \(DN 2\).](#)”
- Of course, the uniqueness of Buddhist meditation is the supermundane *Sammā Samādhi*, leading to *Ariya jhānā*, and the four stages of *Nibbāna*.
- **However, one could be distracted from attaining a *magga phala* if one starts enjoying *anāriya jhānā*.** Therefore, it is best NOT to attain *anāriya jhānā*. However, some people can easily get to *anāriya jhānā* if they had cultivated *jhānā* in recent previous lives.

Permanent Removal of Suffering Attained Only With *Magga Phala*

7. Thus the highest levels of “peace of mind” are at the four stages of *Nibbāna* or *magga phala*: *Sotāpanna*, *Sakadāgāmi*, *Anāgāmi*, and *Arahant*. However, it is not necessary to PRACTICE *Ariya jhānā* to attain *magga phala*.

- For example, one could attain the *Sotāpanna* stage without practicing *jhānā*. What is needed for achieving the *Sotāpanna* stage is *upacāra/anuloma samādhi*; see, “[Citta Vīthi – Processing of Sense Inputs.](#)”
- Furthermore, unless one has practiced it before, a *Sotāpanna* cannot automatically get into a *jhāna*. However, it will be easy for a *Sotāpanna* to attain *jhānā* with practice.
- We need to remember that *jhānā* are mental states of higher-lying *Brahma* realms. They still belong to the 31 realms of “this world.” One needs to lose cravings for *ghanic* pleasures to attain the *Arahanthood*.

Jhāna* Not Necessary to Attain *Magga Phala

8. What is required to attain *magga phala* is *samādhi*. *Jhānā* are NOT necessary to achieve *magga phala*.

- We know that there are *jāti Sotāpannas* born in the human realm. But if a *jhāna* were REQUIRED to attain the *Sotāpanna* stage, then that person WOULD NOT be born in the human realm, but in a *Brahma*-realm corresponding that *jhāna*. Waharaka Thero emphasizes that in the following *desanā*:

[WebLink: PureDhamma: Listen to Are Jhāna Required for Magga Phala](#)

- Furthermore, just by listening to correct Buddha Dhamma and/or attaining *jhāna* does not make one become a *Sotāpanna*. The *Thero* points out that Devadatta ended up in an *apāya*, even though he had not only cultivated *jhāna* but had supernormal powers (*iddhi*) too. Devadatta listened to many discourses from the Buddha but was not able to attain the *Sotāpanna* stage of *Nibbāna*.

Getting to *Ariya jhānā* – Only After *Anāgāmi* Stage

9. One gets to *anāriya jhāna* by SUPPRESSING *kāma rāga* and *paṭigha*. One gets to *Ariya jhāna* by REMOVING *kāma rāga* and *paṭigha*. See, “[Power of the Human Mind – Ariya Jhānā](#).” But before one can use this technique to attain *Ariya jhānā*, one needs to attain the *Anāgāmi* stage.

- One sits down in a quiet place and first contemplates on *anicca, dukkha, anatta* nature. One then keeps repeating the following (or the English translation; what matters is one has to have the understanding.) “*Etam santam etam paṇītam, yadidam sabbasaṅkhārasamatho sabbūpadhipaṭinissaggo taṇhākkhayo virāgo nirodho nibbānan’ti.*” That means, “It is the only peace, the only happiness: prevent *saṅkhāra* from arising (via) eliminating *taṇhā* and excess greed and thus stopping the arising of defilements, which is *Nibbāna*.” [‘*etam santam etam paṇītam yadidam sabbasaṅkhārasamatho sabbūpadhipaṭinissaggo taṇhākkhayo virāgo nirodho nibbānan’ti*, which means, “It is peaceful (*santam*), it is supreme (*paṇītam*), which is the calming of *saṅkhāra* and breaking of bond (*upadhi*) via eliminating *taṇhā* and excess greed (*rāga*), and thus stopping the arising (*nirodho*) of defilements (*saṅkhāra, upadhi, taṇhā, and rāga*), which is *Nibbāna*.” AN 9.36 *Jhāna Sutta upadhi* : ‘substratum of existence’ or bond. In the Com. there are enumerated 4 kinds : the 5 groups (*khandha*), sensuous desire (*kāma*), mental defilements (*kilesa*), *kamma*.]
- The reciting of a certain phrase (meaningfully, with understanding) is called a “*kammatthāna*.” A given meditation technique is also called a *kammatthāna*.
- Two important points. (1). One can either say it out quietly or say it in one’s mind, (2) This is not chanting; just saying the words will be just a waste of time. One needs to comprehend, to some extent, what is meant by *anicca, dukkha, anatta, i.e.,* some idea of what *Nibbāna* (or “cooling down” is).
- If one has experienced any kind of “cooling down,” it is best to recall that while saying the above phrase. For example, if one does not flare up like one used to, or if one has less attachment to things, that is the best to recall.
- Unlike the *Sotāpanna* stage, it is relatively easy to confirm the attainment of *Ariya jhāna*. One must have REMOVED *kāma rāga* (craving for sensual pleasures, including the urge for sex) even to attain the first *Ariya jhāna*.

Summary

10. Thus reaching *magga phala* and *Ariya jhānā* REQUIRE the understanding of *anicca, dukkha, anatta*, the Three Characteristics of existence. Without the “correct vision” or *Sammā Dīṭṭhi* at some level, the mind does not see the unfruitful nature of sense pleasures or the “superiority” of *nirāmisa sukha*.

Next, “[Are you not getting expected results from meditation?](#)”,

12.23 What is Samādhi? – Three Kinds of Mindfulness

Revised May 16, 2019; revised February 13, 2021; December 10, 2022; January 30, 2023

What Is *Samādhi*?

1. *Samādhi* (“*sama*” + “*adhi*” where “*sama*” means “same” and “*adhi*” means “dominance”) means the object becomes the priority. Then the mind becomes focused on it. As we discussed in many posts, when the mind becomes focused on one object (*ārammaṇa*), the *ekaggatā cetasika* takes over and makes the mind latch “onto it.”

- That is how one gets to both *samādhi* and *anāriya jhāna* using breath meditation, just by focusing the mind on the breath. The goal here is to calm the mind by keeping it away from greedy and angry thoughts. As long as one keeps the mind focused on the breath, it cannot “run around and latch on to greedy/angry thoughts.”
- But that does not help eliminate the “deeply-ingrained defilements” or *anusaya*. That is why the “peace of mind” attained in a breath-meditation retreat goes away a few days after returning to regular activities.
- One gets to *samādhi* on whatever activity one gets absorbed in. Someone absorbed in an exciting book is in a *samādhi* too.

Many Kinds of *Samādhi*

2. Being mindful also depends on the situation. The mindfulness needed while driving a car differs from the mindfulness required to design something (or read a book). And the mindfulness required to attain a *jhāna* is different from those two.

- There can be numerous kinds of *samādhi*. There can be *micchā samādhi* too. For example, when setting up a bomb, one focuses on that and gets into a *micchā samādhi* (otherwise, the bomb may blow up.)

Here we distinguish three types of *samādhi* or mindfulness:

- Momentary mindfulness (*khaṇika samādhi*) [*khaṇika* : [nt.] momentary; temporary; changeable.]
- Access mindfulness (*upacāra*, pronounced “*upachāra*,” *samādhi*) where one stays longer in that state. [*upacāra* : [m.] neighbourhood; preparative or preliminary action.]
- Absorption mindfulness (*appaṇā samādhi*) [*appaṇā* : [f.] fixing of thought on an object; attainment of a trance.]

Let us discuss each type separately.

Momentary Mindfulness or *Khaṇika Samādhi*

3. We should always have **momentary mindfulness or *khaṇika samādhi***. Here we frequently change the focus from one object to another based on the need.

- We can use momentary mindfulness during the day when we are active. When we talk to someone, we should be mindful of what we say. The more one practices, the more one can control one’s speech by being mindful. It is the same with any physical activity too. When we are about to cross the street, we should be aware of the traffic, etc.
- Many people take this the wrong way, and use it as formal meditation. It is kind of silly to do the wrong “walking meditation” by saying “lifting the foot,” “putting it down,” etc., like a robot. That is what happens when Buddha’s teachings get distorted.

- For example, when driving, we need to pay attention to the road and apply brakes if the car in front gets too close. We must keep an eye on the traffic and be prepared to take quick action. Focusing the mind on the job at hand here translates to shifting the focus to different tasks optimally to drive the car safely.

Access Concentration or *Upacāra Samādhi*

4. **Maintaining concentration (*upacāra samādhi*)** is more focused. While reading an exciting book, one gets absorbed in it. One cannot be thinking about other things while reading.

- On the supermundane (*lokuttara*) side, when listening to a Dhamma discourse or reading about a Dhamma concept, one can get into access concentration or *upacāra samādhi*. **Reading a web post on a Dhamma concept can calm one down if done at a quiet time. Reading with understanding and a focused mind makes it possible to get into a somewhat deeper *samādhi*.**
- All following activities involve access concentration. A programmer writing computer code or a surgeon doing surgery, an architect designing a building, a scientist thinking about a new theory, etc. These are all mundane *Samādhi*. But one can still feel being in a trance if one gets absorbed in any task.

Appaṇā Samādhi or Absorption in Concentration

5. ***Appaṇā Samādhi* or absorption in concentrations** can lead to a *jhānic* state with practice. Here one needs to find a quiet place, close one's eyes and concentrate on just one neutral object.

- In *Ariya* meditations, the focus is something related to *Nibbāna*. It could be a Dhamma concept or *Nibbāna* itself. But one must have attained a *magga phala* to get into such a *samādhi*.
- *Ariya Mettā Bhāvanā* is another.
- Both help a mind to “comprehend Dhamma” and cleanse it.
- In *anāriya* meditations, this object is usually either a *kaṣiṇa* object, the breath, or the stomach's falling/rising. **That only prevents a mind from accumulating more “gunk/defilements” but does not help cleanse existing gunk!**

Some Examples

6. Now, let us look at some general features of the three types.

- For someone with practice, it is possible to get into *appaṇā samādhi* (*jhāna*) very quickly. Thus the difference between the three types of *samādhi* is not in the time scale. Instead, it is on the goal or the situation at hand.
- Workplace or home accidents happen when one loses momentary mindfulness. If one loses attention/focus, one can pull the wrong switch, cut oneself while chopping vegetables, or even trip while walking.
- One can read something for hours and not get anything in, if the mind wanders off. One can meditate for hours and not get into *samādhi* if the mind wanders off.

Sammā Samādhi and Five Hindrances

7. In all these three types, achieving mindfulness comes naturally if the five hindrances do not cover the mind; see, “[Key to Calming the Mind – The Five Hindrances](#).”

- It is challenging to calm the mind if one has greedy or angry/hateful thoughts (*kāmacchanda* and *vyāpāda*.)

- Even a simple task can become aggravating and frustrating under the following conditions. One's mind is lethargic (*thina middha*), one is agitated by being high-minded or low-minded (*uddhacca kukkucca*), or one does not have a clear idea of the task (*vicikicchā*).

8. Thus, it helps to live a moral life, i.e., avoid the ten immoral actions as much as possible. See “[Dhamma Concepts](#).”

- If one is planning a “formal meditation session,” it pays off to make preparations ahead of time to set up a conducive mindset.
- Especially for the *upacāra* and *appaṇā samādhi*, one could get other tasks out of the way beforehand. Then meditation does not have to be interrupted in the middle. Simple things like going to the bathroom and ensuring one does not have a full stomach before sitting down to meditate can make a difference.
- Preliminary procedures, such as reciting precepts or offering flowers or incense to the Buddha before a formal meditation session, are also a part of “getting the mind ready.” That helps to attain “*citta pasāda*” or a “joyful mind.”

Sammā Samādhi* and *Sammā Sati

9. *Samādhi* is the endpoint of being mindful (*sati*).

- *Samādhi* is a synonym for the *cetasika* (mental factor) of *ekaggatā*, i.e., having a focus. One can cultivate it by being mindful the correct way, i.e., via mundane *sammā sati*.
- *Lokottara sammā sati* requires comprehension of the Four Noble Truths/*Paṭicca Samuppāda*/*Tilakkhaṇa*. See “[Sīla, Samādhi, Paññā to Paññā, Sīla, Samādhi](#).”

Different Types of *Samādhi*

10. It is also possible to get into *micchā samādhi*, the opposite of *sammā samādhi*. A master thief plotting a grand robbery can get focused and be absorbed in that immoral activity. The same is true for a serial killer planning a killing.

- Thus, there are three kinds of *samādhi* when categorized according to morality. One is *micchā samādhi*. The other two are *sammā samādhi*: one mundane (for living a better life) and one supermundane (focusing on *Nibbāna*).

11. One could get into *upacāra samādhi* by reading this post and paying attention to the material. One may need to read related posts or other articles to absorb the key concepts. When the minds get “absorbed in the issue,” it is in a state of *samādhi*. Of course, that is possible only if the material is interesting to oneself.

- If correctly done, one will have a lower heartbeat, and a calmer and more peaceful mind at the end of the reading session. People have attained even *magga phala* by attentively listening to Dhamma discourses.

12.24 **Getting to Samādhi via Formal Meditation Sessions****March 25, 2016; revised December 1, 2017**

1. It does make sense to do formal meditation even at the very beginning when one decides to follow the Path of the Buddha, but AFTER one has at least read about the correct interpretation of “[Anicca, Dukkha, Anatta](#).” In the following I will discuss the importance of a daily (or few days a week) formal meditation session.

- When one starts seeing the dangers of staying “in this world” (*anicca* nature), one needs to reassure the mind that there is an alternative, i.e., *Nibbāna* or *Niveema*. Thus, simultaneously with contemplating *anicca* nature, one needs to encourage the mind to taste the *nirāmisā sukha* that results from it by cultivating *samādhi*. A formal meditation session provides that.
- The Buddha gave a simile to explain this effect. In the old days, when people took to the oceans to look for new lands, they took caged birds with them. When they were lost and wanted to find whether they were close to land, they released a bird and shooed it away frightening it. The bird would fly around looking for safety (i.e., land) but will be forced to come back to the ship if no land is found; but if it can see land, it will not come back to the ship. When the mind starts seeing the dangers of *amisa sukha* or “worldly pleasures”, we need to encourage it to enjoy the *nirāmisā sukha*, i.e., that there is a better alternative.

2. Even before one gets to *jhānā*, one can experience “cooling down” when one engages in regular formal meditation. Looking back to my early days, I remember getting to some sort of *samādhi* while sitting at the desk and contemplating on a Dhamma concept. The body became light and breathing became slow due to the calmness of the mind.

- It is hard to feel “*samatha*” or “*samādhī*” if one is not sitting down or lying down.
- Furthermore, it gives one confidence that one is making progress if one can see the “improvement” in being able to stay in “*samādhī*” for longer times with practice. To emphasize, this *samādhī* does not need be a *jhāna*. It is just being able to stay in one place with a focused mind and with palpable lightness in the body and the mind.

3. Many people who do breath meditation say that it is a *samatha bhāvanā* to calm the mind BEFORE doing *vidassana* (insight) meditation. But that is a waste of time. One can get to *samatha* by doing *vidassana* (*vipassana*) or insight meditation.

- As I have discussed in other posts, one should find a quiet place and sit comfortably. One could start the session with *Tiratana vandana* to calm the mind; see, “[Buddhist Chanting](#).” One could make the room dark and light a candle and/or incense to “set the background”. Those activities help some people to get into the proper mindset.
- Then one could just start contemplating on a Dhamma concept. One could either listen to part of a *desanā* or read part of an essay and then start contemplating on that. This is insight meditation.
- Some people who do breath meditation have difficulty in maintaining their focus on the breath; other random thoughts start creeping in. However, if one starts seeing the value of Dhamma and becomes truly interested in learning Dhamma, it will become easier to concentrate on a Dhamma concept. **Thus one initially should pick a topic of interest to oneself.**

4. With time, it becomes easier to get to *samādhī* by gradually purifying the mind. But it is important to figure out which areas to focus on in order to gain maximum benefits.

- First, it is important to realize that there are two main categories of “bad deeds” that can have negative consequences; see, “[Lobha, Dosa, Moha versus Raga, Patigha, Avijjā](#)” for details.

- Those done with *lobha* (excess greed), *dosa* (hate), and *moha* (covered mind) can lead to birth in the *apāyā* (four lowest realms). Permanent reduction of *lobha*, *dosa*, *moha* to *rāga*, *paṭigha*, *avijjā* happens when one attains the *Sotāpanna* stage.
- Those done with *rāga* (craving for sense pleasures), *paṭigha* (friction), and *avijjā* (ignorance) can only lead to rebirth in the higher realms in the *kāma loka* (human and *deva* realms), and in *rupi* and *arupi brahma loka*. Thus one can concentrate on those after getting to the *Sotāpanna* stage, but one can start thinking about them too in order to help comprehend the *anicca* nature as discussed further below.

5. Therefore, our main goal should be to avoid those actions that can lead to rebirth in the *apāyā*, i.e., avoid those actions done with *lobha*, *dosa*, *moha*.

- In simplest terms, this means getting rid of *micchā diṭṭhi* and comprehending *anicca* nature. One of the strongest kind of *micchā diṭṭhi* prevalent today is materialism: One believes that at death one ceases to exist, i.e., one believes that the mind is a byproduct of the body (brain), and thus when the body dies, that is the end of story. This is also called *vibhava taṇhā*.
- It is a good idea to review the relevant posts on *micchā diṭṭhi* to make sure one understands them. The ten types of *micchā diṭṭhi* are discussed in “[Three Kinds of Diṭṭhi, Eightfold Paths, and Samādhi](#).” There are also many posts on “[anicca, dukkha, anatta](#).”
- Starting on the Eightfold Path for a *Sotāpanna Anugami* begins with getting rid of *micchā diṭṭhi*, comprehending *anicca*, and thereby comprehending first stage of *sammā diṭṭhi*; see, “[Buddha Dhamma – In a Chart](#)” and the post in there.

6. By sorting out priorities (the order of things to be done), we can save a lot of time in getting to the *Sotāpanna* stage.

- One has the potential to be born in the *apāyā* if one has remnants of *gathi* suitable for those four realms; there are many posts on *gathi*, *bhava*, and *jathi* at the site to read and contemplate on.
- It is imperative to be mindful and avoid actions compatible with “*apāya gathi*.” In the meditation sessions, one could think back to the previous few days and see whether there were any such instances and make a determination to not to repeat such acts. Once it becomes a habit, one can even catch oneself doing it and stop right then.
- For example, if someone does something bad to you, and if you start thinking about “how to get back” in retaliation, that is done with hate and need to be stopped. However, it is OK if one “gets mad” momentarily at such an unprovoked, harsh act by someone. It is only at the *Anāgāmi* stage that one will automatically stop “getting mad”. Even then there may be some annoyance at that person. Only an *Arahant* has perfect *upekkha* and will not be bothered to the slightest by ANY provocation.
- Another example is extreme greed (*lobha*) where one tends to do “whatever it takes” to get what one wants, and also wishing that others should not get those things. Enjoying sense pleasures (*kāma rāga*) that are acquired through legitimate means is not a hindrance to attain the *Sotāpanna* stage. Thus engaging in sex with a spouse is done with *kāma rāga*, but that with another’s spouse or a child, for example, is done with *lobha*.
- A successful meditation program goes hand in hand with a moral lifestyle. They feed on each other.

7. It is also very important to be aware of the *dasa kusala*, *dasa akusala*, and also *puñña kiriya*; see, “[Kilesa – Relationship To Akusala, Kusala, And Puñña Kamma Kamma](#),” “[Ten Immoral Actions \(Dasa Akusala\)](#)” and “[Puñña Kamma – Dāna, Sīla, Bhāvanā](#).”

- *Puñña kriya* help one attain the right mindset for meditation. Also, *puñña kriya* increasingly become stronger *kusala kriya* as one’s understanding of *anicca*, *dukkha*, *anatta* grows.
- A *Sotāpanna* has COMPLETELY removed only *micchā diṭṭhi* from the *dasa akusala*. Only an *Arahant* is completely free from *dasa akusala*; see, “[What is the only Akusala Removed by a Sotāpanna?](#).”

- Of course, the tendency to do *dasa akusala* start decreasing from the time one starts on the mundane eightfold path, even before the Noble Eightfold Path; see, “[Buddha Dhamma – In a Chart](#).”
- In terms of Abhidhamma, the *apāyagāmī* strength of all *dasa akusala* will be removed at the *Sotāpanna* stage due to the removal of the 4 *diṭṭhi sampayutta lobha citta* and the *vicikicchā sampayutta moha citta*; see, “[Akusala Citta – How a Sotāpanna Avoids Apayagami Citta](#).” Thus if a *Sotāpanna* commits any of the remaining 9 *akusala kamma* their strength would be much reduced, because one has removed *gathi* suitable to be born in the *apāyā*, mainly by getting rid of *micchā diṭṭhi*.

8. Many people worry about sense pleasures way too early. It is not necessary to forcefully suppress normal sense desires before the *Sotāpanna* stage, even though it may happen to some extent automatically. *Kāma rāga* (and *paṭigha*) are removed via the *Sakadāgāmī* and *Anāgāmī* stages.

- If a vessel is leaking due to multiple holes, one needs to fix the bigger holes first. Trying to plug small holes which are leaking slowly, while water is draining rapidly through gaping big holes, is a waste of time.

9. On the other hand, contemplating on the bad consequences of sense pleasures can lead to a better understanding of *anicca* (unfruitfulness of worldly things) and the First Noble Truth. In addition to the suffering due to obvious causes such as an ailment or a headache, we are not even aware of most of the suffering that we endure.

- In fact, in a twisted way, **we perceive most of our sufferings as enjoyments**. It is a “made-up” enjoyment and is called “*assāda*” (***āsvāda* in Sinhala**).
- This is also a good “meditation topic”, and could help one to get to *samādhi*. However, this should be done when one can come to a stage where one starts to comprehend such concepts. Each person is different, so one should keep trying different options.

10. For example, we enjoy eating, especially if the food is tasty. But why do we have to eat? This seems like a foolish question, but there are beings (*brahmā*) who do not need to eat anything. They are sustained by their *kammic* power (previous good *kamma*). *Devas* have to consume *amurtha* to sustain themselves, but that is a very fine food and there is no residue (i.e., they do not defecate or even sweat).

- On the other hand, we have to work hard to make money to buy food, spend time and energy to cook, and then “enjoy a meal” that lasts may be half an hour.
- But all that suffering (working to make money, going to grocery store, cooking, etc) is masked by “made-up mind pleasures” or *assāda*: We look forward to that meal and forget about all that suffering!
- On the way back from work we may start getting hungry, but that will be masked because we will be thinking only about the meal that is waiting for us.
- Is this any different from a cow who pulls a heavy cart, but forgets about all that suffering because it is focusing on a bundle of hay dangling in front of it?

11. Let us consider another type of hidden suffering that is associated with cleaning ourselves. In the morning, we brush our teeth, take a shower, shave, apply all kinds of fragrances and go to work very happily. We don’t even notice the hidden suffering associated with all that work!

- One could experience another facet of that suffering if one can skip a day or two of doing those things. It will be very uncomfortable even for ourselves let alone for the others.

12. In fact, most of the things that we do in a given day are done to just maintain our bodies, our houses, our environment in a presentable condition. Yet, we do not see the suffering associated with all those activities. That is another way to comprehend *anicca* nature.

- **One may think that thinking about such things could make one depressed. That is certainly possible if one did not know about the *anicca* nature, and also that by following the 37 Factors of Enlightenment one can be released from that suffering.**

- The comprehension of the true (*anicca*) nature of this world, and the hidden sufferings associated with it gives one “*anuloma shanthi*.” This is the joy that comes from grasping the true nature of this world.
- Then by realizing that there is a way to REMOVE future suffering (by following the 37 Factors of Enlightenment), provides one with “*sammatta niyama*.”
- Thus as one makes progress, it is a good idea to think about specific cases where one has gained a “peace of mind”. That itself can lead to *samādhi*. One needs to realize BOTH the dangers of the rebirths process (*anicca* nature) AND the benefits of following the Path (*Niveema* or cooling down).
- When one starts experiencing BOTH *anuloma shanthi* and *sammatta niyama*, one becomes a *Sotāpanna Anugāmi*, which inevitably leads to the *Sotāpanna* stage; see, “[Sotāpanna Anugāmi and a Sotāpanna](#).”

13. Finally, I want to emphasize the importance of trying to extend the duration of the formal meditation session gradually.

- At some point one will start feeling body sensations. And then the mind will “switch over” to a different state. When that first happened to me a few years ago, I was startled. At that point one could let the mind “take over”, i.e., stop contemplating and let the *samādhi* “grow” and possibly lead to *jhānā* (it is easier for those who have the *sansāric* habit; but *jhānā* are not necessary for *magga phala*). Now one has attained a higher level of *samādhi*. One could of course continue with insight meditation.
- This is when one starts feeling enhanced *nirāmisā sukha*. It is not really a “pleasurable feeling” in the sense of what you experience in eating a nice meal, listening to a favorite song, etc. It is rather a calmness of an unburdened mind. **Until one experiences it, one is not aware of the real stress that our minds are normally under. One comes out of the meditation session refreshed and alert.**
- I would say it is possible that one could start experiencing some kind of benefit when the session is naturally lengthened to half an hour or may be an hour. I am just basing this on my own experience. If people are willing to share their experiences, I can update this post in the future (or even present someone’s experience in a separate post). That could help motivate others.

12.25 Are you not getting expected results from meditation?

Revised December 1, 2017; January 27, 2023

Some people try to attain Nibbānic bliss by trying to “give up all attachment to this world” in their minds during meditation. However, until one’s mind truly realizes the dangers of this world (the rebirth process), the mind cannot give up those attachments.

- One has to attain at least the *Sotāpanna* stage by “seeing the true nature of this world” before one’s mindset becomes amenable to “giving up”. This is the hardest part to understand.
- Even before that, one needs to get rid of the ten types of *micchā diṭṭhi* as discussed below.

1. During the time of the Buddha there was a *bhikkhu* named Poṭṭhila, who was well-versed with deep Dhamma concepts and was a well known teacher; he had developed *abhiññā* powers as well, but had not attained even the *Sotāpanna* stage. His *desanās* (discourses) were deep and only those at the *Anāgāmi* stage (at least the *Sotāpanna* stage) could follow them and get to *Arahanthood*. One day he went to see the Buddha, paid respects, and told the Buddha that he had been a Dhamma teacher during the times of several earlier Buddhas too, and helped many to attain *Nibbāna* (*Arahantship*). [Bhikkhu Potila - see, **Poṭṭhilaṭṭhera Vatthu - Dhammapda verse 282**]

- The Buddha asked him whether he had attained any *magga phala*, and Bhikkhu Poṭṭhila admitted that he had not. The Buddha just commented: “*Thucca* Poṭṭhila” and turned his attention to other matters; *tuccha* (pronounced “thuchcha”) in Pāli and Sinhala means despicable or “lowly”.

2. So, *bhikkhu* Poṭṭhila, who had expected praise from the Buddha for helping others, realized that he needed to work on his own salvation before helping others. He strived by himself and could not make any progress; he was trying very hard to “give up all attachments”, following the instructions he gave others. But no matter how hard he tried, he could not succeed.

- When he sought help from other *bhikkhus*, they were reluctant to become his teacher because everyone knew he was very knowledgeable in Dhamma. Eventually, he went to this very young *Arahant* (well-known for his teaching abilities) and sought help. The young *Arahant* agreed to help, only if *bhikkhu* Poṭṭhila agreed to carry out everything as instructed, and Poṭṭhila agreed.
- The young *Arahant* decided to use an unusual *kammaṭṭhāna* (instructions). He took Poṭṭhila to a large area covered by mud, and asked him to wade into the mud and keep going until he told him to stop. Poṭṭhila started wading in the mud and kept going until he was told to stop when the mud was all the way up to his chin; he could barely move because the mud was heavy.

3. The *Arahant* told him, “if someone is stuck in the mud like that any knowledge about cleaning oneself by taking a bath is not going to help. One needs to get out of the mud first”.

- Then he asked Poṭṭhila to come back. Poṭṭhila had difficulty moving since he was up to his chin in thick and heavy mud. While dragging himself out of the mud with great difficulty, Poṭṭhila realized what the young *Arahant* was talking about. It is not possible to get out of mud until one realizes that one is stuck there, and getting out of mud requires sheer willpower. Similarly, he had not realized that he was stuck at a much lower moral level; he needed to cleanse his mind first.
- The “giving up” part comes with a mind that has removed the wrong visions (*micchā diṭṭhi*) and excessive greed for sensual pleasures. These cannot be removed **just by** reading or listening to them.
- The account of bhikkhu Poṭṭhila at “[WebLink: tipitaka.net: Dhammapada Verse 282](http://WebLink:tipitaka.net:DhammapadaVerse282)” and “[WebLink: ancient-buddhist-texts.net: Potthila the Empty-Head.](http://WebLink:ancient-buddhist-texts.net:Potthila-the-Empty-Head)”

4. Of course one can remove some of it by reading, listening, **and contemplating** the validity of the Buddha’s reasons, especially on *micchā diṭṭhi*. One has to realize that *kamma* (or one’s actions) are likely to have their results either in this life or the next, and thus the rebirth process must be valid. The remaining types of *micchā diṭṭhi* are also related to *kamma* and rebirth. The ten types of *micchā diṭṭhi* are discussed in “[Micchā Diṭṭhi, Gandhabba, and Sotāpanna Stage](#)”.

- The second level of removal of *micchā diṭṭhi* comes via comprehending *anicca*, *dukkha*, and *anatta*; ; see, “[Micchā Diṭṭhi, Gandhabba, and Sotāpanna Stage](#)”.

5. The simile can be made even better by looking at what happens to ants stuck in honey. Here unlike mud, the sensory pleasures are appealing and there is no incentive to get out. Those ants stuck in the honey, would not even try to get out because they are too busy enjoying it. **Even when they are barely stuck, and can move out of honey, they would not because they like the taste of honey.** Like that, any living being, whether a human or even the lowly worm, likes to indulge in sensory pleasures, and thus gets stuck.

- **And even when one realizes that one needs to get out of “the honey pot” it is hard, at least initially.**
- For that, one needs to see the perils of staying in this rebirth process, where birth in the lower four realms will lead to unimaginable suffering. Even if one can strive to be born in higher realms, that will not last long. **This is “*anicca*”: no matter how hard we try to find refuge in the 31 realms, it is impossible to do so in the long run.**

6. With much effort, Potṭhila slowly made his way up to the waist level, and started feeling the lightness of being free of mud. He could now move faster too. He felt relief when he was out of the mud and was asked to go and take a shower. Now, cleaning up with soap could be done; but while stuck in the mud, there was no use for soap and water. Just like that, the profound Dhamma he had memorized was useless to him while he was still stuck in the mud.

- Eventually, when one comes out of the mud, that is like the *Sotāpanna level*. One is still covered with mud, i.e., one still likes to enjoy sensory pleasure. But now one knows one needs to shower, use soap and shampoo, and remove all that mud.

7. What Potṭhila was doing was to give discourses on profound Dhamma that could help an *Anāgāmī* attain *Arahanthood*. Most of those who benefited from *bhikkhu* Potṭhila’s discourses were, ironically, *Anāgāmīs*. Potṭhila was just reciting the Dhamma without real comprehension but those who benefited could comprehend the true meanings. After that *kammaṭṭhāna*, Potṭhila was able to attain the *Sotāpanna* stage and soon became an *Arahant*.

(By the way, one cannot attain the *Sotāpanna* stage by taking instructions from an *Anariya*, i.e., one who had not attained at least the *Sotāpanna* stage. But once one attains the *Sotāpanna* stage, one can learn by himself or from anyone else and get to the higher stages. This is why it was only *Sotāpannas* or above (mostly *Anāgāmīs*) who could benefit from *bhikkhu* Potṭhila’s discourses).

- I believe this actual incident involving *bhikkhu* Potṭhila highlights a very important point. No matter how much one reads on deep concepts of Dhamma, it is hard to get the idea to sink in unless one’s mind is purified to a certain extent. It is critical first to break through the heavy fog of being covered by many wrong concepts and strong attachments. When one breaks through that initial “wall of resistance,” it is easier to comprehend more profound concepts; see “[Lobha, Dosa, Moha versus Raga, Patigha, Avijjā](#).”

8. One needs to make progress systematically. Just like it is impossible to learn high school math without learning basic addition/subtraction, one MUST understand the basic concepts first. Suppose one is engaged in killing, stealing, sexual misbehavior, lying, gossiping, getting “drunk” with alcohol, drugs, power, beauty, money, etc. In that case, it is impossible to calm the mind to a basic level. **And this is the hard part.** One is stuck in the mud (more like honey, because it feels good to be stuck there).

- And while stuck in the mud (or honey), no matter how much meditation one does, it is not possible to get LONG TERM relief. One may be able to go to a meditation retreat and be away from all those “honey-filled” attractions and enjoy some sense of calmness; but that goes away soon after coming back to “real life” with all those temptations.
- One needs to slowly work through the mud (or honey, because that is how it initially seems). This is the HARDEST part. No matter how much one READS, that will not make much difference until one sets up the stage for the mind to see reality.

- By the way, this is also why those who meditate on “there is no self” (there is no ‘me’) cannot make any progress either. One needs to comprehend the “pointlessness in striving to accumulate material things for oneself” first. **If one could tell a full blown lie, hurt someone else, sexually misbehave, etc, then isn't that done to gain something for “me”?**

9. Here is a rough step-by-step I would recommend (this is of course not for everyone; just for those who know they are stuck in honey):

A. If one is hurting others for sensory pleasure, that should be stopped first. It is double jeopardy; one is “getting stuck” due to excessive greed and suffering the consequences of harming others. One is getting attached to “pleasurable things” and accumulating bad *kamma* by hurting others.

- For example, if one is killing animals for fun (sport), stealing valuables from others, having sexual relationships with other married people or young children, planning to hurt someone (even for retaliation), or spreading rumors about someone to get some pleasure out of it, getting drunk and verbally/physically abusing others, all those would be included here.
- **Such immoral activities are the worst, and are called “*pāpa kamma*”. Both *lobha* and *dosa* (*dvesha*) are involved here and one's mind is said to cover with ignorance (*moha*); see, “[Lobha, Dosa, Moha versus Raga, Patigha, Avijjā](#).”**
- Thus someone in this stage is deeply in mud up to the chin.

B. One notch lower is being capable of doing things (of course not always) with EXTREME greed, even if it does not hurt others directly; here, one is only up to the waist to shoulder level in mud. These are usually the things one does to seek “perceived happiness” by going to extremes.

- When one cannot get “high enough” with alcohol, one tends to try drugs, because one has been “de-sensitized”. We all know of many movie stars etc., who get into this trend and end up committing suicide because nothing at the end can bring more pleasure to a highly “de-sensitized” mind.
- Another indication of extreme behavior is living beyond one's means. This is, of course, relative. If one lives in a small (but comfortable) house and wants to move into a bigger house **by stretching one's resources**, that is a sign of extreme greed. If one is already living in a mansion that one has inherited or earned, and there is no financial burden, then there is nothing wrong with that since that will not burden the mind. However, in general, the fancier the item is, whether a house, car, or anything else, it usually takes more time and effort to “maintain.” Inevitably, that leads to a higher stress level.
- Such extreme greed could also lead to actions of hate, when someone else gets in the way. Then one may do “*pāpa kamma*” here as well; actions of hate may get one into more trouble.

It is not possible to discuss all possibilities, but one should be able to figure out many such cases. No one else can decide these for anyone. Only each person knows about one's status of mind. However, any sensible person can make judgements for oneself, but not for others.

C. If one is at stage A or B above, one should read those posts in the “[Moral Living and Fundamentals](#)” section. It could be helpful to read those as one progresses and see that one understands more things than previously. This is hard to explain but it is true. A clear mind sees things much more quickly.

- Those in stages A or B should read posts #1 through #3 below.

D. Once one gets to the B stage, one should start reading the “[Key Dhamma Concepts](#)” posts and learn and comprehend *anicca*, *dukkha*, and *anatta*.

This is the real key step to getting started on the next stage. Once one gets some traction, there is nothing to hold back someone from attaining the *Sotāpanna* stage. It had been hard for hundreds of years only because the correct concepts were hidden. Once one gets some traction, one can start doing any of the *bhāvanā*.

- As Carl Sagan said, “..think about all those emperors and kings who committed unmentionable atrocities to have a sense of superiority and power for maybe 50 years. They are all gone”; see, “[The Pale Blue Dot.....](#).” Even though Dr. Sagan did not know, that is another way to state what *anicca* is.
- All those emperors and kings will be stuck in the animal or lower realms for billions of years. On the other hand, a peasant who lived within his/her means and led a moral life could live in a *deva/brahma* realm for billions of years.
- The main point here is that there is no point in trying to seek sense pleasures or accumulate wealth for 80-100 years maximum because, in the end, we will not be able to KEEP ANYTHING to our satisfaction. We may have a billion dollars, but if our bodies are worn out, will we be able to get ANY sensory pleasure? Will we be able to keep any part of our bodies to our satisfaction? Many try to “beat the aging process” by using temporary fixes such as botox, but any such effect will also be temporary.
- It is impossible to grasp the meaning of *anicca*, *dukkha*, and *anatta*, if one is stuck in mud or honey.

E. When one comes out of the mud and starts walking (with mud on the body), that is like the *Sotāpanna* stage. Now one does not need anyone’s help, even though that can help expedite the process; one can figure things out by oneself.

- Many know many *suttā* by heart or Abhidhamma concepts, but nowhere near the *Sotāpanna* stage.
- We must understand that Buddha Dhamma is not about JUST LEARNING concepts (even though learning plays a big part); **it is all about using what is learned to purify the mind**. As the mind becomes clear, one will start seeing reality better. In the Buddha’s days, illiterate people could learn Dhamma just by listening, and even attained Arahant hood.

E. The final stage is to realize that even birth in such *deva/Brahma* worlds will be temporary. At some point in the future, they will commit some bad deed and end up in the four lower realms for a long time; that is just the nature of this world, where sense pleasures can lure anyone to commit bad actions. But there is no point in talking about that stage, until one gets above the A and B stages and becomes a *Sotāpanna*.

F. The series of posts that I am writing on the *Satipaṭṭhāna Sutta* goes through this process too, from stage A. Therefore, it may be a good idea to read those posts from the beginning. The first introductory posts are full of Pāli words but go through them briefly even if you do not fully understand. They WILL become clear later, if not now.

- **When one starts following the Path, one is bound to break the trend occasionally. A child learning to walk will fall many times. Many people get discouraged when they do an immoral act occasionally; but to realize that one made a mistake, and that it bothers one’s mind, means one HAS MADE PROGRESS. That is why one needs to have the perseverance to get back up with renewed determination. Just like a child WILL learn to walk, one WILL get better with time.**

G. Of course I do not know the level of each person coming to the website. Only each person knows where he/she is relative to the above steps.

- If one genuinely can purify one’s mind and comprehend *anicca*, *dukkha*, and *anatta*, that is all it takes to attain the *Sotāpanna* stage.
- There is material ranging from the basic to very advanced levels and even more will be posted in the future. This is for completeness, and to ensure that any scholar or interested person can gauge the depth of Buddha’s true teachings.
- Some people start comprehending Dhamma and start enjoying finding further details; no other type of “pleasure activity” can match the “enjoyment of Dhamma”. Buddha Dhamma is the ultimate “book of nature”.
- Furthermore, reading widely on different topics will help build *saddhā* (faith), which is NOT blind faith but faith built on understanding. When one sees how little modern science knows compared to the Buddha, it helps build faith. **And *paññā* (wisdom) and *saddhā* grow together.**

Next, “[1. Introduction to Buddhist Meditation](#)”,

12.26 How to Attain Samādhi via “Vipassanā Pubbaṅgama Samatha” Bhavana

Revised June 23, 2023

Samādhi (calmness of the mind) that is long-lasting and leads to comprehending the Noble Truths is possible only with *Vipassanā*. However, one could start with *Samatha* and switch to *Vipassanā*.

1. *Anāriya Bhāvanā* methods (which include breath, stomach rising/falling, or repeated passage recitation, such as “May all beings be happy and healthy”) can suppress the five hindrances and lead to mundane *samādhi*. But the effects are temporary, as anyone who participated in meditation retreats know; it feels really good at the retreat, but after returning and getting into the hectic everyday life, that feeling of calmness fades away with time.

2. The Buddha compared such meditation techniques to riding a mule. His most recommended method was “*Vipassanā pubbaṅgama Samatha*”, which he compared to riding a racehorse. [The Buddha told Ven. Suddha: “..*Ājānīyajhāyitaṃ kho, saddha, jhāya; mā khaḷuṅkajhāyitaṃ..*”, or “Saddha, cultivate the *ājānīya* (thoroughbred horse) *jhāna*, not the *khaḷuṅka* (mule) *jhāna*”: [WebLink: suttacentral: Saddha Sutta \(Anguttara Nikāya 11.9\)](#). There are four ways of practice (a summary of the four pathways (*magga*)) described by Venerable Ānanda in the [WebLink: suttacentral: Yuganaddha Sutta \(AN 4.170\)](#) : (1) The practice of insight preceded by tranquillity (*samatha-pubbaṅgama-vipassanā-bhāvanā*). (2) The practice of tranquillity preceded by insight (*vipassanā-pubbaṅgama-samatha-bhāvanā*). (3) The practice of tranquillity and insight in association (*yuganaddha-samatha-vipassanā-bhāvanā*). (4) The way of practice when the mind is distorted or misled by an excitement or agitation in regard to the Dhamma (*dhammuddhacca-viggahita-mānasa*). Here one has the misapprehension that the intermediate results of one’s practice constitute path, fruit, and Nibbāna.]

- *Vipassanā* means “**sorting out and getting rid of undesired thoughts that come to the mind**”, *pubbaṅgama* means precedes, and *Samatha* is calming the mind or attaining *samādhi*.
- Thus in “*Vipassanā pubbaṅgama Samatha*” meditation, when one does the *Vipassanā Bhāvanā*, it automatically leads to *samatha* or *samādhi* and (*Ariya*) *jhānā*.

3. In the *Ariya Bhāvanā* or the “*Vipassanā pubbaṅgama Samatha*”, one’s mind is constantly working to GET RID OF the defiled thoughts, not merely to suppress them as in the *Anāriya* version. As one cultivates this *Ariya Bhāvanā* over time, the five hindrances are slowly REMOVED from the mind and the mind gradually shifts towards a permanently calm state. Thus, it becomes easier and easier to attain *Samādhi* since the five hindrances are gradually removed.

- We discussed contaminated water well in the “[2. The Basics in Meditation](#)” post above. In *Anāriya Bhāvanā*, what is done is basically to let the dirt settle to the bottom of the well by not further stirring the water. The water eventually becomes relatively clear, but in a new session one needs to do it all over.
- In contrast, in the *Ariya* version, one constantly removes dirt from the well. Therefore, session after session dirt is removed, and eventually there will be very little dirt to remove and thus the mind will get to *samādhi* very quickly.

4. In the beginning, it is better to do formal meditation sessions. One could do it while waiting in the doctor’s office or riding a bus, as one gains practice.

- First, sit in a quiet place as described in the “[8. The Basic Formal Ānāpānasati Meditation](#)” post. Close your eyes and let your mind relax. Thoughts will invariably start popping up. Disregard any neutral thoughts and immediately eliminate any greedy or hateful thoughts as they start coming up.
- It will be helpful to contemplate the negative consequences of such thoughts.
- For example, if thoughts about an unkind deed someone did to you come to the mind, think about the dire consequences of “doing tit for tat”: that will only enhance and cultivate defilements in YOUR mind.

We do not have control over what others do; but we can control our minds. The more your mind becomes free of hateful thoughts, the chances of facing such adversary situations will diminish. You may be surprised, but that is true. Just have perseverance for a few weeks.

- In another example, if you start thinking of a greedy thought, say for a tasty, high calorie snack, think about the dire consequences (gaining weight, getting addicted to such impulsive thoughts, etc), and also think about having the confidence of self-control.

5. Do not try to remove all thoughts that come to your mind. This is dangerous advice that some meditation teachers give. We need to remove ONLY those thoughts that have greed, hate, or ignorance associated with them.

- If any good, meritorious thoughts come to the mind, cultivate them; think further along those good thoughts. It could be a good deed you did like helping someone, or an alms giving you participated in, etc.
- If neutral thoughts come to the mind, let them pass by. Do not cultivate them, but do not try to suppress them either.

6. It could be hard to do this in the beginning. But if you really want to make progress (*chanda*), you can have the determination (*citta*), make the effort (*viriya*), and actively engage in looking at the dire consequences of evil thoughts and the possible benefits of good thoughts (*vīmaṃsā*), you WILL make progress, AND it will get easier with time. The four *iddhipāda* will also be cultivated on the way; see the post on "[The Four Bases of Mental Power \(Cattāro Iddhipāda\)](#)".

7. When you actively suppress *kāmacchanda* (excess greed) and *vyāpāda* (hate) by this procedure, the other three hindrances (*thina-middha*, *uddhacca-kukkucca*, and *vicikicchā*) will automatically reduce. Thus all five hindrances will be gradually removed and your mind will become "free of gunk". See the post on "[Key to Calming the Mind – The Five Hindrances](#)".

8. As you make progress, your mind will gain calmness, a permanent relief. It will gradually become easier to "get to *samādhi*". The Buddha compared the relief gained by this *Bhāvanā* as follows: paying off an enormous loan that had been a burden to the mind, being released from jail, recovering from a significant disease, gaining freedom from slavery, and reaching safety after crossing a dangerous desert. If someone has all those five experiences simultaneously, the Buddha said, that is the kind of relief one gets by removing the five hindrances.

- This is the *nirāmisā sukha* that one gains, when approaching *Nibbāna* or *Nivana*; see the post, "[How to Taste Nibbāna](#)". Nibbāna is "cooling down," any sensory pleasure cannot match it and is permanent. One can experience it in varying degrees as one cultivates this *Ariya* meditation.

13.1 Abhidhamma – Introduction

Revised January 9, 2019; August 4, 2019; September 8, 2019; July 19, 2022 (#9 added); July 25, 2022 (#10-11 added); February 23, 2023

1. “*Abhi*” means “higher” or “deeper.” Thus *Abhidhamma* is a more in-depth, fundamental description of Buddha Dhamma.

- The result is the same as the material in the *suttā*. Still, *Abhidhamma* provides a “bottom-up” description of the existence, starting with 82 “most basic units” within the four ultimate entities of *citta*, *cetasika*, *rūpa*, and *Nibbāna*. That was a monumental task, and it took almost 500 years to finalize it at the third Buddhist Council.
- The 81 “basic units” that make up this world are one **pure *citta***, 52 *cetasika*, and 28 types of *rūpa*. Depending on the combinations of *cetasika* that arise with *citta*, 89 (or 121) types of **contaminated *citta*** (or *viññāṇa*) can occur. That will become clear as we discuss it further.
- *Abhidhamma Piṭaka* is fully consistent with the other two *Piṭaka* of the *Tiṭṭaka*.

2. In the *suttā*, the Buddha explained the Dhamma concepts using everyday language. **And most people can attain *Nibbāna* without knowing anything about *Abhidhamma*.**

- However, one could study *Abhidhamma* and see WHY Buddha Dhamma is not a religion but is the ultimate explanation of nature, the Grand Unified Theory. That can lead to a “faith-based understanding” of Buddha Dhamma. It has a thousand-fold more explanatory power than modern science. And for those who like to “get to the bottom of understanding something,” *Abhidhamma* will bring joy to the heart.

Let us take the example of making a cake:

- All one needs to know are the ingredients, how to mix them, and the proper procedures to bake them. That is analogous to *suttā*.
- *Abhidhamma*’s approach is comparable to starting at the atomic level of the ingredients. Then one can describe how those fundamental entities combine to make flour, oil, eggs, etc. Furthermore, one would know the choice of those ingredients and WHY the cake needs to bake at a specific temperature.
- It is mind-boggling what *Abhidhamma* can accomplish.
- **However, instead of being a boring “recipe book,” learning *Abhidhamma* can be a delightful experience if one starts with understanding the basics. Furthermore, one can get a much deeper understanding of the Dhamma concepts.**

3. *Abhidhamma* provides a complete, consistent description of existence (encompassing the 31 realms). With this description, there can be no unexplained phenomena at any level. A logician like the late Dr. Kurt Gödel could have a great time with it; see “[Gödel’s Incompleteness Theorem](#).”

- The scope of *Abhidhamma* is somewhat comparable to what the scientists are trying to do with a Grand Unified Theory to describe the behavior of inert matter. Einstein devoted the latter part of his life to developing one and failed; scientists are still far from achieving it. And even if accomplished, it can only describe the behavior of inert matter, not of living beings.

4. *Abhidhamma is the Grand Unified Theory of the Buddha*. I introduced it in the post “[The Grand Unified Theory of Dhamma](#).” In this *Abhidhamma* section, I will try to provide further details. My goal is to describe it in an easy-to-grasp simple manner.

- When I taught physics to undergraduate students, I told them not to memorize anything but to grasp the essence of the material. Many students (and adults) try to memorize descriptions of a concept but have no idea how to apply that concept. I used to give them all the complex equations and any other hard-to-memorize material in the tests; they needed to apply those equations correctly in solving problems.

- My approach is the same here. For example, in the “[Tables and Summaries](#)” post, different types of *cittā* (loosely speaking, “thoughts”) are listed. There is no need to memorize them. One should understand a given Dhamma concept starting from the basics: for example, which *cittā* are immoral and can lead one to rebirth in the *apāyā* and WHY.

5. For example, a key concept in Buddha Dhamma is *saññā* (translated to English as “perception”). But it is much more complicated than “knowing and identifying an object”; see “[Saññā – What It Really Means.](#)”

- One of my first goals in the Abhidhamma section is to describe *saññā* and the critical role played by the brain. For that, we first need to understand the connection between the brain and the mind (they are NOT the same). See “[Brain – Interface between Mind and Body.](#)”
- Abhidhamma can make one addicted to it, as I have become addicted. When one starts to grasp how this complex world works, understanding even a bit more can bring joy to the heart.

6. However, I must say that even if one can understand the whole of the *Abhidhamma* theory, one MAY NOT understand the Buddha's message. **One must understand the true meanings of *anicca*, *dukkha*, and *anatta*.**

- I had so many unresolved questions on parts of *Abhidhamma* until I listened to the first *desanā* from one of my teachers on July 30, 2013, on *anicca*, *dukkha*, and *anatta*. It was like lifting a fog, and by the end of that *desanā*, I knew I would be able to “fill in the blanks” to improve my understanding.
- *Abhidhamma* can solidify and “fill in the blanks” of Buddha Dhamma from the *suttā*, which can be exhilarating.

Background of the Development of *Abhidhamma* Theory

7. Following is a brief background on how the *Abhidhamma Piṭaka* of the *Tiṭṭaka* was developed over roughly 250 years by the lineage of *bhikkhus*, starting with Ven. Sāriputta. Of course, Ven. Sāriputta was one of the two chief disciples of the Buddha: While Ven. Mahā Moggallāna excelled in supernatural powers, Ven. Sāriputta excelled in Dhamma. He was only second to the Buddha in Dhamma knowledge.

- The minute details on the structure of a *citta vīthi* (a series of *citta*) of 17 thought moments, with each *citta* lasting sub-billionth of a second, can be seen only by a Buddha. The Buddha described such minute details to Ven. Sāriputta. Then Ven. Sāriputta and his group of *bhikkhus* (and their subsequent lineage) completed the monumental task of describing the Abhidhamma theory, starting with the fundamental entities.
- As I mentioned earlier, that is a million times more complicated task than putting together a Grand Unified Theory of inert matter (as scientists are attempting to do today). Because a living being has an inert body but a complex mind which makes that inert body “alive.”

8. At the First Buddhist Council, just three months after the *Parinibbāna* of the Buddha, only a theoretical framework was recited. More was added at the second Council, and the task was completed only at the third Council. This completed *Tiṭṭaka* was written down in 29 BCE at the Fourth Buddhist Council; see “[Preservation of the Buddha Dhamma.](#)”

- A false statement in many books is the following statement. *Abhidhamma* was “invented” by *bhikkhus* after the *Parinibbāna* of the Buddha.
- Those who make such statements have not either studied *Abhidhamma* or have not been able to understand the in-depth analyses in *Abhidhamma*. The minute details of the very fast *citta vīthi* are discernible only to the mind of a Buddha.
- It is essential to realize that hundreds of *Arahants* at the Fourth Council wrote the whole *Tiṭṭaka*. That included the complete *Abhidhamma Piṭaka*.

9. The description of the events leading to the First Buddhist Council, just three months after the *Parinibbāna* of the Buddha, is described in the “[WebLink: suttacentral: 21. Pañcasatikakkhandhaka](#)” section of the “*Cūlavagga*” of the “*Theravāda Vinaya Piṭaka*.”

- At the end of that section is a small section titled “*Tassuddānam*.” That summarizes the events of the First Council.
- The following verse is in there: “*Upāliṃ vinayaṃ pucchi, suttantānandapaṇḍitaṃ; Piṭakaṃ tīṇi saṅgītiṃ, akaṃsu jīnasāvaka.*”
- That says: “Venerable Upāli recited the Vinaya (*Upāliṃ vinayaṃ pucchi*.) Ven. Ānanda recited the Suttas (*suttantānandapaṇḍitaṃ* or *sutta ānanda paṇḍitaṃ*), and all of the 500 *Arahants* present recited ALL THREE *Piṭaka* (*Piṭakaṃ tīṇi saṅgītiṃ, akaṃsu jīnasāvaka.*) [*tīṇi* : see *tayo*. *tayo* : [nom. plu. of *tī*] **three** (persons).]
- Thus, there is clear evidence that all three *Piṭaka* of the *Tipiṭaka* were recited at the First Council.
- However, only a basic framework of Abhidhamma was available at that First Council. Further refinements/expansions were added to the *Abhidhamma Piṭaka* at the Second and Third Councils. The finalized version was written down at the Fourth Council.

10. In the “Introduction” to his book (Ref. 1), Bhikkhu Bodhi has a subsection on “The Origins of *Abhidhamma*” (see pp. 9-11 of Ref. 1.) There, he has provided a brief background which I will summarize.

- The Buddha explained *Abhidhamma* in detail to an assembly of Devas in the *Tāvātimsa Deva* realm over three months. Each day, the Buddha would descend to Earth for his almsround, meet Venerable Sariputta, and give him a summary of that day’s discourse.
- Having learned *Abhidhamma* from the Buddha, Ven. Sariputta taught it to his 500 student-*bhikkhus*. However, they had to expand that summary to the form we have in seven books today. That task was completed only by the Third Council, as mentioned in #9 above.
- The “[WebLink: suttacentral: Lomasakaṅgiyabhaddekaratta Sutta \(MN 134\)](#)” confirms that the Buddha spent in the *Tāvātimsa Deva* realm: “*Ekamidam, bhikkhu, samayaṃ bhagavā devesu tāvātimsesu viharati pāricchattakamūle paṇḍukambalasilāyaṃ.*” OR “One time, the Buddha was staying among the *Devas* of *Tāvātimsa* realm.”

11. There is also a verse close to the beginning of the “[WebLink: suttacentral: Dhutaṅgapañha \(Mil 6.4.2\)](#)” section of “*Milindapañha*” of the *Tipiṭaka* directly saying that. It is in Ven. Nagasena’s answer to a question by King Milinda on the vast numbers of humans and *Devas* who attained *magga phala* while listening to the Buddha.

- “*..Nagare rājagahe paññāsasahassāni tīṇi ca satasahassāni ariyasāvaka bhagavato upāsakaupāsikāyo, puna tattheva dhanapālahatthināgadamane navuti pāṇakoṭiyo, pārāyanasamāgame pāsāṇakacetiye cuddasa pāṇakoṭiyo, puna indasālaguhāyaṃ asīti devatākoṭiyo, puna bārāṇasiyaṃ isipatane migadāye paṭhame dhammadesane aṭṭhārasa brahmakoṭiyo aparimāṇā ca devatāyo, puna tāvātimsabhavane paṇḍukambalasilāyaṃ abhidhammadesanāya asīti devatākoṭiyo.*”
- The “[WebLink: suttacentral: English translation \(Mil 6.4.2\)](#)” there is as follows: “..In the city of Rājagaha three hundred and fifty thousand devout laymen and devout laywomen, disciples of the Blessed One, were walking in the Paths. And there again at the taming of *Dhanapāla* the great elephant nine hundred million living beings, and again at the meeting at the *Pāsāṇika Cetiya* on the occasion of the *Pārāyana* discourse one hundred and forty million living beings, and again at the *Indasāla* cave eight hundred millions of gods, and again at Benares in the deer park Isipatana at the first preaching of the Dhamma one hundred and eighty million Brahmā gods and innumerable others, and again in the heaven of the **Thirty-Three at the preaching of the Abhidhamma on the Paṇḍu Kambala Rock** eight hundred millions of the gods.”
- Much merits to the reader TripleGemStudent for providing me with this reference.

Weakening of *Buddha Sāsana*

12. The absence of *Arahants* (in significant numbers) started around the second century CE and coincided with the rise of *Mahāyāna* and the “contamination” of Theravada, which culminated in the *Visuddhimagga* of Buddhaghosa; see “[Historical Timeline of Edward Conze](#).”

- As we discuss more topics, it will become clear that only *Arahants* with superior mental power can accomplish the complex task of completing the *Abhidhamma Piṭaka*. It was compiled without an easy way of recording, let alone having access to computers.
- I have given a breakdown of the *Abhidhamma Piṭaka* in the post, “[Preservation of Dhamma](#).”

13. **August 12, 2015:** I have brought the subsections on “[Mind and Consciousness](#)” and “[Gandhabba \(Manomaya Kāya\)](#)” from “Dhamma Concepts” to the “Abhidhamma” section since it is imperative to understand those basic concepts first. Reading those subsections (and “[Citta and Cetasika](#)”) is a good idea before reading further in the *Abhidhamma* section.

- It is not necessary to understand the material in all those essays. But the more of those basic concepts one understands, the easier it becomes to grasp the content in subsequent articles.
- Also, we all keep increasing our understanding as we learn Dhamma. I learn new things daily and update the posts as much as possible. The more one learns, the more one can “see the inconsistencies” in other versions of “Buddhism,” and possibly in my essays; some of these posts date back to 2014. Please don’t hesitate to point out any inconsistencies on this website. I would be grateful. There is a “Comments” tab under each post.

14. I have written a series of posts in a new subsection introducing fundamental concepts in Abhidhamma at “[Essential Abhidhamma – The Basics](#).”

The background and an overview are at “[Abhidhamma Piṭaka – Deeper Analyses of Concepts](#).”

13.2.1 Amazingly Fast Time Evolution of a Thought (Citta)

August 23, 2018; revised (#18 added) September 12, 2018; January 6, 2019; May 16, 2020; September 22, 2021

Introduction

1. Even though only one word in the English language (“thought”) describes “a unit of cognition” or “a thought,” the Buddha explained that such a “thought” arises as a *citta*, and goes through nine stages of “contamination” to become *viññāṇakkhandha*. What we experience is this *viññāṇakkhandha* of the “aggregate of *viññāṇa*.” See, [“The Five Aggregates \(Pañcakkhandha\).”](#)

- However, even a contaminated *citta* is still called a *citta* for convenience, even in the *suttā*. So, one needs to determine the meaning depending on the context. One needs to have an idea of those nine stages.
- Some of these terms in the nine stages are used interchangeably to as “a thought” in many Buddhist textbooks and internet sites on Buddhism (e.g., *citta*, *mano*, *viññāṇa*.) That is NOT correct.

2. I will make this a post simple because everyone must get the basic idea of how a thought is “contaminated” within a split second.

- It is not possible to stop the contamination of a *citta* within such a short time. I have even seen some well-known, and respected Dhamma teachers say that **one can willfully** keep a “*pabhassara citta*” (uncontaminated *citta*) from being contaminated.
- I hope this post will make it clear that such a thing is not possible. **One’s *cittā* are contaminated depending on one’s *gati* and the sensory input (*ārammaṇa*) in question. The key to STOPPING *cittā* from getting contaminated is to change one’s *gati* over time.**
- That is done by following the Noble Path, and specifically by practicing the correct *Ānāpāna* and *Satipaṭṭhāna Bhāvanā*. **Not by the “fake breath meditation.”** That will become clear by the end of the post.

Nine Stages of a Thought (*Citta*)

3. Those nine stages of contamination during the lifetime of the fundamental unit of cognition (within a billionth of a second) are *citta*, *mano*, *mānasā*, *hadayaṇa*, *pandaraṇa*, *mano manāyatanaṃ*, *mana indriyaṃ* (or *manindriyaṃ*), *viññāṇa*, *viññāṇakkhandha*. [*Yam cittam mano mānasam hadayaṇa paṇḍaram mano manāyatanaṃ manindriyaṃ viññāṇam viññāṇakkhandho...*] A *Tipiṭaka* reference is given in the post, [“Pabhassara Citta, Radiant Mind, and Bhavaṅga.”](#)

- Amazingly, these nine steps occur within a split second, and the Buddha said there are billions of *citta* arising within the blink of an eye. Each *citta* has three stages: *uppāda*, *ṭhiti*, *bhaṅga* (rising, stability, dissolution). Those nine steps occur before it comes to the *bhaṅga* or the termination stage.
- It may be hard to believe, but we can prove this true with the following example.

4. Suppose three people A, B, C, are sitting in a small coffee shop. They are all facing the door, and person X walks in. Suppose that person X is a close friend of A, the worst enemy of B, and that C does not know X. We will also assume that all are males.

- So, let us see what happens within a split second. A recognizes X as his friend, and a smile comes to his face. B recognizes X as his enemy, and his face gets darkened.
- On the other hand, C's mind does not register anything about X, and X is just another person to him. He immediately goes back to whatever he was doing.

5. **That is an example of a “*cakkhu viññāṇa*,” a “seeing event.”** It is over within a split second, just like taking a photo with a camera takes only a split second, where the image is captured on the screen instantaneously.

- However, something very complicated happens in a human mind when a “seeing event” occurs.
- It is critically important to go slow and analyze what happens to see how complicated this process is (for a human mind) to capture that “seeing event.” It is far more complex than just recording “a picture” in a camera.

6. Within that split second, A recognizes X as his good friend, and pleasant emotions arise in his mind, and he becomes happy. B recognizes X as his worse enemy, and destructive emotions arise in his mind, and he becomes angry. On the other hand, C identifies X as a man or a woman, and no feelings occur.

- We don't think twice about these observations usually. But if one carefully analyzes what happens, one can easily see that this is an amazingly complex process.
- How does the SAME “seeing event” (seeing X) lead to all these very different changes in the minds of three people? (and the emotions even show up on their faces!)
- No one but a Buddha can see this fast time evolution of a *citta*.
- The Buddha has analyzed this process in minute detail. We will discuss only the critical basic features here.

Nothing Faster in the World Than the Arising of a *Citta*

7. Buddha said it is hard to find any phenomena in this world that change faster than the mind: “[WebLink: suttacentral: Aṅguttara Nikāya \(1.48\).](#)”

The short *sutta* says: “*Nāhaṃ, bhikkhave, aññaṃ ekadhammampi samanupassāmi yaṃ evaṃ lahuparivattaṃ yathayidaṃ cittaṃ. Yāvañcidaṃ, bhikkhave, upamāpi na sukarā yāva lahuparivattaṃ cittaṃ*”ti.”

Translated: “I consider, *bhikkhus*, that there is no phenomenon that comes and goes so quickly as *citta*. It is not easy to find an analogy (a simile) to show how quickly *citta* can change.”

Three Features of a Seeing Event (*Cakkhu Viññāṇa*)

8. The “seeing event” has three essential features:

- One gets into an emotional state (pleasant, unpleasant, or neutral, which is called *sukha*, *dukha*, and *upekkhā* in Pāli), which is *vedanā*.
- One recognizes the object, and that is called *saññā*.

- Based on *vedanā* and *saññā*, one also generates other mental characteristics such as anger, joy. Those are none other than *saṅkhāra*.
- Of course, this holds for all six types of *vipāka viññāṇa*.

9. ***Viññāṇa* is the overall sense experience encompassing all those three:** *vedanā*, *saññā*, *saṅkhāra*.

- **But *viññāṇa* can be more than the sum of those three.** See, “[Viññāṇa – What It Really Means](#).”
- We can safely say that *viññāṇa* (or more correctly *viññāṇakkhandha*) is the overall sensory experience, INCLUDING one’s expectations based on that sensory experience. That is why one’s facial expressions may change too, according to such expectations.

10. So, we can see that those three people, A, B, and C will have three different “states of mind” upon that seeing event (*ārammaṇa*).

- **That “mindset” with a set of *vedanā*, *saññā*, and *saṅkhāra* is called a *viññāṇa*.**
- *Viññāṇa* is the overall sensory experience that includes all those. And that takes place within a split second.
- There are six types of *vipāka viññāṇa* corresponding to the six sense faculties. See, “[Viññāṇa – What It Really Means](#).”

Importance of Character/Habit (*Gatī*)

11. Several key important basic features come out from this simple example.

- **There is no single entity called “*viññāṇa*.”** When we hear something a “*sota viññāṇa*” arises, when we taste something a *jivhā viññāṇa* occurs, etc. Altogether six types of *vipāka viññāṇa* are associated with the six sense faculties we have. Those are *cakkhu* (see), *sota* (hear), *ghāṇa* (smell), *jivhā* (taste), *kāya* (touch), and *mano* (mind).
- **Any of those will lead to the following outcomes:** *Sukha*, *dukha*, or *upekkhā vedanā* arise. One recognizes what type of picture, sound, etc., and that is (*saññā*.) Then other types of *cetasika* occurring (called *saṅkhāra*) depending on the *ārammaṇa* (sound heard, etc.) AND the “nature” of the person (**character/habits or *gati***).
- *Gati* is sometimes written as *gathi* as is pronounced in conventional English. However, there is a “*Tipiṭaka* English convent” adopted in the 1800s to keep the words short; see, “[Tipiṭaka English Convention Adopted by Early European Scholars – Part 1](#).”
- Each person has a unique (but changing) set of good and bad *gati*. I am not going to discuss this here, but there are many posts on the website on *gati*.

Dependence on the “Thought Object” (*Ārammaṇa*)

12. Let us take a different scenario. Let us assume that X is B’s girlfriend — who is not in good terms with A — and that C is a young male who has never seen X.

- Now, we see that the moods of A and B will reverse. A will be instantaneously unhappy to see X, and B will be happy to X.
- Regarding C, the situation could be different than before. If X appears attractive to him, C may instantaneously form a lustful state of mind.

13. So, we see that the type of *cakkhu viññāṇa* depends primarily on two things. It depends on the person experiencing it and the sense object in question (called an *ārammaṇa* in Pāli).

- In the above two cases, A and B experienced different types of vipāka *viññāṇa* (seeing something “good” or “bad.”) But their experiences reversed when the sense object changed (situation in #4 versus that in #12.)
- In the case of C seeing an attractive woman, even though he had no prior contact with her, lustful *viññāṇa* arose in C, due to his “lustful” *gati*.
- If C were an *Arahant*, C would only generate a *upekkhā viññāṇa* when seeing the X. An *Arahant* has removed all *gati*; one needs to learn about *gati* to understand this point.

14. Now we see that for a given person, there is no permanently set of good or bad *viññāṇa*. What kind of *viññāṇa* arises depends on the *gati* of the person and the sense object.

- We usually call someone a “good person” based on their overall character, i.e., if that person displays more “good character” than “bad character” over time. But only an *Arahant* can be called a “definitely a moral person,” acting 100% morally all the time.
- Even though this is a complex subject, the basic features are those mentioned above. One needs to analyze different situations in one’s mind to get these ideas firmly grasped. That is actual *vipassanā* meditation!
- One needs to understand how the mind works to make progress on the Path. The Buddha said that the world had never known his Dhamma. And it has the MIND in the forefront. Furthermore, the mind is the most complex entity in the world.

Simple Explanation of the Nine Steps

15. The first stage, *citta*, is just awareness that comes with the “uncontaminated” *vedanā* and *saññā* and five other universal mental factors (*cetasika*): *phassa*, *cetanā*, *manasikara*, *ekaggatā*, and *jivitindriya*. One is just aware that one is alive and is experiencing something.

- At the “*mano*” stage, the mind has “measured” what the object is (මැනීම [mænīma or Measurement] in Sinhala). For example, whether it is a tree or a human or a bird.
- In the following “*mānasam*” stage, the mind can distinguish among different species. For example, whether it is just a woman or one’s mother or a parrot or a hummingbird. That is the “pure and complete awareness”: one sees the external world as it is. An *Arahant*’s mind will not contaminate beyond this stage.

16. At the next “*hadayaṃ*” (හදා වීම [hāda vīma or Trouble shooting] in Sinhala) phase, the mind gets attached to the object (or repulsed by it) based on one’s prior experiences and *gati*.

- This attachment gets stronger in the following several stages, and by the time it reaches the *viññāṇa* stage, it can be fully “corrupted.”
- Finally, that *viññāṇa* gets incorporated to the aggregate of *viññāṇa* or the *viññāṇakkhandha*. With each thought, the *viññāṇakkhandha* grows.

17. One crucial observation is that C’s mind stopped at the “*mānasam*” stage. (That is only partially correct, but we don’t need to get to details here). However, in the second example, it got contaminated.

- Of course, an *Arahant*’s mind will never get contaminated beyond the “*mānasam*” stage for ANY sense object.
- Specifically, no *lobha*, *dosa*, or *moha* will arise in an *Arahant*, regardless of what the sensory input.

18. Hopefully, the above basic description will clarify how a *citta* gets contaminated automatically according to one’s personality (*gati*) and the sense object.

- The critical point is that we do not control those initial *citta* that arises automatically at the first exposure to the sense object.

- However, when we become aware of this initial response, we CAN control our subsequent *citta* by being mindful. That is the key to *Ānāpāna* and *Satipaṭṭhāna* meditations and is a different topic. For details, see “[Bhāvanā \(Meditation\)](#)” and “[Living Dhamma](#)” and “[Paṭicca Samuppāda](#)” sections.

19. Finally, another critical point is that the six types of *viññāṇa* that we just discussed are all *vipāka viññāṇa*. These arise due to past *kamma*, i.e., as *kamma vipāka*.

- Then there are *kamma viññāṇa* that we create ourselves; see, “[Kamma Viññāṇa – Link Between Mind and Matter](#).”
- When the Buddha said that we need to stop defiled *kamma viññāṇa* from arising, he was referring to the *kamma viññāṇa*. We have control over *kamma viññāṇa*. But we do not have control over *vipāka viññāṇa*, which are due to past *kamma*.
- Details on *kamma viññāṇa* in the post “[Do I Have “A Mind” That Is Fixed and “Mine”?](#)”. At a given moment one’s state of mind depends on one’s *gati* (character and habits) AND the external sense object.

13.2.2 The Amazing Mind – Critical Role of Nāmagotta (Memories)

September 6, 2018; revised September 7, 2018; October 7, 2019; March 10, 2020; June 6, 2021; June 10, 2021; September 16, 2021 (revised #1); September 22, 2021 (revised #1); December 13, 2022

Nāmagotta (Part of *Pañcakkhandha*) Are Memories

1. Here, we will discuss the critical importance of *nāmagotta* (our memory records). This discussion will help us understand the post, “[Anatta in Anattalakkhaṇa Sutta – Part 1](#).”

- It is important to note that “*nāmagotta*” contains records of all our past events. As we know, each aggregate (*khandha*) includes all past events. For example, *rūpakkkhandha* includes the *rūpa* we are experiencing now and all past *rūpa* we have experienced. See, “[Difference Between Physical Rūpa and Rūpakkkhandha](#).” That holds for the other four aggregates too. Thus, *nāmagotta* consists of the “past components of *pañcakkhandha*.”
- Let us take person X. If someone shows X an apple, he will say, “that is an apple, and I know how it smells and tastes.” Suppose X loses all memory right after that. Now, will X be able to identify that as an apple? Of course not.
- That is another amazing thing about the mind. It can search one’s previous experiences with a given object (in this case, an apple) and remember what an apple looks like, tastes like, etc., i.e., all the distinctive properties of an apple. And it can do that in a billionth of a second!
- We discussed this in detail: “[Amazingly Fast Time Evolution of a Thought \(Citta\)](#).”

Important Aside: A mind is constantly interacting with *pañcakkhandha* and also constantly adding to the *pañcakkhandha*.

- *Pañcakkhandha* becomes *panca upādāna khandha* (*pañcupādānakkhandha*) when the mind attaches to an *ārammaṇa* based on *gati* (character/habits). That initial “attachment” happens within a billionth of a second.
- But if we are mindful, we can stop that “attachment” when it leads to unwise actions. That will slowly change our *gati*. That will lead to better responses to various types of *ārammaṇa* over time. That is the basis of true *Ānāpānasati/Satipaṭṭhāna*.
- Of course, practicing *Ānāpānasati/Satipaṭṭhāna* becomes easier with a proper understanding of the *anatta* nature. Then the mind will see the unfruitfulness of immoral deeds seeking temporary pleasures.)

Without Memories, There Would Be Only Be a Zombie (or a Robot)

2. **Think carefully about the following.** If X loses all memories, he will not know what to do with a plate of food put in front of him; he will not identify that as a pizza, a sandwich, etc.

- X will not know how to go home if he is at work when memory loss happens. X would not even know what “home” means and that he is supposed to go home at a particular time.
- If he gets the urge to go to the bathroom, X will not know where the bathroom is.
- You can think about the zillions of things we take for granted every day that X will not be able to do. X will not be able to function at all!

3. That is why a baby of a few months does not recognize anything and has no control over “bathroom functions.”

- A baby's brain is not developed and thus cannot make contact with the *mano loka*, where memories are; see, “[Nāmagotta, Bhava, Kamma Bija, and Mano Loka \(Mind Plane\)](#)” and “[Recent Evidence for Unbroken Memory Records \(HSAM\)](#).”
- Thus a baby is TOTALLY dependent on parents until about a year old until the brain develops to some extent.
- The *manasikāra cetasika* helps re-creates memories based on the “*rūpa*” received from the brain.

Perception or Identification (*Saññā*) Requires Memories

4. Now, suppose that person X, who has lost all his memories, takes a bite of the apple. Of course, he will taste the sweetness, but he will not be able to IDENTIFY that as an “apple taste.”

- Furthermore, X may not even generate a liking or the desire to take another bite unless he is hungry.
- **That also proves that the CRAVING for the taste of apple was not in the apple. Cravings are associated with one's *āsava*. And those *āsava* cannot manifest unless one's memories are intact and hidden *anusaya* can be triggered.**

5. With his memories lost, X's *vedanā* and *saññā* will be pretty close to “uncontaminated” *pabhassara citta*. He will experience a taste (without identifying it as the taste of an apple). But he will not generate any *sobhana* or *asobhana cetasika* based on any attractive or repulsive sensory input.

- But of course, he has not attained the *Arahant* stage. His *āsava* will be with him, just as a newborn baby will have all its *āsava* with it.
- If X lost his memory due to brain damage, his *āsava* would not resurface until the next birth if the brain was permanently damaged.
- Details at “[Āsava, Anusaya, and Gati \(Gathi\)](#).” Many examples are discussed in, “[Patient H.M. – Different Roles of Brain in Memory](#).”

The Account of Patient H.M.

6. Patient H.M.'s story is in the book “Patient H.M. : A Story of Memory, Madness, and Family Secrets” by Luke Dittrich.

- Here we must remember that our memories are in the *nāma loka* and can be recalled only by the *mana indriya* in the brain. See, “[Nāmagotta, Bhava, Kamma Bija, and Mano Loka \(Mind Plane\)](#),” “[Memory, Brain, Mind, Nama Loka, Kamma Bhava, Kamma Vipāka](#),” “[Gandhabba Sensing the World – With and Without a Physical Body](#),” and “[Brain – Interface between Mind and Body](#).” One needs to spend some time clarifying this key concept.

- The surgeons had inadvertently removed part of the brain of “patient H.M.” that contained the *mana indriya* (surgeons were trying to stop regular seizures that the patient was experiencing by removing tiny parts of his brain).
- With more studies in the future, we may identify the *mana indriya* in the brain.

Brain is Required to Capture the External Sensory Object

7. That is why a newborn baby (within a year or so from birth) has a minimal perception capability. The brain has not developed to process all the information that comes through the sense faculties.

- Therefore, a newborn baby’s brain cannot transfer anything useful to the *hadaya vatthu* to identify objects or match each with the set of *āsava/anusaya* and generate cravings or dislikes for that sensory input.
- A baby’s hidden *āsava* will not show up until its brain develops. According to the Buddha, the brain function attains its total capacity around seven years of age: One can even attain *Arahanthood* if one is over seven.
- The role of the brain is discussed in “[Brain and the Gandhabba](#)” and “[Brain – Interface between Mind and Body](#).” Those who want to investigate this issue can find a lot of information there. I have tried to present a consistent picture using Buddha Dhamma and recent scientific findings.

The Difference Between an Arahant and Patient H.M.

8. We can get a good idea of how *Arahant*’s mind works by considering a person X discussed in #1 through #5 above (or patient H.M. IN #6) who has lost all his memories. The only difference is that in X or H.M., all *anusaya* are intact, but they cannot be “triggered.”

- For an *Arahant*, all *gati* and *āsava/anusaya* have gone away via cultivating *paññā*.
- But an *Arahant* will have all his memories intact. If he has developed *abhiññā* powers, he will be able to recall memories not only from this life but many lives in the past.

Habits/Cravings (and Thus *Gati* and *Āsava/Anusaya*) Change With Time

9. Most cravings are associated with our past habits and desires. Each person has a unique set, AND that set of habits/cravings will change over time.

- All *gati* and *āsava/anusaya* arise or — are with oneself — because of the inability to get rid of evils due to ignorance of the fundamental nature of this world: *anicca, dukkha, anatta, asubha*, etc.
- When one is on the Path, one will gradually get rid of “bad *gati*” and cultivate “good *gati*.” Then, at some point, one can comprehend the *anicca* nature. Then one’s *paññā* will grow leading to the PERMANENT removal of *anusaya* in four stages of *Nibbāna*.
- One should read up on those Pāli terms if one does not understand them. **Translating those terms to English does not make sense because no single English word will convey the same meaning as a Pāli word.**
- That is NOT memorization. One should comprehend what is MEANT by a Pāli word, not memorize it.

10. Suppose X is a young male. When X — if he has lost ALL his memories — sees an attractive woman, he will see her as an attractive person. But he will not generate any lust for her, no matter how beautiful she is. It is just “seeing” for him. Note here that he would have lost all memories regarding his past sexual activities (in fact, this is why a baby does not generate sexual thoughts.)

- The “picture” that comes to mind, cannot match it with X’s previous experiences with women. **His *kāma rāga anusaya* is still there but not awakened. The same is true for a baby.**

- Similarly, X will not generate any angry thoughts when seeing “an enemy”; he does not recollect past encounters with the person.
- In the same way, X may touch a red-hot iron because he has no idea that it can burn.
- That is also why babies touch or even try to eat anything and everything. They have no prior experience that some of those could be harmful. In the same way, until that baby grows up and has had sexual experiences, *kāma rāga anusaya* will stay dormant.
- To emphasize, in the case of X, he had NOT his hidden defilements (*anusaya*.) If he gets his memories back, his lust toward attractive women or anger toward an old enemy will trigger. We can make it even simpler: If you lose ALL your memories of your father, would you be able to recognize him when you see him? If you cannot recognize him, would you generate affectionate thoughts when you see him? Of course not.
- There are several real-life medical situations where people lost memories for different reasons: [“Patient H.M. – Different Roles of Brain in Memory.”](#)

“Live in Just the Present Moment”?

11. These days, there are many “philosopher-types” (like Eckhart Tolle or even some Buddhist teachers) who say “forget the past and live in the moment.”

- That is utter nonsense.
- One CANNOT forget the past AND live in the present. The Buddha said **to live in the present moment mindfully**, ensuring not to make bad decisions.
- The Buddha had a perfect memory. He could remember things as far back as he wished. Often he would give accounts of what had happened in past lives and teach people how to learn lessons from the past.

An Example from the *Tipiṭaka*

12. Finally, at the beginning of the [“WebLink: suttacentral: Mahāmālukya Sutta \(MN 64\)”](#), the Buddha points out the fact that *sakkāya diṭṭhi* cannot arise in a new-born baby. That is because of what we discussed above. There is no way to trigger the hidden *anusaya* in that baby’s mind.

- To quote the above translation: **“For a young tender infant lying prone does not even have the notion ‘identity,’ so how could identity view (*sakkāya diṭṭhi*) arise in him?”**
- The Pāli verse is: *“Daharassa hi, mālukyaputta, kumārassa mandassa uttānaseyyakassa sakkāyotipi na hoti, kuto panassa uppajjissati sakkāyadiṭṭhi? .”*
- **Deeper explanation:** That baby’s *anusaya* (hidden defilements), and thus *sakkāya diṭṭhi*, remains intact in the *manomaya kāya* (*gandhabba*.) However, until the baby’s brain is developed enough to process external sensory inputs, it cannot generate the *saññā* corresponding to sensory inputs; see [“Brain – Interface between Mind and Body.”](#) One’s *gati* from previous lives start to materialize after about seven years of age when the brain is fully functional.

13.2.3 Citta and Cetasika – How Viññāṇa (Consciousness) Arises

Revised February 17, 2020

Necessary Background

1. It is a good idea to read the posts, [“Amazingly Fast Time Evolution of a Thought \(Citta\)”](#) and [“Viññāṇa – What It Really Means”](#) first.

- It may be a good idea to read at least the introductory post on the *manomaya kāya* before reading this post: “[Gandhabba \(Manomaya Kāya\) - Introduction](#).”
- When one learns *Abhidhamma*, one can see why the Buddha rejected both “self” and “no-self” concepts. A “living being” is a momentarily changing entity. It is not possible to say “it does not exist,” because it does exist. It is just that it continuously evolves ON ITS OWN PATH determined by “*gati*” at each stage. There is a “dynamic self,” which has its own identity or personality or “*gati*” (which also evolve.)

Citta and Cetasika Arise Together

2. The name *citta* came from “*chitra*,” the name for a painting in Pāli or *Sinhala*. A pure *citta* has only seven mental factors (*cetasika*). *Cetasika* provide “colors for the picture,” so to speak.

- But the seven *cetasika* that are in every *citta* (universal *cetasika* or “*sabba citta sadharana cetasika*”) may be considered “colorless.” A pure *citta* is like a blank sheet of paper on which these “snapshots” painted.
- There are a set of 14 “bad *cetasika*” and a set of 25 “good *cetasika*.” For a rough visual, we may think of the “bad *cetasika*” as dark colors (black, brown, etc.), and the “good *cetasika*” as pleasant colors such as green or yellow. Then there are six other “occasionals” (i.e., appear only in some *cittā*) that are also “colorless,” and those can arise with either good or bad *cetasika*; see, “[Cetasika \(Mental Factors\)](#).”
- *Cetasika* arise with a *citta*, decay with a *citta*, and take the same thought object (*ārammaṇa*) as the *citta*. But a given *citta* has either good OR bad *cetasika*; they do not mix.
- And a *citta* is of very short duration; it lasts much less than a billionth of a second; see, “[What is a Thought?](#)” in the next post.

Sensory Experience Comes in “Snapshots”

3. A living being experiences the “world out there” in a series of very fast “snapshots”; it grasps the “world” in a snapshot called a *citta* (pronounced “chiththa”) that lasts much less than a billionth of a second. As soon as the mind sees that “snapshot”, it is gone. But the mind gives us an illusory sense of a permanent “world.” **It does that by making that “snapshot” meaningful. That requires incorporating our memories as well as our hopes for the future.** Let us see how this process as described in *Abhidhamma*.

- The mind does this with the help of a *cetasika* (pronounced “chethasika”) in that *citta* called *manasikara*. We will discuss this later, but I am just trying to get across the basic idea.
- Pāli words are spelled differently compared to “Standard English” spelling. See, “[“Tipitaka English” Convention Adopted by Early European Scholars – Part 1](#)” and “[“Tipitaka English” Convention Adopted by Early European Scholars – Part 2](#).”

4. **Therefore, we can visualize each “moment of awareness” of the outside world by the mind like a snapshot. As soon as it comes, it is gone.**

Then how does our mind see the outside world as “permanent?” Also, how does it decide a given situation as ‘good’ or ‘bad?’ Often, two people look at the same thing and perceive it differently (one may perceive it as “good” and the other as “bad.”)

- Two of the universal *cetasika* (*manasikāra* and *cetanā*.) are responsible for such variations.
- As we discussed in other posts, a record of the “snapshot” that decays is permanently recorded in the mental plane, and these records are called *nāma gotta*; see, “[Difference Between Dhamma and Saṅkhāra \(Saṅkhata\)](#).”
- In the same way, our hopes and visions for the future are also in the mental plane. Of course, the past *nāma gotta* are permanent while the imprints for the future keep changing. The *manasikāra cetasika*

brings in memories from the past and hopes for the future into the current *citta*, thus a “permanent like” view of the world is composed of the *cetanā cetasika*, which is responsible for “putting together a *citta*.”

- Furthermore, in one person, “good” *cetasika* may arise due to a sensory input, but if the “*gati*” of the other person is opposite, a set of “bad” *cetasika* may arise in the other person. The *cetanā cetasika* combines them to form a “good” or a “bad” awareness.

How Do We See?

5. It is basically the same kind of process happens when we see, hear, taste, smell, touch, or think. Let us explain the concept of vision.

- The basic sequence of events in capturing any “input” via the five physical senses was described in [“Gandhabba \(Manomaya Kāya\) - Introduction.”](#)
- If we keep looking at a picture on the wall, nothing changes because it is a static picture.
- Now let us think about what happens when we look at a water fountain. The water fountain looks like a sort of a solid object. But in reality, there are trillions of water particles rising and falling each second. We do not “see” individual water particles but just the appearance of a “sort of solid object with a certain shape.”
- In a “thought” (*citta*), the *manasikāra* and *cetanā cetasika* help the mind put together a “composite” of what is happening to give a more or less “solid appearance.”
- Same thing happens in seeing a continuous “ring of fire” when one swirls a light in a circular motion. At a given moment, the light is at a fixed position, but if we move the light fast enough, only see a “composite picture” in the shape of a continuous ring of light.

The Movie Analogy

6. Another example is a motion picture. When making a movie, many many static pictures are taken and then play them back at fast enough speed. If the playback speed is too slow, we can see individual pictures, but above a certain “projection rate,” it looks like real motion. Here is a video that illustrates this well:

[WebLink: YOUTUBE: Animation basics: The optical illusion of motion](#)

Our Sensory Experience Is Very Similar to the “Movie Analogy”

7. When we see the outside world, what happens is very similar to the above. At the end of the video it is stated that the “movie” we see is an illusion. **As the Buddha explained, that holds for real life as well.** In real life when we see someone coming towards us, what we actually see is a series of “static pictures” or *citta* projected at a very fast rate in our minds. That gives us the illusion of a “movie like experience.”

- In the above video, it is suggested that all the information from the “previous static frames” were put together by the brain. However, that is true only to a certain extent.
- The brain does put together the individual frames. But it is the mind that incorporates past memories and IDENTIFIES who is in the picture.
- **We not only “see” the video, but we also RECOGNIZE what is seen. We identify a given actor, we can even remember previous movies with that actor, we KNOW all about the scenes in the background, etc. It is not possible for the brain to have access to all those memories. This is a point that needs a lot of thought.**
- What happens according to *Abhidhamma* is the following. The brain periodically sends packets of acquired data put together by the cortex in the brain to the *hadaya vatthu*, which is basically the seat of

the mind. *Citta vūthi* arise in accepting that information from the brain, and it is the mind that does all the compiling (with the help of the *manasikāra* and *cetanā cetasika*) and that is how we EXPERIENCE it.

- I will go into more details later, but those are the key points.

8. We need to keep in mind that all animals have this capability too. A dog basically sees its environment just like we do and instantly recognizes the objects in the picture. Even an ant does too, even though its “world” is much more limited.

- Think about how a tiny ant can process all that information that allows it to move in a reasonable fast pace in hunting for food. It knows its territory, certain smells, and also remembers how to get back to its nest. All that information is NOT in that tiny body of an ant. More things to think about!

Brain Is Very Fast Computer

9. In the above video, it is shown that the slowest projection rate where the brain seems to process data is about 20 frames per second; this correspond to a data packet of about 50 millisecond duration. This is consistent with a recent findings from MIT that says the *minimum* time needed is about 20 milliseconds: [WebLink: Detecting Meaning in Rapid Pictures-Potter-2014](#).

- This is consistent with the *Abhidhammic* picture of the brain capturing segments of visual data and transmitting that information to the *hadaya vatthu*, which is the “mind door.” That takes place via the *cakkhu pasāda* that is located on the *manomaya kāya* close to the *hadaya vatthu*.
- *Abhidhamma*, of course, does not mention how long the brain captures visual data for a “seeing event” before sending it to the *hadaya vatthu*. But it does say that this information is now converted by the brain to a format suitable for transmission to the *hadaya vatthu*, and is sent there via a “ray system” (*kiraṇa*.) I assume that this encoded information is sent at the speed of light. Thus, the information gets to the *hadaya vatthu* almost instantaneously. Note that the *hadaya vatthu* is located on the *manomaya kāya*, but is close to the heart

But The Mind Is Faster

10. Of course we not only see things, but we also hear, smell, taste, touch, and think other thoughts all at the SAME TIME, it seems.

- The mind processes the information sent by the brain in a billionth of a second, much faster than the brain can process. So, the mind is mostly idle, “waiting for data from the brain.”
- Therefore, the “sensing rate” is limited by the relatively slow processing speed of the brain. According to current scientific studies mentioned above, brain processing happens at the millisecond time scale, a thousand-times slower than the mind. However, it is still more than fast enough for us to experience simultaneity in all sensory inputs.

Science Helping to "Fill-in-the-Blanks"

11. The scientific studies on the “minimum duration of a detectable event” are still at early stages (see #9 above.) We may be able to put together a more precise sequence of events in the future. Yet we have enough data to put together a qualitative picture of what happens.

- This is an excellent example of how science can help us “fill in the blanks” of the overall picture that the Buddha provided. Of course, such a scientific background was not there 2500 years ago.
- Once the Buddha was in a *Simpāsa* forest near *Kosambi*, and he took a few leaves into his hand and told the *bhikkhus*, “what I have taught you compared to what I know is like these few leaves compared to the leaves in this forest. But what I have taught you is more than enough for you to attain *Nibbāna*.”

- Thus modern science can provide us with details about the “big picture” of the Buddha, and we should be grateful to all those scientists for that knowledge. However, we should use that knowledge wisely and should not get carried away in spending too much time on such details.

Next, “[What is a Thought?](#)”,

13.2.4 State of Mind in the Absence of Citta Vīthi – Bhavaṅga

September 23, 2018; revised January 18, 2021; **Re-written November 22, 2021**; revised August 31, 2022 (several esp. #14)

“*Bhavaṅga* state of mind” is different from “*bhavaṅga citta*” that arises in a *citta vīthi*.

***Bhavaṅga* State of a Mind**

1. At the *cuti-paṭisandhi* moment of grasping a new *bhava*, a new *hadaya vatthu* (seat of the mind) arises due to *kammic* energy. Since a human *bhava* is grasped with a “good *nimitta*” associated with a “good *gati*,” the *bhavaṅga* state associated with that *hadaya vatthu* will reflect that *gati*.

- **That natural, “born-with” *bhavaṅga* state will be there until grasping the next *bhava*.** For example, even if one becomes unconscious, the mind will be in the *bhavaṅga* state. A *bhavaṅga* state does not have “conscious thoughts” or *cittā* (plural of *citta*.)
- That “natural *bhavaṅga*” (unlike any “temporary *bhava*” that we will discuss below) cannot be “felt.” For example, while unconscious we don’t “feel” anything, but the *hadaya vatthu* (seat of the mind) is in the *bhavaṅga* state.
- It is easier for some to grasp concepts than others. One factor for that is that one’s *bhavaṅga* is “better” than another. In other words, one with a *tihetuka* birth will have a better natural *bhavaṅga* state than one with a *dvihetuka* birth.
- I had written a post about *bhavaṅga* sometime back (which describes it from another angle), which you may want to read now to “seal in” your understanding: “[Bhava and Bhavaṅga – Simply Explained!](#).”

2. When a mind is not occupied with any specific *ārammaṇa* (i.e., when it is not focused on a sensory input), it is in the natural *bhavaṅga* state.

- **As we discussed above, that “natural state of mind” or “the *bhavaṅga*” is good in a human. Animals mostly live in fear and uncertainty.**
- However, one does not feel it as good or bad. If you see someone just staring into space (and if that person is not in deep thought), that mind is in the *bhavaṅga* state. If you talk to him, he would be startled into “wakefulness”. If you ask him what he was thinking about, he cannot answer because his mind was not on a particular *ārammaṇa*. It was in the *bhavaṅga* state.
- The *bhavaṅga* state can be compared to a started car in neutral gear. It is a dormant state. The mind becomes active when it comes out of the *bhavaṅga* state.
- Thinking happens only with an active mind with *cittā*, and *cittā* can arise ONLY in *citta vīthi*. See, “[Citta Vīthi – Processing of Sense Inputs](#).”

Switching from *Bhavaṅga* to Active *Citta Vīthi* – an Analogy

4. I have read the following nice analogy, but have forgotten where it was. In this analogy, a man is sitting in the middle of an enclosed small hut with six windows. He is sitting at a desk in the middle of the hut but can easily look up and see any of the six windows.

- The mental body (*gandhabba*) trapped inside the physical human body is like the man sitting at the table in the hut. Note that a *gandhabba* is essentially *hadaya vatthu* and *five pasāda rūpa*. But those are the critical components where the mental activity occurs, i.e., *citta* arises.

- When the mind is focused on the *bhavaṅga* state, that is comparable to the man absorbed in reading a book sitting at that table. He is not aware of what is happening outside the hut at all.
- In the same way, the *gandhabba* in the *bhavaṅga* state has no awareness of what is happening outside the human body. It is focused on the *bhavaṅga* (the *nimitta* grasped at the beginning of this *bhava*).

5. The man in the hut could be distracted from the book if a disturbance happens at one of the windows. For example, suppose someone outside comes to a window and knocks on it. Then the man would look up from the book at the window where the disturbance was.

- This is like a sense signal from one of five physical sense doors coming to one of the five *pasāda rūpa* around the *hadaya vatthu*. The *hadaya vatthu* — surrounded by the five *pasāda rūpa* — is like the man sitting in the hut with windows.
- The only difference is that signals for the *mana indriya* come directly to the *hadaya vatthu*, instead of through a sixth *pasāda rūpa*. Those signals (*namagotta* and *dhammā*) come through the *mana indriya* in the brain directly to *hadaya vatthu*.

Coming Out of the *Bhavaṅga* State

6. When the seat of the mind (*hadaya vatthu*) gets a signal from one of the six sense doors, it comes out of the *bhavaṅga* state and starts investigating the sensory input. If the sensory input is significant, it will act on it by generating *javana citta* in a *citta vīthi*.

- As we mentioned in the link in #2 above, a series of *cittā* arises in *citta vīthi*. A *citta vīthi* is based on an *ārammaṇa* coming through one of the five physical senses always will have 17 *cittā*. A *citta vīthi* can also arise directly in mind (*manodvāra*) and *manodvāra citta vīthi* have 12 or more *cittā*.
- When an *ārammaṇa* comes to the mind, the mind “comes out of the *bhavaṅga* state”. **That takes 3 *cittā* labeled as “*atīta bhavaṅga* (AB)” “*bhavaṅga calana* (BC), and “*bhavaṅga uccheda* (BU).”**
- In simple terms, that means it takes three thought-moments (*cittā*) for the mind to “get out of the *bhavaṅga* state” and start paying attention to the *ārammaṇa*. That activity takes place in *citta vīthi*. Let us look at the basic structure of a *citta vīthi*.

Components of a *Citta Vīthi*

7. When a signal comes to one of the five *pasāda rūpa*, the *hadaya vatthu*’s attention to the *bhavaṅga* state will be disturbed. **Then three *cittā* will rise to break away from the *bhavaṅga* state.**

- Those three *citta* are called *atīta bhavaṅga* (*atīta* means “old” or “past” in Pāli or Sinhala), *bhavaṅga calana* (*calana* — pronounced “chalana” — means move or vibrate), and *bhavaṅga uccheda* (*uccheda* means to “cut-off”).
- Just like it would take the man in the hut a few moments to become aware of the disturbance at the window and to look up, it will take those three *cittās* to pass before the *hadaya vatthu* “breaks away” from the *bhavaṅga* state. Then it will investigate what the disturbance is.

8. Now, *hadaya vatthu*, with the next *citta* will look to see which of the five *pasāda rūpa* is disturbed. That *citta* is called the “*pañcadvārāvajjana citta*,” where *pañca dvāra* means “five doors” referring to the five physical senses.

- If it turns out that the signal is coming through the *ghāna pasāda rūpa* (i.e., a smell), then the mind will turn to that door. Then a *ghānadvāra citta* arises. That will be the fifth *citta* in the *citta vīthi*.
- Now the mind will “accept” that signal; this is called a “*sampañicchana citta*.”
- Then it will fully realize that signal with the next *citta*: “*santīraṇa citta*.”

- Up to this point, there have been three *bhavaṅga citta*, a *pañcadvārāvajjana citta*, a *ghānavāra citta* (or any one of the five *pañcadvāra citta*), a *sampaṭicchana citta*, and a *santīraṇa citta*; seven *cittās* in all. **All these are *vipāka citta*.**

9. The eighth *citta* in the *citta vīthi* is called a “*votthapana citta*.” This is a very important *citta*, where one’s mind decides to take action based on the sensory input it receives.

- How to respond to a given sense input (*ārammaṇa*) is automatically decided by the mind, based on one’s *gati* (pronounced “gathi”) and the particular sensory input.
- We have discussed *gati* before: see, for example, “[The Law of Attraction, Habits, Character \(Gati\), and Cravings \(Āsavas\)](#),” “[How Are Gati and Kilesa Incorporated into Thoughts?](#),” “[Cetasika – Connection to Gati](#),” and “[Āsava, Anusaya, and Gati \(Gati\)](#).”
- Depending on the sensory input and one’s *gati*, the mind may decide to ignore the sensory input or take action if it gets attracted to it.
- Possible actions will include one or more of the following: Thinking along the same lines to oneself/talking out about it (with *vacī saṅkhāra*), and possibly taking bodily actions (with *kāya saṅkhāra*).

10. Such actions are implemented with seven *javana citta*; see, “[Javana of a Citta – The Root of Mental Power](#).” This is where *mano/vacī/kāya saṅkhāra* arises. Therefore, the seven *javana citta*, after the *votthapana citta* **are *kamma-generating citta*.**

- All *kammic* energies are generated in the seven *javana citta*. This is where *vacī saṅkhāra* and *kāya saṅkhāra* are generated. Then physical actions and speech are implemented by the brain, as needed.
- After seven *javana citta*, the *citta vīthi* ends with two *tadārammaṇa* (T) or ***bhavaṅga citta* (B)**, as we discuss next. Note that B here represents a *citta*, not the ***bhavaṅga state***. However, it has the same “qualities as the *bhavaṅga state*.”

A Pañcadvāra Citta Vīthi

11. Now we can represent a *pañcadvāra citta vīthi* as follows:

[*bhavaṅga state*] “**AB BC BU PD CV Sam San V J J J J J J T T**” [temporary *bhavaṅga state*] **OR**

[*bhavaṅga state*] “**AB BC BU PD CV Sam San V J J J J J J BB**” [*bhavaṅga state*]

- The difference depends on the strength of the sensory input that triggered the *citta vīthi*. Let us discuss that now.

Two Tadārammaṇa or Two Bhavaṅga Citta?

12. If the sense input was particularly strong (like a death in the family), that is a special case. Then those last two *cittās* will be *tadārammaṇa* (T), as shown in #11 above. Here *tadārammaṇa* indicates a “strong sensory input.” Such a strong sensory input is registered in the mind temporarily and “that state of mind” can linger for some time. That time duration can range from a few minutes to several days.

- Such a very strong *citta vīthi* is called an ***atimahāntārammaṇa (very strong) citta vīthi***. The sensory event “sinks into the mind” and the **mind stays in that state for a while** before settling back to the natural *bhavaṅga state*. This is the situation depicted in the first *citta vīthi* of #11.
- For example, if one gets frightened by a chasing dog, that agitated and frightened state may last for many minutes. If a parent or a child dies, the resulting sadness may last several days.
- However, eventually, the mind will return to the natural *bhavaṅga state*.

13. If the impact of the sensory input is not that strong, but enough for one to think about it, say something, or take action, then the seven *javana* will still flow. However, it will NOT register in the mind as a *tadārammaṇa* (which means “a strong thought object”). It is strong because it still generated *javana citta*.

- In that case, the last two *citta* will fall back to the “natural *bhavaṅga* mindset”, B, so now the *citta vīthi* is: “AB BC BU PD CV Sam San V J J J J J J B B”. This is the situation depicted in the second *citta vīthi* of #11.
- Such a *citta vīthi* is called a ***mahāntārammaṇa* (strong) *citta vīthi***.

14. If the sense input is not strong enough to generate interest in the mind, no *javana citta* will be generated.

- In that case, *citta* will fall back to the natural *bhavaṅga* state right after the *votthapana citta*: “AB BC BU PD CV Sam San V **B B B B B B B B**”.
- Such *citta vīthi* are called ***parittārammaṇa* (weak) or *atiparittārammaṇa* (very weak) *citta vīthi***. *Parittārammaṇa citta vīthi* are involved in dreaming. *Atiparittārammaṇa citta vīthi* are involved in breathing. We don’t even notice such *citta vīthi* of the last and weakest type.
- For more details, see; “[Javana of a Citta – The Root of Mental Power.](#)”

Strong Sensory Input Leaves the Mind in a Temporary *Bhavaṅga* State

15. This is the situation we discussed in #12 above. Let us discuss some examples.

- For example, many people get into a “state of sorrow” after hearing about the sudden death of a parent, spouse, etc. Even when they are not thinking about that person, they may be just sitting somewhere with very clear features of sadness on their faces.
- Sometimes people get very scared and it shows on their faces, but they cannot even think. They are too scared to think or to speak: “frozen in fear”.
- The same thing happens when one gets very angry: They may not say anything but we can see the anger in their faces. They themselves may not know what to do.

16. So, there are many such cases where we just get into a certain state of mind, which can be called “a **temporary existence or *bhava***”: the above three examples correspond to “sad *bhava*”, “scared *bhava*”, and “angry *bhava*” respectively.

- Such a “temporary *bhava*” or “temporary state of mind” can last many minutes or even days. **These may be denoted by B_T , compared to one’s natural *bhavaṅga* state, which we can denote by B.** After some time, the B_T state will slowly fade away to fall back to the natural B state.
- Active *citta vīthi* run during such a temporary B_T state would be influenced by that B_T state. **For example, if one becomes temporarily angry, his following actions could be influenced by that anger.**
- The natural *bhavaṅga* state (B) is the mindset grasped at the *cuti-paṭisandhi* moment; see #1 above.

Connection of “Temporary *Bhava*” to *Gati*

17. We can see right away that “angry *bhava*” comes easily to those who are easy to get angry. Such people can be “triggered” easily. Just saying some wrong words can make them angry.

- The same is true for other types of “temporary *bhava*”. Some can be easily frightened. Some can be easily tempted with sense pleasures.
- The tendency to easily get into such “temporary *bhava* (B_T)” will be reduced when one progresses on the Path.

- When one finally gets to the *Arahant* stage, one will not get into any “temporary *bhava*”; one has lost all such *gati*. One will have “an unshakable calm state of mind”.
- Thus, for an *Arahant*, only the natural *bhavaṅga* state (B) will be there until death. **Of course, any *anusaya* that was there initially will be gone.**

13.2.5 Bhava and Bhavaṅga – Simply Explained!

January 19, 2018; revised February 5, 2018; January 19, 2021; September 10, 2022

1. There is much confusion about these two key Pāli words: *bhava* and *bhavaṅga*. By clarifying what is meant by them, it would be much easier to comprehend many concepts in Buddha Dhamma, for example, how laws of *kamma* are enforced by nature via *Paṭicca Samuppāda*.

- Even in current Theravāda texts, there is confusion about the difference between *bhava* and *jāti*. If you have not read the post, “[Bhava and Jāti – States of Existence and Births Therein](#),” I recommend reading that first.
- Please do not be discouraged by the Pāli terms. Some have no suitable English terms, and it is better to learn their meanings and use the Pāli terms. Read through first, even if you don’t get the full meaning. It will become clear. I will make it simple in this post.
- I will make one or two more posts on this subject to include references from the *Tipiṭaka*.

2. *Bhava* means “the potential for existence” in EITHER **one of the 31 realms of possible existence** (we can see just the human and animal realms) or **some specific state of mind within the current life**.

- **The first category** includes human *bhava*, animal *bhava*, *Tusita deva bhava*, *peta bhava*, *Ābhassarā Brahma bhava*, etc., i.e., existence in one of the 31 possible realms. As we will see below, many such “potential *bhava*” exist for each living being. A new *bhava* will be grasped at the end of the current *bhava* based on the relative energies of various *bhava* (*kamma bīja*) cultivated in one’s past.
- Even during this lifetime, we “live under different existences” based on significant life events. **This is the second category**. For example, a normally “good person” may become violent for a short time upon seeing his wife in bed with another man, or one will live in a “state of sorrow” for many days upon the death of a loved one.
- Both those are “*bhava*,” states of existence.

3. *Bhavaṅga* (“*bhava*” + “*aṅga*,” where *aṅga* means “part”) therefore means a “state of mind” that is inseparable from any existence.

- When not disturbed by a strong external sense input (via the five physical senses or the *mana indriya*), a human mind is in its natural *bhavaṅga* state received at the beginning of this human *bhava*. Each person’s *bhavaṅga* state is different (based on the sense object taken in at the *paṭisandhi* moment) and feels “neutral” to each person. For example, when one is in deep sleep or “just staring out into space,” one’s mind is likely to be in **one’s natural *bhavaṅga* state, which we can denote by B**.
- On the other hand, when one’s mind is deeply affected by some event like in the examples we mentioned above, then the mind goes into a “**temporary *bhavaṅga* state**” corresponding to that event (“state of rage” when angry or “state of sadness” upon the death of a loved one). **We can denote this by B_T**.

4. Now, this “state of mind” (B or B_T) could be interrupted by a *citta vīthi* triggered by an external sensory input coming through one of the five physical senses or the *mana indriya*.

- For example, when another loved one comes to pay respects to the dead loved one (who is in a “sad B_T”), one’s mind may become happy for a few minutes upon seeing that person. Then they may recall a past event about the dead person, and both may get sad again. That “sad temporary *bhavaṅga*

state” (B_T) may not go away for several days. And then the mind will gradually fall back to the natural *bhavaṅga* state, B.

- That temporary state of mind may last only minutes or hours for less strong life events.
- For example, if one sees an old friend on the street, one’s mind may become happy and talks excitedly. After the friend departs, that “happy” B_T state may linger for a while. But then it would be suppressed when another thought process starts based on a different *ārammaṇa*.

5. Therefore, within a given day, one’s mind could enter several B_T states. But unless a B_T state is triggered by a significant life event like losing a loved one, the mind would fall back to the natural B state when one wakes up the next morning.

- For the reasons discussed above, the natural *bhavaṅga* state, B, could be called the “*uppatti bhavaṅga*,” and those temporary *bhavaṅga* states, B_T , could be called “*pavutti bhavaṅga*.”
- However, such labels are not used in the *suttā* or *Abhidhamma*. I mention that to make the connection better.

6. Please reread the above discussion. That should help one get the basic ideas about what *bhava* and *bhavaṅga* are. **It is important to note that *bhavaṅga* is a state of mind, not *citta vīthi* (thoughts).**

- Another way to describe a *bhavaṅga* state is to say that while the mind is in that state, one has corresponding *gati* (*gathi*). This is also an important aspect.
- For example, when one gets into a B_T state of anger, then one, of course, has predominantly “angry *gati*” during that time. Furthermore, one who generally has cultivated “angry *gati*” is likely to easily get into a B_T state.
- By the way, the Sinhala word for *bhava* is just “*Bava*” (බව). For example, when one sees an eye-catching thing and generates a “*lobha bhava*” at that moment: ලුණේ බව ආවම ලුණේ යකෝ වනෙමි.

7. Another important aspect is that when one is in an “angry B_T state,” **it is easier to generate more angry thoughts. This is due to the “*Anantatra and Samanantara Paccaya*”: That “state of mind” is receptive to more angry thoughts. This is why it is important to try to get the mind away from the angry state to focus on something entirely different.**

- **It is good to contemplate the** above basic ideas with examples from one’s life. For example, when one is angry at someone, it is easier to recall such bad past experiences and suppress any past good experiences coming to mind.

8. When one has a calm state of mind when reading/listening to Dhamma, it is easier to generate compassionate thoughts about others. Therefore, it is important to “set the background” when starting an important task.

- This is why people go to a temple, offered flowers, etc., recite *gāthā*, before sitting down to listen to a *desanā* by a *bhikkhu*. The state of mind is critical. One cannot comprehend deep *Dhamma* if the mind is angry or even in an excited state (like thinking about a sick child at home, for example).
- This is why it is a good idea to at least recite the qualities of the Triple Gem (Buddha, *Dhamma*, *Saṅgha*) before starting a formal meditation session; see “[Buddhist Chanting](#).”

9. Another important application of the “*Anantatra and Samanantara Paccaya*” relevant to this case is that while in a human *bhava*, only *kamma vipāka* are “compatible” with the human *bhava* and human *gati* (and thus human body) can bring in *vipāka*.

- Even if one has *kamma bīja* suitable to bring harsh *vipāka* experienced in the *apāyā*, they will not be able to bring *vipāka* as long as one is with a human body. Similarly, any highly pleasurable *vipāka* has to wait until one is born in a *deva bhava* with a fine body suitable to experience such good *vipāka*.

- An animal always lives with fear for its life; that is part of *bhavaṅga*. Similarly, a *tihetuka* human has a natural, pleasant demeanor; an *ahetuka* human (disabled, etc.) has a weakened mindset. A *dvihetuka* is in between.

10. Yet another is the state of mind at the dying moment, when the grasping of a new *bhava* is getting close (if *bhava* energy is to run out at death, i.e., if there are no more *jāti* left in the current *bhava*).

- Here the *kammic* power will start bringing various thoughts to mind via the *mana indriya* compatible with the strongest *kamma bīja*. For example, one who is about to grasp a new life in hell (*niraya*) may start recalling some fear-generating events (even from previous lives), and one's mind could be bent to a "fearful temporary *bhavaṅga* state (B_T). Then more and more such fearful events will start coming into the mind.
- This is why some dying people's fear can be seen in their eyes, even if their bodies have become non-responding.
- Some people start to yell with fear when they see an especially unpleasant *bhava* coming their way. Flashes of the existence awaiting will come to their minds, such as burning in hell, being cut by sharp weapons, or just seeing others engulfed in flames.
- On the good side, some people will remain calm with a pleasant look on their faces, even if their bodies are becoming non-responding. Some smile when they see the scenery of the happy environment they are going to.
- This basic knowledge can explain many phenomena like that.

11. For those familiar with *Abhidhamma*, *bhavaṅga citta* are called "*dvāramutta citta*" or *citta* that arise without needing a sense door. Let me clarify this in simple terms.

- When we hear something, that sound comes through our ears, and many *citta vīthi* will be generated at the *manodvāra* (mind-door) after that initial *sotadvāra citta vīthi*. A seeing event may be started by a picture seen with eyes, etc.
- This is a swift process. For example, we get sensory inputs to the ears and eyes when watching a movie. But *citta vīthi* flow so fast that the mind will fall to a *bhavaṅga* state (B or B_T) even between the rapidly incoming *citta vīthi*.
- Therefore, what we see, hear, taste, smell, or body touch are all due to *citta vīthi*. Even our thoughts generated by the mind (coming through the *mana indriya*), are due to *citta vīthi*.

12. In contrast, a *bhavaṅga* state (B or B_T) DOES NOT come through any of the five physical senses (eyes, ears, nose, tongue, body) or the *mana indriya* in the brain. That is why it is called "*dvāramutta citta*" or "*citta* that arise without the need for a sense door."

- Therefore, *bhavaṅga* is a "stationary state of mind" that falls back to when there are no running *citta vīthi*.
- Note that the *mana indriya* — where concepts and memories come to the mind — is unknown to scientists; see, "[Brain – Interface between Mind and Body](#)."
- *Bhavaṅga* (B or B_T) is a state of mind with a corresponding *gati*. There are no associated *citta vīthi*. But of course, some *bhavaṅga citta* can appear in a *citta vīthi*; see "[Citta Vīthi – Processing of Sense Inputs](#)."

13. It is also important to note that the series of *cittā* do not flow continuously. It is the kammic energy that runs without a break during *samsāra*.

- For example, when one is born in the *asañña* realm, no *citta* is generated for 500 *mahā kappa*. Remember that a *mahā kappa* is our solar system's age, which lasts about 15 billion years!

- During that whole time, the body of that being in the *asañña* realm is kept alive by the *kammic* energy for that *bhava*, and the *bhavaṅga* is active during that time. As we emphasized above, *bhavaṅga* is a state of mind.

14. Please keep in mind that it is unnecessary to learn the material in #11 and #12 above if one can grasp the basic idea of what is meant by *bhava* and *bhavaṅga*. That is enough to grasp important concepts at a bit deeper level.

- We will continue this discussion in one or more upcoming posts.

13.2.6 Citta Vīthi – Processing of Sense Inputs

Revised April 26, 2018; revised May 30, 2018; October 17, 2019; February 24, 2020; January 18, 2021; August 9, 2021; October 27, 2021; May 27, 2022; July 9, 2022; August 31, 2022; rewritten January 28, 2023 (esp. #15)

Introduction

1. Thoughts (*citta*) do not arise as individual *citta*; see, “[Essential Abhidhamma – The Basics](#).” They appear in the mind due to sensory inputs via the six senses. Those are *cakkhu*, *sota*, *ghāṇa*, *jivhā*, and *kāya indriya*, corresponding respectively to the eye, ear, nose, tongue, and body, and *mana indriya* (located in the brain; see, “[Brain – Interface between Mind and Body](#)”).

- Sensory input through any of the five physical senses received and analyzed by the mind in a “*citta vīthi*” (series of *cittā*) with 17 *cittā*. Those are *pañcadvāra citta vīthi*. *Pañcadvāra* (“*pañca*” + “*dvāra*” where “*pañca*” is five and “*dvāra*” is a door) means five (physical) doors. See the post, “[What is Mind? How do we Experience the Outside World?](#).”
- *Vīthi* is pronounced, “veethi.” It means “road” since, like a road, the flow is continuous. And *citta* pronounced “chiththā.”
- That is because the convention for spelling Pāli words differs from “standard English.” See “[“Tipitaka English” Convention Adopted by Early European Scholars – Part 1](#)” and “[“Tipitaka English” Convention Adopted by Early European Scholars – Part 2](#).”
- While *pañcadvāra citta vīthi* always have 17 *cittā*, *manodvāra citta vīthi* typically have 10-12 *cittā* in them.
- Here we will describe both types of *citta vīthi*.

Pañcadvāra Citta Vīthi

The sequence of *cittā* in a *pañcadvāra citta vīthi* is as follows:

# in the Series	Citta Type	Symbol
1	<i>Atīta Bhavaṅga</i> (Past <i>Bhavaṅga</i>)	AB
2	<i>Bhavaṅga Calana</i> (Vibrating <i>Bhavaṅga</i>)	BC
3	<i>Bhavaṅga Upaccheda</i> (Arrest <i>Bhavaṅga</i>)	BU
4	<i>Pañcadvārāvajjana</i> (Sense-door adverting consciousness)	PD
5	<i>Cakkhu Viññāṇa</i> (eye-door perceiving consciousness) - for example	CV
6	<i>Sampaṭicchana</i> (Receiving consciousness)	Sam
7	<i>Santīraṇa</i> (Investigating consciousness)	San

8	<i>Votthapana</i> (Determining consciousness)	V
9-15	<i>Javana</i>	J
16, 17	<i>Tadārammaṇa</i> (Registering consciousness)	T

2. When the mind is not dealing with a *pañcadvāra citta vīthi* or a *manodvāra citta vīthi*, it is in a “dormant state” called the *bhavaṅga*. *Bhavaṅga* (“*bhava*” + “*aṅga*” where “*aṅga*” means “part of”) thus represents the particular “*bhava*” of the living being, in this case, a “*human bhava*.” The conventional English term is “life continuum,” but we will use *bhavaṅga*.

- For a discussion on *bhavaṅga*, see “[State of Mind in the Absence of Citta Vīthi – Bhavaṅga](#)” and “[Bhava and Bhavaṅga – Simply Explained!](#)”
- The *bhavaṅga* state is conventionally represented by the following series as if they are a series of *bhavaṅga citta*:

..B B B B B B B

However, *bhavaṅga citta* can arise only within a *citta vīthi*.

- When the mind is in the *bhavaṅga* state, we do not “feel” anything. Like an eye cannot see itself, the mind in the *bhavaṅga* state cannot “see itself.” That is the “dormant state” in-between sense inputs. When one is in deep sleep or unconscious, the mind is entirely in the *bhavaṅga* state.
- The mind is generally in the *bhavaṅga* state. It comes off the *bhavaṅga* state when an object of interest comes through one of the five physical senses (*cakkhu*, *sota*, *ghāṇa*, *jivhā*, or *kāya indriya*.) A “*dhammā*” coming to the “*mana indriya*” can do that too.
- As we will see later, the mind is in the *bhavaṅga* (B) state most of the time, even if the mind feels very active. Even while watching a movie, the mind is mainly in the *bhavaṅga* state (in between various types of *manodvāra* and *pañcadvāra citta vīthi*.) Yet, our brains are stressed to the limit since they need to analyze the movie’s sights and sounds at a rapid pace. See “[Vision Is a Series of “Snapshots” – Movie Analogy.](#)”

3. We can represent the *pañcadvāra citta vīthi* in the above Table as follows:

B B B B B “AB BC BU PD CV Sam San V J J J J J J T T” B_T B_T B_T B_T.....

Note that this is the strongest *citta vīthi*. There are many variations WITHIN this *citta vīthi*; some do not have T or even J *citta*. Different types of *pañcadvāra citta vīthi* are discussed in detail in “A Comprehensive Manual of Abhidhamma” by Bhikkhu Bodhi (2000).

- In the above case, the *bhavaṅga* temporarily changes to B_T due to the strong sensory input. See “[State of Mind in the Absence of Citta Vīthi – Bhavaṅga](#).”
- In the above example, we took a “*cakkhu viññāṇa*” event, i.e., what happens when a picture comes to the mind via the “*eye indriya*” and the mind investigates that picture.
- First, the “mind comes off the *bhavaṅga* state, and that takes three thought moments: AB (*atīta bhavaṅga*), BC (*bhavaṅga calana*), and BU (*bhavaṅga upaccheda*). Here “*atīta*” (or “*atheetha*”) means “past,” “*calana*” (pronounced “*chalana*”) means “move” or “vibrate,” and “*upaccheda*” (or “*upachcheda*”) means “stop” or “break away.”
- Then the mind looks at the “five physical senses or *pañcadvāra* (PD)” and determines through which of the five sense inputs it is coming, and then picks the relevant door, which in the present case, we assumed to be *cakkhu viññāṇa* (CV).
- Then it investigates what that “picture” is with the *sampaṭicchana citta* and decides what type (like, dislike, etc.) with the *santīraṇa citta*. Based on those, the *votthapana* (V) *citta* determines what actions to take.

4. According to *citta niyāma* (or Law of *Cittā*), a *pañcadvāra citta vīthi* always has 17 *cittā*. For an object of “high interest,” *atimahantārammaṇa citta vīthi* arise with *javana citta*. For example, in the case of a visual object, that visible object must be of high interest, and the light conditions for seeing it are good.

- In such cases of “high interest,” all-important seven *javana citta* arise based on that determination made with the *votthapana citta* (V). Potent *kammas* are done with *javana citta*: “[Javana of a Citta – The Root of Mental Power.](#)”

5. In the last two *Tadārammaṇa* (T) *cittā*, the mind takes in the “flavor” or the “essence” of the sense object. Then it falls back to the *bhavaṅga* state at the termination of the *pañcadvāra citta vīthi*. Only the very strong (*atimahāntārammaṇa*) *citta vīthi* have them, and such strong impressions are “retained in one’s memory” for some time (i.e., one will not forget immediately.)

- Until one loses that “temporary memory,” it becomes one’s “temporary *bhavaṅga*.” For example, when one hears about the death of a parent, one will become sad, and that “sad state of mind” will be there for days.
- For a discussion on that, see “[State of Mind in the Absence of Citta Vīthi – Bhavaṅga](#)” and “[Bhava and Bhavaṅga – Simply Explained!](#)”
- Of course, ALL happenings get recorded as *nāmagotta*. Even unimportant events get recorded. The ability to recall events depends on one’s capabilities. Sometimes, such limited capabilities become possible due to “*puñña iddhi*” for even average humans. See “[Recent Evidence for Unbroken Memory Records \(HSAM\).](#)”

The Simile of Tasting a Mango

6. A *pañcadvāra citta vīthi* is the procedure by which the mind experiences an external object (sight, sound, taste, etc.). The following analogy is In some commentaries to the *Tipiṭaka*.

- Suppose a weary traveler is asleep at the foot of a mango tree. This state of being asleep is analogous to the *bhavaṅga* state. Now a ripe mango drops to the ground near the traveler. This event resembles a visible object of great intensity coming to the “eye door.”
- The mango falling awakens the traveler and causes him to raise his head. This event is similar to the appearance of the visible object at the eye door, causing the *bhavaṅga* to vibrate twice and become arrested; now, he is not asleep anymore.
- The traveler opens his eyes and looks around to inquire about the disturbance. That is similar to the *pañcadvārāvajjana* (PD) *citta* adverting the mind towards the sense object.

7. The traveler sees the fallen mango. That is analogous to the eye-consciousness of seeing the object (CV). Now the man picks up the mango, which is similar to the *sampaṭicchana* (Sam) *citta* receiving the *cakkhu viññāṇa*. **By the way, *Sampaṭicchana* comes from “*saṇ*” + “*paṭicca*”; you can contemplate on this to get the basic idea; see, “[What is “Saṇ”? Meaning of Sansāra \(or Samsāra\)?](#)”.**

- Then the man inspects the mango to see whether it is suitable for eating. That is similar to the *santīraṇa citta* (“*saṇ*” + “*tīraṇa*” or “*theerana*,” where “*theerana*” means “decide on whether the sense object is good or bad”) investigating the sense object.
- Then the man decides that the mango is good and edible. That is similar to the *votthapana* (“*vottha*” + “*pana*” meaning “deciding on what to do” or in Sinhala, “*ආලෝකනය*” or “energize”). *votthapana* is pronounced, “*voththapana*.” If it were a rotten mango, one would throw it away.
- If one understands Sinhala, it is easier to understand Pāli. As I have mentioned, the Sinhala language is close to Pāli and not Sanskrit.

8. The man bites the mango seven times, eating and enjoying the taste. That is similar to seven *javana citta* enjoying the taste of the sense object. These are the “actions corresponding to the decision made with the

votthapana citta“; if the mango tastes bad, the mind will generate appropriate *javana citta* to throw the mango. We will discuss such complex processes later.

- Then the man gathers the remnants of the fruit and the juice sticking to his teeth with his tongue and swallows twice. That is similar to the two *tadārammaṇa* (T) *cittā* following the *javana citta*.
- Task completed, the man falls back to sleep. That is similar to the resumption of the *bhavaṅga* state.

Three *Manodvāra Citta Vīthi* will follow Each *Pañcadvāra Citta Vīthi*

9. According to the *Tipiṭaka*, three *manodvāra citta vīthi* will follow each *pañcadvāra citta vīthi*. The *javana citta* in those three *citta vīthi* become increasingly intense, and it is the *javana citta* of the last *manodvāra citta vīthi* that instructs the brain to get the body to act (and initiate speech).

- We will discuss this in detail in future posts. But it takes three more *manodvāra citta vīthi* to complete the sequence of a thought process initiated by a *pañcadvāra citta vīthi*. When one gets “absorbed” (for example, keeps looking at an attractive picture), one may be generating numerous such “one plus three processes,” with the mind falling back to the *bhavaṅga* state repeatedly in between.
- It will be easier to visualize this process by understanding what happens when we look at an object, for example, in scientific terms; see “[Citta and Cetasika – How Viññāṇa \(Consciousness\) Arises](#)” (especially starting with #4 of that post).

Now let us look at a typical *manodvāra citta vīthi*.

Manodvāra Citta Vīthi

# in the Series	Citta Type	Symbol
1	<i>Bhavaṅga Calana</i> (Vibrating <i>Bhavaṅga</i>)	BC
2	<i>Bhavaṅga Upaccheda</i> (Arrest <i>Bhavaṅga</i>)	BU
3	<i>Manodvārāvajjana</i> (Mind-door adverting consciousness)	MD
4-10	<i>Javana</i>	J
11, 12	<i>Tadārammaṇa</i> (Registering consciousness)	T

10. We can represent the *manodvāra citta vīthi* in the above Table as follows:

B B B B B “BC BU MD J J J J J J J T T” B B B B B.....

- Here it takes only two thought moments to be released from the “*bhavaṅga* state”: BC (*bhavaṅga calana*) and BU (*bhavaṅga upaccheda*).
- The mind already knows the *ārammaṇa* (thought object).
- The *manodvāra citta* (MD) is the same as the *votthapana citta*, where the decision is made.
- Then seven *javana citta* arise, and then the *citta vīthi* ends with the two *Tadārammaṇa* (T) *cittā*.
- Like in the case of a *pañcadvāra citta vīthi*, we also considered an object with high intensity as an example. We will discuss the variations when handling signals of lower intensities as the need arises. However, this discussion is sufficient to understand how the two types of *citta vīthi* function in cognitive processes.

11. Now, we can write the complete sequence of *citta* for a sensory event initiated by a *pañcadvāra citta vīthi* as:

B B B B B “AB BC BU PD CV Sam San V J J J J J J J T T MD J J J J J J J T T MD J J J J J J J T T MD J J J J J J J T T” B B B B B.....

15. The first above is the *jhāna citta vīthi* for an average person. The second is for one with “higher wisdom.”

- See above for explanations on B, BC, BU, MD, P, U, A, and G.
- Then it goes through a *Jhāna* (Jh) *citta*. The number of “Jh” *cittas* in a *citta vīthi* will increase with practice.
- **However, *Gotrabu* (change of lineage) for *jhāna* differs from *magga phala*.**
- Attainment of *anāriya jhāna* is a “*puññābhisāṅkhāra*” or an “*āneñjābhisāṅkhāra*” depending on whether it is a *rūpāvacara* or *arūpāvacara jhāna*. Either of them results via *Akusala-Mūla Paṭicca Samuppāda*, which starts with “*avijjā paccayā saṅkhāra*.”
- Therefore, while this attainment will lead to a birth in a *Brahma* realm, those *yogis* will ALWAYS return to the human realm; after that, future rebirths in the *apāyā* are still possible. See “[Rebirths Take Place According to Abhisāṅkhāra](#).”

Parikamma, Upacāra, Anuloma, and Gotrabu

16. Getting to a *magga phala* or a *jhāna* does not happen in a single step. One first gets into the *parikamma* stage and may stay there for some time. Same for other stages until getting to the *gotrabu* stage. **At the *gotrabu* stage, the change becomes permanent; it is a “change of lineage.”**

- The intermediate steps of *parikamma*, *upacāra*, and *anuloma* can be labeled preparation, approach/access, and “getting close to the change of lineage.”

13.2.7 Javana of a Citta – The Root of Mental Power

Revised July 15, 2020; July 22, 2022; July 30, 2022

Javana Cittā Are Associated with Abhisāṅkhāra

1. The power of the human mind has been discussed in several posts starting with “[Power of the Human Mind – Introduction](#).” There are different kinds of *cittā*; the powerful ones are *javana cittā* (“*javana*” means an arrow in flight; it can be highly potent).

- Such *javana cittā* are responsible for *abhisāṅkhāra*, those *saṅkhāra* that are potent and will lead to (good or bad) consequences. *Puññābhisāṅkhāra* is the meritorious *abhisāṅkhāra* that will lead to good results, and *apuññābhisāṅkhāra* is the immoral *abhisāṅkhāra* that leads to adverse outcomes.
- *Javana cittā* arise in *pañcadvāra cittā vīthi* and *manodvāra cittā vīthi* when the object (*ārammaṇa*) is evident and robust; see, “[Citta Vīthi – Processing of Sense Inputs](#).”

Vipāka Cittā Do Not Have Javana Power

2. Out of the 54 types of *cittā* in the *kāma loka* (the 11 lower realms including the human realm), 29 are *javana cittā*: 12 *akusala cittā*, eight *mahā kusala cittā*, eight *mahā kiriya cittā*, and the functional smile-producing *cittā* (the latter nine *cittā* only for an *Arahant*).

- A *kusala citta* generates power for rebirth in the human or above realm, and helps progress towards *Nibbāna* or “cooling down.”
- When one does an *akusala cittā*, one generates power to form *kammic* energy for rebirth in the *apāyā* (lowest four realms).
- Thus for average human beings, there are only 20 *cittā* out of 54 that are *javana cittā*: 12 for doing evil deeds and 8 for good deeds (here deeds means thought, speech, or bodily action).

- Thus, *vipāka citta* do not have *javana citta*. Therefore, in detecting any sensory input (seeing, hearing, etc.), *javana citta* is absent. They are *prittārammaṇa* (slight) and *atiparittārammaṇa* (very slight) *citta vīthi*. However, based on these *vipāka citta vīthi*, we MAY instantly initiate potent *atimahattārammaṇa* (very high) and *mahattārammaṇa* (great) *citta vīthi* that will have *javana citta* in them.
- Therefore, if we start making plans (buy that picture, re-listen to that song, etc.) based on those visuals, sounds, etc., then subsequent *citta vīthi* will have *javana citta* in them, leading to *abhisaṅkhāra* (GENERATE *kammic* power).

Javana Power Depends on the Type of Citta

3. Not all *akusala javana citta* have the same power. Also see “[How to Evaluate Weights of Different Kamma](#)” and “[12. Key Factors to be Considered when “Meditating” for the Sotāpanna Stage.](#)”

- Out of the eight greed-rooted *cittā*, those four done with pleasure (*somanassa-sahagata*) are more robust than the done with neutral feeling.
- Next, those associated with *micchā diṭṭhi* (or *diṭṭhi-sahagata*) are more powerful than the four generated without wrong vision (or *diṭṭhi-vippayutta*).
- The power of greed-rooted *cittā* depends on whether they arose spontaneously (sometimes erroneously labelled as *asaṅkhārika*) or occurred intending to receive something in return, i.e., *sasaṅkhārika*.
- The two hate-rooted *akusala citta* always arise with displeasure and are associated with aversion (dislike.) One that is spontaneous (unprompted) is stronger than the prompted.
- The two ignorance-rooted *akusala citta* always arise with neutral feelings. The one based on *vicikicchā* is stronger than that based on *uddhacca*.

Javana Strength of Akusala Citta

4. The above list gives the order of strength of the *akusala citta* and appears in that order in “[Conditions for the Four Stages of Nibbāna.](#)”

- Thus the first *lobha citta* that is “connected with the wrong view, accompanied by pleasure” or in Pāli, “*somanassa-sahagata, diṭṭhi-sampayutta citta*” is the strongest *akusala javana citta*.
- The last of the 12 *akusala citta* is “one accompanied by equanimity and associated with high-mindedness” or, in Pāli, “*upekkha-sahagata uddhacca-sampayutta citta.*”

Javana Strength of Kusala Citta

5. The power of the human mind can work both ways, for the good or the bad. Now let us see how the eight *mahā kusala* (wholesome) *cittā* rank according to the *javana* power.

- Here again, four done with a joyous heart (*somanassa-sahagata*) take precedence over those done with neutral feeling.
- Next, those done with knowledge, called “*ñāṇa-sampayutta*,” have higher power compared to those done without knowledge (*ñāṇa-vippayutta*). Here, knowledge could be at two levels: (i) understanding how the laws of *kamma* work and (ii) understanding *anicca*, *dukkha*, and *anatta* in addition to (i).
- Finally, they are sorted by whether the response is spontaneous (higher-merits) or prompted/induced by an expectation of a profit (*sasaṅkhārika*).

6. Thus, the most potent *kusala citta* is “one accompanied by joy, associated with knowledge” or in Pāli, “*somanassa-sahagata, ñāṇa-sampayutta citta*”.

Here one does a good deed with a complete understanding of its benefits and thus with a joyous heart. The action is spontaneous and joyful BECAUSE one is fully aware of its ethical consequences. Since it is automatic, the knowledge must be in one's mind.

- The weakest *kusala citta* is “one accompanied by the neutral mind, dissociated with knowledge, and for one's advantage” or in Pāli, “*upekkha-sahagata, nāṇa-vippayutta, sasaṅkhārika citta*.” Here one may do a good deed without knowledge and on the prompting of others or after some deliberation. Such acts will bring benefits, but since they have less *javana* power, the benefits are less.

Some Examples of “*Javana* Power”

7. Let us take some examples for clarification.

- Some people are so deep on the wrong path that they enjoy committing evil deeds. Or, they get into a mindset where such deeds become enjoyable. We have heard of a person killed by multiple stabbings with the body gruesomely mutilated. Such an act is the worst of the worst.
- It should be easy to imagine why the *javana* for *citta* associated with such “passionate” killings are very intense. The killer is absorbed in that act and is generating potent mental power to carry out the physical act; by the way, any physical activity originates in *citta*. Thoughts lead to actions. See, “[Neuroscience says there is no Free Will? – That is a Misinterpretation](#)”.
- That is also why a *kamma* becomes a “*kamma patha*” or a “strong *kamma*” for bodily action. See “[Details of Kamma – Intention, Who Is Affected, Kamma Patha](#).” One needs a strong *javana* to carry out that task. If one is aware of the consequences of such acts (i.e., do not have *micchā diṭṭhi* or wrong vision), then even if one started stabbing, one may likely that one may catch oneself and stop.

8. Conversely, even the smallest act of kindness can bring many benefits if done with complete understanding and a joyous heart. Here the “mental power” or the *javana* comes through knowledge. We see these kinds of “small acts of kindness” all the time, and we can even share in those merits when our hearts become joyful too.

- Writing a check for a lot of money is easy for a wealthy person. If done to get publicity or due to “outside pressure,” it would not bring many benefits. If a poor person shares what they can with another in a worse situation with joy, that will bring much more benefit.

Samvega – Indication of *Javana* Strength

9. High *javana* power manifests as “*sanvega*” (*saṇ* + *vega*, where “*vega*” means fast) or one's emotions. See, “[What is “Saṇ”? – Meaning of Samsāra](#)” for the meaning of “*saṇ*”). Therefore, “*sanvega*” depicts a potent emotional condition. If it is for the “good,” one will be doing *puññābhi saṅkhāra* (meritorious acts), and an evil deed done with “*sanvega*” will be a potent *apuññābhi saṅkhāra* (immoral actions).

- In the literature, “*sanvega*” is commonly written as “*saṁvega*”; as with many other such words, replacing “*saṇ*” with “*saṁ*” leads to distortion of the meaning of the word. Other such misspelled words are *samsāra*, *saṁvedana*, *saṁyoga*, and *saṁvara*; see, “[What is “Saṇ”? – Meaning of Samsāra](#).”
- However, some words like “*sammā*” (“*saṇ*” + “*mā*”) are correct because that is phonetically correct.
- In the Sinhala language, “*saṁvega*” is commonly used to describe emotionally intense situations, mostly sad situations. However, we can see that it can apply to any emotional situation.

Emotions Felt Close to the Heart, Not in the Brain

10. The mind and the heart are in close contact. Even that person who derived pleasure by stabbing someone many times will have a heavy heart until death, no matter how bad a person they are. It is in human nature. Of course, when we do a meritorious act, too, we feel joy in our hearts.

- We “feel” close to the heart because *citta* arises in the “*hadaya vatthu*” close to the physical heart. The *hadaya vatthu* is in the *manomaya kāya*, like an “energy field” spread through the physical body. See “[Manomaya Kāya \(Gandhabba\) and the Physical Body](#)” and “[Ghost in the Machine – Synonym for the Manomaya Kāya?](#).”

Javana Strength Depends on the Level of Desire (Good or Bad)

11. The *javana* power in our thoughts significantly affects “how engaged we are.” The potency of a good or an immoral *citta* depends on the strength of the desire to get it done. Three out of four bases of mental power, *chanda*, *citta*, *virīya*, originate due to this; see “[The Four Bases of Mental Power \(Cattāro Iddhipāda\)](#).”

- And the fourth factor of *vīmaṃsā* (reasoning/investigation) is vital because that is how one gains the all-important *ñāṇa* (wisdom); see #5,#6 above. When one truly comprehends *anicca*, *dukkha*, and *anatta*, that leads to the cultivation/growth of the *paññā cetasika*, reducing ignorance (*avijjā*).

It Is Good to “Re-live” Past Good Experiences

12. Another thing that comes out of this analysis is that it is good to contemplate the past good deeds and “re-live” that experience to gain *citta pasāda* or a joyful mind.

- Similarly, it is NOT good to do that for past evil deeds. It is better to forget them and get a new start. If something like that comes to the mind, focus the mind on a good deed.
- That is part of “*Ānāpāna*.” We need to keep and cultivate “good things” and “discard” bad things; see, “[7. What is Ānāpāna?](#).”
- Our thoughts are what ultimately matter, and they arise due to our character (*gati*); the more we do “*Ānāpāna*” correctly, the more our “*gati*” will change for the better.

13. Finally, These *javana citta* have the power to produce *suddhaṭṭhaka*, the fundamental building blocks of *rūpa*; see “[The Origin of Matter – Suddhaṭṭhaka](#).”

Next, “[Cutī-Patisandhi – An Abhidhamma Description](#)”,

13.2.8 Cetasika – Connection to Gati

Revised March 26, 2022; August 26, 2022

Cetasika that arise in *citta* influence a person’s moral and immoral character (*gati*).

Seven Universal Cetasika

1. In the introductory posts in *Abhidhamma* we saw that there are **seven universal *cetasika* (mental factors)** that arise with every *citta* (loosely translated as a thought, but not correct); *citta* is pronounced “chiththā” and *cetasika* pronounced “chethasikā.”

- The seven universal *cetasika* are essential in forming any kind of *citta*, whether immoral (*akusala*) *citta*, moral (*kusala*) *citta*, or a *citta* that does not have any *kammic* potential.
- Some other *cetasika* provide “character” to *cittā*. Whether a given *citta* is good or bad depends on whether a “good” or “bad” set of *cetasika* arises with it; see, “[Citta and Cetasika – How Viññāna \(Consciousness\) Arises](#).” They are listed in “[Cetasika \(Mental Factors\)](#),” and you may want to print them out for reference when reading this post. There is no need to memorize them. With time, one may even know them by heart.
- Out of the 54 types of *cittā* in the *kāma loka*, there are 12 *akusala citta* and 8 *kusala citta*. The other 34 are *vipāka citta* and *kiriya citta* which do not generate *kammic* power.

Six Cetasika That May Appear in Kusala or Akusala Citta

2. Then, there are six *cetasika* called **particulars (also called occasional)** or *pakiṇṇaka* that **MAY** appear in any *citta*. Therefore they do not determine the **PURPOSE** of the *citta*, but they **HELP** with any type of purpose that was intended.

- For example, *virīya cetasika* could be in a *kusala citta* and it can also be in an *akusala citta*. In either case, the *virīya cetasika* will **HELP** intensify the effort with that *citta*.

Cetasika That Appear Only in Kusala or Akusala Citta

3. Out of a total of 52 *cetasika*, the other 39 (= 52-7-6) *cetasika* determine whether a given *citta* will be an *akusala citta* or a *kusala citta*.

- 14 *cetasika* (called *asobhana* or immoral or bad *cetasika*) could be present in an *akusala citta*. Out of those, 4 **ALWAYS** are present in any *akusala citta*; those 4 are *asobhana universals*.
- The other 25 *cetasika* (called *sobhana* or moral or good *cetasika*) can be present only in *kusala citta*, and 19 of those are **ALWAYS** in any given *kusala citta*; those 19 are *sobhana universals*.
- Therefore, 11 *cetasika* (7 universal plus four universal immoral) arise with every *akusala citta*. There may be other immoral and particular *cetasika* as well.
- There are 26 *cetasika* (7 universal plus 19 universal morals) that arise with every *kusala citta*. Six more moral *cetasika* may arise in some *kusala citta*.

Samsāric Habits (“Gatī”) and Cetasika

4. Therefore, *sobhana* and *asobhana cetasika* determine the *kammic* nature of a *citta*. **If we want to eliminate all *akusala citta*, we need to remove the 14 *asobhana cetasika* from our minds (they come up automatically with our *gati* and *āsavā*).**

- In other words, our *samsāric* habits (“*gati*”) and cravings (“*āsavā*”) are embedded in the 14 *asobhana* (and 25 *sobhana*) *cetasika*, such as *lobha* and *dosa*. For example, one may have dominant “*lobha gati*” (excess greed) or “*dosa gati*” (strong hate). But typically, we have a mixture of many different inter-mixed *gati*.
- In the same way, cultivating good “*gati*” and “*cravings*” (basically for moral deeds) leads to “good *cetasika*.”

Samsāric Habits (“Gatī”) and Asobhana Cetasika in Akusala Citta

5. As we follow the Noble Eightfold Path, the 14 *asobhana cetasika* are reduced in strength and eventually removed. When reaching the *Sotāpanna* stage, the two *asobhana cetasika* of *diṭṭhi* and *vicikicchā* are **REMOVED**, and all others reduced to some extent. In particular, *lobha* is reduced to *rāga* level, and *dosa* is reduced to *paṭigha*. That is why a *Sotāpanna* will never be born in the *apāyā*.

- *Raga* has 3 components: *kāma rāga*, *rūpa rāga*, and *arūpa rāga*, corresponding to attachment to the *kāma loka*, *rūpa loka*, and *arūpa loka* respectively. At the *Sakadāgāmī* stage, *kāma rāga* and *paṭigha* are **REDUCED** to the level that one will never be born at or below the human realm.
- At the *Anāgāmī* stage, both *kāma rāga* and *paṭigha* are **REMOVED**. Thus all bonds to *kāma loka* are broken, and one will never be born again in *kāma loka*.
- All *asobhana cetasika* are removed at the *Arahant* stage.

6. We can easily see why **four immoral universal *cetasika*** arise with every *akusala citta*. These four are: *moha* (delusion or moral blindness), *ahirika* (shamelessness of wrong), *anottappa* (fearlessness of immoral), and *uddhacca* (restlessness).

- We do not realize, but when we get greedy or hateful enough, we can become morally blind. One loses any sense of decency just for a short time, but that is enough to commit an immoral act.
- Then we lose the fear of doing wrong and the shame of doing wrong because our minds are covered (it takes only a fraction of a second to generate a *citta* and sometimes even to act on it if the *javana* is strong enough). That inevitably leads to a restless mind (*uddhacca*) too.

Samsāric Habits (“Gatī”) and Sobhana Cetasika in Kusala Citta

7. Now, let us discuss the seven pairs in the universal moral *cetasika* list, starting with the pair of *kāyapassaddhi* (tranquility of mental body, which leads to the tranquility of the physical body itself); *cittapassaddhi* (tranquility of consciousness). These seven pairs are states of mind and body that correspond to some “cooling down.” When doing a *kusala kamma*, the body and mind relax and “cool down.” That is the first glimpse of *Nibbāna* as one is already on the mundane eightfold path.

- That is why the Buddha said that the state of mind does affect the state of the body. When one starts on the *lokuttara* eightfold path, these *cetasika* all get more robust, one starts feeling the “*nirāmisā sukha*,” and thus one becomes motivated to follow the Path.
- But it is important to emphasize (as I have stated many times), that things COULD get worse before getting better. **When one deprives the mind of things it has gotten used to, it does not like that.** Until it sees the benefits of staying on the Path, it may try to pull one firmly in the “wrong direction.” One needs to be persistent, and this is where one needs to cultivate the *cattāro iddhipāda* (*chanda*, *citta*, *virīya*, and *vīmaṃsā*).

8. It is important to realize that the 19 universal moral *cetasika* can arise in ANYONE regardless of one’s religion or any other “label.” All of them will arise when doing a good deed (or speech or thought). They can occur when one is on the mundane eightfold Path (nothing to do with a religion *per se*); see “[Buddha Dhamma – In a Chart](#).” [*per se* : [adverb] by or in itself or themselves; intrinsically.]

- Also, note that *hiri* (shame of immoral deeds) and *ottappa* (fear of the consequences of evil deeds) are the two that are opposed to the immoral ones of *ahiri* and *anottappa*. That means one can sort out right from wrong (moral from corrupt) in that instance.
- Then there is *saddhā* (faith) and *sati* (mindfulness), which grow even more after embarking on the Path. Here, *saddhā* is not the faith in Buddha, Dhamma, Saṅgha, but the faith that such a moral act will bring about good outcomes.
- And *sati* is NOT *Sammā Sati*, but just the mindfulness of being involved in a moral act. However, once one gets on the *lokuttara* eightfold Path, it can become ***Sammā Sati***.
- The other two familiar ones are *alobha* and *adosa cetasika*; they are opposite to the immoral ones of *lobha* and *dosa*. *Alobha* is a not mere absence of *lobha* but also embodies generosity. *Adosa* is not the mere absence of *dosa* but embodies compassion.
- Then there is *tatramajjhataṭṭhā* (neutrality of mind; “*majjhataṭṭhā*” means “in the middle”). That is not *upekkhā*, one of the *Satta Bojjhaṅga*; see “[37 Factors of Enlightenment](#).”
- Thus far, we have discussed the 19 universal moral *cetasika* in #7 and #8. Now let us discuss the six moral *cetasika* that arise only with some *kusala citta*.

Six Sobhana Cetasika Require Understanding of Tilakkhaṇa

9. It is easier to list the six moral *cetasika* that do not necessarily arise with each *kusala citta*. **These are the ones that NEED TO BE CULTIVATED with the comprehension of *anicca*, *dukkha*, *anatta*.**

- They are ***Sammā Vācā*** (speech that is conducive to eliminating “*saṇṇā*”), ***Sammā Kammanta*** (actions that are conducive to eliminating “*saṇṇā*”), ***Sammā Ājīva*** (a lifestyle that is conducive to eliminating “*saṇṇā*”),

karuṇā (“Ariya” compassion), *muditā* (“Ariya” appreciative joy), and *paññā* (wisdom) which is the same as ***Sammā Dīṭṭhi***.

- Of course, those are developed to some extent when someone lives one’s life morally, but they will NEVER grow to higher stages until one understands *anicca*, *dukkha*, and *anatta*, at least to some extent.
- That is why *sammā vācā* is not just “good speech” or *sammā kammanta* is not just “good deeds.” *Sammā* (“saṃ” + “ma”) means “to remove ‘saṃ’,” i.e., done with an understanding of *anicca*, *dukkha*, *anatta*; see, “[Why is Correct Interpretation of Anicca, Dukkha, Anatta so Important?](#).”

Amoha Is Not Paññā

10. However, *amoha* does not mean wisdom (*paññā*)! *Amoha* is not a *cetasika* but is a root cause. It is in all *kusala citta* in the sense that the immoral *cetasika* of *moha* is not present at that moment, i.e., the mind is not “covered.”

- Some people interpret *amoha* to be *paññā*; not so. *Paññā* (wisdom) or *lokuttara Sammā Dīṭṭhi* needs to be cultivated via comprehending *anicca*, *dukkha*, and *anatta*, and starts when one is on the *Sotāpanna magga*; see, “[Buddha Dhamma – In a Chart](#)” and “[What is Unique in Buddha Dhamma](#).”
- The more *paññā* one has, the more likely one would generate *amoha* thoughts more frequently!
- No matter how intelligent one is, one cannot start cultivating *paññā* until one hears the correct interpretations of *anicca*, *dukkha*, and *anatta*.

Directing *Pakiṇṇaka Cetasika* Toward Noble Path

11. Now, let us briefly revisit the six **particulars (also called occasional)** or *pakiṇṇaka* that we mentioned in #2 above. They are *vitakka* (focused application), *vicāra* (sustained application), *adhimokkha* (dominate), *virīya* (effort), *pīti* (joy), *chanda* (desire).

- As we can readily see, these six can be in *kusala* or *akusala citta* and make them stronger.
- That is why it is said that “*Dhammo ha ve rakkhati dhammacārīṇ*” or “dhamma will guide one in the direction of dhamma that one follows”, applies to both moral AND immoral paths.
- *Vitakka* (focused application of thoughts), when cultivated in the *lokuttara* Path, can become ***sammā saṅkappa***. Similarly, *virīya* (effort) can become ***sammā vāyāma***.

Good and Bad Gati Associated with Sobhana and Asobhana Cetasika

12. Therefore, *Abhidhamma* helps us understand the connection between *cetasika* and *gati* and how “bad *gati*” are removed at each stage of *Nibbāna* (see #5 above). We can also see from the above discussion how 8 of the *cetasika* (related to “good *gati*”) turn into components of the Noble Eightfold Path when one starts on the *Sotāpanna magga*. We discussed only seven above (highlighted in bold red). The eighth one is the universal *cetasika*, *ekaggatā* (one-pointedness) which can become ***sammā samādhi***.

- However, depending on one’s behavior and understanding, all these eight could be developed in the direction of the immoral (*micchā* eightfold path), mundane moral (*lokiya* eightfold path), or the *lokuttara* Noble Eightfold Path; see “[Three Kinds of Dīṭṭhi, Eightfold Paths, and Samādhi](#).”
- Looking from different perspectives, there could be many types of *samādhi*. For a discussion on three other types of *samādhi*, see “[What is Samādhi? – Three Kinds of Mindfulness](#).”

13. This world is very complex. And the Buddha has analyzed it in many different ways. But they are all self-consistent. If one can get some traction, there is no other pleasure better than finding out about this world, the pleasure of Dhamma.

- “*Sabbaratim dhammarati jināti*” means “from all tastes in the world, the taste of Dhamma wins.” Here “*ratī*” means “taste.” Thus, the “taste of Dhamma” optimizes for an *Anāgāmī*.
- However, at *Arahanthood*, one loses all interest in worldly things, including Dhamma. The Buddha said, “A boat is needed only to cross a river; one should not carry it after crossing it. Just like that, even my Dhamma needs to be used only to find the true nature of this world, and then it should be discarded too”.

13.3 Mind and Consciousness

[What is Mind? How do we Experience the Outside World?](#)

[What is a Thought?](#)

[What is in a Thought? Why Gati are so Important](#)

[What is Consciousness?](#)

[1. Thoughts \(Citta\), Consciousness \(Viññāna\), and Mind \(Hadaya Vatthu\) – Introduction](#)

[2. Viññāna \(Consciousness\) can be of Many Different Types and Forms](#)

[3. Viññāna, Thoughts, and the Subconscious](#)

13.3.1 What is Mind? How do we Experience the Outside World?

Revised January 17, 2019; March 20, 2023

1. Everything we experience comes through six “doors” or “*āyatana*” we have to the outside worlds: eye, ear, nose, tongue, body, and mind. Through those six doors we can see pictures, hear sounds, smell odors, taste food, feel things physically by touch, and be aware of concepts (say, mundane things like remembering past events or making plans about future events, or thinking about a black hole in the middle of the universe or a mathematical concept).

- The six sense faculties (and the corresponding six external “*āyatana*” which are *rūpa*, *sadda*, *gandha*, *rasa*, *pottabba*, *dhamma* or visuals, sounds, smells, tastes, touches, and concepts) are what the Buddha called “*sabba*,” or “everything.” These are 12 *āyatana* (six internal and six external).

2. All those sense experiences are done with *citta* or thoughts. But this is probably not a good translation. We usually associate a “thought” with an idea or one visual event, etc., a moment of “experience.” But *citta* is very fast and no one can experience a single *citta* that lasts a billionth of a second or less; see, “[Citta and Cetasika – How Viññāna \(Consciousness\) Arises.](#)”

- **Don’t be fooled by the title of that post.** It has a simple description of how the “mind” puts together all six sense inputs to give the illusion that we see, hear, smell, taste, touch, and think all at the same time (at least start reading at #3 there).
- It is a good idea also to read the posts, “[Amazingly Fast Time Evolution of a Thought \(Citta\)](#)” and “[Viññāna – What It Really Means](#)” first.

3. When we look at an object, the “eye” generates visual consciousness (*cakkhu viññāṇa*): Comprehending what is seen is accomplished via a series of very fast thought processes. **There are billions of thoughts per second, so each citta or thought moment is billionth of a second.** Let us see how the mind “sees” an object in a series of very fast “snapshots” alternating between the “eye” and the “mind”:

- The “eye” captures a snapshot of the object and the brain transfers that captured information to mind: that process takes 17 thought moments or *cittā* (let us abbreviate it as TM); this series of TM is called a “**sense input *citta vīthi*” (or *pañcadvāra citta vīthi*)**. Next, the mind analyzes that “imprint” with three *citta vīthi* that involve only the mind. These latter “**mind-only *citta vīthi*” (*manodvāra citta vīthi*)** are shorter, around ten TM, and try to discern the object. It may first try to discern the color of the object for example.
- Then the “eye” takes another snapshot and transfers that “imprint” to the mind, which in turn receives it in a *pañcadvāra citta vīthi* containing 17 TM, analyzes that in 3 more *manodvāra citta vīthi* containing about 10 TM, and makes better sense of the color. This “back and forth” process continues until the object is determined.

- This process is slowed down only due to the time needed for the brain to put together the information captured by one of the five sense faculties (*pañcadvāra*), for example, the eyes. This time is about ten milliseconds; see, “[What is a Thought?](#).” Thus there can only be about 100 (600 if they are processed in parallel) or so “sense events” per second; since science shows that the brain has different regions for processing different sense inputs, the latter number (600) is probably right.

4. Since these *citta vīthi* run very fast, once the brain sends an “information packet” to the mind it is processed very quickly, within a billionth of a second. Thus the process is slowed down only by the brain. **Still, everything about the object is grasped in a small fraction of a second.**

- Many of you may think, “this looks like some far off theory made up by someone.” The Buddha said he experienced everything that he taught. Phenomena in this fast time scale are discernible only to a Buddha.
- Once the Buddha explained the critical aspects to Ven. Sāriputta, it was Ven. Sāriputta and his group of *Bhikkhus* developed the Abhidhamma, where all these details were worked out. It took generations of *bhikkhus* to develop the Abhidhamma to the final form that was recited at the Third *Sangāyanā* (Buddhist Council) and was written down in the *Tipiṭaka* in 29 BCE (we know that there were many *Arahants* before 100-200 CE; see the timeline in “[Incorrect Theravāda Interpretations – Historical Timeline](#)”). For us, the truth of these minute details becomes apparent as all observable phenomena are EXPLAINED using all three forms of Dhamma in the *Tipiṭaka: Sutta, Vinaya, and Abhidhamma*).

5. As all this information comes in, the mind recognizes the object: ***saññā* or perception**. Based on that recognition **feelings (*vedanā*)** are generated (for example when we see a friend we generate a happy feeling; if it is someone we don’t like, it is a unhappy feeling, etc).

- Once everything about the object is grasped, then if it is an “interesting object”, the mind may start its own “wheeling around” process: the “*pati + iccha sama+uppada*” or *paṭicca samuppāda* process leading to the **accumulation of *saṅkhāra***: see, “[Paṭicca Samuppāda – Introduction](#),” “[Nibbāna – Is it Difficult to Understand](#),” “[Saṅkhāra, Kamma, Kamma Bīja, Kamma Vipāka](#),” and other related posts. All these tie up together, but one needs to be a bit patient since there are many inter-coupled concepts.

6. Thus experiencing a visual object in the above example generates all kinds of mental phenomena: *vedanā*, *saññā*, *saṅkhāra*, and during this whole process we have the *viññāṇa* or *citta* flowing. *Viññāṇa* is the momentary consciousness, a *citta*. In the above example, it alternates between visual consciousness (*cakkhu viññāṇa*) and the mind consciousness (*mano viññāṇa*).

- The baseline state of a mind, i.e., when it is not looking at an external object or thinking about it, is called “*bhavaṅga*.” Here we do not “feel” anything, for example when we are in a deep sleep. The mind falls back to the *bhavaṅga* state even in between *pañcadvāra citta vīthi*.

7. The same process happens with any of the five physical senses (the “back and forth switching” between the sense faculty and the mind). **When someone is just remembering a past event or planning something, those are exclusively mind processes (only *manodvāra citta vīthi* take place).**

Now let us look at some details on how the mind processes all the “signals” from the real world where multiple “signals” come in.

- When we watch a movie, the projector projects about 30-50 static pictures per second on the screen; a movie is a series of static pictures. When the projection rate is above 30 frames a second or so, our eyes see a continuous movie, not individual frames. **Thus even though *cittā* run at billions per second, we do not “experience” them individually, not even close.**
- This fast rate of *citta vīthis* (which, as we saw above run at about 100 *citta vīthis* per second) also makes it possible to perceive all six inputs from the outside world “simultaneously”; at least we experience them as “simultaneous.” For example, we can be watching a movie and enjoying some popcorn; so we see and hear the movie, and taste popcorn and feel the popcorn cup, and also may be thinking about something related to the scene on the screen; all at the “same time.”

- *Citta vīthi* just alternate among the six sense inputs; it is possible only because there are hundreds of *citta vīthi* per second. Since it happens so fast, we experience them all as “simultaneous”, just like the static pictures projected at a fast rate on a movie screen are perceived as a continuous “movie.”
- Not only that, but the mind can ignore a multitude of “signals” that are of no interest to one’s habits (“*gati*”) or cravings (“*āsavā*”). And those depend on the individual. Two friends could be walking on the street, and one (woman) stops abruptly and starts looking at a dress in a shop window. The other (man) looks at it, shrugs, and wants to move on; he would not have even noticed it.

8. As we saw, information to the mind comes via the brain. All five physical sense inputs (vision, hearing, smell, taste, touch) come through the brain. Thinking about concepts involves the brain too (those involve only the *manodvāra citta vīthi*), and that happens much faster compared to the processes associated with the five physical senses; we will discuss that later.

- When someone gets old, the brain starts functioning less efficiently; see, “[Manomaya Kāya and Out-of-Body Experience \(OBE\)](#).” Or, the brain may get damaged due to a *kamma vipāka*; for example, getting Alzheimer’s disease is a *kamma vipāka*.
- As the body gets old, various other body parts also start functioning less efficiently and are also vulnerable for many *kamma vipāka* to come to fruition. *Kamma vipāka* are not deterministic; they come to bear fruit only when conditions become suitable (see, “[Saṅkhāra, Kamma, Kamma Bīja, Kamma Vipāka](#)”). Thus meditation and regular exercise help keep both the body and the mind (through an efficiently working brain) in good condition.

9. In any case, the mind goes to the “baseline or dormant state” called “*bhavaṅga*” even in between these *citta vīthi*. When the mind is fairly inactive, say when someone is dozing off, the mind is mostly in the *bhavaṅga* state. When someone is unconscious or in deep sleep, the mind is in the *bhavaṅga* state for the whole duration. When seeing a dream, the mind is active.

- Even when *citta vīthi*s run at a fast rate of about 600 per second (say, while watching a movie or playing a competitive sport), the mind drops to the *bhavaṅga* state while the brain is processing those “10 millisecond information packets”, as discussed above.
- The above discussion is all about receiving information from the outside world and then getting attached to “things” (“*taṇhā*”), generating *mano saṅkhāra*, etc.

10. Based on that process, we may decide to take further action too, either verbally or bodily, thus generating *vacī saṅkhāra* and *kaya saṅkhāra*: We may speak or do some physical activity. All those are done with the mind, and each action is done with a thought process or *citta vīthi*.

- This is why the Buddha said, “*mano pubbangama dhamma, ,,,*”, i.e., “mind precedes everything that we do....” **We cannot even lift a finger without generating a *citta vīthi*, i.e., without the initiation by the mind.** The physical body, with the brain acting as a “sophisticated control center”, helps the mind to achieve whatever physical activity it wishes; see, “[Neuroscience says there is no Free Will? – That is a Misinterpretation!](#).”

Further reading: “[A Comprehensive Manual of Abhidhamma](#),” by Bhikkhu Bodhi (2010). This book has summarized *citta* and *cetasika* very well. But discussions on *Paṭicca Samuppāda* or *anicca*, *dukkha*, and *anatta* are not correct.

Next, “[What is Consciousness?](#)”,

13.3.2 What is Consciousness?

Revised July 16, 2020

1. Philosophers through the ages have struggled to figure out how consciousness arises in a human being. For “materialists” everything that makes a human being originates in the body, and they have been trying to explain consciousness in terms of something that comes out from the workings of the brain.

- For the “dualist” consciousness is totally distinct from the material body, and falls into the realm of theistic religion (related to a “soul”).
- According to the Buddha, consciousness, together with the body, are two of the five “aggregates” that a human being consists of. **And Consciousness does not arise from the body, but arises with the body at the conception.**

2. First of all, let us define consciousness.

- The Buddha said that being conscious is “being aware,” but with feelings and perceptions, and the ability to “recall the past.”
- There are several definitions of consciousness in modern science, but the general consensus among the scientists and philosophers is that the state of being conscious is a condition of being aware of one’s surroundings as well as one’s own existence (or self-awareness).
- Therefore, we could say that science and Buddhism are attributing similar the same meaning to the word “consciousness”.
- However, the Buddha’s definition of consciousness takes into account the critical roles played by the *vedanā* (feelings), *saññā* (perceptions), and the *manasikāra cetasika* among 52 other mental factors (*cetasika*), which combine to produce the *viññāṇa* which can be roughly translated as consciousness.

3. As to the origins of consciousness, we have three “theories”:

- Contemporary science is totally matter-based: the universe started with the “big-bang” which created all existing matter, and all living beings “evolved” from this inert matter, and thus consciousness also evolved by some (yet unknown) manner.
- The theistic religions believe, of course, that humans were created with built-in consciousness by an Almighty-God, and animals were also created (sans consciousness).
- The Buddha’s is different from both above: It states that living beings (humans and animals) with built-in consciousness are different from inert matter, but they were not created. Rather, there is no traceable beginning to sentient life; life always existed, and it will exist forever (until *Nibbāna* is attained). Everything has a cause, so does life.

4. Consciousness is more than registration of a visual event, or an auditory event, for example. It has associated a variety of mental factors such as *saññā* (perception) and *vedanā* (feelings).

- A camera captures an image of a cat, but it is not aware of the presence of the cat. On the other hand, a dog sees a cat and becomes aware of its presence. It not only sees the cat, but knows exactly where it is and can try to catch it.
- Have you ever thought about how we can not only see things, but know exactly where they are? Without this ability, we can not even walk without bumping into things. How do we know that the person in front of us is only a few feet away? Consciousness is associated with a sentient being with a MIND. Science cannot yet explain this capability.

5. There is also the issue of the phenomenal quality of the conscious experience: qualia, subjective feelings, the redness of red, the warmth of warmth, etc. How do these arise in a being made up of inert atoms? There are basically two approaches to solve this problem in modern philosophy and science:

- One is that it arises as an emergent property in the neuronal activities in the brain. The other is the proposal of duality by Rene Descartes in the 17th century that persists to the present; see, for example, David Chalmers, “The Character of Consciousness”, (2010).
- A subset of these scientists believe that consciousness is associated with the microtubules in a cell (for example, see “The Emerging Physics of Consciousness” Ed. by Jack A. Tuszynski (2006) and John Smythies, “Brain and Consciousness: The Ghost in the Machines”, Journal of Scientific Exploration, vol.

23, No. 1, pp. 37-50, (2009)). Despite much research, the question of how qualia and subjective feelings arise from dead matter remains a mystery.

- Just because a cell responds that does not necessarily mean it has consciousness; the cell can expand and contract (chemical reactions) in response to environmental stimuli. In a way, something similar happens when a plant turns towards sunlight; of course, plant life is not sentient. Thus, just because an entity responds to outside influence does not necessarily mean the entity is “mentally aware” of the outside influence, i.e., that it is conscious.

6. Therefore, all these scientists and philosophers are a long way off of solving the issue of the four mental aggregates of feelings, perceptions, volitional formations (*sankhāra*), and consciousness that make up the mental aspects of a human being. They are mainly focusing on consciousness and perception at this early stage, and even then are totally disregarding the intrinsic mental nature. It will be interesting to see what progress they can make by just taking a totally materialistic approach.

7. There is evidence, though, that some leading scientists are beginning to suspect that a complete “world view” cannot be achieved without taking into account the mental aspects. This trend started with the invention of quantum mechanics at the beginning of the 20th century, and is gaining traction slowly. Some interesting ideas are discussed in a number of books including “Wholeness and the Implicate Order” (by David Bohm, 1980), “Quantum Enigma” (by Bruce Rosenblum and Fred Kuttner, 2006), “Biocentrism” (by Robert Lanza, 2009).

- However, attempts to explain the mind as a manifestation of quantum phenomena will also fail, because it is the mind that precedes matter; see, “[The Double Slit Experiment – Correlation between Mind and Matter?](#).”

8. Consciousness (*viññāṇa*) discussed in this section does NOT take account the fact that consciousness of any living being (other than an *Arahant*) is contaminated by defilements. This our awareness is not pure; it is like looking through a foggy window. This is discussed in the “[Viññāṇa \(Defiled Consciousness\)](#)” and “[Expanding Consciousness by Purifying the Mind.](#)”

Next, “[1. Thoughts \(Citta\), Consciousness \(Viññāṇa\), and Mind \(Hadaya Vatthu\) – Introduction](#)”,
.....

13.3.3 What is a Thought?

Revised January 24, 2019

There are many confusing terms in *Abhidhamma* like *citta* and *mano* which have been differently interpreted in different books. In order to clarify these concepts, I am writing a few posts in the “Dhamma Concepts” section under “Mind and Consciousness” starting with: “[1. Thoughts \(Citta\), Consciousness \(Viññāṇa\), and Mind \(Hadaya Vatthu\) – Introduction.](#)” I highly recommend reading those, and especially, “[3. Viññāṇa, Thoughts, and the Subconscious.](#)”

1. In Buddha Dhamma, a thought or a *citta* is the briefest moment of awareness experienced by a sentient being. *Citta* is pronounced “chiththa.” There are well over billion of *cittā* (plural of *citta*) in the blink of eye.

- Let us keep in mind that a *citta* takes much smaller than a billionth of a second. What we experience is the cumulative effect of millions of *cittā*.

2. A pure *citta* only has seven *cetasika* (*phassa, saññā, vedanā, cetana, ekaggata, jivitindriya, and manasikara*) in it; see, “[Cetasika \(Mental Factors\)](#).” Thus it is the purest form a “thought”, but it is too brief for anyone to experience.

- The first thing to note is that one will never be able to experience a single thought if we mean by a thought to be a *citta*, even though we say, “I just had a thought”. The briefest awareness that we actually experience is probably a fraction of a second; Scientists say it is about 10 milliseconds. But that 10 millisecond time is mostly spent by the brain in processing the sense input; once that is done, a series of

citta with 17 *cittā* flow in a very brief time (less than a billionth of a second), and that is what is registered in the mind. We will discuss this later in detail.

- This series of *citta* with 17 *cittā* is called a *citta vīthi* (pronounced “chiththa veethi”); see below.

3. Even a single *citta* has three phases: *uppada* (rising), *thiti* or *thithi* (reached peak but still changes), and *bhanga* (dissolution). Thus a *citta* arises and fades away very fast.

- **Only a Buddha can see such details as I pointed out in the Introduction.** Even people with highest *abhiññā* powers (attained via *jhānā*) cannot even come close to seeing such details.
- This is why *Abhidhamma* is a special section of Buddha Dhamma that needs to take “as is”, i.e., we just have to believe what the Buddha said. We cannot hope to verify these details by our own experience (for example that there are a certain number of *citta* in a *citta vīthi* as discussed below). Yet, *Abhidhamma* is very valuable in clarifying any issue down to the minute detail.

4. A pure *citta* with 7 *cetasika* does not last. Even though it starts as such a pure *citta*, within the duration of the *citta* itself (less than a billionth of a second), it gets contaminated by either a set of bad *cetasika* like *lobha* (greed), *issa* (envy) or a set of good *cetasika* like *saddhā* (faith) and *sati* (mindfulness).

- Before it starts decaying, it goes through NINE STAGES to become *viññāṇakkhandho* (this is NOT the aggregate as in the common usage of *viññāṇakkhandha*; rather, here the mind has coupled the information in the previous stages of this *citta* with past *viññāṇa* and future *viññāṇa* that are in the mind and has made a “composite”).
- **However, the convention is to call this whole process still a *citta*.**
- All this happens in less than a billionth of a second! This process keeps repeating in the *citta* to follow and the process is cumulative, i.e., as more and more *citta* flow by, the awareness of the event gets stronger, and we actually begin to feel it.
- It may be a good idea to read about *citta vīthi* before proceeding: [“Citta Vīthi – Processing of Sense Inputs.”](#)

5. **Thus what we experience is the cumulative effect of numerous *citta vīthis*.** That is why the Buddha talked about *kandhas* (which means “heaps” in Pāli or Sinhala) as in “heaps” of feelings (*vedanākkhandha*), perceptions (*saññākkhandha*), volitions (*saṅkhārakkhandha*), and consciousness (*viññāṇakkhandha*); those are the “heaps” that we actually experience in a “thought”.

- If *cittā* fly by that fast, and captures six kinds of possible “inputs” (through the five physical senses and the mind itself), how do we “experience” seeing, hearing, etc “at the same time” but still sort them out?

6. This is because the mind is the most powerful entity in this world. All five physical senses just provide traces of inputs (“memory imprints”), and billions of them arise and perish each second. The mind keeps a record of all past events and MAKES A COMPOSITE SENSE EXPERIENCE moment-by-moment.

- For example when we hear someone say “apple”, even the letter “a” is comprehended by the mind via billions of *citta*; then “p” is captured, and by that time “a” sound is gone from the ear.
- We speak (and are able to understand) about 150 words/minute. The minimum “packet of information” **that the brain (not the mind) can process** is estimated to be about a hundredth of a second (10 milliseconds) by the scientists. This comes about 1-2 letters in such a “packet”.
- When it has captured the whole word “apple”, the mind automatically matches that with all the past memories and instantly produces an awareness or a mental picture of an apple; **past memories, as well as hopes for future, are recalled by the *mansikāra cetasika* and the *citta* is “put together” by the *cetanā cetasika*.**

7. The mind can do this because it can process billions of *citta vīthi* per second!

- But there is a “bottleneck” at the brain, which takes a relatively long time to process. The brain takes a relatively long time to process a “packet” of information that comes in.
- **Therefore, the mind falls back to the *bhavaṅga* state in between the comprehending of information packets.** For example, right after receiving the letter “a”, it falls to the *bhavaṅga* state and waits until the next packet with “p” comes.

8. Furthermore, the mind is capable of processing multiple inputs (received via the five senses) that are coming in mixed up.

- For example, after hearing the letter “a” that comes through the ears, the mind may get a “packet” with information about the smell of the apple. But the mind is capable of “sorting out” these different inputs.
- It is also able to carry out its own mental processes (thinking and coming to conclusions about what is perceived through the five senses by comparing it with past memories) such a fast speed, that it appears to be done in “real-time”.
- There is nothing that is faster than the mind in this world; see, “[Amazingly Fast Time Evolution of a Thought \(Citta\)](#).” Also, see the previous post, “[Citta and Cetasika – How Viññāna \(Consciousness\) Arises](#).”

9. Now the mind “knows” what that person was referring to, and has a mental image of an apple.

- If someone hears the word, “lemon”, one could even feel the sour taste of lemon; the mind brings it back from the past memories.
- Even if we see just the outline of a familiar person at a distance, the mind “fills in the blanks” and flashes an image of that person in your mind so you know who it is.

10. One sensory “event” does not happen in one *citta*. A sensory event from one of the five physical senses is captured by a single *citta* (say, *cakkhudvāra citta* for a seeing event), but that information is processed by a string of *cittā* with 17 *cittā* in it; this “string of *cittā*” is called a *citta vīthi* (pronounced “chiththa veethi”). A *citta vīthi* for “seeing” is referred to as a *citta vīthi* at the “eye door” or the eye, one for “hearing” occurs at the “ear door” or the ear, etc.

- When one *citta vīthi* provides a sensory input, that information is then processed by three *citta vīthis* that involves only the mind; this *citta vīthi* “at the mind-door” is variable; it has around 12 *citta* normally. But in a *jhāna samāpatti*, which is solely a mind door process, there can be a very large number of *citta* without interruption.
- Thus there are two types of *citta vīthi* involved in processing a sensory input: a long one with 17 *citta* to CAPTURE an input from one of the five physical senses (*pañcadvara*) AND three *manodvara citta vīthi* (at the mind-door) with about 12 *citta*. Both types are thus involved in cognition (awareness) processes; there are other processes by the mind that we will discuss later.
- Only one *citta vīthi* runs at a given time; they do not overlap.

11. Thus it is mind-boggling if we try to imagine the frantic pace the mind works at. At this point, it may be a good idea to look at an analogy to simplify things a bit.

- A movie is generated by a series of static pictures. When a movie is projected on a screen, static pictures are projected at a rate of about 30 frames a second, and we see the movie as a continuous progression of events; if the projection rate is low, we can see it frame by frame or as “packets of information” separately. When we watch the movie, we do not perceive those static pictures or “packets of information”, but we perceive a continuous progression without any gaps.
- This was described in #4 of the previous post, “[Citta and Cetasika – How Vinnana \(Consciousness\) Arises](#).”

12. In the same way, when we perceive that our mind is hearing a word, but in reality that word is the result of many *citta vīthi* originated at the ear door; and the scene that appears simultaneous is the composite of many *citta vīthi* coming through the eye door and none of it happens “at the same time”.

- Just like the movie projected at 30-50 frames a second, *citta vīthi* are generated at many frames a second. (I had previously mentioned billions of *cittā* and that is not correct; the flow of *citta vīthi* is subsided by the processing time of about 10 milliseconds needed by the brain to process each each sense input). Thus we feel that we are watching, hearing, tasting, smelling, touching, and thinking all at the same time.
- **To repeat for emphasis:** Our minds processes probably less than 100 *citta vīthi* per second. However, each *citta vīthi* with 17 *citta* (for five sense inputs) or about 10 *citta* (for mind inputs) and each of those *citta vīthi* take less than billionth of a second. Even though it takes the brain to process a sense input about 20 milliseconds or so, that information is grasped by the mind in less than a billionth of a second.
- While the brain is processing a sensory input, the mind falls back to the *bhavaṅga* state.

13. Just like a movie reel, there is actually a tape (not a physical one) that is recorded in the “mind plane”; this is the origin of the “*nama gotta*” discussed in, [“Difference Between Dhamma and Saṅkhāra.”](#) That tape is there forever, and allows one with *abhiññā* powers to look back to any time in the past; see, [“Recent Evidence for Unbroken Memory Records \(HSAM\).”](#)

- Therefore in order to verify rebirth or to look at really old memories, all one needs to do is to develop *abhiññā* powers! And there are people, including my teacher *Theros*, who can do this today.

14. A *citta* evolves into *viññāṇa* and that is actually what we experience; see, [“Amazingly Fast Time Evolution of a Thought \(Citta\)”](#) and [“Viññāṇa – Consciousness Together With Future Expectations.”](#)

- There is only one *citta* at a time. But there is a memory, as we just discussed. And that memory is normally hidden because the mind is covered up by the defilement, and when one develops *abhiññā* powers what one is really doing is to clean up the mind so everything becomes clear.
- One who develops *abhiññā* powers through *anāriya jhānā* just let the gunk settle at bottom and see just the upper layers; but one who has developed *abhiññā* powers through *Ariya jhānā* is doing that by “cleaning up” the gunk so a much more penetration to deeper past is possible; see, [“Solution to a Wandering Mind – Abandon Everything?”](#)

15. Thus any of individual sense experiences are VERY BRIEF (the duration of a *citta vīthi*). **It is the mind that puts everything together and presents us with a “movie- like” experience.** This is what the Buddha meant when he told Bahiya Daruciriya in the *Bāhiya Sutta (Udāna 1.10)*. From that *sutta*, “*diṭṭhe diṭṭhamattaṃ bhavissati, sute sutamattaṃ bhavissati, mute mutamattaṃ bhavissati, viññāte viññātamattaṃ bhavissati*” or “seeing is just a trace of seeing, hearing is just a trace of hearing, enjoying is just a trace of enjoyment, experiencing is just a trace of experience”.

- It is the mind (specifically the *viññāṇa khandha* or the aggregate of consciousness) that put everything together and present it as a smooth movie-like experience.
- Here, *diṭṭa*, *suta muta*, *viññāta* mean “seeing, hearing, enjoying (with smell, taste, and touch), and consciousness respectively; “*mantan*” means “a *mātra*” in Sinhala or “a trace” in English. Thus “seeing” is just trace of a visual event lasting only a billionth of a second. Then it passes away and a new one comes in. It is like taking a series of pictures with a camera. It is the mind that makes everything appear solid, permanent, and stable. This is the deeper meaning of that verse.

16. If all this appear too technical, do not worry about it. It took me a long time to figure it out. I got the final details worked out recently by also combining information from recent scientific studies. The Buddha could not use today’s technical terms, but what he said in summary form is completely compatible with science. But science is still way behind in terms of the bigger picture.

Next, "[What is in a Thought? Why Gati are so Important?](#)",

13.3.4 What is in a Thought? Why Gati are so Important?

Revised March 1, 2020; March 20, 2023

Many confusing terms in *Abhidhamma* like *citta* and *mano*, have been interpreted differently in different books. To clarify these concepts, I am writing a few posts in the "Dhamma Concepts" section under "Mind and Consciousness" starting with: "[Thoughts \(Citta\), Consciousness \(Viññāna\), and Mind \(Hadaya Vatthu\) – Introduction.](#)"

1. In the previous post, we saw that a thought (*citta*; pronounced "chittha") lasts much less than a billionth of a second. The more surprising part is that each *citta* has structure! Each *citta* "contains" multiple *cetasika* (mental factors.) It is more accurate to say that each *citta* rises with several *cetasika*, and they all perish together within a billionth of a second.

- Of course, a *citta* does not arise by itself. It is in a *citta vīthi* involved in "sensing the outside world." That can occur via one of the six senses. Such a *citta vīthi* has either 17 *cittā* (for those sensing events involving the five physical senses) or about ten *cittā* in *citta vīthi* involving only the mind. In between those, the mind is in the "*bhavaṅga*" state.
- There is a "*bhavaṅga*" state associated with each "*bhava*." Upon transitioning to a new *bhava*, a new "*bhavaṅga* state" will be associated with that new *bhava*. That is because the "seat of the mind" (*hadaya vatthu*) is unique to each *bhava*.
- However, we do not "feel" all the "*bhavaṅga* state." For details, see "[State of Mind in the Absence of Citta Vīthi – Bhavaṅga.](#)"

2. The *cetasika* (mental factors) provide different qualities to each *citta*. A *citta* is moral (*kusala*), immoral (*akusala*), or neutral (*kiriya*), depending on what type of *cetasika* rises with it.

A complete description of 52 *cetasika* is given in "[Cetasika \(mental factors\)](#)". A summary:

- There are seven universal *cetasika* that rise with ANY *citta*.
- Six others CAN appear in any *citta*, i.e., only some may be in a given *citta*.
- There are 14 *asobhana cetasika* (non-beautiful mental factors) that appear only in *akusala citta*.
- There are 25 *sobhana cetasikā* (beautiful mental factors.) Nineteen *sobhana cetasikā* appear in every *kusala citta*; thus, those 19 are called beautiful universals.

3. Let us first discuss the seven universal *cetasika*. These arise with ANY *citta*. A *citta* with just these is called a "*pabhassara citta*" because it is the "purest form" of a *citta*. It becomes a "*viññāṇa citta*" as it develops in time within a billionth of a second! See, "[Citta, Mano, Viññāna – Stages of a Thought.](#)"

- What we experience are "*viññāṇa citta*," as *viññāṇa khanda* (aggregate of *viññāṇa* or a "heap of *viññāṇa*").

The seven universal *cetasika* that arise with any *citta* are:

- *Phassa* (contact), *saññā* (perception), *vedanā* (feeling), *cetana* (intention), *ekaggata* (one-pointedness), *jīvitindriya* (life faculty), and *manasikara* (memory).

4. The *phassa* (contact) *cetasika* is what makes contact with the "object of the *citta*" whether it is sense input from one of the five physical senses or a concept that makes contact with the mind.

- Thus, the *phassa cetasika* makes it possible for the mind to make contact with the world.
- *Saññā* (perception) identifies the object by working with *manasikāra* (memory), and *vedanā* (feeling) arises.

- Depending on the object, one will generate good, bad, or neutral feelings, and also different types of *cetasika* (greed, shame, compassion, etc) can arise; *cetanā* (intention) puts it all together and “prepares” the *citta*. Based on the types of *cetasika* in the *citta*, it could be a good or bad thought. This is why *cetanā* can be good or bad, and the Buddha said: “*cetanā* is *kamma*.”
- *Ekaggatā* is the ability to keep the mind on one object. *Jīvitindriya* maintains life in the current life (keeps the body alive) until death. And *manasikāra* is the all-important memory. *Manasikāra* has ALL memories (or *nāma gotta*) from the beginning-less time; see, “[Difference between Dhamma and Saṅkhāra](#)” for a discussion on *nāmagotta*.
- This is why the present *citta* is the precursor to the next *citta*, and that next *citta* is NOT entirely different from the previous *citta*. “Cause and effect” is at work from *citta* to *citta*, maintaining the “personality” or “*gati*” of the given lifestream. Thus, the Buddha rejected the notion of a “no-self” or a “self”.
- Yet it is essential to realize that “*gati*” can change even in a *citta*, for example, one attains the *Arahanthood* with a single *citta* (of course with billions of *citta vīthi* making gradual progress towards it).

5. So, we can see the basic working of a *citta* with these seven universals; they carry out the most fundamental and vital functions of recognizing the object, matching it with old memories and figuring out what it is, and also *sukha*, *dukkha*, or neutral feeling arise because of that recognition.

- Yet all that does not happen in a single *citta*. When an “input” comes through one of the six senses, it is captured by a *citta vīthi* containing 17 *citta* for a physical sense input and about ten *citta* for a mind input as we discussed in the previous post. Then that “captured event” is discerned and analyzed by three follow-ups “*manodvāra citta vīthi*,” i.e., by the mind.
- Even then, we only experience the “net result” of millions of such *citta vīthi*; see “[What is a Thought?](#)” But due to the extreme rapidity of these processes, we feel like we are using all six in real time. We are not. The mind is always analyzing a set of events that have already gone by. This is discussed in the [Bāhiya Sutta \(Ud 1.10\)](#), “*diṭṭhe diṭṭamattam bhavissati*”. What we experience NOW is what has already transpired.

6. But invariably, other *cetasika* (other than the seven universal) arise as the *citta* develops in time, and the *citta* becomes *kusala citta*, *akusala citta* or a *kiriya* (neutral) *citta* depending on the *cetasika* that arise with the *citta*.

- *Sobhana cetasika* arise with *kusala citta* and *asobhana cetasika* arise with an *akusala citta*.
- These *cetasika* types do not mix, i.e., no *sobhana cetasika* arise with an *akusala citta* etc.

7. Now the question arises: If *cittā* arise and fall and go by so rapidly, how do we willfully stop *akusala citta* from arising? Especially when exposed to a tempting external object like an eye-catching figure.

And the answer lies in a straightforward concept that I have discussed in many posts:

- This is where one’s character qualities (*gati*) and *āsava* come into play. **One automatically responds with the “set of values” one has.**
- By changing habits, one can change their character (*gati*) and eventually change one’s deep-rooted cravings (*āsavā*). Even though the answer is simple, it takes a long time to get rid of bad habits and cultivate good habits, at least initially.
- Then with time, as that *gati* loses its power, one will be less and less tempted when subjected to the same sensory input. For example, this could be the sight of an attractive figure or an enemy.

8. The key to reducing such bad *gati* is to forcefully suppress that bad-thought as soon as you become aware of it. Even though an evil thought arises automatically, one becomes aware of it after a few seconds.

- As soon as you become aware of an evil thought, you should think about the dire consequences [*ādīnava*] and forcefully stop that thought stream. Just start thinking about something good or doing something that needs your full attention.
- When you keep doing this for a while, that tendency will slowly reduce, i.e., that bad *gati* will lose its power.
- For example, if one needs to quit smoking, as soon as one starts lighting a cigarette one should think about the harmful consequences of smoking and throw it away. Keep some mints handy and pop one in your mouth. Finding a “replacement activity” always helps to break a bad habit.
- If it is hateful thought, one could stop that and start thinking about something good. Recalling something pleasant, say a picture of the Buddha, can help. Always have a “replacement” ready.
- One needs to keep doing this faithfully to make the old habit weak.

9. When one gets rid of bad habits and cultivates good habits, the neural connections in one's brain get rewired. The brain changes gradually and that is how the thoughts change. This is an easy answer to using modern science.

- But there is a deeper analysis. Not only does the physical brain change but also our *manomaya kāya* is transformed. Eventually, that is what controls the brain; see a couple of posts on *manomaya kāya* and also, “[Neuroscience says there is no Free Will? – That is a Misinterpretation!](#)” for details.
- As I have discussed in other posts, [this idea of gradually changing one's habits](#) holds the KEY to making progress on the Path or even achieving mundane goals. See, for example, “[9. Key to Ānāpānasati – How to Change Habits and Character \(Gati\).](#)”

10. Therefore, initially one responds with one's current set of values or *gati*. But after a few moments, one CAN think about the consequences and correct the initial automatic reaction.

- This is further explained in terms of the instant reaction coming from the limbic system in the brain and the “reasoned out” corrective action coming from the neo-cortex or “the thinking brain”; see, “[True Brain – How the Mind Rewires the Brain via Meditation/Habits.](#)”
- And that is how we slowly change our *gati*, by willfully correcting the initial “auto-response”. This is what makes us different from animals. Animals do not have this ability, at least not to our level.
- **The more you “catch” such “inappropriate auto-responses” and stop them, the more effectively you can get rid of bad habits, cultivate good habits and change your *gati* (character) in the right direction. This is “*ānāpāna sati*”, i.e., one keeps good thoughts and gets rid of bad thoughts willfully; see, “[What is Ānāpāna?](#)” in the Meditation section.**

11. As mentioned above, *cetasikā* present in a given *citta* determines the quality and/or the function of the *citta*.

- An immoral (*akusala*) *citta* has one or more immoral roots; *avijjā* (delusion *cetasika*) is in any immoral *citta*.
- A moral (*kusala*) *citta* will always have non-greed and non-hate *cetasika*. Wisdom (*paññā*) *cetasika* rises only in *citta* with all three roots (*tīhetuka citta*).
- We have encountered many of the *cetasika* in the posts on various topics: the five hindrances are included in the 14 *asobhana cetasika*.
- The four bases of mental power (*cattāro iddhipāda*) are four of the *sobhana cetasika*, i.e., *chanda*, *citta*, *virīya*, *vīmaṃsā*. Here *citta* means “thinking about the goal” and thus is *sammā saṅkappa* when fully cultivated. *Vīmaṃsā* is another name for *paññā* and becomes *sammā diṭṭhi* when fully cultivated; see “[37 Factors of Enlightenment.](#)”

- Some of the factors in the Noble Eightfold Path are directly in the set of *sobhana cetasika*, for example, *sammā vācā*, *sammā kammanta*, and *sammā ājīva*. Other *cetasika* like *sati* and *paññā*, when cultivated become *sammā sati* and *sammā diṭṭhi*.
- Similarly, *ekaggatā* in the universal *cetasika* set becomes *sammā samādhi*, and *virīya* and *vitakka* in the set of particulars become *sammā vāyāma* and *sammā saṅkappa* when cultivated.

12. As we noted, we can control a bad series of thoughts like planning a robbery or even making a quick plan to steal an item from a store. **There is enough time to think about the consequences of such bad actions and deliberately stop such thoughts. But one needs to be in a reasonably stable “state-of-mind” to be able to do that. When the mind is agitated, the mind cannot see “right from wrong”. The five hindrances cover the mind.**

- Sometimes people commit horrendous crimes in the spur-of-the-moment. One can get into a rage and shoot someone with a gun that is close by. How do we stop such quick reactions? By being mindful of controlling that bad *gati*, which is the tendency to get mad at the slightest provocation. See #10 above.
- When one keeps reducing one’s “bad *gati*,” those really dangerous *gati* — which could lead to rebirth in the *apāyā* — will be permanently eliminated when one becomes a *Sotāpanna*. With that achieved, that mindset persists even in future lives. As we saw, a *paṭisandhi citta* in the new life arises based on the *cuti citta* of the past life, so it has all the “*gati*” from a past life. Changing to a “*gati*” of a *Sotāpanna* is a change in the lineage (*gotrabhu*.) One becomes an *Ariya* or a Noble person forever.

13.3.5 1. Thoughts (Citta), Consciousness (Viññāṇa), and Mind (Hadaya Vatthu) – Introduction

It will be beneficial to read this post even if one is not interested in learning *Abhidhamma*.

1. After writing a few posts in the *Abhidhamma* section, I realized that it is a good idea to write introductory posts on English meanings of some *Pāli* key words related to the mind. **In the end, words do not matter and what matters is grasping of the concepts involved.** But conveying the concept correctly REQUIRES the use of right words.

- This is a bit of a problem because there are no words in English that truly conveys the meaning of some *Pāli* key words when talking about the mind (like *mano* and *viññāṇa*). Thus what I need to do is to write several introductory posts describing such keywords (like what I did for *anicca*, *dukkha*, *anatta*).
- More details will be given in the *Abhidhamma* section, but the posts that appear in this section provide just the basics.

2. A *Citta* (pronounced “chiththa”) is widely translated as a “thought”, *viññāṇa* as “consciousness” and *mano* as “mind”. **I am going to keep using the former two, but am going to use “*hadaya vatthu*” as the *Pāli* word for mind.** Let us first discuss the reason for using this term for the mind.

- *Hadaya vatthu* is where *citta* (thoughts) arise; thus it is appropriate to call it the mind or even more appropriately “seat of the mind”. ***Hadaya vatthu* is the “link” between the “*mano loka*” (mind plane) and the “material plane” whether it is in *kāma loka*, *rūpa loka* or *arūpa loka* (i.e., anywhere in the 31 realms).** Mind or the *hadaya vatthu* is a very fine *rūpa* (matter); in technical terms, *hadaya vatthu* is formed at *paṭisandhi* as a *vatthu dasaka*.
- By the way this *hadaya vatthu* is the only trace of matter associated with a living being in the *arūpa loka*. It is much smaller than an atom; only a form of “*suddhāshtaka* [*suddhaṭṭhaka*]” in the form of a “*dasaka*.”
- For example, if a *cuti-paṭisandhi* transition occurs from a cat to a human, then the “cat *hadaya vatthu*” dies and a “human *hadaya vatthu*” is formed and the very next *citta* arises in the “human *hadaya*”

vatthu” or the “human mind” in the “human *gandhabba*”; see, “[Cutī-Pāṭṣandhi Transition – Abhidhamma Description](#)”. With that in mind, let us discuss the ultimate “primary elements”.

3. In the absolute sense (*paramatta*), there are four entities: *citta*, *cetasika* (pronounced “chetasika”), *rūpa* (pronounced “rūpa”), and *Nibbāna*. The last one, *Nibbāna*, does not belong to “this world” of 31 realms. Therefore, there are only *citta*, *cetasika*, and *rūpa* that are in anything and everything in this world.

- *Citta* and *cetasika* are “*nama*” and all tangible things are made of “*rūpa*”.
- There are 89 (or 121) types of *citta*; 52 kinds of *cetasika*, and 28 kinds of *rūpa*. These are all listed in the “[Tables and Summaries](#)” section.

4. A *citta* (thought) does not arise by itself, but arises with a number of *cetasika* (mental factors). There are 7 *cetasika* that arise with ANY *citta*, and normally there are other *cetasika* that arise in addition to those seven. This is discussed in “[Cetasika \(Mental Factors\)](#)”.

- There are “good” and “bad” *cetasika*. The familiar ones are *lobha*, *dosa*, *moha* and *alobha*, *adosa*, *amoha*, but there are many others. These determine whether a given *citta* is a “good” (*kusala*) *citta* or a “bad” (*akusala*) *citta*. There are only good or bad *cetasika* in a given *citta*; they do not mix.

5. Even though a *citta* arises and perishes within less than billionth of a second, it gets contaminated during its lifetime. Starting as a “pure *citta*” (“*pābasvara citta*” which is also called “*prabhasvara citta*” in Sanskrit) with those 7 universal *cetasika*, it gradually degrades by incorporating many other *cetasika* into a “contaminated *citta*” or *viññāṇa*. Without going into details, the nine steps are:

- ***citta*, *mano*, *manasan*, *hadayan*, *pandaran*, *mana indriyan*, *manayatan*, *viññāṇa*, *vinanakkhandho*.** [*Yam cittam mano mānasam hadayam paṇḍaram mano manāyatanaṃ manindriyaṃ viññāṇaṃ viññāṇakkhandho...*] But this happens during the life of the *citta* itself (in billionth of a second) according to the “*gathi*” that we have. **This is why we cannot control our initial thoughts; but as those initial thoughts turn to speech and bodily actions, we may have time to control them.**
- But we still use the term “*citta*” to denote the final outcome; in order to differentiate the one that the sequences started off, we call it a “pure *citta*” or a “*pābasvara citta*.”
- What we end up is basically what we call *vinanakkhandha*, and all this happens within a billionth of a second. This “contamination process” cannot be controlled willfully at that early stage; it happens automatically based on one’s “*gathi*.” **The only thing we can do is to change our “*gathi*.”**

6. We can use the following analogy: If we start off with a glass of pure water that can be compared to a pure *citta* with just the 7 universal *cetasika*. If we add a bit of sugar (*mano*), salt (*manasan*) it gets a bit contaminated but we cannot see the contamination. Now we add a bit of brown sugar and we can see the water turning to brown; this is like the *hadayan* stage. Then we keep adding chocolate, milk, etc, the water gets really contaminated; but it is still mostly water. A contaminated *citta* is like at the *viññāṇa* stage; it is a *citta* that is contaminated.

- The *citta* of an *Arahant* does not contaminate beyond the *manasan* stage (While in the “*Arahant phala samapatti*” enjoying *Nibbānic* bliss, an *Arahant* has the *pābasvara citta* or the pure *citta*). All others get to the *viññāṇa* stage, but of course the “level of contamination” is much lower even by the time one gets to the *Sotāpanna* stage, because one has gotten rid of any “*gathi*” associated with the *apāyā*.
- As we can see, it is not possible to control such a fast process by sheer will power; it is a matter of “cleansing the mind” progressively of the contaminants of greed, hate, and ignorance.
- Now we can see why “*mano*” cannot be the mind. “*Mano*” is just a bit “contaminated” *citta*. It gets progressively contaminated and by the time it comes to the “*viññāṇa*” step it has captured all relevant *cetasika* for that *ārammaṇa* or the “thought object”.
- **At the last step, a very profound thing happens.** The *manasikara cetasika* brings in to play all relevant past *viññāṇa* (which are fixed as “*nama gotta*”) as well as one’s “hopes and dreams” for the

future that are relevant to the “event in question”. For example, if the thought occurs due to seeing a nice house, one may compare that house with houses like that one has seen before AND one’s “dream house” that one is hoping to build one day. Therefore, in the “final version”, a *citta* is a very complex entity that reflects not only the “nature of the object seen” but also one’s own likes/dislikes for it.

- This last stage of the *citta* or *Viññāṇa* is the “composite awareness” for that particular event, which also has one’s own likings, dislikings, etc for that particular event; see, “[Citta, Mano, Viññāṇa – Stages of a Thought](#).”

7. And we do not, and cannot, just perceive a single or even a few *vinnanakkandho*; rather what we “feel” as a “thought” is the sum of many such *vinnanakkandho*, and we still call that a “*citta*” or a “thought”; see, “[What is a Thought?](#)” and “[Citta and Cetasika – How Viññāṇa \(Consciousness\) Arises](#)”.

- We also alternatively call such sense experiences “*citta*,” “thoughts,” “consciousness,” and “*viññāṇa*.”
- Thus it is critical to understand that what we mean by *viññāṇa* in general is the sum total of many *cittā*; in *paṭicca samuppāda*, at the “*avijjā paccayā viññāṇa*,” *viññāṇa* means this sum total of many *cittā* or even more accurately the sum total of many of *vinnanakkhandho*.

8. Now I would like to point out a few important conventions:

- It is important to remember that a thought can have many meanings even in English: [WebLink: WIKI: Thought](#)
- Normally “*citta*” is used to denote a thought, and “*viññāṇa*” is used to denote the “awareness” associated with a thought. It is fine to do that most of the time, but if a discussion gets technical one could come back to this post and refresh memory as to the details.
- And as you can imagine, such an “average of thoughts” may have many type of cognitions and underlying “awarenesses”, and we will talk about the different types of *viññāṇa* in the next post, “[2. Viññāṇa \(Consciousness\) can be of Many Different Types and Forms](#)”.

13.3.6 2. Viññāṇa (Consciousness) can be of Many Different Types and Forms

Revised August 4, 2021; July 1, 2022

1. *Viññāṇa* is unique to sentient beings. Plants are alive but have no *viññāṇa*; they respond to the environments but are not capable of “thinking.” Sentient beings are aware that they are alive and just that basic awareness of “being alive” is not really a *viññāṇa*.

- This purest level of *viññāṇa* (the awareness of being alive) is called the “*citta*” (pronounced “chiththa”) stage.
- A *citta* arises with 7 concomitant “mental factors” (*cetasika*, pronounced “chetasika”), and this is described in “[Citta and Cetasika – How Viññāṇa \(Consciousness\) Arises](#).” To emphasize, a pure *citta* arises with universal *cetasika*; a *citta* always has those 7 *cetasikā*.

However, a *citta* gets “contaminated” by other *cetasika* as soon as it arises. Within the lifetime of a *citta* (which is less than a billionth of a second), it progressively gets contaminated by “good” or “bad” *cetasika*, and this happens in nine stages! See the previous post: “[Thoughts \(Citta\), Consciousness \(Viññāṇa\), and Mind \(Hadaya Vatthu\) – Introduction](#).”

2. As discussed in “[Citta and Cetasika – How Viññāṇa \(Consciousness\) Arises](#),” additional *cetasikā* provide “color” to a *citta*: if a set of “good *cetasika*” arise with the *citta* it becomes a “good thought” or a “good *viññāṇa*”; if it is a set of “bad *cetasika*,” then the thought or the *viññāṇa* is bad (those *cetasika* do not mix). Also, there are neutral thoughts or neutral *viññāṇa* that are neither good nor bad.

- *Viññāṇa* can be experienced in many different ways; since it is hard to come up with different names for each case, they are all bundled together as *viññāṇa*. Words like *citta*, *viññāṇa*, *mano*, as well as *cakkhu viññāṇa*, *sota viññāṇa*, etc., and *vipāka viññāṇa* are used in different contexts, and that can

be confusing to many regardless of whether their native language is English, Chinese, or even Sinhala, which is the closest language to Pāli. But each term has its own “subtle identity,” and as we discuss more, those subtle differences will become clear.

3. *Viññāṇa* is often translated as “consciousness,” but *viññāṇa* can be used in many different contexts like “subconscious” or “layers of consciousness.”

- The same problem is encountered by those who speak the *Sinhala* language because there the word “*sitha*” (සිත) is used on many occasions to represent the Pāli words *citta*, *mano*, and *viññāṇa*. Similarly, in Sinhala, “*yati sitha*” (යති සිත) is used to denote the subconscious.
- This “subconscious” in English (as introduced by Sigmund Freud) is not a separate *citta* (there can be only one *citta* at a time). But, each *citta* can have “layers of consciousness”; the *manasikāra cetasika* plays a big role here.
- For example, at a given time, we may have several “subconscious” *viññāṇa* (expectations): **we may have plans to buy a certain car, getting ready to go on a trip next week, in the process of building a house, etc.; all these are in the subconscious and each *citta*.** If we see a car on the road that looks like the car we are interested in, the *viññāṇa* alerts us to it, and we take a good look at it.
- As the Buddha advised *bhikkhus*, what really matters is to convey the meaning. Just like in the case of *Paṭicca Samuppāda* or *taṇhā*, it is best to use the *Pāli* words and comprehend their meanings; those key words convey deep meanings that may take several words or even sentences in any other language to get the idea across.

Types of *Viññāṇa* associated with *Kamma* and the Sense Doors

Viññāṇa is complex and can be presented in different types and forms. We will start by looking at “two categories” of *viññāṇa*.

4. First, we can categorize them according to *kamma* (or *saṅkhāra*) associated with the *viññāṇa*: ***Kamma viññāṇa* and *vipāka viññāṇa*.**

Let us describe in plain English what these terms mean.

- We can put *viññāṇa* into two categories: Those *viññāṇa* that arise while doing a *kamma* (*saṅkhāra*) is a *kamma viññāṇa*. For example, when one steals something, one has an awareness of that; that is the “*viññāṇa* that one is stealing.”
- Then some arise as *kamma vipāka*, and thus we do not have much control over them; they just happen to us and are called *avyākata viññāṇa* or *vipāka viññāṇa*. I like the term *vipāka viññāṇa* than *avyākata viññāṇa* because then it is easy to differentiate those two kinds. For example, when one is walking on the road and sees something valuable on the roadside; that is a *cakkhu viññāṇa* (seeing something) and also a *vipāka viññāṇa* (due to a *kamma vipāka*).

5. When traveling by car and looking out of a window, we see many different things. But most of it we do not pay any attention to, even though we are “aware” that we see things. Those are *vipāka viññāṇa*, they are “presented to us,” but most of them may not interest us.

- Then all of a sudden, we see something that “piques our interest,” say, a nice house by the roadside. Then we focus on that and may keep looking at it until it moves out of our range. That is a *vipāka viññāṇa* that triggered a “*gati*” in us; it was of interest. And it could put us in a position to acquire more *kamma* by initiating a *kamma viññāṇa*. An easy way to remember is that “*kamma viññāṇa*” are those arising via “*saṅkhāra paccayā viññāṇa*” in *Paṭicca Samuppāda*; see #6 below.
- For example, if we really got interested in that house, we may start thinking about how nice would it be if we could build and live in a house like that. Now we are making *saṅkhāra* (i.e., generating *kamma*) based on that “seeing event.” Thus such thoughts (or *viññāṇa*) that followed the initial *vipāka viññāṇa* of “seeing the house” are *kamma viññāṇa*.

- Our life experiences belong to basically one of those two categories.

6. *Vipāka viññāṇa* arise with sensory input; only these can be truly called “consciousness.” We can differentiate them into six categories, this time based on the sense door: thus we have *cakkhu viññāṇa* (vision consciousness), and *sota* (sound), *ghāṇa* (smell), *jivhā* (taste), *kāya* (touch), and *mano* (mind) *viññāṇa* (consciousnesses).

- In the previous example, the both types of *viññāṇa* were all initiated by *cakkhu viññāṇa*, a “seeing event or consciousness.” At the *kamma viññāṇa* stage, they turned to an “expectation” (more than consciousness) because those thoughts about acquiring a house originated in our minds.
- Thus if you contemplate a bit on this, you can see that we can put ALL our experiences into one of those two “divisions,” i.e., we can analyze them to be in the *vipāka viññāṇa* or *kamma viññāṇa* categories.

7. Let us discuss something fundamental to *Paṭicca Samuppāda*.

- The *Paṭicca Samuppāda* cycle starts with “*avijjā paccayā saṅkhāra*”, and “*saṅkhāra paccayā viññāṇa*”. **This *viññāṇa* is NOT a *vipāka viññāṇa*, but only a *kamma viññāṇa*.**
- When we see something, hear something, etc., those are things that HAPPEN to us. Thus there is no *avijjā* (or ignorance) initiating that consciousness. There is no *kusala-mūla* or *akusala-mūla Paṭicca Samuppāda* cycle associated with such a consciousness (*vipāka viññāṇa*).
- However, if we now decide to act on it (say, take another look at it because we like it), then we may be initiating a *saṅkhāra (kamma)* event: now this new event initiates an *Idappaccayatā Paṭicca Samuppāda* cycle with “*avijjā paccayā saṅkhāra*,” which leads to, “*saṅkhāra paccayā viññāṇa*,” i.e., this *viññāṇa* was initiated by a *saṅkhāra*; thus it is a *kamma viññāṇa*.

8. Usually, what happens in our lives is that we are bombarded with sensory inputs via all six senses. We tend to turn our attention to many because we are afraid that “we may miss out on something.” This is the root cause of the lack of “peace” in our minds because we are constantly moving our attention among the six senses, going back and forth. If we have too many “likings,” our mind will be pulled in all different directions trying to follow all those sense inputs.

- We can reduce this effect by avoiding busy environments (i.e., going to a secluded place). **But, we still cannot “turn off the sixth sense input,” i.e., the mind, unless we purify our minds.** This is the key to meditation. It is not possible to have “peace of mind” if the mind is burdened with greed, hate, and ignorance (wrong vision or *micchā diṭṭhi*).

9. Thus, an *Arahant* can have a peaceful mind even when in the busiest place. A *Sotāpanna* can do that to a certain extent too.

- Even before any of the “*magga phala*” is attained, one can easily get to *samādhi* and then to *jhānā* by gradually getting rid of the defilements associated with “wrong vision” just by learning Dhamma (mainly *anicca, dukkha, anatta*).
- Then we can reduce the number of different types of *kamma viññāṇa* going through the mind (“Sounds like my neighbor’s car leaving, I wonder whether she is going to the mall?”, “I wonder what (my enemy) is up to today?”, “I wish I could have a body like that!”, “How come I don’t have a nice house like that?”; these are all types of *kamma viññāṇa* that we burden our minds with unnecessarily).
- And it is important to realize that it is not easy to turn those off; they WILL BE turned off automatically when we purify our minds first by learning Dhamma (“What is the use of thinking about unnecessary things? There are better things to think about that provide lasting happiness”).

Next, “[3. Viññāṇa, Thoughts, and the Subconscious](#)”,

13.3.7 3. Viññāṇa, Thoughts, and the Subconscious

Revised February 25, 2020

Cetasikā (Mental Factors) Determine the Nature of a Citta (Thought)

1. A thought (*citta*) arises based on a specific thought object (*ārammaṇa*), say thinking about buying a car or going for a walk. There is only one *citta* at a time, but each lasts less than a billionth of a second. The word *citta* is pronounced “chiththa.” See, “[“Tipitaka English” Convention Adopted by Early European Scholars – Part 1.](#)”

- *Cittā* (plural of *citta*) flow at a very fast rate. We do not experience individual *citta*, but the overall effect of billions of *cittā* that arise in a second.
- Each *citta* has many *cetasika* (mental factors) in it, including the all-important *saññā*, *phassa*, *manasikāra cetasika*.
- Then there are “good” and “bad” *cetasika* in a *citta* that describes the “quality” of the *citta*.
- When someone is angry, most *cittā* **at that time** will have anger/hate (*paṭigha* and/or *dosa cetasika*.) When the same person is feeding a hungry person his/her *cittā* **at that time** will have the benevolence and/or loving-kindness *cetasikā*.
- The good and bad *cetasikā* do not mix, i.e., one either has a good thought or a bad thought. For discussion on *cetasika*, see, “[Cetasika \(Mental Factors\).](#)”

What Is Viññāṇa? – Role of Cetasikā

2. Even though we simply think about a “thought,” a thought is really a complex entity, that goes through nine stages within a billionth of a second. It ends as *viññāṇa* or *viññāṇakkhandha*. See, “[Citta, Mano, Viññāṇa – Stages of a Thought.](#)” *Viññāṇa* represents the overall experience of “thought” and is largely described by the *cetasikā* in those *cittā*.

- Of course, no one experience a *viññāṇa* due to a single *citta*; rather what one experiences is the average of millions or billions of *cittā*. A bunch or a heap is called *khandha* in Pāli or Sinhala. Thus what we experience is a *viññāṇakkhandha* or the overall effect of a bunch or a heap of *cittā*.
- *Viññāṇa* is complex and multifaceted. But they are primarily of two types: *vipāka viññāṇa* and *kamma viññāṇa* See, “[Viññāṇa – What It Really Means.](#)”
- We can look at those two types in a simple way as follows.

3. The *manasikāra* and *saññā cetasika* are in each and every *citta*, and they can incorporate all past memories, habits (*gati*) and cravings (*āsavā*) to a given *citta*. It is the *cetanā cetasika* that “puts it all together.” Only the mind of a Buddha can “see” such amazing details. It all happens within a billionth of a second!

- Our *gati* and *āsavā* (plural of *āsava*) may not be displayed in each *citta*. Rather, they lie dormant, waiting for a “trigger” to come up. For example, greedy thoughts arise only when a “pleasing thought object” is in play, as in seeing a tasty dish or an attractive person.
- Therefore, the way we think (*viññāṇa*) depend on our *gati* (habits/character,) *āsavā* (cravings,) AND the particular “thought object” or *ārammaṇa*.
- Of course, we can get rid of certain *gati/āsava* and cultivate new ones.
- The main goal of *Ānāpāna* and *Satipaṭṭhāna* meditations is to remove bad *gati/āsava* and to cultivate good *gati*. See, “[Is Ānāpānasati Breath Meditation?](#)” and “[9. Key to Ānāpānasati – How to Change Habits and Character \(Gati\).](#)”

Vipāka Viññāṇa and Kamma Viññāṇa

4. The mind is directed to a new thought object (or *ārammaṇa*) with a *vipāka viññāṇa* that may come through **any of the six sensory inputs**. For example, we may be walking down the street, but an attractive item in a shop window may catch our attention.

- Now, if we like that item, we may start thinking about buying it. That is a *kamma viññāṇa*. Now we have generated a new *viññāṇa* with a desire to buy that item. A *kamma viññāṇa* has an expectation. We may not buy it at that time. But if we go home and again start thinking about it (generating *vacī saṅkhāra*), then we build up that *viññāṇa* via “*saṅkhāra paccayā viññāṇa*” step in *Paticca Samuppāda*. Therefore, a *kamma viññāṇa* **arises only in the mind**.
- Without getting deep into the issue, we can just say that a *kamma viññāṇa* is an expectation. Once formed, a *kamma viññāṇa* will stay with us at least for a while. It will grow only if we keep thinking, speaking or doing things (with *vacī* and *kāya saṅkhāra*) related to that expectation.

Kamma Viññāṇa Come Back as Vipāka Viññāṇa

5. When we build such an expectation, the memory of that can come back as a *vipāka viññāṇa* at a later time.

- For example, the memory of that item in the shop window in #3 above may come back to the mind via one of the six senses later on. For example, we may hear about it on the radio, we may hear someone else talking about it, etc. It may even “pop into the mind” too.
- That item in the shop window is a “thought object” or a *ārammaṇa*.
- Then if we keep thinking, speaking, doing things related to that *ārammaṇa*, that associated *viññāṇa* will grow.

What is Subconscious?

6. Such *vipāka viññāṇa* are waiting in the background to bring their fruits. There may be many types hiding beneath the surface. **This is what Sigmund Freud called the “sub-conscious”**.

- When I am paying for my groceries, my thoughts stay focused on that transaction. But there can be many types of *viññāṇa* lurking “in the background”. I may be building a house, studying for an exam, planning a trip, planning a birthday party for my child, etc. and all those “*viññāṇa*” are working in the background even though I am not thinking about any of them at the time I am paying for my groceries.
- However, any of those, and even some things that I had not been thinking about for a long time, can be there in the “subconscious”. But there is no separate “subconscious” as such.
- All these different types of *viññāṇa* cannot be there in a single thought (*citta*), and there is only one *citta* at a time; see, “[What is a Thought?](#)”. Then how is it possible for many types of *viññāṇa* to be lurking in the background? That is what we discussed in #2, #3 above. Based on the particular *ārammaṇa*, the *cetanā cetasika* “transforms” a pure *citta* to the “contaminated” *viññāṇa* stage in several steps.

7. The more one does something repeatedly, there starts a *kamma viññāṇa* for that particular event or behavior. For example, when one starts smoking, a *viññāṇa* starts building, and the more one smokes, the stronger the *viññāṇa* gets. This is called “feeding the *viññāṇa*” by doing it again and again. In other words, habits are formed via repeatedly feeding the *viññāṇa* for that habit.

- When a certain *viññāṇa* is pleasing to the mind, that *viññāṇa* tries to get fed frequently. When someone has the habit of smoking the *viññāṇa* for that tries to deviate his/her attention to smoking at every possible opportunity. For example, if a smoker sees an advertisement for smoking, that “triggers” the liking or the *viññāṇa* for smoking that was in the subconscious.

8. But it works the same way for a *viññāṇa* that got established with a dislike also. For example, if someone did something really awful to you in the past, the hearing of his/her name will bring back that *viññāṇa*.

- This is why we get “attached” (*taṇhā*) to things we like as well for things we dislike and is the meaning of *taṇhā* (get bonded via greed or hate); see, “[Tanhā – How We Attach Via Greed, Hate, and Ignorance.](#)”

***Viññāṇa* Are Not Permanent**

9. Not all *viññāṇa* keep accumulating in the background. Those weaker ones, especially if don't get fed, diminish and disappear.

- For example, suppose I had planned an overseas trip and had been making preparations for it. The more preparations I make and the more thoughts I have of the trip, those are “food for that *viññāṇa*”, and it grows. If I see a new article with that country's name, I would immediately read the article. But suppose, a major war breaks out in that country before my trip; then I would cancel that trip right away. I will no longer be planning for the trip and my mind will “not be interested” in it anymore. Since that *viññāṇa* for “visiting that country” is not going to get fed anymore, it will be gone in a short time.
- We don't even need to actually physically do the activity to “feed the *viññāṇa*” or make a habit stronger. There are studies that show that one could improve the game of basketball, for example, by just visualize practicing, and getting the ball mentally. These are called “*mano sañcetanā*”. Focusing attention on a given task can be very powerful.
- One's associations strongly influence which of those different types of *viññāṇa* will grow by “getting fed” frequently. If one starts associating with people who drink regularly, one's *viññāṇa* for “getting drunk” will grow as one keeps feeding that *viññāṇa* by drinking frequently.

Summary

12. A built-up *viññāṇa* can form a habit (*gati*.) As the habit or the *gati* gets stronger, it can be carried over to the next life, possibly in two ways.

- If a human dies and has time left in the “human *bhava*” then when he/she is reborn as a human most of the previous *gati* will be there.
- A really strong habit could lead to a “*paṭisandhi viññāṇa*” at the dying moment and can lead to a corresponding “*bhava*” based on that particular *gati*. For example, an extremely greedy person, may acquire a “*peta bhava*” at the dying moment and be born as a “*peta*” or a hungry ghost.

13. Thus *viññāṇa* is very complex. It is not just “awareness.” *Viññāṇa* also has one's “hopes and dreams” as well as “likes, dislikes, and habits”. It also includes the “subconscious.” It is a complex combination of the 52 *cetasikā*.

- Of course, not all *cetasikā* are involved in a given *citta* or in our thoughts. *Sobhana* (good) *cetasikā* do not arise with *asobhana* (bad) *cetasikā* in a given *citta*.
- See, “[Cetasika \(Mental Factors\)](#)” for a discussion on *cetasikā*.

13.5 Role of the Brain in Human Consciousness

Brain – Interface between Mind and Body

Body Types in Different Realms – Importance of Manomaya Kāya (located at The Grand Unified Theory of Dhamma)

13.5.1 Brain – Interface between Mind and Body

April 22, 2016; revised September 22, 2019; #17 added March 31, 2021; March 6, 2023

The brain is Not the Mind

1. Contrary to what scientists believe, our minds are not in the brain (**this is another prediction from Buddha Dhamma that will be proven correct in the future**).

- The “mind door” where *citta* (or thoughts) arise is at the *hadaya vatthu* is not located not in our physical bodies. It is in the *manomaya kāya* of the *gandhabba*; see “Gandhabba (Manomaya Kāya)-Introduction.”
- The *gandhabba* has a subtle body; it is not a “body” in the sense we usually think about a “body.” It is more like an energy field that overlaps the physical body; see “Ghost in the Machine – Synonym for the Manomaya Kāya?.”
- The *hadaya vatthu* overlaps the heart in the physical body. When we hear traumatic news, we feel a burning sensation close to the heart, not in the head. We don’t say, “Oh, my head felt burning when I heard the news.” It is the heart area that feels it. (Head may start hurting later if one keeps thinking about the loss).
- On the other hand, when we overuse our five physical senses or think hard about a complex problem, our head hurts. Because in those situations, the brain has to do a lot of processing. While watching a movie, our brains work overtime to convert those sensory inputs from the eyes (*cakkhu indriya*) and the ears (*sota indriya*). When we think about a complex problem, the brain’s *mana indriya* must work hard; see below.

Two Overlapping “Bodies” – Physical Body and *Gandhabba* (Mental Body)

2. A physical body is a temporary shelter or a “shell” for the *gandhabba*’s subtle body. The *gandhabba* receives sense inputs from the outside world via the physical body. See, “Body Types in Different Realms – Importance of Manomaya Kāya.”

- Since a given physical body has a lifetime of around 100 years, we have to “build a new physical body” when the current one decays and finally dies. (That is if we have extra *kammic* energy for the human *bhava*); see, “Bhava and Jāti – States of Existence and Births Therein.”

3. Before entering the mother’s womb, the *gandhabba* has an invisible “body,” more like an “energy packet.” Thus, it cannot experience taste or touch, even though some can “digest odors” and become denser.

- A *gandhabba* waiting for a womb usually is about the size of a fully-grown human, but it has very little “matter” that is not visible to us. At the moment of “*okkanti*” or entering the mother’s womb, he/she will enter THROUGH the mother’s body and collapse to the size of the zygote when taking possession of it; see, “Buddhist Explanations of Conception, Abortion, and Contraception.”

- Thus a *gandhabba*, when outside waiting for a suitable womb, is just like a ghost shown in the movies. Of course, a human cannot see it even using technological advances. It is much smaller in mass than the first cell formed by the union of the mother and father, the zygote.
- The physical body grows starting with that single cell (zygote) using the nutrition from the mother. After the baby is born, it grows to the size of an adult by consuming food.
- Thus it is helpful to have this visual, where a very fine *gandhabba* trapped inside a physical body of over a hundred pounds controls it.

Brain – Interface Between the Physical Body and *Gandhabba*

4. Once inside a physical body, *gandhabba* has to use the physical body to interact with the outside world. It is like being trapped in a solid shell. Initially, its mind will be in the *bhavaṅga* state (see, “[Citta Vīthi – Processing of Sense Inputs](#)”) and not conscious of the outside world, except for body sensations.

- In a human, the brain first processes the signals coming through the “physical senses” (eyes, ears, etc.). The brain transmits that information to the five *pasāda rūpa* in the *gandhabba*. Those *pasāda rūpa* then pass that information to the *hadaya vatthu* (seat of the mind) in the *gandhabba*; see, “[Gandhabba \(Manomaya Kāya\)- Introduction](#).”
- That is how our minds receive information from the external world.
- Now the question arises: “How do the sense inputs coming through the eyes, ears, tongue, nose, and the body, are transmitted to the *pasāda rūpa* (situated close to the *hadaya vatthu*)?” Note that the *hadaya vatthu* overlaps the physical heart.

5. The brain acts as the intermediary between those physical sense inputs and the five *pasāda rūpa*. It processes incoming information and converts it to a form that can be understood by the mind (*hadaya vatthu*).

- First, the sensory inputs coming into the physical body through the eyes, ears, tongue, nose, and body go to specific brain regions. That has been well-researched by scientists over the past hundred years. The following figure shows the specific areas of the brain that analyze the data from the five senses.

Brain and five Senses

- Science cannot explain how the brain comprehends the corresponding signals after processing those signals. For example, in vision, there is no “picture” formed in the back of the head; see “On Intelligence” by Jeff Hawkins (2005) for a helpful discussion.

6. The signals for vision, sounds, smells, and taste come into the body through specific body parts. In contrast, the touch sensations can come from anywhere in the body, and transmitted to the brain via an intricate system of nerves:

- These nerve signals go to the brain for processing (see the “touch and pressure” processing area in the figure in #5 above).

***Gandhabba* (Mental Body) Overlaps the Physical Body**

7. It is essential to note that the misty *gandhabba* has a similar “nervous system” that overlaps the physical nervous system shown above. Yes. *Gandhabba* is more like an “energy field.” (This is irrelevant to the present discussion, but the physical body imparts *kamma vipāka* via body aches, diseases, and injuries.)

- The physical nervous system has to align with the nervous system of the *gandhabba*. That alignment could change (due to *kamma vipāka*), which makes our body’s nervous system go out-of-alignment for proper body function leading to aches and pains. See, #6 of “[11. Magga Phala and Ariya Jhānā via Cultivation of Saptha Bojjanga.](#)”

8. The signals from the other four senses go to specific brain areas (indicated in the figure of #5 above) via specialized neural pathways. For example, the optical nerve carries the visual signal to the brain:

Eye Indriya

- Once the brain processes those sensory inputs from the five physical senses, they are “transmitted” to the corresponding five *pasāda rūpa* in the *gandhabba* (*manomaya kāya*). See below.

Mana Indriya in the Brain

9. So far, we have identified five of *gandhabba*’s “windows to the outside world” from his/her “shell” or the physical body: eyes, ears, nose, tongue, and the body.

- What about the “*dhammā*” that are the finest *rūpa* (*mano rūpa*) that interact with the physical body? That is how we think about “random things” out of the blue. For example, we may be washing dishes in the kitchen, and thoughts about a friend or a relative may come to mind.
- Thoughts about a friend — who may be a thousand miles away — come through the *mana indriya* in the head (inside the brain). Of course, science is not aware of that.
- We discussed this in a previous post: “[What are Dhamma? – A Deeper Analysis.](#)”

10. How are the signals processed in the brain due to incoming vision, sound, smell, taste, touch, and *dhammā* are passed to the five *pasāda rūpa* and the *hadaya vatthu*? Details in “[Gandhabba \(Manomaya Kāya\)- Introduction.](#)”

- It is well-known that there are electromagnetic brain waves of different types (alpha, beta, theta, and gamma). I will write a post on this in the future. These waves are called “*kirana*” in the *Tipiṭaka*.

The Origin of Citta Vīthi

11. When information comes to one of the five *pasāda rūpa*, it passes on that signal to the *hadaya vatthu* by impinging (hitting) the *hadaya vatthu*. That results in the *hadaya vatthu* vibrating 17 times, just like a clamped blade vibrates a certain number of times when hit by an object; see, “[Gandhabba \(Manomaya Kāya\) – Introduction](#)” and “[Citta Vīthi – Processing of Sense Inputs.](#)”

- That is the origin of a *citta vīthi* of 17 *citta*. Each *citta* in a *citta vīthi* corresponds to a single vibration of *hadaya vatthu*. This 17 thought-moment time is the lifetime of a *hadaya rūpa* (vibrational energy) of the *hadaya vatthu*.
- It is a common mistake to take this to mean that **any *rūpa*** has a lifetime of 17 thought moments. **That is a terrible mistake**; see, “[Does any Object \(Rūpa\) Last only 17 Thought Moments?.](#)”
- Describing these details in one or even several posts is impossible. One may need to look through other posts to clarify some concepts. The “Search” button on the top right is an excellent resource for this task.

12. Any of the five *pasāda rūpā* has to strike the *hadaya vatthu* to pass on its signal. However, signals from the *mana indriya* can exchange information with the *hadaya vatthu* directly.

- When the *mana indriya* interacts with the *hadaya vatthu*, that also results in a *citta vīthi*. Such *manodvāra citta vīthi* do not have a fixed length.

- Still, only one of the six sensory signals can contact the *hadaya vatthu* at a given time. But since the process is swift, billions of *citta vīthi* can run through the *hadaya vatthu* “in the blink of an eye”.

Two Inter-Dependent “Bodies”

13. Therefore, this process involves interaction between two overlapping systems: the physical body and the corresponding subtle “energy body” of the *gandhabba*.

- When the *gandhabba* escapes from the body under stressful situations, it can float above the physical body. Then the physical body becomes inert until the *gandhabba* returns to it; see, “[Manomaya Kāya and Out-of-Body Experience \(OBE\)](#).”

14. Thus, the brain plays a significant role in shaping our future. Similarly, the five physical senses play vital roles too.

- If one of the five physical senses is damaged, we lose the corresponding “window to the external world”. We will not be able to see if both eyes are damaged. If the sensors inside the ears are damaged, we cannot hear, etc.
- But the most critical is, of course, the brain. If the brain is damaged, sensory signals cannot be processed, and we cannot interact with the external world. Thus, being brain dead is virtually equivalent to being dead.
- However, if one’s brain becomes damaged due to an accident, it will not affect the *gandhabba* inside. It is just that the *gandhabba* will not be able to communicate with the external world. And if damage to the brain results in the death of the physical body, the *gandhabba* will just come out of the dead body and wait for a suitable womb.

Next Existence Determined by *Gati* and *Kamma Vipāka*

15. It does not matter whether one gets killed due to an accident or dies due to an illness or old age. The *gandhabba*’s future is determined by his/her *gati* (or *gathi*), past *kamma* (*kamma bīja*), etc.

- If the physical body dies in an accident, the *gandhabba* will immediately come out of the dead body. Then it will wait for a suitable womb if there is still more *kammic* energy left for the human *bhava* (in an accident, that is likely).
- But if one gets to old age and dies or dies due to illness — and if one has exhausted *kammic* energy for the human *bhava* — then the *cuti-paṭisandhi* will occur. If one is to become a *deva*, a *deva* will appear instantaneously in the corresponding *deva* world. If one is to become an animal, an animal *gandhabba* will emerge from the dead body and will have to wait for a suitable womb to become available.

16. It is also clear why we must take good care of the body, our sense faculties, and our brains. *Gandhabba*’s (our) ability to make decisions depends on all those faculties working in optimum conditions.

- We have a short lifetime of around 100 years to get rid of our defiled (immoral) *gati*. We also need to cultivate good (moral) *gati*, and comprehend the true nature of this world (*anicca, dukkha, anatta*), and be free from future suffering.
- We need to try to get to the *Sotāpanna* stage of *Nibbāna* and be free from the four lowest realms (*apāyā*). At least, we must make progress towards that goal so that in a future life, we will have a *tihetuka* birth that makes it easier to attain *Nibbāna*.
- To accomplish those things, we need to eat, exercise, and take care of our bodies to perform optimally. It is also necessary to stay away from drugs and alcohol. And to associate with those who have similar goals (and stay away from those with bad habits).

17. Some scientists/philosophers are beginning to understand that memories are not stored in the brain. See, “[WebLink: getpocket.com: The Empty Brain](#).”

Thanks to reader Diogo Roberto R. Freitas for alerting me to the above article.

13.6 Gandhabba (Manomaya Kāya)

[Gandhabba \(Manomaya Kāya\) – Introduction](#)

[Brain – Interface between Mind and Body](#)

[Manomaya Kāya and Out-of-Body Experience \(OBE\)](#)

[Cuti-Patisandhi – An Abhidhamma Description](#)

These posts complement some of the posts in the “[Udayavaya Ñāna](#)” section, which is important for the *Sotāpanna* stage of *Nibbāna*. All these are pieces of a complex puzzle, but they are all inter-consistent. So, don't worry if you do not understand it all; with time it will all make sense and will lead to unbreakable faith in Buddha Dhamma even through future lives. Faith comes via true understanding.

13.6.1 Gandhabba (Manomaya Kāya) – Introduction

Revised April 22, 2016; revised February 16, 2021

***Gandhabba* Is the Essential “Seed” for the Physical Human Body**

1. A human-being is born at the *cuti-paṭisandhi* moment first with just the “mental body.” That is the *manomaya kāya* or a *gandhabba*. Once that *gandhabba* “descends” to a womb, the physical body starts growing.

- In most realms, beings are born fully formed (*opapātika* births). But in the human and animal realms, first, the blueprint of that life-form arises at the *cuti-paṭisandhi* moment.
- Once born a *gandhabba*, It can make many new physical bodies in a given *bhava*. For example, a “human *bhava*” may last many hundreds of years. But a human body lives only about 80 years. Therefore a “human *gandhabba*” can make many “human bodies” during existence as a human; see, “[Bhava and Jāti – States of Existence and Births Therein](#).”
- This is why there are resemblances of both mental and physical characteristics between the two lives in rebirth stories.

An Example

2. Let us take the example of a being born many times as a cow making a transition to a human *bhava* at the end of the “cow *bhava*” (an infrequent event).

- The transition from a cow to a human occurs in the last *citta vīthi* of the “cow life”. See, “[Cuti-Patisandhi – An Abhidhamma Description](#).” At the end of that *citta vīthi*, a human *gandhabba* comes out of the cow's dead body. That *gandhabba* has a subtle body that cannot be seen, but it is a “blueprint” of the human body. But the “gross physical features” will be partially determined by the parents of the new life.
- This *gandhabba* now awaits a suitable womb to be available. Of course, the *gandhabba* cannot decide on a womb. Instead, when a right womb becomes available (i.e., matching the “*gati*” of the *gandhabba*), it will be pulled into the womb by the kammic energy.

- When a sperm fertilizes an egg in a womb, a single cell called zygote results. But there is no life there until the *gandhabba* enters the womb and is incorporated with that zygote. Now the zygote becomes an embryo, then a fetus, and once out of the womb grows to a full-size human according to that blueprint in the *gandhabba*.
- More details can be found at, see, “[Buddhist Explanations of Conception, Abortion, and Contraception.](#)”

3. At the cow-human transition in the last *citta vīthi* of the cow life, some significant changes occur in that lifestream. The concept of a lifestream, which is really a very basic introduction, is discussed in “[What Reincarnates? -Concept of a Lifestream.](#)”

- Of course, the most significant change is that now the lifeform has a mind that is at the human level, not at the animal level; the baseline “consciousness level” has shifted. This is expressed in several ways in the *manomaya kāya* of the *gandhabba*.
- At the *cuti-paṭisandhi* transition, the *kammic* energy creates three very fine *rūpa* called *vatthu dasaka*, *kāya dasaka*, and *bhava dasaka*. **We will discuss these in detail later, but they basically correspond, respectively, to the mind-door (or the mind), the blueprint for the human body, and dominant features including male or female character** (it is not just the sex type, since *rūpi Brahmā* also have *bhava dasaka*, but are gender-neutral).
- As the physical body grows, first inside the womb and then outside the womb, the subtle body of the *manomaya kāya* expands with it when the physical body grows from the single cell. Thus overlapping the physical body that we see, there is a subtle body (*manomaya kāya*) of the *gandhabba*. *Gandhabba* means the same as the *manomaya kāya*.
- Therefore, the *gandhabba* is really like a “driver” driving or navigating the physical body; see, “[Ghost in the Machine – Synonym for the Manomaya Kāya?](#).”

How Does the *Gandhabba* See and Hear Outside the Physical Body?

4. The subtle body of the *gandhabba* or the *manomaya kāya* has all key “sensing units” of *hadaya vatthu* (mind-door) surrounded by the five *pasāda rūpa* (*cakkhu*, *sota*, *jivhā*, *gandha*, and *kāya*.) A *gandhabba* is in the form of a very subtle matter at the *suddhaṭṭhaka* level. It is an invisible “energy body.” A physical body would be inert without a *gandhabba* inside.

- **The *gandhabba*, when outside the physical body, can experience the world without eyes, ears, etc.** See #6 of, “[Out-of-Body Experience \(OBE\) and Manomaya Kāya.](#)”
- The *gandhabba* sometimes comes out of the physical body in traumatic situations like during heart operations. Then it can see doctors operating on its own physical body! Such “out-of-body experiences” (OBE) have been reported; see, “[Manomaya Kāya and Out-of-Body Experience \(OBE\).](#)”
- The main thing to remember is that *hadaya vatthu* is the mind-door. It is surrounded by the five *pasāda rūpa* (*cakkhu*, *sota*, *jivhā*, *gandha*, and *kāya*.) The *pasāda rūpa* correspond to the five physical senses of the eye and ear, tongue, nose, and touch.

Gandhabba Inside the Physical Body

5. The physical body is really a “shell” controlled by the mind (*hadaya vatthu*).

- When a *gandhabba* is inside a physical body, “seeing” and “hearing” happens with the help of the physical eye and the physical ear. It is like being inside a military tank. One needs to use the sensors mounted on the tank to see and hear what is going on outside.
- For details, see, “[Out-of-Body Experience \(OBE\) and Manomaya Kāya.](#)”

6. The world is experienced through the physical body, and this interaction is slow compared to the fast pace of the *citta*. The sensory data are collected by the five physical senses of eye, ear, nose, tongue, and

body. They are then transmitted to the brain via the central nervous system, which takes millisecond scale time.

- At the brain, data for a specific time interval (possibly around 10 milliseconds; see, “[Citta and Cetasika – How Viññāna \(Consciousness\) Arises](#)”) are processed and then converted to a format suitable for transmission to the five *pasāda rūpa* and the *hadaya vatthu*, via a fast “ray system” (called “*Kirana*” in Pāli or Sinhala).
- Individual “packets of information” from each of the five senses are then transmitted to the corresponding *pasāda rūpa* located on the *manomaya kāya*, which overlaps the physical body; information from the *mana indriya* are sent to the *hadaya vatthu*.

Detailed Explanation

7. For example, let us consider a “packet of data” sent from the physical eye to the brain. This information is processed by the brain, converted to a “ray system,” and is transmitted to the *cakkhu pasāda*. Now the *cakkhu pasāda* vibrates and hits the *hadaya vatthu* that is located close to it. (The five *pasāda rūpa* surrounds by the *hadaya vatthu*. That causes the *hadaya vatthu* to vibrate 17 times, much like a gong hit by an iron rod vibrating for a certain fixed number of times.

- The 17 vibrations of the *hadaya vatthu* correspond to the 17 *citta* in a *citta vīthi*. Such a *citta vīthi* is called a *pañcadvārāvajjana citta vīthi* because it is initiated by one of the five physical senses or *pañcadvara* (“*panca*” or five + “*dvara*” or “door”).
- Imagine a blade clamped at one edge and is hit by an object on the other edge; it vibrates for a certain FIXED number of times per second; that number is called the frequency of vibration and is fixed for a given material. And one can see the blade vibrating. Pretty much the same thing happens when the *hadaya vatthu* vibrates when hit by one of the *pasāda rūpa*, and this “vibration” is called a *hadaya rūpa*, which thus has a lifetime of 17 *citta* or thought moments. Therefore, the *hadaya rūpa* is not a physical *rūpa* but basically is a mode of vibration.
- The misconception that any *rūpa* has a lifetime of 17 thought moments arose because of not understanding that it is the *hadaya rūpa* with 17 thought moments.
- In other words, this information packet is received and processed by the *hadaya vatthu* within those 17 *cittā*. The information is fully received by the fourth *citta* (vibration,) and then the rest of the *citta* in that *citta vīthi* deal with this information. This “information processing” by the *hadaya vatthu* will not be completed until three more *citta vīthi* run by the *hadaya vatthu* itself. Such *citta vīthi* initiated by the mind itself is called a *manodvara citta vīthi*, where *manodvara* means the “mind-door”.
- Information packets from the *mana indriya* are sent directly to the *hadaya vatthu*.

8. Thus, we can see a **huge difference** in time between the physical body acquiring senses data (time of the order of 10 milliseconds) and the mind processing that information within a billionth of a second using one *pañcadvvara citta vīthi* and three *manodvara citta vīthi*.

- Even if the five senses keep sending data continuously, the mind is “just sitting there” most of the time. Let us examine this in a bit detail: Suppose the brain keeps sending data from the eye non-stop; since each “packet” takes, say 10 milliseconds, then in a second, there will be 100 “data packets” of vision coming in. If the brain is going at full speed, it can send at most 500 (=100×5) “data packets” from all 5 physical senses in a second. The mind will then be spending less than a millionth of a second in processing all that data since it takes less than a billionth of a second to process one “data packet” (from the previous bullet).
- During those gaps, the *hadaya vatthu* also interacts (both ways) with the *mana indriya*. **It also gives instructions to the *mana indriya* on how to control the physical body in response to the sensory inputs.**

- Thus most of the time, the mind is just sitting there, which is called the “*bhavaṅga*” state of mind. In this state, the mind is actually taking the object that came to the mind at the *paṭisandhi* (rebirth) moment in that last *citta vīthi* of the last life. *Bhavaṅga* (“*bhava*” + “*anga*” or associated) denotes that this state of the mind is characteristic of this new life, in the present case as a human. Just like the eye cannot see itself, **the mind cannot see this “*bhavaṅga*.”** It is the current state of mind itself.

The *Bhavaṅga*

9. In the example that we started with, the “cow mind” has now switched over to a “human mind.” It has the object taken at the *paṭisandhi* moment. But we do not become aware of what is in the *bhavaṅga*.

- You may remember that there are times when one just stares blankly “out into space,” and if someone asked, “what were you thinking about?” we would be hard-pressed to recall anything that we were thinking about. Here the mind was mostly in the *bhavaṅga* state; we are aware that we were alive but did not have “actual thoughts” going through the mind.
- In reality, even when we think we are fully engaged, the mind is mostly in the *bhavaṅga* state. As we discussed in a previous bullet, it takes very little time for the mind to process data. Even if all five physical senses keep sending data about the outside world non-stop, the mind takes less than a millionth of a second to process data coming in within a second!

The Mind Decides on Actions

10. However, the sixth sense or the mind (*hadaya vatthu*) itself is also initiating *citta vīthi* either to process information from the five physical senses or “think about those senses inputs.” **Furthermore, it also start *citta vīthi* to get the physical body to speak and do any work.** That information is relayed to the *mana indriya*, which works with the brain to carry out those instructions.

- For example, if the mind gets interested in a sound, it can direct the body to walk towards that sound source. To do this, it sends instructions to the *mana indriya* in the brain via the same “ray system” instantaneously. The *mana indriya* then decodes that information — and working with other parts of the brain — sends instructions to the muscles in the legs (via the nervous system) to move. Those bodily movements take time because the mechanical motions are comparatively slow.
- Speech is done in the same way. The mind sends the information to the brain, and the brain gets the vocal cords to move to produce the sounds. Here is a short video showing how the muscle movements give rise to sounds:

[WebLink: YOUTUBE: Inside the Voice](#)

Brain Is Just a Fancy Computer That Follows Instructions by the Mind

11. Thus, we can see that the brain is just a very fancy computer, carrying out the mind’s instructions.

- Now the questions arise, “Why is nature going through all this trouble to give us a physical body that is cumbersome and slow?”. The main answer is that this is to impart *kamma vipāka*.
- For example, a *deva* has a subtle body that is not subject to aches and diseases as for humans; that was acquired by a good *kamma vipāka*. On the other hand, there are some *petas* (hungry ghosts) who suffer from hunger. They have large bodies but tiny mouths.
- In the human realm, our individual bodies are “pre-designed” by *kamma vipāka* to impart varying degrees of suffering. That is why some people are relatively healthy, while others have health problems. There are, of course, ways to reduce or even get rid of such problems. One could make suitable conditions (eating well, exercise, etc.) for a healthy body.
- We do not realize the constant stresses that we are subjected to (both physical and mental) because we are used to them. By living a moral life, we can begin to experience the *nirāmisā sukha* achieved by

“liberating the mind from burdensome thoughts.” When one gets to *jhāna*, this is further enhanced, and at higher *jhāna*, one sees quite significant relief from “dissociating from the body.” Then one makes a big jump in attaining the *Sotāpanna* stage.

It is possible that I may not have clearly explained some concepts. If you send me a comment referring to the corresponding item number, I can clarify it. Also, when you read other posts in this section, things will become more apparent. This basic description is critical if one is really serious about learning *Abhidhamma*.

13.6.2 Hidden World of the Gandhabba: Netherworld (ParaLoka)

February 18, 2016; updated April 5, 2016; July 14, 2021

[Title changed (see the red highlights) from **Hidden World of the Gandhabba: Netherworld (Para Loka)** to **Hidden World of the Gandhabba: Netherworld (ParaLoka)**]

Gandhabba Is Human

1. I have discussed the fact that when a living being gets a “human *bhava*” it does not necessarily mean that it is born with a human body during all that time; see, “[Bhava and Jāti – States of Existence and Births Therein](#).”

- For example, when a human dies and still has *kammic* energy left for the human *bhava*, then it is very unlikely that it will be conceived as a human baby right away. At death, a “human *gandhabba*” with a fine body leaves the dead body and has to wait in that state until a suitable womb becomes available. There are a large (uncountable?) number of such human *gandhabbā* waiting for a suitable womb.
- This is one reason that a mother and father are so revered. No matter how bad they may be in some cases, just the fact that they made it possible for a *gandhabba* to have a human body, makes them invaluable.

Gandhabba Is a Human (or Animal) Without a Physical Body

2. Beings are born as humans because they crave the sensory pleasures associated with the human body. The most valued are the tastes and the bodily pleasures. A *gandhabba* has an “energy body” that we cannot see weighing much less than 0.01 g; see, “[Manomaya Kāya \(Gandhabba\) and the Physical Body](#).” A *gandhabba* born at the *cuti-paṭisandhi* moment is much smaller than an atom in modern science. Some could inhale aroma (*gandha*) and get a bit denser; thus the name “*gandhabba*” (“*gandha*” + “*abba*”).

- A *gandhabba* is unable to taste solid food or experience physical touch. But they can see and hear very well. Thus their life is miserable since they can see normal humans engaging in “pleasurable activities”. That is what they crave too, but they are unable to experience them.
- When a zygote is created in a womb as a result of intercourse (see, “[Buddhist Explanations of Conception, Abortion, and Contraception](#)”), there are a huge number of *gandhabbā* waiting to “get hold of that zygote”. But of course, they don’t have a choice; only the *gandhabba* matching the “*gati*” of the father — and especially the mother — is pulled into the womb.

3. Therefore, even though a human “*bhava*” may last thousands of years, the actual time that one is “born with a human body” (human *jāti*) could be a fraction of that time. This is another reason why a “human birth” is so precious that it should not be wasted.

- Among the 31 realms, it is only in the human and animal realms that physical bodies can manifest from time to time within a *bhava*. Within animal *bhava*, some animals are born via eggs, while others are “womb-born.” There are an uncountable number of “animal *gandhabbā*” waiting for a suitable womb at any given time.

Gandhabbas Live in Paraloka

4. Both the human and animal *gandhabbā* can be said to live in “*paraloka*” (“*paralowa*” in Sinhala); see “[Micchā Ditthi, Gandhabba, and Sotāpanna Stage](#).” It is a world that a normal human cannot see, even though they can see us. Of course there is no English word for it, but “netherworld” or “the hidden world” seems to convey the idea.

- *Paraloka* is not a distinct realm in the 31 realms. Just like human and animal realms co-exist, the *paraloka* co-exists with the human and animal realms, but we normally cannot see those beings in the *para loka* (unless one develops *abhiññā* powers). One can imagine there is another world with human and animal *gandhabbā*.

WebLink: Listen to Pronunciation “paralowa” or පරලොක is the Sinhala word, for the Pāli word “paraloka”

- Those with “human (or animal) *bhava*” spend their time either in “this world that we can see” or in the “*paraloka*” or the “hidden world” (netherworld).
- Many people are not even aware of the existence of “*para loka*,” because (like the concept of the *gandhabba*), it is not discussed in the *Visuddhimagga*. It is unfortunate that current *Theravāda* relies on *Visuddhimagga* (written by an *Anariya*) rather than the *Tipiṭaka*.

Tirokuṭṭa – “Able to Go Through Walls”

5. The “[Tirokutta Sutta \(kp 7\)](#)” in the *Khuddakapāṭha* describes a “*tirokuṭṭa*” who hangs around the home that he/she departed from. An English translation there: “[Outside the Walls](#).”

- The meaning of the word “*tirokuṭṭa*” becomes apparent in the “[Dutiyasamanabrāhmaṇa Sutta \(51.17\)](#).” The phrase, “*tirokuṭṭam tiropākāram tiropabbatam asajjamānā agamaṃsu, seyyathāpi ākāse*” appears in the beginning of that *sutta*. That means, “going unimpeded **through a wall, a rampart, or a mountain** as if through space.”
- Therefore, “*tirokuṭṭa*” is a being who can travel unimpeded through the walls. Those with *iddhi* (supernormal) powers can do that as detailed in the *Dutiyasamanabrāhmaṇa Sutta* (51.17.)
- However, the *Tirokuṭṭa Sutta* (kp 7) is specifically about persons who died and have come back to “hang around” their formal homes. These could be *gandhabbās* or *petās* (*pretās* in Sinhala.)
- However, *gandhabbās* are not *petās* (*pretās* in Sinhala). *Petās* (*pretās* in Sinhala) do not make “dense bodies” as human and animal *gandhabbas* do.

Petās (Pretās in Sinhala) Are Different from Gandhabbās

6. The idea behind giving a special offerings (“*dāna*”) to the *bhikkhus* after the death of a person is mainly for the benefit of the *gandhabbā* (and also *petās* (*pretās* in Sinhala)). This is a common practice in Buddhist countries. Normally it is done after seven days and after three months etc of death, and I will discuss the reasons for those specific dates in a future post.

- Not all beings can receive merits. Especially those in the *niraya* (hell) are unable to do so because they don’t have the right mindset to receive merits (absence of *samanantara paccayā*). See “[Anantara and Samanantara Paccayā](#).”
- Those who can benefit most are the *gandhabbas* and *petās* (*pretās* in Sinhala).
- Also, note that *gandhabba* are totally distinct from *petās* (*pretās* in Sinhala) or hell beings in the *niraya*. **Only *gandhabbas* live in “paraloka” waiting for suitable wombs.** *Petās* (*pretās* in Sinhala) and hell beings have instantaneous (*opapātika*) births, just like *devas* and *Brahmā*.

7. It has been described how the Buddha saw human beings wander from life-to-life when he first comprehended the *cutūpapāda ñāṇa* during the night of his Enlightenment; “*cutūpapāda*” comes from “*cuti*” for death and “*upapāda*” for birth.

- Thus *cutūpapāda ñāṇa* is the knowledge about the rebirth process. But this particular description was restricted to births and deaths associated with a single human *bhava*.
- *Cuti* is pronounced “chuthi”, and “*cutūpapāda ñāṇa*” is pronounced “chuthupapāda gnāna”.
- [WebLink: Listen to Pronunciation: “cuti and cutūpapāda ñāṇa”](#)

8. That description by the Buddha was not about the general wandering among the 31 realms, but is on how a being in a human *bhava* wanders from human birth to human birth with *gandhabba* states in between (i.e., going back and forth between “this world that we can see” and the “other world that we cannot see” or the *para loka*).

- The description is as follows: If one is situated in the upper level of a building at a four-way junction, he can see the street below. He can see many people wandering in the street (*gandhabbā* wandering around). Sometimes, one goes into a house and stays there for a long time. This is compared to a *gandhabba* entering a womb and making himself a physical body; that house is the analogy of a physical body.
- Then at the death of that physical body, the *gandhabba* comes out and starts wandering again (a person walking on the street); he may be wandering the streets for a long time before entering “another house”, i.e., to get a chance to go into a matching womb.
- Sometimes, he may enter a house and may come right out. This can be compared to an unsuccessful pregnancy. A *gandhabba* taking hold of a zygote, but for some reason cannot stay there and has to come out, mostly because it turns out to be a mismatch of “*gati*” of the potential mother.
- Thus it describes a human being going back and forth between “this world” and the “other world” or the “netherworld” (“*para loka*”). Once the *kammic* energy of the human *bhava* is exhausted, a new “*bhava*” is grasped.
- If the new *bhava* is not human or animal, then one would be born instantaneously in another realm (*brahma*, *deva*, *asura*, *peta* (*preta* in Sinhala), or *niraya*). There are no *gandhabbā* associated with those realms.
- Thus we can see that *bhava* and *jāti* mean the same in all the other realms. In those realms, *bhava* automatically leads to *jāti*. For example, one with *deva bhava* is always a *deva*.

Rebirths With Human Bodies

9. When one studies the accounts of people (of mostly children) describing their rebirth stories, there are always “gaps” between births; see, the references (books) cited in “[Evidence of Rebirth](#).” For example, see, “Children Who Remember Previous Lives: A Question of Reincarnation”, by Ian Stevenson (2000).

- During those “gaps” in between successive human births, they had been in the *gandhabba* state, i.e., they were in *para loka*.
- When one dies in an accident especially at a younger age, it is more likely that their *kammic* energy for the human *bhava* had not been exhausted. Thus they are more likely to be in the *gandhabba* state, waiting for a suitable womb.
- This is why in most rebirth stories the previous life tends to have been terminated by an unexpected incident (killed by someone, a natural disaster, etc).
- This “memory from the past life” fades away as children grow, and that is why it is mostly children who provide these accounts. As they grow old, these memories disappear gradually.

10. A *gandhabba* changes with time (just like everything else). In fact, it is even possible that if a *gandhabba* properly receives merits from a giving (*dāna*) mentioned in #5 above, he/she can gain a *deva* or *Brahma bhava* and be born instantly in such a realm.

- On the other hand, another human *gandhabba*, who had been engaged in behavior appropriate for an animal (say, a dog) in the previous human life, could cultivate those “dog *saṅkhāra*” as a *gandhabba* and slowly transform into a “dog *gandhabba*” while in *paraloka*.
- When we think about these possibilities we realize how complex life is, and why we need to be mindful of the consequences of our actions. Not only that, we need to avoid doing things mechanically and understand the reasons behind even meritorious actions like alms-giving (*dāna*). I have seen many alms givings that are conducted in a “party-like” atmosphere. One needs to do it with the proper mindset with the *gandhabba(s)* in mind.

Other Related Issues

11. Another interesting bit of deduction is how the concept of a soul or “*āthma*” came to be established by the ancient Hindu *yogis*. Even to attain higher *anāriya jhānā* (above the fourth *jhāna*) that enables one to acquire the ability to see previous lives, one has to have that “*gati*” of cultivating *jhānā* through recent human lives. Therefore, such a *yogi* with powerful *abhiññā* powers can be expected to have had many recent human lives.

- Thus it is possible that such *yogis* would have been born human hundreds of times (with *gandhabba* states in between). When they looked at their previous lives, they could see that every time they died a *gandhabba* came out, and sooner or later took hold of another human body. Thus it is this *gandhabba* that they thought was the indestructible “*āthma*” or “soul”. They could look back hundreds of lives and always see that they were born as human again and again.
- Thus, in the Hindu scripture *Bhagavad Gita*, getting hold of a new body is compared to discarding an old suit and wearing a new suit. As far as those *yogis* could see, it was the same *gandhabba* that came back in a different physical appearance! Thus for them it appeared that there was an unchanging entity coming back in a different form; this is why it is called “reincarnation”.

12. Our world is much more complex than we can ever imagine. The Buddha said that only a Buddha can truly comprehend the complexity of this world: There are four “unthinkable” or “*acinteyya*” subjects for us; see, “[WebLink: suttacentral: Acinteyya Sutta \(AN 4.77\)](#)”. English translation there: “[WebLink: suttacentral: Unconjecturable \(AN 4.77 by Ven. Thanissaro\)](#)”.

- Even though we do not need to comprehend everything (and we cannot), it is beneficial to learn these concepts at least to some extent.
- If one can comprehend *anicca*, these in-depth analyses are not needed. But especially these days, humans do not have the ability to grasp *anicca* right away. So, learning Dhamma and appreciating the unmatched knowledge of the Buddha gives one the confidence to persevere in one’s efforts.

13.6.3 Ghost in the Machine – Synonym for the Manomaya Kāya?

Revised July 14, 2019

1. The “mind-body problem” has been a central problem of philosophy since Descartes formulated it over 350 years ago. René Descartes proposed that while the physical body is subjected to the physical laws, there is a soul associated with a human body which is normally called the “mind” and it is non-material; for him, having a mind amounted to having an immaterial soul, outside the physical space, whose essence consisted in thinking. This is the so-called “Cartesian dualism”.

- Here mind and body are on equal footing, each in its own domain.

2. Philosophers no longer take this “dualism” view seriously. Instead current philosophers have adopted a “material monism” that claim that our world is fundamentally material; this is materialism or physicalism. The only question they are debating on is how the “mental” arises from “material”, i.e., how thoughts arise in a material brain.

- We must note that the Buddha's worldview is totally different from both the above. It is “**mental monism**”, i.e., that our world is fundamentally mental. This is why he said his Dhamma is “*pubbe ananussetu dhammesu*” or a Dhamma (or a theory on nature) that was not known to the world.
- This world view of the Buddha has been hidden for many centuries.
- This is of course a paradigm shift and a shocking one too at the first glance. But I hope to convince you with evidence gathered from various fields of study and illustrate the consistency across diverse disciplines.
- It must be mentioned that this monism is not the “mental monism” (or “idealism”) that a few philosophers have proposed. They say that material things are mere imagination. **On the contrary, the physical world is very real, it is just that it cannot provide any lasting happiness because of its transient nature.**

3. In 1949 Gilbert Ryle introduced the phrase “ghost in the machine” to ridicule the concept of Cartesian dualism in his book, “The Concept of Mind”. It is said that with that book, he put the final nail in the coffin of Cartesian dualism. Of course, the “ghost” is the soul or the mind and the machine is the body, in “ghost in the machine”.

- In Buddha Dhamma, it is not called a “ghost” but a “*gandhabba*”; see, “[Mental Body – Gandhabba](#).”
- And unlike in Decartes’ ghost, *gandhabba* has a trace of matter. Furthermore, even the basic building block of a physical body (cell) has origins in the mind. Therefore, mind and matter are inter-related and inter-dependent; see, “[Origin of Life – There is No Traceable Origin](#).”

4. I think the ghost in machine analog is actually a good one to describe a human or an animal. The body actually plays a secondary role, and the mind is the controlling entity. **But the “ghost” or the *manomaya kāya* is NOT all mental**; it has a fine form of matter even though it would not be detectable by current scientific instruments.

I must emphasize that this concept is NOT a version of dualism. Mind and body are interdependent: “*viññāṇa paccayā nāmarūpa*” and “*nāmarūpa paccayā viññāṇa*”; a *manomaya kāya* has both *nāmarūpa* and mind.

- This *manomaya kāya* is made by the last *citta vīthi* of the previous existence (*bhava*), which is called *cuti* (pronounced “chuthi”) *citta*; see, “[What is a Thought?](#)” in the *Abhidhamma* section. **Thus this fine material form was PRODUCED by the mind.** This is why it is said, “*mano pubbangamā dhammā.....*”, i.e., “the mind precedes EVERYTHING...”.
- You probably have seen pictures of a “misty ghostly figure” rising out of a physical body in literature on “astral projection” or “out-of-body experience”. That is a good visual, but of course only people with *abhiññā* powers can see them.
- Many people have, though, experienced this out-of-body experience usually under stressful conditions. Most common is the case when a patient undergoes an operation and is unconscious, but recalls later how he/she was able to see the operation from above. This seems to happen more often to women than to men; see, “[Manomaya Kāya and Out-of-Body Experience \(OBE\)](#).”

5. When one has cultivated *abhiññā* powers, one can bring out the *gandhabba* or the *manomaya kāya* out of the physical body. Then the body is lifeless, until the *gandhabba* comes back into the body. The “ghost” or the *manomaya kāya* can now see and hear without the aid of a physical ear or eye. Thus it can “focus” on events happening far away, and can see and hear what is going on at that place.

- All this may sound very esoteric but there is a lot out there that is not “captured” by our five physical senses; see, “The 4 percent Universe : Dark Matter, Dark Energy, and the Race to Discover the Rest of Reality” by Richard Panek (2011).
- Our eyes can see only an infinitesimally small part of the electromagnetic spectrum from 390 nm – 700 nm. The human audible range is commonly given as 20 to 20,000 [Hz](#), though there is considerable variation between individuals. Modern scientific instruments can expand these, for example, to see in the infrared frequencies with infrared cameras, etc.
- The “ghost” does not need light to see, or a sound wave to travel in air to hear.

6. The *manomaya kāya* has all six senses in the sense that all five *pasāda rūpa* corresponding to the five physical senses and also the *hadaya vatthu* that is the “seat of consciousness”. **The *hadaya vatthu*, where *citta* (thoughts) are originated, lines up with the physical heart, not the brain. Thus we can say that mind is located close to the heart, and is not in the brain; brain is like a computer that helps run the physical body; see, “[Neuroscience Says there is no Free Will – That is a Misinterpretation!](#).”**

- The five *pasāda rūpa* in the *manomaya kāya* are also located close to the *hadaya vatthu*. Signals between the five physical sense faculties (eye, ear, etc) — called five *indriya* — and the five *pasāda rūpa*, and also between the (frontal cortex of the) brain and the *hadaya vatthu*, occur via a “ray system”, probably electromagnetic, and are thus very fast.
- However, the “eye” is not just the “eye ball” but includes associated processing units in the brain, which is the visual cortex. It is the visual cortex that sends the signal to the “*cakkhu pasāda*” located close to the *hadaya vatthu*. When the *cakkhu pasāda* receives a signal from the visual cortex (“eye *indriya*”), it hits the *hadaya vatthu* which in turn vibrates 17 times corresponding to a “*citta vīthi*.”
- The same process occurs for the other four physical senses. The “motor cortex” sends/receives signals from all body parts using the central nervous system, and sends “ray signals” to the “*kāya pasāda*.” I will discuss this in detail later.
- The five *pasāda rūpa* are located around the *hadaya vatthu* much like the five small balls (clappers) are situated around the “main clapper” in temple bells in Sri Lanka (I am not sure whether this true in other countries). Such a bell symbolizes the five *pasāda rūpa* around the *hadaya vatthu*.
- When the “ghost” is inside the physical body, it cannot see or hear without the aid of the physical senses of eyes and ears. Similarly, the mind cannot “think” without the aid of the brain.
- This is why the efficiency of all six senses degrade with time: Because the physical body degrades. As we get old, all six physical sense faculties of eyes, ears, nose, tongue, body (outer skin), and the brain degrade, and lose their effectiveness.

7. Thus in the visualization as a “ghost,” the *manomaya kāya* has all six senses. But it cannot use the *kāya pasāda* outside the physical body since not enough “matter” is in the *gandhabba* to “feel” the touching sensation. Similarly, the *manomaya kāya* (“ghost”) cannot taste or smell when it is outside the physical body.

- Thus the *gandhabba* can only see and hear when outside the physical body. And it can do those without any limitations imposed by physical eye or physical ear, i.e. it can see and hear things far away.

8. When a human dies, if there is still *kammic* energy left for the “human *bhava*”, i.e., the potential to be born as a human, then there is no *paṭisandhi citta* at death. A *paṭisandhi* (“patī” + “sandhi” = bind to a new life) happens when a transition to a “new *bhava*”, for example to a “*deva bhava*” or an “animal *bhava*”, happens. If the “*bhava*” remains the same and the next birth is also human, the *manomaya kāya* (“ghost” in this new terminology) or the *gandhabba* just comes out and waits until a suitable womb becomes available. The old physical body is now lifeless and just decays.

9. If the *kammic* energy for the “human *bhava*” is exhausted at death, then in the last *citta vīthi* the transition to a new “*bhava*” takes place. Then a new *manomaya kāya* for the new existence (*bhava*) is

formed within that final *citta vīthi*, and at the end of that *citta vīthi*, the new *manomaya kāya* corresponding to the new life comes out of the dead body. If it is *deva*, then a new *deva* is instantly born in the *deva loka*. If it is an animal, say a dog, then a *manomaya kāya* (or *gandhabba*) that resembles the form of a dog comes out of the dead body and will wait until a suitable “dog womb” becomes available.

- As mentioned in other posts, births in 29 realms happen instantaneously, i.e., a fully formed figure is born at the very instant of death in the previous life. An intermediate “*gandhabba* state” with a *manomaya kāya* (a “ghost” in the current analogy) that needs to wait for a suitable womb is involved only for birth in human and animal realms.

10. There is another interesting facet: The *kammic* energy automatically prepares the “blueprint of the body” to deliver the *kamma vipāka* (consequences of previous actions). Thus the physical body has “built-in” defects and flaws that may become evident at birth or at different stages of life: for example a cancer may develop at latter stages of life. This is the reason why some people are born handicapped; some have healthy bodies, beautiful bodies, ugly bodies, and a healthy person may die suddenly too; the varieties are endless.

- Furthermore, the nervous system is also setup to induce various effects as *kamma vipāka*. The incessant “urge to do something” works at different levels for different people. This actually reveals a deeper meaning of the First Noble Truth of Suffering; if you are ready for a deeper analysis, see, “[Anicca – The Incessant Distress \(“Pīḷana”\)](#)”.

11. Therefore, the concept of a “ghost in the machine” may be useful to describe the *gandhabba* state or the separation of the *manomaya kāya* from the physical body in the cases of out-of-body experience (OBE), or with *abhiññā* powers. However, it must be kept in mind that in this case, the “ghost” does not depict an unchanging soul and also it is not totally “mental”; it has very fine material (*rūpa*) associated with it, that is invisible to the naked eye, but is visible to someone with *abhiññā* powers.

- Contrary to the idea of a soul, the *manomaya kāya* will keep changing even during an given existence and will make a huge transition at a new existence, for example when an animal is reborn a human or vice versa.

12. The main usefulness of this “ghost in the machine” concept is to accurately describe the physical body for what it really is: a temporary “residence” for the *gandhabba*. The “residence” decays with time and finally dies and then the *gandhabba* needs to find a new “residence”. The *gandhabba* derives its uniqueness or the “personality” via *sansāric* habits (*gati* and *āsavas*), and the *gandhabba* has the power to change those habits; see, “[Habits, Goals, and Character \(Gati\)](#).”

- Further information can be found on several posts on the *manomaya kāya* and *gati* (or *gathi*). You can do a keyword search using the “Search” button on the top right.

13. Here is a recent article by the philosopher Colin McGinn on the current theories on the “mind body problem” (click to open the pdf):

[WebLink: PDF file: All machine and no ghost - McGinn-2012](#)

- Also see, Thomas Nagel’s book: “Mind & Cosmos: Why the Materialist Neo-Darwinian Conception of Nature is Almost Certainly False” (2012).
- Obviously, both of them have had no exposure to Buddha Dhamma. But I am very much impressed that they have come to the conclusion that mind MUST play a central role.

14. A *gandhabba* with a fine body cannot “seen” with our eyes, because they are “more energy than matter”. It is possible that the entities detected by “ghost detectors” are such *gandhabbas*.

- There are “ghost detector” apps made by many software companies that can detect “ghosts”; if you Google, “ghost detector” you can explore more on that. Even though right now this is done mostly for fun, it will be shown to be correct concept in the future. These detectors detect “packets of energy” that we cannot see with our eyes.

- Whether these ghost detectors actually can detect *gandhabbas* or not I am not sure. But the concept matches what is described in the *Tipiṭaka*.

July 14, 2019: I recently started a new subsection, “[Origin of Life](#)” to point out that not only the mental body (*gandhabba*), but also the physical body (which is a vast collection of cells), have their origins in the mind.

13.6.4 Manomaya Kāya (Gandhabba) and the Physical Body

Revised April 20, 2016; July 31, 2017; September 6, 2019; March 14, 2021; July 16, 2022; October 31, 2022 (#15)

Introduction

1. *Manomaya kāya* means a “mental body.” We should not perceive the “mental body” in the same way as our physical body. The mental body is mostly energy than matter. It is called a “body” more in the sense of a “collection,” as in a “body of water” or a “body of evidence.”

- The Pāli term for a physical body is *āhāraja kāya* or *karaja kāya*.
- The mental body or “*manomaya kāya*” is also called *gandhabba kāya* or simply *gandhabba*. The *manomaya kāya* is made of three parts called *utuja*, *kammaja*, *cittaja*.

2. Therefore, we have four types of bodies (*kāya*): *āhāraja*, *utuja*, *kammaja*, and *cittaja*. The *āhāraja kāya* is the physical body. The other three are parts of our “mental body,” the *gandhabba*.

- It is easy to visualize a “**person**” consisting of two overlapping bodies: the **physical body** that we see and the **gandhabba** with an “energy body” (it is not a body in the sense we are used to but more like a “misty ghost”). **The fine body of the *gandhabba* “overlaps” the physical body (solid or coarse versus that fine *gandhabba* body.)**
- The *gandhabba* makes the physical body “alive.” Without it, the physical body is like a piece of wood and is inert. If you touch a dead body, you will feel the difference compared to touching a live person.
- A dead body is comparable to a metal wire without a current flowing through it. When a current flows through the wire, it becomes “energized.”
- In the *Tirokudda Sutta* in the *Khuddaka Nikāya*, *gandhabba* is called a “*tirokudda*.”

3. The physical body (*karaja kāya*) that we see is built from the food we eat (*āhāraja kāya*). Starting with a single cell (zygote) in the womb, it grows by taking food from the mother.

- The *gandhabba* consists of the other three *kāya*: *kammaja*, *cittaja*, *utuja*.
- Under stressful conditions (or with *abhiññā* powers), the misty *gandhabba* can come out of the physical body, and the physical body is no longer under the control of the *gandhabba*. But it is not dead because the *jīvitindriya* that maintains life is still there.
- Only at death do both the *gandhabba* and the *jīvitindriya* leave, and the body becomes inert like a log.

Kammaja Kāya is Primary

4. Let us follow the time sequence of how a *gandhabba* evolves to acquire a physical body (in human and animal realms only.) That happens via several steps per *Tipiṭaka*: “*jāti sañjāti okkanti abhinibbatti khandhānaṃ pātubhāvo āyatanānaṃ paṭilābho*.” See, “[WebLink: suttacentral: Vibhaṅga Sutta \(SN 12.2\)](#).”

The basis of all the other three *kāya* is the *kammaja kāya*; it arises from the *kamma* seed responsible for that particular *bhava* or existence at the *cuti-paṭisandhi* moment.

- A *kammaja kāya* has three components called “*dasaka*” or “ten units.” Those ten units are eight *suddhatthaka* and modes of rotation and spin. The three components are *vatthu dasaka* (*hadaya vatthu* or the seat of mind), *kāya dasaka* (blueprint of the final human body), and *bhava dasaka*. The latter is loosely translated as man/woman nature, but it encompasses many other features related to one's *gati* or *bhava*).
- More details at “[The Origin of Matter – Suddhatthaka](#)” and “[Gandhabba – Only in Human and Animal Realms](#).”
- The formation of the *kammaja kāya* is called the “*jāti*” moment of birth.

5. Immediately following its birth, *kammaja kāya* gives rise to a thought stream (*cittaja kāya*).

- Both *kammaja* and *cittaja kāya* start producing fine *rūpa* and immediately give rise to a very light physical form called the *utuja kāya*. At this stage, *cakkhu*, *sota*, *ghāṇa*, and *jivhā dasaka* are also present. That is called the “*sanjāti*” moment of birth.
- This subtle body with three *kāya* (*kammaja*, *cittaja*, *utuja*) is a *gandhabba*. Since all three types of *kāya* have their origin in mind, the *gandhabba* is a “mind-made body” or a *manomaya kāya*. But soon, it will acquire a faint physical body by inhaling aroma (*gandha* + *abba*), thus the name *gandhabba*. Therefore a *gandhabba* would have all four “bodies” (*kammaja*, *cittaja*, *utuja*, *karaja*).
- The five sets of *dasaka* (*kāya*, *cakkhu*, *sota*, *ghāṇa*, and *jivhā*) arrange around the *hadaya vatthu* (*vatthu dasaka*) in the subtle or “misty” body of the *gandhabba*. This *gandhabba* may exist in that state for a long time, waiting for a suitable womb.
- That *manomaya kāya* or the *gandhabba* will now have to wait for a suitable womb to enter. That could take months or years.

Gandhabba Descending to a Womb

6. When a suitable womb becomes available, this fine *gandhabba* enters the uterus. At that time, it collapses to a size smaller than a single cell and merges with the single cell (zygote) formed by the union of mother and father. This moment of entering a womb is called the “*okkanti* moment” of birth.

- The physical body (*karaja kāya*) results from that single cell (zygote). It grows first by extracting food from the mother's womb and then consuming regular food once born as a baby.
- The physical body grows according to the “blueprint” in the subtle body of the *gandhabba*. The subtle body of the *gandhabba* expands with it so that it overlaps the physical body. For example, there is a nervous system in the *gandhabba* that overlays the physical nervous system.
- The initial growth stage of the fetus inside the womb is the “*abhinibbatti* stage” of birth.

7. Then, the fetus inside the womb starts developing and forms the physical senses and the brain over many weeks. The eyes, ears, nose, tongue, and nervous system grow during this time. Furthermore, the brain develops too. It will have processing units to analyze signals from those five physical senses.

- In Buddha Dhamma, the *cakkhu indriya* is NOT just eyes but also includes the brain's associated processing centers. Similarly, for the other four *indriya*: *sota*, *ghāṇa*, *jivhā*, and *kāya*.
- Signals generated in these five *indriya* get to the five *pasāda rūpa* located around the *hadaya vatthu* (seat of the mind) as described in “[Gandhabba \(Manomaya Kāya\)- Introduction](#).”
- The “*khandhānan pātīlābho*” stage of birth is complete with the formation of all six sense faculties.
- When that baby is born (i.e., comes out of the womb), that physical body can use all six *āyatana* (eyes, ears, nose, tongue, body, and mind) to fully interact with the external world. The final stage of the birth process is “*āyatanan pātīlābho*.”
- A better description of *āyatana* at “[Contact Between Āyatana Leads to Vipāka Viññāna](#).”

8. Ven. Sariputta discussed that sequence of events when he analyzed the *Dhammacakka Pavattana Sutta* in detail to the bhikkhus in the [WebLink: *suttacentral: Sacca Vibhanga Sutta \(Majjhima Nikaya 141\)*](#): “*Katamā cāvuso, jāti? Yā tesam tesam sattānam tamhi tamhi sattanikāye jāti sañjāti okkanti abhinibbatti khandhānam pātubhāvo āyatanānam paṭilābho, ayam vuccatāvuso: ‘jāti.’*”

- Those who do not believe in the *gandhabba* state (i.e., a *gandhabba*) need to contemplate that point. The *gandhabba* state is there only in human and animal realms.
- At death, if that human *bhava* has more *kammic* energy left, the *gandhabba* comes out of the dead physical body and waits for a new womb.
- If *kammic* energy for the human *bhava* is exhausted, then a *cuti-patisandhi* transition occurs, and the above discussed time sequence is repeated. A brand new *gandhabba* in a new *bhava* emerges from the dead body. For a technical analysis of this process, see, “[Cuti-Patisandhi – An Abhidhamma Description](#).”

The *Manomaya Kāya*

9. We can get an idea of the fineness of the *manomaya kāya* from the following comparison. The average human weighs about 70 kg (70,000g) and has a body volume of about 70 L; the Density of a typical fog (that we can barely see) is approximately 0.1 g per cubic meter. Thus the weight “of the fog of volume equivalent of a human body” is about 0.01g.

- Thus a “human body made of fog” weighs only a tiny fraction of the average human weight.
- For another comparison, the weight of a mustard seed is about 0.002g.
- A *gandhabba* would have a “misty body” like a human figure made of fog, but will be MUCH SMALLER weight; it is immeasurably small. Sexual intercourse between a man and woman creates a zygote (a human cell) in the womb. Then a *gandhabba* descends to the uterus and takes hold of the zygote; see, “[Buddhist Explanations of Conception, Abortion, and Contraception](#).”
- My late Noble teacher, Waharaka Thero, has seen how a *gandhabba* enters a womb. When getting closer to the mother, *gandhabba* rotates rapidly and loses all its body other than the *hadaya vatthu*, *jīvitindriya*, and *bhava dasaka*. So it becomes much smaller than an atom in modern science (at the *suddhaṭṭhaka* level). That tiny body (which would not be seen even by the most powerful microscope) is pulled into the womb through the mother’s body and gets attached to the zygote in the womb. I heard him describe this in a *desana*.
- So, a human body starts with two cells from the mother and father (which make the zygote) and an even smaller *gandhabba*. Thus virtually all the weight of a human comes from nutrients. First from the mother’s body, and once comes out of the womb by eating food.

10. We can easily see the role of the *manomaya kāya* with the actions by its three components:

- *Kammaja kāya* is the most important. It is the blueprint for that existence (*bhava*). It has the blueprint of the physical body too.
- *Cittaja kāya* is what we EXPERIENCE moment-to-moment. We see, hear, smell, taste, touch, and think about concepts with thoughts: *cakkhu*, *sota*, *gandha*, *rasa*, *phoṭṭhabba*, and *mano viññāṇa*.
- Those thoughts NORMALLY depend on our habits (*gati*), *āsava* (cravings), and *kamma vipāka*, all in the *kammaja kāya*; see, “[What is Mind? How Do We Experience the Outside World?](#).”
- If thoughts arise ONLY DUE TO our past *kamma* and the habits and cravings acquired through them, then *kamma* would be deterministic. And we will be like robots (which is the case for many beings, like animals). **LUCKILY, we can THINK on our own (unlike animals) and change our destinies.**

11. [That last sentence summarizes the message of the Buddha](#). Please do not lose this opportunity to get out of this *samsāric* suffering when we have this precious human life, which will last only about 100 years.

- Even if we are reborn humans, what guarantees will we have to listen or read about Buddha Dhamma?

12. If anything is “transferred” from one existence (*bhava*) to another, those would be the “*gati*” and “*āsavā*” of that lifestream. But they also keep evolving. If we do not act mindfully, we let our minds “go with the flow.” Then our actions will be determined by our *samsāric* habits. That would only further strengthen such habits. That is why it is essential to identify bad habits, eliminate them, and cultivate good ones.

- That is the process of mind purification called [Bhāvanā \(Meditation\)](#) detailed in *Satipaṭṭhāna* (see “[Mahā Satipaṭṭhāna Sutta](#)”), *Ānāpāna sati* (“[6. Ānāpānasati Bhāvanā \(Introduction\)](#)”). I have also written about the *Sabbāsava sutta*: “[Habits and Goals](#),” and a bit more in-depth analysis in “Key Points in the *Sabbāsava Sutta*” at the end of the post, “[The Sotāpanna Stage](#).”
- Also, see the post, “[The Importance of Purifying the Mind](#).”

Living Beings in Other Realms Have Different “Bodies” and Different *Manomaya Kāya*

13. The above description is valid for humans and animals. In *Brahma* realms, there are only *manomaya kāya* and no physical body. There are physical bodies in the deva realms, but those are much less dense than human bodies.

- In other realms, different mechanisms (mainly *opapātika* births) operate; see, “[Gandhabba – Only in Human and Animal Realms](#).”

14. In the post, “[What Reincarnates? – Concept of a Lifestream](#),” we mainly talked about the *cittaja kāya*, the stream of thoughts, and the physical body. We saw that, If an animal dies and is reborn a human:

- The physical body in the animal realm is very different from that in the human realm.
- The *cittaja kāya*, or the stream of thoughts associated with animal existence (*bhava*), is also very different from the *cittaja kāya* of human existence (*bhava*). That is what is meant by “*bhava paccayā jātī*” in the *Paṭicca Samuppāda*: the birth is according to the *bhava* that latched on at the moment of death, i.e., “*upādāna paccayā bhavo*”; see, “[Akusala-Mūla Paṭicca Samuppāda](#).”

15. Thus, it is clear that both the physical body and *manomaya kāya* make “quantum jumps” (large instantaneous change) when switching from one existence (say an animal) to another (say a human).

- The *kammaja kāya* has all the *kammic* potentialities (*kamma* seeds) acquired up to any given time; see “[Saṅkhāra, Kamma, Kamma Bīja, Kamma Vipaka](#),” and “[Samsāric Habits, Character \(Gait\), and Cravings \(Āsavas\)](#).” But one of those seeds (which embeds matching *gati*) becomes operative for the “new *bhava*” and becomes the “*bhavaṅga*” for that life. The remaining *kamma* seeds will retain their *gati*; each *kamma* seed embeds the *gati* at the moment of its creation. One of those will rise to the next *bhava* or existence; that would be the one best matching the mindset at that *paṭisandhi* moment. Thus, different “*gati*” are in different *kamma* seeds. That is why an *Arahant*’s mind would not grasp any *kamma* seed with any *gati*.
- That is why “no-self” was not approved or rejected by the Buddha: the new life is not the same as the old life. But it is not entirely different either because those *gati* and *āsavā* propagate (but they all keep changing too). And similarly, the Buddha neither approved nor rejected the idea of a “self.”
- A living being is a “life-stream” that changes moment-to-moment based on cause and effect: *Paṭicca Samuppāda*. Even though there is no “unchanging entity” such as a “soul,” the life-stream has its characteristics (*gati* and *āsavā*), which also keep evolving.

More on the *Manomaya kāya* at: “[Manomaya Kāya and Out-of-Body Experience \(OBE\)](#).”

Next, “[Ghost in the Machine – Synonym for the Manomaya Kāya?](#)”,

13.6.5 Out-of-Body Experience (OBE) and Manomaya Kāya

Re-written October 24, 2019; revised January 30, 2020; February 16, 2021 (#6 added); July 16, 2022

Two Types of Bodies – Physical Body and *Manomaya Kāya*

1. We humans have two “bodies.” *Manomaya kāya* is the “mental body” (with a trace of matter) born at the beginning of human existence or human *bhava*. That *manomaya kāya* is pulled into a womb when a “matching womb” becomes available, which is the start of a “physical body.” Within a human *bhava*, there can be many “human births (*jāti*)” with different “physical bodies.” See, “[Bhava and Jāti – States of Existence and Births Therein](#).”

- More details on the two types of “bodies” at “[Manomaya Kāya \(gandhabba\) and the Physical Body](#).”

2. One could visualize the *manomaya kāya* or the “mental body” as an “energy field” (it has some fine *rūpa*, too) overlapping the solid physical body. All vital functions happen in the mental body. Thoughts generate in the seat of the mind (*hadaya vatthu*). There are five *pasāda rūpa* (*cakkhu*, *sota*, *ghāna*, *jivhā*, *kāya*) around the *hadaya vatthu* responsible for detecting sights, sounds, smell, taste, and touch.

- That *manomaya kāya* can leave the solid physical body under some conditions. Those who have cultivated supernormal powers (*iddhi*) can willfully come out of the physical body. During heart operations, *manomaya kāya* of some patients come out, as discussed below. In both cases, *manomaya kāya* can see and hear without the aid of physical eyes and ears.
- That is hard to visualize for us. But as you read more posts on the *manomaya kāya*, you will see that it makes perfect sense.
- We experience the world with the “mental body” or the *monomaya kāya* (also called a *gandhabba*.) This is explained in, “[Ghost 1990 Movie – Good Depiction of Gandhabba Concept](#).”

When Inside the Physical Body *Manomaya Kāya* Depends on the Physical Body

3. When the *manomaya kāya* is attached to the physical body, the *hadaya vatthu* needs the physical body’s help to see, hear, smell, taste, feel the touch, and recall memories. One can think of the *manomaya kāya* as being “trapped inside” the physical body. Physical eyes need to capture images of external objects; ears need to capture sounds; the nose helps smell; the tongue helps taste, and the body’s nervous system feels the touch.

- The brain analyzes all those “signals” and transmits them to the five *pasāda rūpa* located in the *manomaya kāya* around the *hadaya vatthu*.
- The brain is part of the physical body and is the interface between the physical and mental body (*manomaya kāya*).

4. The seat of the mind (*hadaya vatthu*) and the five “internal senses” (*pasāda rūpa*) are born with the *manomaya kāya* at the time of human *bhava* (*paṭisandhi*). All these are very fine *rūpa* that our eyes cannot see. Thus one can visualize the *manomaya kāya* as an “energy field” that overlaps the physical body and provides vitality to the inert physical body.

- The Buddha compared the situation of a *manomaya kāya* separating from the physical body to a sword pulled out of its sheath or a snake shedding its skin. Once the *manomaya kāya* leaves, the body is like an inert log. And that is precisely what happens when one dies. The vitality is gone the instant the *manomaya kāya* comes out.

Manomaya Kāya of a Human (or an Animal) is “*Gandhabba*”

5. When a person dies, if he/she has more *kammic* energy left in the human “*bhava*,” then the *manomaya kāya* leaves of the dead body. Then it will wait until another suitable womb becomes available. The *manomaya kāya* is still in the human *bhava*, but we cannot see it. It is in “*paraloka*” or the “netherworld.”

- While waiting in the *paraloka*, they could inhale aroma (*gandha*) from plants and food and get denser. Thus the name “*gandhabba*” (“*gandha*” + “*abba*” where “*abba*” means “taking in”).
- That is why the *manomaya kāya* of a human (or an animal) is called “*gandhabba*.” For more details, see “[Clarification of “Mental Body” and “Physical Body” – Different Types of “Kāya.”](#)”
- This *gandhabba* may stay in that form for even years until pulled into a suitable womb with matching “*gati*.”

How Does the *Gandhabba* See and Hear Outside the Physical Body?

6. When outside a physical body, *gandhabba* sees and hears differently. Seeing does not involve light, and hearing does not require air.

- Perhaps the best way to think about this is how *Brahma* sees. As we have discussed, *Brahma* does not have physical eyes and ears. A *Brahma* is just like a *gandhabba*.
- Furthermore, *Brahma* realms are well above the Earth, and there is insufficient air for sound to travel. *Brahmā* can hear without sound waves traveling through the air. In the same way, they can see without light. Those mechanisms are not perceivable to us.
- That is why they can see and hear over very long distances. This is meant by “*Dibba cakkhu/Dibba sota*” or “divine eye/divine ear.”
- Therefore, *gandhabbā* can see and hear over long distances. That does not require light/air or (physical) eyes/ears.

7. Therefore, a *gandhabba* can see and hear more flexibly. The capabilities of the physical eye and physical ear are much limited.

- A *gandhabba* cannot smell, taste, or touch because its body is too subtle (it is more like an energy field.) Thus, it cannot make physical contact.
- When the *manomaya kāya* is separated from the physical body, it can see and hear without eyes and ears. “Seeing” does not need light (one could look at things far away), and “hearing” does not need air as a medium for the sound to propagate (one could hear sounds from far away). Both mechanisms involve “*Kirana*” (or “rays” in English, similar to electromagnetic radiation).
- Furthermore, the *gandhabba* can “travel” very fast; it is not physical travel. For example, the *suttā* talk about the Buddha or *Arahants* with *iddhi* powers traveling to *deva loka* in a time comparable to the time taken to “stretch a bent arm.”

Gandhabba Inside the Physical Body

8. When the *manomaya kāya* (*gandhabba*) merges with the physical body, “seeing” and “hearing” happens with the help of the physical eye and the physical ear. It is like being inside a military tank. One needs to use the sensors mounted on the tank to see and hear what is going on outside.

- Now, “seeing” happens with the help of the physical eye. The physical eye is like a camera that takes a picture. The brain processes that image and sends it to the *cakkhu pasāda rūpa* in the *manomaya kāya*. Same with the ear. Thus, eyes and ears can be considered sensors mounted on that military tank.
- Therefore, seeing and hearing also degrade with old age, as the physical eyes and physical ears age.
- The brain is like the computer in that tank that processes the information coming in through the sensors.

- Therefore, if there is damage to any of these three “physical instruments” (brain, eyes, ears), the ability to think, see, or hear can be degraded or lost. See [“Our Mental Body – Gandhabba”](#) and [“Brain – Interface between Mind and Body.”](#)

9. However, actual “seeing” and “hearing” still happen at the two *pasāda rūpa* (internal eye and internal ear) associated with the *manomaya kāya*.

- For example, have you ever wondered how to judge the distances as we move around, avoiding bumping into things and each other? The physical eye cannot “judge distances”; see, “The Sense of Being Stared At” by Rupert Sheldrake (2003, p.12). Our eyes can see many things simultaneously and judge the relative distances of all things. This ability is in the *pasāda rūpa* and not in the eyes or the brain.

Out-of-Body Experiences (OBE)

10. The *hadaya vatthu* of the *manomaya kāya* (*gandhabba*) overlaps the physical heart when the two bodies are together. However, in some situations, the *manomaya kāya* can separate from the physical body. That leads to “out-of-body experience (OBE).”

- In his book, “Travels,” the famous author of Jurassic Park, Michael Crichton (1988, p. 307,) mentions his ability to “shift my awareness out of my body and move it around the bedroom.” He says, “..I didn’t think anything about it... I assumed that anybody could do it..”
- Recently, a woman described how she thought that “everybody could do it”: [ABCNEWS: Woman Has ‘Out of Body’ Experiences Whenever She Wants](#)
- A series of books, including “Journeys of the Body,” has been written by Robert A. Monroe based on his experiences.

Near-Death Experiences (NDE)

11. Only a few people can experience OBE at will. Typically, OBE happens under stressful conditions, most commonly during heart operations. These have a unique name of near-death experiences (NDE.) The following video provides a good summary:

[WebLink: youtube: Near Death Experiences & Evidence of the Afterlife](#)

- Of course, there are many books on NDE. “Consciousness Beyond Life” by Pim van Lommel (2010) gives detailed accounts of NDE case studies experienced by people undergoing heart operations.
- A recent book, “Dying to be me: My Journey from Cancer, to Near Death, to True Healing,” by Anita Moorjani (2012), describes the NDE experience in detail.

Our Thoughts Do Not Arise in the Brain, and We Do Not See With Our Eyes

12. The mind-door is the *hadaya vatthu* in the *gandhabba* or the *manomaya kāya*. Thoughts arise in the *hadaya vatthu* in the *gandhabba*, even when the *gandhabba* is INSIDE a physical human body. See, [“Gandhabba Sensing the World – With and Without a Physical Body.”](#)

- “Seeing” happens in the *cakkhu pasāda rūpa* in the *gandhabba*. When outside a human body, that *cakkhu pasāda* can see by itself.
- When inside a human body, that *cakkhu pasāda* is shielded by the body. In that case, the visual signal must come through the eyes, processed by the brain, and that signal is transmitted to the *cakkhu pasāda rūpa*.
- Sometimes, people are born with the *cakkhu pasāda rūpa*, but the optic nerve (or the physical eye itself) may be damaged. They cannot see because the brain is not getting a signal from the eyes. But if the

gandhabba can come out of the body, it can see by itself without needing the help of the brain. The following video clearly illustrates this situation.

[WebLink: youtube: Near Death Experience - Blind woman 'sees' while out of body](#)

- However, in other cases, one may be born blind because one may not have the *cakkhu pasāda rūpa*. In that case, even if the *gandhabba* comes out of the body, it would not be able to see.
- All five sensory faculties are in the *gandhabba*, or the *manomaya kāya*. The brain first processes those signals, and then those signals arrive at the corresponding *pasāda rūpa*. Each *pasāda rūpa* transfers the signal to the *hadaya vatthu* and it is the *hadaya vatthu* that really “sees,” “hears,” etc.

More information at, “[Mental Body – Gandhabba](#)” and “[Gandhabba \(Manomaya Kāya\)](#).”

A new series of posts discusses life in great detail, “[Origin of Life](#).”

13.6.6 Cuti-Paṭisandhi – An Abhidhamma Description

Revised May 26, 2021; re-written September 7, 2022; re-written December 2, 2022

Paṭisandhi does not take place in a womb. It happens simultaneously with the time of the end of the previous existence (*cuti*; pronounced “chuthi.”)

Paṭisandhi Does Not Happen in a Womb

1. Many people believe that *paṭisandhi*, or the linking to a new life, happens in a womb (in human and animal realms). But that is not correct. *Paṭisandhi citta* is experienced in the next very *citta* after the *cuti citta* of the old life in the last *citta vīthi* of the dying person. **The *paṭisandhi* (creation of a new *hadaya vatthu*) is an action by *kammic* energy at the end of the last *citta vīthi*; it is not a *citta* as explained below.**
